ISD is responsible for establishment of the Department's overall automation infrastructure and the successful use of automation within the Department.

ISD consists of five major areas: Application Development and Maintenance Section, Technology Support Section, Project Initiation Unit, CMIS Section, and the Data Center Section.

Technology Support Section

The Technology Support Section provides support services to ISD in the following areas: personnel, recruitment, staff training, budgeting, procurement, interagency agreements and contract management, quality programs, space planning, and general office support. This section also provides support services to all branches of the EC&ISD for personnel, recruitment, and training.

Project Initiation Unit

The role of the Project Initiation Unit (PIU) is to provide guidance and assistance to CDC staff in starting new information technology projects. This includes providing guidance in the development of project concept proposals, feasibility studies, and other documentation required to obtain approval of an information system project. The PIU is responsible for tracking all approved projects and ensuring that all projects comply with State reporting requirements. Functional support, assistance and direction is provided to the ISAs on all system related issues by the Applications Systems Section.

Data Center Section

The Data Center manages maintenance and support functions with the best available tools in order to increase the time that ITS are available to the users/owners. This section of ISD is responsible for the continuous operation and reliability of computer hardware, database systems software, the systems' databases, and communications networks, as well as the security of departmental ITS. As part of the Data Center, the Network Services Unit and the Hardware/Telecommunications Unit provide data communications services and support to ISD and to other functional units as needed, ensure that standard approved practices are adhered to within the Department, and provide and promote the use of consulting resources to the Department when developing new systems or planning changes to existing data facilities.

CMIS Section

The role of the CMIS Section is to develop a single automated offender information system which satisfies the needs of all users of CDC's offender information and serves as the hardware/software platform for all future systems development for the Department. Using state-of-the-art analysis techniques and project management tools, the CMIS Section is committed to providing the Department with an offender information system that meets the needs of the user community.

OISB

OISB has been designated the Department's primary provider of summary statistical information about inmates and parolees. The OISB responds to special information requests, compiles statistical reports, and prepares legislative estimates and population projections. The OISB is responsible also for coordinating the timely, accurate, and consistent coding and entry of data, and performs data integrity QC functions for OBIS and for classification, incident, and other major computerized inmate and parolee databases.

Estimates and Statistical Analysis Section

The Estimates and Statistical Analysis Section is the primary source of summary statistical information on inmates and parolees under the jurisdiction of the Department. This section ensures that the Department has accurate data upon which to base program planning and direction. It also compiles and analyzes information for special projects, court cases, special task forces or programs, and prepares periodic statistical reports about inmates and parolees used in budget planning, legislative responses, and audits. The section prepares all departmental projections of future facility and parole populations, including inmate classification levels, and all population estimates of the impact of proposed legislation, ballot initiatives, and administrative policy changes. It also reviews such information to be disseminated by other branches and divisions outside of the Department.

TSS

TSS coordinates the timely, accurate, and consistent coding and entry of data, and performs data integrity QC functions for major computerized inmate and parolee ITS.

This section provides support to the MIS Committee to facilitate the development and automation of ITS, and conducts regular audits in the field and in Headquarters to maintain the accuracy and integrity of data. The section also provides necessary training for facility and parole region OBIS operators.

Business and Contract Services

BSS

BSS is responsible for the preparation of purchase documents for all EDP equipment and data-related items that are obtained through Headquarters.

BSS shall ensure that all requests submitted for purchase are complete and that the necessary documentation, such as certifications or FSRs, is included.

BSS is the departmental contact with the DGS, Office of Procurement, for all EDP procurement.

Contract Services

The Department's Contract Services Section shall supervise contracts entered into by the Department in a manner which:

- Conserves the financial interests of the State.
- Prevents, so far as possible, any thriftless acts by employees of the Department.
- Avoids thriftless expenditures.

The Contract Services Section assists departmental staff in the development of EDP contract requests, bids, and contracts to achieve program objectives within the legal and regulatory constraints of the State, and to ensure compliance with all departmental policies and procedures.

Warden/Regional Administrators

Each Warden and RPA is ultimately responsible for the security and utilization of all automated systems and data bases in the respective facility or region. This includes the integrity and accuracy of data entered and the physical security of the data, hardware, and the system itself.

Facility/Parole AISA/Regional AISA

Under the direction of the Warden or designee, or Regional Administrator or designee, the facility or region AISA is responsible for the coordination of automated systems issues for the facility. This position acts as the primary contact for Headquarters on automation-related issues, including PC, the DDPS, and all other automated system concerns.

This position is responsible for coordination of staff training on PC applications and systems, justification and acquisition of PC equipment through use of PC, policy, local automated system application support, inmate access to computers, on-site user assistance, information system security, and QC oversight and audit coordination for all databases located in the area of assignment.

Facility/Regional Information Security Coordinators

Facility/regional Information Security Coordinators (ISC), in accordance with State and departmental security policies, are responsible to the Warden/RPA for overseeing policy and procedures on information security access at each facility.

The ISC shall work in coordination with the ISAs and the Department's Information Security Officer.

Departmental Managers/Supervisors

All managers and supervisors assigned supervision of a function automated by DDPS are responsible for:

- Preserving the security and integrity of the Department's information assets and managing the associated risks.
- Ongoing auditing to verify the accuracy and integrity of the data entered by subordinate staff.
- Ensuring that program staff and other users of the DDPS information are aware of and comply with information security policy and procedures.

End Users of EDP

Users are ultimately responsible for:

- The accuracy and integrity of the data they enter into any departmental application.
- Complying with all applicable laws, regulations, and administrative policies, as well as with any additional security policies and procedures established by the Department.
- Notifying their manager/supervisor of any actual or attempted violations of security policies, practices, or procedures.

41020.5 Revisions

The Chief, ISD, or designee shall be responsible for ensuring that the contents of this section are kept current and accurate.

41020.6 References

DOM §§ 43030 and 43020.4.

ARTICLE 3—UNASSIGNED**ARTICLE 4—GENERAL INFORMATION AND POLICY***Revised October 17, 1994***42010.1 Policy**

It is the policy of the Department to create and maintain an annual ITS plan. This plan, prepared by ISD (see DOM 43010.3, Information Management Planning, Responsibilities) and approved by the MIS Committee, shall be the primary basis for structuring the use of ITS in CDC.

The annual departmental ITS plan shall, at a minimum, contain strategy for the use of:

- State data centers for departmental critical systems.
- Distributed systems for departmental critical systems.
- Microcomputers for departmental critical systems.
- Departmental telecommunications and networking systems.
- Facility PBXs for data.
- Local area networks.
- Modems.

42010.2 Purpose

The purpose of this policy is to disseminate the framework for the decision-making process used by the Department in deciding to apply automated solutions to the Department's operations, accounting, and communications problems.

42010.3 ITS Selection Criteria

It is the intent of the Department to employ the following factors when deciding whether to use CDC ITS resources to develop, design, and implement a critical departmental information system:

- The priority of the ITS request (see DOM 43000).
- The relationship to the Department's goals and objectives.
- The extent to which the application is critical to accomplishment of the Department's goals and objectives.
- The risk analysis report (see DOM 49000).
- The results of a pilot project.

The Department's strategies for use of such technologies shall be utilized to determine the design of the approved information system and the choice of hardware, software, and communication.

42010.4 ITS Selection Process

The Department's vehicle for selection of technological alternatives is the FSR. When preparing an FSR, the above selection criteria shall be utilized as a basis. When automation is determined to be the approach to solving a business problem, the Department shall choose the automated system which best accomplishes the tasks involved.

The Department currently maintains a multi-tiered automation platform that offers a wide spectrum of hardware/software choices and which provides several databases accessible to applications for data sharing.

A significant feature of automated systems is the ability to share data. Benefits of data sharing include the saving of valuable input time and, in many cases, may solve cost justification problems by reducing or redirecting data input time and associated personnel years.

There are many automation platforms available for expansion in the Department. However, there are also many elements listed in the selection criteria that lead to the appropriate solution. Regardless of the business problem, selection criteria, or platform (hardware/software) involved, State policy requires that the FSR shall show a cost reduction, a viable cost avoidance, increased revenue, operational necessity, or be the result of a legislative mandate before approval of the concept can become a funded project.

In many instances, the FSR may have a concurrently associated pilot project to provide specific performance, cost, and technological justification for the continuance of the project.

42010.5 ITS Pilot Projects

Pilot projects are scaled down versions of an overall project. They are intended to provide information on cost savings/avoidance, technology use, or performance of bench marking in order to justify implementation of the full project. A pilot project is a subset of the

overall project and is subject to the same approval process as the full project.

Many projects are approved through the Office of Information Technology (OIT) and the FSR process contingent upon pilot justification of the project.

The typical contents of a Pilot Implementation and Evaluation Plan include the sections and contents described below:

Program Performance Improvements

This section defines the programmatic functions to be included in the pilot. It should include a description of the current processes, a description of the new processes, and a plan that includes quantified measurements for evaluating before-and-after program performance.

Physical and Technical Characteristics

This section describes the physical and technical characteristics of the pilot. It shall include descriptions of sites, equipment, software, and telecommunications as well as any other technical resources that are needed to complete the pilot.

Information Requirements

This section defines the informational processing requirements of the pilot. It should include definitions of data inputs (source, type, volume, timing, media, files, edits, etc.), processes (response times, interfaces, security, etc.), and outputs (reports and displays).

Security Requirements

This section addresses the process to be used to determine the potential problems and risks, the controls necessary to safeguard the information hardware and software of the pilot, and the fully-implemented system. Typically, a risk analysis as described in DOM 49030 shall supply the necessary information. The completion of this requirement is especially important since necessary security controls can often increase the required budget.

Financial Requirements

This section contains an estimate of all costs associated with the pilot phase of the project. Project accounting shall be defined so that actual pilot costs and benefits can be compared against estimates, and then used as a basis to refine full implementation estimates.

Operational Recovery Requirement

This section addresses the process to be used to determine the operational recovery requirements. A pilot project shall have an operational recovery plan just for the pilot, and shall address the issue of operational recovery of the proposed fully-implemented system. Often, operational recovery processes add to the overall cost of the project. All critical departmental systems shall have an operational recovery plan as part of their implementation (see DOM 44000).

Management Plan

This section contains a pilot management plan. The plan shall include:

- Pilot responsibilities.
- Pilot schedule.
- Pilot reporting and review.

Any special requirements shall be identified such as training, conversion, or impact on existing operations.

At the end of the pilot and before continuing with the project, a Post Implementation Evaluation Report (PIER) shall be completed and submitted to either the departmental MIS Committee or OIT for review. The pilot PIER shall contain an assessment of programmatic performance during the pilot. The results of the pilot PIER shall be used to re-evaluate the analysis completed for the original feasibility study and, if necessary, be used to make changes to the project FSR.

Once the pilot PIER is approved and any necessary changes are made to the original FSR, the pilot PIER shall be reviewed and the project may be initiated upon its approval.

42010.6 Determining Priorities on ITS Requests

One of the criteria for project selection is the priority of the ITS request. To assist in decision-making, the following schema shall be utilized when assigning a priority to a particular request for information system resources: If multiple requests exist with the same priority, each division submitting requests shall determine the order of further prioritization. For example, if there are four priority 3.1 requests then these four requests should be renumbered as 3.1.1, 3.1.2, 3.1.3, and 3.1.4 in order of further priority.

The following is a description of several different levels of priorities. These priorities can be thought of as an initial rationale for assignment of ITS design, development, and maintenance resources. Each prospective project shall be assigned one of the following priorities prior to its presentation before the MIS Committee:

Priority 1

- This priority level is exclusive to the maintenance of computer programs that have been designed, implemented, and installed. Resources used in this area are for the purpose of keeping existing computer-based systems functional. This priority includes routine maintenance. Any changes to production systems requiring more than 32 person-hours shall not be considered as maintenance, but as a new request which must be justified.

Priority 2

- Those resource requirements over which the Department has little control. Responses to legislative action, requests from the Governor or the agency, and requests from local law enforcement for critical information are all examples of projects that are Priority 2.

Priority 3

- An ITS request shall be Priority 3 if the implementation of the proposed computer-based system will result in a measurable benefit to the Department. Most requests for information system resources fall within this area.

42010.7 Revision

Revised January 4, 2010

The Assistant Secretary EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

42010.8 References

DOM §§ 43000, 44000, and 49000.

ARTICLE 5 — IT STANDARDS

Revised April 9, 2002

42020.1 Policy

It is the policy of the Department to promote standardization in its information management planning and operations through adherence to applicable American National Standards Institute (ANSI), Federal Information Processing Standards (FIPS), and State standards and guidelines. All proposed application or information technology activities shall be evaluated to ensure that all hardware, software, and communications platforms comply with ANSI, FIPS, and State standards and guidelines.

42020.2 Purpose

The purpose of this Policy is to facilitate the inter-organizational sharing and exchange of equipment, data, software, and personnel. The use of these EDP standards shall also facilitate communication:

- Between the Department and other State agencies.
- Between the Department and its EDP vendors.
- Between the Department and its EDP information providers/recipients.
- Among the various organizational units within the Department.

Adherence to established EDP standards should result in improved communication, improved product quality, decreased development time and costs, improved project control, and reduced maintenance costs.

42020.3 Computer Programming Language Standards

Where custom programming is needed, the Department requires the use of vendor-supplied programming languages which are departmental standard languages. The language chosen for development shall be consistent with the requirements of the application and platform for which it is intended.

- For new system development on minicomputer or mainframe platforms, a high level language shall be used wherever feasible. In this case, high level languages include either a fourth generation language such as Oracle or a Computer Assisted Software Engineering (CASE) tool integrated with a COBOL code generator.
- Where a high level language is not feasible or where maintenance shall be performed on applications already written in COBOL, the COBOL programming language shall be used.
- In the personal computer (PC) area, application programming shall use either a language or compiler compatible with the dBASE standard, a fourth generation language for the PC, or a CASE tool integrated with a COBOL code generator.

Use of vendor-supplied data base management, report generation, and file manipulation packages shall be considered in the design of ITS. For data management on all platforms, the use of a vendor-supplied relational data base management system compatible with structured query language (SQL) is recommended. The in-house development of data base management or file manipulation software is strongly discouraged and only permitted where there is no other alternative.

Normally, high level languages possess their own query language and report generation software. Wherever possible, the query language and report generator provided with the high level language shall be used. In situations where such software is not provided with the high level language or will not meet the application's needs, third party query languages and report generation software can be chosen from the wide variety of software supplied by vendors.

42020.3.1 Application Generators

The Department encourages the investigation and use of application generator software.

Application generators are integrated fourth-generation language tools which permit an entire application to be generated. The most useful full-function application generators support a wide range of integrated components including a data base management system (DBMS), data dictionary, security facilities, analysis tools, query language, report generator, documentation generator, screen painter, prototyping facilitator, graphics generator, decision support or financial modeling tools, multiple end-user interfaces, high-level procedural language, data definition language, distributed processing facilities, testing tools, a micro-to-mainframe communications link, and a separate version of the tool for a personal computer.

Application generators for EDP professionals generally include a very high-level procedural language that is used to specify logical operations. These tools are usually integrated with a full-function DBMS that supports both relational and other data structures.

42020.3.2 Operating Software

It is the Department's policy that standard, unmodified, vendor-supplied and maintained software aids be used in lieu of developing unique programs. The objective is to minimize and control the development of specialized programs that allocate, schedule, and control the central processing unit, memory, peripherals, communication, and data storage and retrieval.

42020.3.3 Application Packages

It is the Department's policy that all feasibility studies shall have one alternative addressing the availability, usability, maintainability, and cost-effectiveness of prewritten and tested application programs in lieu of developing major programs in-house. The PC Policy in DOM 48010 addresses PC application packages. The objective is to minimize the development time and costs of major application programs when such programs are available from other sources. For some custom applications, however, in-house development may be the most viable alternative.

42020.4 Systems Development Life Cycle

The Systems Development Life Cycle (SDLC) is a systematic approach to software development that defines development phases. It begins when a software product is conceived and ends when the product is in production and being maintained. It also specifies the activities, products, verification procedures, and completion criteria for each phase. It is an effective engineering management tool that can be used to help ensure that a delivered product is correct and meets the user's needs.

The Department advocates use of the SDLC approach to software development, whether the platform is mini or mainframe. However, if the system being developed is a standalone PC system, development phases may be combined or omitted so long as the delivered product meets the user's needs.

The Department has included the following phases in its SDLC: Concept Phase, Requirements Phase, Design Phase, Development Phase, Testing Phase, and Operation and Maintenance Phase.

42020.4.1 Concept Phase

The Concept Phase is the initial phase of system development during which user needs are described through documentation. The user group is formed during this phase. Examples of the documentation include a statement of needs, advance planning report, project initiation memo, feasibility studies, system definition documentation, regulations, and policies and procedures relevant to the project. Deliverables for this phase include:

- The project charter.
- The project management plan.
- The initial project file.

42020.4.2 Requirements Phase

The Requirements Phase is the period of time in the life cycle during which the requirements for a software product, such as functional and performance capabilities, are defined and documented. Major deliverables include the Software Requirements Specification documentation and the Baseline Report.

42020.4.3 Design Phase

The Design Phase is the period of time in which the designs for architecture, software components, interfaces and data are created, documented, and verified to satisfy requirements. Major deliverables include the Detailed Design Specification, the Test Plan, the Implementation Plan, the Users' Manual and Procedures Manual, and the Training Plan.

42020.4.4 Development Phase

The Development Phase is the period of time in the development life cycle during which a software product is created from design, documentation is tested, and errors are corrected. Major deliverables of this phase include system documentation, program documentation, program code, and test results documentation.

42020.4.5 Testing Phase

The Testing Phase is the period of time in the life cycle in which the software product is evaluated by users and technical staff to determine whether requirements have been satisfied. Tests performed include the Requirements Test, the Operational Environment Tests, the Acceptance Test, and the Pilot Test.

42020.4.6 Operation and Maintenance Phase

The Operation and Maintenance Phase is the period of time in the life cycle during which a software product is used in its operational environment, monitored for satisfactory performance, and modified as necessary to correct problems or respond to changing requirements. The Post Implementation Evaluation Report (PIER) is completed during this phase.

42020.5 User Computing Within CDCR

The standards addressed in DOM 42020.3 above, Computer Programming Language Standards, apply to end-users as well as EDP professionals, although the end-user shall not use procedural or third generation languages and shall restrict any programming activity to the personal computer.

42020.5.1 Personal Computer

The personal computer is meant to be a productivity tool to assist the user in fulfilling regular professional responsibilities.

42020.5.2 Database/Spreadsheet

A user-developed system is defined as a database or spreadsheet that is created, accessed, or updated with an off-the-shelf software application.

42020.5.3 Management Approval

Approval shall be obtained from appropriate division management prior to expending any resources on a user-developed system that is used in an official capacity by any departmental personnel.

42020.5.4 Standard EDP Documentation

In order to ensure continued operation of user-developed systems, documentation shall be provided. Documentation shall include:

- A list of application software used (e.g., dBase, Foxbase, Lotus, Quattro, etc.).
- System requirements.
- A user manual to explain:
 - Where the system is installed (PC location, drive, directory).
 - How the system is started.
 - Any macros or batch files used.
 - Data entry procedures.
 - Report generation.
 - Backup procedures.
 - File descriptions for each file used in the system:
 - File name.
 - File type (report, label, index, memo, database, spreadsheet).
 - Structure of any data files:
 - Description of each data field.

Refer also to DOM 48010, Departmental Workgroup Computer Policy.

42020.6 Revisions

Revised July 10, 2014

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

DOM § 48010.

ARTICLE 6 — QUALITY ASSURANCE AND QUALITY CONTROL

Revised October 17, 1994

42030.1 Policy

It is the policy of the Department to provide Quality Assurance (QA) and Quality Control (QC) functions to ensure the usability and effectiveness of all EDP applications and processes.

42030.2 Purpose

The purpose of the QA function is to facilitate the continuous review and improvement of processes which underlie the creation and maintenance of automated systems and databases. The purpose of the QC function is to implement methods and practices that allow EDP products and processes to be measured against predefined standards. Together, QA and QC ensure that automated systems and their products better meet user needs.

42030.3 Responsibilities

CDC recognizes that maintaining adequate, correct and current offender data is critical to departmental operations that directly affect staff, inmate, and public safety. OISB, in the ASD, is responsible for major current, proposed, and future statewide offender ITS. QA procedures to be applied to these departmental ITS include:

- Continual monitoring of the validity and currency of data contained in offender ITS;
- Establishment of methods to identify errors or inadequacies in these data; and
- Development of appropriate procedures and solutions to correct inaccuracies or out-of-date data.

The OISB does not directly implement most procedures and solutions. Rather, once a problem has been identified the OISB provides the owners of the data with tools and procedures aimed at eliminating the problem. After the owners of the data have implemented these tools and procedures, the OISB provides ongoing review of the data to ensure its accuracy, currency, and completeness.

A QA council shall be established to ensure that departmental QA policies, standards, and procedures are implemented and maintained. Responsibility for implementing QA resides with each entity (i.e., division, branch, or unit) that develops and maintains systems.

QA Council

The QA council shall be comprised of the departmental Information Security Officer (Chairperson) and representatives from each division responsible for the development and maintenance of ITS. The QA council shall:

- Develop departmental QA policies, standards, and procedures.
- Develop and implement an annual QA plan in support of the Department's strategic plan.
- Ensure that systems developed or maintained in the Department adhere to CDC QA/QC standards and procedures.
- Support programs that educate CDC staff in the importance of quality concepts and in the tools, techniques, methods, and practices that facilitate QA and QC.
- Act as a source of information on processing quality data and on the need for continued commitment to an improvement effort.
- Review industry standards (e.g., ANSI/IEEE, FIPS) to facilitate the development of departmental EDP standards.

The QA council shall meet quarterly or as needed.

Division/Branch/Unit

Accountability for QA and QC is fixed on a system by system basis. See DOM 47000, Departmental Systems, for ownership designation and fixed responsibility for QC.

OISB is responsible for data integrity in major, statewide offender ITS.

In fulfilling QA/QC responsibilities each entity shall, where applicable, ensure that:

- ITS projects are reviewed during all phases of the systems development life cycle (SDLC).
- Data integrity is developed and maintained, both in the SDLC and by the unit designated responsible for QC, on each application or database.
- User requirements are well-defined (for systems development or maintenance projects), all objectives of the work effort have been met, and results are appropriate keeping in mind each project's overall objectives.
- The ITS processes are monitored and measured for the purpose of improving these processes.
- Quality improvement programs are established and quality concepts are promoted throughout Department branches that develop and maintain ITS.

42030.4 Definitions

Acceptance Testing

Testing that insures a computer system meets the needs of the organization and the end-user.

Client (User)

The individual or organization that utilizes a product.

Correctness

(1) The extent to which software conforms to its specifications and standards; (2) the extent to which software is free from design and coding defects (i.e., "fault-free"); and (3) the extent to which software meets user expectations.

Cost of Quality

The cost of quality for a product is the sum of prevention, detection, correction, and client costs. Prevention cost is the total cost incurred during product development prior to general release. Detection, correction, and client costs are post-release costs associated with reworking due to defects. QA shall be considered cost-effective when post-release costs are reduced by an amount greater than any increase in prevention costs resulting from the inclusion of QA in the development process.

Data Base Integrity

The accuracy, completeness, and timeliness of information contained in a database.

Defect

A variance from specifications/standards or attribute/function not contained in the software requirements specifications.

Defect-Prone Process

A process/activity during which a high number of defects occur.

Desk Checking

An informal evaluation technique in which the person who developed a unit of code inspects it visually to identify possible errors or violations of development standards.

Failure

Inability of a product or service to perform its required functions within previously established limits.

Integration Testing

Testing performed on groups of modules to ensure data and control are passed properly between modules.

Long-Term Capacity Planning

The objective of long-term capacity planning is to develop methods and means for ensuring that hardware, system software, communications, and system design shall meet the long-term objectives for additional processing required by new applications, integration of new processors and platforms, and new generations of software. This plan encompasses a five- to seven- year period and is designed to help determine budget requirements and goals for the Department.

Post Implementation Evaluation Report

The review of a computer, computer system, or computer network that has been in operation for at least six months and no longer than two years for the purpose of matching the requirements of the system against what has been produced, so as to ensure that stated requirements have been met.

Problem Reporting/ Tracking

A process of reporting outstanding problems, having them assigned for resolution, and closing them out when the user has been notified that the problems have been solved.

Process

The work activities that produce products, including the efforts of people and equipment.

Product

The output of a process including the goods and services produced by individuals and the organization.

Quality

The extent to which a product meets the expectations and requirements of the user.

QA

(1) A staff function designed to support line management in performing the QC function. As such, QA identifies those processes, both good and bad, that affect quality, and is used to advise management of such effects. A management decision may then be necessary to ensure that QC techniques are implemented and maintained; and

(2) The function that uses measurement and analysis to continually improve processing, procedures, and standards so that management can be "assured" of their staff following such methods, procedures, and standards, as well as their ability to produce products that meet specified requirements.

QC

(1) The collection of activities to ensure that defects are neither made nor implemented. While QA monitors the processes involved in the production cycle, QC is an integral part of work and is the responsibility of each employee; and

(2) A line function used to measure quality associated with specific products or services. QC is the responsibility of each ITS area and is the function responsible for the quality of the work being done within a specific area or for a specific project.

Quality Improvement Program

A program designed to reduce the number of defects produced.

Regression Testing

Testing applied after changes have been made to ensure that no unwanted changes have been introduced.

Requirement

The specification(s) for satisfying a user need; is associated with a standard by which the satisfaction of that need can be measured.

Resource Management

The determination of current and short-term needs for hardware, system performance, and communications, and the allocation of such resources to meet the overall goals and current short-term plans of the Department. Resource Management requires the gathering of data about new processing needs and applications not addressed in long-range planning, as well as any other information that impacts current system resources.

System Testing

A generic term that differentiates various types of higher order testing from unit testing.

Total Quality Management

Consists of continuous process improvement activities involving everyone in an organization--managers and workers--in a totally integrated effort toward improving performance at every level. This improved performance is directed toward satisfying such cross-functional goals as quality, cost, schedule, mission, need, and suitability. Total Quality Management, or TQM, integrates fundamental management techniques, existing improvement efforts, and technical tools under a disciplined approach focused on continuous process improvement. The activities are focused ultimately on increased client/user satisfaction.

Unit Testing

Testing performed on a single, standalone module or unit of code.

Validation

The process of comparing a product in any stage of its development with specified requirements in order to determine whether the correct product is being produced.

Walk-Through

A review process in which a designer or programmer leads one or more members of the development team through a segment of documentation or code that he or she has written, and other team members ask questions and make comments about technique, style, possible errors, violation of development standards, and other issues.

DOM § 47000.

ARTICLE 7 — INFORMATION MANAGEMENT PLANNING*Revised October 17, 1994***43010.1 Policy**

The Department has established a management planning process that is consistent with the needs, resources, and use of information technology within the Department. In compliance with the SAM 4900.2, the established management planning process:

- Is consistent with the current statewide policies contained in SAM and current management memos for managing information and information technology.
- Is linked to and supportive of CDC's overall program planning and budgeting processes.
- Involves CDC executive management and program managers, as well as those who are responsible for the use, operation, and support of ITS.
- Addresses current and projected relationships among the various aspects of information technology employed by CDC, including equipment (such as mainframes and minicomputers, personal computers, and office systems), software (such as computer languages, including fourth generation languages, and applications packages), and telecommunications.
- Relates current and planned uses of information technology to the information required for the accomplishment of CDC's mission and key programs.
- Considers means for ensuring the continuing availability of the information required to support critical programs in the event of disaster, or other unforeseen events resulting in an interruption of CDC's regular systems operation.

43010.2 Purpose

Planning includes identifying needs and opportunities, defining objectives, and determining appropriate means of achieving those objectives. The purposes of information management planning are to:

- Find ways that information technology can improve the effectiveness of CDC programs.
- Analyze the costs and benefits of information technology and allocate resources systematically.
- Clarify CDC's priorities and be able to react to changes with a minimal amount of disruption.
- Improve communication among executive managers, staff responsible for information technology, and the users of the programs.
- Provide managers with a long-term perspective on current problems that simplifies making decisions and solving problems.

In addition, planning requirements are intended to provide the Office of Information Technology (OIT) and other control and oversight organizations with the basic facts those organizations require to carry out their responsibilities concerning the use of information technology in State government.

43010.3 Responsibility

It is the responsibility of ISD to develop and maintain a departmental strategic plan. This plan shall be approved by the MIS Committee. Once approved, this plan shall serve as the road map for planned automation efforts within the Department. This plan shall be utilized to link divisional planning efforts to the goals and objectives of the division and Department. The MIS Committee shall ensure that all projects under its responsibility are consistent with and do not conflict with other planned efforts. Compatibility and connectivity shall be the shared vision of all planning.

43010.4 Information Management Planning Infrastructure

CDC has developed a formal structure for planning which includes an MIS Committee and an ongoing planning process that involves analysis, evaluation, and review of proposed projects. This project review, reporting, and evaluation process is covered in DOM Subchapter 44000, Project Review, Reporting and Evaluation. Alternately, this subchapter describes the MIS Committee, the MIS Support Unit (MIS-SU), ISD, and the role each plays in the management planning process.

MIS Committee

The MIS Committee, whose members represent the divisions within CDC and the CalPIA, is responsible for executive leadership and strategic planning in seeking out opportunities to employ information technology for the achievement of the Department's mission, goals, and objectives. The MIS Committee assesses all proposed ITS projects (ranked according to their importance to the Department's mission) to assure conformance with the Department's mission statement, strategic plan, and key programs. The committee also reviews and approves the Department's Information Management Annual Plan (IMAP) and endorses future needs identified in long-range planning documents. DOM 41020.3 describes the role of the MIS Committee.

ISD

ISD is responsible for development and maintenance of the overall strategic plan of the Department. This plan shall be the result of compiling all divisional automation needs into a single document for the prioritization of projects and alignment with the budget by the MIS Committee.

ISD is also responsible for maintaining and updating the IMAP. This includes: working with the user to develop appropriate documents for inclusion in the IMAP for those projects reportable to OIT, ensuring that the appropriate reportable project forms are completed, notifying the user once a project has been approved, whether it is delegated or non-delegated, maintaining copies of all reports, and, as appropriate, acting as a liaison between OIT and CDC project management concerning reporting requirements throughout the life cycle of the project.

MIS-SU

The MIS-SU provides functional support to the MIS Committee by coordinating MIS Committee meeting agendas, coordinating the review of proposed ITS projects, preparing annual updates for the Department cabinet on all CDC automation efforts for the current year as well as strategic planning for the coming year, and participating in the development of presentations for the committee addressing current technical innovations and coordinating the review of information system concepts to ensure compliance and consonance with the budget cycle. Refer to DOM 41020.4 for more details on the role of the MIS-SU.

43010.5 Information Management Planning Process

The Department uses the MBO approach for planning information management. The Department's mission and philosophy statement were developed based on MBO principles, and resulted from many planning sessions held to enlist ideas from numerous levels, disciplines, and segments within the Department.

Each Division formulates its own goals and objectives using departmental goals and objectives as the foundation for the effort. The CDC ITS planning process originates with the development of the strategic plan (see also DOM 43010.3). MBO goals and objectives are developed to structure the Department's efforts to achieve the purposes specified in the strategic plan. The establishment of such goals and objectives allows the identification of automation opportunities consistent with the plan, and the planning process then provides for the development of various concept statements to enable articulation of methods that may be used to benefit from the identified automation opportunities. All automation concept papers are reviewed by the MIS Committee and, if approved, become part of the IMAP. Implementation of an automation concept that requires increased or new source funding may require the preparation of a Budget Concept Statement, and a BCP may also be necessary. Establishment of certain automation projects as specified in this Chapter shall require prior approval of an FSR.

ISD shall provide the general guidelines for objectives that require automated solutions. The resulting document, the Information Systems Budget Concept Statement (IS-BCS), is submitted to ISD and the MIS-SU for review and recommendations.

ISD shall coordinate development of the IMAP, and shall maintain it to ensure that a vision of connectivity and compatibility is followed. Redundancy of data input is another area of concern, and this plan shall help ensure that a planned automation effort is coordinated within the department. Duplication of automation efforts is a costly and time-consuming waste. The IMAP shall serve as a road map for automated efforts.

The MIS Committee shall measure proposed projects against CDC's, mission and established departmental priorities so as to best prioritize and approve proposed EDP projects.

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

43010.7 References

SAM § 4900.2.

DOM §§ 44000, 41020.3 and 41020.4.

ARTICLE 8 — PROJECT INITIATION AND APPROVAL*Revised October 17, 1994***43020.1 Policy**

It is the policy of the Department that information system proposals shall receive departmental and, as required, control agency approval before project development can proceed.

43020.2 Purpose

The purpose of this policy is to ensure that the Department is in compliance with all control agency requirements. The ultimate authority for approval of information technology projects lies with the Office of Information Technology (OIT), but it is the intention of the Director of OIT to delegate such approval authority selectively, to the maximum extent practicable, to the departmental director. Refer to SAM 4819.34 for the factors considered by OIT in determining whether a project can be delegated.

43020.3 Project Initiation and Approval Process

ITS proposals requiring a change in the Governor's budget for funding purposes shall receive departmental and control agency review and approval before project development can proceed.

43020.3.1 Requests Requiring a Change in the Governor's Budget

If funding for a project is already available, departmental and control agency review and approval is still necessary but the approval process is somewhat different and is discussed in DOM 43020.3.2.

Early each calendar year, MIS-SU shall distribute a memorandum to CDC Executive Staff, Wardens, and RPAs detailing the IS-BCS request process for the fiscal year beginning approximately 18 months later. This memorandum shall include a timeline containing significant deadlines which shall be met in order for a request to proceed through the approval process. The following is a general discussion of this process.

ITS proposals shall be presented to the MIS Committee utilizing the IS-BCS format. The purpose of this format is to provide sufficient information to departmental executive staff to allow for a determination of whether the proposal warrants further development as a BCP. BCPs are discussed in DOM 21010 and SAM 6100.

Refer to the following instructions when completing the IS-BCS and note that the format shall not exceed two pages in length including any supporting documentation. Requests out of compliance with the established format and instructions shall be returned to the requester without consideration.

Statement of Problem

Indicate as concisely as possible what problem exists or what level of service is not being provided.

Description of Existing Operation

Describe the current operation including a description of the criticality of the data, how or whether it is currently being collected, and the current staffing allocated to its collection, maintenance, and analysis.

Adverse Effects of Continuing Existing Operation

Specify what adverse effects would be experienced by continuing the existing operation. These effects should be quantified to the extent possible.

Alternatives for Solving the Problem

Describe several alternative methods considered to address the problem. List the pros and cons of each alternative.

Recommended Solution

Select an alternative. Discuss how its implementation would alleviate those problems identified above. Quantify the staffing or all other resources needed to implement the proposed change.

Identification of Needed Resources (Estimate of Cost/Benefits)

Although a detailed cost/benefit analysis cannot be provided until an FSR is completed, the requester should be able to provide a conservative estimate of any real savings or costs associated with the ITS concept.

IS-BCS's shall follow the normal chain of command for divisional approval prior to review by the MIS Committee.

Timeframe

Process

December

MIS-SU staff coordinate the presentation of the annual update to the Cabinet detailing all major CDC automation efforts during the previous year and strategic planning for the coming year.

Late January

IS-BCSs that have received division approval are submitted to MIS-SU for inclusion on the March MIS Committee meeting agenda. MIS-SU and ISD staff review the IS-BCS in terms of its conceptual integrity and consistency with the Department's approved strategic plan. ISD staff review the IS-BCS to assess its technical feasibility. MIS-SU and ISD staff each formulate a recommendation addressing the IS-BCS for MIS Committee deliberation.

Early March

The MIS Committee reviews the IS-BCS and recommendations to determine whether an FSR and BCP should be developed.

Timeframe

Process

Late March

If the concept is approved at the MIS Committee meeting, the IS's FSR/BCP development may begin (see SAM Section 4920). Requester submits a New Reportable Project Form to ISD to include the project in the departmental Information Management Annual Plan (IMAP).

Also due to ISD at this time is the project's draft FSR.

Early June

ISD submits the IMAP to the MIS Committee for review and approval. BCPs and departmentally approved FSRs shall be submitted to OBM for initial review.

Mid June

Departmentally approved FSRs are submitted to the OIT for review.

Late July

The Department conducts hearings on BCPs from all departmental program areas to determine which proposals will go forward to Agency for review and approval. The IMAP is submitted to the OIT for a determination of the project's reporting requirements through its review of the IMAP. See SAM 4900 and DOM 43020.4 for specific information and instructions.

Early August

Agency conducts its review of departmentally approved BCPs to determine which proposals will go forward to the DOF for review and approval.

September

DOF conducts its review of Agency-approved BCPs to determine which BCPs shall result in actual project development funded by a change in the Governor's budget. DOF decisions are usually distributed by the end of December.

Project development can begin upon DOF's approval of the BCP.

43020.3.2 Projects to be Funded with Existing Monies (No New Positions)

ITS proposals to be funded with existing monies (no new positions) shall receive departmental and, if necessary, control agency review and approval before project development can proceed.

Refer to DOM 48010.2 for information regarding the procurement of personal computer equipment.

ITS proposals shall be presented to the MIS Committee utilizing the IS-BCS format. The purpose of this format is to provide sufficient information to departmental executive staff to enable a determination of whether the proposal warrants further development (see DOM 43010.1.1).

The IS-BCS shall follow the normal chain of command for divisional approval before it is reviewed by the MIS Committee.

After the IS-BCS has received divisional approval, it shall be submitted to MIS-SU for inclusion on the MIS Committee agenda. See DOM 41020 for additional information regarding the MIS Committee and MIS-SU.

If the IS-BCS receives MIS Committee approval and meets the requirements of a reportable project, the requester shall submit a New Reportable Project Form to ISD to include the system in the departmental IMAP. OIT shall determine the

project's reporting requirements through its review of the IMAP. See SAM Section 4900 and DOM 43020.5 for specific information and instructions.

After the IS-BCS receives MIS Committee approval, the project's FSR can be prepared (see SAM Section 4920 for specific information and instructions). Upon completion and divisional approval, the FSR is due to ISD for technical review and approval.

Depending on the reporting requirements established for the project, the departmentally-approved FSR shall next be submitted to OIT for review and approval. See SAM Section 4900 and DOM 43020.5 for further details.

Project development can begin once the FSR has received departmental and, if required, OIT approval.

43020.3.3 Non-reportable Projects Under \$50,000 to be Funded With Existing Monies (No New Positions)

Non-reportable information technology projects under \$50,000 that are funded through redirection do not require submission of an IS-BCS. Instead, a CDC Internal Project Summary Fact Sheet (IPSFS) must be completed and forwarded to the ISD Project Initiation Unit (PIU) for review. The IPSFS must then be presented to the MIS Committee for approval. Once approval is obtained, the PIU shall forward a copy of the approval letter to the project manager and maintain a copy in the ISD files.

43020.4 Information Management Annual Plan (IMAP)

The IMAP represents the results of CDC's planning process. It identifies those projects for which resource commitments are anticipated and, in effect, summarizes CDC plans, projects, and other activities associated with its use of information technology.

SAM Section 4900 requires that each agency involved in information technology activities prepare an IMAP.

43020.4.1 IMAP Composition

The IMAP consists of three parts:

- Part A: Overview.
- Part B: Information Technology Activities.
- Part C: Exhibits and Supporting Documents.

43020.4.1.1 Part A - Overview

Part A contains a brief description of the agency's mission, its current problems and opportunities associated with information management, and its strategy and objectives for the use of information technology.

43020.4.1.2 Part B – Information Technology

Part B provides an overview of current and proposed development projects and potential acquisition activities, with particular emphasis on those projects and activities that are relatively costly, require a BCP, or meet any of the other special criteria described in SAM Section 4902.1.

43020.4.1.3 Part C - Exhibits and Supporting Documents

Part C contains Documents that supplement the information in Parts A and B of the IMAP by providing details about the agency's organization of information management and its available resources.

43020.4.2 IMAP Purpose

The purpose of the IMAP is to ensure that CDC is systematic in identifying and satisfying its information requirements and provides OIT and other control and oversight agencies with the basic facts those organizations require to carry out their responsibilities regarding the use of information technology in State government.

43020.4.3 IMAP Responsibilities

ISD is responsible for assembling and maintaining the IMAP. ISD develops IMAP - Part A and the support documents contained in Part C. Part B of the IMAP consists of New Reportable Project Forms that are completed by the project teams involved in the information technology projects, and summaries of project status for any major projects.

43020.4.4 Reportable Projects

SAM Section 4902.1 lists the criteria used to determine if a project is considered reportable. Reportable projects require completion of a New Reportable Project Form. This form is included in Section B of the IMAP and provides OIT with information on the proposed project. OIT uses this information to determine whether approval authority for the project shall be delegated to CDC or if OIT shall retain the approval authority.

All proposed projects that do not meet the criteria in SAM Section 4902.1 are considered non-reportable projects. The costs of agency development or new acquisition projects, whether reportable or not, shall be included in the Agency Information Technology Costs spreadsheet included in Part C of the IMAP.

43020.4.4.1 Definition of Reportable Project

A Reportable Project is defined as a planned development activity or the planned acquisition of a new or enhanced information technology capability (as defined in SAM Section 4819.2) which meets one or more of the following criteria:

- The project involves total estimated development or acquisition costs that are greater than the cost threshold established for the agency (see DOM 43020.4.4.2 for further information on cost thresholds).
- The project involves a budget augmentation through submission of a BCP or Budget Revision to increase the agency's existing information technology activities.
- The project is a new system development or acquisition made in response to a legislative mandate or the project is subject to special legislative review as specified in budget control language or other legislation.
- The project involves direct public access by private sector organizations or individuals to State data bases .
- The project involves contracts for professional, managerial, or technical services (excluding services received through interagency agreements) totalling more than \$25,000.
- The project involves acquisition of one or more personal computers, personal computer software, or related peripherals, and the agency does not have an approved Workgroup Computing Policy (SAM Section 4989 et seq.).
- The project involves installation or expansion of wide area network data communication services other than those offered by the DGS, Division of Telecommunications, or a State consolidated data center as defined in SAM Section 4982.
- The project involves one or more of the following emerging technologies and more than \$25,000 will be spent on acquisition of hardware or software required for the technology:
 - Document imaging.
 - Geographic information systems.
 - Computer aided systems engineering.
 - Expert systems/artificial intelligence.

43020.4.4.2 Cost Thresholds

Cost thresholds are assigned to agencies based on their size and past experiences with information technology projects. CDC is a Category I agency; therefore any CDC project shall be a reportable project if it will cost more than \$500,000.

43020.5 FSR

CDC adheres strictly to State policy requiring that a feasibility study be conducted and a FSR be approved prior to the expenditure of resources on any information technology project. The only exception to this requirement is the justification and acquisition of personal computers and related commodities through use of the Workgroup Computing Justification Form (SAM Section 4991.1).

The term Information Technology Project is defined in DOM 41010.3, EDP Definitions.

The feasibility study shall be performed in conformance with the requirements of SAM Sections 4922 through 4927.

The FSR shall be prepared in accordance with SAM Sections 4928 through 4928.4.

The FSR shall be reviewed and approved in accordance with the general requirement of SAM Section 4819.3, State Information Management Authority and Responsibility, as well as the specific requirements of SAM Sections 4926 through 4926.5.

Refer to SAM and the handbook, "How To Conduct A Feasibility Study," published by OIT, for specific guidelines for completing each step of the process.

43020.5.1 FSR Purpose

The Feasibility Study represents the first opportunity within the project management sequence for State management to assess the full implications of a proposed information technology project. The purposes of the Feasibility Study are to:

- Determine whether a proposed project represents a justified expenditure of public resources in terms of whether it:
 - Is responsive to a clearly defined, program-related problem or opportunity.
 - Is the best of the possible alternatives.
 - Is within the technical and managerial capabilities of the agency.

- Would provide benefits over the life of the application that exceed development and operations costs. Such benefits typically include reduced program costs, avoidance of future program cost increases, increased program revenues, or provision of program services that can be provided only through the use of information technology.
- Provide a means for achieving agreement between agency executive management, program management, and project management as to:
 - The nature, benefits, schedule, and costs of proposed project.
 - Their respective management responsibilities over the course of the project.
- Provide executive branch control agencies and the Legislature with sufficient information to assess the merits of the proposed project and determine the nature and extent of project oversight requirements.

43020.5.2 Internal Approval Process

In addition to the State policy and procedures which govern information technology projects, FSRs shall be developed and approved according to the following internal process. Once the FSR and/or CDC internal Project Summary Fact Sheet is completed and approved by the Division approving authority, it is submitted to:

- ISD, Project Initiation Unit (PIU), for technical review and recommendation.
- MIS-SU for inclusion on MIS Committee agenda.
- MIS Committee for final departmental approval.
- ISD/PIU for submission to OIT for review and approval if the project is reportable.
- ISD/PIU for preparation of certification statement (Certifications for Personal Computer systems approved through the Personal Computer Policy are prepared by the MIS-SU).
- Chairperson, MIS Committee, to sign certification.
- Deputy Director, ASD, and Assistant Director, OOC, to sign certification.

OIT's response to the Department regarding project approval/disapproval is sent directly to the Chief Deputy Director and then to ISD. Subsequently, ISD shall update the project file and route copies to the project initiator(s) and to MIS-SU.

The process differs slightly if a BCP is required. In order to ensure that the FSR is developed and approved within the mandatory time frames, refer to DOM 43020.3.1.

In addition to a project file, ISD (Systems Support) also monitors initial and subsequent equipment procurements to ensure they fall within the scope of the approved FSR or CDC Internal Summary Fact Sheet. Copies of all approved procurement documents shall be routed to the MIS-SU.

ARTICLE 9 — PROJECT MANAGEMENT

Revised October 17, 1994

43030.1 Policy

It is the policy of the Department to create an automation organizational structure that is conducive to the successful implementation, maintenance, and control of the EDP environment.

43030.2 Purpose

The purpose of this policy is to ensure that an EDP infrastructure is created which meets the needs of the Department and fixes

responsibility and authority for the development and maintenance of EDP systems.

43030.3 Responsibility

EDP project management is project team oriented. Maintenance and development projects each have a technical project manager. New development projects also have a user project manager. Each project, whether maintenance or new development, is uniquely and individually staffed with a separate project team. DOM 43030.4 describes the structure of project teams.

Team Concept

Project Team Structure

The project team is a self-sufficient unit staffed with the appropriate technical and managerial resources to address the complexity and size of a project through its life cycle—from initiation through the development, implementation, and maintenance phases. A project team shall have the following composition:

- A core technical staff of analysts and programmers to construct the system.
- Users to participate in requirements definition, design "walkthroughs," and test planning and execution.
- Trainers to develop user manuals and to train users.
- Administrative staff to support project tracking and management reporting.

Each project shall have a technical project manager and an associated user group. New development projects shall also have a user project manager who shall stay with the project through implementation. The user project manager shall be responsible for "what" needs to be automated. The technical project manager shall be responsible for the technical aspects (i.e., the "how") of the project. DOM 43030.5 (User Project Manager) and DOM 43030.6 (Technical Project Manager) outline the roles and responsibilities of the user and technical project managers, respectively.

User Project Manager

The user project manager is selected by CDC executive management from one of the functional areas affected by the project and reports to the appropriate Deputy Director on the MIS Committee.

The user project manager provides overall guidance to the technical project manager. The user project manager keeps fully apprised of the status of the project through regular written project reports from the technical project manager, although the technical project manager reports formally to ISD management.

The user project manager is fully responsible for the project and, in effect, is subcontracting for technical expertise. Therefore, this contract is with ISD rather than a specific technical project manager. This means that the usual reporting structure for ISD is maintained.

The user project manager is responsible for securing the necessary project funding and project resources. In addition, the user project manager is responsible for ensuring that the IMAP, BCS, BCP, FSR, Special Project Report (SPR), Quarterly Project Report (QPR), Post implementation Evaluation Report (PIER), and any other required documentation is prepared and approved by departmental management. ISD shall be responsible to review, log, and submit these reports to EDP control agencies as required.

The user project manager communicates project needs and priorities to the technical project manager, as reported by the user group. The user project manager is also responsible for ensuring that the user community provides the necessary time and resources required throughout the project, such as needs and requirements analysis, data conversion, and user training, as addressed in the approved project management plan.

Technical Project Manager

The technical project manager is appointed by ISD and reports to a unit manager within the Applications Systems Section who, in turn, reports to the ISD Application Systems Manager. The technical project team members report directly to the technical project manager.

The technical project manager has full authority over and responsibility for the technical aspects of the project and the technical project team members. This responsibility includes:

- Detailed planning.
- Staff recruitment and management.
- Project budget control.
- Requirements specifications.
- System design.
- Programming and testing.
- System implementation.
- Data file conversion (responsibility for this task shall be shared with user staff depending upon the resources allocated to the project and the conversion approach approved in the implementation plan).

- System maintenance.
- User training (responsibility for this task may vary depending upon the resources allocated to the project and the training approach approved in the project management plan).

User Groups

Each project (whether new development or maintenance) shall establish an associated user group comprised of representatives from the user community. The purpose of these user groups is to provide a forum for communication between the project teams and those who use the application systems, in order to facilitate more effective use of existing application systems and assist in the development of new systems.

The user group representatives prioritize requests for system enhancements, exchange information on system usage, and provide feedback on system modifications.

43030.4 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

43030.5 References

DOM §§ 43030.4 - 43030.6.

ARTICLE 10 — PROJECT REVIEW AND BASIC POLICY

Revised October 17, 1994

44010.1 Policy

The Department has established policy regarding project reporting and evaluation for each approved information technology project, in accordance with the requirements of SAM 4940 of the. All operating units within CDC shall adhere to the requirements set forth in the current section concerning project review, reporting, and evaluation. Additional requirements may be specified by the Office of Information Technology (OIT) in response to the Department's IMAP or in response to other needs reported by the Department (agency requirements are provided in SAM 4819.3 through 4819.39).

44010.2 Purpose

The purpose of this policy is to ensure that State and CDC project review requirements are implemented on an ongoing basis.

44010.3 Project Review Overview

Once the FSR for an information technology project has been approved by the MIS Committee (also by OIT for non-delegated projects or the DGS for projects involving communications), the design, acquisition, development, and implementation phases of the project may proceed.

The success of each phase of the project shall be evaluated and reported in terms of the project objectives. Included are project reports, a formal management review, and a post-implementation assessment. (SAM 4944 through 4946.2 provide a framework for project monitoring and evaluation.)

44010.3.1 Information Technology Project Reports

Two information technology project reports are specified, the Quarterly Project Report (QPR) and the Special Project Report (SPR). These reports:

- Support continuing communication among all project participants (project management, program management and executive management).
- Expose potential problems with respect to the availability of resources or the meeting of mandated project dates.
- Provide for CDC management and control agency review of project progress at appropriate intervals throughout the life of the project.

44010.3.2 Formal Project Review

In addition to the QPR and SPR, a major management briefing, known as the Formal Project Review (FPR) may be initiated by CDC management or required by the OIT for any information technology project. The FPR allows for CDC management or control agency review of large projects after completion of the general design phase, but before substantial resources have been committed to the project. It may also be employed to provide a formal management assessment of a project at any point during the development cycle.

44010.3.3 Post Implementation Assessment

Following completion of each information technology project, CDC shall carry out a post-implementation assessment. The assessment shall:

- Measure the benefits and costs of the newly-implemented information technology application or system against the original objectives.
- Document projected operations and maintenance costs over the life of the application or system.

44010.3.4 EDP Audit

Every two years the Department shall carry out and submit to the DOF an EDP audit. This audit is the responsibility of the Internal Audit Unit of PFAB (see DOM 49040). The audit shall be consistent with the DOF publication, "Information Technology Security and Risk Management Guidelines." This guide reflects the SAM requirements regarding the responsibility and control of EDP policy, and provides audit guidelines; however, it may not cover all areas to be audited. The guide and information about it are available through the Internal Audit Unit of PFAB.

To accomplish this audit it is likely that ITS under development shall be selected for audit on a sample basis. The intent of the audit is to make an assessment of the degree of compliance by CDC with departmental and State policies and procedures. The scope of the audit shall include, but not be limited to, the following:

- Project approvals, feasibility study, and risk analysis (DOM 49020).
- Operational recovery plan (DOM 49030).
- Information security practices.

The Project Manager is responsible for ensuring that the project documentation is in compliance with policy.

44010.4 Project Review Central Control/Clearinghouse

All IMAP "external" and "internal" reporting activities shall be monitored by CDC management through a central control agency/contact with regard to OIT reportable projects, OIT projects delegated to the Department, and all other Department information technology projects with an approved FSR, including those requiring a Summary Fact Sheet or Workgroup Computing Justification Form. The ISD, System Support Unit (ISD-SSU) shall be responsible for the central clearinghouse function. Refer to DOM 43030.3, User Project Manager, for project reporting responsibilities.

Responsibilities

The ISD-SSU central clearinghouse monitors all external and internal quarterly project reports, special project reports, and post-implementation assessments. Project managers shall ensure that appropriate sign-off is attained on all projects before documents are submitted to the central clearinghouse. It is the responsibility of the central clearinghouse to:

- Develop a cataloging system to monitor the completion and distribution of required reporting per schedule.
- Notify project managers of scheduled reports prior to the report due date.
- Review completed reports to ensure adherence to the State-required format.
- Maintain copies of all reports and, in effect, act as a liaison between OIT and CDC project management concerning reporting requirements throughout the life cycle of the project.

Summary Information Report

Since ITS approval and oversight are the responsibility of the MIS Committee, the central clearinghouse function shall provide summary information on each ITS project to the MIS Staff Committee at its quarterly meetings. This summary information shall include:

- The project title.
- MIS approval date.
- Projected completion date.
- OIT delegation status.
- FSR status.
- QPR status.
- PIER status.

The central clearinghouse shall also provide the MIS Committee with a summary project status profile which may be in the form of the project's most current QPR and, if necessary, SPR.

44010.5 Project Compliance Review

The Department is subject to compliance reviews conducted by OIT, or by specified units within CDC. The purpose of a compliance review is to verify CDC

adherence to Department and State information technology policies and procedures.

Types of Compliance Reviews

ITS within CDC are subject to four types of reviews:

- Type 1. Policy compliance reviews (SAM Section 4942).
- Type 2. EDP audit reviews (see DOM 49050).
- Type 3. Information security, risk management, operational recovery compliance reviews (SAM Sections 4840 through 4845; DOM 49000).
- Type 4. Facility peer reviews.

Policy Compliance Review

Type 1 - Policy compliance reviews are conducted by OIT. Responses to this type of review shall be coordinated by the central clearinghouse function of ISD.

EDP Audit Reviews

Type 2 - EDP audit reviews are part of an audit required by SAM, and are usually conducted by the Internal Audits Unit of PFAB. Alternately, it is possible that Type 2 reviews shall be carried out by the Audits Group of DOF, but responsibility for the audit reviews remains with PFAB. The owner of an information system is responsible for providing responses to audit findings regarding that system.

Security, Risk, and Operational Compliance Reviews

Type 3 - Information security, risk management, and operational recovery compliance reviews are ongoing and conducted by the Information Security Unit within PFAB. These reviews are usually not oriented to a specific system or project, and are limited in scope to the policies contained in SAM Sections 4840 through 4845, and DOM Subchapter 49000.

Facility Peer Reviews

Type 4 - Facility peer reviews are reviews of business services operations conducted by the Department on a rotational basis at each of CDC's facilities. The EDP portion of the peer review includes a functional review of Offender Based Information Services, the DDPS, and personal computer security practices and system utilization.

The review teams are composed of business services and administrative staff from headquarters and the facilities.

NonDelegated Projects

OIT reviews project reporting documentation in conjunction with its compliance review and oversight responsibilities.

Delegated Projects

For delegated projects, the MIS Committee shall determine when a compliance review is to be conducted, the scope of the review, and who shall perform the review.

ARTICLE 11 — PROJECT REPORTING REQUIREMENTS

Revised October 17, 1994

44020.1 Policy

It is the policy of the Department to monitor the implementation and outcome of EDP projects within the Department to ensure that progress and outcome information is tracked and reported, as specified by SAM 4940 and as otherwise required by State oversight agencies. Additional requirements may be specified by the Office of Information Technology (OIT) in response to the Department's Information Management Annual Plan (IMAP) or in response to other needs reported by the Department (see SAM 4819.3 through 4819.39 for departmental requirements).

44020.2 Purpose

The purpose of this policy is to ensure that adherence to all project reporting requirements outlined by State oversight agencies is monitored and met.

44020.3 Project Reporting Requirements— Compliance Review Reporting Schedule

The Compliance Review Reporting Schedule for both delegated and non-delegated projects is set by the MIS Committee in accordance with central control agency and Department requirements, and is reported to the central clearinghouse.

44020.4 Project Reporting Requirements—Audit of Information Technology Projects

All information technology projects are subject to audit, with project reporting and evaluation documents being an essential aspect of the audit trail (SAM Section 4943). CDC is subject to project audits by control agencies as well as internal audits. Documentation supporting project decisions shall be kept by the Department in the central clearinghouse for a minimum period of two years following approval of the post-implementation assessment.

Nondelegated Projects

OIT audits project reporting documentation in conjunction with its audit and oversight responsibilities.

Delegated Projects

For delegated projects, the MIS Committee shall determine when an audit is to be conducted, the scope of the audit, and who shall perform the audit.

44020.5 Project Reporting Requirements— Project Audit Reporting Schedule

The project audit reporting schedule for both delegated and non-delegated projects is set by the MIS Committee in accordance with central control agency and Department requirements, and is reported to the central clearinghouse.

44020.6 Project Reporting Requirements— Quarterly Project Report Requirements

Quarterly Project Reports (QPR) are usually required of the project manager in the case of projects subject to monitoring by OIT, and may be required as an additional reporting responsibility for delegated projects. OIT's response to the Department's IMAP or FSR specifies the necessity of preparing QPRs for particular projects. On occasion, reporting on other than a quarterly basis is established by the FSR and approved by the MIS Committee.

Every external QPR shall be reviewed and approved by the affected division, and by the Director, or designee. Two copies of the QPR shall be submitted to the central clearinghouse for submittal to OIT by no later than the 15th day of the month following the end of each fiscal quarter (i.e., October 15, January 15, April 15, and July 15). A copy of the QPR shall be forwarded to the Office of the Legislative Analyst.

CDC also encourages use of the QPR format to document project activity for projects that do not qualify as reportable, or for which project monitoring has been delegated to the Department. These internal QPRs shall be reviewed and approved by the affected division. It is not necessary to forward copies of these reports to OIT or the Office of the Legislative Analyst unless so required by OIT.

The QPR shall contain a brief summary of project status including an explanation of any minor deviations from the original project plan. An updated Project Management Schedule (see SAM Section 4928.4) showing actual completion dates of specific tasks/deliverables shall be attached. The QPR shall conform to the standard format provided in SAM Section 4944.1.

Some deviations from the project plan require preparation and submission of a Special Project Report (SPR). The conditions that require preparation of an SPR are defined in SAM Sections 4945 and 4945.1.

44020.7 Project Reporting Requirements— Special Project Reports

General Reporting Requirements (SAM Section 4945): Preparation of an SPR is required whenever a project deviates substantially from the costs, benefits or schedules documented in the approved FSR, or when a major revision occurs in project requirements or methodology. No expenditure of funds shall be made to implement an alternative course of action until approval has been received from OIT or the Director of CDC, as appropriate (SAM Section 4945). SAM Section 4945.1 lists specific conditions for the required submission of an SPR to OIT.

SPRs, which must be submitted to OIT, shall be transmitted within 30 days after recognition of a substantial deviation. Two copies of the SPR shall be submitted to OIT and one copy to the Office of the Legislative Analyst. SPRs shall be signed by the Director of CDC or designee.

If a QPR is due to OIT during the period the Department is engaged in preparing the SPR, CDC shall submit the QPR (see SAM Sections 4944 through 4944.1) stating that an SPR is under development and providing an approximate date for its completion.

The format and content of the SPR transmittal letter for each non-delegated or delegated project shall conform to the standard formats provided in SAM Section 4945.

Conditions Requiring Submission to OIT (SAM Section 4945.1):

- Projects subject to OIT approval/oversight - an SPR shall be submitted to OIT if:
 - The information technology project's total costs deviate or are anticipated to deviate, by ten percent (higher or lower) from the estimated information technology project budget (to be measured against the combined total of each fiscal year's One-time Costs plus Continuing Costs on the Summary Fact Sheet, SAM 4930 Illustration 1).
 - The project schedule falls behind or is anticipated to fall behind by 10 percent or more (to be measured using the key management milestones critical to project success reported on the Summary Fact Sheet, SAM Section 4930, Illustration 1).
 - The total program benefits deviate or are anticipated to deviate by 10 percent (higher or lower) from the estimated total program benefits (to be measured against the combined total of each fiscal year's Cost Savings and Cost Avoidances on the Summary Fact Sheet, SAM 4930, Illustration 1).
 - A major change occurs in project requirements or methodology.
- Projects subject to approval and oversight by the Special Project Director (delegated or nonreportable), and projects for which project reporting has been delegated to the Director after OIT approval of the FSR: Submission of an SPR to OIT is required if the revised project costs exceed or are estimated to exceed CDC's IMAP cost threshold (SAM Section 4902.12), and one or more of the following conditions are true:
 - The total information technology project costs deviate or are anticipated to deviate by 10 percent (higher or lower) from the estimated information technology project budget (to be measured against the combined total of each fiscal year's One-time Costs vs. Continuing Costs on the Summary Fact Sheet, SAM Section 4930 Illustration 1).
 - The project schedule falls behind or is anticipated to fall behind by 10 percent or more (to be measured using the key management milestones critical to project success reported on the Summary Fact Sheet, SAM 4930, Illustration 1).
 - The total program benefits deviate or are anticipated to deviate by 10 percent (higher or lower) from the estimated total program benefits (to be measured against the combined total of each fiscal year's Cost Savings and Cost Avoidances on the Summary Fact Sheet, SAM Section 4930, Illustration 1).
 - A major change occurs in project requirements or methodology.
- If an SPR for a delegated project must be submitted to OIT, attach to the SPR a copy of the approved FSR and the project approval letter signed by the Director or designee.
- Internal special project reports—Delegated or nonreportable projects which exceed projected project development costs but do not (according to control agency requirements) require an SPR.

An internal SPR shall be required when the cost thresholds below are exceeded:

- By less than \$100,000—The project exceeds cost projections by 25 percent or more.
- Between \$100,000 and \$200,000—The project exceeds cost projections by 15 percent or more.
- Over \$200,000—The project exceeds cost projections by 10 percent or more.

The SPR shall provide sufficient information for Department management, executive branch control agencies, and the Legislature to assess the merits of the proposed project change and determine the nature and extent of future project oversight requirements. If an SPR lacks sufficient information for these purposes, OIT may request that the Department provide additional information.

SPRs shall be commensurate with the level of deviation from the approved FSR. Therefore, the Department shall determine whether to

prepare a revised FSR, provide the information required by the minimum content for an SPR (defined below), or do something in between these two extremes.

The minimum content for an SPR consists of a description of the project status, an explanation of the reason for the project deviation, a revised project management schedule, and economic summary information. CDC shall prepare an SPR with at least the minimum content described below:

- Project Status - An explanation of the problems encountered or opportunities identified that have led to the preparation of the SPR. This section of the SPR shall include as appropriate:
 - Changes in Project Requirements or Methodology - An explanation of the proposed change from the anticipated course of action, including the reasons for the change and why this proposed alternative methodology is now the preferred course of action.
 - Cost Benefit or Schedule Deviations - An explanation of the deviation from the originally anticipated costs, benefits or schedule. This section shall include the reasons for the deviation and the proposed course of action to bring the project back within planned costs, benefits, or schedule.
- Summary Fact Sheet - This section shall include a revised Summary Fact Sheet (SAM Sections 4930 through 4930.1) indicating accomplishments to date by using actual dates in the Target Date fields of the Project Schedule, then continuing the schedule by focusing on the yet to be accomplished milestones critical to project success. The cost analysis portion shall contain all actual costs to date plus revised projected costs through the end of the project.

For example, this may be the second fiscal year that the project has been under development: indicate the actual project costs for last year and place them in the first column of Personnel Years (PYs) and Costs, then combine the actual costs for the current fiscal year-to-date with the anticipated costs for the remainder of this fiscal year, and place them in the second column of PYs and Costs. Indicate the anticipated costs for each succeeding budget year through the end of the project.

If the feasibility of the project was documented through the preparation of a FSR, the following additional content shall be provided:

- Project Management Schedule - A revised Project Management Schedule (SAM Section 4928.4) indicating accomplishments to date and focusing on the duration of critical tasks, major management decision-points, and progress reporting milestones shall be included in the SPR.
- Economic Analysis Worksheet - A revised Economic Analysis Worksheet (SAM Sections 4929 through 4929.2) shall be provided. The worksheet shall contain all actual costs to date plus revised projected costs through the end of the project.

For example, this may be the second fiscal year that the project has been under development: Indicate the actual project costs for last year and place them in the first column of PYs and Costs, then combine the actual costs for the current fiscal year-to-date with the anticipated costs for the remainder of this fiscal year, and place them in the second column of PYs and Costs. Indicate the anticipated costs for each succeeding budget year through the end of the project.

44020.8 Project Reporting Requirements-- Formal Project Review

A Formal Project Review (FPR) may be initiated by Department management or required by OIT for any information technology project. The FPR typically provides a formal management or control agency checkpoint after completion of the project's general design phase, but before substantial resources have been committed. It may also provide a formal management assessment of a project at any point during the development cycle. FPRs may be scheduled during the procurement process if doing so does not violate procurement requirements.)

OIT may notify the Department that an FPR is required in its response to the Department's IMAP, in an FSR approval document, or in any correspondence subsequent to project approval.

SAM Section 4946.1 provides guidance in the form of recommended content for the preparation and presentation of an FPR. Depending upon the complexity, sensitivity, and size of the project, an FPR presentation shall usually require between two and four hours. When the Department receives services from a data center or from another agency, responsible staff should request that representatives of the data center or the servicing agency attend.

Content and Organization

The FPR provides an opportunity for a final critique of the merits of the proposed information technology project prior to commitment of substantial resources. It shall be used also as a checkpoint during project development to maintain management involvement and awareness with respect to crucial decision points. The FPR allows assessment of: (1) systems design, (2) current estimates of costs and benefits, (3) management controls, and (4) probability of project success.

Composition of Formal Project Reviews (FPR)

An FPR topic outline is provided in SAM Section 4946.1, Illustration

1. Typically, the FPR is organized into four major sections:

- Background.
- Technical Strategy.
- Project Management Controls.
- Summary.

The suggested content of each of these sections is specified in SAM Sections 4946.11 through 4946.14.

It is important to adapt the presentation to suit the audience. Executive management, for example, may not be interested in the technical details of a project, but may be anxious to know the time frames for system operation and the capture of proposed tangible and intangible benefits.

Background Section

The Background Section of the FPR shall provide the facts necessary to understand the problem or opportunity being addressed by the project, and the defined project objectives within their program context.

Typically, this portion of the presentation shall include:

- A summary of the information contained in the requirements section of the FSR, with a note of any significant changes since preparation of the FSR.
- A brief overview of the project technical strategy as defined in the FSR's functional requirements (technical topics are normally covered in detail during the technical strategy section of the FPR).
- A brief description of project organization as it relates to the overall organization of the Department, and any specific user organization within the Department.
- An overview of the information contained in the Management Plan Section of the FSR.
- A management summary that concentrates on costs, benefits, savings, PY reductions, or other quantifiable or non-quantifiable management benefits that were described in the FSR.
- A synopsis of anticipated decisions that shall be necessary at the conclusion of the presentation.

Ideally, the FPR is based upon information that is more current than is contained in the FSR; therefore, the estimates should be an update to the economic analysis portions of the FSR.

The presentation on technical strategy shall include typically:

- Major system processes, including file or data section base relationships, interfaces with existing systems, and impact on other systems currently in operation, planned, or under development. This overview of systems capabilities should inform the audience regarding methods for processing information, input mechanisms, output mechanisms, error detection techniques, and data distribution or access.
- Specific hardware and software requirements for development and operation of the system; the level of presentation detail should be based on the audience's technical background and need to make informed decisions.
- Lease versus purchase decisions for equipment and software, and the procurement mechanism and schedule.
- Requirements for security and asset protection: level of security, security methods, and contingency plans.

Project Management

This section provides an overview of the project management plan based upon the Management Plan section of the FSR with updates to reflect changes since the preparation of the FSR. Additionally, a review of the project phases is typically presented including design, development, testing, implementation, conversion, and acceptance. Coordination of responsibility for these phases is also presented.

Other topics included in the project management section of the presentation are:

- Training requirements, plans, and costs for technical and user staff.
- Special management requirements for system conversion.
- User or technical responsibilities for data conversion.
- The time frame for accomplishment of conversion.

Summary

The concluding section of the FPR normally summarizes the current status of the project, describes the next steps in the project, highlights potential problems for the project, and closes with any required decisions that may be necessary.

44020.9 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

44020.10 References

SAM §§ 4819.3 - 4819.39, 4902.12, 4928.4, 4929 to 4929.2, 4930 to 4930.1, 4940, 4943, 4944 to 4944.1, 4945 to 4945.1, 4946.1, and 4946.11 - 4946.14.

ARTICLE 12 — PROJECT EVALUATION

Revised October 17, 1994

44030.1 Policy

It is the policy of the Department to evaluate its EDP projects as required by the SAM 4940, and as otherwise required by State oversight agencies. Additional requirements may be specified by the Office of Information Technology (OIT) in response to the Department's Information Management Annual Plan (IMAP) or in response to other needs reported by the Department.

44030.2 Purpose

The purpose of this policy is to ensure the implementation of all project evaluation requirements specified by laws and regulations, and State and departmental policies.

44030.3 Post-implementation Evaluation Report (PIER) General Information

A post-implementation assessment shall be carried out by the Department following the completion of each information technology project. No project is considered complete until the report of that assessment, the Post-implementation Evaluation Report (PIER), has been approved by OIT or the Department Director, as specified in OIT's response to the Department's IMAP and in accordance with SAM 4819.36 and 4941. Approval of a PIER by OIT or The Director, as required, terminates project reporting requirements.

The post-implementation assessment shall be conducted after the new information technology capability has been operational for a sufficient period of time to allow its benefits and costs to be accurately assessed. Initial operational problems shall have been resolved and sufficient experience and data shall have been accumulated to determine whether the project met the proposed objectives, was completed within the anticipated time and budgetary constraints, and achieved the proposed benefits. The optimum time after implementation to conduct the assessment depends upon the nature of the project. Six months after implementation is typical. The assessment shall be completed within two years of implementation of the information technology capability.

The required content for a PIER is defined in SAM Section 4947.2. The format and content of the PIER Transmittal Letter for each non-delegated project shall conform to the standard format shown in SAM 4947, Illustration 1. The format and content of the Transmittal Letter for each delegated project requiring submission of the PIER to OIT shall conform to the standard format shown in SAM 4947, Illustration 2.

44030.4 PIER Reporting Requirements

Two copies of the PIER shall be submitted to OIT and one copy to the Office of the Legislative Analyst if the project was subject to approval and oversight by OIT. If OIT has delegated project approval authority to CDC, but in conjunction with that delegation has required that CDC submit a copy of the PIER following completion of the project, CDC's submission of the PIER shall include a copy of the approved FSR with its signed Project Approval Letter.

PIERs for projects subject to approval and oversight by the Department Director (delegated or non-reportable) or projects for which project reporting has been delegated to the Department Director after OIT approval of the FSR shall be approved by the Director or designee (see SAM 4971.1).

44030.5 PIER Content and Format

The level of detail included in the PIER shall be commensurate with the scope and complexity of the project and its anticipated benefits. The narrative portion of the PIER for a minor project can be as brief as one or two pages. However, it shall provide sufficient information for Department management, executive branch control agencies, and the Legislature to assess the success of the project (see SAM Section 4947.2).

PIER Composition

The PIER is comprised of five sections:

- **Background and Summary of Results Section.** A brief summary is provided of the project history, objectives, and results. Topics to be discussed normally include: how the project was initiated, how it progressed, problems that were overcome, user and management acceptance of the operational application, how Department management views the management of the project, and how the application fits into the Department's overall management and operations strategy.
- **Attainment of Objectives Section.** Specific objectives are established during the feasibility study for each project and are documented in the FSR. These objectives, which are normally defined in terms of measurable impact on Department programs and resources, provide the baseline for measurement of the project's success. Accordingly, the narrative portion of this section of the PIER shall describe the project outcome with respect to each objective included in the FSR. This section shall also include a clear statement regarding the capture of benefits and whether they were achieved as anticipated.

Two attachments shall be included with this section of the PIER:

- **Attachment 1--PIER Economic Summary Report.** Project costs and benefits shall be summarized using the PIER Economic Summary (SAM 4947.2 Illustration1). This spreadsheet allows comparison of the anticipated costs of the selected alternative, as documented in the FSR Economic Analysis Summary (SAM 4929.3), with actual project costs from the project start date through the period of project operation chosen as the basis for the PIER. For detailed information on the completion of entries in the PIER Economic Summary, see the instructions for the FSREconomic Analysis Worksheet (SAM 4929.1 through 4929.2) and the Economic Analysis Summary (SAM 4929.3).
- **Significant deviations from the anticipated costs shall be explained in the narrative portion of this section.**
- **Attachment 2--Project Management Schedule Report.** A revised Project Management Schedule (see SAM 4928.4) showing targeted and actual completion dates for major accomplishments during the project shall be provided, with significant deviations from the original schedule explained in the narrative.
- **Projected Operations/Maintenance Costs Section.** The Summary of Projected Operations/Maintenance Costs documents anticipated costs of systems operation and maintenance by fiscal year over the expected operational life of the application or system. These costs shall begin where the costs contained in the PIER Economic Summary ended. For detailed information on completion of the specific line items in the Summary of Projected Operations/Maintenance Costs, see the instructions for continuing costs found on lines 9-16 of the FSR Economic Analysis Worksheet contained in SAM 4929.1 through 4929.2.
- **Special Observations Section.** This section is optional. If completed, it should contain a narrative of any notable occurrences or factors that contributed to the project's success, or problems or other information that could be helpful during future project efforts.
- **Corrective Actions Section.** This section shall be included when the project is deemed to be a limited success or a failure, or when there are significant differences between project expectations (as expressed in the FSR) and project results.
 - If the project was a limited success or involved significant differences between expectations and results, alternatives for improving the outcome shall be summarized. If the project was a failure, available alternatives for addressing the problem or opportunity shall be summarized.

44030.6 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

44030.7 References

SAM §§ 4819.36, 4928.4, 4929.1 - 4929.3, 4941, 4941, 4941.1, and 4947 - 4947.1.

ARTICLE 13 — POLICY AND GENERAL INFORMATION

Revised October 19, 1994

45010.1 Policy

The Department shall require competitive acquisition of EDP goods and services in accordance with applicable provisions of the SAM, the PCC, the GC, and the LC.

45010.2 Purpose

This section describes the departmental requirements for procurement and contract of EDP goods and services.

45010.3 EDP

EDP is referred to as information technology, encompassing all computerized and auxiliary automated information handling including systems analysis and design, conversion of data, computer programming, information storage and retrieval, voice/video aspects, requisite system controls, data communications, simulation, and all related interactions between people and machines.

45010.4 Responsibility

Contract Services Section

The Department's Contract Services Section (CSS) shall supervise EDP contracts entered into by CDC in a manner that:

- Conserves the financial interests of the Department and the State.
- Prevents, so far as possible, any thriftless acts by employees of CDC.
- Avoids unnecessary expenditures.

BSS

The BSS is responsible for the preparation of purchase documents for all EDP equipment and data-related items for use in CDC headquarters or by the P&CSD. As directed by the Department, the BSS is responsible also for the procurement of EDP equipment by specific facilities.

- BSS shall ensure that all requests submitted for purchase are complete and the necessary documentation is included, such as certifications or FSRs.
- BSS is the departmental contact with the DGS, Office of Procurement, for all EDP procurements processed for CDC headquarters and P&CSD, as well as for specified facility procurements.

P&CD

The P&CD is responsible for procurement of EDP equipment for new prison construction projects.

DGS

The DGS is the State agency that exercises supervision over EDP contracts entered into by all other State agencies.

The DOF and DGS have general powers of supervision over matters concerning the financial and business policies of the State, and they are empowered to institute investigations and procedures deemed proper in the best interests of the State.

While most types of contracts are reviewed and approved by the Legal Services Division of DGS, EDP contracts are reviewed and approved by the DGS, EDP Acquisitions Unit. This unit reviews contracts to ensure that the best interests of the State are preserved, that State agencies comply with applicable laws, rules, and regulations, and that expenditures are made as wisely and economically as possible given the needs of agencies.

45010.5 Procurement/Contracting Project Authorization

Before a contract or purchase order for a new EDP project can be let for the purchase of goods and services, the program concept and any needed equipment and services shall be evaluated by the Department's MIS Committee. Also, the program concept and any equipment/services shall be contained in the Department's Information Management Annual Plan (IMAP) filed with DOF (see DOM 43010, Information Management Planning, for additional information). If accepted for incorporation in the IMAP, a feasibility study is conducted to thoroughly evaluate the concept and analyze the cost/benefits. The completed FSR shall be approved at all appropriate levels of Department management, and by the Director.

The FSR shall then be forwarded to the DOF, Office of Information Technology (OIT) for review and approval, unless the project is delegated to the Department (refer to DOM 43020, FSR Policy, for additional information). If approved, a budget concept paper may be prepared or a BCP initiated for review and approval by top management of the Department and DOF. Approval of the Legislature and the Governor also may be required through the budget enactment process. If the project is authorized, the drafting of contracts shall be initiated.

45010.6 Certification Affidavit for an EDP Purchase Order/Contract

Certain EDP purchase orders and contracts must be accompanied by a "Certification of Compliance with Policies Pursuant to SAM 4819.39 and 4832,"

as specified in SAM 4819.39 and 4832. Procurements not requiring such certification are:

- Procurements for less than \$10,000;
- Procurements limited to only maintenance services;
- Procurements in support of previously approved efforts (see SAM 4819.38);
- Procurements of services to conduct a feasibility study provided the services are limited to supporting or conducting the feasibility study and/or preparing the FSR; or
- Procurements of/for excluded activities as described in SAM 4819.32.

The certification attests that the program or function for which the purchase documents are being processed has been approved by the DOF. SAM 4832 provides a sample of the certification affidavit.

In order to comply with the certification requirement, all EDP contracts and purchase orders not included by the above criteria shall be forwarded to headquarters. Additionally, every amendment to such EDP contracts or interagency agreements shall include a certification affidavit.

Certifications for microcomputers, peripheral equipment and software shall be prepared by MIS-SU. Certification for all other EDP equipment shall be prepared by the ISD. The certification shall contain a statement signed by the Director, or designee affirming that the equipment is in compliance with SAM-requirements concerning information technology. In CDC, the Director has delegated approval authority to the Deputy Director, ASD, and the Assistant Director, OOC. Adherence to this certification requirement adds approximately two weeks to the routing process within CDC headquarters.

45010.7 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

45010.8 References

SAM §§ 4800, 4819.39, and 4832.
DOM §§ 43010 and 43020.

ARTICLE 14 — METHODS OF PROCUREMENT

Revised October 19, 1994

45020.1 Policy

The Department shall utilize acceptable methods of procurement when purchasing or contracting for EDP goods and services.

45020.2 Purpose

This section describes the acceptable methods of procurement and provides a reference for more detailed information and procedures.

45020.3 Process for the Procurement of EDP Goods/Services

The process for procurement of EDP goods and services is more complicated than for procurement of non-EDP goods and services. There is no single competitive procedure best suited universally for all categories of acquisition. Each procurement consists of differing elements that, overall, lend themselves more appropriately to one technique than to another. It is the statutory responsibility of the DGS to select the method of procurement to be used for each situation.

45020.4 Competitive Methods of Procurement

Basically, there are three methods of competitive procurement:

- Invitation for Bids (IFB).
- Request for Proposals (RFP).
- Request for Quotations (RFQ).

45020.4.1 Invitation for Bids

The IFB is highly structured and details the requirements in technical terms. Bids shall address specifically the requirements and technical specifications in order to be deemed a responsive bid.

45020.4.2 Request for Proposals

A RFP states the requirements in more general terms than the IFB. This method allows vendors to submit their own individualized proposals free of any precise State-imposed mix of hardware, software, etc.

45020.4.3 Request for Quotations

RFQs are used when EDP procurements are so straightforward and clearly defined that they do not warrant the time investment required to prepare and execute an IFB or RFP.

45020.5 Specific Procedures for Competitive Bid Process

Detailed information on the competitive bid process, including sample bid formats, is contained in SAM 5211 through 5222. Additionally, the competitive bid process followed by CDC is outlined in DOM 22040.23.

45020.6 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

45020.7 References

SAM §§ 5211 - 5222.
DOM § 22040.23.

ARTICLE 15 — LEASE OF EDP EQUIPMENT

Revised October 19, 1994

45030.1 Policy

The Department shall process EDP equipment lease agreements in accordance with the requirements of SAM.

45030.2 Purpose

This section describes the equipment leasing requirements provided by applicable SAM sections.

45030.3 EDP Equipment Leasing-Agreements

Provisions governing the lease of EDP equipment are contained in SAM 5252 and in DOM 22040.26.8. SAM 5252 also contains a model EDP equipment lease contract to be used by all State agencies in developing a final contract for the lease of EDP equipment. SAM provisions allow CDC to tailor the model to conform with specific situations (see the illustration in SAM 5252 for additional information on the lease agreement).

Riders

The general terms and conditions normally contained in an EDP-equipment lease contract are set forth in the main body of the contract. Conditions and issues that are unique to the specific contract are set forth as "riders" to the contract.

45030.4 Leasing Initial EDP Computer Terminal Equipment

The initial complement of computer terminal equipment shall be leased or purchased. There are specific acquisition requirements for terminal equipment. Also, each system may have a unique procurement or leasing process. See DOM 47000, Departmental Systems, for specific information.

45030.5 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

ARTICLE 16 — PURCHASE OF EDP EQUIPMENT*

Revised October 19, 1994

Not Cleared For Statewide Use

45040.1 Policy

The Department shall follow acceptable procurement practices and methods as defined in SAM and DOM.

45040.2 Purpose

This section describes the responsibility for initiating an EDP procurement and the methods used to purchase EDP equipment and software.

45040.3 Responsibility

The responsibility for initiating an EDP procurement is defined as follows:

Headquarters and the P&CSD

If the procurement request meets the criteria established by the Workgroup Computing Policy, the requesting unit shall be responsible for preparing the appropriate purchase documents including, but not limited to, a CDC Form 954,

Intraoffice Requisition, and a Workgroup Computing Justification Form. The forms and any supporting documentation shall be submitted through the appropriate chain of command, as indicated on the forms, for approval prior to submission to MIS-SU, which in turn shall review the documents for completeness and consistency with the Department's information system standards. MIS-SU shall then route the forms to BSS at headquarters for procurement. See DOM 48010.2 for a definition of the Workgroup Computing Policy.

If the procurement request is not covered by the Workgroup Computing Policy, the requesting unit shall complete an FSR. The Project Initiation Unit located in ISD will provide assistance in completing FSRs.

Facilities

The requesting unit shall submit the request to the facility procurement office for approval and preparation of the required purchase documents. The facility shall forward the request to ISD for review and divisional approval. ISD shall then forward the request to the MIS-SU for further review and processing.

New Prison Construction/Capital Outlay

P&CD is responsible for submitting the documents to the MIS-SU for review, approval, and certification. P&CD shall prepare the appropriate purchase documents to acquire the EDP equipment.

45040.4 EDP Equipment Purchasing- Document Preparation

All purchase documents for procurement of EDP equipment for headquarters, P&CSD, and facility purchases that are funded at headquarters, shall be processed through BSS at headquarters.

Purchase documents for procurement of EDP equipment by capital outlay or by bond funds for new prison construction shall be processed through PCD.

45040.5 Methods For Purchasing EDP Equipment For Use Within The Department

EDP equipment can be purchased using a number of different methods. The methods are:

- Master Purchase Contract-Generally established by the DGS , Office of Procurement (refer to instructions on the contract for preparation and submission of required documents).
- State Price Schedule-Established by the DGS Office of Procurement (refer to instructions on the State Price Schedule for preparation and submission required documents).
- Delegated Purchasing Authority-Purchases may be made in accordance with the terms and conditions specified in the purchasing authority delegated by the DGS Office of Procurement.
- Purchase Estimates-These are for equipment that cannot be made through master purchase contracts, State price schedules, or delegated purchasing authority.

45040.6 Purchasing EDP Computer Terminal Equipment Within CDC

Computer terminal equipment shall be leased or purchased. There are specific acquisition requirements for terminal equipment. Each system may require a unique procurement or leasing process. See DOM 47000, Departmental Systems, for specific information.

45040.7 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

SAM §§ 3500 et seq., and 5000 et seq.

DOM § 47000.

DOM § 22030.

ARTICLE 17 — GENERAL CONTRACT REQUIREMENTS

Revised October 19, 1994

45050.1 Policy

The Department shall process EDP contracts in accordance with applicable requirements of SAM.

45050.2 Purpose

This section describes the General Contract Requirements provided in SAM.

45050.3 General Contract Requirements- Procedures

In general, contracts for EDP goods and services shall follow the same process and procedures used for all other contracts as outlined in SAM 1200 through 1269 and 5200 through 5293, and as contained in DOM 22040.

45050.4 General Contract Advertising Requirements in State Contracts Register

EDP contracts with a dollar value of \$1,000 or more, with the exception of contracts for proprietary software, shall be advertised in the California State Contracts Register. The responsible program unit shall prepare a Standard Form 815, Request to Advertise in California State Register, or a Standard Form 821, Request for Exemption from Contract Advertising. The Standard Form 821 is used when time does not permit advertising due to a bona fide emergency, or when the Department's best interest would be better served by a sole source vendor. The applicable form shall be forwarded to the DGS, EDP Acquisitions Unit, for processing and for approval of any exemption request.

45050.5 General Contracts Approval Authority

The DGS has delegated authority to all State departments to approve contracts of \$12,500 or less. All EDP contracts exceeding \$12,500 shall be forwarded for review and approval to the DGS, EDP Acquisitions Unit. A certification affidavit shall accompany every contract.

45050.6 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

45050.7 References

SAM §§ 1200 - 1269, and 5200 - 5293.

DOM § 22040.

ARTICLE 18 — EDP MAINTENANCE CONTRACTS

Revised October 19, 1994

45060.1 Policy

The Department shall process EDP maintenance contracts in accordance with requirements of SAM and shall utilize the SAM model contract when developing EDP maintenance contracts.

45060.2 Purpose

The purpose of this section is to ensure that EDP maintenance contracts adhere to applicable SAM provisions.

45060.3 Maintenance Contracts for EDP and Telecommunications Equipment

SAM 5220 contains requirements pertaining to contracts for the maintenance of EDP and telecommunication equipment installed under State contracts. SAM 5255.11 and 5255.12 contain a model maintenance contract for use by all State agencies in developing a final maintenance contract for EDP equipment or software. The model contract shall be tailored by CDC to conform with each specific situation.

The CDC Contract Services Section (CSS) maintains an updated version of the SAM model contract. Contact CSS for the latest version available.

45060.4 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

45060.5 References

SAM §§ 5220, 5255.11, and 5255.12.

DOM § 22040.

ARTICLE 19 — EDP PERSONAL SERVICES CONTRACTS

Revised October 19, 1994

45070.1 Policy

The Department shall enter into EDP personal services contracts in accordance with applicable provisions of SAM.

45070.2 Purpose

This section outlines the specific requirements necessary in contracting for EDP personal services.

45070.3 Contracts for EDP Personal Services

Contracts for EDP personal services shall be processed in accordance with SAM 1200 et seq., 5271, and 5272, and DOM 22040. In general, EDP personal services contracts are used for activities such as software package programming, and the development or design of program enhancements.

45070.4 Procedures for Obtaining Personal Services Contracts for EDP Equipment

When EDP personal services are needed CDC shall prepare a DGS, Office of Procurement (GSOP), GSOP Form 206, Master Service Agreement Order (MSAO). The request for personal services shall then be submitted to the DGS Data Processing Services Section (DPSS). This section maintains a pool of programmers to assist various State agencies. If there are no available staff within DPSS, the MSAO shall be forwarded directly to the EDP Acquisitions Unit within DGS. The EDP Acquisitions Unit will use their statewide master agreement to identify a contractor for the specified personal services. The approved MSAO shall then be returned to CDC. CDC shall contact the contractor to interview and select individuals employed by the contractor for the provision of needed services.

45070.5 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

ARTICLE 20 — CONSULTING SERVICES CONTRACT

Revised October 19, 1994

45080.1 Policy

The Department shall enter into EDP Consulting Services contracts in accordance with applicable provisions of SAM.

45080.2 Purpose

This section outlines specific requirements to be followed in processing EDP consulting services contracts.

45080.3 Procedures for Obtaining Consulting Services Contracts

Contracts for EDP consulting services shall be processed in accordance with SAM 1200, 5222, and DOM 22040.26.10. These contracts are not to be confused with contracts for the provision of personal services. Specifically, consulting services contracts shall be advisory in nature, provide a recommended course of action, and have a tangible end product.

A certification affidavit is required for initial EDP consulting services contracts as well as for any amendments to such contracts. All contracts regardless of the dollar amounts involved shall be processed through CDC's Contracts Services Section.

45080.4 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

ARTICLE 21 — INTER-AGENCY AGREEMENTS

Revised October 19, 1994

45090.1 Policy

The Department shall process interagency agreements for EDP services in accordance with applicable requirements of SAM.

45090.2 Purpose

This section provides information necessary for processing EDP interagency agreements.

45090.3 Procedures for Obtaining an Interagency Agreement

Interagency agreements for EDP services shall be let in accordance with SAM 1200 et seq., 5240, 8752, 8752.1, and 8758.1, and DOM 22040.29. Each agreement shall contain a clear understanding of the services or products to be provided, the responsibilities of each party, the basis for payments, and the period of performance.

A certification affidavit is required for all initial interagency agreements and for any amendments to existing agreements. Interagency agreements shall be processed through the Department's Contract Services Section.

Interagency agreements shall be developed on an STD Form 13. All interagency agreements in excess of \$35,000 shall be submitted for approval to the DGS, EDP Acquisitions Unit.

45090.4 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

ARTICLE 22 — POLICY AND GENERAL INFORMATION*

Revised October 20, 1994

Not Cleared For Statewide Use**46010.1 Policy**

The Department recognizes that EDP equipment represents an indispensable tool for the rapid and efficient handling of data records, communications, and transactions. Also, EDP equipment offers an important potential for increasing the productivity, efficiency, and responsiveness of CDC operations. Maximum efficiency in the use of EDP equipment shall be promoted, and the most cost-effective methods shall be utilized for procurement of EDP equipment.

The relative merits of all methods to acquire and maintain EDP equipment shall be evaluated continuously in order to assure maximum economic advantages for the Department. When selecting EDP equipment, CDC shall consider the requirements for interfacing to present systems. Conversion costs shall also be considered, as well as costs associated with the exchange of information among machines or systems. Unless unusual circumstances warrant otherwise, standard, commercially available, general purpose EDP equipment shall be acquired in preference to specially designed or special purpose equipment.

State-owned EDP equipment shall be used when appropriate, but for only as long as the benefits of such equipment use exceeds related costs. Such equipment shall be used to replace rented or short-term leased equipment installed anywhere within CDC.

Duplicate or excess EDP equipment shall not be acquired as insurance against machine failure or as standby equipment, except when legally required or for necessary, full-time, or absolute service functions.

The disposition of EDP equipment determined to be excessive relative to the Department's requirements shall be decided in accordance with the most economical and practical, overall outcome for the Department.

46010.2 Purpose

The purpose of this policy is to establish standards for the use and management of EDP equipment which protect CDC's investment in ITS, promote the identification of cost-effective opportunities for using EDP equipment to support the accomplishment of CDC's mission and program objectives, ensures that the integrity and security of automated files, ITS and program operations are not jeopardized, and create a support structure that provides reliable technical assistance to users of EDP equipment.

46010.3 Definitions**EDP Equipment**

SAM 4819.2 defines EDP equipment as:

- Central processing units and all related features and peripheral units, including processor storage, console devices, channel devices, etc.
- Minicomputers, microcomputers, personal computers, and all peripheral units associated with such computers.
- Special purpose systems including word processing, magnetic ink character recognition, optical character recognition, photocomposition, typesetting, and electronic bookkeeping.
- Communications devices used for data transmission such as modems, data sets, multiplexors, concentrators, switches, local area networks, private

branch exchanges, network control equipment, and microwave or satellite communications systems.

- Input-output (peripheral) units (off-line or on-line) including: terminals, card readers, optical character readers, magnetic tape units, mass storage devices, card punches, printers, computer output to microfilm converters, video display units, data entry devices, FAXs, teleprinters, plotters, or any device used as a terminal to a computer, and control units for such devices.

Component

A component is defined in SAM 5013 as any individually identified piece of hardware, such as the mainframe, tape drive, disk drive, power supply unit, controller, punch, reader, printer, modem, CRT, keyboard, remote device, and the like.

EDP Supplies

SAM 4819.2 defines EDP supplies as all consumable items and necessities (excluding items defined as EDP equipment) to support information technology activities and EDP personnel including:

- Documents such as standards and procedures manuals, vendor-supplied systems documentation, and educational or training manuals.
- Equipment supplies such as printer forms, punched-card stock, disk packs, "floppy" disks, magnetic tape for EDP devices, and printer ribbons or cartridges.
- Furniture such as terminal tables and printer stands.

46010.4 Integrity of EDP Information

In order to maintain the integrity of EDP information and ensure the security of equipment, the following policies shall be adhered to:

- All EDP hardware and software shall be for official use only.
- Reasonable measures shall be taken to locate equipment in a secure area, to provide protection from vandalism or sabotage, and to preclude access by other-than-authorized personnel.
- All microcomputers located in facilities and parole offices shall be equipped with a keylock mechanism that controls the power source to the processor and disk drives. If a keylock mechanism is not included with the microcomputer, then a keyboard or power lock shall be purchased separately and used. When not in use, the key shall be removed from the lock.
- All microcomputers located in facilities and parole offices shall be associated with locking storage cabinets for software, manuals, and small peripheral equipment. Such equipment shall be secured in the cabinet(s) when not in use.
- A complete set of standard documentation shall be maintained by the individual or unit using the EDP equipment, and shall remain in an area immediately adjacent to the EDP equipment. Such documentation shall include:
 - All manuals supplying documentation relating to the installation, maintenance, or care of the equipment.
 - All manuals supplying documentation relating to the installation and use of proprietary software, except that such manuals may be located in a central library, if appropriate.
- There shall be no inmate access to EDP equipment connected in a Local Area Network (LAN) or having any type of direct, outside communication capability, unless approval is obtained from the MIS Committee and CDC Information Security Officer.

46010.5 EDP Equipment User Responsibilities

All facilities, parole regions, and units within headquarters that access the CLETS, the DDPS, or the OBIS shall assign an Associate Information Systems Analyst (AISA) or designee to act as liaison between the user locations and ISD of the EC&ISD located in headquarters.

It is the responsibility of each user facility to provide the EDP Operations Manager, ISD, with the name(s) and phone number(s) of its AISA and any designee. In addition, facilities with 24-hour shifts shall submit the names and phone numbers of alternate (i.e., off-shift) coordinators to the EDP Operations Manager.

All facilities, parole regions, and headquarters' branches using personal computers shall adhere to the Department's Workgroup Computing Policy.

46010.6 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

46010.7 References

SAM §§ 4819.2 and 5013.

ARTICLE 23 — EDP EQUIPMENT MAINTENANCE

Revised October 20, 1994

46020.1 Policy

It is the policy of the Department that EDP equipment shall be maintained in accordance with State requirements and in ways that maximize the operating efficiency of the equipment while minimizing equipment failure and down time. Furthermore, EDP equipment maintenance shall be performed by State personnel, or performed by maintenance service organizations in the private sector whose services are acquired through competitive bidding or as a sole source. Specific criteria for EDP maintenance services shall be defined and applied in the development of procurement specifications. EDP equipment maintenance policies and guidelines shall be applied in determining appropriate maintenance coverage for EDP equipment installed throughout CDC.

46020.2 Purpose

The purpose of this section is to specify that EDP equipment maintenance shall be performed as required by GC 14816 and SAM 5220.

46020.3 Responsibility for Maintenance of EDP Equipment

CLETS

Maintenance coverage for CLETS equipment is the responsibility of the AISA or designee at the user location involved. Funding for maintenance coverage is the responsibility of the division, facility, or parole region procuring the equipment.

DDPS

ISD is responsible for obtaining maintenance coverage for all equipment associated with the DDPS.

OBIS

ISD serves as liaison among the Teale Data Center, headquarters, individual facilities, and parole locations for the provision of maintenance coverage for all equipment associated with the OBIS.

Paroles Automated System

ISD is responsible for obtaining maintenance coverage for all equipment associated with the Paroles Automated System.

Personal Computers

Maintenance coverage for personal computer equipment shall be obtained in accordance with the Department's Workgroup Computing Policy.

46020.4 Acquisition of Maintenance Services for EDP Equipment Within Department

Acquisition of EDP maintenance services is conducted through competitive bidding except when the Director of General Services determines that the conditions for sole source acquisition are met.

The following conditions are considered justification of sole source acquisition of EDP maintenance service:

Leased Equipment

- Equipment leased from a manufacturer who provides CDC no option but to obtain maintenance for the equipment from that manufacturer.

State-owned Equipment

- Maintenance service for all central processing units (CPUs) except for microcomputers.
- Maintenance of peripheral equipment that is interconnected by cables to CPUs. This does not apply to terminals that are connected to CPUs by communication lines.
- When there is only one qualified maintenance service company within a reasonable distance of the installed equipment.
- When the manufacturer is the only entity with a minimum of six months experience servicing the installed equipment because the equipment has not been on the market a sufficient period of time for others to obtain needed experience.
- When the equipment is under a warranty period.
- When justification does not exist to obtain a sole source a maintenance service contract, CDC shall conduct competitive bidding for the maintenance service as required by guidelines set forth in SAM 5220 through 5255.

CLETS

Maintenance coverage for this equipment is obtained by contracts with county agencies, equipment vendors, or service companies. The method of obtaining the maintenance contract varies depending on the type of equipment being used at the particular location, as well as the manner in which the CLETS service is provided. For assistance in determining the proper method for a specific location, contact the EDP Operations Manager, ISD, EC&ISD, at headquarters.

DDPS

DDPS coverage is provided by a statewide, competitively bid, master contract.

OBIS

OBIS coverage is provided by a master service agreement with the Teale Data Center.

Personal Computers

Personal computer maintenance coverage shall be obtained in accordance with the Department's Workgroup Computing Policy.

46020.5 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

46020.6 References

GC § 14816.

SAM §§ 5220 - 5255.

ARTICLE 24 — EDP EQUIPMENT INVENTORY

Revised October 20, 1994

46030.1 Policy

The Department shall maintain an accurate inventory of its EDP equipment, peripheral devices, and software. All purchased EDP equipment shall concur with the technical specifications contained in the SAM 5005. All EDP hardware shall be inventoried at the time of installation, identified with a CDC property tag, and if site requirements necessitate, permanently marked by engraving with the CDC property tag number, item serial number, and DGS billing code number.

46030.2 Purpose

The purpose of this policy is to ensure that CDC is in compliance with SAM 5005 and to provide departmental administrators with an accurate listing of their EDP equipment resources. There shall be a biannual reconciliation of the EDP inventory to update for changes in the system.

46030.3 Inventory Responsibility**CLETS**

The local AISA or designee shall be responsible for maintaining an accurate CLETS equipment inventory for the corresponding division, facility or parole region. CLETS inventories shall be forwarded no later than April 1 and October 1 of each year to ISD, EDP operations manager, who shall be responsible for the coordination, compilation, and retention of the departmental CLETS inventory and useful life-cycle schedule.

DDPS

The ISD Operations Support Unit is responsible for maintaining an accurate departmental DDPS equipment inventory. The DDPS inventory shall be forwarded no later than April 1 and October 1 of each year to the EDP Operations Manager, who shall be responsible for the coordination, compilation, and retention of the departmental DDPS inventory and useful life-cycle schedule.

OBIS

The ISD Hardware Unit is responsible for maintaining an accurate departmental OBIS equipment inventory. The OBIS inventory shall be forwarded no later than April 1 and October 1 of each year to the EDP operations manager, who shall be responsible for the coordination, compilation, and retention of the departmental OBIS inventory and useful life-cycle schedule.

Personal Computers

Maintenance record keeping for personal computer equipment shall be performed in accordance with the Department's personal computer policy.

46030.4 Documentation for Inventory of EDP Equipment

The EDP inventory shall include the following data elements:

- PrimaryLocation:division/branch, facility, or parole region where equipment is located.
- SecondaryLocation:unit or office where equipment is located.
- BrandofEquipment:monitors, keyboards, printers, etc.
- ModelNumber:monitors, keyboards, printers, etc.
- SerialNumber:monitors, keyboards, printers, software, etc.
- Ownership:whether CDC or specified other owns.
- VersionNumber:software.
- DateofAcquisition:date equipment was received.
- DateofInstallation:date equipment/software was installed.
- DateofRelocation:date equipment/software was relocated.
- RelocationLocation:unit or office where equipment has been relocated.
- Signature:signature of local AISA or designee or AISA'ssupervisor.

46030.5 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

46030.6 References

SAM § 5005.

ARTICLE 25 — EDP EQUIPMENT MAINTENANCE RECORDS

Revised October 20, 1994

46040.1 Policy

The Department shall establish a uniform method for recording data pertaining to the repair and maintenance of EDP equipment as required by SAM 5010 through 5015 so as to prevent excessive maintenance costs or any degradation in user and vendor support.

46040.2 Purpose

The purpose of this section is to ensure consistency in reporting, in the capture of data at the time of an incident, and in review by appropriate levels of management of reports made. These are all essential to the effective management and control of EDP equipment maintenance.

46040.3 Responsibility for EDP Equipment Maintenance Records**CLETS**

Maintenance record keeping for CLETS equipment is the responsibility of the AISA or designee at each user location involved. Maintenance records shall be forwarded no later than April 1 and October 1 of each year to ISD Data Center for review and analysis of information, and shall be retained by the EDP Operations Manager for as long as the component is in service or there is a possibility of any contractual claim.

DDPS

Maintenance record keeping for DDPS equipment is the responsibility of the ISD Operations Support Unit. Maintenance records for DDPS equipment shall be reviewed and analyzed no later than April 1 and October 1 of each year, and shall be retained by the EDP Operations Manager for as long as the component is in service or there is a possibility of any contractual claim.

OBIS

Maintenance record keeping for OBIS equipment is the responsibility of the ISD Hardware Unit. Maintenance records for OBIS equipment shall be reviewed and analyzed no later than by April 1 and October 1 of each year, and shall be retained the EDP Operations Manager as long as the component is in service or there is a possibility of any contractual claim.

Personal Computers

Maintenance record keeping for personal computer equipment shall be done in accordance with the Department's personal computer policy.

46040.4 Documentation of Maintenance for EDP Equipment

The responsible unit/party shall maintain records of EDP equipment which contain essential data pertaining to repair and maintenance. Such essential data that are required to resolve disputes between the vendor and the Department concerning vendor performance include:

- Document control number: composed of a two-digit year and a two-digit month, followed by a sequence number starting with "one" at the beginning of each month.
- Name of originating facility.

- Name, unit, and phone number of the on-site contact person responsible for taking action to correct a deficiency.
- Date and time the need for maintenance was first noticed.
- Name and phone number of vendor that was notified.
- Date and time vendor was notified of problem.
- Date and time vendor personnel arrived to repair malfunction.
- Date and time component and system were returned to service.
- Identification of affected component/system by manufacturer identification or serial number, and by CDC property tag number.
- Type of service: regularly scheduled preventative maintenance or unscheduled maintenance required to remedy malfunctions or incidents.
- Justification for any delays in the completion of maintenance.
- Description of malfunction or incident.
- Signatures of vendor personnel and a departmental representative.

A maintenance form is to be initiated whenever a system or any component of a system is inoperative because of the need for equipment repair or maintenance, and is to remain open until the problem has been corrected and the component has been returned to service.

46040.5 Revisions

Revised January 4, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

46040.6 References

SAM §§ 5010 - 5015.

ARTICLE 26 — DISPOSAL OF EDP EQUIPMENT

Revised October 20, 1994

46050.1 Policy

DGS has approval responsibility for the disposal of all surplus, State-owned and leased EDP equipment including obsolete or inoperable EDP equipment. The Department shall competitively dispose of surplus departmental EDP equipment.

46050.2 Purpose

The purpose of this policy is to ensure that CDC is in compliance with SAM 5951, 8633, and 8640 through 8642 and to ensure that the salvage value of State-owned EDP equipment and purchase option credits for leased EDP equipment are received when doing so is in the best interests of the Department.

46050.3 Responsibility for Disposal of EDP Equipment

CLETS

It is the responsibility of the local AISA or designee to inform ISD, EDP Operations Manager, of any CLETS equipment that requires disposal.

The local AISA or designee shall include the following information in recommendations for disposal of CLETS equipment at the respective facility:

- Manufacturer, type, and model number.
- Model features such as part numbers and descriptions.
- Serial number.
- Present physical condition.
- Present location of equipment.
- Dates of installation and purchase, and funding program.
- Copies of maintenance contracts and relevant maintenance history, such as special maintenance problems or maintenance performance - percentage up-time.

DDPS

It is the responsibility of the local AISA or designee to inform the EDP Operations Manager, ISD, of any DDPS equipment deemed to need disposal.

The local AISA or designee shall include the following information in any recommendation for disposal of DDPS equipment at the respective facility:

- Manufacturer/type/model number.

- Model features, such as part numbers and descriptions.
- Serial number.
- Present physical condition.
- Present location of equipment.

OBIS

It is the responsibility of the local AISA or designee to inform the EDP Operations Manager, ISD, of any OBIS equipment deemed to need disposal.

The local AISA or designee shall include the following information in any recommendation for disposal of OBIS equipment at the respective facility:

- Manufacturer/type/model number.
- Model features, such as part numbers and descriptions.
- Serial number.
- Present physical condition.
- Present location of equipment.

Personal Computers

It is the responsibility of the local AISA or designee to adhere to the Department's personal computer policy.

46050.4 Process and Documentation for Disposal of EDP Equipment

Depending on the applicable EDP equipment, the EDP Operations Manager shall submit at least 30 days prior to the scheduled release date a completed STD Form 152, Property Survey Report, to DGS, Property Reutilization Unit, with an informational copy of the report submitted to the DOF, Office of Information Technology (OIT).

CDC shall, in memorandum form and at least 30 days prior to the scheduled release date, submit an EDP equipment disposal request to the DGS Property Reutilization Unit. The EDP equipment disposal request shall include the following items:

Item Description

- Description of the item to include:
 - Manufacturer, type, and model number.
 - Model features, such as part numbers and descriptions.
 - Serial number.
 - Weight, to nearest pound.
 - Present physical condition.
 - Item location address on the scheduled release date.

Item Historical Information

- Historical Information of item to include:

State-owned EDP Items

- Date of installation.
- Date of purchase.
- Owned by which budget fund.
- Scheduled release date.
- Monthly maintenance costs.
- Type of maintenance contract (attach copy of subject contract Rider B).
- Relevant maintenance history, such as special maintenance problems or maintenance performance -percentage up-time.

Leased/Rented EDP Items

- Date of installation.
- Scheduled release date.
- Current monthly lease price.
- Current list price (supplier current new purchase price).
- Accrued purchase option credits (in dollars) as of the scheduled release date. Separately list any other State financial equity in the item or item features. These credits shall be requested from the supplier and calculated independently by CDC.
- Any financial liability incurred if the equipment is returned to vendor.
- Relevant maintenance history such as special maintenance problems or maintenance performance -percentage up-time.
- How item was procured (e.g., Master Rental Agreement [MRA]). If not MRA-procured, indicate the type of maintenance contract and attach a copy of subject contract Rider B.

CDC Facilitator Identification

- CDC Facilitator identification to include:
 - Facilitator's name.

- Facilitator's title.
- Facilitator's unit.
- Facilitator's telephone number.
- If equipment is located at a different site, name and telephone number of the on-site contact person.

DGS Disposal

- Proposed DGS Disposition Recommended to include:

If EDP Equipment is State-Owned:

- Transfer or sell to another (named) public agency.
- Scrap for parts for use within (named) State agency.
- Attempt to sell at minimum bid price of (named)dollars.
- Discard the equipment as worthless.
- Justification for no proposed recommendation.
- A completed STD Form 152.

If EDP Equipment is Leased/Rented:

- Transfer equipment to another (named) public agency.
- Release equipment back to the supplier.
- Justification for no proposed recommendation.
- If the EDP equipment was purchased under an MRA, a completed DGS Office of Procurement, GSOP Form 191 and GSOP Form 191A.

Upon approval and instructions from DGS, CDC shall:

If EDP Equipment is State-Owned:

- Transfer or sell State-owned EDP equipment to another state or public agency.
- Follow the determination for disposal of the EDP equipment (signed STD 152). DGS will indicate whether CDC or DGS shall arrange for disposal of the property.

If EDP Equipment is Leased/Rented:

- If MRA-procured, follow the determination for disposal of equipment (signed GSOP Form 191 and GSOP Form 191A).
- If not MRA-procured, take action as indicated by DGS for effecting equipment disposal.

SAM §§ 5951, 8633, and 8640 - 8642.

ARTICLE 27 — DISPOSAL OF EDP SUPPLIES

Revised October 20, 1994

46060.1 Policy

The Department is committed to ensuring that compliance is maintained with the procedures set forth in the SAM 5951, 8633, and 8640 through 8642 and the GC 14673 through 14675 regarding the disposal of EDP supplies. CDC shall also act in accord with the DGS in its oversight responsibilities for the disposal of all State-owned EDP supplies.

46060.2 Purpose

The purpose of this policy is to effect the efficient and economical disposal of surplus EDP consumable supplies, and to ensure realization by CDC of the maximum salvage value of such supplies to the extent that doing so is in the best interests of the Department.

46060.3 Responsibility for Disposal of EDP Supplies

It is the responsibility of the local AISA or designee to inform the EDP Operations Manager, ISD, of any surplus EDP supplies that the respective facility has deemed to be in need of exchange, transfer, sale, or disposal.

It is the responsibility of the Chief, BSS at headquarters, to act as liaison with DGS for the elimination of CDC's surplus EDP supplies.

46060.4 Procedures and Documentation for Disposal of EDP Supplies

Authorization for the disposal of property shall be received from the DGS Property Reutilization Unit before CDC shall dispose, sell, transfer, or exchange surplus EDP supplies.

DGS administers the statewide master contract for the disposal of wastepaper goods. Use of this contract is obligatory by the Department and is administered by the BSS. Service can also be obtained for the witnessed destruction of confidential records. It is the basic responsibility of CDC to determine that its obsolete records are destroyed in accordance with the requirements of SAM 5951, 8633, and 8640 through 8642. The handling of supplies containing confidential information shall be conducted in accordance with EDP policies regarding confidentiality and security.

CDC shall prepare an STD Form 152, Property Survey Report, when disposing of surplus EDP supplies. The original form shall be marked "Expendable Property" and shall be retained in the CDC Accounting Unit files in order to substantiate the transaction. A copy of the completed STD Form 152 form shall be sent to, and approval shall be received from, the DGS Property Reutilization Unit.

A diligent effort shall be made to secure at least three competitive bids before completion of a sale. In all cases, a list of firms or individuals solicited shall be prepared and attached to, and filed with, the Property Survey Report form. The amount received from the sale shall be accounted as revenue to the fund from which the majority of CDC's support is appropriated.

Surplus magnetic media should: (1) if usable, be transferred to a State agency data processing installation which has a requirement for such media; or (2) be sold by bid if installation personnel are unable or not required to use the media. A list of sources potentially interested in the purchase of used magnetic tape is maintained by the DOF, State Data Processing Management Office. If a sale is not possible, the magnetic media may be disposed of through any dealer or volunteer organization if done without charge to the State.

Prior to disposal or transfer, all magnetic media containing confidential or proprietary data shall be completely magnetically erased; alternately, CDC may overwrite such information with non-confidential, non-proprietary information.

Computer printer ribbons shall be disposed of only when they cannot be reconditioned. Use of a reconditioning or re-inking service for computer printer ribbons is encouraged generally. CDC may contact the providers of such services to discard ribbons with holes or other defects that could produce poor quality or unreadable printout, or may result in subsequent breakage or other unacceptable defect.

When exchanging or transferring EDP supplies free of charge with another State department, CDC shall prepare an STD Form 158, Transfer of Location of Equipment, and shall receive approval from the DGS Property Reutilization Unit before surplus EDP supplies are exchanged or transferred. CDC shall record supplies received free of charge using the same cost basis as that recorded on the books of the transferring department.

46060.5 Procedures for Lost, Stolen, or Destroyed EDP Supplies

Whenever supplies are lost, stolen, or destroyed, CDC shall prepare an STD Form 152 and shall transmit one copy to the DGS Property Reutilization Unit. CDC shall adjust its property accounting records accordingly, and retain the original Property Survey Report form as documentation. This report shall contain:

- A description of the events.
- Precautions to be taken to prevent repeated situations.
- A statement that the CHP or a local law enforcement agency has been notified in accordance with SAM 2625.

Losses of CDC property due to fraud or embezzlement shall be reported to the DOF, Financial and Performance Accountability office, in addition to the law enforcement notification required by SAM 2625. Employees shall be charged with any loss or damage to CDC property due to their negligence or unauthorized use.

ARTICLE 28 — OFFENDER BASED INFORMATION SYSTEM*Effective November 25, 1992***47010.1 Policy**

The Department shall maintain complete and accurate case records on all prisoners in the custody of the Department as required by PC 2081.5. Case records include all information received by the Department from courts, probation departments, sheriff and police departments, DA offices, the State DOJ, the FBI, and other pertinent agencies and persons.

OBIS was created to provide for automated tracking of all inmates assigned to the Department's jurisdiction from the time of admission through discharge from prison or parole.

47010.2 Purpose

The purpose of this policy is to ensure that complete and accurate records are maintained on all prisoners under the jurisdiction of the Department, and to establish and fix responsibility and accountability for the management of OBIS.

47010.3 Responsibilities

Overall responsibility (e.g., security, data integrity, QA, QC) for OBIS resides with the Director and Chief Deputy Director. Delegated responsibility resides with OISB of the ASD, and with management, supervisory, and end-user personnel involved with OBIS use. OISB is responsible for training data input staff and providing QC oversight to ensure data integrity in OBIS.

As primary users of this system, the case records offices in facilities, parole regions, and headquarters, as well as OISB, input and update offender information in OBIS.

As the custodian of this system, the ISD is responsible for application, hardware, and software support, and maintenance of OBIS.

Parole Violator Work Credit Subsystem

The Parole Violator Work Credit Subsystem records parolee-at-large, parole revocation, and revocation extension information, and applies work credit earned/lost from the inmate work incentive subsystem to calculate violator revocation release dates.

47010.4 Overview of OBIS*Revised July 15, 1993*

OBIS is a centralized, on-line, mainframe system that links all facilities, parole regions, selected parole field units, and headquarters to the Teale Data Center. OBIS is the only database which tracks an inmate from initial admission in a state prison through discharge from prison or parole.

Composition Of OBIS

OBIS is comprised of the following subsystems: movement, commitment, descriptive, inmate work incentive; and holds, wants, and detainers.

Movement Subsystem

The movement subsystem records each movement and status change of an inmate from the date of reception from the committing court to discharge from CDC jurisdiction.

Commitment Subsystem

The commitment subsystem records the legal commitment received from the California Superior Court that sentenced the offender to the jurisdiction of the Department.

Descriptive Subsystem

The descriptive subsystem records detailed information regarding each offender's height, weight, hair color, ethnicity, social security number, CII number, FBI number, and date and place of birth.

Inmate Work Incentive Subsystem

The inmate work incentive subsystem is a collection of an offender's applied credits (including vested credits, administrative time, work and vocational assignments, work credit losses and restorations) that affect the release date of the offender.

Inmate Time Collection System

The Inmate Time Collection System (ITCS) is used to track the hours of inmates participating in the IW/TIP. Inmates who participate in the IW/TIP shall earn work time credit toward the reduction of their sentence.

The ITCS introduces a scanning process to the existing time collection system. The scanning system is designed to provide the following:

- Key data entry workload relief for the facility.
- A more expedient method of updating OBIS.

The ITCS scanning process uses revisions of the CDC Form 191, Inmate Timecard, the CDC Form 1697, Work Supervisor Log, and a Sentry 4000 scanner. The work supervisor tracks the inmate work time for a 31 day period, using the CDC Form 1697. Information from the CDC Form 1697 is transferred on to the CDC Form 191. The CDC Form 191 is sent to the case records office for scanning and timecard retention. Scanned information is used to update the OBIS database, and generate error and statistical reports.

Holds, Wants and Detainer Subsystem

The Holds/Wants/Detainer subsystem records holds, wants (warrants), and detainers (HWD) on a particular offender. HWDs are entered on-line immediately after receipt from another agency (e.g., federal, other states) which may have a legal right to hold the offender.

Requests for offender information residing on the OBIS database shall be addressed to the Information System Support and Specialized Reporting Unit, located in OISB.

PC § 2081.5.

ARTICLE 29 — SCO SYSTEMS*Effective November 25, 1992***47020.1 Policy**

The Department's Personnel Office shall prepare and release all personnel- and payroll-related data utilizing the SCO Personnel Information Management System (PIMS).

Authorization and guidelines established under the uniform state payroll system are controlled and defined by the Personnel Payroll Service Division within SCO.

47020.2 Purpose

The purpose of PIMS is to ensure that all employee personnel information is considered sensitive and confidential, and that all such data be provided under a strictly controlled environment accessed only as follows:

- The following may be updated, edited, or inquired through the PIMS system: various current and historical information concerning employee status, payment history, or miscellaneous, fixed and voluntary payroll deductions.
- The Personnel Action Request (PAR) is used to access an employee's name, position number, effective date of appointment, salary, range, bargaining unit, and probation status.
- Employee Action Requests (EARS) are used to access an employee's State and federal withholding tax information and home address.

47020.3 Responsibilities

The delegated responsibility for the security, maintenance, monitoring and integrity of the SCO/PIMS system resides with the Personnel Officer at each facility and at headquarters. Major users of the system are Payroll Service Assistants, who audit, provide references, and instruct in preparing PARS and EARS, and Personnel Assistants, who access the system to update all personnel and payroll history. Other users of the system include Personnel Operation Analysts and Personnel Examination Analysts, on an inquiry basis only.

47020.4 Personal Information Management System Equipment Security

Refer to DOM 48010.8 regarding procedures for equipment security.

47020.5 Management Information Retrieval (MIRS) System

CDC uses the Management Information Retrieval System (MIRS) to extract personnel and payroll information from the SCO and to generate supplemental reports for management.

47020.6 MIRS-Reports*Revised April 16, 1993*

MIRS supports management decisions by providing the following:

- Payment reports for budgetary analysis.
- Ethnic and gender reports for affirmative action projects.
- Reports to assist with contract negotiations.

- Departmental growth and turnover statistics.
- Current and historical employee data.
- Various employee payment and deduction information.

47020.7 MIRS-Responsibilities

Revised April 16, 1993

The Personnel Automation Unit has delegated responsibility for reviewing personnel report requests. Users refer to the Personnel Action Manual, Payroll Procedure Manual, California State Civil Service Pay Scales for Clarification of Personnel and Payroll Procedures, and the Focus Manual for MIRS programming guidelines. Users log all requests, completion dates, and time spent creating and processing the report.

47020.8 MIRS- Equipment Security

Revised April 16, 1993

Refer to DOM 48010.8 regarding procedures for equipment security.

47020.9 Revisions

Revised January 11, 2013

The Director, Enterprise Information Services (EIS), or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

DOM § 48010.8.

ARTICLE 30 — C.L.E.T.S.

Effective November 25, 1992

47030.1 Policy

As a part of its continuing support for all California law enforcement agencies, the Department participates in the statewide telecommunications system developed for use by law enforcement agencies. GC 15150 through 15167 require that State DOJ maintain such a telecommunication system and provide services to California law enforcement agencies when, at their own expense, they require authorized connection to the system.

47030.2 Purpose

The purpose of this section is to describe the relationship between CDC and the CLETS and specify the Department's participation in this system.

CLETS accommodates all public law enforcement user agencies with the capability of providing and receiving fast and efficient point-to-point delivery of messages and information contained in federal and State computerized files. Local information reported to DOJ may also be accessed.

CLETS is a cooperative system whereby the State provides central switching equipment, personnel to staff the switching center, and sufficient circuitry from the switching center to county locations as authorized by law for handling law enforcement message traffic. Department use of the circuitry and terminal equipment extending beyond the CLETS county termination point is provided by CDC.

47030.3 Responsibility

Operational responsibility, system supervision, monitoring of traffic for conformity to rules and regulations, and recommendations for corrective actions are under the direction of DOJ. System rules are designed to provide the most efficient operating system. Adherence to the rules shall provide the Department the maximum effectiveness of CLETS. Violations of these rules shall result in investigative and appropriate disciplinary action. Departmental CLETS coordinators shall direct requests for information concerning the general administration of CLETS to the CLETS Executive Secretary, Department of Justice, P.O. Box 903417, Sacramento, California 94203-4170.

ISD is responsible for coordinating with DOJ the acquisition, relocation and use of the local CLETS. Departmental CLETS coordinators shall direct requests for information concerning changes or additions to

CDC's use of CLETS to the EDP Operations Manager, Information Systems Division, P.O. Box 942883, Sacramento, California 94283-0001.

Local facilities are responsible for the funding and maintenance of their CLETS equipment.

47030.4 CLETS- Acquisition Process

Revised April 16, 1993

The acquisition processing time for CLETS varies depending upon the location of the requesting facility: Up to six months should be allowed from the date the request is received for processing at ISD.

It is the local CLETS coordinator's responsibility to:

- Initiate an appropriate request for additions or changes (other than relocation) to CLETS services at an existing location. The request shall include a cover memo to the EDP Operations Manager, ISD, indicating justification for a CLETS addition or change and a completed CDC Form 954, Intraoffice Requisition and Procurement Worksheet.
- Upon receipt of the approved requisition, order equipment and acquire maintenance with facility funding.
- Initiate an authorized request for the relocation of CLETS equipment. The request shall consist of a memorandum with appropriate approval signatures to the EDP Operations Manager, ISD, justifying the relocation.

It is the responsibility of the EDP Operations Manager, ISD, to:

- Review the request, obtain certification approval, and return the completed package to the local facility for their equipment purchase.
- Procure approval from DOJ and appropriate county sheriff's offices for CLETS usage.
- Coordinate CLETS installation with DOJ, county sheriff's offices, and the local facility.
- Notify local CLETS coordinators of approved mnemonic (i.e., "NME") and originating agency (i.e., "ORI") numbers.
- Maintain inventory for departmental CLETS circuitry.
- Review requests for, and coordinate the relocation of CLETS equipment.

Terminals connected directly to CLETS shall be approved by DOJ. A hard copy printer shall be included with each terminal authorized to receive unsolicited or point-to-point, non-data-base traffic.

47030.5 Integrity of CLETS Information

In order to maintain the integrity of CLETS and ensure the security of information received and transmitted by use of the system, the following policies shall be adhered to:

- Reasonable measures shall be taken to protect equipment from vandalism or sabotage and preclude access by other than authorized personnel by locating equipment in a secure area.
- Mobile digital terminals shall not be allowed to access DOJ's criminal history system.
- Personnel authorized to access CLETS are either sworn law enforcement personnel or nonsworn law enforcement personnel that have been subject to a character or security clearance. The clearance shall include the following:
 - DMV: drivers license check.
 - DOJ: fingerprint check.
 - CDC: background investigation. An agency head's authorization for the employee to operate CLETS equipment shall be placed in the employee's personnel file.
 - In all matters pertaining to personnel security, the agency head shall be responsible for making the final determination of the individual's suitability for the job.

All CLETS messages are confidential and for official use only. Examples of acceptable messages are:

- Requests for record validation.
- Requests for prisoner pickup and transportation.
- Requests for mail-back information from data bases.
- Information regarding the circumstances surrounding the death of an officer killed in the line of duty.
- Listings of stolen property when identifiable by serial numbers or unique markings.
- All subpoenas transmitted by CLETS shall be processed in accordance with PC 1328(b) and 1328(c). A subpoena relative to civil proceedings or any subpoenas which could be delivered in a timely manner by other means are not acceptable for transmission.

DOJ publishes manuals for CLETS operators containing information for proper system utilization. These manuals shall be obtained and maintained for CLETS operators.

47030.6 CLETS-Training/Coordinators

Revised April 16, 1993

Each facility, parole region, and headquarters' division shall provide the EDP Operations Manager, ISD, with the names and phone numbers of their CLETS coordinator. In addition, facilities with 24-hour shifts shall submit the names and phone numbers of alternate (off-shift) CLETS coordinators.

It is the equipment vendor's responsibility to provide training on the operation of their terminals when initially procured/installed.

It is the responsibility of State DOJ field service/training office to provide training for information access in the:

- Criminal justice information system data bases.
- National crime information center.
- National law enforcement telecommunications system.
- DMV.
- Oregon law enforcement data system.

Local CLETS coordinators should call the specified telephone number for the name and telephone number of their DOJ field service/training representative.

47030.7 Revisions

Revised January 11, 2013

The Director EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

ARTICLE 31 — UNASSIGNED

ARTICLE 32 — PUBLIC SAFETY RADIO COMMUNICATIONS SYSTEMS

Effective December 27, 2010

47050.1 Policy

The California Department of Corrections and Rehabilitation (CDCR) requires that in the institutional setting two-way radios shall be used to communicate information necessary for the effective custody and control of wards, inmates, and parolees. Radios shall be issued to personnel operating where fixed communication devices (telephones and intercoms) are not available, practical, or will not meet critical institutional communications needs. In the field setting two-way radios shall be issued to departmental peace officers and will be used as necessary to communicate with departmental personnel and other law enforcement agencies as needed to meet parole supervision and other field operational needs. Where appropriate and necessary, field units may utilize/communicate via Federal Communication Commissions (FCC) approved local law enforcement telecommunications systems and utilize FCC approved local law enforcement radios.

47050.2 Purpose

This Article is the official departmental policy on public safety radio communications, not withstanding any program's procedures. This Article ensures that the design, procurement, deployment, maintenance, and use of State-issued radio communications equipment within the CDCR institutions and field units are appropriate to meet departmental radio communications needs.

47050.3 Usage

Acceptable Use

Departmental radio communications shall:

- Be conducted using CDCR-owned, leased, and managed radios and peripheral radio equipment. Exceptions may be made during emergencies, when conducting tactical operations, or when a law enforcement agency agrees to provide radio equipment that conforms to FCC Rules and Regulations.
- Operate on radio frequencies licensed for departmental use. The use of radios and frequencies provided by another public safety entity for events including but not limited to tactical exercises,

mutual aid, or dispatch services shall be pre-approved by the Radio Communications Unit (RCU). The locally approved temporary use of another public safety agency's FCC approved radio frequencies is authorized when necessary during an emergency or to protect public safety.

- Be used in conformance with the FCC Rules and Regulations.
- Be used for the express purpose of communicating Department information to authorized personnel.

Unacceptable Use

- The use of non-approved two-way radio equipment is prohibited and shall be considered contraband.
- The use of, or possession on institutional grounds of non-approved two-way radio equipment by an employee of the Department shall be subject to progressive discipline up to and including possible adverse action consistent with Department Operations Manual (DOM) Chapter 3, Article 22, Employee Discipline.
- The use of non-standard equipment, such as Family Radio Service (FRS) and radio scanners, is prohibited. Possession of such devices on institutional grounds is strictly forbidden.
- Inmates, wards, and parolees shall not be allowed to use CDCR radio equipment described in this Article or have access to the radio communications equipment for personal monitoring, except as authorized below:
 - Inmates assigned to fire camps may be authorized to use a departmental radio as long as it is restricted to accessing mutual aid or fire channels; no access shall be permitted to the trunked radio communications system at any institution, with the exception of the Fire Talk Group. Inmates who are assigned to the institutional fire departments have access to the Fire Talk Group on the trunked radio system, which resides on the Control Station (staff/inmate dispatch console at the fire department) and in the fire vehicles. Inmates shall not have access to the fire department's hand held portable radios which are programmed with other institutional operational talk groups.
 - In the event an employee is incapacitated, an inmate or a parolee may use the radio to call for emergency assistance.

47050.4 Responsabilités

47050.4.1 Radio Communications Unit (RCU)

- The Enterprise Information Services (EIS), Infrastructure Services (IS), RCU is responsible for all departmentally-owned radio communications systems utilized within CDCR. This includes the responsibility and authority for oversight of the policy and procedures related to the use of radio communications within the Department.
- Funding for institution and division radio program needs shall be directed through the RCU. This does not preclude a division from purchasing RCU-approved radio equipment to meet its operational needs when the funding is not available through the RCU.
- The RCU is responsible for review and approval of all public safety radio equipment purchases, including systems, subsystems, and end-user equipment.
- The RCU shall maintain site-specific radio matrices that reflect the application of the radio assignment policy.
- Departmental program areas shall contact the RCU to arrange for the use of another agency's radio frequency. Other agencies that wish to use a CDCR-owned frequency shall make such request to the RCU.
- The RCU is responsible for chairing a multi-discipline "Operable/Interoperable Communications Committee" (Committee) composed of departmental radio communications stakeholders. The purpose of this Committee is to address all issues related to emergency and non-emergency communications and the operable/interoperable needs of CDCR. RCU will schedule an annual meeting of the Committee and other meetings, as needed.
- The RCU will process service requests and/or incident tickets submitted by radio liaisons on the Department's web-based automated IT ticket system. The RCU will contact and coordinate with Office of the State Chief Information Officer, Public Safety Communications Division, as necessary. In some instances, non-functioning equipment cannot be repaired in the field and must be removed from service for repair. The RCU shall determine whether available spare equipment is appropriate for use to replace the non-operative equipment in order to keep the system including but not limited to portable or mobile radios in service or whether new equipment is required.

47050.4.2 Radio Liaison

Each CDCR division will establish a radio liaison. The division radio liaison will facilitate communication between the division and the RCU. Each Adult Institution, Juvenile Justice Facility, Conservation Camp, Parole Region (adult and juvenile), the Office of Correctional Safety, Statewide Transportation Unit, and the Office of Internal Affairs shall designate a radio liaison.

- The division radio liaison is a single point of contact between each division and the RCU to ensure that the regional communications issues or needs are forwarded to the Committee.
- The radio liaison shall notify RCU to have all radio communications equipment including but not limited to mobile radio, antenna, and speakers removed from vehicles designated to be surveyed.
- The program area/institution/facility radio liaison may communicate directly with the RCU to address locally specific needs such as radio equipment failures.

47050.4.3 Office of the Chief Information Officer-Public Safety Communications Division (OCIO-PSCD)

The OCIO-PSCD:

- Is responsible for maintaining the CDCR's public safety radio communications systems and subsystem equipment.
- Is responsible for ensuring proper radio system design and assists with frequency acquisition and utilization.
- Employs local radio technicians who are responsible for removing and replacing defective equipment as arranged by the RCU. Defective portable radios or accessories shall be delivered to the RCU or directly to the OCIO-PSCD as directed by the RCU.

47050.5 Radio Communications Systems-Standard Design

The RCU shall identify and establish technical standards for radio communications equipment consistent with the Public Safety Communications Act of 2002, Government Code Section 8592, et seq. Equipment standards shall be published in the CDCR Enterprise Architecture Decision Framework. Requests to purchase or utilize technology not identified as General IT Standards must be accompanied by an exemption request detailing the specific reason identified technologies are not fit for use. The RCU may issue a waiver from the published standard if no available standard technology is suitable to the particular need.

47050.6 Regional Radio Communications System Access

Regional radio communications system access refers to contracts for radio system access where there are fees to the CDCR by the host public safety agency for primary use on their radio communications system. With exception of contracts that were already in place prior to the implementation of this Article, regional radio communications system access contracts shall be reviewed and approved by the RCU prior to contract execution. Refer to the Radio Communications Policy and Procedures Handbook.

The CDCR shall operate its radio communications equipment utilizing FCC assigned frequencies in accordance with FCC Rules and Regulations. Departmental transmissions are prohibited on any FCC-managed frequency unless CDCR has written authorization via a formal radio frequency use agreement (TD-400) that must be kept on file with the RCU and the OCIO-PSCD, or has authorization to operate on a local public safety agency's regional radio communications system. The CDCR relies on the resources of other emergency services providers; therefore, cooperation and coordination with other agencies, organizations, and private enterprises shall be extended when practical in order to serve and protect the public. Divisions within the Department, including fire departments, may request utilization of other public safety radio systems. With the exception of existing utilization agreements that predate the implementation of this Article, such requests shall be submitted to the RCU for negotiation with the public safety agency's radio system operator. Approved requests must be accompanied by a "Letter of Authorization to Transmit" from the licensee on its letterhead, along with a copy of its FCC Station and Mobile license.

47050.7 Mutual Aid Frequency Use Agreement:

A mutual aid frequency use agreement is required for each instance of shared frequency use. The agreement must include the type of frequency that the public safety agency is authorizing CDCR to use, and must be without cost to the Department. These types of agreements are not considered Memorandum of Understanding (MOU)

and are not subject to CDCR's MOU procedures. Refer to the Radio Communications Policy and Procedures Handbook.

CDCR-owned radio equipment shall be maintained and repaired by OCIO-PSCD staff or locally approved radio technicians; frequency use agreements may not contain provisions that allow non-OCIO-PSCD approved maintenance or repair CDCR-owned telecommunications equipment. Agreements containing maintenance and/or repair provisions will not be approved.

47050.8 Radio Assignments and Use

For institutional and juvenile justice facility radio assignments, refer to Restricted DOM, Chapter 5, Section 55000.

47050.8.1 Conservation Camps

Camp staff shall be capable of communicating critical information to departmental institutions, facilities, local and/or other public safety agencies, and to agencies that contract for inmate services. Each CDCR camp vehicle shall be equipped, at a minimum, with one mobile radio.

47050.8.2 Outside Transportation Unit Vehicles and Institution/Facility Transportation Vehicles

Refer to Restricted DOM, Chapter 5, Section 55060.

47050.8.3 Office of Correctional Safety

Agents assigned to the Office of Correctional Safety shall be capable of routine and emergency communications with all departmental institutions/facilities and field offices as well as local and/or other public safety agencies. Vehicles assigned to these agents shall be equipped with mobile radios designated for undercover use. Additionally, each field agent shall be assigned a two-way, portable radio.

47050.8.4 Office of Internal Affairs

Agents assigned to the Office of Internal Affairs shall be capable of routine and emergency communications with all departmental institutions/facilities and field offices as well as local and/or other public safety agencies. Vehicles assigned to these agents shall be equipped with mobile radios designated for undercover use. Additionally, each field agent shall be assigned a two-way, portable radio.

47050.8.5 Division of Adult/Juvenile Parole Operations

Division of Adult/Juvenile Parole Operations staff, including case-carrying agents, transportation staff, and appropriate community correctional facility staff, must be capable of routine and emergency communications with field offices and local and state public safety agencies. Each Field agent shall be assigned a two-way portable radio, and/or a vehicle mounted radio as dictated by local needs.

47050.9 Telecommunications Equipment Management-General

All CDCR facilities and vehicles equipped with radio communications equipment shall inventory such equipment annually pursuant to DOM Section 22030.12.6.

47050.10 Radio Communications Equipment in Surveyed or Disabled Vehicles

The RCU will coordinate with the OCIO-PSCD to determine whether the equipment shall be repaired, replaced, or surveyed from service.

47050.11 Sensitive Property and Physical Inventory

Consistent with DOM Chapter 2, Subsection 22030.12.1, all portable and mobile radio equipment shall be considered sensitive property as well as safety equipment. While on duty, radios shall be easily accessible by the assigned staff and shall be turned on. When a radio is issued to a staff member for on-going use, the staff member shall be responsible for maintaining the radio with a charged battery and shall be responsible for immediately notifying their supervisor if the radio or related equipment has been lost, stolen, or damaged. The employee's supervisor shall be responsible to notify the radio liaison of the lost or damaged equipment. Portable radios shall not be left in clearly visible areas of unattended vehicles, or accessible to inmates, wards, or parolees. If the equipment is lost, stolen, or damaged due to negligence or culpability, the employee may be subject to actions in accordance with DOM, Section 85050.5.

Each institution and juvenile justice facility housing public safety radio communications equipment shall ensure the communications vault is alarm controlled and monitored.

Each division operating approved CDCR radio equipment shall develop an inventory plan that shall include an annual physical inventory conducted on all portable, mobile, and fixed radio equipment and reconciled with the RCU.

ARTICLE 33 — INCIDENT REPORTS DATABASE

Revised April 16, 1993

47060.1 Policy

Revised April 13, 2015

It is the policy of the Department to provide statistical information on all reportable incidents within California's correctional facilities that involve felons. DOM 51030 defines incidents required to be reported to The Director.

47060.2 Purpose

The purpose of this policy is to establish and fix responsibility and accountability for the management of this system.

47060.3 Responsibility

Revised April 13, 2015

Overall responsibility for the incident reports database (e.g., security, data integrity, QA, QC) lies with The Director of EIS. Delegated responsibility resides with OISB. TSS within OISB is responsible for receiving, analyzing, and coding all reportable incidents; entering the incidents into the database; maintaining incident reports; and ensuring incident reports data base QC.

The Estimates and Statistical Analysis Section of OISB is responsible for the creation of statistical summary reports, annual and quarterly publications, and ad hoc requests.

47060.4 Incident Reports Database-Overview

The incident reports data base is a mainframe system which utilizes personal computers for initial data entry and ultimately uploads the data to a mainframe computer at the Teale Data Center for batch processing. The data are then manipulated and processed for various statistical and informational purposes.

Incident reports are submitted to the Institutions Division in headquarters and OISB staff within 72 hours of the occurrence of the incident. Upon receipt, OISB staff date stamp and manually log the incident report into the incident log book. Data are then extracted from the incident report and a coding sheet is completed. The information from the coding sheet is then entered into the personal computer-based incident reports data base and uploaded to the mainframe system.

ARTICLE 34 — UNASSIGNED

ARTICLE 35 — COMPUTER ROOM CONSTRUCTION

Revised June 7, 2012

47080.1 Policy

Approval is required prior to the expansion, modification, or new construction of any computer room space or site. This policy defines roles and responsibilities for the processing of requests for the expansion, modification, or new construction of any computer room space or site.

47080.2 Purpose

The purpose of this Article is to support the Global Warming Solutions Act (AB32), which passed in 2006 and requires that by 2020 California's greenhouse gas emissions be reduced to 1990 levels, a roughly 25 percent reduction under business as usual estimates. It also supports Government Code 11545(b)(3), which calls for "minimizing overlap, redundancy, and cost in state operations by promoting the efficient and effective use of information technology." In addition, this Article supports California Technology Agency's (CTA's) Technology Letter (TL) 12-5 which states that agencies are no longer required to submit an IT Facilities/Space Construction review form to the CTA for

approval before undertaking any computer room construction, expansion, or modification.

47080.3 Definitions

For purposes of this policy, the following definitions are used.

- Computer room: any space that houses computer operations. Such computer operations could utilize mainframes, servers, or any computer resource functioning as a server.
- CRUISE: "Customer Requests: Upgraded Information Sharing Environment," the online system used by agencies to request services from the Department of General Services (DGS) Real Estate Services Division.
- Emergency: a sudden, unexpected occurrence that poses a clear and imminent danger, requiring immediate action to prevent or mitigate the loss or impairment of life, health, property, or essential public services.
- Enhancement: a change that increases the capacity of a computer room physical plant, including electrical, cooling, and heat recovery capacities.
- Expansion: an enlargement of a computer room which increases the floor space for additional servers and/or server racks. An expansion may or may not require an enhancement of the site's electrical, cooling, or heat recovery capacities.
- Information Technology (IT) activities: IT facility preparation, operation, and maintenance.
- Modification: a change to a computer room structure and configuration that does not increase the floor space. A modification may or may not include an enhancement of the site's electrical, cooling, or heat recovery capacities.
- Site evaluation: evaluation of request for computer room construction at a particular site.
- Third-party energy assessment: an energy assessment performed by an entity outside of the Department, such as a utility company or private vendor.

47080.4 Responsibilities

All requests for computer room construction, expansion, or modification require that a site evaluation be conducted by Enterprise Information Services (EIS).

47080.5 Facilities Management Division

As the request initiator, Facilities Management Division:

- Prepares an IT Facilities/Space Construction Review form to request construction, expansion, or modification of any computer room space or site.
- Requests that a site evaluation be conducted by EIS prior to the initiation of a CRUISE request to DGS.
- Prepares CRUISE requests and submits them to DGS.

47080.6 Enterprise Information Services

EIS is responsible for the following:

- Completes the site evaluation.
- Obtains the authorized approving signature from the Agency Secretary or official designee.
- Describes and justifies proposed computer room construction, expansion, or modification in CDCR's Agency Consolidation Plan.
- Provides the OCIO with notification of computer room repairs that were required as a result of an emergency.
- Communicates requests for third-party energy assessments with the program area if required.

47080.7 Exemptions

Computer room repairs that are required as a result of an emergency do not require prior EIS approval. Emergency repairs may be completed with concurrent notification to EIS. Emergency expenditures which exceed \$25,000 require prior approval from the Department of Finance. Construction or modification of computer rooms at CDCR institutions is exempt from this policy. This exemption includes, but is not limited to, modifications and/or construction of computer rooms, telecom rooms, and all related IT support equipment at all adult and juvenile institutions.

47080.8 Revisions

The Director, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

ARTICLE 36 — INSTANT MESSAGING*Effective November 27, 2012***47090.1 Policy**

Instant Messaging (IM, for purposes of this Article only) technology provides users with the ability to communicate over the California Department of Corrections and Rehabilitation (CDCR) network in real time. This policy outlines the approved use of IM technology over the CDCR network and does not supersede any state or federal laws or any other agency policies regarding confidentiality, information dissemination, or standards of conduct.

- All employees who use the IM method of communication must use the CDCR-provided IM. Employees are prohibited from downloading and using personal, consumer-grade IM software to transmit messages.
- The State reserves the right to monitor and/or keep a record of all IM communications without prior notice; CDCR is not obligated to monitor IM messages.
- Employees should have no expectation of privacy in the use of CDCR-provided IM systems or in anything they store, send or receive on the CDCR's IM system.
- The contents of IMs properly obtained for discovery or management purposes may be disclosed without the permission of the user who created the message.
- The CDCR is under no obligation to retain IM. However, all IM communication shall be treated as business records that may be retained and used as evidence in litigation, audits, and investigations.
- IM content may be subject to various types of access requests, including under the Freedom of Information Act (FOIA).
- High Risk Confidential Information (HRCI) shall not be communicated using IM. Any exclusions or modification to this requirement must be approved in writing by the Information Owner and/or Information Security Office (ISO).

47090.2 Purpose

It is the goal of the CDCR to ensure IM communications are being created, maintained and retained consistent with CDCR policy and state and federal laws. The purpose of this policy is to detail the standards relating to the use of the IM on the CDCR network and is intended to:

- Describe the limitations of the use of this technology;
- Discuss protection of CDCR information;
- Describe privacy considerations when using the IM system; and
- Outline the applicable rules when using the CDCR-provided system.

Proper IM usage and security is a team effort involving the participation and support of every CDCR employee. It is the responsibility of every computer user to know these guidelines, and to conduct his/her activities accordingly.

This document is not all-inclusive, and the ISO has the authority and discretion to appropriately address any unacceptable behavior and/or practice not specifically mentioned herein.

47090.3 Scope

This policy covers appropriate use and retention of any IM sent from the CDCR network and applies to all employees, vendors, volunteers, and agents operating on behalf of the CDCR.

47090.4 Definitions**Confidential Information**

Information maintained by State agencies that is exempt from disclosure under provisions of the California Public Records Act (PRA [(GC § 6250 et seq.)] or other applicable state or federal laws. All information that has not been explicitly defined as public information in §3261.2 of Title 15 should be treated as confidential.

High Risk Confidential Information (HRCI)

Non-public information that if disclosed could result in a significant harm (including financial, legal, risk to life and safety or reputational damage) to the CDCR or individual(s) if compromised through

alternation, corruption, loss, misuse, or unauthorized disclosure. Examples of HRCI include, but are not limited to, the following:

- Personally identifiable information such as person's name in conjunction with the person's social security, credit or debit card information, individual financial account, driver's license number, state ID number, or passport number, or a name in conjunction with biometric information;
- Personal health information such as any information about health status, provisions of health care, or payment for health care information as protected under the Health Insurance and Portability Act of 1996;
- Correctional Offender Record Information as defined in California PC §§ 13100-13104;
- All IT infrastructure information that would reveal vulnerabilities to, or otherwise increase the potential for an attack on, an information technology system of a public agency, including but not limited to firewall and router configurations, server names, IP addresses, and other system configurations;
- Any document which contains information identifying any Confidential Informant, or information provided, as defined in CCR Title 15, Section 3321;
- Any documentation of information which contains information or data within any Gang Data Base as defined in Department Operations Manual (DOM) Section(s) 52070.22 through 52070.24;
- Records of investigations, intelligence information, or security procedures as specified in the PRA Section 6254(f).

Instant Message (IM)

A type of communications service that enables a user to exchange text messages in real time between two or more individuals logged into a particular IM system.

Personally Identifiable Information

Personally Identifiable Information (PII), as defined in California Senate Bill 1386, is the manifestation of an individual's first name or first initial and last name, in combination with one or more of the following:

- Social Security Number;
- Driver's license number;
- State issued ID card;
- Credit or debit card number in combination with any required security code or password that could permit access to an individual's financial account;
- Medical information, history, mental or physical condition, treatment or diagnosis by a health care professional;
- Health information, policy number or subscriber ID, unique identifier, or any information in an application and claims history, including any appeals records.

Sensitive information

Information maintained by the CDCR that requires special precautions to protect from unauthorized use, access, disclosure, modification, loss, or deletion. Sensitive information may be either public or confidential. It is information that requires a higher than normal assurance of accuracy and completeness.

Unauthorized Disclosure

The intentional or unintentional disclosure of confidential information to people inside and/or outside the CDCR who do not have authorization predicated on a "need to know" basis.

47090.5 Privacy Notice

As IM communications are inherently insecure (not protected by encrypted communications), all employees (including contractors, temporary employees, etc.) utilizing IM technology must exercise caution with regard to conversation content. Furthermore, IM clients do not provide sufficient authentication of the parties involved in the conversation. Subsequently, users are not assured that they are communicating with who they think they are (i.e., a user may not be who he/she is claiming to be). For these and other reasons, users of the CDCR's computer system assets, including, but not limited to IM clients, maintain no personal privacy rights with respect to content created, stored, received or sent from the CDCR's information systems. In accordance with the CDCR's Acceptable Use Policy, CDCR reserves the right to intercept, monitor, or record all information stored on its information systems and inspect activity to diagnose problems or identify security threats and/or violations.

47090.6 Acceptable Use

CDCR-provided IM is appropriate for informal business use only. Examples of this include, but may not be limited to, the following:

- When "real time" questions, interactions, and clarification is needed;
- For immediate response;
- For brainstorming sessions among groups;

- To reduce chances of misunderstanding.

Only minimal personal use (non-State business activity) of CDCR-provided IM is permitted, and it should not interfere with the legitimate business of the State.

Prior to sending an IM, verify the accuracy of the selected recipient to prevent unintentionally sending information to an unintended individual.

47090.7 Unacceptable Use

Employees and contracted staff are prohibited from downloading and using personal, consumer-grade IM software (e.g., AOL Instant Messenger, Yahoo!, Google Voice, etc.) to transmit messages on the CDCR network. Examples of unacceptable use include, but are not limited to, the following:

- Communication which violates local, state, or federal laws;
- Communication of sexually explicit material, jokes, rumors, gossip, or unsubstantiated opinions that could be misinterpreted as an official opinion of CDCR;
- Communication promoting harassment or illegal discrimination on the basis of race, gender, national origin, age, marital status, religion, or disability;
- Disseminating CDCR data to individuals without an authorized need to know;
- Sending or sharing of information for unauthorized purposes or to unauthorized individuals;
- Transmission of PII as defined in California Civil Code § 1798 which includes a person's first name (or initial) and last name in combination of a unique personal identifier such as a birthdate, driver's license number, financial account information or social security number;
- Transmission of personal information related to an individual's health status, including any information protected under the Health Insurance Portability and Accountability Act (HIPAA) or other applicable privacy statutes;
- Transmission of personal information related to an individual's education records which is protected under the Federal Rights and Privacy Act of 1974 (FERPA) or other applicable privacy statutes;
- Use of the CDCR IM system to distribute copyright-protected material such as photographs, graphics, music, and documents;
- Sending sports pool or other forms of gambling messages;
- Soliciting for non-CDCR sanctioned or sponsored activities, such as fundraising or items of a political nature;
- Investigatory or security documents;
- Information collected under the Evidence Code;
- Information contained in the Restricted DOM, Subchapter 55000;
- Documents pertaining to collective bargaining;
- Test questions pertaining to employment examinations;
- Documents pertaining to pending litigation;
- Network Infrastructure documents;
- Allowing access to inmates, wards or parolees, or sending messages on behalf of inmates, wards or parolees.

While using a minimal amount of CDCR resources for personal IM is acceptable, sending chain letters or jokes from a CDCR IM account is prohibited.

47090.8 Mass Messaging

Permissions to IM mass groups from a CDCR account must be approved in advance by the ISO on a case-by-case basis.

47090.9 Additional IM Usage Guidelines

Local operating procedures and guidelines may apply to IM content and handling. These local guidelines and procedures are in addition to the IM policy and may not be in conflict with or contradictory to the policy.

47090.10 Instant Messaging Retention

All sent and received IMs from the department's IM system will have a retention period of 3 years. Items archived into a user's personal folders do not have a mandated retention period. This policy guideline covers only information that is either stored or shared via the CDCR IM system, including file attachments. This policy establishes retention

parameters to effectively capture, manage, and retain IM messages. This policy applies to all CDCR employees.

When litigation is pending or threatened against the CDCR or its employees, the law imposes a duty upon the CDCR to preserve all documents and records that pertain to certain issues. A litigation hold directive overrides any retention policy until the litigation hold has been cleared. IMs for employees that have been placed on litigation hold must be retained by the CDCR until the litigation hold is explicitly released.

47090.11 Recovering Deleted Instant Messaging via Backup Media

In order to restore IM operations in the event of a catastrophic failure of the CDCR's IM system, all IM is archived to backup tapes from the email servers and is moved offsite. The CDCR will not restore an individual's IMs from the offsite backup tapes.

47090.12 Enforcement

Failure to comply with this policy and associated policies, standards, guidelines, and procedures may result in disciplinary action up to and including dismissal from state service for employees or termination of contracts for contractors, partners, consultants, and other entities. Legal action also may be taken for violations of applicable regulations and laws.

47090.13 Deviation from Policy

CDCR staff, contractors, volunteers, and agents operating on behalf of CDCR must comply with all applicable policies rules, standards, procedures and guidelines. Any variation to this policy and to risk acceptance policy applies to instances where the cost to remediate a non-compliant system exceeds the cost and the risk of remaining non-compliant.

Any deviations to policy requests are reviewed and analyzed by the ISO, and if the request creates significant risks without compensating controls, it will not be approved.

All approved deviations to policy requests will have an expiration date and must be reviewed prior to that date to ensure that assumptions or business conditions have not changed, and be reapproved if the deviation policy is still valid.

47090.14 Revisions

The Director, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

ARTICLE 37 — CLASSIFICATION TRACKING SYSTEM

Revised April 16, 1993

47100.1 Policy

It is the policy of the Department to adhere to the provisions of PC 2081.5 which require that the Department maintain complete and accurate case records on all prisoners in its custody. Each case record file shall include all information received by CDC from courts, probation departments, sheriff and police departments, DA offices, the State DOJ, the FBI, and other pertinent agencies and persons.

The Classification Tracking System (CTS) was developed to automate the paper-flow process associated with classifying and maintaining a complete (classification) history of an inmate.

47100.2 Purpose

The purpose of this policy is to establish and fix responsibility and accountability for management of CTS.

47100.3 Responsibility

Overall responsibility (e.g., security, data integrity, QA, QC) for CTS lies with the CDC Director and Chief Deputy Director. Delegated responsibility resides with OISB, and with management, supervisory, and end user personnel for units that utilize the applications residing on CTS.

As custodian of the system, ISD is responsible for application hardware, software support, and maintenance of the system.

47100.4 Classification Tracking System-- Overview

CTS is a batch processed, centralized inmate classification system supported by the Teale Data Center. CTS contains a complete historical record of all classification information for all inmates and parolees under CDC jurisdiction.

Facility staff shall forward a copy of each CDC Form 839, Initial Classification Score Sheet, and CDC Form 840, Reclassification Score Sheet, to OISB for data entry. TSS reviews all classification documents, coordinates data entry with the agency providing the key entry contract service, and acts as liaison with ISD on the weekly update of the system. TSS and facility classification staff conduct regular joint OISB/facility data reviews to maintain the accuracy and integrity of CTS data. In addition, TSS provides CTS QC training, coordinates requests for changes and improvements to the data system, and responds to requests for classification data from facilities, parole regions, headquarters, and outside agencies.

The Estimates and Statistical Analysis Section uses CTS information to generate monthly summary reports and semiannual reports on inmate classification scores, classification levels, and projected bed needs by classification level. Summary information is extracted from CTS for use in planning and decision making in the Department and by control agencies. Projected bed need information is used by the Department for budgeting and planning new prison construction. CTS information is also used to answer requests from Department staff and others on various characteristics of inmates, such as the number of felons with holds, special category needs, or military service.

Requests for specialized reports and other offender information shall be addressed to TSS in OISB.

47100.5 Revisions

The Chief, ISD, or designee shall be responsible for ensuring that the contents of this section are kept current and accurate.

PC § 2081.5.

ARTICLE 38 — ELECTRONIC MAIL

Effective July 1, 2013

47110.1 Policy

The California Department of Corrections and Rehabilitation (CDCR) maintains an e-mail system to facilitate business communications and assist employees in performing their daily work activities. This policy outlines the approved use of CDCR e-mail and does not supersede State or federal laws or any other agency policies regarding confidentiality, information dissemination, or standards of conduct.

- The State reserves the right to monitor and/or keep a record of all e-mail communications without prior notice.
- Employees should have no expectation of privacy in the use of CDCR e-mail systems or in anything they store, send or receive on the CDCR's e-mail system.
- The contents of e-mails properly obtained for discovery or management purposes may be disclosed without the permission of the user who created the message.
- E-mail shall be treated as business records that shall be retained and can be used as evidence in litigation, audits, and investigations.
- E-mail may be subject to various types of access requests, including, but not limited to, requests for records under California Government Code (GC) section 6250 et seq.

High Risk Confidential Information (HRCI) shall not be transmitted using e-mail without CDCR approved encryption being applied. Any exclusions or modification to this requirement must be approved in writing by the Information Owner and/or the Information Security Office (ISO).

47110.2 Purpose

It is the goal of the CDCR to ensure e-mail communications are being created, maintained and retained consistent with CDCR policy and state and federal laws. The purpose of this policy is to detail the standards relating to the use of e-mail on the CDCR network and is intended to:

- Protect CDCR information.

- Describe privacy considerations when using the CDCR e-mail system.
- Outline the acceptable usage rules when using the CDCR e-mail system.
- Maintain availability of the CDCR e-mail system to sustain critical business operations.

Proper e-mail usage and security is a team effort involving the participation and support of every CDCR employee. It is the responsibility of every computer user to know these guidelines, and to conduct his/her activities accordingly.

This document is not all-inclusive, and the ISO has the authority and discretion to appropriately address any unacceptable behavior and/or practice not specifically mentioned herein.

47110.3 Scope

This policy covers appropriate use and retention of the CDCR provided e-mail and applies to all employees, vendors, volunteers, and agents operating on behalf of the CDCR.

47110.4 Access to E-mail

CDCR staff may be provided an ID for access to e-mail on the CDCR Network. All access to e-mail shall be protected by password, and all policies pertaining to the use and protection of passwords shall apply. No generic or group access to an ID shall be used. A "group mailbox" is acceptable as long as each individual in the group has his/her own ID and password. If you require someone in addition to yourself to access or monitor your e-mail, establish a rule to forward/copy your mail to another's CDCR mailbox or add them as a delegate. Sharing a password for any reason is prohibited.

47110.5 Acceptable Use

The e-mail system is provided for official CDCR business. Using e-mail in an inappropriate manner may result in the loss of e-mail privileges and/or disciplinary action. Examples of appropriate use of the CDCR e-mail system include, but are not limited to, the following:

- Scheduling, coordinating, and documenting business meetings and/or assignments.
- Notifying CDCR personnel of changes in work policies and/or work procedures after the appropriate approval process has been completed (shall be followed up in writing).
- Transmitting and/or sharing non-HRCI work related material, including documents, files, reference material, and links to Internet sites.
- Sending and receiving business related Internet mail.
- Notifying employees of CDCR sanctioned employee events including, but not limited to, the Medal of Honor ceremony, United California State Employees Campaigns, and similar approved activities.
- Scheduling appointments including personal appointments and lunch breaks on an electronic calendar.
- Creating or sending notes or messages of a predominantly personal nature, or for personal use, shall be kept to a minimum.

47110.6 Unacceptable Use

Examples include, but are not limited to, the following:

- Using the system to discuss, distribute, or share HRCI without CDCR approved encryption controls.
- Reviewing, receiving, and/or intercepting the electronic communications of another employee without express, advance authorization by the employee or their management.
- Logging on with a user ID and password other than your own.
- Copying or routing notes, messages, documents, or memoranda to individuals who are not involved in the relevant work project or who otherwise have no business related interest in the subject matter of the note, message, document, or memorandum.
- Except as otherwise provided in this policy, reading e-mail of another employee without his/her knowledge and consent.
- Sending sports pool or other forms of gambling messages.
- Using e-mail for any unlawful or illegal endeavor.
- Soliciting or advertising for non-CDCR activities, including fundraising or items of a political nature.
- Allowing access to inmates, wards or parolees, or sending messages on behalf of inmates, wards or parolees.
- Transmitting profanity, obscenity, threatening language, gossip, or derogatory remarks.
- Distributing jokes, poems, chain-letters, or other non-business related material.

- Chain letters and e-mail containing religious, humorous, and political messages are forbidden. E-mail that contains promises, hoaxes, or threats shall not be distributed. Receipt of such e-mail should be reported to management. Forwarding of non-CDCR e-mail is forbidden. It is recognized that recipients cannot control in-coming mail.
- E-mail shall be free of offensive or unlawful material, including slanderous, discriminatory, sexual, pornographic, profane, or revolutionary content. This prohibition applies to e-mail attachments and to the content of Internet sites referenced or linked from e-mail. Displaying, printing, disseminating, or possession of such material may be reason for disciplinary action. The exception to this policy is any material regarding subject matter that may otherwise be considered objectionable that is required for specific work-related purposes may be sent or attached to an e-mail when the material is being sent to a limited number of specified individuals, and not to be sent to group e-mail lists or broadcast statewide.
- Use of the CDCR e-mail system to distribute copyright-protected material such as photographs, graphics, music, documents, etc., without the expressed consent of the copyright holder constitutes a copyright violation, and may result in disciplinary action.

Restrictions on the use of e-mail wallpaper and stationary will be left to the discretion of each Hiring Authority.

47110.7 Privacy and Confidentiality

All CDCR e-mail is considered property of CDCR and may be subject to inspection, investigation, Public Records Act (PRA) requests, and/or litigation. Employees, contractors and consultants have no right of privacy with respect to information or messages sent using state-owned equipment and/or resources. E-mail is not private and is subject to monitoring with or without notice.

47110.8 Confidential and Sensitive Information

Certain types of information maintained by the CDCR are confidential and protected by State and federal law. The use of e-mail to send confidential information should be limited to an as needed basis. Never type the information in the body of the e-mail, and never send a password or decryption key in the same e-mail. Unless the file is encrypted or password-protected, it can be read by others and, therefore, is not considered private communication.

Following is a list of the types of information defined as HRCI that shall not be included in e-mail or attached to an e-mail, unless the e-mail and/or attachments are encrypted:

- Personally identifiable information such as a person's name in conjunction with the person's social security number, credit or debit card information, individual financial account, driver's license number, state ID number, or passport number, or a name in conjunction with biometric information;
- Personal health information such as any information about health status, provisions of health care, or payment for health care information as protected under the Health Insurance Portability and Accountability Act of 1996 (HIPAA);
- Correctional Offender Record Information as defined in California Penal Code sections 13100-13104;
- Information that if disclosed would reveal vulnerabilities to, or otherwise increase the potential for an attack on, an information technology system of a public agency as specified in GC section 6254.19. Examples include but are not limited to firewall and router configuration information, server names and IP addresses, and other system configuration details;
- Any documentation of information which contains information or data within any Gang Database as defined in the CDCR Department Operations Manual (DOM) sections 52070.22-52070.24;
- Records of investigations, intelligence information, or security procedures as specified in GC section 6254(f); this includes but is not limited to information identifying confidential informants and security procedures contained in DOM section 55000.
- Personnel, medical, or similar files, the disclosure of which would constitute an unwarranted invasion of personal privacy protected under GC section 6254(c) or the Peace Officers Bill of Rights under GC section 3300 et seq.

Encrypted e-mail must be used when HRCI information is sent to non-CDCR e-mail addresses by placing the keywords of "CDCR Encrypted

Message" into the subject line of the e-mail without the quotes. This method should be used only when transmitting HRCI, confidential, or sensitive data.

Prior to sending any e-mail, verify the accuracy of the recipient's e-mail address to prevent unintentionally sending it to an unauthorized individual. Once an e-mail is sent outside the Department, it cannot be recalled and/or undone.

47110.9 Personal Information

Employees shall not seek out or use personal information maintained by the CDCR for their own private interest or advantage. Personal information shall not be transmitted in e-mail or as attachments to e-mail without appropriate encryption controls.

47110.10 Unsolicited E-Mail

Unsolicited e-mail may carry viruses. If the sender's identity and intent cannot be verified, such e-mail should be deleted unopened. Unsolicited e-mail from unknown senders should always be deleted unopened. Do not open attachments or Internet links accompanying such unsolicited e-mail.

47110.11 Use of Global Distribution Lists

Use of the global distribution list should be limited to departmental, State, or national emergencies, and information from executive levels or program areas that affect all employees. Distribution of information not required by all employees shall be limited to the affected work groups or physical locations.

47110.12 E-Mail Administration

Enterprise Information Services (EIS) shall perform all administration functions including, but not limited to, establishment of server mailboxes, system-wide filters, and virus scanning functions. EIS shall determine the disk space required to ensure correct functionality of the e-mail system.

47110.13 E-Mail Virus Protection

EIS shall manage the virus protection program for all workstations, servers, and network devices. All workstations connected to the CDCR Network or that are Internet accessible shall have the most current Virus Protection software, determined by the EIS. CDCR Network workstations shall be configured to automatically update the virus protection software. Staff shall not disable or turn off this feature. Distribution of virus-laden e-mail may result in performance degradation of the CDCR network and the removal from the network of the workstation(s) from which the infected e-mail is sent.

47110.14 Local E-Mail Usage Guidelines

Local operating procedures and guidelines may apply to e-mail content and handling. Local guidelines and procedures are in addition to this e-mail policy and may not be in conflict with or contradictory to this policy.

47110.15 Electronic Document Management

The CDCR is committed to ensuring that all departmental electronic documents, including e-mail messages used by staff in the course of their employment, are retained efficiently and in compliance with the Records Management Act, GC section 14740, et seq.

47110.16 E-Mail Retention

E-mail messages are official records and are subject to State, federal and CDCR rules and policies for retention and deletion. The E-mail Retention Policy defines how long information sent or received by e-mail should be retained. These policy guidelines cover only information that is either stored or shared via e-mail, including e-mail attachments. This policy establishes retention parameters to effectively capture, manage, and retain e-mail messages. All e-mail (e.g., administrative correspondence, fiscal correspondence, general correspondence) is subject to this policy. This policy applies to all individuals using the CDCR e-mail system. All sent and received e-mail from the department's e-mail system shall be retained for a period of three years.

When litigation is pending or future litigation is reasonably probable, the law imposes a duty upon CDCR to preserve all documents and records that pertain to certain issues. A litigation hold directive overrides any retention policy until the litigation hold has been cleared. E-mail for employees that have been placed on litigation hold must be retained by CDCR until the litigation hold is released or 3 years have passed, whichever occurs later.

47110.17 Enforcement

Failure to comply with this policy and associated policies, standards, guidelines, and procedures may result in disciplinary action up to and including dismissal from State service for employees or termination of contracts for contractors, partners, consultants, and other entities. Legal action also may be taken for violations of applicable regulations and laws.

47110.18 Deviation from Policy

CDCR staff, contractors, volunteers, and agents operating on behalf of CDCR must comply with all applicable policies rules, standards, procedures and guidelines. Variations and exceptions to this policy will be based on instances where the cost to remediate non-compliant systems exceeds the cost and the risk of

remaining non-compliant. Deviations to policy requests are reviewed and analyzed by the ISO, and if the request creates significant risks without compensating controls, it will not be approved.

All approved deviations to policy requests shall have an expiration date and must be reviewed prior to that date to ensure that assumptions or business conditions have not changed, and be reapproved if the deviation policy is still valid.

47110.19 Revisions

The Director, EIS, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

ARTICLE 39 — STATEWIDE ACCOUNTING AND REPORTING SYSTEM

Effective November 30, 1992

47120.1 Policy

It is the policy of the Department to use the California Statewide Accounting and Reporting System (CALSTARS) to perform program cost accounting, provide financial information for management, and help standardize the State's accounting process.

47120.2 Purpose

CDC uses CALSTARS in order to:

- Provide timely, accurate, and meaningful financial information.
- Streamline user access to accounting information, and the processing of accounting transactions.
- Provide financial information reports for management purposes.
- Satisfy legal requirements of accounting for the State's resources at the Department and facility level.
- Have the capability to meet the State's reporting requirements.

47120.3 Responsibilities

The DOF has overall responsibility to maintain and enhance the capabilities of the CALSTARS system.

Operational and financial responsibilities for CALSTARS have been delegated to the fiscal officers at CDC facilities. These fiscal officers shall ensure the following:

- Accounting staff understand CALSTARS' accounting process.
- All financial data entered into CALSTARS' system are accurate and entered in a timely manner.
- CALSTARS' reports are reviewed for accuracy.
- Management is provided with accurate financial data.

The Accounting Systems Section is responsible for:

- Assisting, resolving, and making recommendations regarding CALSTARS' system problems.
- Monitoring CALSTARS' operations at each facility's accounting office.
- Installation and implementation of CALSTARS systems for new facilities.
- Providing detailed CALSTARS accounting training.

Security

In order to operate CALSTARS, designated personnel within the Department shall be provided with the ability to access the system through CALSTARS terminals within the Department. Each accounting office shall designate an individual as the security officer. This individual may be the person in charge of accounting, or an individual at a higher level. The security officer is required to:

- Complete CALSTARS Form 95, Security Form, to assign each designated person a user identification name. In the completion of this form, the individuals are assigned access only to those areas that affect their particular job responsibility. This form

shall be submitted to the CALSTARS EDP section of DOF in a sealed envelope marked "confidential."

- Complete and submit a CALSTARS Form 98, Signature Sheet, to CALSTARS EDP Section at the DOF.
- Ensure that there is proper separation of duties within the Department, as required by the SAM 8080.1.
- Complete CALSTARS Form 95 to add, change, or delete records in the security file as changes occur.
- Maintain a listing of all departmental personnel assigned to CALSTARS user identification. A listing of CALSTARS' users by the Department is available by special request from the DOF.

47120.4 Overview of California Statewide Accounting and Reporting System

CALSTARS is a comprehensive and flexible system that has been designated to satisfy most of the accounting and reporting requirements of the Department. Listed below are the accounting functions CALSTARS performs.

Appropriation Accounting

Encompasses controlling the financial activity of the Department at the level specified in the budget act and by other pertinent legislation. The primary objective of appropriation accounting is to assist the Department by ensuring that expenditures stay within legal limitations.

Allotment Accounting

Encompasses two functions: first, to prevent expenditures from exceeding certain budget allotments; second, to help monitor internal budgets established to report on Department operations.

Budget Preparation Support

Provides historical data needed for budget preparation.

Encumbrance Accounting

Provides accountability of each encumbrance document, safeguards against the over-expenditure of funds, and tracks the status of each encumbrance document and any related actions against it.

Claim Processing/Disbursements

Provides automated support in the preparation and processing of claim schedules for payment to vendors.

Obligations/Accounts Payable

Facilitates the reporting of obligations incurred. Each obligation can be tracked by document number.

Receipt Accounting

Classifies and records all monies received by the Department.

Accounts Receivable

Maintains information on accounts receivable to assist in tracking amounts due to the Department.

Office Revolving Fund

Provides data to support the revolving fund operation by tracking individual advances, and by providing the ability to account for and report on all of the assets, liabilities, and transactions of the revolving fund.

Federal Grant Accounting

Provides detailed cost accounting for each individual grant.

General Ledger Accounting

Maintains separate general ledger accounts to indicate balances of the various types of assets, liabilities and residual nominal accounts.

Cost Accounting/Cost Allocation

Provides automated assistance in the allocation of indirect costs to programs.

Labor Distribution

Provides personnel costs to programs through the State Controller's payroll interface tape.

Report/Retrieval

Provides standard financial reports and has ad hoc reporting capability.

47120.5 Revisions

Revised April 16, 1993

The Chief, ISD, or designee shall be responsible for ensuring that the contents of this section are kept current and accurate.

SAM § 8080.1.

ARTICLE 40 — DISTRIBUTED DATA PROCESSING SYSTEM*Revised April 10, 1993***47130.1 Policy**

It is the policy of the Department that the DDPS be used by facilities to efficiently maintain specified inmate information. This on-line, integrated information system has been established at the facilities to allow information sharing among multiple users within each facility.

47130.2 Purpose

The purpose of this policy is to describe DDPS and provide requirements for its use, thereby assisting facility staff to maintain a more efficient and secure environment in facilities.

47130.3 Responsibility Within DDPS

Wardens have direct responsibility for the use of DDPS at facilities, and responsibility is delegated to staff who use DDPS applications. Such responsibility includes ensuring the security of the system, and the integrity and accuracy of its data.

Users input information into the DDPS and, in return, are able to access the pooled information data base of the system. Since multiple users access the data base, there is an increased importance for entered information to be timely and accurate since it is relied upon by users throughout the Department.

The facility AISA is responsible for on-site support of DDPS users. This includes user log-on, security, trouble-shooting, producing ad hoc reports using INFORM, personal computer download activities, and headquarters liaison activities. The AISA provides assistance and training to users of the system. Additional training and assistance may be arranged through ISD.

DDPS issues that cannot be resolved at the facility or through ISD should be directed to the Deputy Director, ID.

QA and QC are ongoing concerns. ISD has established controls to ensure the accuracy of technical aspects of DDPS. Periodic monitoring and audits have been established to ensure that QC requirements are met, and assistance is provided to eliminate deficiencies within specified time frames.

47130.4 System Overview of DDPS

DDPS is a system comprised of one or more minicomputers operating in each facility and connected to minicomputers in headquarters by a wide area communications network. Four major applications reside currently on the DDPS. In addition to the requirements of this section, use of each application shall meet general operating specifications regarding policy, purpose, responsibility, QA, and QC.

The four DDPS applications are:

Inmate Roster System

The Inmate Roster System is the basis for DDPS and is, therefore, critical for the maintenance of all other DDPS applications. The roster is designed for use by control room staff and provides an automated means for tracking inmate location. This application allows any authorized user to request reports or make inquiries regarding any inmate or housing unit in the facility.

Inmate Roster Record

An Inmate Roster Record is created the first time an inmate is admitted. At that time, control room staff enter the inmate's full name, date of birth, ethnicity, arrival date, and location from which the inmate arrived. Once the inmate is admitted, the user must enter only the inmate's CDC number and the first five characters of the last name to enter a movement transaction. Reports on inmate movement may be generated within this application. The Automated Daily Movement Sheet is designed to assist control room staff in their use of the CDC Form 117, Daily Movement Sheet.

In addition to the inmate roster, this application maintains a roster of the housing structure and beds at each facility. Control room staff may use this information to readily identify vacant beds, the identity of the inmate in each bed, and beds that are being held for inmates on temporary leave from the facility (e.g., out to court for the day, in a local hospital). Bed vacancy and empty bed reports may be produced in this application to assist control room staff with the running count process.

Although the inmate roster was designed to serve the needs of control room staff, it has proven to be highly beneficial to other functional areas of the facility. Mailrooms have replaced their card systems with query terminals, and many visitor control areas use either terminals or

housing reports to locate inmates within the facility. The inmate assignment office uses the information to make appropriate job assignments. Facility staff can request the preparation of special reports by their AISA using "INFORM" or by ISD using ad hoc reporting capabilities.

Responsibility

The Control Room Sergeant is responsible for data integrity and security of this application.

Time Collection System

The Time Collection System automates the data entry portion of updating the OBIS work time credit database. The CDC Form 191, Inmate Timecard, is scanned using a Sentry 4000 Optical Scanner. The scanned timecard information is sent to a file on the DDPS at each facility; the file is transferred nightly to Teale Data Center; data is validated; and the OBIS database is updated.

Responsibility

The CCRM is responsible for data integrity and security.

Inmate Classification System

The Inmate Classification System tracks the results of inmate classification hearings and contains certain descriptors critical to other functional areas of the facility. The privilege group determines an inmate's eligibility for canteen draw, visiting, and other inmate activities. Additionally, the inmate classification system tracks hearing dates and provides a "tickler" to notify counselors of upcoming hearing responsibilities.

Inmate Classification System information is entered after the initial inmate record is created. It is imperative to enter data during or immediately following hearings so that staff have up-to-the-minute information about an inmate's custody level and classification score, thus assisting subsequent program decisions.

Responsibility

The CC-II/III is responsible for data integrity and security.

Inmate Assignment System

The Inmate Assignment Application tracks inmate job assignments and inmate job waiting lists. It contains descriptive information about each job, including pay grade, dictionary of occupational titles code, Inmate Work Training Incentive Program code, assignment beginning date, job status, work location, site phone number, work schedule including regular days off, the name of the inmate holding the job if assigned, and any restrictions or special job requirements.

When assigning an inmate to a job or a waiting list, this application uses the Inmate Roster Record (including classification information) to draw custody level and suffix, work group, ethnicity, administrative determinants, work qualifiers, and housing data.

Information entered by the assignment lieutenant updates the inmate roster clearance regarding food handling, gate clearance, and other clearances. The Inmate Assignment System maintains an inmate's current work and waiting list status. Job history records provide information (including dates) about all previous jobs held by an inmate in that facility. Location records provide ethnicity counts to assist in maintaining an ethnic balance. Transportation records contain assignment information used for the daily movement sheet.

Responsibility

The Inmate Assignment Lieutenant is responsible for data integrity and security.

Inmate Trust Accounting System

PC 2085 and 5057 require that the Department establish, as necessary, an accounting and auditing system to accurately account for all inmate money and property. The Inmate Trust Accounting System is designed to:

- Replace outdated bookkeeping machines.
- Automate the bookkeeping functions in the facility's trust office.
- Account for all inmate monies held in trust by the Department. Each facility uses the inmate trust account system to perform trust accounting functions.

This application uses information provided by the Inmate Roster System to identify inmates who have just arrived, transferred out, transferred in, or have been paroled or discharged. For each new arrival, the Inmate Trust Accounting System establishes a trust account in which monies shall be held and deposits and withdrawals posted. An inmate's record is updated when the inmate leaves the facility to reflect the new location so that account information and funds can be transferred.

The Inmate Trust Accounting System produces monthly statements of account, a general ledger, accounts payable, accounts receivable, a daily balance sheet, audit reports, and preprinted canteen cards.

Responsibility

The Trust Officer is responsible for data integrity and security.

47130.5 Revisions

The Chief, ISD, or designee shall be responsible for ensuring that the contents of this section are kept current and accurate.

47130.6 References

PC §§ 2085 and 5057.

ARTICLE 41 — DEPARTMENTAL WORKGROUP COMPUTING POLICY

Revised March 21, 1997

48010.1 Policy

This document is the formal definition of the Department policy regarding the acquisition and use of workgroup computing technologies, including portable, stand-alone, and networked microcomputers, electronic mail, Internet and Intranet access, connectivity, and Web pages. It is CDC's policy that these technologies be used to:

- Increase employee and workgroup productivity.
- Enhance the sharing and distribution of departmental information, both within CDC and to external entities.
- Enhance overall departmental communication.
- Reduce the overall departmental operating costs by strategically deploying standard workgroup technologies at all levels of the organization.

48010.2 Purpose

The purpose of this policy is to establish standards and responsibilities for the acquisition, use, and management of workgroup computing within CDC. Specifically, the policy is intended to:

- Promote the identification of cost-effective opportunities for using workgroup computing technologies to support the accomplishment of the mission and program objectives within CDC.
- Ensure that the use of workgroup computing technologies is consistent with CDC's SISP, tactical plans, or other management plans.
- Ensure that existing CDC and State information technology infrastructure standards are met, and that individual workgroup computing activities do not preclude the implementation of other departmental applications on the same configuration.
- Establish policy structures, levels of approval, and accountability to define the appropriate use, acquisition, and support (maintenance and training) of workgroup computing technologies, including electronic mail functionality and Internet access.
- Ensure that the integrity and security of automated files, ITS, and program operations are not jeopardized by the use of workgroup computing activities, including connection to external networks (Internet).
- Establish acceptable use standards for departmental employees using workgroup computing technologies, including portable and desktop systems, electronic mail, and Intranet and Internet connectivity.
- Establish appropriate policy structures for departmental information that is electronically provided by CDC for public access by the Internet.
- Establish appropriate policy structures for the publication of departmental information that is electronically provided internally to CDC by the Intranet.

48010.3 Scope, Definitions, and Exclusions

This section defines the scope and definitions for the workgroup computing policy and the automated technologies that are excluded from this policy.

48010.3.1 Scope

The scope of this policy deals with the appropriate use, approval, and acquisition of off-the-shelf workgroup computing technologies within CDC to increase the productivity of individuals and groups of employees working in the same programmatic function. This policy is for the benefit of employees only and cannot be used to acquire equipment for the exclusive use of inmates.

A workgroup is a group of employees performing the same programmatic function. A programmatic function within CDC can be defined either by commonality of organizational structure or work objectives. For the purposes of this policy, accounting, personnel, and business services could each be considered a programmatic function. A correctional institution or parole region could also be considered a workgroup performing the same function, i.e. managing groups of inmates or parolees.

This policy supports the SAM 4989.1 which promotes the deployment of workgroup technologies to increase the overall efficiency of State organizations. The workgroup computing approach focuses on the deployment of proven "off-the-shelf" hardware and software systems and the interconnection of these systems. This policy also promotes the development and maintenance of consistent computer and network services and standards to ensure that life cycle support is minimized for all workgroup computing technologies.

The following are included as workgroup computing technologies:

- Commercial productivity software for such functions as word processing, spreadsheet analysis, time management, presentation graphics, Internet connection, remote communication access, workgroup file management, and electronic mail connectivity.
- Special purpose software applications, such as accounting or dietary management software, that are off-the-shelf productivity systems for an identified departmental workgroup.
- Portable and desktop systems based on microcomputer hardware and operating system.
- Full network server configurations to interconnect workgroup computing systems and provide standard electronic mail and Intranet capabilities.
- Necessary networks and communication devices to interconnect workgroup computing systems to facilitate internal and external communications and the sharing of information. The use of modems within CDC is limited to the requirements defined in DOM 48020, Departmental Modem Policy. While the acquisition of these devices can be considered part of a workgroup computing solution, additional levels of approval and justification within CDC organization are needed. Please see the referenced policy.

The policy and the processes that are defined herein are consistent with the overall strategic directions and tactical initiatives that exist in CDC for support of major program areas.

48010.3.2 Definitions

A glossary of terms has been provided in DOM 41010 EDP General Information. The list of terms conforms with the definitions of terms provided in the SAM 4989.1.

48010.3.3 Exclusions

SAM 4989.1 places limits on the applicability of the workgroup computing policy within a State organization. Any single workgroup computing request must be consistent with, and not exceed, the cost delegation level assigned to CDC, as stated in SAM 4819.34.

Any acquisition, maintenance, or support of workgroup computing requests that require a budget augmentation or that qualifies as an Advanced Technology Project, SAM 4821 through 4821.8, is not covered by the workgroup computing policy. However, it is permissible to use this policy to acquire equipment that is the normal workgroup complement of equipment (hardware and software) for new positions funded through a budgetary augmentation. More specifically, the policy **does not** apply to the following:

- Critical Applications. These are defined as acquired or developed applications that, if they were not available, even for short periods of time, would cause the State or CDC a significant negative impact regarding:
 - The health and safety of the public, State employees, or inmates.
 - The fiscal or legal integrity of State operations.
 - The continuation of essential departmental programs.
- Department Databases. These are systems that involve the creation and maintenance of files or databases that serve more than a single workgroup within CDC, or where a single workgroup constitutes CDC.
- Uploading of Data Files. Requests cannot include support applications involving the uploading of data to databases used by persons outside of the workgroup. Word processing, electronic mail, and Internet files are not considered data files for the purpose of this policy and as such are part of workgroup computing.
- Computer Programming. Acquiring computing technologies, where the proposed system is dependent on program design, coding, and ongoing programming support to develop and maintain the system, are not part of workgroup computing. Both procedural languages used to create database applications, and compilers used to compile procedural language routines,

are considered elements of computer programming and are excluded from this policy. The creation of macros within a productivity software system and/or simple program instructions to run file management reports and queries as part of or by additional software packages, are **not** considered computer programming and can be part of a workgroup computing solution. The use of file management products, to manage information limited to a single workgroup, is allowed under this policy, so long as the file management functions are done through the use of menus and other pre-designed tools provided with the software package.

- Terminal Emulation. Acquiring computing technologies, for the sole purpose of emulating or replacing a computer terminal does not qualify as workgroup computing. While the use of microcomputer systems in a terminal emulation mode is not prohibited, such use alone does not constitute justification for acquisition of microcomputer commodities.
- Specialized or Single-Purpose Systems. Acquiring specialized, single-purpose desktop configurations, such as computer-aided design systems, desktop publishing systems, programmer workbench systems, or artificial intelligence systems does not qualify as workgroup computing. However, software-based applications on a general purpose personal computer may be covered by the workgroup computing policy. For example, desktop publishing employing word processing, graphics, and page layout software packages on a general purpose personal computer falls within this policy. Desktop publishing employing a specialized computer system that has been developed and marketed for the sole purpose of doing desktop publishing, does not.

Units wishing to initiate information technology projects that are not covered by the workgroup computing policy shall follow the procedures for planning and justifying such projects as specified in SAM 4819.3 through 4819.39.

48010.4 Responsibilities

The various areas of responsibility under the workgroup computing policy are summarized in the following sections.

48010.4.1 Department Management

As defined in the SAM 4841.1, the Director has ultimate responsibility for information technology, security, and risk management. The Director has the ability to delegate by policy, procedure, or written notification these responsibilities to other individuals in CDC. The specific requirements for the Director or his designee are to ensure that CDC has:

- A current information management strategy and a current or planned information technology infrastructure description on file, and that the workgroups computing acquisitions and usage are consistent with these strategies.
- Processes to safeguard workgroup computing systems and the information generated and transmitted by these systems.
- The necessary policies and procedures for the technical network support activities, including installation, configuration, problem-determination, maintenance, backup, recovery, and all other activities, which would be in addition to those normally associated with stand-alone personal computers.
- The necessary policies and procedures to provide support and services for access to the Internet, Intranet, and electronic mail systems and servers including installation, configuration, problem-determination, maintenance, backup, recovery, security, and all other activities, which would be in addition to those normally associated with networks and communication systems.

The method in which the Director of CDC will ensure compliance with these responsibilities, is summarized in the remainder of this section.

48010.4.2 Assistant Director of Communications

The Assistant Director of Communications within CDC has responsibility for developing policies, guidelines, and procedures to ensure the appropriate disclosure and protection of departmental information when being transmitted outside and/or accessed from outside of the organization. Since one of the primary purposes of workgroup computing is to improve the method of electronic communication, the Assistant Director of Communications, by delegation of the Director, is responsible for ensuring that the

workgroup computing policy conforms with departmental communication policies.

Responsibilities of the Assistant Director of Communications:

- Develop and maintain standards for Internet Web pages within CDC to define the “look, feel, and content” of such pages. This scope does not include Intranet Home page standards or Intranet/Internet Web sites.
- Review and comment on all workgroup policies and procedures that allow for the electronic distribution of departmental information outside of the organization using workgroup computing technologies. (Approved information technology projects do not fall under these policies.)
- Provide assistance in the development of departmental training materials to ensure that users understand their responsibilities as they pertain to the electronic transmittal of information using workgroup computing technologies.
- Ensure that auditing and record keeping standards are not in conflict with the IPA monitored by the Assistant Director of Communications.

48010.4.3 Information Security Officer

The Information Security Officer within CDC has responsibility for developing policies, guidelines, and procedures to ensure the appropriate security and safety of information technology resources, including the systems and resident information. Since one of the primary purposes of workgroup computing is to improve the process for information distribution and communication both internal and external to the organization, the Information Security Officer by delegation of the Director, is responsible for ensuring that the workgroup computing policy is in conformance with departmental information security policies.

Responsibilities of the Information Security Officer:

- Review workgroup computing processes and request forms, CDC Form 1855, Workgroup Computing Justification, CDC Form 1855 B, Workgroup Computing Justification - Additional Modem Justification, and CDC Form 1856, Web Page Justification, to ensure that employees are given notification of security and auditing requirements and that security processes are being followed.
- Review and comment on workgroup policies and procedures that allow for the electronic access, retrieval, and storage of information on departmental workgroup computing systems to ensure that security requirements are being met.
- Provide assistance in the development of departmental training materials to ensure that employees understand their responsibilities as they pertain to the security of departmental information technology resources and information.

48010.4.4 ITS Management

The overall responsibility for the deployment and maintenance of information technology systems rests with ISD of the EC&ISD within the Support Services area of CDC. The ISD is responsible for the development and maintenance of CDC standards for workgroup computing technologies, with the exception of Internet Web page format and content, and the activities assigned to the Information Security Officer.

The ISD is responsible for the maintenance of the departmental networks, including the support of the infrastructure that interconnects departmental locations and provides remote access and connection to external entities. The ISD Data Center maintains the standards for CDC’s Intranet and Internet Web site and for the “look-and-feel” of departmental Intranet Home pages. Intranet or Internet Web pages developed by the users will be implemented on the Intranet or Internet Web servers by ISD staff. Intranet access and electronic mail systems are provided as part of the standard department network infrastructure and are included in the standards for all new network installations that will connect to the ISD departmental network.

Within this framework, ISD is integrally involved in workgroup computing to develop policies and procedures regarding the acquisition, use, and distribution of information. The ISD’s Data Center staff determines the information technology standards for hardware and software and provides the ongoing maintenance and support of the infrastructure and CDC’s Intranet and Internet access capabilities. The Workgroup Computing Coordinator, who administers the processes to support workgroup computing, is also part of ISD. The ISD also provides the technical expertise in terms of software systems and networking to implement the various workgroup computing requests and provides assistance in the initial configuration and deployment of a full workgroup computing solution.

48010.4.5 Departmental Workgroup Computing Coordination

Responsibility for workgroup computing coordination within CDC is assigned to the ISD, which maintain three primary functions to support workgroup computing:

- Workgroup computing information dissemination and acquisition support.
- Provide general technical and networking expertise and assistance.

- Maintain the departmental network, including the infrastructure, hardware and communication devices, Internet access services, Intranet connectivity, and electronic mail.

The Workgroup Computing Coordinator will perform the dissemination of information, oversight of acquisition activities, and maintenance of standards lists. Responsibility for technical assistance and review of workgroup computing configurations will be assigned to the Data Center, including approval of new network installations and remote access authorization, maintenance of the departmental network, Internet Web site, and Intranet and electronic mail capabilities. Technical assistance for individual workgroup computing requests can also be provided based on the specific requirements of the request.

Responsibilities of ISD's workgroup computing coordination function are:

- Assist departmental management and individual departmental employees in the identification of opportunities for employing workgroup computing to improve personal and workgroup productivity.
- Provide overall interconnection of CDC using networks, remote access, and the Internet and Intranet by maintaining standards and offering set services as part of the departmental network.
- Assist in the justification of workgroup computing configurations, the specification of microcomputer and network commodities for workgroup computing, and the preparation of required documents.
- Coordinate the creation and maintenance of lists of CDC approved standard workgroup computing technologies.
- Review and approve individual workgroup computing technology acquisition requests.
- Assist in determining whether a workgroup computing configuration could support a proposed application in addition to its workgroup computing work.
- Maintain continuing liaison with departmental management to ensure that proposed workgroup computing implementations are:
 - Consistent with CDC's established strategy for information management, as described in CDC's SISP.
 - Preventing duplication of existing capabilities.
 - Not precluding the implementation of other departmental applications on the same configuration.
- Maintain the departmental network, Intranet and Internet Web sites, and access.
- Provide for backup procedures and disaster recovery processes that should be part of workgroup computing requests.

48010.4.6 Parole Automation Systems Unit, Institution, and Unit Computing Coordination

Responsibility for workgroup computing coordination within an institution or other departmental unit is assigned to the Computing Coordinator, usually an AISA. These coordinators perform key functions to support workgroup computing within their specific unit or institution. The Parole Automation Systems Unit performs these functions for P&CSD staff. The Computing Coordinators and Parole Automation Systems Unit assist with information dissemination and acquisition support and interface with ISD on workgroup computing requests. They also provide technical assistance and review workgroup computing configurations within their respective organizations. Additional technical assistance from ISD can also be provided based on the specific requirements of a workgroup computing request.

General responsibilities of the Computing Coordinators are:

- Assist institutions, unit management, and individual departmental employees in the identification of opportunities for employing workgroup computing to improve personal and workgroup productivity.
- Assist in the justification of workgroup computing configurations, the specification of microcomputer commodities for workgroup computing, and the preparation of required documents.
- Coordinate, review, and approve individual workgroup computing technology acquisitions.
- Assist in determining whether a workgroup computing configuration could support a proposed application in addition to its workgroup computing work.

- Maintain continuing liaison with CDC's ISD staff to ensure that proposed workgroup computing implementations are:
 - Consistent with CDC's established strategy for information management.
 - Preventing duplication of existing capabilities.
 - Not precluding the implementation of other departmental applications on the same configuration.

48010.4.7 Unit Supervisors

Unit supervisors are responsible for the work performed within their organization. This responsibility includes the access, use, and security of workgroup computing technologies and associated information. Workgroup computing technologies are considered a departmental resource and are assigned to staff based on justified need.

Responsibilities of the unit supervisor:

- Actively initiate and deploy workgroup computing technologies to improve the productivity and efficiency of their unit.
- Develop, review, and approve justifications for procurement of workgroup computing resources.
- Review and approve justifications for access to the Internet for purposes of information collection and communication external to CDC.
- Review and approve justifications to establish a Web site on either the Internet or Intranet for the distribution of departmental information, both internal and external to CDC.
- Supervise and approve the creation and updating of the content and format of Intranet or Internet Web pages.
- Ensure that all employees are trained in and aware of their responsibilities when using workgroup computing technologies, and that each employee has in their official personnel file a signed CDC Form 1857, Computing Technology Use Agreement.
- Ensure that employees use workgroup computing resources solely for assigned departmental activities appropriate to that workgroup.
- Initiate disciplinary action for employees who are inappropriately using workgroup computing technologies, up to and including termination of employment.

48010.4.8 Procurement

During the acquisition of workgroup computing technologies, a procurement process will follow and/or parallel the workgroup computing authorization process.

Responsibilities of Procurement:

- The necessary procurement documents are completed and the acquisition is completed in conformance with the PCC and departmental policies and procedures.
- Information technologies procurements have been authorized. For workgroup computing technologies, this means ensuring that the Workgroup Computing Coordinator has an approved CDC Form 1855 on file, and that the procurement documents have appropriately referenced this Form.

48010.4.9 Users

In an environment that encourages workgroups to make use of computing technologies to increase work efficiency and performance, the users become responsible for more than just a computer on their desk. They are members of a wider community of interdependent users and need to be respectful of other departmental users and safeguard the information that might be shared on these systems.

Responsibilities of Users:

- Understand and follow the acceptable usage guidelines for workgroup computing resources listed in DOM 48010.5.
- Seek guidance in areas for which policy and procedural clarification is needed.
- Participate in necessary training to further ensure the productive use of workgroup computing tools.

48010.5 Acceptable Uses and Ethics

The effectiveness of the departmental computing environment and shared information resources depends on the responsible behavior of all authorized users, managers, and administrators of these resources. Along these lines, guidelines are used to determine acceptable uses.

The CDC reserves the right to monitor and/or log all network activity, including electronic mail, with or without transaction-by-transaction notification, and therefore, users should have no expectation of privacy in the use of these resources.

Uses that are acceptable and encouraged for workgroup computing include and are limited to the:

- Performance of assigned departmental activities.
- Preparation, communication, and exchange of information directly related to the mission and work tasks of CDC or its workgroups.
- Announcement of laws, procedures, hearings, policies, and services or activities related to CDC.
- Professional society activities authorized by CDC.
- Administration of contracts or federal grants for departmental programs.
- Communication and exchange of information for professional development and to debate issues related to assigned governmental activities.
- Research and development of documents, reports, and analyses of information related to the departmental workgroup activities.

Workgroup computing technologies, including access to the Internet, should not be used to publish, display, or transmit any information that will:

- Violate or infringe on the rights of any other persons, including the right of privacy.
- Contain defamatory, false, inaccurate, abusive, obscene, pornographic, profane, sexually-oriented, threatening, racially offensive or other biased, discriminatory material.
- Violate departmental policies and regulations prohibiting sexual harassment.
- Restrict or inhibit other users from using the system or the efficiency of the computing systems.
- Encourage the use of controlled substances or use of the system for the purpose of criminal intent.
- Violate State or Federal laws.

The CDC's policy is that users will not use the facilities and capabilities of workgroup computing to:

- Conduct activities not related to the mission or work tasks of the workgroup or CDC.
- Solicit the performance of any activity that is prohibited by law.
- Transmit material, information, or software in violation of departmental communication policies, or local, State, or federal law.
- Conduct any electioneering or political activities.
- Perform non-government related fund raising or public relations activities.
- Engage in any activity for personal gain or for personal business transactions.
- Make unauthorized purchases.

48010.6 Approved Technologies

It is the policy of CDC that standard configurations for workgroup technologies will be implemented to ensure a consistent approach for implementation, training, and support of these technologies. The Workgroup Computing Coordinator within CDC develops and maintains lists of departmental-approved, standard workgroup computing technologies. These standards are for microcomputer hardware and software systems, off-the-shelf special purpose applications, communication interconnectivity, including remote access to department systems and networks, and use of the Intranet and Internet.

These standards are developed to ensure consistency within the overall Department. Items on the technology standards lists have been selected because they are of proven capability and reliability, are appropriately priced, and are compatible with configurations already in use in CDC or in other State agencies. Minimum standards and lists will be updated in response to changing technology and State experience. Consideration is given to new categories of hardware and software based on the probability that a solution will be employed in more than one workgroup, and to maintain uniformity in the deployment of technology.

As part of CDC's network maintained by ISD, standard functionality is provided to departmental employees. Some of these features include virus check, Intranet access, print services, and electronic mail. Items

that are provided as part of CDC's network **do not** require a workgroup computing request unless a new microcomputer is part of the request. Requests for new networks will be considered part of the overall departmental network and must meet the departmental network standards, including offering standard functionality.

In addition to the standard lists maintained by the Workgroup Computing Coordinator, ISD maintains the standards for network infrastructures, including Local Area Network's, Wide Area Network's, and Internet/Intranet connections. To ensure network interoperability and consistency within CDC, ISD's networking group will review and approve requests that involve new network installations, Internet access requests, Intranet Web pages, and exceptions to departmental standards.

Units proposing to acquire workgroup computing commodities are expected to select from these lists whenever possible. Proposals to acquire items not included in the lists will fall into one of two classifications:

- Requested technology falls into one of the standard categories defined by the ISD, and the Unit is requesting an "exception" to the standards in that category.
- Requested technology does not fall into one of the standard categories defined by the ISD and must be reviewed to ensure that the solution meets all of the requirements for being a workgroup computing technology. For example, a system to manage the planning of the dietary program in an institution could fall under the workgroup computing policy.

The first type of request will require, at a minimum, the approval of the Chief of Information Systems and must be based on a sound, justifiable business need. Rejected requests may be appealed through CDC's chain of command.

The second type of request must be approved by the departmental division office responsible for the specific workgroup computing request. The request must also be reviewed by the Workgroup Computing Coordinator on a case-by-case basis to determine if the solution falls within the parameters of a workgroup computing solution. Solutions that are in question may require an individual review by the control agency, as stated in SAM 4989.1. Requests that are deemed to meet the workgroup computing requirements will then be reviewed to determine if the proposed solution should be added to a departmental standards list.

48010.7 Development of Software

It is the policy of CDC to use commercial software packages for workgroup computing whenever possible, rather than undertake independent software development. Fully tested and documented commercial packages are readily available for most functions and are usually much less costly than custom-developed programs.

Computer programming **does not** fall within this workgroup computing policy and shall be justified in accordance with the requirements of SAM 4819.3 through 4819.39 and DOM 43020.

48010.8 Acquisition Authorization Process

For the purposes of this policy *acquire* refers to either the procurement of and/or receiving approval to utilize workgroup computing technologies. As such, there are two processes necessary for CDC to acquire workgroup computing technologies. The first is the authorization and approval process and the second is the procurement process. The procurement process for workgroup computing technologies falls under CDC's procurement policies and procedures which are defined in DOM Chapter 20000, Financial Operations, Subchapter 22000, Budget Administration, and Chapter 40000, MIS, and Subchapter 45000, General Procurement and Contracting.

Each procurement of a workgroup computing technology, is subject to management review and approval before an actual order can be placed or the unit takes possession of the equipment or software. Approval is required to gain Internet access or to establish an Internet or Intranet Web page.

The approval process consists of:

- Determining the hardware, software, and network requirements.
- Completing the CDC Form 1855, CDC Form 1855 B, CDC Form 1856, and/or CDC Form 1857.
- Routing the CDC Form 1855 and documents for approvals and signatures.
- Getting necessary reviews and approvals for acquisitions that will involve: new network installations, new systems that will distribute or access departmental information, and exceptions to workgroup computing standards.
- Getting necessary review and approvals to establish Internet or Intranet Web page or to gain Internet browsing access.

48010.8.1 Justification

Unit management is responsible for performing the needs assessment and for preparing the justification associated with the proposed approval or acquisition of

workgroup computing commodities. This process shall be documented using the CDC Form 1855, CDC Form 1855 B, and/or the CDC Form 1856. The CDC Form 1855 is used to justify the acquisition of workgroup computing technologies. The form is also used to request and gain approval for Internet browsing access. The CDC Form 1856 is used to justify establishment of Web or Home pages. These activities shall also be in conformance with the applicable sections of SAM.

The amount of information and degree of detail provided shall be commensurate with the nature, complexity, risk, and expected cost of the proposed workgroup computing effort. When such applications include the use of networks or Internet access using “servers” or other shared devices, unit management must include consideration and justification for the necessary technical support for activities such as installation, configuration, problem-determination, maintenance, backup, recovery, and all other activities that would be in addition to those normally associated with stand-alone personal computers.

48010.8.2 Forms

The basis for the workgroup computing justification is the CDC Form 1855, which is maintained by the Workgroup Computing Coordinator and is modeled after the form shown in SAM 4991. This form is updated on a periodic basis and is modified to support specific processes that are unique within CDC. The form provides for the acquisition of portable and desktop hardware and software and Internet access. It also provides for necessary approval signatures and certifications. This form will be available through Electronic Distribution on the CDC Intranet.

The CDC Form 1856 is used to request establishment and maintenance of an Internet Web page for distribution of information outside CDC, or an Intranet Home page for distribution of information internal to CDC. Form maintenance is coordinated by the Workgroup Computing Coordinator with input from the Assistant Director of Communications and the Data Center. This form is updated on a periodic basis and is modified to support specific processes that are unique within CDC. The form requesting approval to create a home page needs to be accompanied by a CDC Form 1855 when a Web site will be established requiring the acquisition of hardware, software, and/or communication devices. This form will be available through Electronic Distribution on the CDC Intranet.

The CDC Form 1857 must be on file for each employee using workgroup computing technologies, accessing departmental networks, and/or accessing the Internet. This form notifies the users of their responsibilities as they pertain to using these technologies; it also notifies them that the information maintained and distributed by the user is not considered “private.” It is the policy of CDC that each new employee completes the CDC Form 1857 as part of their employee orientation process. The CDC Form 1857 should be maintained in the employee’s official personnel file. If a CDC Form 1857 is not currently on file when workgroup computing technologies are being requested for an employee, then the Unit Supervisor should have the employee sign the Form and have it filed in the official personnel file. This form does not get routed to the Workgroup Computing Coordinator.

48010.8.3 Unit Approvals

Each request for acquisition of workgroup computing technology is subject to management review and approval before the order can be placed or the unit takes possession of the equipment or software. Once the request has been completed there are three basic levels of review: unit management, institutional or divisional review, and ISD review. The Deputy Director may delegate approval of workgroup computing requests within each division. However, at a minimum, at least one level of management above the unit management must review, and approve each workgroup computing request prior to submitting the request to ISD. If the first level manager is an Assistant Director or Assistant Deputy Director, then this level of approval is sufficient for the workgroup computing justification process.

For workgroups within institutions other than Health Care Services, the following minimum approvals are needed for the CDC Form 1855:

- Unit Supervisor.
- Institution Computing Coordinator.
- Warden, or his/her designee.

For workgroups within P&CSD, the following minimum approvals are needed for the CDC Form 1855:

- RPA.

- P&CSD Computing Coordinator.
- Deputy Director or his/her designee.

For workgroups within Health Care Service Division units that are co-located within an institution, the following minimum approvals are needed for the CDC Form 1855:

- Unit Supervisor (local and/or headquarters).
- CMO.
- Institution Computing Coordinator.

For workgroups within headquarters organizational units, the following minimum approvals are needed for the CDC Form 1855:

- Unit Supervisor.
- Deputy Director or his/her designee.

Acquisition of additional workgroup computing capabilities for previously acquired configurations are subject to similar reviews and approvals. Requests for Internet access will be processed in the same manner as acquiring other workgroup computing technologies, with the same approvals. Internet and Intranet Web page requests will also follow the approval process as shown above.

Additional approvals are needed for exceptions to standards, new network installations, Internet access, remote access to the departmental systems and network and/or modem usage. These additional levels of approval have been defined in the appropriate sections of this policy.

48010.8.4 Routing and Final Approvals

Once the workgroup computing analysis and the justification documents are completed with departmental certifications and signatures as per DOM 48010.8.2, the forms should be routed as follows:

- CDC Form 1855: The completed form should be forwarded to the Workgroup Computing Coordinator for final approval and processing. The purpose of the review and approval is to ensure that the proposed request conforms to policy and is consistent with departmental standards. The coordinator will route the request for other necessary technical and security reviews and certifications. If the request for workgroup computing commodities include remote access requirements, network products, or Internet access, the procurement documents shall be further reviewed by the Data Center to determine:
 - Technical specifications are consistent with both the proposed use and CDC’s strategic direction and established standards.
 - Adequate level of technical network support is addressed in the CDC Form 1855.
- CDC Form 1856: Standard Internet/Intranet Web page requests should be routed to the Data Center for approval. The Data Center will then forward these to the Workgroup Computing Coordinator for retention. If an Internet Web page is not in conformance with departmental Web page standards and/or if this is the initial request for public distribution of departmental information as per applicable departmental communication policies, the request should be routed to the Assistant Director of Communications for approval.

If the request for workgroup computing technologies involves the installation of a new network or external department network connections within a facility that is not in conformance with departmental standards, the unit management may be required to complete an additional risk analysis to be reviewed by CDC’s Information Security Officer before the request is routed to procurement.

Copies of the documentation regarding the justification of workgroup computing technologies shall be maintained in CDC’s files within ISD. The Workgroup Computing Coordinator will approve the acquisition documents related to workgroup computing requests.

48010.8.5 Post-Implementation Evaluation

Unit management shall complete the CDC Form 1855 A, Workgroup Computing Justification, Post-Implementation Evaluation, no later than six (6) months after installation of the workgroup computing configuration or product.

The purpose of the Post-Implementation Evaluation is to determine:

- The unit has realized the benefits projected at the time acquisition of the configuration was justified.
- Unanticipated problems have been associated with the use of the configuration and how those problems have been resolved.
- The configuration is being used in compliance with CDC and State policies.

A copy of each evaluation shall be submitted for review to the Workgroup Computing Coordinator who shall maintain it on file.

48010.9 Security

The use of workgroup computing within CDC shall be in accordance with all applicable provisions of the SAM 4840 through 4845, dealing with information security and risk management, and with the specific provisions of SAM 4989.7, dealing with security. Users of these configurations shall be knowledgeable about the SAM provisions as well as CDC's security and risk management policies associated with workgroup computing configurations as defined in DOM 49010 through 49030. The CDC staff must also be aware that computer viruses pose a potentially serious threat to departmental computer and information assets. Virus protection must be implemented on every departmental workstation.

The CDC will ensure that security precautions are in place for access to the Internet/Intranet and external electronic mail systems. Such safeguards include firewalls, anti-virus systems, password security, information encryption and other security measures to:

- Eliminate unauthorized access to departmental systems and information.
- Ensure that confidential or sensitive information is not improperly disclosed or distributed.

The ISD, Network Services Unit, is responsible for defining and/or maintaining the infrastructure for these security systems. The user is responsible for following the established processes that are defined. The Information Security Officer is responsible for reviewing the processes to ensure that they meet the departmental security policies and requirements.

48010.9.1 Confidential and Sensitive Information

The vast majority of information maintained by CDC is confidential and/or sensitive in nature. Its untimely or unauthorized release external to the organization may have significant, adverse impact on CDC.

The policies controlling the communication of departmental information external to the State organization is governed by DOM Chapter 10000, Subchapters 12000, 13000, and 14000. Information provided to the public by the Internet or other electronic transmittal methods external to CDC shall comply with all related DOM policies, laws, and State regulations regarding confidential or sensitive information.

Electronic mail that travels through the Internet could be intercepted. To eliminate this possibility, no confidential and/or sensitive information may be transmitted by electronic mail or other means over the Internet unless it is encrypted.

All questions regarding the distribution or access to confidential and sensitive information should be directed to the CDC's Assistant Director of Communications.

All proposals for using workgroup computing systems to maintain or access files containing confidential or sensitive information, as defined in SAM 4841.3, shall meet the standards set by CDC's Information Security Officer, or will be individually approved by the Information Security Officer, before implementation (SAM 4841.1). Conformance to information security standards or the individual request review shall ensure that the request complies with all applicable provisions of the SAM 4840 through 4845 dealing with information security and risk management.

48010.9.2 Integrity of Information

Information maintained on workgroup computing configurations shall be subjected to the same degree of management control and verification of accuracy that is provided for information maintained in other automated and manual files within CDC, as defined in the appropriate sections of the DOM.

If a data file is downloaded to a workgroup computing configuration from another computer system, the requirements for information integrity and security that have been established for the data file shall be adhered to while it is stored at the workgroup level.

48010.9.3 System Backup

Provisions shall be made to safeguard against the loss of information and programs stored on workgroup computing configuration as a result of product failures or power failures. Copies of all data files and software shall be stored in a safe location. A regular schedule for making backup copies of all data files shall be established. Unit Supervisors shall ensure that backup procedures are carried out. Training in backup options and procedures shall be ensured by Unit

Supervisors. The ISD and the Information Security Officer are responsible for setting guidelines and standards for backup procedures.

48010.10 Legal

Existing laws and legal renderings related to privacy, confidentiality, and use of computers concerning information technology, especially in the areas of electronic access, e-mail privacy, and copyright protection must be complied with. Two primary laws are the Electronics Communication Privacy Act and the Comprehensive Computer Fraud and Abuse Act. It is CDC's workgroup computing policy to comply with these laws.

48010.10.1 Copyright Material and Licenses

Software license agreements shall be strictly adhered to. Proprietary software cannot be duplicated, modified, or used on more than one machine, except as expressly provided for in the manufacturer's license agreement program updates may be downloaded from the Internet in accordance with the owner's license agreement.

Public domain software, while available under the copyright laws to all individuals should not be downloaded to a departmental workgroup computing device unless it is part of the departmental standard as documented by the Workgroup Computing Coordinator and/or approved by the unit manager.

48010.10.2 Ownership of Resources

The CDC has determined that all workgroup computing technologies are the property of CDC, and that the use of these technologies, including the content of data files and electronic mail messages, is not considered private to the user.

It is CDC's requirement, based on the confidentiality and sensitivity of its business, to control access to and monitor that use of State-provided workgroup computing resources, including e-mail systems. The CDC will inform workgroup computing users regarding computer privacy in the following manner:

- As part of the workgroup computing request process by the CDC Form 1857.
- As part of the new employee orientation process.

This notification will be given in writing and the user must sign the notification form as part of the new employee orientation process or as part of the workgroup computing request process. It is CDC's policy that this form be made part of the employee's official personnel file.

48010.10.3 Regulation and Enforcement

The director and his designated representatives are responsible for ensuring compliance with provisions of this policy and for investigating suspected noncompliance. Service to a user may be suspended when deemed necessary for the operation and/or integrity of the departmental infrastructure or connected networks. User privileges, user accounts, and/or password access may be withdrawn without notice.

When an instance of noncompliance is suspected or discovered, CDC shall proceed in accordance with CCR (15) (3) 3413, Incompatible Activities, and CCR (2) (1) General Civil Service Rules. Internal discipline, up to and including discharge, may be appropriate in some cases of noncompliance with this policy. Criminal or civil action may be initiated in appropriate instances.

48010.11 Documentation

Complete documentation shall be maintained for all of the microcomputer commodities used for workgroup computing.

Documentation shall include:

- Equipment and Software. Manuals relating to the installation, maintenance, care, and use of equipment and proprietary software shall be maintained with the equipment or in a central library, as appropriate.
- Procedural Documentation. Each workgroup application that makes use of a proprietary software package (including database systems, spreadsheet software, or any software that maintains data files) shall have documentation sufficient to allow productive use of the application. In addition to standard user manuals, some documentation that may be needed could include:
 - Instructions containing the scope and purpose of the application.
 - Specific data entry and processing instructions for the application.
 - File descriptions including data dictionaries.
 - Lists of all utility programs and subroutines used by the application.
 - Sample report/screen formats for the application.

48010.12 Training

Workgroup management is responsible for ensuring that staff members possess the knowledge and skills necessary for effective use of workgroup computing facilities, and that there is sufficient depth of training to prevent disruption of key activities in the event of unexpected staff changes. At least two staff members should be trained in using each workgroup computing application and the equipment that it uses.

The Workgroup Computing Coordinator shall assist in the identification and scheduling of suitable training and in coordinating the development of training materials to be included as part of new employee orientations.

Users granted access to the Internet shall be required to abide by the acceptable use standards and shall have sufficient training in accordance with this and other policies related to electronic communications.

48010.13 Maintenance and Repair

The CDC shall make provisions for necessary routine maintenance, as well as for the repair of malfunctioning equipment. It is the responsibility of workgroup management to budget necessary funds for maintenance and to ensure that maintenance schedules are met.

48010.14 Inventory of Assets

The CDC shall maintain an inventory of its significant microcomputer commodities used for workgroup computing configurations. The inventory shall provide a description of each item (including serial and model numbers of equipment and version numbers of software), its date of acquisition, and the unit to which it is currently assigned. This inventory may be part of CDC's existing inventory system. The CDC shall also maintain inventories of licensed software and significant applications installed on workgroup computing configurations. These inventories will be available for audit purposes.

48010.15 Revisions

The Chief, ISD, or designee, shall be responsible for ensuring that the contents of this section are kept current and accurate.

ARTICLE 42 — DEPARTMENTAL MODEM POLICY*

Effective December 22, 1992

Not Cleared For Statewide Use

48020.1 Policy

The Department recognizes the potential for increasing the speed and flexibility in which files can be transferred electronically through the use of modems; however, this potential benefit shall be weighed against the inherent hazards of misuse in CDC facilities.

48020.2 Purpose

The general purpose of this policy is to establish standards for the use and management of modems within the Department's operations. This policy is to be used for the purchase of all modems, including those within and outside facilities.

Scope of the Modem Policy

SAM 4989.1 states that modem usage consistent with the Department's security and risk management policy are covered by the Department's personal computer policy, and therefore follow the normal supplemental equipment justification process. However, due to the potential for misuse, special security precautions need to be addressed when using modems within a facility, parole office, or wherever inmates or parolees may have access to a PC. Consequently, a special modem supplemental equipment request form shall be used when requesting the acquisition of a modem. This form requires additional information for those modems that are to be used within any situation where inmates or parolees may have access to a personal computer.

48020.3 Benefits of Modems

Department managers are encouraged to investigate the benefits of using modems with a personal computer. However, any potential benefit shall be weighed against the inherent security risks involved with modems.

48020.4 Responsibility for Modems When Used With Personal Computers in Department

Management Responsibility

Management responsibility for the use and security of each modem resides with the Warden of each individual facility or the Administrator of each parole office. Responsibility resides also with managers who are responsible for personnel who regularly use a computer with an attached modem. It is further suggested that each facility's AISA be involved in the acquisition and use of modems within the facility.

All modems are considered departmental resources. They may be assigned for the exclusive use of an individual or unit within the Department, but such assignment may be changed at any time. In order to maintain an accurate and current inventory of departmental modems, every change in physical location (even within a branch or facility) shall be reported to the MIS-SU, located in the OISB, so that the modem inventory list may be updated.

If a modem is transferred to a different location, the party from whom the modem is transferring must notify in writing, the appropriate property custodian. In headquarters, notify the property controller in the BSS. In the facilities, notify the property controller or Business Office. In the P&CSD, notify Parole Automation.

User Responsibility

Users of modems shall comply with State and CDC policies governing the use of modems with a personal computer.

The use of all CDC modems is restricted to official business of the Department. Unit supervisors or their designee have authority for modems under their control, and shall limit access to such modems to ensure their security at all times. It is recommended that a log be kept for each modem itemizing usage by date, transmitting user, start time, time signed off, software used, data transmitted, and line speed.

48020.5 Modem Acquisition Within CDC

Revised May 5, 1993

The acquisition of modems for use within the CDC shall be in compliance with the Department's personal computer and modem policies and the applicable sections of the PCC and SAM.

In addition, the following restrictions apply to modem use within facilities, parole offices, or any area that may be accessed by an inmate or parolee:

- There shall be no inmate or parolee access to a personal computer which have been approved for use of a modem.
- There shall be no inmate-developed programs on personal computers with modems.
- There shall be no inmate or parolee access to Local Area Networks containing modems.
- Modems shall not be purchased as part of a personal computer acquisition without complying with the Department's modem policy.
- Internal and pocket modems shall not be purchased or used within the facilities. In addition, internal and pocket modems shall not be purchased or used in regional parole offices or units unless the personal computer utilized is located and operated in a secure area which cannot be accessed by parolees. (internal modems may be installed in laptop personal computer assigned to headquarters and parole personnel as long as the equipment: (1) remains under the physical protection of designated personnel, (2) is locked in a secure area/vehicle when not in use, and (3) cannot be accessed by unauthorized users.
- Pocket modems used currently in the facilities shall be recalled and external modems substituted in their place.

48020.6 Modem Security Policy Within CDC

Each facility and parole office is to develop a policy to ensure the security of modems used within that facility or parole office. The policy shall include procedures to ensure that:

- All modems are safeguarded when in use and protected from unauthorized access when not in use. External modem procedures shall include a plan to physically lock external modems when not in use.
- The physical location of each modem is tracked at all times.
- An on-site evaluation of modem use is performed no later than 90 days after installation of each modem installed in a facility. This on-site evaluation shall be conducted by Institutions Division or P&CSD staff, respectively.

It is recommended that modems in facilities be used on dedicated data lines or a basic business line with call detail installed exclusively for modem communications. It is also suggested that an analysis be conducted to assess which type of communications service is more cost-effective to the user. By assessing the length of time involved in the actual transmission of data and the

distance and speed (baud rate) of the transmission, it can be determined which service is most appropriate to use.

48020.7 User Training on Effective Modem Use

Unit management is responsible for ensuring that staff members using modems possess the knowledge and skills necessary for effective modem usage. Such staff shall be trained sufficiently (e.g., outside vendors, State EDP training) so as to maximize the effective use and protection of CDC modems.

48020.8 Revisions

Revised May 5, 1993

The Deputy Director, ASD, or designee shall be responsible for ensuring that the contents of this section are kept current and accurate.

48020.9 References

SAM § 4989.

ARTICLE 43—HANDHELD COMPUTING DEVICES

Effective May 26, 2006

48050.1 Policy

It is the policy of the California Department of Corrections and Rehabilitation (CDCR) to utilize handheld computing devices, such as BlackBerries and Treos, in a manner that is safe, efficient, and cost-effective. BlackBerries and Treos are handheld devices that operate as a cellular telephone, Personal Digital Assistant (PDA), and allow Internet/e-mail capability.

48050.2 Purpose

The purpose of this Policy is to ensure that use of handheld computing devices complies with approved information security practices, does not endanger the users or the safety of the facilities within the Department, and that the devices are procured in the most cost effective manner in keeping with the Department's Desktop and Mobile Computing Policy.

48050.3 Definitions

Computer Security

The technological safeguards and managerial procedures that can be applied to computer hardware, programs, data, and facilities to ensure the availability, integrity, and confidentiality of computer-based resources.

E-mail

Written communication transmitted electronically using computers or handheld computing devices connected to the network(s) or via wireless transmission, such as BlackBerries.

Handheld Computer

Synonym for PDA.

Information Assets

Any documents, electronic files, or records that contain or are used to process, manage, or store information necessary to the operation of the CDCR.

Information Security

The protection of automated information against unauthorized access (accidental or intentional), modification, destruction, or disclosure.

Personal Digital Assistant (PDA)

Palm-sized computer that can sync with a workstation and allow the user to refer to information on the workstation without having to print it. Schedules, e-mails, documents, and spreadsheets, as well as dictionaries and phone lists, can be stored and accessed as needed.

Risk

In the context of information systems, the likelihood or probability that a loss of information assets or breach of security will occur.

Wireless

Communications transmitted without wires, such as radio, microwave, or infrared.

48050.4 Responsibilities

It is the responsibility of the Wardens, Superintendents, Associate Directors, Assistant Secretaries, and Regional Administrators and their designees to approve the purchase for the handheld devices using the process outlined in Department Operations Manual (DOM), Chapter 4, Article 41, Section 48010.1. The CDC Form 1855 will be utilized to document a brief summary of the request, the justification of need, the

amount of support needed to maintain the device, and the necessary approval signatures. Approval documentation shall be forwarded to the Desktop and Mobile Equipment Coordinator, Enterprise Information Services (EIS), for final processing.

Each Division Director is responsible for reviewing the monthly usage statements to ensure employees are not exceeding the allocated minutes under the terms of the contract in accordance with DOM Chapter 1, Article 12, and the relevant sections of the Youth Authority Manual (YAM).

It is the responsibility of the Chief Information Officer, Office of Information Technology, to maintain a user's guide that would outline the purpose, features, and associated costs for handheld devices. This document, named "A Practical Guide to Handheld Computing Devices," will be available via the Department's intranet site. The user guide will be updated at a minimum of every six months or as needed.

It is the responsibility of the Information Security Officer (ISO) to oversee Department policy and procedures to protect its information assets, including confidential and sensitive information, e-mails, and documents found on handheld computing devices. The ISO will develop a risk assessment and mitigation program.

Additionally, there is a responsibility by all persons using handheld devices to do so in a manner consistent with the information security practices outlined in DOM Chapter 4, Article 45, and the relevant sections of the YAM.

48050.5 Authorized Use

Handheld computing devices, such as BlackBerries and Treos, will be issued using the same guidelines outlined in the DOM for cellular telephones, as set forth in DOM Chapter 1, Article 12, Section 12070.18. Such devices will also be issued and managed in accordance with any applicable sections of the YAM.

The following staff is authorized to use Handheld Computing Devices:

- Any personnel required to be available to the Governor's office on an as-needed and immediate basis, via email, including but not limited to:
 - Secretary
 - Undersecretary
 - Chief Deputy Secretaries
 - General Counsel
 - Legislative Liaison
 - Office of Public and Employee Communication
- Any person designated by the CDCR Secretary or Undersecretary as being required to be available on an as needed and immediate basis, via email, including but not limited to:
 - Division Directors and Executive Staff
 - Assistant Secretaries
 - Wardens
 - Chief Deputy Wardens
 - Chief Deputy General Counsel
 - Health Care Managers
 - Director, Juvenile Facilities
 - Assistant Director, Juvenile Facilities
 - Assistant General Counsels
 - Superintendents
 - Regional Parole Administrators
 - Deputy Regional Administrators
- Any personnel required to be remote to their home office on a regular or extended period (typically greater than 50% of each day) and requiring e-mail to do their job, including but not limited to:
 - Information Technology support staff
 - Auditors
 - Staff Counsels

YAM.

ARTICLE 44 — GENERAL INFORMATION*Effective November 30, 1992***49010.1 Policy**

It is the policy of the Department to protect against the unauthorized modification, deletion, or disclosure of information included in the Department's automated files and data bases. Such disclosure might compromise the integrity of Department programs or violate individual rights to privacy, and may constitute a criminal act. The Department regards its information assets, including data processing capabilities and automated files, to be essential public resources. Many aspects of the Department's operations would effectively cease in the absence of critical computer systems, including automated systems necessary for the protection and safety of persons in the custody of the Department. Accordingly, the Department shall assume full responsibility for the proper classification, use, and protection of its automated information. Further, each element of the Department that employs information technology shall establish risk management and disaster recovery planning processes for identifying, assessing, and responding to the risks associated with its information assets.

49010.2 Purpose

The purpose of this policy is to establish and maintain a standard of due care to prevent misuse or loss of Department information assets. This policy establishes internal policies and procedures that:

- Establish and maintain management and staff accountability for the protection of departmental information assets.
- Establish and maintain processes for the analysis of risks associated with departmental information assets.
- Establish and maintain cost-effective risk management processes intended to preserve the Department's ability to meet program objectives in the event of the unavailability, loss, or misuse of information assets.
- Protect departmental employees who are authorized to access the Department's information assets from temptation, coercion, and threat.

49010.3 Information Assets Applicability Within the Department

Information assets covered by this section include: (1) all categories of automated information including, but not limited to, records, files and data bases; and (2) information technology facilities, software, and equipment (including personal computer systems) owned or leased by CDC.

49010.4 Statutory References Concerning the Confidentiality and Security of Information Within CDC

GC 1171 requires the director of each department that uses, receives or provides data processing services to designate an Information Security Officer (ISO) who shall be responsible for implementing State policies and standards regarding the confidentiality and security of information within the Department. These policies and standards shall include, but are not limited to, strict controls to prevent unauthorized access of: data maintained in computer files, program documentation, data processing systems, data files, and data processing equipment located physically in the Department.

The primary provisions affecting the classification and dissemination of information under the control of California State agencies is found in the State Constitution, in statutes, and in administrative policies:

- Article 1, Section 1, of the Constitution of the State of California defines pursuing and obtaining privacy as an inalienable right.
- The IPA of 1977 (CC 1798, et seq.), places specific requirements on State agencies in the collection, use, maintenance, and dissemination of information relating to individuals.
- The PRA (GC 6250-6265), provides for the inspection of public records.
- The State Records Management Act (GC 14740-14770), provides for the application of management methods to create, use, maintain, retain, preserve, and dispose of State records, including the determination of records essential to the continuation of State government in the event of a major disaster. SAM 1601 through 1699 contain administrative policies to implement provisions of this law.

- The California Computer Crime Statute (Calif. Rev. Stat 1987, Sect. 502, Ch. 1499, 1 January 1988) covers five offenses:
 - Manipulating data, a computer system, or computer network to devise or execute a fraud.
 - Knowingly accessing and without permission taking copies or using any data from a computer or taking any supporting documentation, internal or external, to a computer.
 - Theft of computer services.
 - Knowingly accessing and without permission damaging data, computer software, or computer programs, internal or external, to a computer.
 - Disrupting or denying computer services to an authorized user.
- The Federal Copyright Act of 1976, provides for the prosecution of persons guilty of the theft of computer programs.

49010.5 Exemptions From Information Systems Security Policy

Exemptions to this policy may be granted by the Management Information Systems Committee. The decision to grant an exemption shall be based primarily upon a risk analysis submitted to the Committee and the recommendation of the CDC ISO.

49010.6 Information Management Annual Plan Reporting Requirements

The Information Management Annual Plan (IMAP), submitted by the Department to the DOF, Office of Information Technology (OIT), shall contain a certification that the Department is in compliance with State requirements concerning information technology security and risk management. This certification is signed by the CDC Director. In addition, the IMAP shall provide the name, title, business address and telephone number of the agency's ISO.

49100.6.1 Operational Recovery Plan Reporting Requirements

The Department shall file an information copy of its Operation Recovery Plan (ORP) with OIT by January 31 each year. A copy of the ORP shall be provided to the Teale Data Center.

49010.6.2 Incident Reporting Requirements

It is the responsibility of all departmental employees to report all incidents that would place the Department's information assets at risk. It is the policy of the Department that the following incidents shall be reported through the chain of command to the departmental ISO:

- Any incidents involving unauthorized access to automated data, automated files, or data bases.
- Any incident involving the unauthorized modification, destruction or loss of automated data, automated files, or data bases.
- Any incident involving a virus, worm, or other such computer contaminant (see also DOM 41010).
- Any incident involving the unauthorized use of computer equipment, automated data, automated files, or data bases.
- Any incident involving the misuse of the information assets of the Department.

49010.6.3 Incident Report Format

The following information concerning each incident shall be reported to the departmental ISO within five working days of any awareness of the occurrence of the incident:

- Date of the incident.
- Contact person.
- Description of the incident and whether it is a major incident as described in DOM 49040.36.

49010.6.4 Incident Investigation

Department management shall investigate promptly all reported incidents as defined in DOM 49010.6.3.

The CDC ISO shall investigate each such reported incident to determine the facts and to prepare a report. The report shall have a section that contains a report of the incident prepared by the appropriate local management.

49010.6.5 Information Security Incident Report To DOF

A report of major incidents as illustrated in SAM 4845 shall be submitted to OIT within ten working days of the Department's first awareness of an incident involving one or more of the following:

- Unauthorized intentional release, modification, or destruction of confidential or sensitive information, or the theft of such information including information stolen in conjunction with the theft of a computer or data storage device.
- Use of a State information asset in the commission of a crime.

- Intentional damage or destruction of State information assets, or the theft of such assets with an estimated value in excess of \$500.

The report shall be signed by the Department Director and the Department ISO.

ARTICLE 45 — INFORMATION SECURITY

Revised May 20, 2013

49020.1 Policy

It is the policy of the California Department of Corrections and Rehabilitation (CDCR) to protect against the unauthorized modification, deletion, or disclosure of information included in agency files and databases. The Department regards its information assets, including data processing capabilities and automated files, to be essential resources. The Department shall assume full responsibility for ensuring the security and integrity of its information resources.

49020.2 Purpose

The purpose of this Policy is to establish and maintain a standard of due care to prevent misuse or loss of Department information assets. This policy establishes internal policies and procedures that:

- Establish and maintain management and staff accountability for the protection of departmental information assets.
- Establish and maintain processes for the analysis of risks associated with departmental information assets.
- Establish and maintain cost-effective risk management processes intended to preserve the Department's ability to meet program objectives in the event of the unavailability, loss, or misuse of information assets.
- Protect departmental employees who are authorized to access the Department's information assets from temptation, coercion, and threat.
- Establish agreements with state and non-state entities to cover, at a minimum, the following:
 - Appropriate levels of confidentiality for the data based on data classification (see State Administrative Manual [SAM], § 5320.5).
 - Standards for transmission and storage of the data, if applicable (see SAM § 5310).
 - Agreement to comply with all state policy and law regarding use of information resources and data.
 - Signed confidentiality statements.
 - Agreements to apply security patches and upgrades, and keep virus software up-to-date on all systems on which data may be used.
 - Agreements to notify the information owners promptly if a security incident involving the data occurs.
- Establish appropriate policies and procedures to protect and secure IT infrastructure.
- Require that if a data file is downloaded to a mobile device or desktop computer from another computer system, the specifications for information integrity and security which have been established for the original data file must be applied in the new environment (SAM § 5310).

- Require encryption, or equally effective measures, for all personal, sensitive, or confidential information that is stored on portable electronic storage media (including, but not limited to, CDs and thumb drives) and on portable computing devices (including, but not limited to, laptop and notebook computers). This policy does not apply to mainframe and server tapes. (See SAM § 5345.2).

49020.3 Statutory References Concerning the Confidentiality and Security of Information within CDCR

SAM section 5300.3 requires the Secretary/Director of each State agency that uses, receives, or provides services to designate an Agency Information Security Officer (ISO) who shall be responsible for implementing State policies and standards regarding the confidentiality and security of information within the Department. These policies and standards shall include, but are not limited to, strict controls to prevent unauthorized access of data maintained in computer files, program documentation, data processing systems, data files, and data processing equipment located physically in the Department and to establish guidelines for the dissemination of information under the control of California State agencies as found in the State Constitution, in statutes, and in administrative policies:

- Article 1, Section 1, of the Constitution of the State of California defines pursuing and obtaining privacy as an inalienable right.
- The Information Practices Act of 1977 (Civil Code [CC], § 1798, et seq.), places specific requirements on State agencies in the collection, use, maintenance, and dissemination of information relating to individuals.
- The California Public Records Act (Government Code [GC], §§ 6250-6265), provides for the inspection of public records.
- The State Records Management Act (GC, §§ 14740-14770) provides for the application of management methods to create, use, maintain, retain, preserve, and dispose of State records, including the determination of records essential to the continuation of State government in the event of a major disaster. SAM, §§ 1601-1699 contains administrative policies to implement provisions of this law.
- The California Penal Code (PC), § 502 covers the following offenses:
 - Manipulating data, a computer system, or computer network to devise or execute a fraud.
 - Knowingly accessing and, without permission, taking copies or using any data from a computer or taking any supporting documentation, internal or external, to a computer.
 - Theft of computer services.
 - Knowingly accessing and without permission, damaging data, software, or applications/programs, internal or external, to a computer.
 - Disrupting or denying computer services to an authorized user.
- The California PC § 11142 provides that, "Any person authorized by law to receive a record or information obtained from a record who knowingly furnishes the record or information to a person who is not authorized by law to receive the record or information is guilty of a misdemeanor."
- The Federal Copyright Act of 1976 provides for the prosecution of persons guilty of the theft of computer programs.

49020.4 Departmental Approach to Information Security

The departmental approach to information security consists of the following components:

- Assigned management responsibilities for IT risk management. See SAM § 5315.
- Provisions for the integrity and security of automated and paper information, produced or used in the course of CDCR operations. See SAM § 5310 through 5350.
- Provisions for the security of IT facilities, software, and equipment utilized for automation. See SAM § 5330.
- Establishment and maintenance of an IT risk management program, including a risk analysis process. See SAM § 5305.
- Establishment and maintenance of an agency Disaster Recovery Plan. See SAM § 5355.
- A security and ongoing privacy program, including an annual training component for all employees and contractors. Refer to GC 11019.9 and CC 1798.
- Compliance with state audit requirements relating to the integrity of information assets. See SAM § 20000 et seq.
- Policies to ensure that information security and information privacy are incorporated at each phase of the Information Systems Development Life Cycle.
- Risk assessments in accordance with SAM, § 5305.1 to ascertain the threats and vulnerabilities that impact the CDCR's information assets and implement appropriate mitigations.

- Information security training for employees who use information assets in the course of their assigned duties to ensure awareness and understanding of the Department's policies.
- Coordination of information security audits for compliance with security policies.
- Reporting of deficiencies for noncompliance with the CDCR security policies for management's corrective action.
- Reporting violations of this policy to the hiring authority of the employee alleged to have committed the act or the Office of Internal Affairs (OIA), when appropriate.
- Adherence to requirements established in SAM, § 5300.3.
- Periodic review of security policies for changes that may be necessary as a result of technology evolution or changes in Department operations.

This policy includes, but is not limited to, the following information assets:

- All categories of automated information including, but not limited to, records, files, and data bases.
- IT facilities, software, and equipment (including personal computer systems) owned or leased by the CDCR.

49020.5 Roles and Responsibilities

The Department has established the necessary policies, procedures, practices, and controls to protect information assets from accidental or intentional disclosure, destruction, or modification, and to comply with all applicable State and federal privacy acts. Information assets covered by this Article include, but are not limited to:

- All categories of automated information including, but not limited to, records, files, and data bases.
- IT facilities, software, and equipment (including personal computer systems) owned or leased by the CDCR.

The following is a description of the organizational responsibilities for administering this program:

Secretary

The Secretary has the ultimate responsibility for ensuring a risk management program is established that:

- Assigns management responsibilities for IT risk management.
- Provides for the integrity and security of automated and paper information, produced or used in the course of agency operations.
- Complies with state and audit requirements relating to the integrity of information assets.

Director of Enterprise Information Services (EIS)

The Director of EIS has the delegated responsibility for establishing and maintaining an information security program within the Department. It is the responsibility of the Director of EIS to assure that information assets are protected from the effects of damage and destruction, as well as from unauthorized or accidental modification, access, or disclosure. Specifically, the Director of EIS is responsible for ensuring:

- Enforcement of State-level security policies.
- Establishment and maintenance of internal policies that provide for the security of IT facilities, software and equipment, and the integrity and security of the agency's automated information.
- Department compliance with reporting requirements related to security issues.
- Appointment of a qualified AISO.
- The participation of management during the planning, development, modification, and implementation of security policies and procedures.

Agency Information Security Officer (AISO)

SAM, § 5315.1 requires that each agency designate an AISO. Additionally, to avoid conflicts of interest, the following restrictions shall apply to the AISO:

- The AISO shall not have direct responsibility for information processing.
- The AISO shall not have direct responsibility for access management functions.
- The AISO shall not have direct responsibility for any departmental computer-based systems.
- The AISO shall not have any special allegiance or bias toward a particular program or organization.

- The AISO will have direct responsibility for the CDCR Information Security Office.
- The AISO will report allegations of misconduct or criminal activity to OIA and assist with investigations as necessary.

The AISO is responsible for overseeing Agency policies and procedures designed to protect its information assets. In accordance with State policy, the AISO shall be accountable to the Secretary with respect to the following responsibilities:

- Implementation of necessary procedures to ensure the establishment and maintenance of a security program.
- Establishment of security policies and procedures designed to protect information assets.
- Identification of confidential and sensitive information and critical applications.
- Identification of vulnerabilities that may cause inappropriate or accidental access, destruction or disclosure of information, and the establishment of security controls necessary to eliminate or minimize their potential effects.
- Establishment of procedures necessary to monitor and ensure the compliance of established security and risk management policies and procedures.
- Coordination with internal auditors to define their roles in automated information system planning, development, implementation, operations, and modifications relative to security.
- Coordination with the applicable data center's Information Security Officer or staff on matters related to the planning, development, implementation, or modification of information security policies and procedures that affect the Department.
- Acquisition of appropriate security equipment and software.
- Establishment of procedures to comply with control agency reporting requirements.
- Development and maintenance of controls and safeguards to control user access to information.
- Establishment of mechanisms to assure that CDCR staff (with particular emphasis on the owners, users, and custodians of information) are educated and aware of their roles and responsibilities relative to information security.
- Establishment of training programs for CDCR employees related to information security.

EIS Technical Management

Department technical management has the following responsibilities relative to the Department's information security program:

- Ensuring that management, the Information Security Office, assigned owners, custodians, and users are provided the necessary technical support services with which to define and select cost effective security controls, policies, and procedures.
- Ensuring the implementation of security controls and procedures as defined by the owners of information.
- Ensuring the implementation of system controls necessary to identify actual or attempted violations of security policies or procedures.
- Ensuring that the owners of information and the Information Security Office are notified of any actual or attempted violations of security policies and procedures.

Program Management

Department program managers have the following responsibilities in relation to the Department's security program:

- Establishing the procedures necessary to comply with State information security policy in relation to ownership, user, and if appropriate, custodian of information responsibilities.
- Ensuring that State program policies and requirements are identified relative to security requirements.
- Ensuring the proper data classification of automated information for which the program is assigned ownership responsibility.
- Ensuring the participation of the Information Security Office and technical staff in identifying and selecting appropriate and cost-effective security controls and procedures, and to protect information assets.
- Ensuring that appropriate security requirements for user access to automated information are defined for files or data bases for which the program is assigned ownership responsibility.
- Ensuring the proper planning, development, and establishment of security policies and procedures for files or data bases for which the program has ownership responsibility, and for physical devices assigned to and located in the program area(s).
- Ensuring that custodians of program information are provided the appropriate direction to implement the security controls and procedures that have been defined.

- Ensuring that procedures are established to comply with control agency reporting requirements.

Program Personnel and Users

Program personnel have the following security responsibilities:

- Implementing and monitoring data quality assurance functions to ensure the integrity of data for which the program is assigned ownership responsibility.
- Complying with applicable federal, State, and Department security policies and procedures.
- Complying with applicable federal and State statutes.
- Identifying security vulnerabilities and informing program management and the Information Security Office of those vulnerabilities.
- Ensuring that management, the Information Security Office, and assigned owners, custodians, and other users are provided the necessary technical support services with which to define and select cost-effective security controls, policies, and procedures.
- Ensuring the implementation of security controls and procedures as defined by the owners of information.
- Ensuring the implementation of system controls necessary to identify actual or attempted violations of security policies or procedures.
- Ensuring that the owners of information and the Information Security Office are notified of any actual or attempted violations of security policies and procedures.

Data Owners

The owners of information are responsible for classifying the information, defining precautions for its integrity, disposing of the information, defining initial levels of access needed, filing security incident reports, securing signed security agreements, and forwarding them to the Data Custodian, and identifying the level of acceptable risk.

Data Custodians

The custodians of information, including the Office of Technology Services (OTech) Data Center, are responsible for complying with applicable laws, policies and procedures established by the owner and the AISO, advising the owner and the AISO of any threats to the information, and notifying the owners and the AISO of any violations of security policies, practices, and procedures.

In addition, the data custodians for an information system have the following access management responsibilities:

- Access Authorization - The granting of permission to execute a set of operations in the system. Access privileges shall be allocated to users on a need-to-use basis, with the minimum required privileges required for their functional role.
- Access Control - Enabling the performance of tasks by hardware, software, and administrative controls that would have the effect of monitoring a system's operation, ensuring data recovery, performing user identification, and granting access to users.
- Accountability - The work necessary to set up the ability to trace violations or attempted violations of system security to the individual(s) responsible.

Information Security Coordinators

Every organizational entity that uses computer systems, or uses computer applications shall designate an Information Security Coordinator (ISC) for each site maintained by that entity. The designated ISC shall be responsible for ensuring that applicable CDCR policies and procedures are followed, and shall act as the security liaison to the Information Security Office. The CDCR Information Security Office will serve as the ISC for EIS staff.

A procedure shall be developed by each of these organizational entities, subject to approval by the AISO. The procedure shall be constrained as follows:

- The designation of an ISC for the decentralized or control entity shall be in writing and shall identify the name, work address, and telephone number of the ISC.
- The AISO shall maintain a file of all current and past designated ISCs.
- The designated ISC shall be aware that they are the designated ISC and the responsibility that the designation entails.
- The designated ISC shall ensure compliance with information security policies and procedures, and with any security guidelines issued by the owners of decentralized automated systems.

49020.6 CDCR Information Asset Protection

CDCR shall provide for the integrity and security of its information assets by identifying all automated files and databases for which CDCR has ownership responsibility, and ensuring that responsibility for each automated file or database is defined with respect to the following:

- Owners of the information within CDCR.
- Custodians of the information.
- Users of the information.
- Classification of the information to ensure that each automated file or database is identified as to its information class in accordance with law and administrative policy.

49020.6.1 Information Security Ownership/Authority

An owner of any CDCR information shall be the approval authority for all requests for access to such information under his or her control. Approval authority may be delegated to a designated representative. The owner has an obligation to restrict access to the specific information to instances that are necessary and sufficient to meet the demonstrated need or right of the requestor. The owner shall consult with EIS to determine the most appropriate on-line access mechanisms for a specific request, keeping in mind that EIS is obligated to restrict the mechanisms to those that are necessary and sufficient to meet the requestor's need for, or right to, such information.

The owner is ultimately responsible for the integrity of the entrusted information. This responsibility requires that the owner have control over who can access, modify, disclose, or destroy information. The owner shall exercise the responsibility to communicate information security requirements to all appropriate personnel, and to make use of all available security features. Additionally, the owner shall determine that implemented security measures are adequate to meet the requirements of the application, and ensure that an employee's access authority is removed immediately upon separation or change of duties such that access is no longer necessary.

49020.6.2 Classification of Information

CDCR's records, automated files, and databases are essential public resources that must be given appropriate protections from unauthorized use, access, disclosure, modification, loss, or deletion. The discovery and classification of CDCR Information Assets is a continuing endeavor and requires the ongoing support of information owners and other stakeholders.

- The EIS Enterprise Architecture organization is responsible for maintaining and facilitating the processes and procedures for enterprise governance of CDCR Information Assets and engaging Information Owners and Stakeholders for Information Security Classification decision-making and governance.
- Information Owners are responsible for reviewing and classifying information, solely or with others, for information they own or share ownership of, and for participating in the CDCR Information Governance process; the final ruling for Security Classification decisions rests with the Information Owners.
- Stakeholders are responsible for raising Information security concerns with respect to Information Security Classification and ensuring information is treated appropriately based on duly made classification decisions.
- All users of CDCR Information are responsible for protecting CDCR Information under their control or influence from unauthorized use, access, disclosure, modification, loss, or deletion, including notifying appropriate CDCR authorities when vulnerabilities to CDCR Information is noticed or when Security Classifications or protections for CDCR Information appear inadequate.

CDCR will classify each record, file, and database using the following classification structure:

- Public Information – information maintained by CDCR that is not exempt from disclosure under the provisions of the California Public Records Act (GC §§ 6250-6265) or other applicable state or federal laws (SAM § 5320.5).
- Confidential Information – information maintained by CDCR that is exempt from disclosure under the provisions of the California Public Records Act (GC §§ 6250-6265) or other applicable state or federal laws (SAM § 5320.5).
- High Risk Confidential Information (HRCI) - Non-public information that if disclosed could result in a significant harm (including financial, legal, risk to life and safety or reputational damage) to the CDCR or individual(s) if compromised through alteration, corruption, loss, misuse, or unauthorized disclosure. Examples of HRCI include, but are not limited to, information such as the following:
 - Personally identifiable information such as person's name in conjunction with the person's social security, credit or debit card information, individual financial account, driver's license number, state

ID number, or passport number, or a name in conjunction with biometric information;

- Personal health information such as any information about health status, provisions of health care, or payment for health care information as protected under the Health Insurance and Portability Act of 1996;
- Correctional Offender Record Information as defined in California PC §§ 13100-13104;
- All IT infrastructure information that would reveal vulnerabilities to, or otherwise increase the potential for an attack on, an information technology system of a public agency, including but not limited to firewall and router configurations, server names, IP addresses, and other system configurations;
- Any document which contains information identifying any Confidential Informant, or confidential information provided, as defined in CCR Title 15, § 3321;
- Any documentation of information which contains information or data within any Gang Data Base as defined in the Department Operations Manual (DOM) §§ 52070.22 through 52070.24;
- Records of investigations, intelligence information, or security procedures as specified in the PRA Section 6254(f).
- Personnel, medical, or similar files, the disclosure of which would constitute an unwarranted invasion of personal privacy protected under the California Government Code § 6254(c) or the Peace Officers Bill of Rights under Government Code §§ 3300 et seq.
- Sensitive Information – information maintained by CDCR that requires a higher than normal assurance of accuracy and completeness. Thus the key factor for sensitive information is that of integrity. Typically, sensitive information includes records of financial transactions and regulatory actions.

Personal Information requested by researchers not under the authority of CDCR may only be received by University of California or other non-profit educational institutions and in accordance with the provisions set forth in law, including the prior review and approval by the Committee for the Protection of Human Subjects (CPHS) of the California Health and Human Services Agency before such information is released (SAM § 5320.5). See Civil Code § 1798.24(t).

49020.7 Human Resources Security

CDCR requires that personnel practices related to security management must include:

- Employment history and background checks on all employees.
- The signing of the Computing Technology User Agreement Form 1857 for all staff that uses CDCR's Information Technology, thereby agreeing to abide by CDCR's Workgroup Computing policies.
- The signing of the CDCR Security Awareness Self-Certification and Confidentiality Form ISO-3025 on an annual basis, thereby certifying the employee shall comply with CDCR's Information Security Policy.

49020.7.1 Segregation of Duties in the Information Security Program

There shall be a strict separation of duties among, and within, all organizations responsible for using, operating, and developing computer based information systems. Separation of duties shall be maintained to ensure a separation of responsibilities for initiating and authorizing transactions, recording of transactions, and custody of assets. Segregation of duties, similar to that required in manual systems, shall be implemented in computerized systems.

The following guidelines shall be used regarding such separation of duties:

- Convert and Conceal - No one person should be able to convert a resource to their personal use and be able to conceal the action.
- Custody and Control - No one person should have custody of an asset and at the same time be solely responsible for the accounting for that asset.
- Custody and Access - No one person shall have custody of an asset and, at the same time, have unrestricted access to the records pertaining to that asset.
- Origination and Authorization - No one person shall both originate and authorize a transaction.

- Originate and Maintain - No one person shall both enter a transaction and maintain the related master file.
- Access and Restriction - Access to transactions shall be on a need-to-know basis.

EIS is charged with the responsibility for the development and maintenance of computer based systems for the CDCR. In this capacity, EIS provides a service to actual or potential users of computer-based information systems. In addition, there are several computer "user" groups throughout the Department. Each of these organizations is providing a service to all actual or potential users of computer based information systems.

To ensure that assigned responsibilities are met and that separation of duties is maintained, individuals/programs shall not originate or authorize transactions, have custody or control over online data processing assets, or have the authority to originate master file changes. Source documents shall originate and be controlled by functions independent of such persons/programs.

Appropriate procedures shall be developed, subject to approval by the AISO, to ensure that adequate controls exist to ensure the separation of duties and responsibilities.

The procedures may include variances to the Change Management Process in order to resolve failures of critical applications. Such variances shall provide for audit trails and retroactive release or approval documentation, and require the prior approval of the AISO.

49020.7.2 Annual Information Security Self Certification

All CDCR employees requiring access to CDCR information assets are responsible for annually self-certifying that they are in compliance with applicable CDCR information security policies. The ISO is responsible for ensuring compliance with this policy. Responsibility for the dissemination of the policies rests with the owner and the designated ISC; responsibility for compliance rests with the end-users.

The following is required to ensure compliance with the above is maintained:

- A separate statement of self-certification shall be signed by every employee that accesses or uses CDCR's information assets.
- Each self-certification shall be signed by a representative of the senior management from the organizational entity.
- Each self-certification is to be filed with the local ISC and available for review by the Information Security Office.

49020.7.3 Information Security Awareness

It is the responsibility of CDCR management at all levels to ensure that personnel are aware of their responsibilities:

- All employees are accountable for the implementation of information security policies and procedures within their areas of responsibility.
- Accountability requires that employees be aware of the Department's information security policies and procedures.
- All employees that are owners, users, or custodians of a departmental information system shall receive annual information security training.
- Security awareness training shall be given as a part of each employee's orientation and annually thereafter. Each employee shall receive a copy of the security policy. All employees that access or use information assets shall annually complete and sign a self-certification form.
- All employees changing jobs or exiting owner, user, or custodian status, shall have their security privileges reviewed immediately, and such persons shall be prevented from having any further opportunity to access information which they no longer have a business need based on their new job duties.
- Employees with the status of owner, user, or custodian shall have a job description that details that status and the security requirements therein.
- Systems, including CDCR's mission critical systems and Internet access, shall be monitored and activity logs maintained as per the Department's ISSG.

49020.7.3.1 Security Awareness Training within CDCR

All persons who have access to any CDCR information shall be provided security awareness training at the time such access begins and at minimum annually thereafter. The Information Security Coordinators shall ensure that security awareness training is provided prior to the employees' self-certification of their awareness of CDCR's information security policies, and the renewal of access privileges to CDCR information resources.

Security awareness training falls into the following two categories:

- Information Security
 - All individuals having access to CDCR information shall be made aware of the background, scope, and objectives of CDCR's information security program and of specific CDCR information security policies and procedures that are applicable to the level and type of access

granted to the individual. The minimum training shall consist of completion of the departmental computer-based training module.

- Incident Reporting
 - All CDCR employees shall also be made aware of the events and activities that constitute threats to the organization for which they work and of the actions to be taken when confronted by those events or activities (see DOM § 49020.12).

49020.7.4 Consequences of Information Security Violations

During the time that a suspected violation is under investigation, the suspected violator's access privileges may be revoked or other appropriate action taken to prevent harm to the CDCR.

All violations of security policies or procedures are subject to disciplinary action up to and including dismissal from State service. The specific disciplinary action that shall be taken depends upon the nature of the violation and the impact of the violation on the CDCR's information assets and related facilities. For further information see DOM Chapter 3, Article 22, Employee Discipline.

49020.7.5 Return of Information Assets

All employees, contractors, and third party users shall immediately return all of the CDCR's information and assets in their possession upon termination of their employment, contract, or agreement.

49020.7.6 Removal of Access Rights

Upon termination, position change or change of duties, the access rights of an individual to assets associated with information systems and services shall be evaluated. This will determine whether it is necessary to remove access rights. Changes of employment should be reflected in removal of all access rights that were not approved for the new position. The access rights that should be removed or adapted include physical and logical access, keys, identification cards, information processing facilities, subscriptions, and removal from any documentation that identifies them as a current member of the group. If a departing employee, contractor or third-party user has known passwords for accounts remaining active, these should be changed upon termination or change of employment, contract or agreement.

49020.8 Physical Access Control and Environmental Safety

The sensitivity of CDCR's information assets and personnel safety requires that all CDCR computer facilities have physical controls to prevent unauthorized access.

All information resource facilities must be physically protected in proportion to the criticality or importance of their function. Physical access procedures must be documented, and access to such facilities must be controlled. Access lists must be reviewed at least quarterly or more frequently depending on the nature of the systems that are being protected.

Each owner and custodian of departmental information systems shall establish physical controls over their information assets. This requirement applies to workstations with confidential or sensitive information and includes network and data communications components, as well as, application and database servers.

49020.8.1 Use of Secure Areas to Protect Data and Information

- Use physical methods to control access to areas. These methods include, but are not limited to, locked doors, secured cage areas, vaults, ID cards, and biometrics.
- Restrict building access to authorized personnel.
- Identify areas within a building that should receive special protection and be designated as a secure area. An example is a server room.
- Security methods should be commensurate with security risk.
- Ensure that physical barriers are used to prevent contamination from external environmental sources.
- Compliance with fire codes.
- Installation, use and maintenance of air handling, cooling, UPS and generator backup to protect the IT investment in server rooms.

49020.8.2 Physical Access Management to Protect Data and Information

- Access to facilities that host critical CDCR IT infrastructure, systems and programs must follow the principle of least privileged access. Personnel, including full and part-time staff,

contractors and vendors' staff should be granted access to only those facilities and systems that are necessary for the fulfillment of their job responsibilities.

- The process of granting physical access to information resource facilities must include the approval of the Director of EIS, or his/her designee. Access reviews must be conducted at least quarterly, or more frequently, depending on the nature of the systems that are being protected. Removal of individuals who no longer require access must then be completed in a timely manner.
- Access cards and keys must be appropriately protected, not shared or transferred, and returned when no longer needed. Lost or stolen cards/keys must be reported immediately.
- Security clearance for visitors should include, but is not limited to, a sign-in book which includes the date and time of entry and departure, employee escort within a secured area, ID check and ID badges where critical information resources are contained.

49020.8.3 Protecting Against External and Environmental Threats

- Consideration shall be given to any security threats presented by neighboring premises, e.g. a fire in a neighboring building, water leaking from the roof or in floors below ground level or an explosion in the street.
- The following guidelines should be considered to avoid damage from the fire, flood, earthquake, explosion, civil unrest, and other forms of natural or man-made disaster:
 - Hazardous or combustible materials should be stored at a safe distance from a secure area. Bulk supplies such as stationary should not be store within a secure area;
 - Fallback equipment and back-up media should be sited at a safe distance to avoid damage from a disaster affecting the main site;
 - Appropriate firefighting equipment should be provided and suitably placed.

Working in Secure Areas

Physical protection and guidelines for working in secured areas shall be applied. The following guidelines should be considered:

- Personnel should only be aware of the existence of, or activities within, a secure area on a need to know basis;
- Unsupervised personnel working in secure areas should be avoided both for safety reasons and to prevent opportunities for malicious activities;
- Vacant secure areas should be physically locked and periodically checked;
- Photographic, video, audio or other recording equipment, such as cameras in mobile devices, should not be allowed, unless authorized.

49020.8.4 Data Processing Equipment Siting and Protection

Data processing equipment shall be sited and protected to reduce the risks from environment threats and hazards, and opportunities for unauthorized access.

The following guidelines shall be applied to protect equipment:

- Equipment should be sited to minimize unnecessary access into work areas;
- Facilities handling sensitive data should be positioned and the viewing angle restricted to reduce the risk of information be viewed by unauthorized persons during their use, and storage facilities secured to avoid unauthorized access;
- Items requiring special protection should be isolated to reduce the general level of protection required;
- Controls shall be adopted to minimize the risk of potential physical threats, e.g., theft, fire, explosive, smoke, water (or water supply failure), dust, vibration, chemical effects, electrical supply interference, communications interference, electromagnetic radiation, and vandalism;
- Guidelines for eating, drinking, and smoking in proximity to facilities should be established;
- Equipment processing confidential and/or sensitive information shall be protected to minimize the risk of information leakage due to emanation.

49020.8.5 Cabling Security

Power and telecommunication cabling carrying data or supporting information services shall be protected from interception or damage. The following guidelines should be considered:

- Power and telecommunication lines into facilities shall be underground, where possible, or subject to adequate alternative protection;
- Network cabling shall be protected from unauthorized interception or damage, for example by using conduit or by avoiding routes through public areas;
- Power cables should be segregated from communications cables to prevent interference;
- Clearly identifiable cable and equipment markings shall be used to minimize handling errors, such as accidental patching of wrong network cables;
- For sensitive or critical systems further controls to consider include:

- Installation of armored conduit and locked rooms or boxes at inspection and termination points;
- Use of alternative routings and/or transmission media providing appropriate security;
- Use of fiber optic cabling;
- Use of electromagnetic shielding to protect the cables
- Initiation of technical sweeps and physical inspections for unauthorized devices being attached to cables;
- Controlled access to patch panels and cable rooms.

49020.8.6 Secure Disposal or Re-Use of Equipment

All items of equipment containing storage media shall be checked by the appropriate IT support staff to ensure that any confidential or sensitive data and licensed software has been removed or securely overwritten prior to disposal.

49020.8.7 Removal of Property

Equipment, information or software shall not be taken off-site without prior authorization.

For administrative purposes, all information residing on CDCR's computers that is considered to be sensitive or confidential shall be treated as such by all persons who have access to it and shall be protected from unauthorized access.

49020.9 Information Integrity and Data Security

Security controls shall be established to ensure that data entered into and stored in its automated files or databases are complete and accurate, as well as ensuring the accuracy of disseminated information. Security measures will be established to ensure that access is limited to authorized users.

49020.9.1 High Risk Confidential Information

No High Risk Confidential Information (HRCI) shall be present on any computer resource, including workstations that are not under the CDCR's direct control unless authorized on a case-by-case basis by the AISO and the owner of the information unless encrypted using a CDCR approved encryption standard. HRCI is defined as non-public information that if disclosed could result in a significant harm (including financial, legal, risk to life and safety or reputational damage) to the CDCR or individual(s) if compromised through alteration, corruption, loss, misuse, or unauthorized disclosure. Examples of HRCI include, but are not limited to, information such as the following:

- Personally identifiable information such as person's name in conjunction with the person's social security, credit or debit card information, individual financial account, driver's license number, state ID number, or passport number, or a name in conjunction with biometric information;
- Personal health information such as any information about health status, provisions of health care, or payment for health care information as protected under the Health Insurance Portability and Accountability Act of 1996;
- Correctional Offender Record Information as defined in California PC §§ 13100-13104;
- All IT infrastructure information that would reveal vulnerabilities to, or otherwise increase the potential for an attack on, an information technology system of a public agency, including but not limited to firewall and router configurations, server names, IP addresses, and other system configurations;
- Any Document which contains information identifying any Confidential Informant, or information provided, as defined in CCR Title 15, Section 3321;
- Any documentation of information which contains information or data within any Gang Data Base as defined in the DOM §§ 52070.22 through 52070.24;
- Records of investigations, intelligence information, or security procedures as specified in the PRA § 6254(f).

Appropriate procedures to utilize confidential CDCR information on any of CDCR's computer resources, including any computer such as mainframes, servers, workstation, and other information assets on the CDCR network are outlined in this Article. The level of security measures shall be commensurate with the data classification of the information involved.

49020.9.2 Confidentiality of Security Mechanisms

The specific security mechanisms used by the Department to control access to its information resources are confidential.

Information concerning specific details of access controls shall not be divulged except on a need-to-know basis, and then only to persons for whom there are signed security agreements on file.

49020.9.3 Confidentiality of Production Application Software

All documentation concerning production applications residing on the CDCR's mainframes, servers, network infrastructure, and workstations is confidential.

Appropriate procedures to protect and preserve the confidentiality of an application's documentation are to be developed by the data custodian that has responsibility for, or custody of, such application. The procedures shall ensure that documentation is not divulged except on a need-to-know basis, and then only to persons for whom there are signed security agreements on file.

49020.9.4 Confidentiality of Information on CDCR Information Systems

Appropriate procedures shall be developed by the appropriate data custodians to protect and preserve the confidentiality of the Department's information stored or residing in or on CDCR controlled environments, such as the CDCR Network, individual stand-alone desktop and laptop workstations, browser-based applications such as Parole-LEADS, and the SOMS. Additionally, no High Risk Confidential Information shall be faxed, reproduced (e.g., photocopied), distributed via unencrypted e-mail, downloaded to a non-confidential system, given to an unauthorized recipient, or transmitted by telephone to any entity without appropriate security controls in place that are documented in the CDCR ISSG.

49020.9.5 Confidentiality Agreements

Requirements for confidentiality or non-disclosure agreements reflecting the CDCR's needs for the protection of information should be identified and regularly reviewed. Confidentiality and non-disclosure agreements protect organizational information and inform signatories of their responsibility to protect, use, and disclose information in a responsible and authorized manner.

Confidentiality or non-disclosure agreements should address the requirement to protect confidential information using legally enforceable terms. To identify requirements for confidentiality or non-disclosure agreements, the following elements should be considered:

- A definition of the information to be protected (e.g., confidential information);
- Expected duration of an agreement, including cases where confidentiality might need to be maintained indefinitely;
- Required actions when an agreement is terminated;
- Responsibilities and actions of signatories to avoid unauthorized information disclosure (such as "need to know");
- Ownership of information, trade secrets and intellectual property, and how this relates to the protection of confidential information;
- The permitted use of confidential information, and rights of the signatory to use information;
- The right to audit and monitor activities that involve confidential information;
- Process for notification and reporting of unauthorized disclosure or confidential information breaches;
- Terms for information to be returned or destroyed at agreement cessation; and
- Expected actions to be taken in case of a breach of this agreement.

Based on the CDCR's security requirements, other elements may be needed in a confidentiality or non-disclosure agreement. Confidentiality and non-disclosure agreements should comply with all applicable laws and regulations for the jurisdiction to which it applies. Requirements for confidentiality and non-disclosure agreements should be previewed periodically and when changes occur that influence these requirements.

49020.9.6 Information Sharing with External Parties

The risk to CDCR's information and facilities from business processes involving external parties should be identified and appropriate controls implemented before granting access.

When there is a need to allow an external party access to the facilities or information of the CDCR, a risk assessment should be carried out to identify any requirements for specific controls. The identification of risks related to external party access should take into account the following issues:

- The facilities an external party is required to access;
- The type of access the external party will have to the information and facilities, e.g., physical access to offices, computer rooms, filing cabinets or logical access to an organization's databases and information systems;
- Network connectivity between the organization's and the external party's network(s), e.g., permanent connection, remote access;
- Whether the access is taking place on-site or off-site;

- The value and sensitivity of the information involved, and its criticality for business operations;
- The controls necessary to protect information that is not intended to be accessible by external parties;
- The external party personnel involved in handling the organization's information;
- How the organization or personnel authorized to have access can be identified, the authorization verified, and how often this needs to be reconfirmed;
- The controls employed by the external party when storing, processing, communicating, sharing, and exchanging information;
- The impact of access not being available to the external party when required, and the external party's entering or receiving inaccurate or misleading information;
- Practices and procedures to deal with information security incidents and potential damages, and the terms and conditions for the continuation of external party access in the case of an information security incident;
- Legal and regulatory requirements and other contractual obligations relevant to the external party that should be taken into account; and
- How the interests of any other stakeholders may be affected by the arrangements. Access by external parties to the CDCR's information should not be provided until the appropriate controls have been implemented and, where feasible, a Data Sharing Agreement (DSA) or Memorandum of Understanding (MOU) has been signed, defining the terms and conditions for the connection or access and the working arrangement. Generally, all security requirements resulting from work with external parties or internal controls should be reflected by the agreement with the external party.

It should be ensured that the external party is aware of their obligations, and accepts the responsibilities and liabilities involved in accessing, processing, communicating, or managing the organization's information and facilities.

49020.9.7 Personal Computer Security

Information maintained in a personal computer system, including laptop computers and mobile devices, must be subjected to the same degree of management control and verification of accuracy that is provided for information that is maintained in other automated files. Files containing High Risk Confidential Information or sensitive data shall not be stored in personal computer systems unless it can be demonstrated that doing so is in the best interest of CDCR and that security measures have been implemented to provide adequate protection. Proposals to use desktop or laptop computers to maintain or access files containing High Risk Confidential Information or sensitive data must be approved by the Agency Information Security Officer (SAM § 5315.1) before implementation. The Agency Information Security Officer will determine that the proposal complies with all applicable provisions of the SAM dealing with information security and risk management (SAM §§ 5300 through 5399).

49020.9.8 Personal Computing Devices

Using personally-owned devices to access departmental information resources may jeopardize the integrity and security of CDCR's information resources. In regard to personally-owned devices, the following provisions shall be followed:

- Personally-owned electronic devices shall not connect to, transfer data to or from, or be used to copy data to or from the CDCR Network;
- Personally-owned smartphones such as Android devices, iPhones, Treos, Blackberry devices shall not connect to, transfer data to or from, or be used to copy data to or from the CDCR Network. CDCR e-mail shall not be setup for delivery or used on any personally-owned Smartphone or electronic device;
- Personally-owned USB memory "sticks," "cards," or "external drives" shall not be used to copy, forward, or transfer CDCR data from CDCR local drives, networks, or e-mail systems.

Exemptions to these provisions shall require approval from all impacted data owners and the Agency Information Security Officer.

49020.9.9 Mobile Computing and Storage Devices

All mobile computing and storage devices that access the CDCR network and/or store CDCR data must be compliant with CDCR Information Security Policies and Standards. In regard to mobile

computing and storage devices, the following provisions shall be followed:

- High Risk Confidential Information on any stored on mobile computing and storage devices must be encrypted;
- Any and all mobile computing devices used within the CDCR information and computing environments must meet all applicable CDCR encryption standards. Mobile computing devices shall be tracked in an information assets inventory;
- CDCR information security policies applicable to desktop or workstation computers apply to mobile computing devices;
- Employees will delete information from their portable device or portable storage media once it is no longer needed;
- All CDCR laptops shall connect to the CDCR network at a minimum of 42 days or another designated time frame to receive updates;
- Personal long distance calls shall not be made from state-issued handheld devices except as authorized in DOM Chapter 1 Organizational Structure, Article 12 – Telephones, Facsimiles, and Cellular Type Telephones.
- Personal local calls shall not be made from state-issued handheld devices except as authorized in DOM Chapter 1 Organizational Structure, Article 12 – Telephones, Facsimiles, and Cellular Type Telephones.

49020.10 Access Control

Access to any of the CDCR's computerized information on any of the CDCR's computers or the OTech Data Center is restricted to authorized persons. All access to CDCR's information systems shall be protected by at least user ID/password access control. Any software installed on information systems which use password protection features shall provide for non-display of, and restricted control over, passwords. No software that allows the authentication process to be bypassed or comprised may be installed on those computers.

- Any person requiring such access shall:
- Be a State employee or a bona fide representative of the Department.
- Demonstrate either a need for, or a legal right to, the information.
- Receive formal authorization from the owner of the information.
- Accept legal responsibility for preserving the security of the information.

The sensitivity of the information residing in the CDCR's computerized environments requires strict controls over who is allowed access to that environment, which information may be accessed, and how that information may be accessed.

The following uniform access authorization procedure assumes that all pertinent procedures have been followed, and all CDCR-required system approvals have been obtained. This policy is for access to existing information resources. The uniform access authorization procedure is as follows.

- All access requests shall be sent to the system owner with a copy to the AISO. The request shall contain the following:
 - The name of the requester.
 - The specific information for which access is desired.
 - The reason(s) why the requestor has a need for, or right to, the information.
 - The frequency and duration of the requested access.
 - The type of access (e.g., read, update, copy, etc.).

After the data owner approves the request for access and returns it to the requestor, the approval is then routed to either EIS or the requesting organization's ISC for action.

49020.10.1 Information Security-Responsibilities of Password Owners

Access to CDCR's information systems is restricted by password to only authorized persons. Authorized persons shall never reveal their passwords to anyone for any reason. Authorized persons using a computer shall log off or activate a password-protected screensaver before leaving the immediate vicinity of the computer or terminal. Additionally, no ability shall exist for a user to store, load, or invoke the log on process on any CDCR computer, by any method that includes the user Resource Access Control Facility (RACF), ID, or the password. Violation of this Policy may result in the revocation of all access privileges and appropriate disciplinary action. Such disciplinary action may be based not only on the violation itself, but also on all activity performed by those obtaining access to a system or information asset due to a violation of this Policy.

The password is a major "key" to the integrity of CDCR's automated environment. The password policy exists to protect the integrity of that "key."

User IDs shall never be duplicated. User ID security is backed up by the existence of passwords. Owners are responsible for anything for which their password is used. Therefore, as a matter of self-protection, the password owner shall:

- Not tell anyone what their password is.
- Not write down their password.
- Not use an obvious password. Obvious passwords include one's name or nickname, the names of one's children, one's user ID, names, or words

associated with hobbies ("DANCER," "SKIER," "GOLFER," etc.), names associated with favorite books, TV shows, or movies ("JEDI," "FRODO," "PICARD," "RHETT," etc.), "SECRET," "SECURE," "PASSWORD," all spaces or the "enter" key, "99999999," "XXXXXXXX," driver's license, social security numbers, the name of the current month, etc.

- Not use words that can be looked up in any dictionary, including foreign languages (e.g., Latin).
- Use non-obvious passwords, such as word combinations rather than single words ("COMPUTERUSER," "SKIBUM," "IAMADANCER," etc.) intentionally misspelled words ("KRAKER," "KORECTUNS," etc.), or random combinations of letters and numbers, etc.
- Use passwords that are at least eight characters long.
- Change the password in accordance with specific application requirements, every 30 to 90 days, depending on the application.

If the password owner becomes aware that a correct password is being rejected, that user should immediately notify the local ISC and the AISO, since this may indicate that someone has discovered the password and has changed it without the owner's permission, resulting in the owner no longer knowing his or her own password.

If a password is forgotten, the local IT support staff or the CDCR Help Desk shall be contacted for a password reset. They shall validate the owner's identity and give a new temporary, one-time password. The owner shall change this password immediately.

If anyone asks for a password, the owner shall refuse to provide it and shall refer the person to a supervisor. The owner shall then notify the supervisor.

Anyone who knows that any password has been compromised should take the following actions:

- Notify the ISC;
- Notify the immediate manager/supervisor;
- Notify the Information Security Office;
- Complete a "security incident report" and submit it to the Information Security Office.

49020.10.2 Information Security-Responsibilities of Supervisors

People are provided passwords because their jobs require them to access CDCR information systems. When a password owner terminates employment or is reassigned to duties that do not require such access, the immediate supervisor shall, without delay, notify the applicable party of the change.

The authority to access CDCR computers entails a significant risk to the Department's ability to function. Such authority is restricted to persons with a demonstrated need for access. Because that need is, by definition, a function of the person's specific job duties, any change in those duties requires a reevaluation of the need for access. If the duties change such that the need for access no longer exists, the access shall be revoked.

If any password owner changes job duties (via resignation, promotion, transfer, reorganization, separation, etc.), that individual's immediate supervisor shall initiate the following:

- Reevaluate whether the person's new duties still require the authority to access CDCR's computers.
- Notify the local IT support staff or the access management group if the person no longer requires access authority.
- Notify the owner of the relevant CDCR information so that the appropriate paperwork can be initiated to document the removal of the person's access privileges if the person no longer requires access authority.

The lack of use of the access authority is assumed to be proof that the authority is no longer required. Access authority to information assets may be revoked without notice if they are not used regularly.

49020.10.3 Requesting Authority to Access CDCR's Mainframe Environments

Access to an entire mainframe environment shall not be authorized. Access to specific portions of that environment, such as, but not limited to, the system development facilities, shall be authorized for specific organizations. Access to a specific application can be authorized by the Information Owner as a means of meeting a specific request for specific information.

49020.10.4 Unattended Workstations

Active workstations or terminal sessions must not be left unattended. Any authorized or unauthorized activity on an unattended workstation will be attributed to the person whose logon and password activated the terminal or workstation. All sessions shall either be terminated when leaving the immediate area, or protected with a password-activated screensaver.

49020.10.5 Restrictions on Using CDCR Information Assets

The use of all CDCR information assets including any mainframe computers, servers, notebook, laptop and workstation desktop systems, network components, and applications run on or accessed from CDCR computers is restricted to official CDCR business.

49020.10.6 Reassignment of Workstations

The local computer coordinators shall erase all electronic documents from the hard drive of a computer once any staff member of the CDCR has ceased using that computer. All forms of electronic documents that the previous staff member created, received, or used shall be removed. As needed, the electronic documents may be transferred to another computer. Notification of the previous staff member's being placed on litigation hold or being under investigation requires that the information be stored and properly secured until further notification.

49020.11 Information Systems Acquisitions, Development and Maintenance

Information systems include operating systems, infrastructure, business applications, off-the-shelf products, services, and user-developed applications. The design and implementation of the information system supporting the business process can be crucial to security. Security requirements shall be identified and agreed upon prior to the development and/or implementation of information systems. All security requirements shall be identified at the requirements phase of a project and justified, agreed upon, and documented as part of the overall business case for an information system.

49020.11.1 Correct Processing in Applications

Appropriate controls shall be designed into applications to ensure correct processing. These controls should include data validation of input data, internal processing and output data. Additional controls may be required for systems that process, or have an impact on, sensitive, valuable or critical information.

49020.11.1.1 Input Data Validation

Checks shall be applied to the input of transactions. The following guidelines should be considered:

- Dual input or other input checks, such as boundary checking or limiting fields to specific ranges of input data;
- Periodic review of the content of key fields or data files to confirm their validity and integrity;
- Inspecting hard-copy input documents for any unauthorized changes (all changes to input documents should be authorized);
- Procedures for responding to validation errors;
- Procedures for testing the plausibility of the input data;
- Defining the responsibilities of all personnel involved in the data input process;
- Creating a log of the activities involved in the data input process.

49020.11.1.2 Message Integrity

An assessment of security risks should be carried out to determine whether message integrity is required and to identify the most appropriate method of implementation. Data output from an application shall be validated to ensure that the processing of stored information is correct.

Output validation may include:

- Plausibility checks to test whether the output data is reasonable;
- Reconciliation control counts to ensure processing of all data;
- Providing sufficient information for a reader or subsequent processing system to determine the accuracy, completeness, precision, and classification of the information;
- Procedures for responding to output validation tests;
- Defining the responsibilities of all personnel involved in the data output process;
- Creating a log of activities in the data output validation process.

49020.11.2 Cryptographic Controls

Cryptographic controls should be considered to achieve:

- Confidentiality: using encryption of information to protect sensitive or critical information either stored or transmitted;
- Integrity/authenticity: using digital signatures or message authentication codes to protect the authenticity and integrity of stored or transmitted sensitive or critical information;
- Non-repudiation: using cryptographic techniques to obtain proof of the occurrence or non-occurrence of an event or action.

Based on a risk assessment, the required level of protection shall be identified taking into account the type, strength, and quality of the encryption algorithm required. All cryptographic keys shall be protected against modification, loss, and/or destruction.

49020.11.3 Security of System Files

To minimize the risk of corruption to operation systems, the following procedures shall be implemented:

- The updating of operation software, applications, and program libraries, shall only be performed by trained administrators upon management authorization;
- Operational systems shall only contain approved executable code, and not development code or compilers;
- A rollback strategy shall be in place before changes are implemented;
- An audit log shall be maintained of all updates to operational program libraries;
- Previous versions of application software shall be retained as a contingency measure.

Decisions to upgrade to a new software release should take into account the business requirements for the change, and the security of the release, i.e. the introduction of new security functionality or the number and severity of security problems affecting this version. Software patches shall be applied when they can help to remove or reduce security weaknesses.

Physical or logical access shall only be given to non-CDCR employees for support services when necessary, and with approval from the AISO. Access to CDCR information resources should be monitored. Computer software that relies on externally supplied software and modules shall be monitored and controlled to avoid unauthorized changes, which could introduce security weaknesses.

49020.11.4 Protection of System Data

The use of operational databases containing personal information or any other sensitive information for testing purposes should be avoided. If personal or otherwise sensitive information is used for testing purposes, all sensitive details and content should be removed or modified beyond recognition before use.

49020.11.5 Access Control to Program Source Code

Access to program source code and associated items (such as designs, specifications, verification plans and validation plans) shall be strictly controlled, in order to prevent the introduction of unauthorized functionality and to avoid unintentional changes.

49020.11.6 Security in Development and Support Processes

Ensuring the security of application system software and information is essential. As such, production environments shall be strictly controlled.

49020.11.6.1 Change Control Procedures

Formal change control procedures shall be documented and enforced in order to minimize the corruption of information systems. Introduction of new systems and all changes that could possibly have an impact on the users or system availability shall follow a formal process of documentation, specification, testing, quality control, and managed implementation.

This process shall include an analysis of the impacts of changes, and specification of security controls needed. This process shall also ensure that existing security and control procedures are not compromised, that support programmers are given access only to those parts of the system necessary to perform or complete their work, and that formal agreement and approval for any change is obtained.

The following operational change control procedures shall be integrated:

- Maintain a record of the agreed authorization levels;
- Ensure changes are submitted by authorization users and have management approval;
- Review controls and integrity procedures to ensure that nothing will not be compromised by the changes;
- Identify all software, information, database entities, and hardware that require amendment;
- Obtain form approval from the Change Control Board before work commences;
- Ensure system documentation is updated on the completion of the change and that old documentation is archived or disposed of;
- Maintain version control for all software updates;

- Maintain an audit trail of change requests;
- Ensure that operating documentation and user procedures are changed as necessary to remain appropriate;
- Ensure that the implementation of changes take place at the right time and does not have a significant impact to the business involved.

49020.11.6.2 Technical Review of Applications after Operating System Changes

When operating systems are changed, critical business applications shall be reviewed and tested to ensure there is no adverse impact on operations or security.

49020.11.6.3 Outsourced Software Development

Outsourced software development shall be supervised and monitored by EIS.

49020.12 Incident Management

To ensure information security events and weaknesses associated with information systems are communicated in a manner allowing timely corrective actions to be taken, formal event reporting and escalation procedures shall be in place. All employees, contractors and third-party users shall be made aware of the procedures for reporting the different types of events and weaknesses that might have an impact on the security of the CDCR's information assets.

Incident Reporting

It is the responsibility of all departmental employees to report all incidents that would place the Department's information assets at risk. The following incidents shall be reported through the local ISC to the Information Security Office within three days of becoming aware that a security incident has occurred:

- Unauthorized access to, or modification of, State-owned or State-managed data, including non-electronic data such as reports, documentation, and hard copy files.
- Unauthorized use of, or access to, State computer resources, including computer networks and services as well as systems not necessarily connected to a network.
- Unauthorized access to, or modification of, computer software, including operating systems, networks, configurations, and applications. This includes the introduction of malicious software such as viruses, worms, and other malicious software.
- Deliberate or unauthorized acts resulting in disruption of State computer services, including "Denial of Service" attacks.
- Unauthorized use of user account or Internet domain names.
- Destruction of, or damage to, State facilities and/or information assets.
- Break-in or other unauthorized access to State facilities resulting in compromise to the data or computer systems housed within those facilities.
- Security weaknesses that pose a threat to CDCR information resources.

The Information Security Office shall investigate all incidents.

49020.12.1 Incident Report Format

The following information concerning each incident shall be reported to the Information Security Office within three working days of becoming aware of the occurrence of the incident:

- Date and time.
- Location.
- Description of what happened.
- Estimated damages.
- Description of corrective action taken or planned.
- Estimated costs associated with corrective actions.
- If known, identity of those responsible for the incident.
- Descriptions of actions taken or planned against those responsible for the incident.
- Contact name and phone number of the person reporting the incident.

The report submitted to the Information Security Office shall be signed by the appropriate Warden, Regional Parole Administrator, Director, or Assistant Secretary.

Incidents involving the following shall be forwarded to the State Office of Information Services (OIS) within five business days of the initial report, and shall be signed by the AISO and Secretary or their authorized delegate:

- CDCR-owned or CDCR managed data, without authorization, was damaged, destroyed, deleted, shared, altered, or copied, or used for non-state business. This includes computer documentation and configuration information, as well as electronic and non-electronic data and reports.
- Unauthorized parties accessed one or more CDCR computers, computer systems, or computer networks. This includes deliberate and unauthorized uses of CDCR-owned computer services, as well as, "hacker attacks."
- Someone has accessed and without permission added, altered, damaged, deleted, or destroyed any computer programs which reside or exist internal or external to a CDCR computer, computer system, or computer network.

- Disruption of CDCR computer services or denial of computer services occurred in a manner that appears to have been caused by deliberate and unauthorized acts.
- A contaminant was introduced into a CDCR computer, computer system, or computer network. This includes, but is not limited to, viruses, Trojans, worms, and other types of malicious attacks.
- Internet domain names and/or users account names have been used without permission in connection with the sending of one or more electronic mail messages, and thereby caused damage to a CDCR computer, computer system, or computer network, or misrepresented CDCR or CDCR employees in electronic communications.
- Damage or destruction of CDCR information processing facilities has occurred.
- Physical intrusions into CDCR facilities have occurred that may have resulted in the compromise of CDCR data or computer systems.
- Lost, damaged, or stolen devices used for information processing.

The California Highway Patrol's Emergency Notification and Tactical Alert Center (ENTAC) shall be notified of the occurrence of an incident within one day of receipt of the initial report. Incidents involving "Personally Identifiable Information" (PII) or "Personal Health Information" (PHI) involving more than 500 California Residents shall be reported to the Attorney General.

49020.12.2 Collection of Evidence

When misconduct is discovered which constitutes an information security incident in conjunction with a possible violation of departmental policy or criminal violation, precaution must be taken to avoid contamination of the possible electronic evidence. Prior to taking action, the discoverer should contact the Hiring Authority and/or the Office of Internal Affairs (OIA) for direction, if the misconduct could lead to an administrative investigation. If the misconduct rises to the level of criminal misconduct, the OIA must be notified immediately prior to any action being taken.

When there is any incident that involves the preservation of any evidence and after the first responder has consulted with the Hiring Authority/OIA, the first responder is responsible to preserve the electronic crime scene and recognize, collect, and safeguard the digital evidence and/or non-digital evidence. First responders and managers who supervise personnel who process such events should be familiar with the information in this section and perform their duties.

Digital evidence includes all information and data of value to an investigation that is stored on, received, or transmitted by an electronic device. All other evidence is non-digital evidence.

When dealing with digital evidence, general forensic and procedural principles should be applied:

- The process of collecting, securing, and transporting digital evidence should never change the evidence and integrity of the chain of evidence must be maintained.
- Digital evidence should only be examined and/or acquired by those trained specifically for that purpose. First responders without proper training, equipment, or skills should not attempt to explore the contents of or to recover information from any electronic device.
- Everything done during the seizure, transportation, and storage of digital evidence should be fully documented, and preserved. Documentation should include the specific location of the evidence found, how it was collected, labeled, and preserved.
- Package and transport digital evidence in a secure manner consistent with chain of evidence procedures.
- Any Forensic work shall be performed on copies of the digital evidence. The original device(s) shall be secured and protected for the entire process until a matter has been determined closed. The original drive shall not be imaged or cloned without consulting first with the OIA.

When dealing with all other forms of non-digital evidence:

- The original evidence shall be kept securely with a record of the individual who located it.
- The individual who located the original evidence shall prepare a record of the location of the evidence, when the evidence was found, who witnessed the discovery of the evidence.
- Package and transport of non-digital evidence in a secure manner consistent with chain of evidence procedures.

49020.13 Failure to Correct Information Security Deficiencies

Should any audit indicate that the State's security policies are not established or that the Department has not taken corrective action with respect to security deficiencies, the Department may be subject to any or all of the following:

- Further audit and review by the Department of Finance (DOF), Bureau of State Audits (BSA), State Controller's Office (SCO), and/or Department of Justice (DOJ).
- Revocation by the DOF of delegated approval authority for IT projects.
- Application of penalties specified in GC § 1222.

49020.14 Technical Vulnerabilities Management

Technical vulnerability management shall be implemented in an effective, systematic, and repeatable way with measurements taken to confirm its effectiveness.

A current and complete inventory of information assets will be maintained. Specific information gathered should include software vendor, version numbers, software installed and person(s) responsible for the software installation. Appropriate timely action shall be taken in response to the identification of potential technical vulnerabilities. The following should be established:

- EIS shall define and establish the roles and responsibilities associated with technical vulnerability management, including vulnerability monitoring, vulnerability risk assessment, patching, asset tracking, and any coordination responsibilities required;
- Information resources that will be used to identify relevant technical vulnerabilities and to maintain awareness about them should be identified for software and other technology (based on the asset inventory list,); these information resources should be updated based on changes in the inventory, or when other new or useful resources are found;
- A timeline should be defined to react to notifications of potentially relevant technical vulnerabilities;
- Once a potential technical vulnerability has been identified, EIS shall identify the associated risks and the actions to be taken;
- Depending on the urgency of which a technical vulnerability needs to be addressed, the action taken shall be carried out according to change control procedures or by following the Department's information security incident response procedures;
- If a patch is available, the risks associated with installing the patch should be assessed (the risks posed by the vulnerability should be compared with the risk of installing the patch);
- Patches should be tested and evaluated before they are installed to ensure they are effective and do not result in side effects that cannot be tolerated; if no patch is available, other controls should be considered, such as:
 - Turning off services or capabilities related the vulnerability
 - Adapting or adding access controls, e.g., firewall rules, at the network border;
 - Increased monitoring to detect or prevent actual attacks;
 - Raising awareness of the vulnerability.

Employees, contractors, and third-party users of information systems and services shall not attempt to prove suspected security vulnerabilities. Testing vulnerabilities may be interpreted as a potential misuse of the system and could cause damage to the information system or service and result in disciplinary actions for the individual performing the test.

49020.15 Confidential or Sensitive Information Stored on Workstations

The nature of information classified as confidential or sensitive requires strict controls over access to such assets (SAM § 5335.2). Files containing confidential or sensitive data (as defined in SAM § 5335.2) should not be stored in personal computer systems unless it has been demonstrated that doing so is in the best interest of the Department and that security measures have been implemented to provide adequate protection and approval from the AISO has been given.

With the aforementioned approval, confidential or sensitive information may be stored on or accessed with workstations in accordance with the following provisions:

- Only authorized personnel may have access to confidential or sensitive data.
- Workstations containing or capable of accessing such data shall be equipped with hardware and/or software that provide for authentication techniques, such as password protection of confidential files.
- HRCI and sensitive files shall be encrypted, if the owner deems it necessary. Encryption software must comply with standards documented in the AISO's ISSG.
- Backup files of confidential data shall be maintained in a locked cabinet away from the location of the workstation containing the program providing access to such files.

- Security hardware/software shall comply with standards documented in the ISSG.
- At least two individuals shall be authorized access and have knowledge of the location where data files, backup files, and forms are stored.

49020.15.1 Software Controls on CDCR's Workstations

The following software controls shall be established for all CDCR workstations:

- No software shall be loaded, installed, and/or activated on any CDCR workstation without prior review and written approval from the local ISC and the requestor's supervisor, or EIS.
- Controls that ensure that the CDCR is in compliance with all State-mandated requirements (SAM §§ 5310 and 5345.1).
- Appropriate procedures shall be developed by ISCs for use by each CDCR division that has workstations. These procedures are subject to approval by the AISO, and are constrained by the requirements of the CDCR workstation policy.

49020.15.2 Data File Transfers

Electronic transfer (file transfer) of information to or from any CDCR information system file or database is restricted to authorized persons who shall use an approved file transfer mechanism. The same level of protection afforded the information in its originating system shall be provided by the computer environment to which the information is transferred.

Transfer of information from one CDCR computer to another does not alter the sensitive nature of the information or eliminate the need to protect the confidentiality of the information. An appropriate procedure shall be developed by EIS for use by each CDCR division that uses file transfer mechanisms. The procedure shall be constrained as follows:

- The user is responsible for providing the necessary controls to secure all confidential information maintained in the workstation environment. A Security Plan must be approved by the ISO prior to High Risk Confidential Information or sensitive information being stored on a workstation.
- Dial-up access to the Department's databases is prohibited without explicit authorization from the data owner and Information Security Office.
- All requests to transfer information shall be approved by the owners of the information and the custodians of the information. The owners shall provide the necessary authorization for access (if the request is approved) and the custodian shall provide the methodology.
- Confidentiality and integrity of information shall be maintained.
- Any workstation performing file transfers shall be subject to additional hardware and software controls (e.g., encryption and dynamic password user authentication) to enhance the security environment of the workstation.

49020.16 Information Security Standards and Guidelines

Data processing equipment in CDCR's automated network environment (computers and peripherals) shall be secured against access by unauthorized persons. Any equipment that is not stand-alone is considered data processing equipment. This includes all workstations that are connected to each other or to any other server or mainframe, system, whether by dial-up, cabling (including, but not limited to, coax, twisted pair, and fiber), LANs, gateways, routers, and all other network components. Access to CDCR's network shall be restricted to CDCR employees and approved consultants. The methods by which CDCR's data processing equipment is secured shall be documented in the CDCR ISSG. Any exception or modification to the ISSG must be approved in writing by the AISO prior to implementation.

The ISSG shall include descriptions of procedures to protect and preserve the data processing equipment from access by unauthorized persons. The procedures are constrained by the following:

- Only authorized personnel shall have access to terminals, printers, control units, concentrators, telephone wiring panels, modems, and emulation cards.
- Control of access through the CDCR telecommunications system to the Internet is the responsibility of the EIS, and is administered in accordance with the ISSG. Additional access not described in the ISSG constitutes a request for a modification to the ISSG and must be submitted and approved in accordance with this policy prior to implementation.

- Persons not authorized to access the CDCR's telecommunications system shall obtain approval from the designated local ISC. Unauthorized persons include representatives of control agencies, CDCR personnel from another site, equipment vendors, telephone companies, etc.
- Any division with custodianship of decentralized applications shall locate equipment in restricted areas that shall be monitored during working hours and locked during unattended periods.
- Access to computers, either connected to a CDCR network or stand-alone, shall be limited by the use of a password-protected screensaver and/or key-controlled access to the power supply and/or keyboard with the keys physically removed and stored away from the workstation.
- Computers connected in any way to CDCR's telecommunications system or stand-alone computers with modems connected to them may not be located in areas where inmates have access, except for work assignments when the inmates are under the direct and constant supervision of custody staff.
- Control units shall be locked whenever possible and the keys removed and stored in a secure environment.
- Storage media including, but not limited to, diskettes, CDs, removable hard drives, and tapes shall be removed from equipment that reads them and stored in a secure environment when not in use.
- Documentation pertaining to the hardware, system software, and configuration of the CDCR's telecommunication system are confidential.
- All facility phone rooms and other locations where network components are kept shall be labeled "Out of Bounds. Authorized Personnel Only."

49020.16.1 Requests for Modifications of the Information Security Architecture ISSG

The sensitivity of the CDCR's automated information assets requires strict controls over who can use equipment that is configured to access these assets. Also, the monetary value of the equipment itself warrants physical controls to deter theft or damage to the equipment. Requests for modification of the ISSG shall be submitted to the AISO.

49020.17 Modem Usage

The critical and sensitive nature of the informational resources residing in CDCR's computers requires stringent controls of devices attached to these computers, and over which persons are allowed to use these devices.

All access to the CDCR's systems shall be monitored and controlled by EIS. All other means of accessing CDCR systems including, but not limited to, wireless communication devices and dialup modem, are prohibited unless approved by the ISO.

Modem use is restricted to computers not connected to the CDCR Network, unless such use is an approved part of the ISA. Requests for additional modems to be used within the CDCR teleprocessing environment are subject to approval.

Modems may be used to access remotely the CDCR network resources through EIS-supported access mechanisms. They may also be used to provide access to the Internet and specific destinations and e-mail capability when such access is not available through the CDCR network resources. Justification and procurement of modems for these purposes shall be conducted in accordance with DOM, Chapter 4, Article 41, Departmental Workgroup Computing Policy.

Specific restrictions on the use of modems are:

- There shall be no inmate or parolee access to any computer for which a modem has been approved. Computers that are attached to modems shall not be located in areas where inmates or parolees have access.
- No applications that were developed by inmates shall be implemented on a modem-equipped computer.
- No modems shall be installed on any computer that is a part of a LAN that has been approved for inmate use.
- The location and usage of all modems must be tracked and monitored at all times.
- Computers with "pocket" modems may not be used within the secured perimeter of facilities. They shall not be used in parole offices unless the area where the modem is to be used is secured from parolee access.
- Non-CDCR computers shall not access the CDCR Network via modem.

49020.18 Inmate/Ward Use of Computers

It is the policy of the Department to allow inmates, wards or parolees access to computers, computer terminals, or computer keyboards only within the constraints of the policies contained in this Article. For the purpose of this section, "Inmate" means a male or female offender who is committed under sentence to or confined in a penal or correctional institution under the authority of CDCR, which includes youth offenders under the jurisdiction of the CDCR's Division of Juvenile Justice. Any request for exception shall be referred to the AISO for review.

49020.18.1 Restrictions on Computer-Knowledgeable Inmates

Revised November 4, 2013

Inmates who have a history of computer fraud or abuse, as defined in Penal Code (PC), § 502, shall not be placed in any assignment that provides access to a computer.

Inmates that have documented histories of computer fraud or abuse, as noted during the initial classification process, shall be identified on the initial classification chrono. Any occurrence of computer abuse after admittance to the prison system shall also be recorded in the inmate's records.

The use of inmates as programmers and system experts shall be prohibited where there is a risk to the information assets of the Department or public, as determined by the institution head or the ISO. Inmates shall not be used as programmers or system experts for departmental business applications, systems, and data, per CCR Title 15 § 3041.3(c)(1). Staff assigned to supervise inmates using computers must be able to monitor inmates' activities.

49020.18.2 Inmate Access to Computer-Based Tools

Inmates shall not be allowed access to any computer-based tools that could be utilized to create a virus, Trojan Horse, worm, or cause damage to data files or a computer's operating system, except in an approved Computer Refurbishment Program.

49020.18.3 Inmate Access to Computers and Telecommunications Devices

Inmates may access workstations for the purpose of completing specific tasks or assignments while under direct and constant supervision. The approved uses of workstations by inmates shall be carried out only under very tightly controlled circumstances:

- Each computer shall be labeled to indicate whether inmate access is authorized.
- Computers used by inmates shall not be used concurrently for any other purpose.
- The local ISC shall approve or disapprove the movement of computers from an "inmate use" status to other work and vice versa.
- Any computer that is being repurposed from employee use to inmate use shall have the hard drive erased of all data prior to the redeployment using the methods in the department's data wiping standards.
- Inmates with a work assignment involving a particular computer shall not be assigned to work on other computers.
- Areas where inmates are authorized to work on computers shall be posted as such.
- All inmates shall be under the supervision of a knowledgeable employee within a controlled, designated area when using computers.
- There shall be no communications capabilities in the designated area, such as a telephone line, computer network line, telephone punch panel, cell phones, wireless communication devices such as pagers or handheld computers or radio communication devices without approval of the AISO.
- Inmates shall not have access to computer utility programs used to modify the functionality of the computer or to view system configuration information, except in an approved Computer Refurbishment Program.
- Inmates shall not have electronic storage media in their possession except within an approved area.
- Inmates may not have access to computer application development tools.
- An inventory and appropriate controls shall be maintained on all portable storage media. Portable storage media for inmate use shall be labeled "For Inmate Use." Reports and other printed output from inmate-utilized computers shall be reviewed closely by staff, and appropriate distribution of such output shall be monitored.
- Inmates shall not have access to the operating system of any computer. Inmates shall not have access to any interface that allows access to the system configuration of any computer including, but not limited to, dialogue boxes, setup, and configuration screens. Additionally, inmates shall not have access to operating system commands that allow viewing or modification of any aspect of a computer operating system or the configuration of a computer, except in an approved Computer Refurbishment Program.
- Inmates shall not be allowed to load software onto hard disks, except in an approved Computer Refurbishment Program.

- No inmate shall have access to, or possession of, any telecommunication capability, including Internet accessible computers, wireless devices such as pagers or handheld computing devices or cell phones without approval from the Agency Information Security Officer.
- There shall be no inmate access to a computer outside the inmate's authorized work, vocational, or educational areas, unless approved by the AISO.

49020.18.4 Operation of Computer Programs Created by Inmates

Any computer-based system that was created by inmate programmers that is used to accomplish or complete the CDCR-related work shall not be operated or maintained by any inmate.

49020.18.5 Supervision of Inmates Using Computers

The persons responsible for supervising inmates' use of computers shall certify in writing that these policies are being adhered to at their specific site.

A copy of this certification shall be kept on site by the local ISC.

49020.18.6 Education Computers

The use of computers for academic and vocational education is subject to the same requirement of due care applying to all personnel that use computers within applicability of the Department's information security and risk management program.

49020.18.7 CALPIA Systems

Inmate use of computers in CALPIA and in CDCR facilities shall be in accordance with the departmental policies and institutional procedures.

49020.19 Information Security-Warnings

All critical Department systems shall display a criticality warning at the first screen that any user of the system will see when the computer system is accessed.

49020.20 Revisions

The Director of EIS or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

ARTICLE 46 — INFORMATION SYSTEMS RISK MANAGEMENT

Effective November 30, 1992

49030.1 Policy

Revised April 16, 1993

All ITS within the Department are subject to having a risk analysis prior to any approval or authorization for development or implementation. The result of this analysis, "The Risk Analysis and Risk Reduction Report," shall be submitted as part of the request for approval. This report is a part of the feasibility study for large systems, and stand-alone facilities within small systems. A multipurpose work station is exempt from this requirement unless there is a need for a modem or to store confidential or sensitive information.

49030.2 Purpose

The purpose of this policy is to identify and provide for the use of a generic systems approach as part of the Department's risk management program. This process shall assist users, systems designers, systems developers, and management in answering a number of basic questions, such as:

- What is the nature of the problem?
- What needs to be changed, modified, or accomplished?
- What alternatives are available to solve the problem?
- How, specifically, shall the problem be solved?
- How well does the new solution work?

49030.3 Responsibilities

The following is a description of the organizational responsibilities for administering this program.

The Director

The Director is responsible for establishing and maintaining a risk management program within the Department. It is the responsibility of the Director to assure that the Department's information assets are protected from the effects of damage, destruction, and unauthorized or accidental modification, access, or disclosure.

Specifically, the Director is responsible for ensuring the following:

- Enforcement of State-level risk management policies.
- Establishment and maintenance of internal policies and procedures that provide for the security of information technology facilities, software and equipment, and the integrity and security of the agency's automated information.
- Department compliance with reporting requirements related to risk management issues.
- Appointment of a qualified Information Security Officer (ISO).
- Participation of management during the planning, development, modification and implementation of risk management policies and procedures.

Information Security Officer

GC 1171 requires that the director of each agency designate an ISO. The ISO is responsible for overseeing agency policies and procedures designed to protect the Department's information assets. In accordance with State policy, the ISO shall be accountable to the CDC Director regarding these responsibilities.

To avoid conflicts of interest, the ISO shall not have direct responsibility for information processing, information access management functions, any departmental computer based systems or have a reporting relationship to an organization that has such responsibilities. The ISO shall not have any special allegiance or bias toward a particular program or organization.

The responsibilities of an ISO include overseeing the following:

- Implementation of necessary procedures to ensure the establishment and maintenance of a risk management program, including a risk analysis process.
- Establishment of procedures necessary to monitor and ensure compliance of established risk management policies and procedures.
- Coordination with internal auditors and QC personnel to define their role in automated ITS planning, development, implementation, operations, and modifications relative to risk management.
- Coordination with the data center's ISO or staff on matters related to the planning, development, implementation, modification, or risk management policies and procedures that affect the Department.
- Establishment of procedures to comply with control agency reporting requirements.
- Establishment of mechanisms to assure that Department staff (with particular emphasis on the owners, users and custodians of information) are educated and aware of their roles and responsibilities relative to risk management.
- Establishment of training programs for Department employees related to risk management.

Technical Management

Department technical management has the following responsibilities relative to CDC's risk management program:

- Ensuring that management, the ISO, assigned owners, and users/custodians are provided the necessary technical support services with which to define and select cost effective solutions to high risk problems identified through the risk analysis process.
- Ensuring the implementation of controls and procedures necessary to manage the risk identified through the risk analysis program.

Program Management

Department program managers have the following responsibilities in relation to CDC's risk management program:

- Establishing the procedures necessary to comply with risk management policy in relation to ownership, user and, if appropriate, custodian responsibilities.

- Ensuring the proper planning, development, and establishment of risk management processes and procedures for new computer-based systems and the files or data bases for which the program has ownership responsibility, and for new physical devices assigned to and located in the program area(s).

Program Personnel

Program personnel have the following risk management responsibilities:

- Implementing and monitoring data QA functions to ensure the integrity of data for which the program is assigned ownership responsibility.
- Complying with applicable federal, State, and Department risk management policies and procedures.
- Identifying information system vulnerabilities and informing program management and the ISO of those vulnerabilities.

Internal Auditors

Internal auditors have the following responsibilities in relation to the Department's risk management efforts:

- Examination of the Department's policies and procedures for compliance with State risk management policies.
- Examination of the Department's policies and procedures for compliance with control agency audit requirements.
- Examination of the effectiveness of the Department's policies and procedures, identification of inadequacies within the existing risk management program, identification of possible corrective actions, and informing management, the ISO, and the owners, custodians, and users of information of the findings.

QC

The designated responsible QC person/program has the following responsibilities in relation to the Department's risk management program:

- Review and evaluation of the risk management process used and its findings, to ensure the effectiveness of controls for automated ITS whether under design and development or operational, with particular emphasis on major systems.

Information Owners

The owners of information are responsible for classifying the information, filing security incident reports, securing and storing the signed security agreements, and identifying for the ISO the level of acceptable risk.

The owners of CDC information are identified in the system library document maintained by the MIS Support Unit.

Information users

It is the responsibility of all users to protect CDC resources, note variances from established procedures, and report such variances to the appropriate manager.

Information Custodians

The custodians of information are responsible for complying with applicable laws, policies, and procedures. It is also the responsibility of custodians to advise the owner and the ISO of any threats to the information, and notify the owner and the ISO of any violations of security policies, practices, or procedures.

49030.4 ITS--Risk Management Definitions

Audit Requirements

A section of the EDP audit reviews ITS documentation; each system not exempt from the audit requirements shall have an approved risk analysis report.

Critical Functions, System, and Resources

Elements vital to the organization's operation, and possibly to the continued, viable existence of the organization.

Current Risk

Current risks are evident and continuing, and are inherent to a business operation, location, or process.

Data Integrity

The state that exists when computerized data are the same as that in source documents and have not been exposed to accidental or malicious alteration or destruction.

Data Protection

Measures to safeguard data from occurrences that could lead to the modification, destruction, or disclosure of data.

Data Security

Protecting data from modification, destruction, or disclosure.

Potential Risk

Potential risk is outside normal and purposeful business operations, and results from some intentional or unintentional, indeterminate action.

Risk

Risk is a measure of the relative value attached to certain circumstances and conditions inherent in any business operation, or change to that operation. Risks are either current or potential.

Risk Analysis Content:**Technical Analysis**

For each risk scenario, specify the threat and potential safeguards/controls identified. Each control should be discussed along with its intended purpose and the types of threats it is effective against. If no safeguards are found, then a statement to that effect shall be provided.

Operational Analysis

Each control identified above shall be analyzed and its impact on current operations should be discussed. All operational constraints that would make the safeguard difficult or impractical to implement or operate shall be discussed. Risks that shall be accepted due to the operational unacceptability of their safeguards shall be identified here.

Economic Analysis

For all controls that are technically and operationally feasible, discuss the cost benefit.

Risk Acceptance Summary

Lists all risks, acceptable or unacceptable. If acceptable, then indicate the basis for acceptance.

Controls Summary

Presents the controls to be used for eliminating or reducing the risks identified in the risk acceptance summary. Each control shall be described in terms of its loss reduction or effect, as well as the primary and secondary threat categories against which the control is effective.

Countermeasures

Any type of procedure (e.g., physical, procedural, hardware, software and personnel) used to counteract a threat to the system.

Risk Analysis Management Report:**Summary**

A concise overview of the analysis. It shall begin with a statement describing the scope and objectives of the study, followed by the recommendations for risk acceptance and alternatives for reducing or eliminating the unacceptable risks.

Risk Scenario Summary

A summary of the essential data from the risk analysis.

Risk Management Process

Risk management is the work a manager does to identify the risk, assess its level, and create a plan for the acceptance, rejection, or control of the risk. This work is carried out by the application of a well-defined analytic process called "risk analysis," and culminates in a risk analysis report and risk reduction decision study.

Risk Analysis

Involves identifying the assets and resources that are at risk, as well as the threats to those assets and resources and the vulnerabilities in the risk environment that might allow the threats to materialize. Risk analysis also involves estimating the frequency with which the threats might occur, the safeguards currently in place, and the cost/impact that could be incurred if the threats to the risk environment were to materialize (this process correlates to the problem definition and analysis of the "current problem" steps in a generic systems approach).

Risk Reduction Analysis

Involves identifying the availability of potential safeguards, determining the operational and economic feasibility of potential safeguards, and developing a risk reduction decision study for presentation to management (this process correlates to the identification of alternatives, cost-benefit analysis, selection of best alternative, and conceptual system design phases of the generic systems approach).

Management Decision

Management decides which risks are acceptable. For those that are not currently acceptable, management decides which of the alternatives shall be implemented and approves the resources required to purchase, or design and develop, and then implement them (this process corresponds to the management decision phase of the generic systems approach).

Development of Risk Reduction Plans

Outlines the tasks to be performed to implement the safeguards selected by management. Tasks include identification of the specific safeguards, assignment of responsibility for design, development or purchase, and implementation of the safeguards. Plans shall also include a timetable of the milestones leading to implementation (this process corresponds to the detailed design and development/testing phases of the generic systems approach).

Implementation and Maintenance of Safeguards

Involves the installation, operation and maintenance of new or modified safeguards. Implementation shall involve personnel training and coordinating any changes in operations with affected personnel.

Vulnerability

Susceptibility of a system to a specific threat, attack or harmful event, or the opportunity available for a threat agent to mount such an attack.

Vulnerability Assessment

A review of a system or program to determine its susceptibility to loss or unauthorized use.

49030.5 ITS - Risk Management New System Requests

All requests for approval for new systems development shall indicate if the system is a critical application.

49030.6 ITS - Risk Management Critical Applications

All critical applications shall require a risk analysis. See DOM 49040, Procedures.

49030.7 ITS - Risk Management Other Systems

Revised April 16, 1993

A risk analysis shall be submitted to the Information Security Unit (ISU) for all systems that are non-critical applications but use one or more of the following:

- Telecommunications.
- Programs created or maintained by inmates.
- Inmates as keyboard operators.

These applications require a risk analysis approved by ISU prior to implementation.

The MIS Committee may direct that a risk analysis be carried out for any new system when deemed necessary.

49030.8 Risk Management Exemption for Inmate Use

Requests to ISU for an exemption from information security policy, as it pertains to inmates and computers shall be accompanied by a risk analysis. An exemption shall only be granted by the MIS Committee based upon the risk analysis and a recommendation by ISO.

49030.9 Revisions

Revised May 6, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this section are kept current and accurate.

GC § 1171.

DOM § 49040.

ARTICLE 47 — DISASTER RECOVERY PLANNING

Effective November 30, 1992

49040.1 Policy

It is the policy of the Department that each element of the Department utilizing information technology shall establish disaster recovery planning processes for identifying, assessing, and responding to the risks associated with its information assets. See the DOM 49010 for additional details.

49040.2 Purpose

The purpose of disaster recovery planning is to ensure continuity in computer operations for the support of critical applications, provide the greatest possible benefit from remaining limited resources, and achieve a systematic and orderly migration toward the resumption of all automation activities within the affected segment of the Department.

49040.3 Classification of Computers According to Type

The information assets of the Department are distributed over many geographically separated entities. However, any usage of computer resources in CDC will fall within one of four different types. The primary factors associated with each type represent the complexity and scope of operational use of the computer or system involved. In the context of this policy, "system" means a computer program and the computer resources necessary to achieve the objective of the program. It is possible for similar computers to be classified differently

depending upon the program being used. This is especially true in the inmate education area. DOM 47000 contains information on each of the critical systems utilized by the Department.

Type 1

Most of the large, Departmentwide computer systems are comprised of a computer at a central site, and a telecommunication network (phone lines) with terminals, printer, modems, and controllers located at a local site. Examples of this type of configuration include the OBIS, the Inmate Trust System, and the Personnel and Leave Accounting System.

Each of these systems would be affected by any disaster occurring within the data center or any disaster that would disrupt part or all of the communication lines. While the operational recovery of these systems is the data center's responsibility, each of the user sites shall have contingency plans ready to enable actions that minimize disruptions to business activities.

Type 2

The computer-based system is approved for departmental use and is to be implemented at all appropriate sites. This type of system can be found at many sites. These systems are not connected electronically. Each site uses the same programs to support the same work. Examples of Type 2 systems are the Critical Case Factor System and the microcomputer-based Inmate Appeals System: both of these are examples of stand-alone departmental ITS.

Type 3

This type of computer system is normally found at only one site. Type 3 systems are created because the multipurpose work station is available and there is an identified need.

Type 4

Type 4 systems are found only in the academic or vocational education areas. These systems are intended to be used strictly for the education of inmates.

49040.4 Responsibilities

The CDC approach to risk management requires that active support and ongoing participation be obtained from individuals representing multiple disciplines and all management levels. This includes the support of executive, program, and technical management, as well as owners, custodians, and users of the information.

Director

It is the responsibility of the Director to assure that the Department's information assets are protected from the effects of damage, destruction, and unauthorized or accidental modification, access, or disclosure. Specifically, the Director is responsible for ensuring the following:

- Enforcement of State-level operational recovery policies.
- Establishment and maintenance of internal policies and procedures that provide for the security of information technology facilities, software, and equipment, and the integrity and security of the Department's automated information.
- Department compliance with reporting requirements related to operational recovery.
- Preparation and maintenance of the Department's operational recovery plan, and the continuation of vital information support services in case of a disaster.
- Participation of management during the planning, development, modification, and implementation of operational recovery policies and procedures.

Information Security Officer

GC 1171 requires that the director of each State agency designate an Information Security Officer (ISO). The ISO is responsible for overseeing agency policies and procedures designed to protect the Department's information assets. In accordance with State policy, the ISO shall be responsible to the CDC Director for such responsibilities.

Additionally, to avoid conflicts of interest, the ISO shall not have direct responsibility for information processing, information access management functions, or any departmental computer based systems, or have a reporting relationship to an organization that has such responsibilities. The ISO shall not have any special allegiance or bias toward a particular program or organization.

The responsibilities of an ISO include overseeing the following:

- Development and maintenance of an operational recovery plan to protect the Department against the potential effects of a disaster.

- Establishment of procedures to comply with control agency reporting requirements relating to operational recovery.

Technical Management

Department technical management has the following responsibility relative to the Department's operational recovery program:

- Ensuring the implementation and maintenance of an operational recovery plan in cooperation with Department management, the ISO, and the assigned owners, users, and custodians of information.

Program Management

Department program managers have the following responsibilities in relation to the CDC security program:

- Establishing procedures necessary to comply with operational recovery policy pertaining to ownership, user, and, if appropriate, custodian responsibilities.
- Ensuring that operational recovery plans are in place for hardware, software, and files or data bases for which the program is assigned ownership responsibility.
- Ensuring that custodians of program information are provided the appropriate direction to implement the operational recovery plans that have been defined.
- Ensuring that procedures are established to comply with departmental operational recovery reporting requirements.

Internal Auditors

Internal auditors have the following responsibilities in relation to the Department's operational recovery planning efforts:

- Examination of the Department's policies and procedures for compliance with State policies.
- Examination of the Department's policies and procedures for compliance with control agency audit requirements.
- Examination of the effectiveness of the Department's policies and procedures; identification of inadequacies within the existing operational recovery programs, and identification of possible corrective actions.
- Provision of applicable findings to management, the ISO, and the owners, custodians, and users of information.

QC

The designated responsible QC person/program has the following responsibilities in relation to the Department's operational recovery program:

- Review and evaluation of the effectiveness of operational recovery plans for automated ITS, whether under development or operational, and with particular emphasis on major systems.

Information Owners

The owners of information are responsible for classifying the information, defining precautions for controlling access, disposing of the information, authorizing/denying access to the information, filing security incident reports, securing the signed security agreements and storing them for reference, and identifying (for the ISO) the level of acceptable risk.

The owners of CDC information are identified in the system library document maintained by the MIS-SU.

Information Users

It is the responsibility of all users to protect CDC resources, to note variances from established procedures, and to report such variances to the appropriate manager.

Information Custodians

The custodians of information are responsible for complying with applicable laws and policies, complying with policies and procedures established by the owner and the ISO, advising the owner and the ISO of any threats to the information, and notifying the owners and the ISO of any violations of security policies, practices, or procedures.

49040.5 Definitions

Application Disaster Recovery Plan

A plan devised to process an application after it has been disrupted for some period of time.

Back-up Procedures

Methods used to recover computer programs and files after a disaster or system failure.

Contingency Planning

The procedure of developing a back-up plan to restore business and data center operations in the event of a disaster or interruption. Also called "disaster recovery planning" or "business resumption planning."

Contingency Program

The everyday work activities and procedures (e.g., backing-up critical data files) that fulfill the requirements of recoverability.

Disaster

A human or natural occurrence causing destruction and distress, after which a business is deemed unable to function.

Disaster Recovery Operation

The act of recovering from the effects of disruption to a computer facility, and the pre-planned restoration of facility capabilities.

Disaster Recovery Plan

The preplanned steps that make possible the recovery of a business computer facility or the applications processed therein. Also called a "contingency plan" or "business resumption plan."

Emergency Response

The immediate action taken to protect hardware and sensitive magnetic media in the event of natural disasters, fire, power failures, equipment breakdown, theft, vandalism, or tampering.

49040.6 Disaster Recovery Planning-Critical Systems

Revised April 16, 1993

Department Operational Recovery Plan

The Department operational recovery plan shall cover a minimum of four topic areas:

- Summary of the strategy for managing disaster situations.
- Distinct management and staff assignment of responsibilities immediately following a disaster and continuing through the period of normal operations re-establishment.
- Priorities for the recovery of critical applications.
- Operational procedures documented in systematic fashion that shall allow recovery to be achieved in a timely and orderly way.

Type 1 and Type 2 Operational Recovery Plans

All Type 1 and Type 2 systems shall require an operational recovery plan that answers the following questions:

- Identification and evaluation of alternative recovery strategies.
- Selection of the alternative that best responds to the organization's requirements for disaster recovery.
- Assessment of the resource requirements (space, equipment, communications, data, software, personnel, and time) required for operational recovery of the critical application.

49040.7 ITS Disaster Recovery Coordinator (ISDRC)

The ITS Disaster Recovery Coordinator (ISDRC) for CDC is the computer operations section manager from ISD.

49040.7.1 Responsibilities of the ISDRC

Revised April 16, 1993

The ISDRC is responsible for maintaining a Department operational recovery plan that identifies computer applications deemed critical to the Department's operations, the information assets that are necessary for those applications, and the Department's plans for resuming operations following a disaster affecting those applications. The ISDRC shall coordinate the preparation of the operational recovery plan with the disaster recovery coordinator of the Institutions Division and with the CDC Data Center. The ISDRC is responsible for ensuring that periodic testing of the Department operational recovery plan is carried out.

49040.8 Submitting the Disaster Recovery Operational Recovery Plan

The CDC Disaster Recovery Coordinator shall file an informational copy of the Department operational recovery plan with the Office of Information Technology, DOF, no later than January 31 of each year. A copy of this plan shall be sent to the Teale Data Center.

49040.9 Approval of New Critical Department ITS

Revised April 16, 1993

Each request for approval to proceed with the development of a critical Department information system shall address the issue of the operational recovery of the system to be developed. All resource requirements associated with the operational recovery methods shall be identified as part of the critical ITS' cost.

Prior to the implementation of any critical system, project management shall submit to ISD a copy of the critical system's operational recovery plan for inclusion in the annual submittal to the control agency.

49040.10 Revisions

Revised April 16, 1993

The Chief, ISD, or designee shall be responsible for ensuring that the contents of this section are kept current and accurate.

49040.11 References

Revised April 16, 1993

GC § 1171.

DOM § 47000.

DOM § 49010.

ARTICLE 48 — ELECTRONIC DATA PROCESSING AUDITING

Revised April 16, 1993

49050.1 Policy

It is the policy of the Department to conduct EDP audit activities as required in the SAM and as is necessary to ensure maximum efficiency and productivity resulting from use of the Department's automated information resources. Such activities shall include a biennial EDP audit, as specified in this section, with a copy of each such audit provided to the Financial and Performance Audit Unit (FPA) of the DOF.

The biennial EDP audit report shall be structured to meet the requirements of SAM 20013, Review and Reporting on Computer-Based Systems, as well as the FPA audit guidelines, which provide evaluation criteria to determine the Department's compliance with the policies contained in SAM 4840 through 4845, and 4989.7. In addition, the departmental EDP audit process shall determine compliance with the policies contained in the DOM 49000, Information Security, Risk Management and Operational Recovery.

49050.2 Purpose

The purpose of this policy is to establish and maintain a standard of due care to prevent misuse or loss of Department information assets.

49050.3 Responsibility

PFAB shall be responsible for the biannual EDP audit.

49050.4 Types of EDP Auditing

There are four main types of audits:

Financial Audit

Determines the reliability and integrity of financial statements. Audit information is used generally by individuals other than management.

Compliance Audit

Ascertains compliance with specific policies, procedures, laws, regulations, or contracts affecting operations or reports.

Operational Audit

Usually includes a review of internal controls, compliance, integrity of operating information, use of resources, and achievement of goals.

EDP Audit

Combines both the compliance audit (specific EDP policies, procedures, etc.) and the operational audit; probes the integrity and reliability of computer processing and its contribution to operating information. EDP auditing can become very complex, since it is desirable to examine the controls within systems that are used to protect the integrity of data.

49050.5 Revisions

Revised May 6, 2010

The Assistant Secretary, EIS, or designee shall be responsible for ensuring that the contents of this section are kept current and accurate.

49050.6 References

SAM §§ 4840 - 4845, 4989.7, and 20013.

DOM § 49000.

ARTICLE 49 — SPECIAL SECURITY CONSIDERATIONS

Effective November 30, 1992

49060.1 Policy

It is the policy of the Department that the secure protection of EDP capabilities and information requires special resources and considerations when the

information involved is sensitive or confidential in nature. In such instances, augmented security measures shall be implemented

49060.2 Purpose

The purpose of this section is to clarify that, in addition to other EDP security policies and procedures contained in this manual, all CDC employees shall, where applicable, adhere to the security requirements of this section. This section outlines the responsibilities of the Department, Security Coordinator, and Security Monitors pertaining to certain personnel and payroll information.

49060.3 Responsibilities

Department

CDC shall appoint a departmental Security Coordinator from within the personnel/payroll office with responsibilities sanctioned by the SCO. A Security Monitor shall be appointed at each facility. The Security Coordinator and Security Monitors shall have access to the SCO system and database.

Security Coordinator

The Security Coordinator shall perform the following duties:

- Act as a liaison with the SCO decentralized Security Coordinator.
- Act as the security resource for all departmental personnel/payroll office employees and Security Monitors in facility personnel offices.
- Authorize, approve, and maintain security clearance requests (PSD Form 125A) on behalf of the SCO to determine whether an individual shall be granted access to the SCO database.
- Monitor all physical security elements and barriers to maintain the SCO's security requirements.
- Report all security infractions and violations to the SCO decentralized Security Coordinator and the CDC Information Security Officer (ISO).
- Coordinate activities associated with the movement, alteration, addition, or removal of approved equipment with the local information security coordinator and ISD.
- Monitor access to restricted areas within personnel units, and approve/disapprove the clearance of individuals requesting access to the decentralized personnel site.
- Maintain all records regarding individuals approved for access to the system, including all present and past Security Monitors. This information shall be provided to the Chief, SCO Information Security Office, and the SCO Division of Audits.

Security Monitors

Security Monitors are located in those facility personnel offices having access to the SCO database. Each Security Monitor shall adhere to the Department information security policy and, in addition, shall:

- Monitor all physical security elements and barriers to maintain SCO security requirements.
- Report all security infractions and violations to the Security Coordinator.
- Notify the Security Coordinator of all activities associated with the movement, alteration, addition, or removal of approved equipment.
- Monitor access to restricted areas, and approve/disapprove the clearance of authorized individuals requesting access to the decentralized site.

49060.4 Special Site Security Considerations

The sites of SCO computer equipment shall be kept secure (by means of locking devices, guards, badges or barriers) from unauthorized physical or visual access. The site shall be located in an area restricted from the public and unauthorized employees. Entry shall be monitored during work hours, and restricted areas shall be locked when unattended. Keys shall be distributed on a limited and controlled basis to authorized employees only.

Layout plans for equipment shall include the following:

Floor Plan

- The site layout shall include an analysis of employee work areas, the manner in which employees shall enter and exit the office, the location of SCO equipment, and the location and type of all locking devices and barriers.

Doors

- Doors shall be solid, locking, full or Dutch-style doors that are accessible only with the correct key or electronic key/badge. Doors shall remain closed and locked at all times.

Windows

- Interior windows shall be frosted or covered completely to eliminate visual access to the terminal screens. Exterior windows on a ground floor shall be frosted, covered, and secured if easily opened.

Locks

- Locks shall be installed on all interior and exterior doors allowing access to the secured area. Acceptable locks include, but are not limited to, the following:
 - Key-controlled locks.
 - Code-controlled locks.
 - Electronic locks.
 - Double-bolting locks Dutch doors.

Counters

- If a counter exists in the secured area, access into the work area shall be controlled and monitored. Records of approved access shall be maintained by the Security Monitor.

Changes To Site

Any changes to an approved, decentralized site require prior, written SCO approval. Requests for site changes shall include a diagram of the proposed site including the proposed location of equipment. Unauthorized movement of decentralized equipment may result in the loss of system access.

49060.5 Special Equipment Security Considerations

To ensure the security of SCO equipment and information, personnel employees shall adhere to the following equipment security guidelines:

- Equipment shall be located in restricted areas that are monitored during working hours and locked during any unattended periods.
- Only authorized employees shall have access to terminals, printers, control units and modems.
- System access shall be completely signed off when not in use.
- Terminals shall be locked, keys removed, and screen intensity turned completely down when the terminals are unattended.

The following shall be stored in a vault or locked cabinet when not in use:

- Keys to terminals.
- Manuals for system software and hardware.
- Other instructional and operational manuals.

No equipment shall be attached to any authorized configuration of decentralized equipment, except for testing and installation tools used by the vendor or telephone company.

Deviations from the requirements listed above shall have prior written approval from the SCO Security Coordinator.

Equipment Changes

The following types of changes to the SCO decentralized system require prior, written approval from the Security Coordinator:

- Changes of any kind to the location of decentralized equipment.
- Switching of terminals from one control unit to another.
- Any additions or removals of decentralized equipment.

49060.6 Special Data Security Considerations

Personnel employees shall consider all information residing in the SCO database as sensitive and confidential, and shall protect information from unauthorized access.

Hardcopy

Employees shall consider all data hardcopy (including printouts) gained from the SCO system as confidential, and shall handle and destroy hardcopy accordingly. The various user manuals provided by the SCO contain confidential access instructions and shall be stored in a vault or locked cabinet when not in use.

Authorized Personnel

Access to information provided through the SCO system is restricted to authorized personnel. Only the following persons shall be considered authorized personnel:

A state employee or bona fide representative of the SCO who:

- Demonstrates either a need for or a legal right to the information;
- Receives formal authorization from the security coordinator; and,
- Accepts legal responsibility for preserving the security of the information.

Persons who require access to the SCO system shall demonstrate the need for such access by defining their specific, relevant duties. Any change in these duties requires a reevaluation of the need for access.

Access shall be revoked if the need for access no longer exists.

User Identification

Each person authorized to access the SCO system shall be provided with a unique user identification (ID). Requests for a new user ID or an ID revocation shall be directed to the Security Coordinator.

CDC employees are required to read SCO's Security Guidelines and sign the PSD Form 108, Statement of Understanding, prior to receiving access to SCO. New IDs and ID revocations are recorded on the PSD Form 125A.

Passwords

Access to the SCO system is restricted through the use of passwords. Use of any user ID also requires the associated password, known only to its owner. Passwords shall be changed monthly.

To protect system security, the ID owner shall not:

- Reveal the password to anyone.
- Write the password on any media.
- Walk away from an active terminal session; users shall log off the system prior to leaving.
- Log on in order to provide access or allow use by any unauthorized person.
- Use an obvious password, such as the owner's nickname, or any other easily identifiable password.

If a password does not operate correctly and the ID owner is sure that the correct password has been used, the owner shall notify the Security Coordinator immediately.

An ID owner who has forgotten the password shall contact the SCO Information Security Office.

Anyone who suspects that a password has been compromised shall notify the Security Coordinator immediately.

49060.7 Revisions

Revised April 16, 1993

The Chief, ISD, or designee shall be responsible for ensuring that the contents of this section are kept current and accurate.

CHAPTER 5 — ADULT CUSTODY AND SECURITY**OPERATIONS****ARTICLE 1 — PEACE OFFICER AUTHORITY***Revised February 29, 2009***51010.1 Policy**

It is the policy of the California Department of Corrections and Rehabilitation (CDCR) to ensure that CDCR peace officer authority comports with applicable State statutes, regulation and mutual aid agreements.

51010.2 Purpose

The purpose of this Article is to clarify CDCR peace officer authority as it relates to inmates, parolees, and California law enforcement requests for assistance.

51010.3 Peace Officer Authority

CDCR peace officer authority is outlined in Penal Code (PC) Sections 830.2(d)(1) & (2) and PC 830.5. While normal CDCR peace officer authority applies generally to custody of inmates either inside or outside of a CDCR facility (e.g. escape pursuit and transportation/hospital custody, etc.) and parolees, appropriately trained and equipped CDCR peace officers can be authorized to act outside of normal duties during emergency and non-emergency situations as specified by law.

A CDCR peace officer has authority that extends to any place in the State while engaged in the performance of the duties of his/her respective employment and for the purposes of carrying out the primary function of his/her employment or as required under Sections 8597, 8598, and 8617 of the Government Code (GC).

51010.4 Emergency Assistance

When a government agency (city, county, state, federal) makes an emergency mutual aid request that meets the criteria contained in the State Mutual Aid Plan or the Law Enforcement Mutual Aid Plan, response protocol provided in these plans shall be followed.

GC Section 8597 authorizes that when the appropriate state official proclaims a state of emergency or when a state of war emergency exists, PC Section 830.5 CDCR peace officers have full powers and authority as outlined in PC Section 830.1. Criteria for activation of these plans include, but are not limited to, disasters which may result from flood, fire, earthquake, war, sabotage, or riots.

GC Section 8598 authorizes that when a local emergency exists, PC Section 830.5 peace officers have full powers and authority as outlined in PC Section 830.1.

When acting as peace officers under PC Section 830.1, CDCR peace officers are authorized to exercise any powers which are appropriate or which may be directed by their superior officers.

51010.5 Non-Emergency Assistance (General Law Enforcement Assistance)

GC Section 8617 provides that the CDCR may exercise non-emergency mutual aid powers in accordance with the Master Mutual Aid Agreement and local ordinances, resolutions, agreements, or plans.

51010.6 Provision of Assistance in Emergency and Non-Emergency Situations

CDCR hiring authorities (e.g. Wardens, Regional Parole Administrators) are authorized to provide CDCR peace officer assistance to law enforcement agencies in emergency and non-emergency situations as consistent with the authority discussed herein. Hiring authorities will notify their supervisors of provision of assistance (e.g. Wardens will notify their Associate Directors). Specially trained and equipped peace officers include, but are not limited to, Crisis Response Team members and Emergency Operations Unit personnel conducting tactical and negotiation operations, and Investigative Services Unit members conducting investigative operations, and should be deployed as appropriate for the particular circumstances.

When CDCR peace officers are assigned to provide emergency or non-emergency law enforcement assistance, these tasks become the primary function of their employment for the duration of the assignment. Unless other agreements have been made, all costs associated with this assistance are the responsibility of the CDCR.

51010.7 Revisions

The Assistant Secretary, Office of Correctional Safety, shall ensure that the content of this Article is current and accurate.

51010.8 References

PC §§ 830.1, 830.2(d)(1) & (2).

GC §§ 8597, 8598, & 8617.

ARTICLE 2 — USE OF FORCE*Revised January 12, 2016***51020.1 Policy**

It is the policy of the California Department of Corrections and Rehabilitation's (CDCR), Division of Adult Institutions (DAI), to accomplish custodial and correctional functions with minimal reliance on the use of force. Employees may use reasonable force as required in the performance of their duties, but shall not use unnecessary or excessive force. Staff may, at any point, determine the situation can be resolved without the use of force and terminate the use of force process.

This policy, in conjunction with related procedures and training, defines staff responsibilities and requirements concerning the use of force.

This policy will assist staff in identifying when and how much force is appropriate under different circumstances, ensure that supervision, monitoring, and evaluation of the use of force is consistent with procedures and training, and ensure the investigation of possible unnecessary or excessive use of force. Staff found culpable of violations of the Use of Force Policy will be subject to disciplinary (preventive, corrective, or adverse action) procedures.

51020.2 Purpose

The purpose of this Article is to outline DAI's procedures pertaining to the use of force, as set forth in CCR, Title 15, Section 3268.

51020.3 Responsibility

It is the responsibility of all employees to understand and comply with the Use of Force policy, related procedures, ongoing training, and applicable law.

It is the responsibility of each Institution Head:

- To ensure that all employees receive appropriate training annually and understand the Use of Force policy and procedures, including both the application of force and subsequent reporting and documentation requirements.
- To record and track all training and discipline related to the use of force.

51020.4 Definitions

The following shall define language usage in this Article:

Reasonable Force

Reasonable force is the force that an objective, trained, and competent correctional employee faced with similar facts and circumstances, would consider necessary and reasonable to subdue an attacker, overcome resistance, effect custody, or gain compliance with a lawful order.

Unnecessary Force

Unnecessary force is the use of force when none is required or appropriate.

Excessive Force

Excessive force is the use of more force than is objectively reasonable to accomplish a lawful purpose.

Immediate Use of Force

Immediate use of force is the force used to respond without delay to a situation or circumstance that constitutes an imminent threat to institution/facility security or the safety of persons. Employees may use immediate force without prior authorization from a higher official.

Immediate force may be necessary to subdue an attacker, overcome resistance or effect custody.

If it is necessary to use force solely to gain compliance with a lawful order, controlled force shall be used.

Imminent Threat

An imminent threat is any situation or circumstance that jeopardizes the safety of persons or compromises the security of the institution, requiring immediate action to stop the threat. Some examples include, but are not limited to: an attempt to escape, on-going physical harm or active physical resistance.

Controlled Use of Force

A controlled use of force is the force used in an institution/facility setting, when an inmate's presence or conduct poses a threat to safety or security and the inmate is located in an area that can be controlled or isolated. These situations do not

normally involve the imminent threat to loss of life or imminent threat to institution security. All controlled use of force situations requires the authorization and the presence of a First or Second Level Manager during business hours. During non-business hours, the on-site manager shall be the Administrative Officer of the Day (AOD) who is responsible for the authorization of any controlled use of force and whose presence is required during any controlled use of force. Staff shall make every effort to identify disabilities, to include mental health issues, and note any accommodations that may need to be considered.

Non-conventional Force

Non-conventional Force is force that utilizes techniques or instruments that are not specifically authorized in policy, procedures, or training. Depending on the circumstances, non-conventional force can be necessary and reasonable; it can also be unnecessary or excessive.

Non-deadly Force

Non-deadly force is any use of force that is not likely to result in death.

Deadly Force

Deadly force is any use of force that is likely to result in death. Any discharge of a firearm other than the lawful discharge during weapons qualifications, firearms training, or other legal recreational use of a firearm, is deadly force.

Great Bodily Injury (GBI)

Great bodily injury is any bodily injury that creates a substantial risk of death.

Serious Bodily Injury

Serious bodily injury means a serious impairment of physical condition, including, but not limited to the following:

- Loss of consciousness;
- Concussion;
- Bone fracture;
- Protracted loss or impairment of function of any bodily member or organ;
- A wound requiring extensive suturing; and
- Serious disfigurement.

Response Supervisor

The Response Supervisor is the first line supervisor in an institution/facility responsible for the area where an incident occurs. When responding to or observing an incident involving the use of force, the response supervisor shall assume control of the responders and direct the tactics used to stop the threat. Additionally, the response supervisor shall assess the appropriateness/effectiveness of the force options being deployed, ensuring compliance with policy and training.

Responding Supervisor

The Responding Supervisor is the first line supervisor responsible for the employee involved in an incident.

Incident Commander

The Incident Commander is the second line supervisor in an institution/facility responsible for the area where an incident occurs or an allegation of excessive or unnecessary force is received.

First Level Manager

A First Level Manager in an institution/facility is a Captain, or the AOD.

First Line Manager

A First Line Manager is a Parole Administrator, District Administrator, Special Agent-In-Charge, or a Senior Special Agent.

Second Level Manager

A Second Level Manager in an institution/facility is an Associate Warden.

Second Line Manager

A Second Line Manager is a Deputy Regional Parole Administrator or Chief.

Institution Head

The Institution Head is a Warden or designee.

Institutional Executive Review Committee (IERC)

The IERC is a committee of institution staff chaired by the respective Institution Head tasked with reviewing all uses of force and every allegation of excessive or unnecessary force. The IERC is the final institutional level of review.

Department Executive Review Committee (DERC)

The DERC is a committee of staff selected by, and including, the Associate Director who oversees the respective institution/facility Mission-based group. The DERC has oversight responsibility and final review authority over the IERC. The DERC shall review every use of deadly force and every serious bodily injury, great bodily injury or death that could have been caused by a staff use of force. The DERC shall also review those incidents referred to the DERC by the IERC Chairperson or otherwise requested by the DERC.

Deadly Force Investigation Teams (DFIT)

DFIT is a team of trained department investigators that shall conduct criminal and administrative investigations into every use of deadly force and every death or great bodily injury that could have been caused by a staff use of force, except the lawful discharge of a firearm during weapons qualifications or firearms training, or other legal recreational uses of a firearm. Based on certain local Memoranda of Understanding, criminal investigations may instead be conducted by an outside police department or sheriff's office. Although defined as deadly force DFIT need not investigate the discharge of a warning shot inside an institution/facility if an Investigative Services Unit Sergeant or above, or an uninvolved Correctional Lieutenant, confirms that the discharge of deadly force was a warning shot and that no injuries were caused by the shot. All warning shots shall be reported to the Office of Internal Affairs/DFIT and the Office of the Inspector General (OIG).

Deadly Force Review Board (DFRB)

The DFRB conducts a full and complete review of all incidents involving a use of deadly force (except warning shots) and every death or great bodily injury that could have been caused by a staff use of force, regardless of whether the incident occurs in an institutional or community setting.

Joint Use Committee (JUC)

The JUC is a committee of field staff from the DAI tasked with reviewing and evaluating recommended revisions to the Division's Use of Force Policy and Procedures.

Holding Cells

All holding cells shall be located within buildings or sheltered areas. A holding cell shall not be used as a means of punishment, housing or long-term placement. If clothing is taken from an inmate when they are placed in a holding cell, alternate clothing shall immediately be provided unless security concerns preclude issuance.

51020.5 Use of Force Options

It is the expectation that staff evaluate the totality of circumstances involved in any given situation, to include consideration of an inmate's demeanor, bizarre behavior, mental health status if known, medical concerns, as well as ability to understand and/or comply with orders, in an effort to determine the best course of action and tactics to resolve the situation. Whenever possible, verbal persuasion should be attempted in an effort to mitigate the need for force. The type of verbal persuasion will vary dependent upon the inmate's ability to understand. If time permits, verbal orders should be issued prior to resorting to force and are required to be provided before controlled force is used. The unresisted searching or escorting of an inmate/parolee and the unresisted application of authorized restraint equipment is not a use of force. Use of Force options do not have to be utilized in any particular sequence, but should be the force option staff reasonably believes is sufficient. Each force option has specific qualities that should be considered when choosing which option to deploy, including but not limited to: range of effectiveness, level of potential injury, staff safety, deployment methodology, level of threat presented, distance between staff and inmate, number of staff and inmates involved and the inmate's ability to understand. When responding to or observing an incident involving the use of force, the response supervisor shall assume control of the responders and direct the tactics used to stop the threat. Additionally, the response supervisor shall assess the appropriateness/effectiveness of the force options being deployed ensuring compliance with policy and training. Use of force options include but are not limited to:

- Chemical agents: Provides staff the ability to use force while maintaining distance.
- Hand-held batons: The baton is normally issued to custodial staff assigned to positions with direct inmate contact. The baton should not be carried in the extended position unless it is being utilized for the protection of the inmate and/or staff. In controlled use of force, the baton is intended for the defense of staff and to assist in gaining control of the inmate.
- Physical strength and holds: Any deliberate physical contact, using any part of the body to overcome conscious resistance, is considered physical force. A choke hold or any other physical restraint which prevents the person from swallowing or breathing shall not be used unless the use of deadly force would be authorized.

- **Less-lethal weapons:** A less lethal weapon is any weapon that is not likely to cause death. A 37mm or 40mm launcher and any other weapon used to fire less-lethal projectiles is a less lethal weapon.
- **Lethal weapons:** A firearm is a lethal weapon because it is used to fire lethal projectiles. A lethal weapon is any weapon that is likely to result in death.

51020.6 Use of Restraints

The unresisted application of authorized restraint equipment is not a use of force. When mechanical restraint is required, handcuffs, alone or attached to a waist chain, will be the means of restraint normally used. However, additional mechanical restraints, including leg restraints, additional chains, leather cuffs, or other specialized restraint equipment may be used when the circumstances indicate the need for the level of control that such devices will provide. Restrained inmates shall never be left unsupervised.

Use of mechanical restraints on persons confirmed, or suspected by health care staff to be pregnant shall be subject to the following requirements found in California Code of Regulations (CCR) Title 15 Sections 3268.2 (d) and (e):

- No leg restraints or waist chains shall be applied.
- If handcuffs are applied, the person's arms shall be brought to the front of her body for application.

Mechanical restraints shall not be placed on an inmate during labor, including during transport to a hospital, during delivery, and while in recovery after giving birth, unless circumstances exist that require the immediate application of mechanical restraints to avoid the imminent threat of death, escape, or great bodily injury. In this case, mechanical restraints may be used only for the period during which such threat exists.

The following state-issued restraints and equipment are authorized for use at the discretion of on-duty staff:

- Handcuffs
- Waist Chain
- Leg Restraints
- Escort Chains
- Padlocks
- Security Chain
- Spit Hood
- Martin Chain

The following restraints may be used as specified below:

- **Safety Triangle:** This device is a handcuff retention device, used to prevent inmates from pulling restraint equipment into their cell and may be used at the discretion of on duty staff. Some reasons for using the safety triangle include, but are not limited to: rehousing an irate inmate who has threatened violence or an inmate who was just involved in a use of force incident. The safety triangle may remain attached to the handcuffs if the inmate is being relocated in the housing unit and if attaching and detaching the safety triangle to and from the handcuffs presents a safety concern. The safety triangle is not intended to control the inmate outside of the cell. The officer controlling the safety triangle must be vigilant and efforts should be directed to prevent the inmate from pulling their hands inside the cell while the door is being closed.
- In the event that an inmate who is attached to a triangle refuses to place their hands in the food/security port to allow the handcuffs to be removed, it may be necessary to pull the safety triangle to retrieve the handcuffs. When it is necessary to pull the safety triangle, a single staff member shall slowly move away from the door while holding onto the safety triangle, in order to bring the inmate's hands through the port. This will be conducted with extreme caution in order to minimize the risk of injury to the inmate. Additional staff may be needed to assist with the safety triangle in the event that the one staff member is insufficient to get the inmate's hands through the food port. Once the inmate's hands, wrists, and forearms are through the port, staff will grasp the inmate's forearms, the tension on the safety triangle shall be released, and the handcuffs removed.

Prior to using a safety triangle on an inmate confirmed or suspected by health care staff to be pregnant, a physician must be consulted and any potential risks fully discussed.

The final decision to place the device on the pregnant inmate will rest with the Warden or Chief Deputy Warden (CDW) and the reviewing physician. The consultation and its outcome must be documented for inclusion in the inmate's health record and central file.

- **Leather Restraints:** Leather restraints are used for four/five point restraint in a Correctional Treatment Center, General Acute Care Hospital, or community hospital. Authorization for application of four/five point restraints shall only be given by health care staff in accordance with California Code of Regulations, Title 22, Section 79801 Clinical Restraint, Treatment Restraint, and Clinical Seclusion, and the Mental Health Program Services Delivery System Program Guide, Chapter 10, Suicide Prevention and Response. Use of restraint equipment at the direction of medical staff shall be fully documented in the inmate's health record.
- **Hand Isolation Devices (HID):** These devices (e.g., hand restraint mitt/mittens, etc.) are used as an additional measure to restrict an inmate's ability to use his/her hands. HIDs may be used upon initial placement on Contraband Surveillance Watch (CSW) at an institution when requested and authorized as specified in DOM Section 52050.23.4, Mechanical Restraints. Only HIDs purchased from an approved vendor shall be used. Inmates in HIDs must have constant and direct visual supervision at all times. When it is deemed necessary by on duty staff to implement the use of a HID subsequent to the initial placement on CSW, a CDC Form 128-B, General Chrono, will be completed stating a specific safety and security concern associated with the individual inmate, and included with the CSW documentation. The subsequent approval shall be at the level of Lieutenant or above, and approved at the level of Captain or above during business hours, or by the institution AOD during nonbusiness hours. The CDC Form 128-B will include: the date of implementation, reason or justification for implementation of the device, and staff requesting and approving the HID implementation. Prior to placing a HID on an inmate confirmed, or suspected by health care staff to be pregnant, a physician must be consulted and any potential risks fully discussed. The final decision to place the device on the pregnant inmate will rest with the Warden or CDW and the reviewing physician. The consultation and its outcome must be documented for inclusion in the inmate's health care record and central file. Equipment Hygiene - HIDs must be maintained per the manufacturer's specifications, and only clean HIDs are to be used. Should a HID become contaminated or soiled, a clean HID will be provided as soon as it is safe to do so.

Mechanical restraint equipment shall not be used in any manner described in CCR, Title 15, Section 3268.2(c), Use of Restraints. The use of restraint equipment not identified in this section must be preapproved at the level of Associate Director or higher. As part of the mechanical restraint maintenance process, restraints shall be routinely cleaned and sanitized to adhere to an acceptable equipment hygiene standard.

Inmates who have a disability that prevents standard search methods or application of restraint equipment in the prescribed manner shall be afforded reasonable accommodation under the direction of the Response Supervisor. Mechanical restraints shall be applied to ensure effective application while reasonably accommodating the inmate's disability.

51020.7 Deadly Force

The CDCR recognizes the sanctity of human life. Therefore, deadly force will only be used when it is reasonably necessary to:

- Defend the employee or other persons from an imminent threat of death or great bodily injury.
- Prevent an escape from custody.
- Stop acts such as riots or arson that constitute an immediate jeopardy to institutional security and, because of the magnitude, are likely to result in escapes, great bodily injury, or the death of other persons.
- Dispose of seriously injured or dangerous animals when no other disposition is practical. (CDCR operates facilities that maintain livestock or are situated in remote areas, therefore CDCR recognizes this need.)

A firearm shall not be discharged if there is a reason to believe that persons other than the intended target will be injured.

In facilities contracted to house CDCR inmates outside of California, the use of deadly force shall only be applied in accordance with applicable law in the state where the facility is located.

51020.7.1 Warning Shots

A warning shot discharged from a lethal weapon is deadly force. Firearms may be discharged as a warning only in the safe area of an institutional/facility setting, and only when the use of deadly force is warranted.

51020.8 Non-deadly Force

Non-deadly force will only be used when reasonably necessary to:

- Subdue an attacker.
- Overcome resistance.
- Effect custody, or to
- Gain compliance with a lawful order.

51020.9 Medical Evaluation

When force is used, a medical evaluation shall be provided as soon as practical.

51020.10 Application of Force

Employees may use force in circumstances that require immediate action in response to an imminent threat, or in circumstances that require a controlled use of force. Any application of force, whether immediate or controlled, must be reasonable and in accord with the applicable standards for deadly or non-deadly force.

51020.11 Immediate Use of Force

When time and circumstances do not permit advanced planning, staffing and organization, and an imminent threat exists to institution/facility security or safety of persons, immediate force may be used.

If time and resources allow, an immediate use of force should be video recorded. If an immediate use of force is recorded, the recording shall be submitted into evidence.

If an immediate use of force is captured on security cameras (i.e. yard or visiting cameras), those recordings shall be placed into evidence.

51020.11.1 Immediate Use of Force in Cells

When immediate force is necessary due to an imminent threat, for inmates confined in their cells, Oleoresin Capsicum (OC) is the preferred option for carrying out the immediate use of force. Whenever possible, a verbal warning shall be given before force is used.

51020.11.2 In-Cell Assaults

Unit staff discovering an in-cell assault shall sound an alarm and order the inmates to stop fighting. If the inmates continue to fight or one inmate continues to assault the other, staff are authorized to use chemical agents to stop the incident.

The cell door should not be opened until sufficient staff is present to evaluate the situation. At least two officers shall be present, prior to the door being opened.

The on-scene staff may use their discretion to order the opening of the cell without both inmates restrained in handcuffs. This discretion would apply in the event of incapacitating injuries, illness, or overriding security concerns.

Should the use of chemical agents fail to stop the incident, the supervisor shall order the assembly of a controlled use of force team and immediate physical force may be used to extract the inmates from the cell. While the team is being formed, at least one staff member shall remain at the cell to continue observation of the incident for documentation purposes.

51020.11.3 Food/Security Ports

If during routine duties, correctional officers encounter an inmate who refuses to allow staff to close and lock the food/security port:

The officer shall verbally order the inmate to relinquish control of the food port and allow staff to secure it.

If the inmate relinquishes control of the food/security port, it will be secured.

In the event the inmate does not relinquish control of the food port, the officer shall back away from the cell and contact and advise the custody supervisor of the situation. Controlled force may be initiated in accordance with DOM Section 51020.12, while custody staff continues to monitor the inmate.

51020.12 Controlled Use of Force General Requirements

When force is necessary but does not involve an imminent threat to subdue an attacker, effect custody or to overcome resistance, the force shall be controlled.

The controlled Use of Force involves advance planning, staffing and organization. A controlled use of force requires authorization and the presence of a First or Second Level Manager, or an AOD (on-site manager) during non-business hours. The on-site manager is ultimately responsible for the controlled use of force incident. The Incident Commander shall supervise the controlled use of force process. The Response Supervisor shall direct the controlled use of force team.

Once a situation exists that may result in a controlled use of force, a custody staff member shall remain at the location to monitor the inmate and continue to attempt to gain compliance from the inmate through attempts at verbal persuasion until the controlled use of force team arrives and the staff member is relieved by the Incident Commander to resume their regular duties. The custody staff member will be positioned as close as possible to the affected location, without jeopardizing their own safety.

All controlled uses of force shall be preceded by a cool down period to allow the inmate an opportunity to comply with custody staff orders. The cool down period shall include clinical intervention (attempts to verbally counsel and persuade the inmate to voluntarily exit the area) by a licensed mental health practitioner and may include similar attempts by custody staff if authorized by the on-site manager. This intervention shall take place for all inmates and is not limited to participants in the Mental Health Services Delivery System.

During the cool down period:

- Licensed Nursing Staff (LNS) (i.e., Registered Nurse (RN), Licensed Vocational Nurse, and Psychiatric Technician) shall review the inmate's health record for medical conditions which put the inmate at increased risk for adverse outcome from the use of chemical agents and/or physical force. In addition the LNS shall review the health record for any known disabilities that will require accommodation during the controlled use of force. For inmates housed in an inpatient setting the Inpatient RN shall conduct the review. For all other inmates the review shall be conducted by the Triage and Treatment Area RN.
- If the licensed mental health practitioner is not the treating clinician, they shall review the inmate's health record to determine if the inmate has any previous or current mental health issues. The licensed mental health practitioner shall use that information along with information gained during the clinical intervention to advise the on-site manager of any mental health issues that impact the inmate's ability to understand orders, make it difficult for the inmate to comply with orders, or could lead to a substantial risk of decompensation.

If it is determined the inmate does not have the ability to understand orders, chemical agents shall not be used without authorization from the Warden, Chief Deputy Warden or AOD. Any decision to proceed with the use of chemical agents shall be documented, along with the details of the underlying reasons to proceed, and the outcome. When serious circumstances exist, calling for extreme measures to protect staff or inmates, (i.e., the inmate may be armed with a deadly weapon) the Warden, Chief Deputy Warden or AOD may authorize use of chemical agents when the inmate does not have the ability to understand orders.

If it is determined an inmate has the ability to understand orders but has difficulty complying due to mental health issues, or when a licensed mental health practitioner believes the inmate's mental health issues are such that the controlled use of force could lead to a substantial risk of decompensation, a licensed mental health practitioner shall propose reasonable strategies to employ in an effort to gain compliance. Some strategies to consider may include, but are not limited to: verbal persuasion, positive behavior modification, and/or other de-escalation/intervention techniques by the licensed mental health practitioner, or engaging additional clinicians that have an established rapport with the inmate. If the efforts are not successful, it may be necessary for the controlled use of force to proceed. Chemical agents shall not be used without authorization from the Warden, Chief Deputy Warden (or AOD during non-business hours).

The cool down period may also include use of other available resources/options such as dialogue via religious leaders, correctional counselors, correctional officers and other custody and non-custody staff that have an established rapport with the inmate. The on-site manager and licensed mental health practitioner shall collaborate on efforts to be made during the cool down period. The length of the cool down period can vary depending upon the circumstances, but should be allowed to continue until all reasonable interventions have been attempted, or an imminent threat exists.

When the on-site manager and licensed mental health practitioner together determine that reasonable efforts have been exhausted, the cool down period will end and the controlled use of force will be initiated.

If there is disagreement among the collaborative team members (medical, nursing, mental health and custody) regarding the strategies to be employed, or length/termination of the cool down period, the issue shall be elevated to the appropriate clinical and custodial managers up to and including the Chief of

Mental Health (or designee), Chief Medical Executive (or designee), and Warden or Chief Deputy Warden.

In the event the disagreement is not resolved at the institution level, the issue shall be elevated to the Regional Administrators (Mental Health and Medical), and the appropriate Associate Director.

The Incident Commander shall document the start time and duration of the cool down period on the CDCR 837-A/A1.

During the cool down period, a tactical plan for the potential controlled use of force will be developed by the Incident Commander in collaboration with the Response Supervisor and on-site manager, with input from the LNS and a licensed mental health practitioner. During the collaboration, the possible use of chemical agents, physical force, or other approved force options that may be used to complete the lawful objective will be discussed utilizing their collective knowledge, training, and experience, as well as an evaluation of the totality of circumstances.

General circumstances to consider include but are not limited to:

- The inmate's current demeanor, (i.e., verbal vs. physical aggression / passive vs. active resistance).
- Prior incidents of violence toward staff.
- The safety of inmates and staff.
- Possession of a weapon.
- The use of barriers, barricades or a personal barrier (i.e., cloth or plastic placed about the inmates face and head).
- The inmate's actions during any prior controlled uses of force.
- Physical design of the cell.
- The location of cell with regard to cross contamination (i.e., OHU/CTC/PIP/PSU, open cell front).
- Effective communication needs as identified by the Disability and Effective Communications System (DECS).
- Input from the assigned housing unit staff.

Health care concerns to consider include but are not limited to:

- Current medical health.
- Current and prior mental health issues.
- The inmate's ability to understand orders or difficulty complying with orders due to mental health issues.
- Potential for substantial risk of decompensation.
- Developmental/intellectual disabilities.

A decision to use chemical agents for the extraction should be based on more than passive resistance to placement in restraints or refusal to follow orders. If the inmate has not responded to staff for an extended period of time, and it appears that the inmate does not present an imminent physical threat, additional consideration and evaluation should occur before the use of chemical agents is authorized.

Based on the collaborative effort, the tactical plan will be finalized and approved by the on-site manager.

A controlled use of force shall not be accomplished without the physical presence of LNS. The LNS shall be in close proximity to the incident to facilitate an immediate medical response, but not so near as to become involved in the controlled use of force. The LNS is not required to don controlled use of force team equipment such as a helmet, Personal Protective Equipment kit, etc. Prior to commencing with the controlled use of force, the Incident Commander shall ensure the LNS is in possession of the appropriate medical supplies and equipment to respond to a medical emergency. The LNS who reviewed the health record and the LNS that is on-site during the controlled use of force is not required to be the same person.

51020.12.1 Controlled Use of Force Without Extraction

Not all controlled use of force situations are conducted to remove an inmate from a cell or other location. Controlled use of force may also be used to administer medications (PC 2602), provide medical treatment, or to complete mandated testing (i.e., TB testing, DNA, etc.) When circumstances are such that a controlled use of force is considered within a cell, on-duty health care staff shall ensure medical authorization for the involuntary medication exists. Health care staff shall also consult with the treating psychiatrist, primary care provider or mid-level provider, if available, to verify the current and critical need for involuntary medication or treatment. If the treating psychiatrist, primary care provider or mid-level provider is not

available, the physician or psychiatrist on call shall be consulted. Health care staff shall advise the Incident Commander of such prior to the application of controlled use of force procedures. In these circumstances a controlled use of force team may enter the cell, physically restrain the inmate while medications/treatment are administered, and exit the cell.

The Incident Commander shall determine what, if any, safety equipment to be utilized (as identified in 51020.12.2). The decision shall be based on the totality of circumstances to include, but not be limited to:

- The inmate's current demeanor (passive resistance vs. physical aggression).
- Prior incidents toward staff.
- The inmate's actions during prior controlled use of force incidents.
- Current medical health.
- Current mental health.
- Specific purpose of the controlled use of force.

These incidents shall be video recorded; therefore, a video camera with backup videotape or media and backup batteries is required.

51020.12.2 Extractions

An extraction is the involuntary removal of an inmate from an area and usually occurs when the inmate is in a confined area such as a cell, holding cell, shower, or small exercise yard.

Extractions can be conducted as a controlled or immediate use of force. Except in the case of an imminent threat, extractions shall take place in a controlled manner. Controlled extractions occur when no imminent threat exists but an inmate's refusal to comply with orders and presence in a cell, yard, or other previously identified location poses a threat to safety and security, or disrupts the normal operation of the housing unit, facility, or institution.

Immediate extractions occur when an imminent threat exists. Some examples of when an immediate extraction may be necessary are: to prevent or stop, great bodily injury and/or serious bodily injury, attempted suicide, self-harm, in-cell assault, or for medical concerns such as an inmate who is non-responsive, convulsing, or seizing.

The presence of supervisors, managers or health care staff is not required to conduct an immediate extraction.

If a controlled extraction becomes necessary, extraction team members shall be issued extraction equipment:

- Riot helmet with protective face shield, protective vest, respirator, elbow and shin protectors, gloves, Kevlar neck protector, and blood borne pathogen protective suit.
- Protective shield, approximately 22" wide and 48" long.
- Hand-held baton(s), handcuffs, and leg restraints.
- Video camera(s) with a backup videotape or media and back up batteries.

If an immediate extraction in a Security Housing Unit/Administrative Segregation Unit becomes necessary, extraction team members shall be issued extraction equipment:

- Riot helmet with protective face shield, and protective vest.
- Protective shield, approximately 22" wide and 48" long.
- Hand-held baton(s) and handcuffs.

The blood borne pathogens protective suit can be used in an immediate extraction if needed. The suit is not required if bodily fluids are not present in sufficient quantities which present a threat to staff.

The blood borne pathogens protective suits, riot helmets, and protective shields are to be stored in locations that are readily accessible to the staff responding to conduct an immediate cell extraction so as not to delay entry/response.

Prior to a controlled extraction, the Response Supervisor or Incident Commander shall ensure that the members of the extraction team do not include any staff member who was directly involved in the incident precipitating the need for extracting the inmate.

The Incident Commander will ensure the Response Supervisor and extraction team members clearly understand their roles, appropriate signals, and are familiar with the departmental use of force policy.

A briefing, including possible tactics to be used, shall be given to the extraction team by the Response Supervisor and/or Incident Commander. This briefing shall not be video recorded and should be completed away from the presence of any inmates.

If time permits prior to the actual extraction, a mock extraction may be conducted in a vacated area with participating staff in order to ensure that custodial staff are familiar with their roles during the extraction. Several simulated operations will ensure smoothness, and timing during the actual extraction.

Prior to the extraction, the Incident Commander will communicate with the officer responsible/assigned to open/close cell doors and establish verbal/non-verbal signals specific to the controlled use of force.

The Incident Commander shall ensure the control officer understands that only the Incident Commander shall authorize the opening and closing of affected doors.

For the safety of staff, prior to being removed from a cell, it is preferred that the inmate submit to a visual search. The inmate should remove all clothing, except his/her underwear, and move back far enough from the cell door to allow a visual inspection. The inmate shall be visually inspected from head to toe, front and back. The inmate will run his/her fingers around the inside waistband of his/her underwear. The inmate shall be allowed to retain his/her underwear while being restrained and removed from the cell.

If the inmate refuses to cooperate with the visual search, but is willing to submit to restraints, the inmate shall be placed in restraints and removed from the cell. The application of restraints shall not be delayed due to the inmate's refusal to submit to being searched, or to have the inmate remove any clothing. Upon removal from the cell, the inmate should be subjected to search for staff safety.

Placement of an inmate on the stomach for a short period of time to restrain an inmate is authorized; however once the inmate is exposed to chemical agents and/or if a spit hood/mask is placed on the inmate, staff shall not place the inmate on his/her stomach, or in a position that allows the inmate to end up on his/her stomach, for any period longer than necessary to gain or maintain control.

The procedure for cell extractions where two inmates are in the cell remains the same as for a single celled inmate with the following additions:

- Additional team members shall be assigned as determined by the Incident Commander.
- In the event one of the inmates is compliant with staff's instructions, and if in the judgment of the Incident Commander it is safe to open the cell door, the inmate shall be removed.
- If it is unsafe to remove the compliant inmate, they shall be required to remain in the cell and appropriate instructions shall be issued for the duration of the incident.

The procedures for an extraction from a holding cell, shower, small exercise yard, etc., whether in a segregated housing unit or general population remain the same as cell extractions except as follows:

- Additional extraction team members or an additional extraction team may be assigned as determined by the Incident Commander.
- In the event two or more inmates are to be extracted from the same area, at least one additional supervisor shall be assigned.

51020.12.3 Controlled Uses of Force-Video Recording Requirements

Each controlled use of force shall be video recorded. The camera operator shall procure the camera, videotape or media, backup videotape or media, and backup battery. Prior to initiating video recording, the Incident Commander shall ensure the staff member operating the camera is familiar with the operation of the camera, and the expectations of the camera operator while recording the introductions and extraction in accordance with 51020.12.1 Controlled Uses of Force-Video Recording Requirements.

Only one incident shall be recorded on each video recording (videotape or video media will not include multiple incidents).

If the proposed controlled force involves a cell extraction of two inmates, two camera operators shall be used. Each camera operator will be designated an inmate prior to the application of the controlled use of force and concentrate on that inmate during the recording. The camera operator(s) will be positioned as close as possible to the immediate area to record as much of the incident as possible, yet at a sufficient distance so as to ensure no interference with the extraction team or jeopardy to their own safety.

The camera operator shall ensure that an accurate date and time is displayed on the recording. Filming shall begin with the camera operator stating their name, rank, date, time, and location of the controlled use of force.

The Incident Commander shall identify the inmate involved and state the circumstances of the proposed controlled use of force and/or extraction. The circumstances shall include a summary of the events leading up to the controlled use of force and what efforts have been

made toward mitigation, to include the duration of the cool down period, as well as custody, supervisory, medical, and mental health intervention, as applicable. The Incident Commander shall explain the tactical plan, rationale of the plan, and the intended use of force.

The on-site manager shall identify themselves on camera and confirm they are authorizing the controlled use of force, including the force options as stated by the Incident Commander. The on-site manager shall also ensure the video introduction includes all required information.

The on-site LNS shall identify themselves on camera and confirm they reviewed the inmate's health record. The LNS shall indicate if the inmate has any health conditions that will put them at increased risk for adverse outcome from the use of chemical agents or other force options. The LNS shall also note any known disabilities the inmate has that will require any accommodation before, during or after the controlled use of force. The LNS shall not include specific conditions or any other protected health information.

The LNS that will be on-site during the controlled use of force shall also identify themselves on camera as performing that role and having the necessary medical equipment.

The licensed mental health practitioner who provides clinical intervention shall identify themselves on camera and provide a detailed timeline of his/her efforts. This narrative shall not include specific conditions or any other protected health information but shall include a summary of the inmate's reaction. The actual clinical intervention shall not be video recorded.

The Response Supervisor and members of the controlled use of force team shall identify themselves on camera and state their roles in the controlled use of force.

Following the introduction, the camera operator shall continue filming enroute to the scene of the proposed controlled use of force and record the events.

Prior to the application of force, the camera operator should videotape the interior of the cell/area and the inmate's actions.

The incident commander shall issue a verbal warning prior to initiating the application of force.

The verbal warning shall contain the following five elements:

- Address the inmate by name.
- Advise the inmate that they are being video recorded.
- Order the inmate to voluntarily comply.
- Advise the inmate of the intent to use chemical agents and/or physical force if they do not comply.
- Advise the inmate that sufficient force will be used to remove them from the area, administer medications, etc.

After the introduction of chemical agents, the camera operator should again video record the inmate and the interior of the cell/area.

If the video recording is interrupted for any reason once the incident/extraction has begun, the camera operator will give a verbal explanation of the interruption once recording has resumed. The entire incident must be video recorded in one segment or scene.

Once the inmate has been extracted, the LNS shall conduct an initial medical evaluation of the inmate and provide any necessary initial treatment. While the inmate is being evaluated or treated the camera shall continue recording, but will not be aimed at the inmate or the LNS. During this time the camera should be aimed at a clock, floor, wall, etc. If it becomes necessary for staff to use force on the inmate while they are being examined or treated, the camera will immediately be aimed at the inmate until such time as the inmate is no longer resistive and the medical evaluation resumes.

If the purpose of the controlled use of force was to administer medications, video recording shall continue as the medications are administered, and until the controlled use of force team disengages from the inmate.

If chemical agents were used and the inmate is allowed to decontaminate, ensure the decontamination is filmed.

The Incident Commander shall determine when the incident has concluded and video recording shall end. This is typically when the inmate is placed in a holding cell/area or re-housed.

51020.12.4 Controlled Use of Force in Health Care Facilities

When circumstances are such that a controlled use of force is considered within a health care facility (departmental hospital, infirmary, Correctional Treatment Center (CTC), Skilled Nursing Facility (SNF), Psychiatric Inpatient Program (PIP), Outpatient Housing Unit (OHU), etc.), the LNS shall consider the impact on medical conditions and the possible need to relocate uninvolved inmates in the immediate vicinity during a controlled use of force.

Administration of Involuntary Medication or Medical Treatment (PC 2602/Probate Code 3200): When force is necessary to administer medication or medical

treatment within a health care facility, on-duty health care staff shall ensure medical authorization for the involuntary medication or treatment exists. Health care staff shall also consult with the treating psychiatrist, primary care provider or mid-level provider, if available, to verify the current and critical need for involuntary medication or treatment. If the treating psychiatrist, primary care provider or mid-level provider is not available, the physician or psychiatrist on call shall be consulted. Health care staff shall advise the Incident Commander of such prior to the application of controlled use of force procedures.

Application of Four/Five point Restraints: Only departmentally approved four/five point restraints shall be applied by authorized LNS in health care facilities. Authorization for application of four/five point restraints shall only be given by health care staff in accordance with California Code of Regulations, Title 22, Section 79801 Clinical Restraint, Treatment Restraint, and Clinical Seclusion, and the Mental Health Program Services Delivery System Program Guide, Chapter 10, Suicide Prevention and Response. On-duty health care staff shall ensure authorization exists, and shall advise the Incident Commander of such prior to the controlled use of force under these circumstances.

Inmate Refusal of Admission, Discharge, or Transfer to/from a Health Care Facility: When a clinician with admitting privileges to a CDCR Health Care Facility has determined it is necessary to admit, discharge, or transfer an inmate into/from a health care facility, health care staff shall ensure that a written order for the admission, discharge, or transfer exists, and shall advise the Incident Commander of such, prior to the controlled use of force.

51020.12.5 Food Trays

Accountability for food trays is an operational concern for the safety and security of institutions. It is important that the staff who issue food trays to inmates in cells account for all trays after the meal is concluded.

If the inmate refuses to return a food tray, the supervisor and the First or Second Level Managers shall be notified. Staff shall document the inmate's refusal to return the food tray on a CDC-115, Rules Violation Report.

The inmate will be advised that they shall not receive another meal until the first scheduled mealtime after the tray is returned. Additionally, the inmate – and all other inmates in the pod/section – will be placed on escort/restraint status to prevent passing of contraband items. Inmates may exit their cells to acquire various services. If the cell is vacated, staff will use that opportunity to retrieve the food tray.

Notice shall be provided to staff members working subsequent shifts to ensure their awareness of the circumstances. Institution/facility staff shall implement security measures to deter and prevent the movement of the retained food tray from one cell to another.

If the inmate retains control of the food tray for a period of 24 hours, the Manager shall determine if controlled force will be used to retrieve the tray. This does not preclude the Manager from making a determination, based on safety and security concerns, to retrieve the tray using force prior to the 24-hour time frame.

If the goal of the controlled use of force is only to retrieve the tray, all staff shall be informed of this in advance. If the inmate has retreated to the back of the cell and the tray can be safely retrieved without the application of force, then staff shall retrieve the tray and exit the cell.

51020.13 Video Equipment and Records

Video equipment, including cameras, batteries, and blank tapes or discs shall be stored in a designated area at each institution. Video recordings shall be maintained for a period of five years from the date of the incident, or longer if warranted.

Video recordings shall be processed as follows:

- The camera operator shall label the tape with the date, time, inmate's name and CDCR number, the camera operator's name, and incident log number, if applicable.
- The Incident Commander shall, prior to being relieved from duty, forward to the designated area for storage any video recordings of controlled uses of force and any video recordings of inmate injuries or interviews following an immediate use of force or an allegation of excessive or unnecessary force. The Incident Commander shall ensure that all such recordings are secured, logged and processed in a manner to preserve evidentiary value.

Based upon individual institution space availability, an institution may maintain evidentiary related video recordings and non-evidentiary video recordings in separate locations, which shall be identified within a local supplement to this section.

51020.14 Use of Less Lethal Weapons

The 37 mm and 40 mm launchers are weapons designed to discharge less lethal impact munitions or chemical agents. They are authorized for use in all areas including segregated housing units, general population housing units, cells, dayrooms, dining halls, concrete yards, exercise yards and work areas. It is recommended a Response Supervisor be assigned the duties of discharging less lethal impact munitions during controlled use of force-cell extraction.

51020.14.1 Use of Less Lethal Weapons During Controlled Uses of Force

During the formation of the tactical plan defined in 51020.12, the on-site manager may authorize the use of less lethal impact munitions during controlled use of force situations in a cell, if the inmate is barricaded, or if circumstances are serious in nature calling for extreme measures to protect staff or inmates (i.e., the inmate is armed with a deadly weapon).

51020.14.2 Use of Less Lethal Weapons for Inmates with Mental Health Issues

In controlled use of force situations for inmates who are housed in Mental Health Crisis Bed, PIP, OHU, Psychiatric Services Unit (PSU), or have an Enhanced Outpatient Program (EOP) level of care designation, or do not possess the ability to understand orders, or have difficulty complying with orders due to mental health issues, or are at substantial risk of decompensation from the use of force, the use of less lethal weapons is prohibited for direct or indirect use, (i.e., body or barricade removal), unless the Warden or Chief Deputy Warden authorize their use. If circumstances are serious in nature and involve an imminent threat, the use of less lethal weapons in accordance with this section may be authorized. In immediate use of force situations involving an imminent threat, staff are not precluded from using less lethal weapons to gain control of a disturbance involving inmates who may have mental health issues.

51020.15 Chemical Agents

Departmentally approved chemical agents include, but are not limited to the following: Oleoresin Capsicum (OC), Chloroacetophenone (CN), and Orthochlorobenzalmalonitrile (CS). OC may be issued to all on-duty departmentally trained peace officers, certified in the use of chemical agents. Employees shall only administer the amount of chemical agents necessary and reasonable to accomplish the lawful objective.

While in the community, non-uniformed peace officers that are issued OC products shall carry the product in a concealed manner, unless the peace officer has a badge clearly displayed.

51020.15.1 Chemical Agent Use During Controlled Use of Force – Small Space

During a controlled use of force in a cell, single person holding cell, shower, or other small space, only the chemical agent products listed in 51020.15.1 may be deployed. Any additional products authorized by the Office of Correctional Safety, Emergency Operations Unit, and approved by the Director, Division of Adult Institutions must be specifically authorized for controlled use of force in a cell or other small space in order to be utilized for this purpose.

- MK-9 OC Vapor - limited to a single burst of 1-3 seconds in duration per application with a maximum of two applications.
- MK-9 OC Fogger – limited to a single burst of 1-5 seconds in duration per application with a maximum of four applications.
- MK-9 OC Foam – limited to a single burst of 1-5 seconds in duration per application with a maximum of four applications.
- OC Vapor Grenade – limited to 2 devices
- OC Flameless Expulsion Grenade – limited to 2 devices
- X-10 Barricade Removal Device – limited to a single burst of 1-5 seconds in duration per application with a maximum of four applications. Chemical agents may only be deployed from the X-10 during the removal of a barricade. The X-10 is not to be used solely as a delivery device for chemical agents.

Regardless of which chemical agents are deployed, or in what combination, no more than a total of four chemical agent applications shall be administered. In unusual circumstances or when circumstances call for extreme measures to protect staff or inmates, it may be necessary to exceed the four allowed applications. In this event, the Incident Commander shall consult with the on-site manager, who can authorize additional chemical agent applications. For each *additional* chemical agent application authorized, the on-site Manager shall verbalize to the camera, the chemical agent application being authorized and the rationale for the decision.

The amount of time needed for the chemical agents to become effective will vary based upon the delivery method, individual tolerance levels, and environment. A minimum of three minutes shall lapse between each application of chemical agents before additional chemical agents may be applied.

It is recommended a Response Supervisor be assigned the duties of administering chemical agents during controlled use of force in a cell or other small space. Prior to each use of a chemical agent, the staff member applying it shall display the device in view of the camera and state out loud for the camera the time of application and the type of device being applied.

After each application of a chemical agent, the Incident Commander and Response Supervisor shall assess the effectiveness or lack thereof. In the event chemical agents have not proven effective, the Incident Commander and Response Supervisor should carefully weigh the continued use of chemical agents versus use of physical force to complete the extraction. If a decision is made to apply additional chemical agents, the Incident Commander shall verbalize to the camera the rationale for the decision. For example: "A vapor grenade was deployed. It has been three minutes. The inmate is not showing any visible reaction, is using a personal barrier, and is shouting. We will now attempt to strike the personal barrier with a fogger product."

Staff shall make every reasonable effort to maintain visual contact with an inmate when administering chemical agents and until the inmate is decontaminated.

51020.15.2 Chemical Agent Use During Controlled Use of Force – Large Area

During a controlled use of force in larger areas such as rotundas, small management yards, large holding cells, segregated housing unit exercise yards, etc., departmentally approved chemical agents may be used in accordance with the Restricted DOM, Section 55050- Armory, Armed Posts, and Weapons, and applicable training. In these situations, dependent on the size of the area, number of inmates involved, and complexity of the incident, it may be necessary to administer chemical agents in a larger quantity and more frequently than would occur during a controlled use of force in a small space.

51020.15.3 Use of Chemical Agents for Inmates with Mental Health Issues

In controlled use of force situations for inmates who are housed in Mental Health Crisis Bed, PIP, OHU, PSU, EOP, or an Administrative Segregation Unit-EOP Hub, or do not possess the ability to understand orders, have difficulty complying with orders due to mental health issues, or are at increased risk of substantial decompensation from the use of force, the use of chemical agents is prohibited, unless the Warden, Chief Deputy Warden (or AOD during non-business hours) authorize the use.

If circumstances involve an imminent threat, the use of chemical agents is authorized in accordance with this section for use against an inmate who may not possess the ability to understand orders or to gain control of a disturbance involving inmates who may have mental health issues.

51020.15.4 Decontamination from Chemical Agents – General

Any inmate exposed to a chemical agent shall be afforded an opportunity to decontaminate as soon as practical. Staff shall provide reasonable accommodation to disabled inmates who require assistance exiting a contaminated area and during the decontamination process.

If an inmate refuses to decontaminate, no other action is necessary, unless the inmate was exposed in a cell and not removed from the cell where the exposure occurred. In these instances, refer to Section 51020.15.6. If an inmate refuses decontamination, the LNS shall be responsible to explain the importance of decontamination and encourage the inmate to decontaminate.

Inmates in an adjacent cell or in the general area where chemical agents are used shall be questioned by custody staff to determine if decontamination is warranted.

Decontamination of those inmates not directly exposed to chemical agents will be based upon obvious, physical effects of the chemical agent.

The need to medically treat an inmate for serious injury may supersede the need to decontaminate from the effects of exposure to chemical agents.

Inmates exposed to chemical agents shall be allowed to change their clothes as soon as practical.

Inmates exposed to chemical agents in a cell shall be afforded the opportunity to exchange linens and bedding, including the safety blanket, when applicable.

51020.15.5 Decontamination from Oleoresin Capsicum

Decontamination from OC may be accomplished by exposing the individual to fresh moving air, or flushing the affected body area with cool water, e.g., shower, sink water, or wet cloths and providing clean clothing.

Except when it is determined that removing an inmate from a cell would result in additional force or give rise to an imminent threat, the inmate will be provided an opportunity to decontaminate outside of a cell in which OC has been used.

Force shall not be used to decontaminate inmates from the effects of OC unless a serious threat to the inmate's health is present and LNS determines the inmate must be decontaminated.

No other decontamination is necessary for inmates who have been medically treated and LNS has determined the inmate has been decontaminated.

As soon as it is practical and safe to do so, decontamination of the affected cell and housing unit shall be accomplished by ventilating the area to remove the airborne agent. Open doors and windows as permitted, or use portable fans to speed up the process. If applicable manually turn the air exchange system to high. A fan and the use of the air exchange system is not recommended for any dry agent that is utilized (i.e., expulsion grenades or muzzle blast). Wiping the area down with damp cloths or mopping is only necessary if a noticeable amount of residue is visible.

After decontamination, the inmate should not be returned to a contaminated cell until sufficient time has elapsed to allow for dissipation of the OC or until the cell has been cleaned.

51020.15.6 In-Cell Decontamination from Oleoresin Capsicum

In-cell decontamination may be used for inmates housed in an institution/facility when the Incident Commander or Response Supervisor determines that removing the inmate would result in the need for additional use of force or give rise to an imminent threat.

The circumstances leading to the order for in-cell decontamination shall be clearly explained in the Response Supervisor's/Incident Commander's report.

When an inmate is going to be decontaminated in his/her cell, a licensed nursing staff shall advise the inmate how to self-decontaminate and the importance of decontamination. Licensed nursing staff shall explain to the inmate that he/she should remove contaminated clothing and use water from the sink to flush the affected area(s). The licensed nursing staff shall also explain to the inmate that he/she should pat or air dry and avoid rubbing the exposed areas.

When an inmate is not removed from the cell, a licensed nursing staff shall monitor the inmate approximately every 15 minutes for a period of not less than 45 minutes starting from the last application of chemical agent. During the monitoring, if the licensed nursing staff determines there is a need for additional medical assessment/treatment outside the cell, the licensed nursing staff shall advise a custody supervisor of the need to remove the inmate from the cell. The custody supervisor shall coordinate the removal of the inmate.

A licensed nursing staff shall document the fact the inmate was given instructions and the approximate times of the 15 minute observations on a CDCR 7219, Medical Report of Injury or Unusual Occurrence.

51020.16 Application of Spit Hoods or Masks

Only departmentally approved spit hoods/masks are authorized for use. A spit hood/mask shall not be placed upon an inmate who:

- Is in a state of altered consciousness (visibly drowsy, stuporous, or unconscious) or;
- Has any visible signs of a seizure; or
- Is vomiting or exhibits signs of beginning to vomit.
- A spit hood/mask may be applied to an inmate if:
 - There is verbal or physical intent by the inmate to contaminate others with spit or other bodily fluids from the nose or mouth; or
 - The inmate is not able to control expelling fluids from the nose or mouth (with the exception of vomit); or
 - The inmate is on authorized security precautions according to the procedures of the unit where the inmate is housed.
- If the inmate was contaminated with OC before the mask was applied, the mask shall be kept on until the inmate is afforded decontamination unless the inmate is in a state of altered consciousness (visibly drowsy, stuporous, or unconscious); or has any visible signs of a seizure; or is vomiting or exhibits signs of beginning to vomit. In this case the spit hood/mask will be removed immediately and appropriate treatment will be administered.

If the inmate is decontaminated with fresh moving air, the spit hood/mask may remain on during decontamination and can be exchanged for a new spit hood/mask

when decontamination is complete. If the inmate is decontaminated with water, the spit hood/mask shall be removed during decontamination and a new spit hood/mask can be placed on the inmate when decontamination is complete.

If an inmate has been exposed to chemical agents after the spit hood/mask is applied, the spit hood/mask shall be replaced with a new one when it is safe to do so.

If a spit hood/mask was applied and the inmate loses consciousness, begins seizing, or begins vomiting the spit hood/mask shall be removed immediately and appropriate treatment will be administered.

If a spit hood/mask is applied to an inmate, it is imperative that constant supervision of the inmate be maintained for signs of respiratory distress. If any respiratory distress is observed, the spit hood/mask shall be removed until the signs of respiratory distress have dissipated.

Once an inmate is exposed to chemical agents and/or if a spit hood/mask is placed on the inmate, staff shall not place them on their stomachs, or in a position that allows the inmate to end up on their stomach, for any period longer than necessary to secure (e.g. handcuff) and/or gain control of the inmate. A prone position makes it difficult for any exposed individual to breathe and may be a contributing factor in positional asphyxia. Positional asphyxia occurs when an individual's body position interferes with respiration, resulting in death.

If an exposed individual is in handcuffs and requires transportation via a gurney, stokes litter, etc., they shall be positioned on their back or side.

51020.17 Uses of Force-Reporting Requirements

Every staff use of force is an incident that shall be reported. Uses of force include non-deadly force, deadly force, immediate force, controlled force and non-conventional force. Verbal commands, the unresisted application of restraints or escort of an unresisting inmate and the movement of an unconscious or otherwise incapacitated inmate are not uses of force.

Any employee who uses force or observes a staff use of force shall report it to a supervisor as soon as practical and follow up with appropriate documentation prior to being relieved from duty.

The CDCR 837 Crime/Incident Report forms are used for reporting uses of force. Written reports regarding both immediate and controlled use of force shall be documented on a CDCR 837.

Documentation shall identify any witnesses to the incident and describe the circumstances giving rise to the use of force, whether the inmate is a participant in the Mental Health Services Delivery System and the nature and extent of the force used. The documentation shall also describe any involvement of licensed mental health practitioners prior to or during the use of force incident, if de-escalation strategies were attempted prior to the use of force, and the outcomes of any strategies used.

51020.17.1 Involved Staff-Reporting Requirements

Written reports regarding staff uses force shall be documented on a Crime/Incident Staff Report (CDCR 837-C). This requirement includes the on-site manager authorizing the use of controlled force. This requirement includes a First or Second Level Manager/AOD authorizing the use of controlled force.

Reports shall be prepared by any employee who uses or observes the use of force. The reports shall be submitted to, and reviewed by, the Response Supervisor prior to being relieved from duty. Staff shall not collaborate with each other in the preparation of reports.

If possible, identify important information in the contents of the report as follows:

- Identities of staff that observed and/or participated in the use of force.
- Description of the actions of the inmate and circumstances leading to the use of force.
- Description of the specific force used or observed.
- If chemical agents were used, identify the type of projector used, and from what distance.
- Description of the inmate's level of resistance.
- Description of why force was used and description of the threat perceived.
- Description of any identified disabilities ascertained through any tracking system and what form of reasonable accommodation

and/or assistance was provided during and after the controlled use of force.

- Description and observations of staff or inmate injuries and the cause of the injury, if known.
- Description of observations of decontamination of chemical agents or medical attention given.
- Description of observations or knowledge of the steps taken to decontaminate the housing unit, and those inmates not directly exposed to chemical agents.
- Documentation of any inmate allegation of an unnecessary or excessive use of force.

51020.17.2 Involved Staff-Additional Reporting Requirement for Deadly Force

An employee, who intentionally or accidentally uses deadly force, whether on or off-duty, shall ensure that a supervisory employee is verbally notified of the incident without delay. A written report shall also be required. This reporting is not a requirement for the lawful discharge of a firearm during weapon's qualifications, firearms training, or other legal recreational use of a firearm.

51020.17.3 Video Records Made After Uses of Force That Cause Serious Bodily Injury, Great Bodily Injury, or Result in Allegations of Unnecessary or Excessive Force

A video recorded interview of an inmate shall be conducted in accordance with the Inmate Interview for GBI and SBI Worksheet, CDCR Form 3013-1, or Inmate Interview for Allegation Worksheet CDCR Form 3013-2, and documented on the CDCR Form 3014, Report of Findings-Inmate Interview, under the following circumstances:

- The inmate has sustained a serious bodily injury or great bodily injury that could have been caused by a staff use of force (CDCR Form 3013-1).
- The inmate has made an allegation of an unnecessary or excessive use of force (CDCR Form 3013-2).

Any visible or alleged injuries shall be video recorded. The video recording shall be conducted by custodial supervisors (sergeants or lieutenants) who did not use, or observe the force used, in the incident.

The video recording should be made as soon as possible, but no later than 48 hours from discovery of the injury or allegation.

The video recording shall also include a request of the inmate to be interviewed regarding the circumstances of the incident. If the inmate refuses to be video recorded, such refusal shall be recorded.

The custody supervisor shall not inhibit the inmate being interviewed from providing relevant information.

51020.17.4 Response Supervisor- Reporting Requirements

In addition to writing his/her own report when applicable, prior to being relieved from duty the Response Supervisor shall:

- Gather written reports from staff involved in the use of force incident.
- Serve as the first level of review for all subordinates' reports and shall ensure that all necessary information is contained in these reports. The Response Supervisor is expected to ensure that each employee's report is prepared independent of any other report.
- Ensure no involved employee is relieved of duty prior to receiving his/her written report, unless the employee is physically unable to prepare the report due to an injury. If due to the circumstances a verbal report is not possible, the Response Supervisor shall explain the reason for not taking a verbal report.
- Obtain applicable medical reports from health care staff, inspect the form(s) and determine if all relevant information is present.
- If applicable, complete Report of Occupational Injury or Illness Form (SCIF-3067).
- If applicable, complete State Compensation Insurance Fund Employee Claim for Workers' Compensation Benefits Form (SCIF-3301).
- If applicable, complete Department of Health Services Report of Request and Decision for HIV Testing (CDC-8439) in cases of potential exposure to blood borne pathogens.

51020.17.5 Response Supervisor-Additional Reporting Requirements for Deadly Force

When there has been a use of deadly force, the on-duty/Response Supervisor shall ensure that the chain of command is notified and all necessary health and safety, medical, and security measures are initiated. The on-duty/Response Supervisor shall go to the location and ensure that the scene is protected.

For incidents occurring in an institutional setting, the Watch Commander shall contact the institution's Investigative Services Unit (ISU).

For incidents occurring in a community setting, the on-duty supervisor or Watch Commander shall ensure local law enforcement is contacted.

The on-duty/Response Supervisor shall ask the employee who used deadly force to provide a public safety statement immediately after the incident. This is the employee's oral statement. This statement helps determine the general circumstances of the incident, assess the need for resources, set the perimeter, locate injured persons, and determine the nature of the evidence to be sought. It shall provide basic information such as the number of persons involved in the incident, the number not yet in custody and number and direction of shots fired. The statement shall not include, and the employee should not be asked to provide, a step-by-step narrative of the incident or a motive for his/her actions. Providing a public safety statement does not relieve the staff of the responsibility to submit a written report in accordance with CCR, Title 15, Section 3268.1(a), or within 24 hours after the incident.

The on-duty/Response Supervisor shall capture the essence of the oral statement in writing and submit it to the Incident Commander.

In circumstances where the use of deadly force results in death or GBI, the staff using the force will be placed on administrative time off (ATO) for 72 hours in order to facilitate department interviews and staff wellness. These 72 hours will be paid contiguous time off, unless they are scheduled regular days off (RDO). RDOs will count toward the contiguous 72 hours but will not be paid unless the employee is called to work. If the 72 hours ATO overlap with a period of pre-scheduled time off (i.e. vacation, holiday, sick leave, etc.) the ATO will be used in lieu of, not in addition to the affected employee's leave credits.

As soon after the incident as is practical, the on-duty/Response Supervisor or Incident Commander must also initiate Peer Support Program (PSP) protocols as delineated in DOM Section 31040.3.2. The Incident Commander shall notify the Office of Internal Affairs (OIA) and the Office of the Inspector General (OIG) as soon as possible, but no later than one hour from the time the incident is discovered, of any use of deadly force and every death or GBI that could have been caused by a staff use of force.

51020.17.6 Health Care Staff Use of Force-Reporting Requirements

Health Care Services staff shall complete and submit a Crime/Incident Staff Report (CDCR 837-C) whenever a health care staff member:

- Observes use of force.
- Uses force on an inmate.
- Provides clinical intervention prior to a use of force.
- Reviews the health record for conditions that may put an inmate at increased risk for adverse outcome from the use of force.
- Hears an inmate allegation of an unnecessary or excessive use of force during a reportable incident if not already reported on a Notice of Injury or Unusual Occurrence form (CDCR 7219).

On the CDCR 837-C, the licensed mental health practitioner shall provide a timeline for the clinical assessment and intervention process. They shall also document if the inmate had the ability to understand orders, had difficulty complying with orders based on mental health issues or was at increased risk of substantial decompensation due to mental illness.

If it was determined the inmate had difficulty complying with orders or was at increased risk of substantial decompensation, the licensed mental health practitioner shall:

- Document that strategies were developed.
- Document if the strategies were implemented.
- Document whether those strategies were successful.

On the CDCR 7230, Interdisciplinary Progress Note, the licensed mental health practitioner shall document information regarding the clinical assessment and intervention process. The licensed mental health practitioner shall document the rationale for the assessment results regarding the inmate's ability to understand direction, any difficulty complying with direction or substantial risk of decompensation. If strategies were developed, the licensed mental health practitioner shall document specific strategies, whether the strategies were implemented, and the results.

In addition to the requirements noted above, the LNS shall complete and submit a CDC 7219 upon conducting a medical evaluation after a

use of force. The CDCR 7219 shall be completed and submitted to the Response Supervisor prior to the LNS leaving the institution and shall:

- Include a quote of the inmate's own words in the patient comment section.
- After examination, document observations of the area on the inmate where force was applied.
- Include comments or information garnered from custody staff regarding the type and amount of force used.
- Document the injuries sustained and the medical treatment rendered.
- Document if the inmate refuses medical examination and/or treatment.
- Document any alternative assistive device provided and any medical recommendation / accommodation suggested during and after the use of force.
- Document in-cell decontamination instructions and times of 15-minute checks, if applicable.

In addition to the above requirements, LNS shall be responsible for providing custody staff and the Use of Force Coordinator, with notification and updated information in the event that the aftercare treatment process reveals new facts about the severity of an injury.

51020.17.7 Incident Commander-Reporting Requirements

It is the responsibility of the Incident Commander to notify the Office of Internal Affairs (OIA) and the Office of Inspector General (OIG) as soon as possible, but no later than one hour from the time the incident is discovered, of any use of deadly force and every death, great bodily injury or serious bodily injury that could have been caused by a staff use of force. Depending on the specific Memorandum of Understanding (MOU) and the nature of the incident, a call to the county sheriff or police department may also occur.

Prior to being relieved from duty the Incident Commander or designee shall:

- Initiate the initial incident report, consisting of the Crime/Incident Report Cover Sheet (CDCR 837-A/A1), the Crime/Incident Report Supplement (CDCR837-A1), and the Crime/Incident Report Inmate/Staff/Visitor, Other (CDCR 837-B1/2/3) reports. This shall be an accurate summary of the events as described in the written reports submitted by all employees.
- Prepare the initial incident package. This includes the CDCR 837-A/A1, B and C forms and any other applicable forms or documents.
- Review all incident reports for quality, accuracy and content.
- Clarify incomplete reports with involved staff by completing a CDCR 837-C-2 Review Notice.

In controlled use of force cases in institutions/facilities involving involuntary medication, placement into four/five point restraints, or admission into a licensed health care facility, the Incident Commander shall include in the CDCR 837-A/A1, the name and title of the on-duty health care staff that verified the appropriate medical authorization existed prior to the use of force.

- Prepare and submit a separate CDCR 837-C if they actually used force during an incident, or observed the use of force.

In normal circumstances, it is the expectation that within 24 hours of the incident the Incident Commander or designee will ensure the initial incident report (CDCR 837-A/A1 and CDCR 837-B) is uploaded in the Daily Information Reporting System (DIRS).

Ensure all force related video recordings of inmate injuries or interviews and recordings of controlled force are forwarded to the appropriate location, as set forth in Section 51020.13.

Initiate the Use of Force Review process as set forth in Section 51020.19.1.

Should an incident or allegation warrant investigation by the DFIT, the OIA, or any other outside investigating agency, the Incident Commander shall suspend all review of that incident until the investigation is complete.

51020.17.8 First/Second Level Manager-Reporting Requirements for Controlled Uses of Force

The on-site manager authorizing the use of controlled force is required to be present during the use of force and document involvement on a CDCR 837C.

Any institutional managers consulted regarding a disagreement among the collaborative team members during a controlled use of force shall submit a CDCR Crime/Incident Staff Report (CDCR 837-C) detailing their involvement.

If the Regional Administrators (Medical or Mental Health) or the Associate Director are contacted, they shall submit a CDCR Crime/Incident Staff Report (CDCR 837-C) detailing their involvement.

51020.18 Reporting Allegations of Unnecessary or Excessive Force

Any employee who observes a use of force that is unnecessary or excessive shall attempt to stop the violation. Any employee who becomes aware of an allegation

of unnecessary or excessive force, whether it occurs during a reportable incident or not, shall verbally report the allegation to a custody supervisor as soon as possible, followed with appropriate documentation.

If the allegation occurs in conjunction with a reportable incident, the incident shall be reported in accordance with the requirements set forth in this Article and any such allegation shall be documented and included in the incident report package. Each involved employee shall document all details regarding any allegations or observations of use of force that is unnecessary or excessive. This includes a quote of the allegation, or what was seen or heard, including observations of any apparent injuries, and the name of the supervisor the employee reported the allegation to.

All reports shall be submitted to a custody supervisor.

51020.18.1 Allegations of Excessive or Unnecessary Force-Supervisor Reporting Requirements

Whether or not the allegation of excessive or unnecessary force is made in conjunction with a reported use of force, a supervisor who learns of such an allegation shall:

- Make a verbal notification to the Incident Commander as soon as practical.
- Arrange for the inmate to be medically examined and request a full medical assessment of injuries, if any.
- Ensure every staff member who witnessed the allegations and/or staff who witnessed the event leading to the allegations immediately submits the applicable report.
- Review any reports for clarity.
- Submit a package of all documents relating to the allegation, including a copy of the medical report, to the Incident Commander.

51020.18.2 Allegations of Excessive or Unnecessary Force-Incident Commander and Appeals Coordinator Reporting Requirements

When informed of allegations of the use of unnecessary or excessive force, the Incident Commander and/or the Appeals Coordinator shall make an initial assessment of the information received and notify the appropriate First or Second Level Manager as soon as practical.

Additionally, the Incident Commander and/or the Appeals Coordinator shall:

- Ensure LNS has evaluated the inmate and a CDCR 7219 has been completed.
- Review written reports of witnesses and obtain statements from inmate witnesses, if any.
- Ensure that the inmate's injuries are video recorded and the inmate is interviewed within 48 hours in accordance with the requirements set forth in DOM, Section 51020.17.3. This shall be done as soon as possible upon receiving verbal notification of the allegation.

When an allegation is received, whether verbally or through the appeals process, the Appeals Coordinator or Incident Commander shall contact ISU or the Watch Commander and determine if the related incident report exists. The respective Appeals Coordinator or Incident Commander shall note the existence of the incident report by log number in their submittal prior to forwarding the allegation for administrative review.

If the inmate has suffered serious bodily injury or great bodily injury, the Incident Commander shall notify the OIA and the OIG as soon as possible, but no later than one hour from the time the incident is discovered. In instances where the allegation was submitted through the inmate appeal process and there is no corresponding incident report, the Appeals Coordinator shall, in consultation with the hiring authority, notify the OIA and OIG.

If, at any point in the review, the Incident Commander and/or the Appeals Coordinator discovers information that leads them to reasonably believe or suspect an employee has committed any serious misconduct, the Incident Commander and/or Appeals Coordinator shall:

- Immediately forward all information to the Institution Head via the chain of command, recommending an internal affairs investigation if appropriate.

- Prepare a Report of Findings-Inmate Interview (CDCR 3014) and/or Appeal Inquiry. The report shall contain the allegations made, an explanation of the incident, the written or verbal statements of the witnesses, the health care information, and a conclusion and recommendation.
- Submit the Report of Findings and/or Appeal Inquiry and evidence through the chain of command to the Institution Head. The evidence shall include copies of the medical reports, and any other documentation that is deemed significant to further document the incident/allegation. If the Incident Commander learns that the verbal allegation is part of a reported incident, the incident package shall be included with the Report of Findings. Correspondingly, if the Appeals Coordinator learns that the written allegation is part of a reported incident, the incident package shall be included with the appeal for administrative review.

51020.19 Reviewing the Use of Force

Each Institution Head shall establish and chair an IERC to evaluate and review every use of force and every allegation of excessive or unnecessary force. Each incident or allegation shall be evaluated at both supervisory and management levels to determine if the force used was reasonable under policy, procedure, and training.

For reported incidents, a good faith effort must be made at all levels of review in order to reach a judgment whether the force used was in compliance with policy, procedure and training and follow-up action if necessary. The following factors must be evaluated:

- The threat perceived by the responsible individual applying the force.
- The need for the application of force.
- The relationship between that need and the amount of force used.
- The extent of the injury suffered.
- What steps were taken to avoid and/or minimize the need for/level of force used.

Should an incident or allegation warrant investigation by the DFIT, the OIA, or any other outside investigating agency, or if direct action has been requested for any incident or allegation, the IERC shall suspend all review of that incident until the investigation/direct action is complete. Examples of what may be referred for investigation include but are not limited to:

- Unexplained injuries.
- Impact strikes to lethal target areas (head, eyes, throat, or spine).
- Incomplete/conflicting reports.
- The application of weaponry that exceeds what would normally be expected for the type of force reported.

The IERC shall apply the findings of the Hiring Authority or the DFRB as part of its review.

51020.19.1 Incident Commander Review

The Incident Commander shall review the complete incident package documentation to ensure that it is adequately prepared and shall reach a judgment whether the force used was in compliance with policy, procedure, and training.

The Incident Commander shall:

- Review all incident reports for quality, accuracy, and content, including the Report of Finding-Inmate Interview (CDCR 3014).
- Clarify incomplete reports with involved staff by completing a Crime Incident Report Review Notice (CDCR 837-C-2 to the applicable employee).
- Complete an Incident Commander's Review/Critique Use of Force Incidents (CDCR 3010). This report shall contain:
 - The description of inmate injuries due to force used.
 - An explanation of why force was needed.
 - A description of the threat that required force to be used.
 - What steps were taken to minimize the need for force.
 - Any relevant comments.

In the event the Incident Commander believes an investigation may be necessary, the Incident Commander shall suspend review and recommend that the case be referred for investigation.

51020.19.2 First Level Manager Review

The First Level Manager of the area where the incident or allegation occurs shall reach a judgment whether the force used was in compliance with policy, procedure, and training.

The manager shall:

- Review all documentation in the incident package, including the Report of Finding-Inmate Interview (CDCR 3014).

- Review the quality of all reports to ensure the use of force was properly documented and reviewed. This includes a review of the Incident Commander's conclusions.
- Determine if any corrective action taken by his/her subordinates in relation to the incident was adequate/proper.
- Conduct an in depth analysis to determine if the use of force described in the incident package was within the guidelines of the Use of Force policy, as well as other policies, procedures and training. This analysis should address any non-compliance not identified earlier.
- Complete a review of the incident on the Manager's Review – First Level Use of Force Incidents (CDCR 3011).
- In the event the First Level Manager believes an investigation may be necessary, they shall suspend the review and recommend that the case be referred for investigation.

51020.19.3 Second Level Manager Review

The Second Level Manager is the final level of review prior to the completed incident package being sent to the Use of Force Coordinator for review by the (IERC). The Second Level Manager shall reach a judgment whether the force used was in compliance with policy, procedure, and training.

The Second level manager shall:

- Review all documentation in the incident package, including, the Report of Findings-Inmate Interview (CDCR 3014).
- Review the quality of all reports to ensure the use of force was properly documented and reviewed. This includes a review of the Incident Commander's conclusions and the First Level Manager's conclusions.
- Determine if any corrective action taken by his/her subordinates in relation to the incident was adequate/proper.
- Conduct an in depth analysis to determine if the use of force described in the incident package was within the guidelines of the Use of Force policy, as well as other policies, procedures and training. This analysis should address any non-compliance not identified earlier.
- Complete a review of the incident on the Manager's Review – Second Level Use of Force Incidents (CDCR 3012).
- In the event the Second Level Manager believes an investigation may be necessary, they shall suspend review and recommend that the case be referred for investigation.

51020.19.4 Use of Force Coordinator Responsibility

The Use of Force Coordinator shall log and track all use of force incidents and all allegations of excessive or unnecessary force (including those originating from inmate appeals) to ensure thorough and timely review by the IERC. The log should be capable of producing statistical reports to monitor trends and patterns of force used, whether the report is received in the form of an incident report, a verbal allegation of excessive or unnecessary force, or an allegation contained in an inmate appeal. At a minimum, the log should address the following categories:

- Incident Log Number
- Incident Date
- Specific Area of Institution
- Specific Crime
- Controlled or Immediate Use of Force
- Allegations of Unnecessary or Excessive Use of Force
- Significant Injury (SBI, GBI, or Death)
- Injuries caused by Use of Force
- Staff Involved
- Inmate(s) Involved
- Mental Health Status
- Type of Force Option(s) Utilized
- Ethnicity,
- Security Threat Group Status.

The Use of Force Coordinator shall schedule use of force incident packages for presentation to the IERC within 30 days from the date of incident. If an investigation or request for direct action has been initiated for a use of force incident, the Use of Force Coordinator will

track and maintain the completed incident package until the Hiring Authority has determined a finding upon conclusion of the investigation or request for direct action.

Upon determination of finding for the matter referred for investigation or direct action, the Hiring Authority shall apprise the Use of Force Coordinator of the allegation(s) findings.

The Use of Force Coordinator shall conduct an in-depth analysis of the documentation from each use of force incident, including the conclusions of the Supervisor and Managers. The Use of Force Coordinator shall request any clarification or additional information necessary to complete his/her analysis.

The Use of Force Coordinator shall complete the IERC Use of Force Review & Further Action Recommendation (CDCR 3035), and Institutional Executive Review Committee (IERC) Critique and Qualitative Evaluation (CDCR 3036), documenting his/her findings regarding whether the force used was in compliance with policy, procedure, and training; as well as identifying any recommended revision to policy, procedure, or training.

If a completed incident package has not been received by the Use of Force Coordinator in time to allow for IERC review within 30 days of the incident, the Use of Force Coordinator shall present the initial incident package to the IERC for an initial review. The initial review of the initial incident package is intended to give the IERC an opportunity to conduct a preliminarily review and document obvious procedural concerns. During the initial review, the CDCR 3035 or CDCR 3036 do not need to be completed. Once the completed incident package is received, the CDCR 3035 and CDCR 3036 shall be completed by the Use of Force Coordinator for presentation to the IERC.

In cases involving allegations of excessive or unnecessary force, whether or not the allegation was part of a reported use of force, the Use of Force Coordinator shall prepare an Institutional Executive Review Committee Allegation Review (CDCR 3034), for review by the IERC.

The Use of Force Coordinator shall prepare complete copies of the incident packages to be reviewed by the IERC during the scheduled meeting. The OIG shall be provided reasonable notice and copies of the packages to be reviewed in advance of the meetings.

If the IERC determines additional information or clarification is required, the Use of Force Coordinator will forward a request for this information to the responsible Manager and track the assignment.

The Use of Force Coordinator will maintain a copy of the completed incident package until the information or clarification is received. The Use of Force Coordinator will then complete the analysis and resubmit the case to the IERC.

The Use of Force Coordinator will ensure the IERC findings are documented on the CDCR 3035 and CDCR 3036 following final IERC review of the completed incident package.

After final review by the IERC, any copies of staff disciplinary documents will be removed from the incident package and routed to the appropriate Manager for placement into the appropriate file.

The IERC Chairperson and the Use of Force Coordinator shall review the status of all pending use of force cases following each IERC meeting to evaluate the readiness for final review of the cases.

By the fifth day of each month, the Use of Force Coordinator shall forward a memorandum to the respective Associate Director listing the date of IERC meetings, incident package log numbers, specific crime, and disposition of all incident packages reviewed during the previous month.

51020.19.5 Institution Executive Review Committee Monitoring Responsibility

The IERC is a committee of executive staff tasked with reviewing reported use of force incidents and allegations of excessive or unnecessary force. The IERC shall normally be comprised of the following institutional staff:

Institution Head or Chief Deputy Warden, as chairperson and final decision maker, At least one other manager assigned on a rotational basis,

- In-Service Training Manager,
- One health care staff, and
- A Use of Force Coordinator.

A licensed mental health practitioner shall participate in the IERC for all controlled use of force incidents. A licensed mental health practitioner shall also participate in the IERC for any immediate use of force incidents involving an inmate participant in the Mental Health Services Delivery System.

Other designated supervisors and rank and file staff may also attend, as determined by the appointing authority. A representative of the OIG may also attend and monitor IERC meetings.

The IERC shall meet to review its cases on at least a monthly basis, or on a schedule to ensure all cases are reviewed within 30 days. Unless there are

outstanding issues or a corresponding investigation, this review will be both an initial/final review.

The IERC Chairperson shall personally view all video recordings arising from controlled use of force incidents. This viewing can be accomplished either before or during the IERC.

During the IERC, at a minimum, the committee members shall view the portions of the controlled use of force video from the admonishment through the last use of force.

Should an incident or allegation warrant a request for direct action or investigation by the DFIT, the OIA, or any other outside investigating agency, the IERC shall suspend all review of that incident until the investigation is completed. Upon the Hiring Authority determining a finding for the referred allegation(s), the IERC shall apply the findings as part of its own review.

The IERC shall determine if the use of force was reasonable and in compliance with policy, procedures and training. The IERC shall also examine the critique and conclusions of the managers and supervisors, and ensure the appropriateness of completed documentation.

The IERC shall complete an Allegation Review of all allegations of excessive or unnecessary force.

The IERC may initiate requests for additional information or clarification (clarification requests will be routed to the responsible Manager and tracked by the Use of Force Coordinator). The final review will determine whether the use of force was reasonable.

The IERC may recommend changes to procedure or training. The IERC is also responsible for identifying possible employee misconduct and recommending the initiation of training, corrective action or disciplinary action in such cases. However, only IERC members in supervisory or management roles (including the Use of Force Coordinator) and the OIG may participate in discussions involving the initiation of corrective or disciplinary action.

The hiring authority may initiate changes to local procedure or training based on the findings or recommendations of the IERC, or forward a recommendation of change to the CDCR policy or procedure via the Associate Director. The Institution Head may also initiate corrective or adverse employee action based upon the findings or recommendations of the IERC.

51020.19.6 Department Executive Review Committee Monitoring Responsibility

The Department Executive Review Committee is a committee of staff selected by, and including, the Associate Director who oversees the respective Mission-based group. The DERC shall review all incidents involving deadly force, serious bodily injury, great bodily injury, or death. The DERC shall also review those incidents referred to the DERC by the IERC Chairperson or otherwise requested by the DERC.

The DERC shall conduct a review of the incident and document its findings. The DERC shall also review the actions of the IERC and in the event the DERC has questions or concerns with actions taken by the IERC, the DERC shall take appropriate action.

The Director of DAI may choose to provide final review for any incident reviewed by the DERC.

51020.20 Investigating Deadly Force and Any Use of Force That Could Have Caused Death or Great Bodily Injury

Every use of deadly force and every death or great bodily injury that could have been caused by a staff use of force shall be investigated by the DFIT and reviewed by the DFRB.

51020.20.1 Investigative Services Unit (ISU) Monitoring the Use of Deadly Force

For incidents occurring in an institutional setting, involving the use of deadly force and any use of force resulting in death or GBI, the ISU shall take preliminary charge of the investigation and will remain in charge of the investigation while contacting the DFIT to inform them of the incident.

For incidents occurring in a community setting, local law enforcement and the DFIT shall take preliminary charge of the investigation.

For every discharge of deadly force from a firearm, an ISU Sergeant or above shall be tasked with making the prompt determination of whether the deadly force was a warning shot and whether anyone suffered any injuries as a result of the deadly force. The ISU shall verbally notify the DFIT of its determination as soon as possible and shall confirm its determination, along with the reasons in support of it, in a written memorandum to be forwarded to the DFIT. If the ISU is unavailable to

assume this responsibility, an uninvolved Correctional Lieutenant shall do so.

51020.20.2 Deadly Force Investigation Team Responsibility

Trained Department investigators assigned to a Deadly Force Investigation Team shall conduct criminal and administrative investigations of every use of deadly force and every death or great bodily injury that could have been caused by a staff use of force. All DFIT criminal investigations will be referred to the local District Attorney for review where MOU's provide for referral.

Based on certain local Memoranda of Understanding, criminal investigations may instead be conducted by an outside police department or sheriff's office. If an outside law enforcement agency is conducting the criminal investigation, the DFIT investigator will monitor the progress of the criminal investigation while providing appropriate support.

Although defined as deadly force, DFIT need not investigate the discharge of a warning shot inside an institution/facility if an ISU Sergeant or above, or an uninvolved Correctional Lieutenant, confirms that the discharge of deadly force was a warning shot and that no injuries were caused by the shot. All warning shots shall be reported to the Office of Internal Affairs/DFIT and the Office of the Inspector General (OIG).

51020.20.3 Deadly Force Review Board

The DFRB is the board responsible for conducting a full and complete review of all incidents involving a use of deadly force (except warning shots) and every death or great bodily injury that could have been caused by a staff use of force, regardless of whether the incident occurs in an institutional or community setting.

The DFRB shall be composed of at least four members. Three shall be non-departmental law enforcement professionals. One (1) shall be a Division, Parole Region, or Institutional/facility manager (i.e. Associate Directors, Division of Juvenile Justice Superintendents, Chiefs or designees) from outside the chain of command of the involved employee(s). Additional members may be designated by the Secretary or designee.

The reports and findings generated from the separate investigative bodies (DFIT and local law enforcement if applicable) will be presented to the DFRB. The DFRB shall be convened as soon as possible after the criminal and administrative investigations are completed.

The DFRB shall examine all aspects of the incident to determine the extent to which the use of force complied with departmental policies and procedures, and to determine the need for policy, training, and/or equipment modifications.

The DFRB shall report its findings and recommendations in writing, to the Undersecretary assigned to oversee the DAI.

51020.21 External Review of the Use of Force - The Use of Force Coordinator Responsibility

For purposes of an external review, the Use of Force Coordinator shall identify and retain use of force cases closed by the IERC during the review period. External reviews of closed use of force cases shall be conducted at least every 24 months

51020.22 Revisions - Use of Force Joint Use Committee (JUC)

The Use of Force JUC is a committee of field staff tasked with reviewing and evaluating recommended revisions to the CDCR's Use of Force Policy and Procedures.

The JUC shall be comprised of the following field staff:

- At least one Institution Head, as chairperson
- At least one staff member from each DAI, mission based region, at the level of Lieutenant or Captain
- At least one Use of Force Coordinator,
- At least three representatives from the CCPOA, as designated by the CCPOA
- At least one Mental Health Regional Administrator
- The Chief of OIG or designee, and
- Others as needed and assigned by the Deputy Director, DAI,

The JUC shall meet quarterly as necessary, but not less than annually, to review recommended revisions.

51020.22.1 Revisions Approval

Any recommendations for revisions to this Article shall be referred to the Use of Force Joint Use Committee. After review and consideration, the Use of Force JUC shall refer revisions to the Director, DAI, for approval, via the Deputy Director.

Only the Director of DAI, or the Director's designee, may issue clarification memoranda to this Article.

51020.23 Revisions

The Director, DAI, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

ARTICLE 3 — INCIDENT REPORT

Effective December 27, 1989

51030.1 Policy

Incidents, events and activities that occur within the jurisdiction of institutions and parole regions of immediate interest to the Department, other governmental agencies or the news media, shall be reported to the Director, the departmental Officer-of-the-Day or the Deputy Director, P&CSD as described in this section.

51030.2 Purpose

This procedure defines staff responsibility and provides procedures and criteria for reporting incidents occurring within the Department.

51030.3 Reportable Incidents

Revised July 1, 2015

Examples of incidents which shall be reported:

- All felonies committed by inmates, parolees, employees or the public on institution property, during transportation or under the jurisdiction of parole regions.
- General or partial lockdowns.
- Riots, inmate strikes or general demonstrations.
- Major power failures.
- Serious accidents or injuries.
- Deaths.
- Significant damage or destruction of state property.
- Escapes or attempted escapes, (refer to DOM 55040, Escape Pursuit).
- Any state of emergency as described in CCR 3383.
- Any use or discharge of weapons, chemical agents or tasers.
- Threats against the President or Vice-President of the United States, or threats against state officials.
- Safety grievances (employees).
- Employee job actions.
- Sexual Violence Allegations.

51030.4 Incident Reporting Procedures (Institutions)

All reportable incidents shall be conveyed by telecopier on a CDCR Form 837 series, Administrative Officer-of-the-Day (AOD) Incident Report, to the Director, by the 24-hour-a-day Identification and Warrants (ID) Unit.

The current public and ATSS telephone numbers of the ID Unit shall be included in the telecopier and AOD instruction booklets or memos.

51030.4.1 Administrative Officer-of-the-Day Incident Report, CDCR Form 837 Series

The Administrative Officer-of-the-Day Incident Report, CDCR Form 837 series, is the Department's initial written report to Central Office that an incident of departmental interest has occurred. It is essential that all information available at the time of the incident be entered into this report. Any subsequent updating of information relating to the incident should be forwarded to Central Office using the AOD 837 Log Number of that particular incident.

Initial Report Content

Initial reports by telecopier shall include all pertinent available information. New information significant to the incident shall be telecopied as received.

Press Releases

The Assistant Director, Communications, shall be notified by telephone of press releases or serious incidents. A written copy of the press

release shall be telecopied to Communications following the verbal notification.

51030.4.2 Incidents on Department Buses

The transportation sergeant or senior officer in charge of the bus shall be responsible for reporting incidents which occur during departmental transportation. The Captain, Transportation Unit, shall be responsible for the processing and distribution of incident reports prepared by staff of the transportation unit. Copies of the incident report shall be forwarded to institutions receiving inmates involved in transportation incidents.

51030.5 Formal Incident Reports

A written incident report shall be prepared and submitted to the Director within 72 hours of all reportable incidents. The Warden or RPA will review and sign this report.

51030.5.1 Supplemental Incident Reports

Initial incident reports to the Director shall be updated by supplemental incident reports until the incident is closed. The supplemental reports shall include all subsequent facts, information, and administrative actions taken relative to the incident.

51030.5.2 Incident Report Log

Facilities and parole regions shall establish and maintain an official log on all reportable incidents. All initial incident reports shall be assigned a log number. Incident report log numbers shall be obtained from the original CDCR Form 837 series, AOD Report, pertaining to the incident. All supplemental reports pertaining to a single incident shall contain the log number assigned to the initial report and shall be filed sequentially with the original report.

51030.6 Format and Content

Revised February 26, 1993

The facility watch commander or program lieutenant in charge of the specific area where the incident occurred shall be responsible for the preparation of the incident report. Departmental incident reports shall be prepared in accordance with the following outline and format:

- Subject.
- Synopsis.
- Persons involved.
- Summary.
- Action taken.

The outlined sections shall contain the following information when applicable:

- Subject. This section shall provide a brief one-or-two sentence description of the incident.
- Synopsis. This section shall contain a brief, concise description of the incident and involvement of the principal person(s). It shall also contain a description of the injuries, a prognosis for each injured person, the location of the incident, and the extent of property damage if any.
- Persons Involved. The following information shall be included on principal inmates involved:
 - Name(s) and prison number(s).
 - Custody classification and classification score.
 - Date received by the Department.
 - Date received by the facility.
 - Commitment offense and county of commitment.
 - Parole/discharge date/Board of Prison Term status.
 - List name(s) and job classification(s) of principal staff involved.
- Summary. This section shall contain a detailed report of the entire incident including, when applicable, the following information:
 - Type of incident, date, and approximate time of occurrence.
 - Location of incident.
 - All facts, details, and conclusions.
 - Any criminal acts committed and by whom.
 - Any property damage incurred and value estimate of loss.
 - Number and description of weapon(s) used by perpetrator(s) or recovered following the incident.
 - Types of weapons used by staff, i.e., firearms, chemical agents, tasers, or other lethal/nonlethal weapons. Number of shots fired and/or amount of chemical agents expended shall be included in this section. (See DOM 32010, 54060, and 55050 for additional information on the taser.)

- Compliance with procedures requiring review of medical/psychiatric records before taser is used and their findings.
- Detailed and specific description of any physical force used by staff during the incident.
- Types and amounts of controlled substances seized. Controlled substances shall be reported in grams or dosages.
- Describe circumstances surrounding any staff, inmate, or visitor death and details of care provided. Any last messages wished transmitted by the deceased shall be quoted.
- Describe any injuries to staff/inmates/visitors, medical aid provided, and prognosis. An (F) or (M) shall be placed after the names of injured staff members to designate whether male or female.
- Action Taken:
 - Describe any disciplinary or classification committee actions taken and outcome if known.
 - State if case was/was not referred for criminal prosecution. If referred, describe status or outcome if known.
 - State whether or not information officer and/or news media was notified.
 - State if case was referred to the BPT and actions taken if known.
 - State if Chief of Labor Relations was notified in cases of employee injury or death.
 - Describe actions to notify next of kin in cases of serious injury or death.
 - Describe measures taken to prevent recurrence.

51030.6.1 Attachments

The following attachments shall be included in incident reports when applicable:

- Arresting and/or witnessing officer reports.
- Reports of principal employees involved.
- Medical and/or death reports on injuries or deaths.
- Photographs shall not be attached to incident reports sent to the Director unless requested.

51030.6.2 Copies and Distribution

Incident reports shall be duplicated by the photocopy method only and distributed as follows:

- Two copies to the Director. (Three copies if death of staff or inmate by assault.)
- One copy to each institution if deemed serious or unusual, or if considered to contain information of particular training value. (Individual institutions may also request routine distribution.)

CYA Wards

- One copy to the Chief Deputy Director, CYA, for each CYA ward involved.
- One copy upon request to the Region Chief of the Department of Forestry and Fire Protection of conservation camp incidents involving forestry employees.

51030.6.2.1 Confidential Incident Reports

Incident reports which contain confidential information shall be written, controlled, and distributed in accordance with CCR 3321, and applicable information practices procedures.

51030.7 P&CSD Incident Reporting Policy

P&CSD incidents shall be reported in accordance with departmental policy as outlined in this procedure.

51030.7.1 Types of Reportable Incidents

The following types of incidents shall require the preparation of incident reports by P&CSD staff.

- Special incidents.
- Altercation/unholstered firearm.
- Shots fired by agent.
- Threats against public officials.

51030.7.2 Incident Reporting Procedures

Parole Agent

The Parole Agent involved shall obtain and document all available information and notify the unit supervisor or AOD.

Written reports by Parole Agents for all reportable incidents shall be completed within 24 hours of the incident.

Supervisory Responsibility

The unit supervisor or AOD shall notify the deputy Regional Administrator on the day the incident occurs. The deputy Regional Administrator shall evaluate the seriousness of the incident and notify the Regional Administrator and assistant deputy director by telephone when determined necessary.

Field Incident Report: Preliminary Incident Notification (CDCR Form 1662)

A CDCR Form 1662, Field Incident Report: Preliminary Incident Notification, shall be completed by the unit supervisor and telecopied to the deputy Regional Administrator on the day the incident occurs. A complete report with all additional information shall be forwarded to the assistant deputy director. The assistant deputy director shall forward the report to the Director by the Deputy Director when deemed necessary.

51030.7.2.1 Altercation/Unholstered Firearm

An incident report shall be prepared when parole staff is involved in an altercation or draws a weapon. The report shall be written on a standard departmental memorandum using the following procedures and format:

- Synopsis.
 - A brief one or two sentence description of the incident.
- Parties Involved.
 - List all persons involved in the incident noting their status as staff, parolees, inmates, or other persons.
- Procedure/Format
- Injuries to persons or property.
 - A description of injuries to any person, medical aid given, and prognosis. When reporting injuries, differentiate whether female or male by (F) or (M) behind the name of injured person. Damage to property of a staff person, parolee, inmate or any other person shall be listed with a damage estimate in dollar value.
- Details of Incident.
 - A detailed description of the altercation or incident involving unholstering of firearm.
- Reporting Staff Signature(s).
 - Report shall be submitted to the unit supervisor for review and approval.

51030.7.2.2 Shots Fired by Parole Agent

Any discharge of a firearm by parole staff for other than training purposes whether on duty or off duty shall be immediately reported to the local law enforcement agency and a Confidential Shots Fired Report prepared. Medical aid shall be summoned as soon as possible for any injured person. The Confidential Shots Fired Report and accompanying incident report shall be prepared using the following format and procedures:

Format

- Synopsis.
 - A brief one or two sentence description of the incident and number of rounds fired.
- Persons Involved.
 - List all participants and witnesses involved by full name, address, telephone number, and place of employment. Participants shall be listed as: department employee (title), inmate/employee, private citizen, or other appropriate title or identity. Include statements from witnesses and participants.
- Death, Injury, or Property Damage.
 - Describe injuries and/or wounds sustained by any persons. Describe any property damage including names and addresses of owners and give an estimated value of damages. If death occurs to an injured person after completion of the original report a supplemental report shall be submitted.
- Weapons Used.
 - Describe weapon(s) used during incident by employee(s) and other persons. Description for employee firearm shall include type and

model number of weapon, serial number, CDC number, number of rounds fired and disposition of the weapon.

- Firearms used or confiscated from other persons during the incident shall be identified by type and model number, serial number, number of rounds fired (if any) and disposition of the weapon(s). If confiscated weapon(s) was not fired, description shall include whether weapon was loaded or unloaded and number of rounds confiscated. When known, a statement shall be included as to whether the weapon was listed as stolen or how possession was obtained. If unknown at the time of report, the information shall be submitted on a supplemental report when available.
- Assistance by Other Agencies.
 - Names and telephone numbers of all departments and/or agencies assisting or responding in the incident shall be listed. Copies of their reports shall be attached to the incident package when available. Examples of departments/agencies to be included are: law enforcement agencies, ambulance/paramedic services, hospitals, and physicians, etc. Reports from assisting agencies that are unavailable prior to completion of the incident report shall be submitted with a supplemental incident report when received.
- Details of Incident.
 - A detailed chronological account of the incident shall be written. A narrative description of the scene and physical positions of all participants and witnesses shall be prepared and attached to the final report. All P&CSD staff directly involved in the incident shall submit a written report.
- P&CSD Notification.
 - Indicate date and time that the supervisor or AOD was notified of the event, including name of person notified.
- Analysis.
 - The immediate supervisor shall proceed to the scene of the incident and conduct a complete investigation including an examination of the firearm used by staff. The supervisor shall prepare an analysis report within four days of the incident and forward the report to the Regional Administrator and Deputy Director, P&CSD, within 24 hours of completion. The cause of the incident and degree of each participant's involvement shall be included. The analysis section shall be a separate document (addendum) to the main incident report and distribution shall be restricted to the unit supervisor, PA, Regional Administrator, assistant deputy director, and Deputy Director, P&CSD. The analysis section shall be removed from the incident report prior to distribution for training or informational purposes. Revisions to the analysis section shall be effected by supplemental reports to the authorized recipients listed above.

51030.8 Threats

Written or oral threats by inmates/parolees against the President or Vice-President of the United States; Governor of California; state, county or city officials; elected state officials; exempt appointees of the Governor; judges; BPT staff; and P&CSD staff; shall require the preparation of an incident report following procedures described in the subsequent sections.

51030.8.1 Threats Against the President or Vice-President of the United States

An immediate telephonic/teletype report shall be made to the following:

- During non-business hours, a teletype report shall be transmitted to the appropriate division.
- During business hours, the responsible Assistant Deputy Director, Institutions/Paroles shall be contacted who shall notify the Director when appropriate.
- Assistant Director, Law Enforcement and Investigations.
- U.S. Secret Service (local office).
- FBI (local office).

51030.8.2 Threats Against Other Public Officials

Threats against the Governor of California and all other officials listed in this section shall require immediate telephonic/teletype reporting to:

- Appropriate division during non-business hours.
- The responsible Deputy Director, Institutions/Paroles during business hours, who shall notify the Director when appropriate.
- Assistant Director, Law Enforcement and Investigations.
- CHP. Notification may be made to any of the following offices:
 - Division headquarters, Sacramento - (916) 445-1150.
 - Executive Protection Bureau-North - (916) 445-9636.
 - Executive Protection Bureau-South - (213) 620-3216.
- Executive Officer, BPT, if BPT staff are involved.

51030.8.3 Follow-Up Actions on Threats

When threats are made in writing, a copy of the threat shall be attached to the incident report.

- An evaluation of the mental condition and the mental history of person making the threat shall be included in the incident report.
- A copy of the incident report shall be distributed to departments and agencies listed in DOM 51030.8.1 and 51030.8.2.
- Upon evaluation of the threat, the inmate or parolee may be placed in custody pending investigation.
- If threat involves a P&CSD staff person, other measures, i.e., arming of the staff person, protection by local law enforcement or LEIU, or reassignment of the employee may be considered.
- Any reportable threat shall be placed in the inmate/parolee C-File and in the field file of parolees. The files shall be clearly noted for identification.

51030.9 Escape/Abscond/Parole or Discharge

In the event any inmate under the provision of DOM 51030.8 escapes, is discharged, or released on parole, or any parolee under this provision absconds or is discharged, the appropriate agencies outlined in DOM 51030.8.1 and 51030.8.2 shall be immediately notified.

51030.10 Revisions

The Deputy Director, Institutions Division, in conjunction with the Deputy Director, P&CSD, or designee shall ensure that the content of this section is accurate and current.

51030.11 References

PC § 76.

ARTICLE 4 — POST ORDERS

Revised July 3, 1998

51040.1 Policy

Each Warden and Health Care Manager shall ensure that post orders are completed for all posted positions, to include special assignment positions (i.e., contraband watch, hospital guarding, etc.).

51040.2 Purpose

Post orders shall be complete and concise. Only general functions and specific duty directives shall be referenced in post orders. Department policy directives should be referenced in post orders but not be reiterated in their entirety. Those matters that are not specific to post duties should be communicated to staff through: IST, OJT, or other communication methods.

51040.3 Staff Responsibility for Post Orders

The Captain or area Manager (i.e., Health Care Manager, Food Manager, etc.) is responsible for the initiation, revision, distribution, and maintenance of post orders.

51040.4 Review, Update, and Finalization of Post Orders

Each Captain and Health Care Manager shall establish a schedule so that all post orders receive an annual review and update to incorporate changes in rules, regulations, policy, institution operations, and the DOM. Whenever a post order is reviewed or updated, the date of the review shall be included on the post order.

- The Captain or area Manager shall assign a second line supervisor to be responsible for the review, revision, and/or preparation of designated post orders.

Post orders shall be accurate, complete, and concise.

- Post order drafts shall be submitted to the immediate supervisor for review then forwarded to the second line supervisor who, after approval of the draft, shall have the post order prepared in final form. The Health Care Manager shall submit the post order drafts to the first line supervisor who, after approval of the draft, shall have the health care staff post order prepared in final form. The respective Associate Warden, Chief Deputy Warden, or Health Care Manager shall review and approve all finalized post orders.

51040.5 Post Order Format

Post orders shall not exceed 4 pages in length and shall be prepared utilizing the following format:

- Revision Date:
- Division/Institution:
- Post Description:
- Post Order Number:
- Watch:
- Hours of Work:
- Regular Days Off:
- Direct Supervisor:
- Indirect Supervisor:
- Area of Responsibility:
- General Duties and Responsibilities:
- Special Instructions:
- Operational Time Schedule:
- Signature Blocks.

51040.5.1 Post Order Language

Post orders shall contain the following language:

“All peace officers have the responsibility to take appropriate action during an emergency (including physical restraint) and to work assignments as necessitated.”

51040.6 Post Order at Job Site

The Captain or area Manager shall ensure that a current copy of the Post Order is prepared for every post and a copy shall be physically located at each job site.

51040.6.1 Post Order Reading and Understanding Requirements

Supervisors, by authority of the Captain or area Manager, shall ensure that employees read and understand their post orders upon assuming their post.

Employees under post orders are required to sign and date the CDC Form 1860, Post Order Acknowledgment Form, verifying their understanding of the duties and responsibilities of the post. This shall be completed when the employee is assigned to the post, when the post order has been revised, or upon returning from an extended absence.

At a minimum of once each month, supervisors shall inspect the post orders and sign the CDC Form 1860. Any torn or missing pages noted shall be replaced as soon as practical.

51040.6.2 Post Order Acknowledgment Form

A CDC Form 1860 shall be attached to each post order and shall be utilized to verify that the assigned staff member has read and understood the post orders for their post.

- When all the signature blocks on the CDC Form 1860 are filled, it shall be removed and maintained in a file in the Captain's office or Health Care Manager's office (for health care staff). The CDC Form 1860 shall be maintained for a period of one year from the date of last entry unless deemed evidentiary (then retained until no longer needed).

51040.7 Post Order File

The Captain's office or Health Care Manager's office (for health care services post orders) shall retain all current/updated institution post orders on computer diskette, as well as hard copies. All post orders shall be archived for a period of one year, unless deemed evidentiary (then retained until no longer needed).

51040.8 Revisions

The Deputy Director, Institutions Division, or designee shall ensure that the contents of this section are kept current and accurate.

51040.9 References

ACA Standards 2-4200 and 2-4201.

ARTICLE 5 — POST ASSIGNMENT SCHEDULE

Effective December 19, 1989

51050.1 Policy

All Wardens and RPAs shall maintain currently approved post assignment schedules. The schedules shall reflect the most recent revisions of 30 days duration or longer. Each Warden and Regional Administrator shall update their post assignment schedule in September for the current fiscal year (e.g., September 1988, for fiscal year 1989-90). The post assignment schedules shall reconcile with the most recent Governor's budget available, as amended by legislative action.

51050.2 Purpose of Post Assignment Process

The post assignment schedule (PAS) is a vehicle identifying how the Governor's budget is converted to authorized staffing of a facility. The master assignment roster provides an approved method for effectively staffing the operation of an institution on a day-by-day (shift-by-shift) basis.

51050.3 Maintenance of Schedules

Separate post assignment schedules shall be maintained for each of the following areas:

- Custody.
- Food service.
- Medical-dental and psychiatric.

51050.3.1 Custody

A post assignment schedule for custody shall include all positions in the custodial series within the institution, reception center, or community correctional center. This includes officers, sergeants, lieutenants, captains, training officers, and Associate Wardens.

51050.3.2 Food Service

A post assignment schedule for food service shall include all food service positions, exclusive of clerical.

51050.3.3 Medical, Dental, and Psychiatric

A post assignment schedule for medical-dental and psychiatric shall be all supervisory and rank and file positions, exclusive of doctors of medicine, doctors of dental science, psychologists, and clerical positions.

51050.3.4 Definitions of Post Positions, Personnel Year

A post is a specific work assignment to be performed by one individual at a time on a specific shift or watch and for a specified number of days per year.

- This definition also identifies or assigns a post to a specific watch. A tower that is manned 24 hours per day, 365 days a year, is not considered one post. Since it involves all three watches, it is three separate posts.

Post Position

A position is a budgetary concept that equates to an annual salary plus benefits paid to an individual for the performance of a given kind of work (i.e., a classification such as OA II or Officer).

Personnel Year

A personnel year is the number of days worked by an employee in one year. Currently, a personnel year is set at 227.5 days.

- This figure is the basis for determining the number of positions needed to fill posts based on the number of days per year the post requires staffing.
 - A post requiring 331 days of coverage per year will require $331/227.5 = 1.46$ positions.
 - A post requiring 104 days of coverage in one year will require $104/227.5 = .46$ positions.

51050.3.5 Included Positions

All budgeted post assignments shall be carried on the post assignment schedule.

51050.4 Formulas

Formulas provide the method used to effect the correct staffing of a facility, including base coverage and relief. The formulas, as determined by the DOF, are subject to change based on the estimated relief required for post coverage. Currently the DOF utilizes the 1.61 formula. Post requiring less than full relief are documented by fractionals indicating only relief that is required. This is determined by the number of shifts and the number of days per week post coverage is necessary and whether that post needs regular days off (RDO), vacation, holiday, or sick leave relief.

- The 1.61 formula, based on a personnel year of 227.5 days, (Refer to DOM 51050.3.4) went into effect for all positions approved after July 1, 1987 and is the formula used for staffing all facilities.
- The number of days per year allotted to each type of relief under the current formula based on a personnel year of 227.5 days is as follows:
 - $RDO = 104 \text{ days} = 104/227.5 = .46 \text{ positions.}$
 - $VR = 13 \text{ days} = 13/227.5 = .06 \text{ positions.}$
 - $Hol = 13 \text{ days} = 13/227.5 = .06 \text{ positions.}$
 - $SL = 7.5 \text{ days} = 7.5/227.5 = .03 \text{ positions.}$
- These forms of relief add up to .61 positions. A post requiring full relief coverage eight hours per day, 365 days per year therefore requires 1.61 positions.

51050.5 Detailing Post Assignment Schedule

CDC Form 671-C, Post Assignment Schedule (PAS) - Detail (Part C), shall list post by rank and in sequential order. Each classification shall be started on a new detail sheet. Allow for expansion of the number of posts within the sequential order in subsequent sections of the PAS. It is advisable to leave spaces between major program units or areas within a particular classification. Post detail information is determined by staffing (i.e., 1st, 2nd, 3rd watch) and authorized position count.

- Post Assignment Schedule - Detail sheet shall include the following:
 - Post number - as determined by the person developing the post assignment schedule.
 - Post description.
 - Watch - when posts are reflected on multiple shifts, each must be delineated separately.
 - Position total - the total of each post or identified relief shall never exceed the number one, i.e., there shall never be more than one person in one post at any given time.
 - For each post classification, there are four different kinds of relief. (RDO, Vacation, Holiday, and Sick Leave.) These shall be reflected in the appropriate column.

The positions requiring relief information are derived by totaling, within each classification, the different areas of relief (i.e., RDO, vacation, holiday and sick leave).

- At the bottom of each detail sheet is a row labeled "TOTALS". The number of ones "1's" in each column should be placed in the appropriate box at the bottom of the detail sheet.
- Once the proper relief information is obtained by totaling the column counts on the detail sheet, it shall be transferred to the positions requiring relief column on the summary sheet.
- At the extreme right edge of the detail sheet under the heading of "other" this column is to be used for two purposes:
 - It should contain the number of the corresponding post from the preceding year's Post Assignment Schedule.
 - It should contain a letter designation assigned by the preparer of the PAS identifying the specific CDC Form 607 by fiscal year authorizing the establishment of the post described on the same line.

Note: The PAS shall contain a cover sheet identifying the letter designations of each CDC Form 607, the CDC Form 607 number, the fiscal year of the CDC Form 607, and a brief description of the CDC Form 607 derived from line 10 of the CDC Form 607.

- A new post that has no corresponding number in any preceding PAS should be designated "NEW" in the "other" column with a reference to the authorizing CDC Form 607 document number.
- The importance of being able to track posts from one year to the next to its original authorizing document cannot be over emphasized.

Footnotes - shall be located at bottom of the same page as information referenced.

51050.6 Post Assignment Schedule - Summary

The purpose of the PAS summary sheet is to convert detail information into personnel years in order to obtain the correct position count in each classification.

- When the PAS summary is completed it shall reconcile with the Governor's budget/salary supplement.
- Each classification shall be computed individually. The person days information is derived by utilizing the 1.61 conversion formula.
- The PAS Summary Sheet contains five identical blocks of row/column configurations -- each is intended for the calculation of the total positions required to staff the posts of a given classification. The classification to which each block applies should be typed under the heading, "POSITION CLASSIFICATIONS".

The days of total relief information is derived by multiplying the positions requiring relief by the days column. The total days of relief information is derived from totaling the various sections (i.e., RDO, vacation, holiday, and sick leave) within the days of total relief column.

- The divisor (base) for the total days of relief column is derived from the 1.61 conversion formula. (RDO-104, VAC-13, Hol-13, SL-7.5).

The total person years of relief column information is derived from dividing the total days of relief column information by the indicated base.

The total regular positions column information is derived by totaling the entire column, within each classification, on the detail sheets.

The total positions regular relief column information is derived from adding the total personnel years of relief column information with the total regular positions column information.

51050.7 Reconciliation and Annual Update

Reconciliation of the PAS to the Governor's budget shall be the function of Business Services, however, it shall be done in concert with the Associate Warden, Business Services, or designee, and the personnel lieutenant who puts together the PAS detail and summary. Since the budget cannot be adjusted, the PAS shall be adjusted to reconcile with the budget. Reconciliation shall be annotated to reflect:

- All custody positions by classification, including those outside the custody reporting units.
- CDC Form 607 which impact adjustments.
- Identify whether it is custody, medical, or food service.
- Each classification shall be within 0.5 positions of budgeted total with the inclusion of temporary custody help. Grand total (all classes) shall be within 0.5 positions of budgeted total but shall not exceed the Governor's budget.

51050.8 Annual Update and Submission

For clarity the following CDC forms shall be referred to:

- CDC Form 671 - Post Assignment Schedule - Reconciliation as Part "A".
- CDC Form 671 - Post Assignment Schedule - Summary as Part "B".
- CDC Form 671 - Post Assignment Schedule - Detail as Part "C".

The purpose of Part "A" Reconciliation, is to ensure that the facility total position count in each classification reconciles with the position count derived from the Governor's budget.

Prior to October 1, Part "B" and Part "C" shall be reviewed for changes since the last approved revision or submission. If changes have occurred since the last approved PAS, Parts "B" and "C" shall be revised accordingly. Revised and/or existing copies of Parts "A", "B", and "C" shall be submitted annually and distribution shall be as listed below in this section.

In order to reconcile the PAS with the authorized position count, fractional positions and temporary help blankets shall be accounted for. In addition, institutions that have established temporary help/sick leave blankets to fund sick leave usage shall account for fractional positions and temporary help in order to reconcile the post assignments.

Differences of 0.5 of a position or less between the post assignment schedule count and the budgeted count as reported on Parts "A" and "B", are permissible, within each classification. However, the total institution post assignment schedule count shall not exceed the total budgeted count.

Relief for posts, as indicated on the PAS, shall reflect accurately the actual relief provided. For example, if a post is assigned vacation, RDO, holiday, and sick leave relief, such relief shall be indicated in Part "C" and carried forward to Part "B".

The annual submission of the PAS shall include six copies. (No mimeograph or ditto copies). This package shall be submitted to the Deputy Director, ASD, no later than October 1 of each year.

The Budget Section, ASD shall confirm reconciliation with the authorized position count and shall forward to the appropriate office for approval. Ultimate distribution of the approved PAS shall be as follows:

- One copy to the DOF.
- One copy to the Legislative Analyst.

- One copy to the Deputy Director, Institutions Division.
- One copy to the Budget Section files.
- One copy to the Budget Analyst.
- One copy to the institution (approved copy).

51050.9 Approval of Revised Post Assignment Schedule

Post assignment schedule revisions of 30 days or more duration shall require departmental approval.

Revisions of 30 days duration or more shall be submitted for approval as they occur. The affected pages of Part "C" shall be revised. Parts "A" and "B", if affected by the change, shall also be revised. (Refer to DOM 51050.10).

A comprehensive justification, in the form of a memorandum, shall also be submitted explaining the proposed changes and the reason for such changes. A synopsis of the changes shall be included. If the revision includes the deletion of a post(s), the institution shall explain how it will function without that post(s).

The PAS revision shall be reported to the DOF and the Legislative Analyst after department approval, it shall be written in such a manner that non-departmental personnel will fully understand the proposed changes.

Six copies of the revised pages and the justification shall be submitted to the Deputy Director, ASD.

51050.10 Master Assignment Roster Purpose

The purpose of the master assignment roster (MAR) shall be to convert approved PAS information into a working document which shall be utilized by staff in a facility on a daily basis.

The PAS is the controlling document. The master roster developed from it must be a true and accurate representation of it (i.e., the post and reliefs provided in the master roster must correspond identically to the posts detailed in the PAS). Any changes to the PAS shall also be reflected in the MAR. The MAR provides:

- A ready reference point for identifying employees by name, watch, post, position title, RDO's, program unit, etc.
- A definitive roster from which the daily watch sheets can be produced.
- A source for statistical analysis of employee/post information (e.g., ethnic or gender reports, 60/40 watch preference report, etc.).

51050.11 Post Numbers

Each post number should be prefaced by watch indicator (e.g., 101 for first watch; 201 for second watch, 301 for third watch). Additional clarification shall be gained by prefacing each RDO relief position with a letter designation (e.g., RO-101 where "R" = relief and "O" = officer; RS-101 where "S" = sergeant, and RL-101 where "L" = lieutenant). At institutional complexes with more than one facility (e.g., Correctional Training Academy) each post may be prefaced by a fourth indicator (e.g., CTF-C, 1101; CTF-N, 2101; CTF-S, 3101).

51050.11.1 Master Assignment Roster Work Sheets

The construction of the MAR is best accomplished by transferring the PAS information to MAR work sheets and using a two person team. The team shall be comprised of the Captain who is responsible for constructing and developing the PAS and the other shall be the personnel assignment lieutenant.

- One team member shall identify and verbalize necessary PAS information for inclusion in the MAR and the other team member shall transpose that information to the MAR worksheet.
- The MAR worksheet serves a vital function in the preparation of the MAR. It isolates the posts requiring relief, with the RDO relief positions that shall serve as their relief.

Each RDO relief position shall provide relief for two and one half posts; the worksheet is divided into seven horizontal rows and nine vertical rows.

- The first five horizontal rows are for posts that shall receive the relief.
- The last two horizontal rows are for the RDO relief positions that shall provide the relief.
- The first vertical row is for the post number, the second for the post description (title), and the last seven for the days of the week.

- As RDOs are designated for a post, the RDO relief position's number is written in the appropriate day column, and the post which is being relieved shall have its post number written in the appropriate day column of the RDO relief position which is designated as its relief.

51050.11.2 Considerations

In constructing the MAR or MAR work sheets, employees occupying specific posts shall not be considered; only the post, its security and/or supervisory requirements shall be considered.

RDO Positions

RDO relief positions shall not be established where the position only relieves one post during the work week and the remaining four days are called utility days. Utility days are days without a pre-assigned post and are used where coverage is needed (i.e., sick coverage). The one remaining post shall require relief coverage with a permanent intermittent employee or on an overtime basis.

- Utility days built into RDO relief positions shall be minimized.
- Three utility days per classification is the maximum acceptable; however, this maximum is unacceptable if other alternatives exist.

RDO Structure

To determine RDO relief structure, transfer information from PAS relative to all posts requiring relief to MAR work sheets.

- Use unique identifier for both classification and watch. (Refer to DOM 51050.11).
- Where possible, maintain an RDO relief within the same area of supervision.
 - Ensures continuity.
 - Maximizes job familiarity.
 - Enhances supervisory efficiency.
 - Ensures first and second line supervisors within same supervisory area do not have the same days off.
- Every effort should be expended to minimize the number of RDO reliefs that cover more than one watch. However, when scheduling an RDO relief to cover more than one watch, consider the employee and utilize the 3-2-1 concept.
- Using the 3-2-1 (third, second, first watch) concept extends the hours of regular days off.

51050.11.3 Relief Positions

The number of vacation relief positions (by individual classification) is established by summarizing days of total relief for vacation and then dividing the total by the formula base. (.06).

- To determine Holiday relief positions use the same formula as vacation relief positions.

51050.12 Formatting Master Assignment Roster

After completion of MAR work sheets, consideration shall be given to formatting the MAR and daily watch sheets in the same positional sequence. Formatting order shall be watch, unit, area of supervision, classification (rank), post number, name, RDO, and comment section.

51050.12.1 Watch

All MAR information shall first be segregated and structured by watch.

51050.12.2 Area of Supervision

Areas of supervision shall be segregated and structured according to each unit of responsibility and clearly identify every post under his/her supervision.

51050.12.3 Classification

Classification (rank) shall follow area of supervision in the structure sequence of the MAR.

51050.12.4 Post

MAR information shall be structured in sequential order of the post number (vertical column 1).

51050.12.5 Position Title

The position title shall be placed in vertical column 2 and shall not deviate from PAS approved position title. Abbreviate where space requires.

51050.12.6 Name

Column 3 shall be used to reflect the name of the employee presently assigned to the position. Vacation relief (VR) is indicated in this column by placing VR's name and vacation relief beginning and end dates in parentheses after regular employee's name.

51050.12.7 Regular Days Off

The next seven vertical columns, identifying the days of the week normally beginning with Monday and ending with Sunday, are used to reflect the indicated post RDOs.

- Where relief is provided, the relieving positions RDO relief number shall be indicated in the appropriate RDO column.
- Post which do not require relief, "R", "RDO" or some other representation shall be placed in the RDO column to indicate no relief is provided.

51050.13 Variances Between Post Assignment Schedule and Master Assignment Roster

The PAS allows .46 relief for each post that requires RDO relief; however, in developing the MAR you only need .40 relief for each one hundred post requiring RDO relief. As a multiplier, for every ten posts you shall utilize 4.0 RDO relief even though you are budgeted for 4.6.

RDO relief--for every hundred posts requiring RDO relief you are budgeted for 46 RDO relief positions.

Note: Based on example of 100 positions (40 actual against 46 budgeted), the six positions shall be placed in the RDO relief positions for budget accountability.

51050.14 Daily Time Sheet

Daily time sheets shall be derived from the master roster and shall reflect the same post numbers and titles as are in the PAS.

- They are used on a daily basis on each watch to verify the work status of each employee on a particular day.
- Daily time sheets are used by the personnel timekeeper to post time on the master attendance books for payable disbursement purposes.
- The daily time sheet also reflects pay blanket codes and are therefore used in tracking and managing expenditures, (i.e., sick leave usage).
- Daily time sheets are used to record information required under the FLSA.

Format

All facility daily time sheets shall contain the following elements:

- Unit/facility.
 - Watch.
 - Date and day.
 - Post number.
 - Post title.
 - Regularly assigned hours column.
 - Employee name and initials.
 - Column for start and stop times.
 - Plus and minus code column.
 - Hours worked column.
 - Comment column.
 - Overtime section.
 - Temporary/overtime assignments shall be entered on the lower portion of the sheet.
 - Signature block for preparer and for receiver.
- Time sheets shall be reviewed for accuracy and approved by the supervising lieutenant.
- Daily time sheets should never be changed except to accurately reflect authorized changes in the MAR. To ensure that this is the case, daily time sheets should be audited against the MAR in conjunction with any audit of the MAR against the PAS.

51050.15 Redirection/Revision

When a redirection/revision to the PAS is warranted, a comprehensive justification, in the form of a memorandum, shall be submitted explaining the proposed changes and the reason for such changes. A synopsis of the changes shall be included.

If the revision includes the deletion of a post(s), it is critical that you explain how it shall function without the post(s). If required, CDC Form 607 shall be submitted.

Future Automation Plans

The Administrative/Personnel Automation Unit is presently developing a customized automated post assignment schedule on a personal computer system. The customized system will provide a monthly reconciliation with the most recent Governor's budget and provide a means to identify authorized staffing at the institution level.

Once completed the guidelines and institutions for use shall be distributed to each institution. Some training of users is anticipated.

51050.16 Revisions

The Deputy Director, Institutions Division, or designee, shall ensure that the contents of this section is accurate.

51050.17 References

PC § 5054.

ARTICLE 6 — DAILY ACTIVITY REPORT

Revised May 20, 1993

51060.1 Policy

Each Warden shall maintain a chronological log of unusual or significant occurrences regarding inmates and staff or other events about which facility management should be informed.

51060.2 Purpose

The purpose of this procedure is to establish guidelines for a comprehensive compilation of occurrences within the facility for review by administrative staff.

51060.3 Responsibility

The logging of all pertinent information shall be delegated to Watch Commanders on each shift.

51060.4 Recording Methods

Activities and events that are not otherwise recorded and readily available for review by administration and other staff, shall be recorded on the Daily Activity Report (DAR).

All staff working a particular shift or watch shall report through the chain of command all significant information pertaining to their assignment. This information shall be assembled on one report by watch, first watch through second and third watches.

51060.4.1 Content

Each facility/parole region shall develop a daily activities report form that will supply the information relative to their needs.

- Routine information that is readily available through log, records, etc., that can be obtained swiftly need not be included.
- Any information of unusual or significant events/actions shall be included.

The following items are examples of content only:

- Delays in count.
- Population changes.
- Accidents (any type).
- Any felony or serious misdemeanor occurrence.
- Delays in serving meals.
- Injuries to staff, visitors, or inmates.
- Sick leave usage (numbers of staff).
- Overtime usage.
- Inspection report.

51060.5 Distribution of Report

The Watch Commander shall prepare the DAR and adequate copies for distribution. The original report shall be retained in the Watch Office as a permanent log. A copy shall be forwarded to the Captain or the Associate Warden--Custody, and a copy shall be delivered to the Warden and Chief Deputy Warden. Other copies may be provided to staff based on the need of the facility.

The Captain or Associate Warden shall take whatever follow-up action is indicated in reference to items reported and shall report such actions to the Warden by 9:00 a.m. on the first day following the recording except on weekends and holidays.

The Watch Commander shall report significant occurrences to the Warden at any time through the normal chain of command or through the Administrative Officer-of-the-Day.

51060.6 Revisions

The Deputy Director, Institutions Division, or designee shall be responsible for ensuring that the contents of this section are kept current and accurate.

51060.7 References

PC §§ 5054 and 5058.

ARTICLE 7 — INMATE DEATHS, SERIOUS INJURY, OR ILLNESS**NOTIFICATION**

Revised September 8, 2008

Updated September 6, 2013

51070.1 Policy

The Department shall treat the death, serious injury, or serious illness of an inmate or parolee with dignity and respect as is regularly accorded persons who are not incarcerated or on parole. The procedures to be followed after death, serious injury, or illness shall comply with the requirements of all applicable laws.

51070.2 Purpose

The purpose of this Section is to outline the duties of all staff involved when a death, serious injury, or illness of an inmate/parolee occurs. For purposes of this Section, parolee is defined as: a parolee currently incarcerated in a CDCR facility pending a revocation action by the Board of Parole Hearings, or in a CDCR facility based substance abuse treatment program.

51070.3 Possible Death

An employee discovering a possible inmate/parolee death shall immediately summon medical assistance. Pending arrival of medical assistance, the employee shall make every effort to preserve life.

This may include first-aid, Cardio Pulmonary Resuscitation (CPR), and other life-saving measures for which the employee is trained. Life support measures shall be continued until the medical personnel arrive.

Medical personnel will continue life saving efforts unless one or more of the following signs of death are present. If one or more sign is present, the physician will determine if patient is deceased.

- Rigor mortis/dependent lividity.
- Tissue decomposition.
- Decapitation.
- Incineration.

Once started, CPR shall continue until:

- Resuscitation efforts are transferred to a rescuer of equal or higher level of training.
- The patient is determined to be deceased by an MD.
- Effective spontaneous circulation and ventilation have been restored.
- Emergency responders are unable to continue because of exhaustion or safety and security of the rescuer or others is jeopardized.
- A written valid Do Not Resuscitate order is presented.

If a medical officer is not present when the inmate dies, the medical personnel will, in addition to the above:

- Notify the Chief Medical Executive (CME), staff medical officer, or the Medical Officer-of-the-Day (MOD) as appropriate.
- Notify the supervising nurse on duty, or on call.
- Notify the senior custody officer on duty.

A physician shall examine the patient at the earliest possible moment to determine if the patient has expired.

51070.4 Pronouncement of Death

Only a doctor of medicine shall pronounce a person dead.

51070.5 Responsibility of Warden/Regional Parole Administrator (RPA)

The Warden/RPA or their designees shall:

- Effect all medical and legal requirements as soon as practicable.
- Ensure that all necessary requirements for care and maintenance of remains and artificial appliances following death are accomplished in accordance with instructions dictated by the appropriate coroner's office and this manual.

51070.6 Chief Medical Executive

Revised September 6, 2013

The CME or MOD on duty shall:

- Notify the watch commander or senior custody officer in the area of occurrence that the patient/victim has expired stating the time of death.
- Notify the coroner of the death and request their inquiry or release of the body.
- Upon obtaining the coroner's permission, cause the body to be covered and removed to the morgue or a private room in the treatment facility.
- Notify the Warden or Administrative Officer-of-the-Day (AOD), giving all significant points of administrative and medical/legal interest.
- Prepare a written summary of circumstances surrounding the death on CDCR Form 7229-A, Initial Inmate Death Report, or CDCR Form 7229-B, Initial Inmate Suicide Report, providing tactful wording of information that can be used in notifying the contact listed. Any last messages the deceased wished to be transmitted must be quoted.
- An original and five copies shall be prepared and routed to the Warden.
- Notify all required agencies of any communicable diseases discovered during examination.
- In the event the deceased inmate had a diagnosed communicable disease, the contract funeral director charged with the removal of the body from the facility shall be notified of such disease prior to the release of the body.
- Close out all medical records and transmit them to the records office for inclusion in the decedent's C-File.

51070.6.1 Death Certificate

The CME or physician examining the body and pronouncing death will specifically determine whether he/she can sign the death certificate or must refer it to the coroner. H&SC 10259 states the coroner will be notified and will sign the death certificate if death occurs:

- Without medical attendance.
- During the continued absence of the attending physician (vacation, etc.).
- Where the attending physician is unable to state the cause of death.
- Where suicide is suspected.
- Following an injury or accident.
- Under circumstances as to afford a reasonable suspicion that the death was caused by the criminal act of another.

The physician shall complete and sign their section of the death certificate within 15 hours of the death. An original and five copies will be prepared. The original will be forwarded to the undertaker for completion and the copies will be routed to the Warden. Pursuant to H&SC 10204, the coroner shall complete the certification of death within three days after examination of the body.

51070.7 Responsibility of Senior Custody Staff Member

Revised September 6, 2013

Upon notification of a possible death, the senior custody staff or watch commander shall assure the following steps are accomplished:

- Make or cause to be made the decision for the need to secure the death/incident scene. Any evidence and areas surrounding the death/incident scene shall not be disturbed until an investigating officer is assigned and on the scene.
- Initiate investigation or other custody measures as indicated.
- Order all pertinent materials gathered, i.e., personal property, visiting information, mail card, etc.

51070.7.1 Identify Decedent

Revised September 6, 2013

The senior custody staff member shall arrange for identification of the deceased as soon as practical.

Fingerprints

- Arrange for the taking of a full set of the deceased's fingerprints on the approved Fingerprint Card, signed by the employee taking the prints.
- Required for legal identification of deceased.
- If fingerprinting is impossible, positive identification must be made by other means (photograph, scars, etc.).

Other

- Identification by means other than fingerprinting requires a notarized affidavit.
- Fingerprint cards or affidavit shall be forwarded to the C&PR.

Exception to Fingerprinting

In circumstances involving suspected homicide, fingerprints shall not be taken. Each hand shall be wrapped in a paper container by the medical representative or the institutional investigator.

Fingerprinting shall be completed by the coroner/designee.

- Notify the chaplain of the death giving the inmate's religion if known.
- Notify the Warden or AOD and the CME or MOD.

51070.8 Circumstance of Death Report and Distribution

The highest ranking custodial officer or designee shall prepare and deliver within four hours of death a brief notice providing the decedent's name, number, time and place of death, and other pertinent facts to:

- The Warden/RPA.
- Chief Deputy Warden.
- CME.
- Associate Warden, Business Services.
- PIO/AA.
- Correctional Case Records Manager (CCRM).
- Correctional Captain.
- Parole agent or reentry facility administrator.
- Chaplain of the deceased's faith.

51070.9 Notification of Appropriate Agencies**Two-Hour Notification**

Any death of an inmate in any facility of the Department, including contract facilities, shall be reported within two hours of the death to the county sheriff and the coroner, or their designee of the county in which the facility is located, and if the facility is located within the city limits of an incorporated city, the chief of police in that city, or their designated representative.

Additional Notifications

The death shall also be initially reported to the DA or designee of the county in which the facility is located, to the Director, Division of Adult Institutions, and to the Director, Division of Correctional Health Care Services, as soon as those personnel are on duty, but within 24 hours of the death.

Initial Report of Death

The initial report of the death may be transmitted by telephone, direct contact, or written notification, and shall outline all pertinent facts known at the time the report is made and all persons to contact, in addition to any other information the reporting person or officer deems pertinent.

- The Warden, RPA, or designee shall notify law enforcement personnel.
- The facility CME shall notify the coroner.

Written Report, Within Eight Hours of Death

Within eight hours of the death of an inmate in any facility of the Department, including contract facilities, a written report CDCR Form 7229-A or 7229-B shall be submitted by the Warden or RPA to those entities noted above. This written report shall include all circumstances and details of the death known at the time of report preparation, and shall include the names of all involved persons, and all persons with knowledge of the circumstances surrounding the death. A copy of the CDCR Form 7229-A or 7229-B shall be retained in the office of the CME and the investigative office until conclusion of any investigation; one copy shall be placed in the deceased inmate's C-File. In community based correctional facilities, the RPA shall retain one copy of the report until conclusion of any investigation.

Attorney General Notification

The following reports and records shall be delivered to the Attorney General's Office, Bureau of Criminal Statistics, Statistical Data Center:

- Complete incident report or report of death as applicable.
- Completed copy of death certificate.
- Fingerprint card (two sets).
- Coroner's report (if applicable).

One copy of each of the preceding documents shall be forwarded to the Director of the Division of Juvenile Justice if the deceased is a youth offender of that agency.

51070.10 Notification of Contact Listed

Revised April 9, 2014

Receiving and Release (R&R) staff in Reception Centers shall ensure that primary and alternate emergency contact information is entered in the Strategic Offender Management System (SOMS)/Electronic Records Management System (ERMS) application for each incoming inmate (new admissions and parole violators). The inmate is interviewed by R&R staff upon his/her arrival from the county and the information is entered into SOMS. The form is printed and signed by the inmate and then scanned into ERMS. If the inmate refuses either to list a next of kin or to sign the form, staff shall indicate the refusal, date

and sign the form. Facility classification staff at all CDCR facilities shall ensure the Notification in Case of Inmate Death, Serious Injury, or Serious Illness is updated:

- Annually as part of the classification review process.
- Upon recommendation of transfer by a classification committee.
- Whenever an inmate advises his or her correctional counselor of a desire to change the information contained in the SOMS/ERMS application.

In the event of a death, serious injury, or serious illness, the Warden or designee at the level of Correctional Lieutenant or Correctional Counselor II or above shall use all reasonable means to contact the person(s) identified on the Notification form. The senior custodial officer shall review the inmate's C-File and Emergency Contact information contained in SOMS/ERMS and notify the contact listed as soon as possible.

- Telephone notification of contact listed should be used whenever possible. Custody staff shall not attempt to provide medical information regarding the inmate's health or cause of death, but shall refer the contact listed to the facility CME or physician designee or to the County Coroner's office. The staff member making contact shall verify the mailing address of the contact listed.
- In all cases of death, a tactfully worded letter, over the name of the Warden, shall be sent to the contact listed. Written notification shall be done by return-receipt mail.

The following format may be used in the event of a death:

(Name of contact listed)

"I regret to inform you of the death of your (relationship), name, and date. Remains have been released to (name of contracting mortuary, address and phone number of mortuary). They are awaiting further instructions for the final disposition of your (relationship) without expense to the State. If not claimed within 48 hours, disposition must be made as provided by law. Please notify (contract mortuary) whether you will claim the body. You may contact the County Coroner's Office at (Area Code) XXX-XXXX if you have questions regarding the cause of death of your (relationship). We extend our sympathy in your loss."

If notification cannot be immediately made in the aforementioned manner, the Warden or designee at the level of Correctional Lieutenant or Correctional Counselor II or above shall use all reasonable means to make contact with family members including but not limited to:

- Assigning Investigative Services Unit (ISU) staff to utilize telephone sign-up sheets, Inmate Monitoring and Recording Systems, searching the inmate's personal property (while preserving crime scene evidence), reviewing the inmate's visiting file, contacting the previous Parole Agent (if any), contacting the local Coroner's office, contacting the arresting agency, reviewing social media, and/or contacting the Office of Correctional Safety (OCS), etc., to locate contact information.
- Contact the appropriate consulate office if the inmate is a foreign national.
- All efforts made to locate and notify the next of kin shall be documented on a CDCR 837-C, Crime/Incident Report Part C–Staff Report or General Chrono, CDC 128-B.

If notification with the contact listed cannot be made within 72 hours, the Warden shall notify their respective Associate Director (AD) that all reasonable means for obtaining contact information have been exhausted. The AD shall make contact with the OCS for any additional assistance in locating the next of kin.

51070.11 Removal of the Body

Revised September 6, 2013

The highest ranking custodial officer or their designee shall determine if the coroner has placed a hold on the body. If not, the custodial officer shall request the contract mortuary to pick up the body. The custodial officer shall obtain a body receipt form from the undertaker at the time the remains leave the facility. This form shall be completed in quintuplicate and distributed as follows:

- Original to the watch commander.
- One copy to control or the facility head.
- Two copies to the mortician (who leaves one copy at the gate).
- One copy to the CCRM.

51070.12 Responsibility of CCRM

The CCRM shall prepare a report supplying the information necessary to complete items 1A through 21D of the Certificate of Death, to the health services treatment facility (medical department).

51070.12.1 Notifications Pursuant to 11155(B) PC

The CCRM shall notify the persons or agencies who have requested such notification pursuant to PC 11155(b).

51070.12.2 Notification of Death of Foreign Nationals

Pursuant to Article 37 of the Vienna Convention, written notification within 72 hours of the official notice of death shall be made to the appropriate consulate post in the event of the death of a foreign, national inmate. The notification shall include the inmate's name, CDC identification number, date and time of death, and the attending physician's name. Consulate offices are located in major cities throughout California; and addresses and telephone numbers can be found in the local telephone directory under the name of the country of origin.

51070.12.3 Detainers Disposition

Any detainers pertaining to the deceased shall be returned to the issuing agency with a notice of the inmate's death.

51070.13 Responsibility of Correctional Counselor

Upon receiving instructions and information from their supervisor concerning the death of an inmate, the Correctional Counselor shall carefully examine all available records, mail, visiting records, and personal property and prepare a report to the Warden or their designee consisting of:

- A list of names, relationship, and addresses of relatives, friends, organizations, or individuals who might be interested in the final disposition of the deceased without cost to the State.
- Answers to the below listed questions.
- Is the decedent a member of a fraternal order or lodge having burial insurance or death benefits?
- Is the decedent entitled to veteran's or social security benefits?
- Is the decedent receiving a pension?
- Does the decedent have insurance payable at death?
- Does the decedent have resources or income not held in trust at the institution?

If the deceased inmate was an undocumented alien, notify the local office of Immigration and Customs Enforcement and the appropriate consulate post as referenced in DOM 51070.12.2. Notify victim(s) if there is a written request by the victim(s) in the inmate's C-File that the victim(s) be notified of any change of the inmate's status per PC 3058.6, 3058.8, and 3058.9.

51070.14 Responsibility of Chaplain

Upon notification of a death, the chaplain of the faith professed by the inmate will perform such duties as required:

- Attend to any special religious requirements.
- Consultation with family members as required or requested.

51070.15 Responsibility of Property Officer for Deceased's Property

The property officer shall:

- Receive, inventory, and store all personal property of the deceased.
- Prepare a complete inventory report, sign and submit five copies to the watch commander to be distributed as follows:
 - Warden/RPA.
 - Chief Deputy Warden.
 - Associate Warden, Business Services.
 - Accounting officer.
 - Correctional Captain.
- Secure all personal property as evidence if directed by watch commander or investigative unit.
- Make personal property available to employees authorized to examine it.
- All personal property of the deceased at the scene of the death may be released to the coroner upon request for the purpose of assisting their investigation.

Upon completion of all investigations and release of property as evidence, all personal property of the deceased will be released to the Associate Warden, Business Services, for disposition.

51070.16 Responsibility of Associate Warden Business Services

The Associate Warden, Business Services, has a variety of duties pertaining to the death of an inmate that include, but are not limited to:

- Assure that the institution has a valid service agreement with local mortuaries to provide for such services as embalming, cremation, caskets, transportation, burial, and other related services in connection with the disposition of the deceased inmate.
- Assure that a process has been established for disposition of personal property, funds, and any other resources held in trust for the deceased.
- Provide burial clothing and make special arrangement for the use of State materials or services when necessary.

Deceased's Funds

When an institution holds U.S. Savings Bonds or other securities belonging to a deceased inmate and the institution is entitled to recover costs incurred in connection with the death of an inmate (PC 5061), bonds or securities not exceeding the actual expenses and charges should be liquidated through the office of the public administrator of the county. Excess monies over actual expenses shall be credited to the deceased inmate's trust account.

51070.17 Unclaimed Dead Body

Revised April 9, 2014

After all reasonable efforts have been exhausted to locate a claimant for the deceased and there is no one to direct disposition, the remains shall be considered an unclaimed dead body. If the body is not claimed for burial, at least ten days after all reasonable efforts have been exhausted to contact the individual(s) listed on the Notification in Case of Inmate Death, Serious Injury, or Serious Illness, it shall be cremated or buried by a licensed mortuary/undertaker in accordance with a previously approved service contract. In the absence of any known relative, or if not claimed by relatives, the Warden may use his/her judgment in offering the body to friends of the deceased or interested private agencies for interment at private expense or with the deceased inmate's own funds. The coroner or Department may dispose of the unclaimed body pursuant to applicable laws.

51070.18 Death Occurring Other than in an Institution

The death of an inmate may occur in places other than an institution. This may include, but is not limited to:

- Reentry facilities.
- While under Parole supervision.
- Camps.
- In-transit between CDCR facilities.
- Off reservation work crews.
- Community hospital.

51070.18.1 Parole

Upon the death of a parolee, the Parole Agent of record shall:

- Obtain a certified copy of the death certificate from the coroner or county clerk.
- Prepare a closing summary, CDCR Form 1502, Activity Report.
- Forward the closing summary and the death certificate to the regional records officer and the Division of Correctional Health Care Services.

In the event the death occurred in another state and the death certificate is not available, the Parole Agent shall obtain:

- A letter from a Parole Agent or law enforcement officer from the other jurisdiction verifying that the death certificate or autopsy report has been reviewed. This will serve as verification of death.

51070.18.2 Reentry Facility

In the event of the death of an inmate at a reentry facility the administrator will follow the guidelines set forth in DOM 83080.7.

51070.18.3 Camps and in Transit

If a death occurs in a camp, while fighting fires, or while in transit between institutions, the Department's officer in charge will take the following actions:

- Proper custodial support will be summoned as appropriate to the situation.
- The nearest available doctor will be called to pronounce death.
- The local coroner must be notified and their instructions followed.
- The Warden of the parent institution shall be notified by telephone or email and further instructions requested.
- Pending receipt of instructions, the body shall be turned over to a licensed mortuary/undertaker in the community where the death occurred.
- Notification of appropriate authorities as outlined in DOM 51070.9 shall be directed by the Warden or designee.

- A complete final report containing circumstances, investigations, arrangements, etc., will be submitted to the Warden of the parent institution without delay.

51070.19 Revisions

The Director, DAI, or designee shall ensure that the content of this Article is accurate and current.

CCR, § 3357. PC §§ 3058.8, 5021, 5022 5061 and 11155(b). H&SC §§ 7200, 10203, and 10250. GC §§ 12525 and 27491.

ARTICLE 8 — INMATE CIVIL RIGHTS

Revised September 14, 2010

51080.1 Policy

Inmates under the custody of the Department shall not be granted any rights or privileges that are not required by the United States Constitution or by the laws of California. A person sentenced to imprisonment in a state prison may, during that period of confinement, be deprived of such rights, and only such rights, as are reasonably related to legitimate penological interests.

51080.2 Purpose

The policy, procedural, and operational instructions of the Department and its institutions shall be promulgated to meet the requirements of Penal Code (PC) 2600 and 2601.

51080.3 Inmate's Right to Refuse Treatment

Health care treatments, including medications and tests, shall not be forced over the objections of a mentally competent inmate, except when permitted by law to prevent infectious diseases or unless the procedures set forth in DOM 91090 (Involuntary Psychotropic Medications) are followed. When an inmate is unable to make an informed decision due to a medical emergency, all immediately necessary actions shall be taken. An emergency exists when there is a sudden marked change in the prisoner's condition so that action is immediately necessary for the preservation of life or the prevention of serious bodily harm to the patient or others and it is impracticable to first obtain consent.

If medical care requiring informed consent is believed necessary and the inmate cannot make health care decisions in non-emergency situations, the determination on care and treatment will be based on the inmate's health care directive; a surrogate decision maker, including the patient's conservator, guardian, or responsible relative; or through the procedures set forth in Probate Code 3200 et seq. (Authorization of Medical Treatment for an Adult Without a Conservator).

51080.4 Right to Vote

The California Constitution, Article II, Section 4, prohibits imprisoned or paroled individuals, convicted of a felony, from voting. The inmate or parolee must have completed his or her term of imprisonment or parole and be discharged from prison and parole before the right to vote is restored.

51080.5 Inmate Civil Rights

PC 2601 specifies that inmates shall have the following civil rights:

Inmate Real or Personal Property

- To inherit, own, sell, or convey real or personal property, including all written and artistic material produced or created by such person during the period of imprisonment. However, to the extent authorized in PC 2600, CDCR may restrict or prohibit sales or conveyances that are made for business purposes.

Confidential Correspondence

- To correspond, confidentially, with any member of the State Bar of California or holder of public office, provided that the prison authorities may open and inspect incoming mail, in the presence of the addressee, to search for contraband. Confidential correspondence shall be processed in accordance with CCR 3141 through 3145.

Inmate Mail

- To purchase, receive, and read any and all newspapers, periodicals, and books accepted for distribution by the USPS. Disapproved mail shall be handled in accordance with CCR 3136. Pursuant to this section, prison authorities may exclude any of the following matter:

- Obscene publications or writings, and mail containing information concerning where, how, and from whom this matter may be obtained.
- Any manner of contraband as described in CCR 3006.
- Any matter concerning gambling or a lottery.

Nothing in this section shall be construed as limiting the right of prison authorities to open and inspect any and all packages received by an inmate.

Inmates may possess a reasonable number of publications, including books, magazines, and newspapers, as directed by the Authorized Personal Property Schedule in DOM 54030.17. Publications addressed to inmates shall be processed in accordance with CCR 3134.1.

Other Rights

- To initiate civil actions, subject to a \$3 filing fee to be collected by CDCR in accordance with the procedures set forth in DOM 14010.19.1.
- To marry, subject to the procedures provided under DOM 101070.
- To create a power of appointment.
- To make a will.
- To receive all benefits provided for in Labor Code 3370 and 3371 (Worker's Compensation_Benefits for Inmates) and in PC 5069 (Rehabilitative Programs for Injured Inmates).

51080.6 Restoration of Civil Rights

Application for restoration of the above-stated civil rights is not required. However, full civil rights may also be restored upon application and grant of a pardon by the Governor, pursuant to PC 4800 et seq. (Reprieves, Pardons, and Commutations), and 4853 (Restoration of Rights).

51080.7 Revisions

The General Counsel, Office of Legal Affairs, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

ARTICLE 9 — DISPLAY OF THE UNITED STATES AND STATE FLAGS

Effective October 25, 1999

51090.1 Policy

It is the policy of the Department to display the U.S. flag and the flag of the State of California at all CDCR public buildings, including institutions, camps, and other CDCR facilities under the jurisdiction of the State.

51090.2 Purpose

The purpose of this Section is to establish standard procedures throughout CDCR for displaying the U.S. and State flags and provide procedures and criteria for the raising and lowering of the flag.

51090.3 Definitions

All-Weather Flag

A specially treated flag capable of being flown in all kinds of weather or conditions with little or no worry of the flag being torn, damaged, or soiled.

Base Flag

The largest official flag. The Base flag is only flown in fair weather from sunrise to sunset. However, on special patriotic occasions, the Base flag may be displayed all night if proper lighting is available.

Custom

An act or ceremony, stemming from tradition, which is enforceable as an unwritten law.

Flagstaff

A pole on which a flag is raised.

Half-Staff

The position of the flag when it is one-half the distance between the top and bottom of the staff. A flag is flown half-staff as a symbol of mourning for the dead or as a signal of distress.

Memorial Day

A U.S. Holiday officially celebrated on the last Monday in May in honor of members of the U.S. Armed Forces killed in war.

National Flag

The U.S. flag.

Prisoner of War (POW)/Missing in Action (MIA) Flag

The National League of Families Prisoner of War (POW)/Missing in Action (MIA) flag is a black and white banner, which symbolizes those members of the U.S. Armed Forces listed as POW or MIA. The flag is officially recognized by Congress.

State Flag

The flag of the State of California.

Sunrise

The event or time of the daily first appearance of the sun above the eastern horizon.

Sunset

The event or time of the daily disappearance of the sun below the western horizon.

51090.4 Flag Protocol

Employees and visitors to a CDC institution, facility, camp, or State building displaying the U.S. Flag shall not show any disrespect to the flag. Failure to do so shall render the visitor subject to exclusion from the facility. Wardens and RPAs may prohibit displays or representations of the flag on a CDC facility that would belittle the mission or detract from good order, discipline, or morale of CDC staff and visitors.

51090.5 Criteria

The U.S. flag that is flown on State Buildings should be either:

- A Base flag.
- An All-Purpose flag. (Sometimes referred to as the All-Weather flag.)

The U.S. Base flag (measuring approximately 17 feet long by 8 feet wide) is displayed in fair weather from sunrise to sunset. However, on special patriotic occasions, the flag may be displayed all night if proper lighting is available.

The U.S. All-Purpose flag (measuring approximately 9 feet six inches long by 5 feet wide) replaces the Base flag during inclement weather. It is made of lightweight nylon bunting material.

51090.6 Responsibilities

Each Warden and RPA shall be responsible for developing a procedure for the raising and lowering of the flag at their facility/region.

Each Warden and RPA shall provide for the acquisition of the flags and their installation, display, and maintenance, except for the acquisition of the POW/MIA flag, which shall be provided by CDC Headquarters.

51090.7 Honor or Tributes

The U.S. Flag shall not be:

- Dipped to any person or thing. (State flags are dipped as a mark of honor.)
- Displayed with the union down except as a signal of dire distress in instances of extreme danger to life or property.
- Permitted to touch anything beneath it, such as the ground, the floor, merchandise, and so forth.
- Festooned, but allowed to fall and hang free.
- Used as a drapery of any sort.
- Used as a covering for a ceiling.
- Used as a receptacle for receiving, holding, carrying, or delivering anything.
- Used as the covering for a statue or monument. (However, it may form a distinctive feature of the ceremony of unveiling a statue or monument.)
- Used for advertising purposes in any manner whatsoever.
- Draped over the hood, top, sides, or back of a vehicle, railroad train, or a boat. When the flag is displayed on a motorcar, the staff shall be fixed firmly to the chassis or clamped to the right fender.
- Fastened, displayed, used, or stored in a manner that permits it to be easily torn, soiled, or damaged in any way.

- Worn or used as an article of clothing.
- Marked on, or have placed on it or attached to it, any mark, insignia, letter, word, figure, design, picture, or drawing of any kind.

51090.8 Displaying the Flag

4 USC 6(a), permits the display of the flag for 24 hours a day to produce a patriotic effect if properly illuminated during the hours of darkness.

The CDC will follow the custom of flying the flag from sunrise to sunset where personnel reside or are on duty at the time necessary to raise and lower the flag.

The flag may be displayed 24 hours a day if properly illuminated during the hours of darkness, thus permitting night display of the flag on special occasions when it is desired to produce a patriotic effect. Otherwise, the flying of the flag shall be from sunrise to sunset on buildings and on stationary flagstaves in the open.

The flag should be displayed daily, weather permitting, on or near the main administration building of every public institution, except when an All-Weather Flag is displayed.

The flag shall be flown especially on:

- National holidays.
 - On Memorial Day, the U.S. Flag shall be flown at half-staff from sunrise to 1200 hours.
- State Holidays.
- Any other days proclaimed by the President of the U.S.

51090.9 Displaying the Flag During Inclement Weather

The flag shall not be flown in inclement weather unless an All-Weather Flag is displayed.

The Watch Commander, the Unit Supervisor at parole offices, and the senior ranking custody person on duty at the Community Correctional Facilities shall determine the weather conditions for the displaying of the flag if the flag is not an All-Weather Flag. The possibility of damage by rain or wind shall be the criteria for lowering the flag during inclement weather.

51090.10 Displaying the U.S. and State Flags Together

Where the U.S. and State Flags are used, they shall be of the same size. If only one flagstaff is used, the U.S. flag shall be above the State flag and the State flag shall be hung in such a manner as not to interfere with any part of the U.S. Flag. At all times, the U.S. flag, when displayed outdoors with other flags, shall be placed in the position of first honor which is normally the extreme left position as the flags are most frequently viewed.

51090.11 Displaying the POW/MIA Flag on Specified Holidays

The Governor of the State of California annually proclaims the third Friday of September to be known as POW/MIA Recognition Day. The Legislature requests all State agencies that fly the U.S. and State flags to also fly the POW/MIA flag, to the extent it is structurally feasible on the following holidays: Armed Forces Day, the third Saturday in May; Memorial Day, the last Monday in May; Flag Day, June 14; Independence Day, July 4; National POW/MIA Recognition Day, the third Friday in September; and Veterans Day, November 11. If June 14, July 4, or November 11 fall upon a Saturday, the flag shall be flown on the Friday preceding. If any of the aforementioned dates fall on a Sunday, the flag shall be flown on the following Monday.

The POW/MIA flag shall be flown in ascending position of honor, beneath or to the right of the U.S. flag and the State flag.

51090.12 Displaying the U.S. Flag at Half-Staff

The U.S. flag is only flown at half-staff for the following reasons:

- As a symbol of honor or respect over the passing away of someone.
- As a distress signal.

51090.13 Authority Authorizing the U.S. Flag to be Flown at Half-Staff

The President of the U.S. is the only person authorized to order flying the U.S. flag at half-staff.

51090.14 Procedures for Displaying the U.S. Flag at Half-Staff

When flown at half-staff, the U.S. flag shall be first hoisted to the peak of the staff for an instant then lowered to half-staff position.

At the end of the day, sunset, the flag shall be raised to the peak of the staff for an instant, before it is lowered for the day. The flag should be hoisted briskly and lowered ceremoniously.

When the length of the staff creates a problem, flags are considered to be at half-staff when displayed at a height reasonably below the peak of the staff.

51090.15 Displaying the State Flag at Half-Staff

The State flag is only flown at half-staff for the following reasons:

- As a symbol of honor or respect over the passing away of someone.
- As a distress signal.

Governor's Executive Order R29-71 stipulates that the flag at the State Capitol shall be lowered to half-staff for peace officers killed in the line of duty. By practice, this is from the time of notification until after the peace officer's funeral.

The CDC headquarters and each facility shall display the flag at half-staff for the same time period.

For non-peace officer employees killed in the line of duty, flags at the facilities and headquarters shall be flown at half-staff from the time of notification until after the funeral.

For employees and retired employees whose deaths are not in the line of duty, the Warden or RPA shall determine if it is appropriate to have the facility/region flag flown at half-staff on the day of the funeral.

The flag shall be flown at half-staff only for employees and retirees or at the Governor's order.

51090.16 Authority Authorizing the State Flag to be Flown at Half-Staff

The Governor of the State of California is the only person authorized to order flying the State flag at half-staff.

51090.17 Procedures for Displaying the State Flag at Half-Staff

When flown at half-staff, the State flag shall be first hoisted to the peak of the staff for an instant, then lowered to half-staff position.

At the end of the day, sunset, the flag shall be raised to the peak of the staff for an instant, before it is lowered for the day. The flag should be hoisted briskly and lowered ceremoniously.

When the length of the staff creates a problem, flags are considered to be at half-staff when displayed at the height reasonably below the peak of the staff.

51090.18 Procedures for Displaying the U.S. and State Flag at Half-Staff on the Same Flagstaff

When flown at half-staff, the U.S. flag shall be first hoisted to the peak of the staff for an instant then lowered to half-staff position.

The State flag shall then be hoisted to a position directly below the U.S. flag yet far enough away so as not to interfere with the U.S. flag.

At the end of the day, sunset, the State flag shall be lowered first. The State flag should not be raised to the peak of the staff before it is lowered for the day. The State flag should be cased (folded) and secured before lowering the U.S. flag. Once the State flag is secured, the U.S. flag should be first hoisted to the peak of the staff for an instant, before it is lowered for the day. The flag should be hoisted briskly and lowered ceremoniously.

51090.19 Procedures for Displaying the U.S. and State Flag at Half-Staff on Separate Flagstaffs

When flown at half-staff, the U.S. and State flags shall be first hoisted to the peak of the staff for an instant, then lowered to half-staff

position. This shall be done simultaneously, manpower permitting. When manpower does not permit the raising of the U.S. and State flags together, departmental procedure dictates that the U.S. flag is raised first, followed by the State flag.

At the end of the day, sunset, the State flag shall be lowered first. The State flag shall be first hoisted to the peak of the staff for an instant before it is lowered for the day. The State flag should be cased (folded) and secured before lowering the U.S. flag. Once the State flag is secured, the U.S. flag shall be first hoisted to the peak of the staff for an instant, before it is lowered for the day. The flags should be hoisted briskly and lowered ceremoniously.

51090.20 Storing the Flag When Not Being Displayed

The flag should never be fastened, displayed, used, or stored in such a manner as to permit it to be easily torn, soiled, or damaged in any way.

51090.21 Desecration of Flags

Pursuant to M&V 614, a person is guilty of a misdemeanor who:

In any manner for exhibition or display, places, or causes to appear any work, figure, mark, picture, design, drawing, or any advertisement of any nature upon any flag of the U.S. or of this State.

Exposes to public view any such flag upon which is printed, painted, or placed or to which is attached, appended, affixed, or annexed any work, figure, mark picture, design, drawing, or any advertisement of any nature.

Knowingly casts contempt upon any flag of the U.S. or of this State by publicly mutilating, defacing, defiling, burning, or trampling upon it.

51090.22 Wearing the Flag as a Costume or Athletic Uniform

No part of the flag should ever be used as a costume or athletic uniform. However, a flag patch may be affixed to the uniform of military personnel, firemen, policeman, and members of patriotic organizations.

51090.23 Disposing of the Flag

When the flag is in such condition that it is no longer a fitting emblem for display, it should be destroyed in a dignified way, preferably by burning.

51090.24 Exemption From Raising and Lowering the Flag

For those CDC units/offices which are located within a building e.g., State office building, where someone else is responsible for raising and lowering the flag, the CDC units/offices are exempt from these procedures unless one of them has been designated to raise and lower the flag.

51090.25 Revisions

The Director, DAI, and the Director, DAPO, or their designees are responsible for ensuring that the contents of this Section are kept current and accurate.

Exhibit A

Flag Before Folding

**Step 1**

Fold lengthwise. Bring the striped half up over the blue field.

**Step 2**

Fold lengthwise again, bringing bottom edge up to meet the top edge. This will place the upper part of the blue field (union) on top.

**Step 3**

Fold lower right-hand corner to the upper edge to form a triangle.

**Step 4**

Now fold the triangle toward the blue field. The outer point is turned inward on the upper edge of the Flag to form the second triangle.

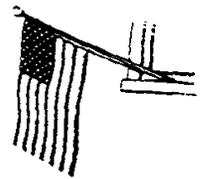

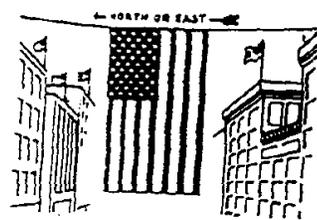

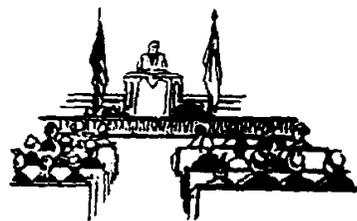

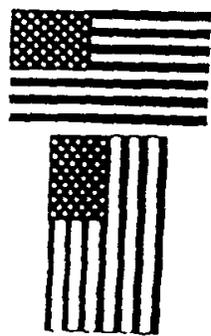

**Step 5**

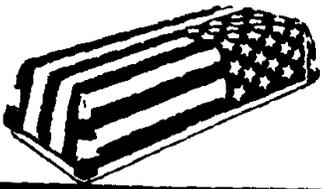

Continue to fold the Flag in triangles until the entire length of the Flag is folded.

**Note**

If you have followed the above steps correctly, only the blue field should be visible. No red shows. The Flag will be in the triangular shape of a cocked hat symbolizing the hats worn by the soldiers of the Revolutionary War.

ARTICLE 10 – UNASSIGNED**ARTICLE 11 - ADMINISTRATIVE OFFICER-OF-THE-DAY***Revised September 22, 2014***51110.1 Policy**

The Warden shall be responsible for the implementation of the Administrative Officer-of-the-Day (AOD) procedure. An AOD shall be assigned at institutions during non-business hours. The AOD shall maintain the authority and responsibility for making administrative decisions and disseminating information regarding serious incidents in the absence of the Warden.

51110.2 Purpose

To standardize the AODs functions, authority, duties, and responsibilities where appropriate.

51110.3 Responsibility

The AOD shall be an administrative staff member, possessing supervisory experience and authority to make decisions in the absence of the Warden. The AOD shall be responsible for ensuring administrative requirements are met and appropriate notifications are made relative to operational issues during other than normal duty hours.

Those staff designated as AOD shall not hold a classification level less than Correctional Counselor III.

The below listed classifications will be assigned the functions of the Institutional AOD:

Correctional Administrator.

Prison Industries Authority Administrator.

Prison Industries Authority Manager.

Captain, Adult Institutions.

Correctional Counselor III.

Correctional Business Manager I & II.

Correctional Plant Manager I & II.

51110.4 Administrative-Officer-of-the-Day Duty Schedule

Wardens are normally exempt from AOD duty; however, they may serve as AOD if needed. Wardens shall publish the AOD assignment schedule in advance, every six (6) months. The AOD schedule shall specify the name and period of time that each AOD shall be assigned the duties.

The Chief Deputy Warden shall not be required to be assigned to the AOD rotation schedule, but may elect to participate in the AOD rotation schedule.

Any anticipated change in the AOD assignment schedule shall be approved in advance by the Warden or their designee.

AOD personnel may be permitted to "trade" assignments. The "trade" arrangement between AODs shall be submitted in memorandum form to the Warden not less than 24 hours prior to assigned tour of duty.

The AOD period of duty shall commence at 5:00 PM Friday and shall conclude at 5:00 PM the following Friday. Should a holiday fall on a Thursday and/or Friday, the AOD duties shall commence at 5:00 PM on the last business day preceding the holiday period.

51110.5 Training

Wardens shall assure all new AODs are provided with the proper training and job orientation, including, but not limited to, the following:

- AODs are not required to be peace officers. However, they shall be required to attend Penal Code (PC) 832 training as an orientation in the responsibilities and expectations of institutional peace officer staff. The PC 832 training shall in no way be intended to train non-peace officer AODs to perform peace officer duties.
- Prior to participation in the PC 832 firearms range training, the current employer shall determine that the non-peace officer AOD is not disqualified from possessing or use of a firearm pursuant to PC 12021 and 12021.1. This shall be accomplished through the submission of fingerprints to the Background Investigation Unit for criminal record checks with the State Department of Justice and the Federal Bureau of Investigations.

In addition to the above training the AOD should be knowledgeable of the following procedures relative to their duties as the AOD:

- Institution procedures.

- Disturbance Control Plan.
- Crime/Incident Reports (institutions).
- Firearms.
- Chemical agents.
- Escape pursuit plan.
- Employee relations/grievances/discipline.
- Information Practice Act.
- Transfer of inmates.
- Any other procedures unique to their institution.

51110.6 Instructional Packet

Each designated AOD shall familiarize themselves with the duties and responsibilities unique and particular to their own institution instruction packet.

Twice annually, Wardens shall meet with all staff designated as AODs to discuss and explain expectations and duty requirements.

An AOD instructional packet shall be developed for each institution. The packet shall include specific examples of:

- Situations and how they are handled.
- Departmental/institutional changes.
- Current inmate functions.
- Activities involving guests and outside agencies.

The packet shall provide a list of home telephone numbers, and other necessary telephone numbers of the following:

- Administrative staff.
- Appropriate outside agencies.
- Medical facilities.
- Police/sheriff departments.
- Institutional AODs.
- Departmental AODs.

51110.7 AOD Equipment

The AOD shall be provided with a cellular telephone for the duration of their assignment, and a State vehicle shall be made available upon the request by the institutional AOD. In circumstances when cellular telephone services are not available, the institutional AOD shall be provided an electronic paging device during their AOD assignment.

51110.8 AOD Duties/Responsibility

The institutional AOD shall become familiar with any special circumstances or existing situations occurring at the institution prior to assuming the AOD duties.

Staff serving as the institutional AOD shall have a face to face briefing either between the off-going and on-coming AOD or the on-coming AOD and the Warden/Chief Deputy Warden, this shall occur to exchange pertinent information and equipment.

Staff serving as the institutional AOD will not be required to visit the institution on the weekends and holidays unless special events, operational needs, or emergencies require the AOD to respond. The institutional AODs will remain on-call during these periods.

The requirement to visit the institution for special events/operational needs is at the discretion of the Warden or other appropriate command authority. Such events might include, but are not limited to:

- Periodic review of visiting.
- Institution construction activity.
- Activation of the Emergency Operations Plan or other institutional emergencies.
- Controlled uses of force such as a cell extraction.
- Release or intake of a high notoriety case inmate.
- Visitation of outside groups to the institution, etc.

The institutional AOD shall attend the weekly executive staff meeting and present a summary of the events that occurred during their tour of duty.

In all circumstances or incidents of a serious nature where the institutional AOD is contacted regarding an institution incident, he/she shall communicate the incident, action taken, and current status of the situation to the Warden.

On the first working day following the incident the institutional AOD shall gather all CDCR 837, Crime/Incident Reports, or notice of unusual occurrences that are completed by the watch commander. As required by local procedures, a written report shall be prepared for the Warden.

51110.9 Administrative Officer-of-the-Day/Watch Commander Relationship

The AOD shall not be involved with the daily supervision of institution operations during normal business hours. This shall be the responsibility of the watch commander.

During other than normal business hours, on weekends and holidays, the institutional AOD shall be contacted by the watch commander when any unusual incident/situation occurs. The institutional AOD shall determine from the information provided by the watch commander the amount of staff/resources the watch commander may need to establish and maintain control of the situation. The institution AOD shall serve to coordinate a resolution of the situation with the watch commander.

Should a difference of opinion exist in the course of action to be taken, then the institutional AODs decision shall prevail. The watch commander shall report their dissenting opinion in writing to the Warden on the next working day.

The relationship of the watch commander and the institutional AOD shall be one of a supportive team effort, resulting in the best judgment of all combined to effectively handle any incident/situation.

51110.10 Administrative Officer-of-the-Day Contact Responsibilities

The watch commander shall contact the institutional AOD on questions of policy, visits of politicians, media request, court orders requesting release of inmates, and all matters of unusual occurrences. Accurate information, details, and recommendations shall be provided by the watch commander to enable the AOD to make sound decisions and complete necessary reports.

Administrative Officer-of-the-Day Contacts: Serious Injury or Death

The institutional AOD shall be contacted in all incidents involving, but not limited to:

- Death.
- Serious injury of staff or inmates.
- Escapes.
- Controlled Use of Force incidents.
- Serious disturbances.
- Felony assaults.
- Loss of keys to security areas.
- Staff/visitor arrests.
- Other items outlined in each institution instructional packet.

When the watch commander is unable to contact the institutional AOD, notification of an incident shall be communicated to the Warden or their designee.

It is the responsibility of each AOD to keep the watch commander informed of their whereabouts during their tour of duty.

51110.11 Written Reports

Incidents justifying an AOD contact shall be documented in writing by the watch commander on an AOD contact report or an unusual occurrence report. The watch commander shall obtain available information and prepare a factual report concerning the incident. All written reports by the watch commander shall be completed prior to the conclusion of their watch/tour of duty.

Incidents/events occurring during non-business hours and deemed serious in nature, which are of public or departmental interest, shall be reported to the Division AOD by the institutional AOD. Following a Division AOD contact, the AOD shall prepare a written report concerning the contact to the Warden, prior to the start of the business hours of the next working day.

51110.12 CDCR Form 837 Crime/Incident Reports

The CDCR Form 837, Crime/Incident Report, is the institutions initial written report to central office that an incident of departmental interest has occurred. It is essential that all information available at the time of the incident be entered into this report and should be completed in accordance with the DOM, Section 51030.

51110.13 Revisions

The Director, Division of Adult Institutions, or their designee shall be responsible for ensuring the contents of this Article are current and accurate.

ARTICLE 12 — INMATE PAY

Revised June 12, 2006

51120.1 Policy

Inmates engaged in productive work may receive compensation as determined by the Secretary of the Department of Corrections and Rehabilitation (CDCR) with the approval of the Director, Department of Finance, as specified in Penal Code (PC) Section 2700.

The statutory limitation on inmate pay, pursuant to PC 2700, shall be no higher than one-half the minimum wage stipulated in Section 1182 of the Labor Code (LC). Under such authority, "pay schedules" shall be set by institutions/facilities.

51120.2 Purpose

This procedure establishes guidelines for uniform interpretation, application, and administration of inmate pay plans.

51120.3 Source of Inmate Pay

Inmates assigned to approved pay positions under an inmate pay plan will be paid from the fund or allotment of the institution's/facility's support budget or inmate welfare funds.

51120.4 CDCR Inmate Pay Committee

The CDCR inmate pay committee shall be comprised of no fewer than the following persons:

- One Prison Industry Manager.
- Director, Division of Adult Institutions, or designee.
- Director, Division of Support Services, or designee.
- One Associate Warden, Business Services.
- One representative of Classification Services Unit.
- Director, Division of Adult Parole Operations (DAPO), or designee.
- One representative of the Trust Office.

The Secretary shall designate one of these members to chair the committee. The committee membership shall be reviewed annually, and changes will be made on a staggered basis.

This committee shall:

- Keep the Secretary advised regarding the inmate pay program.
- Report to the Secretary, at least annually, on the need for policy changes affecting the program.
- Have responsibility and authority to monitor and evaluate the inmate pay programs of the individual institutions/facilities.
- Develop and implement the allocation of pay positions to the best advantage of CDCR and the inmate population.

Institutions/facilities shall furnish any reports and information requested by the CDCR inmate pay committee to assist the committee in program assessment.

51120.5 Institution/Facility Inmate Pay Committee

Wardens and the Director, DAPO, shall:

- Establish an inmate pay committee to administer the inmate pay plan within their allotted budget.
- Designate the inmate pay committee chairperson.

The institution/facility inmate pay committee shall be comprised of the following staff members:

- Designated Associate Wardens.
- Business Manager.
- Inmate Assignment Lieutenant (where applicable).
- Supervisor of Correctional Education Programs (where applicable).
- Budget Analyst.
- Representative of the Trust Office.

The inmate pay committee shall:

- Establish and review the inmate pay plan.
- Ensure that inmate pay assignments are properly classified.
- Review the appropriateness of all recommendations for inmate pay increases or reductions.
- Keep the Warden informed as to the operation of the inmate pay plan.

51120.5.1 Hiring Criteria

Supervisors, via the classification committee (at institutions), shall fill vacant job/training assignments based on the following factors:

- Skill. Demonstrating expertise of technical skills and knowledge.
- Behavior. Relationship with Others. Demonstrates ability to deal with authority figures, job supervisors, and other inmates.
- Attitude. Adaptability. Demonstrating willingness to learn, take directions, and orders.
- Work Habits. Punctuality, dependability, care of equipment, and safety practices.
- Formal Education/Training. Preparation for work and the ability to read, write, and speak effectively.

Assignments shall be ethnically balanced based on the eligible inmate population within the institution/facility when the mission(s) and/or physical plant design of the institution/facility permits.

Institutions/facilities shall establish an application/resume process for selection of skilled workers.

51120.5.2 Pay Scale

The assignment pay rate shall be based upon the technical skill and productivity required for the assignment. Inmate pay increases shall be based on the inmate’s overall performance that shall be documented on CDC Form 101, Work Supervisor Report.

51120.6 Pay Schedule

The following are approved pay rates, which shall be used for institutions/facilities:

Support and Inmate Welfare Funds (IWFs)

Skill Levels and Pay Rates*

	Minimum Maximum Hourly	–	Minimum- Maximum Monthly
Level I DOT 9			
Lead person	\$0.32 - \$0.37		\$48 - \$56
Level 2 DOT 7-8			
Special Skill	\$0.19 - \$0.32		\$29 - \$48
Level 3 DOT 5-6			
Technician	\$0.15 - \$0.24		\$23 - \$36
Level 4 DOT 3-4			
Semi-Skill	\$0.11 - \$0.18		\$17 - \$27
Level 5 DOT 1-2			
Laborer	\$0.08 - \$0.13		\$12 - \$20

*Except as designated below.

Monthly rates shall apply to full time employment in job classifications paid from the support budget or Inmate Welfare Funds.

In extraordinary circumstances, the Inmate Pay Committee may designate a wage comparable to the California Prison Industry Authority (CalPIA) inmate pay program for such inmate pay assignments as, but not limited to:

- Plant Operations (nonclerical assignments only).
- Food service cooks.
- Special projects or assignments that require a high degree of skill or expertise.

Requests to pay inmates at the higher rate shall be directed to the Director, Division of Adult Institutions, or the Director, DAPO, for approval.

Refer to Department Operations Manual (DOM) 51130 for information regarding inmate pay in conservation camps.

Refer to DOM 51121 for information regarding inmate pay in CalPIA. Refer to Title 15, Sections 3484 and 3485, and DOM 53140.9 for information regarding inmate pay in the Joint Venture program.

51120.7 Pay and Nonpay Assignments

The Inmate Committee may designate the following inmate assignments as pay assignments (the following listing may not be representative of all current DOT job titles):

- Leadpersons (DOT) Skill Level 9), under direction of the staff supervisor shall:
 - Provide much of the OJT of newly assigned inmates.
 - Assist in communicating to inmates at lower skill levels.
 - There shall be only one lead position per area, per classification, per shift.

Appointment to the assignment of leadperson requires the approval of the supervisor and the Inmate Pay Committee.

Leadpersons shall not function as assistant foreman/supervisor or be assigned control over another inmate.

- Special Skills (DOT Skill Level 7-8):
 - Automobile Mechanic 620.261-010.
 - Carpenter 860.281-010.
 - Dental Technician 079.361-018.
 - Electrician 842.261-011.
 - Electronics Mechanic 818.261-011.
 - Maintenance Mechanic 818.638.281-014.
 - Painter 840.381-010.
 - Pipe Fitter 862.281-022.
 - Plumber 862.381-030.
 - Printer 973.381-018.
 - Tailor Asteration 785.261-010.
 - Welder 810.382-010.
 - X-ray Technician 199.361-010.
- Technician (DOT Skill Level 5-6):
 - Baker 313.381-010.
 - Barber 330.371-010.
 - Boiler Operator Helper 950.382-014.
 - Butcher 525.381-010.
 - Cook 315.361-010.
 - Firefighter 373.364-101.
 - Heavy Equipment Operator 859.683-010.
 - Inmate Advisory Council Chair.
 - Lead Clerk 219.562-010.
 - Library Assistant 249.367-046.
 - Library Technical Assistant 100.367-018.
 - Sewer Plant Attendant 955.585-010.
- Semi-skills (DOT Skill Level 3-4):
 - Apprentices enrolled in a bonafide apprenticeship program.
 - Automobile Mechanic Helper 620.684-014.
 - Baker Helper 313.684-010.
 - Carpenter Helper 869.664-014.
 - Clerk 209.562-010.
 - Dog Groomer 418.674-010.
 - Electrician Helper 829.684-026.
 - Finger Cobbler 788.684-046.
 - Garbage Collector 955.687-022.
 - Groundskeeper 406.684-014.
 - Inmate Advisory Council Secretary.
 - Janitor Head 381.137-010.
 - Laborer, Boot, and Shoe 788.687-026.
 - Machine Operator 619.380-018.
 - Maintenance Mechanic Helper 899.684-022.
 - Order Filler Warehouse 222.487-014.
 - Orderly 355.674-018.
 - Painter Helper 869.687-026.
 - Plumber Helper 869.644-014.

- Porter Head 381.137-010.
- Sales Clerk (Handicraft) 299.477-014.
- Service Station attendant 915.467-010.
- Taxi Driver 913.463-018.
- Teacher Aid 249.367-074.
- Laborer (DOT Skill Level 1-2):
 - Attendant (Dry Cleaners) 369.677-010.
 - Barber Apprentice 330.371.014.
 - Car Wash Attendant 916.677-010.
 - Construction Worker 869.687-026.
 - Cook Helper 317.687-010.
 - Dish Machine Operator 617.260-010.
 - Gardener 406.684-014.
 - Janitor (Infirmary/Hospital only) 381.687-018.
 - Janitor Kitchen 381.687-018.
 - Janitor General 381.687-014.
 - Kitchen Helper 318.687-010.
 - Laborer, Landscape 408.687-014.
 - Laborer, Laundry 361.687-018.
 - Laborer, Orchard 403.687-010.
 - Laborer, Salvage 929.687-022.
 - Laborer, Stores 922.687-058.
 - Laborer, Gardener 408.161-010.
 - Porter (Infirmary/Hospital only) 381.6877-014.
 - Porter Kitchen 318.687-010.
 - Porter General 381.687-014.
 - Server 311.477-026.
 - Shoe Shiner 366.677-010.
 - Welders Helper 869.687-026.

The institution head may establish other assignments as needed that may not be delineated above.

Nonpay Assignments

The Inmate Pay Committee shall designate the following inmate assignments as nonpay assignments:

- Inmate Advisory Council Members.
- Vocational Student Assignments (unless the inmate is enrolled in a bonafide apprenticeship program).
- Academic Student Assignments.
- As deemed by the inmate pay committee.
- Substance Abuse or Therapeutic Assignments.

51120.8 Inmate Pay Increases/Reductions

Inmate pay increases shall not be automatic or based on the inmate's longevity in an assignment. Inmate pay increases or reductions shall be based on the work/training supervisor's recommendation and the inmate's work/training performance reports, subject to review and approval of the inmate assignment authority.

Inmates may only receive a pay increase on a quarterly basis until their maximum pay rate for that assignment is obtained.

When the inmate is given a new assignment that requires a higher skill level than that of the inmate's previous assignment, the inmate shall not initially be paid less than the amount the inmate received for the previous assignment unless the new assignment is designated as a nonpay assignment.

51120.9 Movement between Pay Positions Assignments

Changes from one pay rate to a higher pay rate shall be based upon the:

- Recommendation of the supervisor and the approval of the Inmate Pay Committee and the Inmate Assignment Lieutenant.
- Work history as reflected in performance reports.

Inmates approved for advancement to a higher skill classification shall enter the new classification pay grade equal to or greater than their present pay grade in the lower skill.

Inmate performance ratings and total hours in job categories shall be available for review when changes in job classifications are being considered.

An inmate's pay rate shall not be reduced nor shall the inmate be removed from pay status except for causes reflected in reports for inclusion in the inmate's C-File. When the cause is for misbehavior including willful refusal or failure to work as directed, the matter will be reported as a disciplinary offense on a CDC Form 115, Rules Violation Report. A finding of guilty to the charge may be accepted as authority to reduce the inmate's pay rate or remove the inmate from pay status, without regard for any other penalty imposed at the disciplinary hearing. Such a rate reduction or removal shall be taken within ten days of the disciplinary action.

Excluding transfers, when the cause for an inmate's reduction in pay rate or removal from pay status results from no fault of the inmate, including inability to satisfactorily perform the assigned job after a reasonable effort to do so, the non-disciplinary cause shall be reflected as such on a CDC Form 128-B, General Chrono, for inclusion in the inmate's central file.

51120.10 Performance Appraisals

Mandatory quarterly performance grading shall be submitted by the immediate supervisor on a CDC Form 101, Work Supervisor's Report, based on the following criteria:

- Demonstrated skill and knowledge.
- Observed work habits.
- Attitude toward:
 - Fellow inmates.
 - Staff.
 - Job.
- Learning ability.
 - Awareness of new procedures and methods.
 - Alertness and perseverance.
- Quality of work.
- Quantity of work.
- Care and use of tools and equipment.
- Recommendation for step increase in authorized pay.

Based on the above, the inmate may be recommended for a step increase in authorized pay, to be reviewed by the Inmate Pay committee for appropriateness.

Receiving an unsatisfactory CDC Form 101 shall be grounds for referral to an institution/facility classification committee for program change.

51120.11 Absences

Inmates shall report to their place of assignment at the time designated by the facility's/CCF's schedule of activities and as instructed by their assignment supervisor. Inmates shall not leave an assignment without permission to do so. Unauthorized absences shall result in no credit earning for the entire day. The CDCR Form 1697, Inmate Work Supervisor's Time Log, shall reflect the time period of the unauthorized absence.

Under no circumstances shall inmate pay be granted for time not worked California Code of Regulations, Title 15, Section 3041(b)(2).

51120.12 Timekeeping Documents

All timekeeping documents shall be maintained under lock and key. Inmates shall not have access to any timekeeping documents, pursuant to DOM 53130.

Timekeeping for pay purpose is documented on various time logs including, but not limited to, the following:

- CDC Form 190, Inmate Payroll.
- CDCR Form 1697, Inmate Work Supervisor's Time Log.

Work supervisors shall be responsible for:

- Keeping continuous daily records.
- Accuracy of timekeeping.
- Entering total hours worked daily.
- Completing and signing documents at the end of each month.
- Submitting payroll documents to the division head responsible for work projects.

Time Logs

If the inmate leaves the pay assignment or is reassigned during the calendar month, the work supervisor shall immediately close out the CDCR Form 1697, Inmate Work Supervisor's Time Log, and payroll log for the inmate and submit it to the division head.

Accounting Officer

Monthly, the facility/CCF accounting office, after auditing the time log, shall separate inmate payroll on a CDC Form 190-B, Inmate Pay/Work Project Claim Certification, for each fund from which inmate wages are to be paid.

Trust Office

Payroll documents shall be delivered to the trust office. Trust office staff shall post the earnings to the inmate's trust account.

51120.13 Revisions

The Chief Deputy Secretary, Adult Operations, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

ARTICLE 13 — CALPIA INMATE HIRING REQUIREMENTS AND PAY

Revised April 2, 2013

51121.1 Policy

Penal Code (PC) Section 2801 provides for the creation and maintenance of working conditions within CALPIA's enterprises. This includes a hiring requirement exclusively utilized to govern the employment of inmates assigned to CALPIA work/training programs.

PC Section 2811 specifies that the General Manager adopt and maintain a compensation schedule for inmate workers of the California Prison Industry Authority (CALPIA). Such compensation shall be in accordance with a graduated pay schedule based on quality and quantity of work performed and skill required for its performance. The statutory limitation is one-half the minimum wage provided for by the Labor Code (LC) Section 1182.

51121.2 Purpose

The procedure establishes the process for CALPIA inmate hiring, pay reductions and dismissal from CALPIA work programs. This procedure also establishes guidelines for uniform interpretation, application, and administration of the CALPIA inmate pay plan.

51121.3 CALPIA General Work Expectations

All inmates assigned to CALPIA work programs are to adhere to general work expectations. The Prison Industries Superintendent I and II are responsible for supplemental (specific) work expectations related to industry type. CALPIA work expectations include but are not limited to:

- Follow all instructions given by the supervisor.
- Know and follow all work place rules and regulations.
- Safety is a priority. The use of personal protective equipment, as required in designated areas, is mandatory. Training is required prior to the use of any tool or operation of equipment. The supervisor must be informed immediately, if a danger is perceived or present.

51121.4 CALPIA Inmate Worker Hiring Requirements

CALPIA shall fill vacant job/training positions based on the following factors:

- Skill - Demonstrating expertise of technical skills and knowledge.
- Ethnic Balance - Parity should be maintained with the institution's yard ethnic breakdown.
- Behavior - Relationship with others. Demonstrates ability to deal with authority figures, job supervisors, and other inmates.
- Attitude/Adaptability - Demonstrating willingness to learn, take directions, and orders.
- Work Habits - Punctuality, dependability, care of equipment, and safety practices.
- Formal Education/Training. Preparation for work and the ability to read, write, and speak effectively.
- The ability to perform the essential functions of the program, with or without reasonable accommodations.

Definitions of inmate worker skill levels are as follows:

Clerical

- Special Skills:

- Lead clerk who has the most responsible clerical position in administration, factory, farm, office, or warehouse.
- Technicians:
 - Lead clerk of a section or an operating unit of the facility whose supervisor does not have a civil service typist.
- Semi-skilled:
 - Lead clerks whose positions require less responsibility and skill than the above classifications, or who are working with clerks of higher classifications.
 - General clerical positions.

Trades

- Special Skills:
 - Set up and layout men who are responsible for guiding products through production lines or are responsible for the operation of many complex machines.
 - Mechanics and craftspersons who are responsible for difficult and technical work and have only limited or intermittent supervision. Assist in training other inmates.
- Technicians:
 - Journeyman mechanics, craftspersons, Inspector IIs, and heavy equipment operators who have only intermittent supervision.
- Semi-Skilled:
 - Apprentice mechanics, Inspector Is, medium equipment operators, and medium machine operators.
 - Lead floor persons who assist in the training of laborers.
- Laborers:
 - Janitors.
 - Trainees.

Farm Workers

- Special Skills:
 - Herdsmen and licensed pasteurizers.
- Technicians:
 - Milkers.
- Semi-Skilled:
 - Persons in farming, animal production, and animal husbandry.
- Laborers:
 - Farm/barn crew or entry level position to CALPIA.

51121.4.1 Minimum Intake Requirements

Inmates applying for a job or an apprenticeship/training position with CALPIA should have a minimum of two (2) years and a maximum of five (5) years from their Earliest Possible Release Date (EPRD), on the date of application.

Exemption: Institution Wardens and/or CALPIA Administrator/Lead Managers with transient populations where inmate availability deficiencies are statistically substantiated by virtue of individual missions must obtain a written waiver authorization from CALPIA General Manager annually. Institutions which receive this authorization will be allowed to utilize the following alternate intake requirement:

Inmates applying for a job or an apprenticeship/training position with CALPIA should have a minimum of two (2) months and a maximum of 60 months from their Earliest Possible Release Date (EPRD), on date of application.

Eligible inmates must possess a Test of Adult Basic Education (TABE) score of 9.0 prior to assignment. Additionally, assigned inmates will have to complete their GED or High School diploma within two years of initial CALPIA assignment. Failure to obtain GED equivalences or High School diploma may result in the inmate's immediate un-assignment from CALPIA.

Exemption: Institution Wardens and/or CALPIA Administrator/Lead Managers, with populations where inmate educational levels do not meet manpower needs, must obtain a written waiver authorization from CALPIA General Manager annually. Institutions which receive this authorization will be allowed to utilize the following alternate intake requirement:

- Eligible inmates should possess TABE score of 7.0 prior to assignment to a CALPIA position. Additionally, assigned inmates will have to complete their GED or High School diploma within two years of initial CALPIA assignment. Failure to obtain GED

equivalences or High School diploma shall result in the inmate's immediate un-assignment from CALPIA.

- Americans with Disabilities Act of 1990 (ADA) Exemption. Institution Wardens and/or CALPIA Administrator/Lead Managers will make a good faith effort and may accommodate disabled inmates unless it can be demonstrated that such accommodation would result in an undue financial and administrative burden. Assigned inmates must be able to perform the duties of the position with or without reasonable accommodations.

The total number of inmates with Life sentences assigned to CALPIA programs at an institution shall not exceed 25 percent of the established workforce allocation per CALPIA Enterprise. This percentage will not necessarily achieve parity with the institution's yard housing these inmates or the overall institution's lifer population make up.

Exemption: Institution Wardens and/or CALPIA Administrator/Lead Managers with Life sentence populations where inmate availability deficiencies are statistically substantiated by virtue of individual missions must obtain an annual waiver authorization exempting them from the 25 percent cap from CALPIA General Manager. This authorization will allow institutions to exceed the 25 percent cap in order to provide CALPIA the necessary manpower needs.

Immigration and Customs Enforcement (ICE) Hold Inmate Workers who have not been lawfully admitted for permanent residence within the U.S. at the time of incarceration, or were not permanently residing in the U.S. as a result of the application of the provision of Section 203(a)(7) or Section 212(d)(5) of the Immigration and Nationality Act may be assigned to a CALPIA job training assignment; however, they will not be eligible to receive external accredited certificates through CALPIA. ICE Hold Inmate workers who are in the process of acquiring an external certification or have had their ICE Hold status removed through administrative proceedings will be allowed to continue and finish such external certification.

51121.4.2 Mandatory Exclusionary Requirement

Inmates serving life sentences without the possibility of parole (LWOP) **shall not** be eligible for a CALPIA assignment; unless the inmate meets the exception found in 8004(d)(4) of Title 15, Division 8. (Institutions/facilities with a population resulting in inmate worker unavailability may utilize inmates with LWOP sentences with the approval of the Warden at the institution/facility of a case-by-case basis.)

Inmates with a history of escape **shall be** excluded from assignment to CALPIA.

Inmates with extensive history of disciplinary adverse actions, such as Rule Violation Report CDC Form 115 or disciplinary measures resulting in previous un-assignments from CALPIA must have a minimum of six (6) months of disciplinary-free conduct before being considered for a CALPIA assignment, on a case-by-case basis. The CALPIA Administrator/Lead Manager must approve and authorize each assignment.

Inmates convicted of arson, elements of arson and/or possession or use of explosive material **shall not** be eligible for a CALPIA assignment. This is due to the proximity and availability of volatile flammable chemicals and fire hazard materials associated with industrial environments.

Exemption: if the arson conviction was more than 15 years prior to the date of application, and the inmate meets all other eligibility requirements, the inmate may be placed on the CALPIA Inmate Candidate Pool (ICP).

Inmates classified as Close B Custody may be excluded from assignment to CALPIA. Wardens may approve, on a case-by-case basis, Close B inmates to CALPIA assignments.

Inmates convicted of computer related crimes **shall not** be eligible for assignments to CALPIA clerical positions.

Inmates convicted of forgery, fraud, or embezzlement **shall not** be assigned to the CALPIA Specialty Print Plants, ensuring the integrity of confidential documents.

Inmates assigned to employment within CALPIA, pursuant to Penal Code (PC) Section 5071, **shall not** have access to personal information of private individuals.

Inmates convicted of a PC Section 290 offense **shall not** be assigned to the CALPIA optical program.

51121.4.3 Recruitment and Hiring Process

CALPIA will have the ability and discretion to recruit inmates for work/training statewide to ensure participation and success of its various programs. CALPIA Administrator/Lead Manager will coordinate efforts with

Correctional Counselor III staff and/or Institution Classification Services Staff to accomplish this process.

CALPIA will make job applications (CALPIA Inmate Worker Application Form IEP-F002) available to the inmate population through the following institutional services:

- Institution Library
- Inmate Orientation
- Correctional Counselor's Office
- CALPIA Administration Offices
- CALPIA Enterprises
- Housing Units

Inmates interested in obtaining a position with CALPIA will submit completed applications for initial screening to their Correctional Counselor staff. Correctional Counselors will conduct a review of the inmates Central File (C-File) to ensure the inmate meets intake eligibility requirement as specified above. Counselors will schedule inmate to appear at an Initial/Unit Classification Committee for program review and placement into CALPIA's ICP. The Institution's Inmate Assignment Lieutenant will be responsible for maintaining the ICP and will provide a copy to the CALPIA Administrator.

CALPIA enterprise staff will interview inmates from the ICP and will conduct final selection of inmates to be assigned to a CALPIA assignment. Inmates selected should maintain parity with the institution's yard ethnic breakdown.

ICP will be prioritized as follows:

- High School Diploma or GED
- Enrolled in GED program
- No Diploma/GED and not enrolled in education program

A list of successful inmate applicants shall be made available to the CALPIA Administrator by the institutions inmate assignment office.

CALPIA enterprise staff will submit the final list of successful inmate applicants for immediate assignment to CALPIA, to the institution Inmate Assignment Lieutenant via memorandum.

The CALPIA Administrator/Lead Manager shall contact the institution's Investigative Service Unit (ISU) and request a urinalysis test be conducted on newly hired CALPIA inmates within thirty (30) days. If a CALPIA inmate tests positive and is found guilty of Rules Violation Report (CDC-115) for Use/Possession of a Controlled Substance, the inmate will be immediately removed from their CALPIA assignment.

Inmates removed through this process must have a minimum of six (6) months of disciplinary/drug-free conduct with a minimum of 90 days on an institutional assignment with satisfactory work reports (CDC-101s) before being reconsidered for a CALPIA assignment.

All inmates assigned to CALPIA shall remain subject to random drug testing for as long as they are assigned by CALPIA. If a CALPIA inmate is suspected of being under the influence of a controlled substance, the Superintendent I/II will contact the Administrator/Lead Manager to arrange a urinalysis test by the Investigative Services Unit.

All inmates assigned to CALPIA will be required to complete and submit an Inmate Worker Application Form (IEP-F002) which shall be completed by the inmate worker prior to the start of employment along with an Inmate Intake Form (IEP-F003). Inmates refusing to comply with this requirement will be denied employment with CALPIA and will be removed from CALPIA.

51121.5 CALPIA Inmate Lead Position Hiring Procedures and Requirements

Each CALPIA enterprise is authorized to have one leadperson position for each industrial staff within the operation. The Prison Industries Administrator/Manager at the facility shall approve the leadperson. Functions of leadperson positions shall be related to the duties of the industrial staff justifying the leadperson. All positions may be assigned leadperson pay. Under the direction of the CALPIA staff, the leadperson shall be expected to do much of the on-the-job training of newly assigned inmates. They shall assist in communicating to new inmate workers the staff's expectations of their work. Inmate leadpersons shall not function as assistant forepersons or supervisors and shall not be assigned control over other inmates. Their role is limited to that of training and communication.

The following procedures will be used when hiring leadpersons for all CALPIA factories:

- Post job vacancy, indicating the area(s) of responsibility, description of duties, required skills and abilities. The posting will also indicate the

experience and/or education necessary to apply for the position. The position will be posted for a one-week period; the closing date will be clearly stated.

- At the closing date all applications will be reviewed and only those meeting the hiring requirements will be selected for interview. Work files and/or C-files shall be reviewed by the interviewing staff panel.
- During the subsequent interviews, a staff panel will rate each applicant's replies to a number of set questions. The questions will reflect the applicant's ability to carry out the Lead position duties, and the ability to work with others.

The most qualified applicant will be selected for the position. All lead positions will include a probation period of six (6) months.

51121.6 CALPIA Inmate Workforce Allocation Policy

The facility Prison Industries Administrators/Managers shall determine the inmate workforce allocation for each cost center within their responsibility and adjust it as necessary by the procedures listed below. An inmate workforce allocation is defined as the current need for inmate workers in a specific cost center to maintain adequate production levels in order to support the volume of sales orders and service contracts. Changes in existing inmate workforce allocation shall be submitted annually via the CALPIA fiscal year budget process.

51121.7 Establishing and Revising CALPIA Inmate Workforce Allocations

The following procedures shall be followed when establishing new or revising existing CALPIA inmate workforce allocations:

New Enterprises

Prior to the activation of a new enterprise the Prison Industries Administrator/Manager is to follow the below-listed procedures:

- Submit an inmate employment pay plan to the CALPIA Assistant General Manager, Operations Division via the Branch Managers for approval. The plan shall include the allocation of inmate workers required per shift; a listing of the pay positions designating no more than 25 percent in each of the A, B, C, and D pay categories; and the job description based on the Federal Bureau of Labor Statistics' Standard Occupational Classification (SOC) for each pay position.
- The inmate workforce allocation for each enterprise is to be jointly approved by (1) the Warden or designee and (2) the CALPIA Assistant General Manager, Operations Division.

Existing Enterprises

Prior to changes of existing workforce allocation of 15 percent or more, the CALPIA Prison Industries Administrator/Lead Manager will submit changes to the CALPIA Enterprise Branch Manager for approval. The plan shall include:

- The workforce allocation of inmate workers required per shift, the SOC job description for each pay position, and the justification for revising an existing workforce allocation plan.
- The inmate workforce allocation for each enterprise is to be jointly approved by (1) the Warden or their designee and (2) the CALPIA Assistant General Manager of Operations Division.
- For changes of existing workforce allocation of less than 15 percent, the CALPIA Prison Industries Administrator/Lead Manager will submit an informational copy of the change justifying the revision in the inmate workforce allocation to the appropriate Enterprise Branch Manager.
- The inmate workforce allocation for each enterprise is to be jointly approved by (1) the Warden or designee and (2) the Administrator/Lead Manager.

The following standards will be utilized when inmate workforce allocations are reduced, causing a lay off situation of inmate workers. If possible, reduction and layoffs shall be accomplished through attrition.

- Skill. Demonstrating expertise of technical skills and knowledge of a dedicated job or process in a CALPIA assignment.
- Behavior. Relationship with Others. Demonstrates ability to deal with authority figures, job supervisors, and other inmates.

- Attitude, Adaptability. Demonstrating willingness to learn, take directions, and orders.
- Work Habits. Punctuality, dependability, care of equipment, and safety practices.
- Formal Education/Training.

51121.8 Source of CALPIA Inmate Pay

Inmate workers assigned to CALPIA programs shall be paid from the Prison Industries Revolving Fund.

51121.9 Administration of CALPIA Inmate Pay Plan

It shall be the responsibility of the Prison Industries Administrator/Manager at each facility to administer the CALPIA inmate pay program consistent with the applicable laws and the details of this plan.

The Prison Industries Administrator/Lead Manager shall:

- Monitor programs to ensure that pay positions have been properly classified and allocated.
- Review and appropriately approve/disapprove all recommendations for pay decreases and changes.
- Review and appropriately approve/disapprove all recommendations for dismissal.
- This policy and procedure shall be the final arbitrator regarding disputes or interpretations of this plan.

The CALPIA inmate wage rates and any proposed changes shall be submitted to the Prison Industry Board (PIB) for review.

Job descriptions shall be developed based on the Federal Bureau of Labor Statistics' SOC system for each inmate work position. Each job description will establish the minimum acceptable standards of participation and performance.

The inmate shall sign and be given a copy of the job description, indicating acceptance of the conditions of employment.

Staffing tables shall be prepared in accordance with inmate assignment workforce allocations and submitted to CALPIA Central Office for approval.

51121.10 CALPIA Inmate Pay Schedule

Hourly wage rates shall be determined and maintained by the General Manager and published by the CALPIA.

All CALPIA inmate positions are to be assigned to one of the following levels:

Hourly Pay Schedule			
Title	Step I	Step II	Step III
Leadperson (AA)	\$.75	\$.85	\$.95
Special Skills (A)	.65	.70	.75
Technician (B)	.55	.60	.65
Semi-Skill (C)	.45	.50	.55
Laborer (D)	.30	.35	.40

For each enterprise, the percentage of the inmate work force in each skill level may not exceed the following:

Leadperson (AA)/Special Skills (A)	25 percent
Technician (B)	25 percent
Semi-Skill (C)	25 percent
Laborer (D)	25 percent

Depending on actual inmate assignment turnover rate, the C and D pay categories may exceed the 25 percent payroll allocation. This is permissible as long as the C and D combined totals do not exceed 50 percent of payroll.

51121.11 Movement Between and Removal From CALPIA Pay Rates and Skill Levels

Movement between one pay rate to another pay rate shall be based upon a combination of factors including, but not limited to, the following:

- The written recommendation of the supervisor showing cause for reduction of the inmate's pay. The following document(s) and

justification reflecting below standard performance, misbehavior or "A" days is required in support of this written recommendation.

- The documentation of the inmate's accumulated work history as reflected on a CDC 101, Work Supervisor's Report.
- General Chrono, CDC Form, 128-B, Custodial Counseling Chrono, Form 128-A and/or Rules Violations Report, CDC 115.
- Inmate Work Supervisor's Log, CDCR Form 1697, which reflect absent without leave "A" day.
- Raises or reductions in an inmate's pay shall be based on the work supervisor's recommendation and the inmate's work/training performance reports and disciplinary reports.
- Pay increases shall not be automatic or based on the inmate's longevity in an assignment.

Workers in each skill level may be advanced to the next step within a skill level only after three months of satisfactory performance, or advanced from one skill level to the next only after one month of satisfactory performance, upon the recommendation of the supervisor, and if there is a vacant pay position available. The pay increase shall be effective on the first day of the following month in which the pay increase is implemented following approval by the Prison Industries Administrator/Manager. Less than satisfactory performance may result in a reduction in the hourly wage rate with the submission of a CDC Form 128-B-1, Classification Hearing Request/Notice Form, and a CDC Form 101, Work Supervisor's Report, stating the reason for the reduction in pay.

Inmates approved for advancement to a higher skill level shall enter the new classification pay grade equal to or greater than their present pay grade in the lower skill. For example, an inmate in the semi-skilled classification receiving an hourly wage of \$0.50 who advances to technician shall receive not less than \$0.55 or more than \$.65 per hour. Longevity shall not be used as a standard for the purpose of upgrading skill level.

Inmates removed from their CALPIA assignment for reasons beyond their control, for example; out-to-court or lengthy hospital stays, may, via the committee process, return to a CALPIA assignment at the same or closest level of pay to their former position if available in accordance with DOM section 53130.9.2.2.

51121.12 CALPIA Employment Dismissal

An inmate's pay rate shall not be reduced nor will the inmate be removed from pay status except based on the supervisor's recommendation, below standard or less than satisfactory work performance, or inmate misconduct as described in Title 15, California Code of Regulations, Division 3, Sections 3312, 3314, or 3315.

When the dismissal is for misconduct, including willful refusal or failure to work as directed, a CDC Form 101, Work Supervisors Report, shall be prepared and submitted to the factory superintendent for review and approval.

- The following document(s) and justification reflecting below standard performance, misbehavior or "A" days is required in support of this work history.
- CDC Form 128-B, General Chrono, CDC Form 128 A, Custodial Counseling Chrono, and CDC Form 115, Rules Violation Report.
- Inmate Work Supervisor's Log, CDC Form 1697 which reflect absent with out leave "A" day.

The CALPIA Administrator/Lead Manager will review for proper justification and approve the applicable above written documentation. If denied all documentation will be returned to factory Superintendent. Upon approval CALPIA Administration will generate a CDC Form 128-B-1, Classification Hearing Request/Notice, and submit to Facility Classification Committee for removal of inmate from CALPIA work program. The CALPIA Administrator/Lead Manager or designated Superintendent will be required to attend the Facility Classification Committee hearing. The CALPIA representative will assist the Committee by providing any additional information and/or testimony that may be required to remove the inmate from his/her CALPIA assignment.

The inmate shall be placed on "S" time in accordance with CCR Title 15 Section 3045.3, with the approval of the CALPIA Administrator/Lead Manager, pending the outcome of the disciplinary process. A finding of guilty to the charge may be accepted as authority for dismissal and/or reduction of the inmate's pay rate to the lowest CALPIA pay number, notwithstanding any other penalty imposed at the disciplinary hearing.

The CDC Form 128-B, General Chrono, requesting that the inmate be placed on "S" time should as an example contain the following verbiage; "Due to the seriousness of the rules violation and the security risk posed to CALPIA

and the institution and because of the inability to maintain constant supervision of this inmate on the job site during an entire work shift, inmate (inmate name) is deemed a security risk to CALPIA and the institution and shall remain on "S" time pending the adjudication of the CDC Form 115, Rules Violation Report". (Attach the rough copy of the CDC Form 115 to the CDC Form 128-B).

Any inmate unassigned from CALPIA for disciplinary cause will be ineligible for reassignment to another CALPIA enterprise. If after six months of disciplinary free behavior and a positive CDC Form 101, Work Supervisors Report, from a work assignment other than CALPIA, an inmate may be eligible for reassignment. The reassignment shall require the approval of the CALPIA Administrator/Lead Manager.

51121.13 Activities for Which CALPIA Inmate Pay Is Authorized

CALPIA inmates shall be paid for the following activities only:

- Productive work.
- Actual work time.
- Tool check-in/check-out (15 minutes twice per day).
- Clean-up (15 minutes twice per day).
- Official break times.
- Management approved job-related trade training during a portion of the regular workday.

CALPIA inmates shall **not** be paid for the following:

- State holidays.
- Time lost due to job related illness or injury.
- Late release by custody.
- Shower time, unless required by job description.
- Lunch breaks.

51121.14 CALPIA Inmate Performance Appraisals

Mandatory quarterly performance grading shall be submitted by the inmate's immediate supervisor on CDC Form 101 for the following standards:

- Demonstrated skill and knowledge.
- Observed work habits.
- Attitude toward fellow inmates, staff, and the job.
- Learning ability, awareness of new procedures and methods, alertness, and perseverance.
- Quality of work.
- Quantity of work.
- Care and use of tools and equipment.
- Recommendation for step increase in authorized pay.

Receiving an unsatisfactory CDC Form 101 and a CDC Form 128-B-1 shall be authorization for reduction in pay rate and/or position, demotion, or termination by referral to the facility classification committee for program change.

51121.15 CALPIA Assignments for Transferred Inmates

Former CALPIA inmates transferring from other facilities may be placed in the skill level, which is appropriate for the position desired if the inmate stays in the same trade area provided they demonstrate the skills deemed necessary for appointment during the ninety (90) days at the probationary D1 rate. Inmates may be placed at an equal level to the work assignment previously held at the sending facility, when a position becomes available, but such placement is not guaranteed. This placement remains subject to the availability of a position and other requirements as set forth in DOM subsection 51121.4.

51121.16 CALPIA Inmate Timekeeping Procedures

All CALPIA inmate workers' time shall be initially recorded by time clocks on timecards. All punching of timecards shall be under the direct supervision of a civil service employee. Timecards shall be maintained in secure locked containers when not in use. The inmate's supervisor shall be responsible for verifying and certifying by initialing the timecard before its submission for payroll preparation.

Time records shall be consolidated on a summary form, initialed by the supervisor, and signed by the Prison Industries Administrator/Manager.

If an inmate is reassigned during the pay period, the work supervisor shall complete the timecard and turn it in to the timekeeper.

All appropriate facility timekeeping forms approved by the Prison Industries Administrator/Manager, supported by the timecard, shall be forwarded to the facility accounting office immediately after the close of the pay period.

Central Office timekeeping forms are to be forwarded to Operations Division, who will then forward to Accounting Services.

Payroll shall be prepared from the approved information. One copy shall be retained by the facility Prison Industries Administrator's/Manager's office and the original shall be forwarded to the CALPIA facility accountant, who must call the total inmate pay amount to Central Office Accounting Services and prepare the accounting entry which distributes the costs by enterprise.

51121.17 CALPIA Inmate Payroll

On a monthly basis, the facility accounting office, after auditing the summary form, shall prepare a separate inmate payroll on CDC Form 190 for each fund from which inmate wages are to be paid.

The original copy of CDC Form 190 is to be submitted to the CALPIA Accounting Office, Revenue Unit, and the duplicate is to be retained by the facility accounting office.

Immediately upon preparation of payrolls, earnings shall be credited to inmates' trust accounts. CALPIA will issue a revolving fund check to be deposited in the inmate trust fund in an amount equal to the total of all payroll. Payroll claim schedules shall be prepared so that the State Controller's Office reimburses the Prison Industries Revolving Fund.

51121.18 CALPIA Inmate Attendance

One hundred percent attendance is expected of all inmate workers.

Inmates shall report to their place of assignment at the time designated by the facility's schedule of activities and as instructed by their work supervisor. Inmates shall not leave an assignment without permission to do so. Unauthorized absences shall not earn pay or time credits and may be grounds for dismissal from CALPIA employment. On an emergency basis, inmates shall be required to work overtime at the direction of the Prison Industries Administrator/Manager or designee.

ETO may be utilized as described in CCR Section, 3045.2 Excused Time Off.

51121.19 Security of Timekeeping Forms

The time clock timecards are considered legal documents. These forms shall be maintained under lock and key, and no inmate shall have access. The accuracy of timekeeping is paramount, and industrial supervisors shall be held responsible.

Each employee who is responsible for supervising an inmate in an approved pay position shall keep a continuous daily record of the actual hours worked as stated in DOM subsection 51121.16.

At the end of each calendar month, the employee shall complete the forms, sign the required certification as to the accuracy of the working time stated, and submit them to the facility Prison Industries Administrator/Manager or designee.

In accordance with local procedures, the appropriate form shall be delivered to the records office for recording of "A" time only.

Entries on the timecard shall be made for each day the inmate is assigned. If assigned less than the full month, a diagonal line must be drawn through the unassigned dates. On the first day of work, show assignment. Show the reason for leaving the assignment. The following symbols and the appropriate number of hours for each shall be used by the work supervisor to record the inmate's work day. Each day must reflect time for a full-day or half-day as appropriate.

X	WHEN INMATE IS ON THE JOB
A	WHEN INMATE IS ABSENT AND UNEXCUSED FROM ASSIGNMENT
R	WHEN INMATE IS ON REGULAR DAYS OFF.
H	STATE HOLIDAY.
S	WHEN INMATE IS UNABLE TO REPORT TO WORK BY ORDER OF THE PRISON ADMINISTRATION. (For example: lockdown; supervisor absent, out-to-court as witness for the State or on subpoena; pre-release/transfer checkout).

Upon inmate transfer, parole, or reassignment, it shall be the responsibility of the work supervisor to immediately forward to the division head completed timecards for signature and transmittal to the records office if "A" time is present.

51121.20 Revisions

The General Manager, CALPIA, or designee shall be responsible for ensuring that the contents of this section are kept current and accurate.

ARTICLE 14 — CONSERVATION CAMPS

Revised May 25, 1993

51130.1 Policy

PC 6200 and 6204 permit The Director to establish a Conservation Camp Program and to promulgate rules and regulations for the government of the Conservation Centers in the management of their affairs.

51130.2 Purpose

The purpose of the Correctional Conservation Camp Program shall be to promote the conservation of natural and human resources within the limits established by law, CCR, and the operating procedures of cooperating agencies. The Conservation Camp Program shall cooperate with other State and local agencies in a joint operation.

Inmates may be assigned to perform public conservation projects including, but not limited to, the following:

- Forest fire protection and control.
- Forest and watershed management.
- Recreational area development.
- Fish and game management.
- Soil conservation.
- Forest watershed revegetation.

51130.3 Joint Administration

The Conservation Camp Program shall be jointly administered by CDC and the Department of Forestry and Fire Protection (CDF); by CDC and the Los Angeles County Fire Department (LCFD); and/or with other cooperating agencies. The Director may enter into contracts or cooperative agreements with public agencies for the performance of appropriate conservation projects.

Any productive industrial enterprise subject to the jurisdiction of the CALPIA established at any center or camp shall be approved by the General Manager, CALPIA.

Interagency Agreements

Copies of each interagency agreement shall be maintained on file at the headquarters and at the facilities with camps.

51130.4 Department Contact Agency Liaison

The Conservation Camp Coordinator, under the direction of the Deputy Director, Institutions Division, shall maintain direct liaison with CDF, LAC, and other agencies in operation of Conservation Camps.

51130.4.1 Department's Agency Representative

On all major fires and other emergencies in which it becomes necessary to establish emergency camps and where a combination of Conservation Camp inmates and Department personnel are based, a supervisor at the level of Sergeant or higher shall be appointed by the Captain responsible for camps in the affected fire district.

The supervisor shall coordinate all matters affecting all inmate crews that may be participating in the containment of the emergency, and shall act as the Department's Agency Representative. This Agency Representative shall make all contacts with the cooperating agency. They shall represent all Department employees and Department inmate crews on custodial and related matters regardless of origin of the crews. All Department camp personnel shall report to the Department's Agency Representative as soon as possible after arriving at the emergency camp. They shall provide the Agency Representative with the following information:

- The number of inmates.
- The number of custody staff accompanying the inmates.
- The name of the camp the inmates/staff are from.

51130.4.2 Administrative Responsibility of Camps

The Conservation Camps located on the grounds of CMC and CRC shall be administered by their respective parent facilities. Administrative responsibility of the remaining Conservation Camps is delegated to CCC and SCC.

51130.5 Names and Locations of Camps

Each Conservation Camp has a designated name jointly selected and approved by CDF and CDC, or by LAC and CDC. The name of the facility responsible for the operation of the camps should not be used on camp signs or literature pertaining to the camps.

The Conservation Camps and their location are listed below:

CCC Camps:

Alder Conservation Camp #20
P.O. Box 906
Klamath, CA 95548
(707) 482-4511

Antelope Conservation Camp #25
P.O. Box 641
Susanville, CA 96130
(916) 257-2181

Chamberlain Creek Conservation Camp #17
15800 Highway 20
Fort Bragg, CA 95437
(707) 964-3518

Deadwood Conservation Camp #23
17148 McAdams Creek Road
Fort Jones, CA 96032
(916) 468-2633

Delta Conservation Camp #8
6246 Lambie Road
Suisun City, CA 94585
(707) 425-4878

Devil's Garden Conservation Camp #40
P.O. Box 490
Alturas, CA 96101
(916) 233-3553

Eel River Conservation Camp #31
P.O. Box 819
Redway, CA 95560
(707) 923-2755

High Rock Conservation Camp #32
P.O. Box 296
Weott, CA 95571
(707) 946-2343

Intermountain Conservation Camp #22
P.O. Box 615
Bieber, CA 96009
(916) 294-6361

Ishi Conservation Camp #18
Star Route 3, P.O. Box 53
Paynes Creek, CA 96075
(916) 597-2846

Konocti Conservation Camp #27
13044 State Highway 29
Lower Lake, CA 95457
(707) 994-2437

Parlin Fork Conservation Camp #6
23000 Highway 20
Fort Bragg, CA 95437
(707) 964-3766

Salt Creek Conservation Camp #7
P.O. Box 435
Paskenta, CA 96074
(916) 833-5479

Sugar Pine Conservation Camp #9
15095 Sugar Pine Camp Road
Bella Vista, CA 96008
(916) 472-3027

Trinity River Conservation Camp #3
P.O. Box 609
Lewiston, CA 96052-0609
(916) 286-2885

Valley View Camp #34
P.O. Box 8
Elk Creek, CA 95939
(916) 968-5142

SCC Camps:

Acton Conservation Camp #11 (LAC)
8800 Soledad Canyon Road
Acton, CA 93510
(805) 268-0113

Baseline Conservation Camp #30
16809 New Peoria Flat Road
Jamestown, CA 95327
(209) 984-4464

Bautista Conservation Camp #36
33015 Bautista Canyon Road
P.O. Box 12009
Hemet, CA 92343-1059
(909) 927-3600

Fenner Canyon #41 (LAC)
P.O. Box 100
Valyermo, CA 93563
(805) 944-0173

Francisquito Conservation Camp #4 (LAC)
3510 N. San Francisquito Canyon Road
Saugus, Ca 91350
(805) 296-4409

Gabilan Conservation Camp #38
Route 1, Box 105
Soledad, CA 93960
(408) 678-1873

Growlersburg Conservation Camp #33
Box 349004
Georgetown, CA 95634
(916) 333-4244

Julius Klein Conservation Camp #19 (LAC)
22550 East Fork Road
Azusa, CA 91702
(818) 910-1213

Malibu Conservation Camp #13 (LAC)
1250 S. Encinal Canyon Road
Malibu, CA 90265
(213) 457-2253

McCain Valley Conservation Camp #21
P.O. Box 1252
Boulevard, CA 91905
(619) 766-4393

Miramonte Conservation Camp #5
49039 Orchard Drive
Miramonte, CA 93641
(209) 336-2312

Mt. Gleason Conservation Camp #16 (LAC)
26650 N. Angeles Forest Highway
Palmdale, CA 93550
(805) 947-7784

Mountain Home Conservation Camp #10
P.O. Box 647
Springville, CA 93265
(209) 539-2334

Oak Glen Conservation Camp #35
41100 Pine Bench Road
Yucaipa, CA 92399
(909) 790-1729
Owens Valley Conservation Camp #26
Route 2, P.O. Box 22L
Bishop, CA 93514

P.O. Box 810120
San Luis Obispo, CA 93401
(805) 543-2700, Ext. 49

Norco Conservation Camp (CRC) #39
P.O. Box 279
Norco, CA 91760
(909) 737-5911, Ext. 4174

51130.6 Operational Administration

At each facility having a Conservation Camp Program, the Warden administers the camp operation.

At those facilities that operate facility-based camp programs, the administration shall be carried out as an adjunct to other daily operations. Administrative responsibility includes, but is not limited to, the following:

- Budget for and supply the camps with all necessary manpower, materials, and supplies to properly operate and maintain the camps.
- Direct and supervise all camp activities so that the camp shall operate for the benefit of the State and the rehabilitation of the inmates.
- Coordinate with the cooperating agency all of the activities necessary for the operation of the conservation camp program.
- Supervise all custodial and treatment personnel and direct their compliance with the CCRs, State law, and applicable procedures.

51130.7 Camp Commander

The Camp Commander (Lieutenant) at each Conservation Camp reports to the Camp Captain at the parent facility (CCC/SCC). The Camp Commander shall understand objectives of the cooperating agency and work with them as a liaison officer toward reaching mutual respect and cooperative understanding. The Camp Commander has direct responsibility for all phases of the camp program which shall consist of, but is not limited to, the following:

- Acquisition, preparation, and inventory of food supplies, clothing requirements, and canteen supplies.
- Recreational and in-camp leisure activities of the inmates.
- Housekeeping of buildings occupied by Department personnel.
- Maintenance of the custody and security of inmates assigned to their camp.

51130.7.1 Assistant Camp Commander

A Sergeant is the assistant to the Camp Commander and reports to them. The Sergeant acts as Camp Commander during that person's absence from the camp.

51130.7.2 Officer

Officers, during their duty hours, supervise and control inmates at the direction of the Camp Commander and Assistant Camp Commander.

Note: Personnel assigned to the Conservation Camps shall be regulated by the same conditions of employment that apply to all other employees of the Department. Each camp is a branch of the facility that maintains it and all pertinent rules, regulations, and laws apply.

51130.7.3 Personnel--Department of Forestry and Fire Protection

Listed below is the CDF personnel assigned to each Conservation Camp.

- Camp Division Chief. Shall be in charge of all forestry activities at a Conservation Camp.
- Assistant Division Chief. Shall be assigned to camps which have 100 or more inmates.
- State Fire Captains (B). Shall be assigned to a ranger unit fire control position and may supervise inmates on a temporary basis on work projects or on the fire line and shall be equally responsible for inmates assigned to them for work.
- Heavy Fire Equipment Operators. Are assigned to operate and repair the CDF in-camp vehicles and to operate heavy equipment on conservation projects and fires. They may also be assigned to supervise in-camp inmates on in-camp work projects.

51130.7.4 Personnel--Los Angeles County Fire Department

Listed below is LAC personnel that may be assigned to Conservation Camps located in Los Angeles County:

- Fire Captain. Shall be in charge of all fire and project activity in the camp.
- Fire Fighter Specialists. Shall supervise the inmates assigned to them for work.

51130.8 Inmate Assignment

Inmates are assigned to a camp from approved departmental lists. Selection of specific camp assignments is made on the basis of population needs and needs of the inmate, in line with departmental regulations.

The Classification Committee carefully evaluates the escape potential of inmates assigned to a camp. Inmates sometime present a different appearance when behind walls or under constant surveillance than they do in minimum custody camp surroundings. This difference often becomes apparent to the correctional camp personnel. Therefore, the correctional camp employees need to carefully study assigned inmates and return to the facility those inmates who they believe to be escape-risks. Such returned inmates should not constitute a large percentage of the camp population.

51130.9 Inmate Orientation

Camp personnel orient inmates upon arrival at a camp. The orientation schedule shall be in writing and filed in the Camp Commander's office. The orientation shall include, but is not limited to, the following:

- Camp living rules.
- Assignments.
- Project policies.

51130.10 Camp Register Log

A Graphic Arts Form 134, Camp Register, is maintained to record all pertinent, necessary, and important events which take place in the camp

setting. The Camp Commander shall see that the Camp Register is properly maintained.

51130.11 Camp Boundaries

The CCRs provide the authority by which the Camp Commander establishes camp boundaries. These boundaries determine the limits of authorized inmate traffic. The establishment of camp boundaries shall give consideration to the cooperating agency's (CDF/LAC) needs.

- The meaning of the camp boundary signs shall be explained so that the boundaries are understood by all inmates. Inmates shall be required to sign a CDC Form 142, Camp Affirmation. The signature of the inmate shall be witnessed by a camp correctional staff member, then placed in the inmate's file.

51130.12 Work Projects

Inmate work projects are planned and supervised by the cooperating agency, pursuant to PC 2780, but are approved for custodial security and safety by the Camp Commander. Work projects shall not be permitted in areas that present undue escape hazards, civilian contacts, or which cannot be subject to adequate health, safety, and security precautions.

51130.12.1 CDC Form 101: Work Supervisor's Report

A CDC Form 101, Work Supervisor's Report, is completed monthly by the agency crew foreman on inmates assigned to them. The CDC Form 101s are routed to the Camp Commander and forwarded by them to the respective facility's records office for posting on CDC Form 109, Work Report Chrono Sheet.

- Class grade, report forms, and reporting periods are prescribed by the Department. It is recommended that cooperating agency personnel keep a daily record of the work and attitude of each inmate under their supervision.

51130.13 Formal Inmate Counts

There shall be at least four formal camp counts of inmates in each 24-hour period. (Refer to formal counts in DOM 52020.)

51130.13.1 Informal Counts— Project Foreman

Inmates shall be counted upon mounting and dismounting vehicles and going to and returning from any place outside the camp or facility. Agency crew foremen shall make counts of inmates in their custody at frequent intervals and shall count the inmates before leaving camp and upon returning to camp. Counts are required at least once during the morning, lunch time, between lunch and the end of the work day, departure from the work area, and at other times recommended by the Camp Commander.

51130.13.2 Emergency Counts

Emergency counts may be necessary at any time to determine if there has been an escape or to identify an escapee(s). (Refer to DOM 52020 for additional information on emergency counts).

51130.14 Transfer of Custody

Transfer of custody of inmates to normal work projects shall be at a mutually agreed place and in the following manner:

- The CDF camp office submits to the Department each evening a crew list which contains the names and identification numbers of the inmates, the name of the crew foreman, and the location of the projects for the following day's crew assignment.
- Employees of each cooperating agency shall count the inmates onto the conveyance taking them to work, or as a group of workers if they walk to the project. Cooperating agency personnel maintain custody of inmates until returned to the custody of the Department.
- Custody cannot be transferred unless the inmate is physically present at the time of transfer.
- The Department supplies the cooperating agency with a picture of each inmate assigned to the camp and shall furnish the agency crew foreman with a picture of each inmate assigned under their supervision.
- Normally, inmate crews shall not be divided to allow a portion of the crew to work under the supervision of a person not employed by a cooperating agency or the Department. Under some circumstances this may be allowed but only when specifically authorized by the cooperating agency staff person or correctional employee in command.
- Inmate crews may be assigned under supervision of employees of agencies other than the CDF, LAC, and Department only after the specific employees have been instructed in the supervision of inmates.

51130.15 Discipline

Department employees administer inmate discipline in Conservation Camps. The disciplinary process is governed by the provision of the CCRs.

51130.15.1 Disciplinary Hearings

The Camp Commander of a Conservation Camp shall consider and take action on all disciplinary infractions that occur in the operation of the camp. Serious violations may be referred to the Chief Disciplinary Officer of the parent facility. (Serious violations for female inmates may be referred to the Chief Disciplinary Officer at the appropriate female facility.)

The Camp Commander may receive assistance from the Division Chief or a department head of other cooperating agencies or their designated representative in the hearing of these disciplinary matters. Correctional Counselors assigned to the camps may also participate in the hearings.

51130.16 Firearms—Camp Equipment

Each Conservation Camp shall have an appropriate number of revolvers and related equipment. These weapons shall be carried by Department personnel in the pursuit of escapees and walkaways. Arrangements shall be made by the Camp Commander to store these weapons outside the confines of the camp.

51130.16.1 Firearms--Outside Agencies

PC 4574 specifically prohibits the bringing into any State facility, Conservation Camp, or place where prisoners of the State are located any firearms or deadly weapons. It is recognized that certain peace officers and others who may use firearms in their assignments will find it necessary to enter a Conservation Camp. Every possible effort shall be made to advise these persons to store their weapons before entering the camp.

When this is not feasible or practical, these weapons shall be stored in a secure location.

51130.17 Incident and Escape Plans

The incident plan (refer to DOM 51030) and escape plan (refer to DOM 55040) are maintained on file in the Camp Commander's office. The Camp Commander carries out the mandates of the incident and escape plan and submits the necessary reports.

Two copies of a report covering escapes and/or incidents which occur in the Conservation Camp Program, and especially in those cases in which a CDF employee is involved, shall be forwarded to the Regional Chief of the district in which the camp is located. This affords CDF an opportunity to keep fully informed and take proper action with regard to its employees. Likewise, department heads of other cooperating agencies shall be informed regarding incidents and/or escapes involving their personnel.

51130.18 Fire Protection Plan

The Camp Commander and the Division Chief or the department head of other agencies mutually develop and maintain a plan for the prevention and suppression of fires in camp. Included in the plan shall be a trained crew to operate the camp security fire truck in the event of an in-camp fire.

51130.18.1 Fire Drills

The Department and cooperating agency personnel shall be integrated into an overall campfire plan and each shall be sufficiently trained to activate and head the entire fire protection plan. Fire drills shall be conducted at least once a month and recorded in the Camp Register.

51130.18.2 Inspections

The cooperating agency person in charge and the Camp Commander shall make monthly inspections of the entire camp area for the purpose of determining the adequacy of fire protection measures and equipment provided and to note conditions which might constitute a fire or safety hazard. All such inspections shall be recorded in the Camp Register. Steps shall be taken immediately to eliminate fire and safety hazards.

51130.18.3 Vehicles

Vehicles specifically assigned as "in-camp fire protection units" shall be accessible and equipped to be readily operable by any individual authorized and trained in the campfire protection plan.

51130.19 Transportation of Inmates

The transportation of inmates to and from work projects, fires, emergency projects, the conservation centers, and/or other facilities of the Department shall be in vehicles properly equipped to provide safety and comfort in accordance with applicable safety, VC provisions and CCR 3443 and 3444.

51130.19.1 Airplane Transportation

Inmates may also be transported by airplane or helicopter, providing that such inmates are not taken outside the State of California.

51130.19.2 Transportation Across State Lines

Inmates may be transported across the California-Nevada State line when traveling from one facility of the Department to another (emergency fire camps are considered to be a facility of the Department) when necessary and are subject to all California laws while being transported. Inmates shall be

accompanied by a Department officer. (Reference: PC 5080 and the provisions of Nevada Revised Statutes, Chapter 212.10.)

- During declared fire emergencies, the Director may allow the Director of the CDF to use inmates for fire suppression efforts outside of the boundaries of California, not to exceed a distance in excess of 25 miles from the California border, along the borders of Oregon, Nevada, or Arizona.

51130.20 Vehicle Operation

The operation of vehicles by inmates and conveyance of inmates are governed by the CCRs. All vehicles transporting inmates shall be equipped and operated to comply with the VC. Inmates may operate vehicles in camp with the prior approval of the Camp Commander. Only personnel having a valid driver's license of the appropriate class shall operate State vehicles.

51130.20.1 Parked Vehicles

All parked vehicles, except in-camp fire protection vehicles, shall be locked with the switch key removed. At fire camps or on fire lines, the keys shall remain in the vehicles. Duty correctional personnel shall inspect all parked vehicles for compliance with the above rules.

51130.20.2 Vehicle Request

Department employees may request the use of a cooperating agency vehicle when use is economical to the State or for an emergency.

51130.21 Feeding

The Department operates a feeding program that assures the inmates an adequate diet.

This is accomplished by establishing a food control program based upon a ration of each food item sufficient in quantity to maintain an adequate diet and assure a menu pattern which is acceptable to the inmate population. By controlling the quantity of food available, inmates are continually assured an acceptable diet regardless of the cost for the food. This practice shall eliminate the scarcity of food items caused by a sudden increase in price of a particular food item.

The Camp Commander of each camp directs the operation of the food service program. This includes the preparation of menus, requisitioning of food and other supplies, and receiving and storing the items. The Camp Commander shall study, and have immediate knowledge of, the food ration and the implementation problems. (Refer to DOM 54080.) The Camp Commander shall receive technical assistance from the Food Manager of the facility and Supervising Cook assigned to the camp program.

- Nutmeg, yeast, mace, or any food item which could be considered dangerous in the inmate population are kept under lock and key by the Camp Commander. The Camp Commander shall provide these items to the inmate cook and/or baker on an as-needed basis.
- Camp fire crews returning at odd hours from a fire and other camp fire fighting crews using the camp as a staging area are to be fed a fire ration meal. The Camp Commander shall be notified at least three hours in advance if possible after the decision has been made to use the camp facilities. Authorization for fire meal reimbursement from cooperating agency shall be accomplished at the time of service.
- A complete inspection of the culinary department shall be made daily. The cleanliness of the kitchen and dining room is of vital importance to the welfare, health, morale, and success of each camp. The Camp Commander or designee shall assure that food preparation inmates use good personal hygiene and are well groomed and properly clothed (including head covering).

51130.22 Clothing

Updated February 2, 2011

A clothing ration has been established to properly clothe each inmate in the camp program. Inmate clothing shall be restricted to the items listed in DOM 54060.

- Special clothing items required for special assignments and emergency laundry services may be purchased by the Camp Commander.

51130.23 Parole Release Procedure

The policy and procedures contained in CCR and DOM 74070 shall guide the Camp Commander in releasing inmates from camp. The Camp Commander may delegate the prerelease duty to the Sergeant or Officer.

51130.24 Public Information

The public information section (DOM 13010) and the CCRs shall govern the Camp Commander's action in this area. The Camp Commander shall develop a public information and community relations policy and submit it to the Warden for approval. There shall be no deviation from the approved policy, except by permission of the Warden.

- It is mutually beneficial for camp inmates to receive positive publicity for their work efforts. The Camp Commander shall join the cooperating agency in fostering positive inmate publicity.

51130.25 Community Services

Conservation Camps have always made special efforts to be good neighbors and to support local community needs. This "good neighbor policy" shall be pursued within the guidelines of the CCRs.

51130.25.1 Inmate Blood Donations

Wardens of facilities administering camps may permit the inmates to donate blood to the American Red Cross, the armed services, local blood banks, or other legitimate charitable purposes. Such drives may be permitted under the supervision of their authorized representative.

51130.25.2 Fund—Raising Campaigns

Camp inmates may participate in fund-raising campaigns in accordance with provisions of DOM 101080.

51130.25.3 Toy Repair

Inmates may donate as much of their free time as they wish, commensurate with their daily assignments, to the repair of toys for orphans or other needy children.

Materials and equipment needed to perform this service shall be from a source other than State issue. Inmates shall not supply personal material or equipment for toy repair service.

51130.25.4 Local Sports

Each camp able to provide inmate athletic competition is encouraged to engage local teams. Games shall be played on the camp recreation field only and are subject to DOM 101040.

51130.25.5 Arts and Crafts Exhibits

Camp inmates may exhibit arts and crafts work at local gatherings, fairs, and other community functions. Such exhibits are subject to the CCR, DOM 101050, and PC 5006.

51130.26 Medical/Dental Procedures

The CCRs and DOM Chapter 9 shall govern medical and dental services in camps. The Camp Commander shall make arrangements with a local physician(s) and dentist(s) to perform emergency care. Inmates in need of major non-emergency medical or dental treatment shall be returned to the appropriate facility.

51130.26.1 Medical/Dental Emergencies in Camp

Ambulance service and treatment for seriously ill or injured inmates shall be arranged by the Camp Commander at a local nearby hospital. The Camp Commander shall advise the CMO or Medical Officer-of-the-Day at the parent facility. Serious health emergencies shall be reported, as are other emergencies.

51130.26.2 Emergency Under Supervision of Contracting Agency

If an inmate becomes seriously ill or is seriously injured while under the supervision of a cooperating agency, the Fire Captain or other appropriate department head shall immediately notify the Camp Commander so that immediate steps may be taken to care for the inmate. The Fire Captain shall complete a CDC Form 620, Inmate Accident Report, and submit it to the Department.

Sufficient supplies of CDC Form 620 shall be maintained by the Department and supplied to the cooperating agencies to comply with this directive.

51130.26.3 Injury While on Fire Suppression

Inmates who become disabled resulting from injuries received while engaged in fire suppression activities may be eligible to receive benefits as prescribed in LC 3365 and 4458. Within one work day of their injury or within one work day after staff became informed of their injury, inmates shall be provided with a SCIF Form 3301. Injuries suffered by inmates shall be reported on copies of SCIF Form 3067, Employee's Claim For Worker's Compensation Benefits, without delay. The Department and the cooperating agency shall cooperate in providing the proper reports to cover the details of the injury.

51130.26.4 Death

If an apparent death of an inmate occurs during their assignment away from the Conservation Camp, the Camp Commander shall contact the nearest physician for medical assistance. If the inmate is pronounced dead by the physician, the coroner shall be notified before the body is moved and the coroner's instructions shall be followed. The Warden of the parent facility shall be notified and further instructions requested. After the release of the body by the coroner and further instructions from the Warden, the body shall be turned over to a licensed undertaker nearest the community where the death occurred (in accordance with DOM 51070).

- A complete incident report shall be submitted to the Warden of the appropriate facility without delay.

51130.26.5 Medical Supplies

Medical supplies shall be prescribed and approved by the CMO for use by Department personnel in administering routine medications and minor first aid to inmates in the camp.

- A standard first aid application book shall be kept in the Camp Commander's office. All camp employees are required to complete a basic course in first aid and cardiac pulmonary resuscitation.

51130.26.6 Medical/Sanitation Inspections

The appropriate facility CMO shall inspect each camp at least once each year for sanitation and proper sanitation practices. The Camp Commander may request additional inspections as needed.

51130.27 Inmate Wages

To maintain uniform pay scales for inmates assigned to the Conservation Camps, the following standards have been established:

- The Camp Commander shall assure accuracy of inmate payrolls and establish auditing procedures to ensure inmates are paid according to their length of service, performance, and assignment.

51130.27.1 Pay Committee

Each camp has an in-camp pay committee. The committee determines the promotion and/or demotion of inmates in the various pay grades. This committee shall administer the monthly pay allocations and stay within the prescribed limits for their camp. This monthly pay allocation is provided by the parent facility, usually at the beginning of each fiscal year.

- The committee is composed of the following camp personnel, or in their absence, the designated representatives of each department:
 - Camp Commander or their assistant.
 - Cooperating agency person in charge.
- The committee shall meet as necessary to consider the recommendations of both departments. The Department employee in charge shall maintain adequate records.

51130.27.2 Pay Period

The pay period is based on the calendar month and inmates are compensated for each day's work within the month. The standard project workweek is five eight-hour days, Monday through Friday, with Saturdays, Sundays, and approved holidays off.

- Inmates shall be paid for emergency work on an hourly basis. This pay commences at the time of dispatch to the emergency and continues until the inmate has returned to their camp. (Refer to PC2782 and PC 2785.)

51130.27.3 Pay Schedules

The specific rate per hour is established by the Department.

- Grade I--\$1.45 per day:
 - The majority of camp inmates shall be assigned to this grade.
- Grade II--\$1.67 per day:
 - Skilled and experienced grade workers and a selected number of in-camp inmates shall be assigned to this grade.
- Grade III--\$1.95 per day:
 - A limited number of skilled inmates who have been given special assignments shall be included at this level.
- Grade IV--\$2.56 per day:
 - This pay grade is reserved for a very limited number of highly-skilled journeyman level inmates.
- Grade V--\$3.90 per day:
 - Two positions in each outlying camp are designated for the first cook at this pay grade.
- Emergency Fire Fighter--\$1.00 hourly:
 - Reimbursed by the State Emergency Fund.

51130.27.4 Reimbursement by Cooperating Agency

The procedure for the cooperating agency to report inmate emergency time for reimbursement and payment of inmates shall be on appropriate forms as prescribed by the parent facility.

- The Department shall invoice the cooperating agency within 60 days of each event based upon the actual expenditures for inmate and camp employee pay for fire overtime.

51130.28 Emergency Crews Work Assignment

The CDF Regional Chief shall inform the Camp Division Chief of the procedure for dispatching Conservation Camp crews to all emergency activities. Dispatching of crews shall be in accordance with existing State, Region, and Ranger Unit procedures. When calls are received dispatching inmate crews from camp, or off regular work projects to emergency fire duty, the information shall be shared immediately with the Camp Commander, or the Department person in charge, to permit that person to determine custodial coverage by the Department. To the extent possible, the information passed on shall include the time of the dispatch call, destination, and any other pertinent information. The "home camp staff" shall be advised of crew location changes through appropriate dispatch channels.

51130.28.1 In Camp

When the crews are in camp, the Department shall assemble the crews and employees of both agencies and count the inmates onto the trucks or buses. At that time, the cooperating agency takes custody of the inmates. Should a Department employee accompany, custody of the inmates is a mutual responsibility.

51130.28.2 Completion of Assignment

Upon completion of the emergency assignment, all trucks and buses shall be thoroughly searched prior to leaving the emergency camp by both the Department and the cooperating agency.

Under no circumstances shall emergency camp equipment or supplies, except for properly secured lunches and other items normally carried, be allowed on the vehicle.

51130.29 Emergency Fire Camp

Fire control and suppression are a major part of the Conservation Camp Program. When a fire is in progress and of such proportions to require a supporting emergency fire camp, the cooperating agency shall have a prescribed organization that operates the camp and directs suppression activities.

51130.29.1 Organization in Fire Camp

The following organization guidelines are established to cover the Department's employee participation in the emergency fire camp organization:

- Appropriate camp Captain shall appoint a Department Agency Representative. The Department Agency Representative shall report to the Captain in all matters pertaining to the custody, safety, well-being, department, and support of the inmates regardless of the origin of the crews.
- The Department Agency Representative shall maintain contact with the cooperating agency fire camp operation through their Inmate Crew Coordinator.
- The Department Agency Representative shall coordinate all Department operations, assign Department employees to supervise various in-camp functions and other security assignments as jointly determined by the participating agencies, and shall act as the Department's PIO working with Fire Information Officers.
- Typical examples of assignment areas which may be given by the Department Agency Representative are as follows:
 - Emergency transportation.
 - Bedding area.
 - Kitchen area.
 - Motor pool area.
 - Security patrol.

51130.30 Fire Bag

Each inmate shall be issued a fire bag (supplied by the cooperating agency) including the clothing items listed below (supplied by the Department) and shall be maintained in a clean and orderly manner for use by the inmate when on extended fire suppression assignment in emergency fire camps:

- Men
 - 3 undershirts.
 - 3 shirts.
 - 2 towels.
 - 2 handkerchiefs.
 - 3 pair undershorts.
 - 3 pair jeans.
 - 4 pair socks.

- 2 belts.
- Women
 - 3 undershirts.
 - 3 brassieres (cotton, no metal stays).
 - 3 shirts.
 - 2 towels.
 - 2 handkerchiefs.
 - 3 pair underpants (cotton).
 - 3 pair jeans.
 - 4 pair socks.
 - 2 belts.

This issue of clothing is in addition to the regular clothing issue. The fire bag should also include personal health items required by the inmate for their personal hygiene needs.

51130.31 Use of Inmate Community Work Crews for Emergency Support Activities

On large forest fires requiring additional non-fire suppression support crews, the Department shall supply, if available, inmate Community Work Crews directly from its facilities. It is understood that inmate Community Work Crews available for non-fire suppression support shall be utilized by either the CDF or other forest protection agencies which have entered into an agreement with the Department. It is further understood that:

- To avoid confusion in dispatching, all requests for inmate Community Work Crews shall be directed to the Department Conservation Camp Coordinator in Sacramento.
- No request for inmate Community Work Crews shall be made by a cooperating agency without careful prior consideration being given as to whether regularly established Conservation Camps are being utilized to the fullest extent possible.
- Transportation from the facilities or other correctional establishments to the fire support work site, provided by the Department or the cooperating agency, shall be by bus or other conveyance equipped with seats for all inmates to be transported, and all safety laws and regulations shall be observed in such transportation.
- If the Department does not have transportation available, CDF shall furnish transportation to and from the facilities.

51130.31.1 Contracting Agency Responsibilities

Notwithstanding Public Resources Code Section 4155, CDF shall supply and prepare sufficient food and blankets (for sleeping purposes) and reimburse the Department for all direct and indirect costs associated with the preparation, dispatch, care, custody, and clothing of inmates in order to make them available to CDF for such assignments.

51130.31.2 Cash Reimbursement

Reimbursement for costs borne by the Department shall include:

- The payment of emergency overtime hourly rate per inmate as agreed between cooperating agency and the Department. Such payment shall include:
 - The time traveled to and from the fire.
 - From the facility.
 - All work time and off-duty time between work periods on or near the fire.
- All Department employees' payroll costs in connection with a specific fire. This includes, but is not limited to, the following:
 - Custodial coverage.
 - Transportation.
 - Employees' time for supervision and administration, delivering supplies, transporting sick or injured inmates.
 - Disciplinary problems with inmates.
 - Preparing and serving meals to inmates leaving for or returning from fires at irregular hours.
 - Employees' standby time when called in to prepare fire crews for dispatch and the standby is subsequently canceled.
- All invoices submitted to the cooperating agency by the Department for activities contemplated hereunder shall be computed in accordance with the SAM 8760. Invoices shall be submitted to the cooperating agency in the district for which services were performed on a specific individual fire basis, in a form agreed to by the cooperating agency and

the Department, and shall be submitted within 60 days of the cessation of activities contemplated hereunder.

51130.32 Emergency Use of Department's Fire Apparatus

CDC may furnish to a cooperating agency fire apparatus that is under its control and possession when the request originates with the cooperating agency for fire suppression on "State responsibility lands" and contractual fire protection.

51130.32.1 Staffing of Equipment

The Department shall furnish a qualified employee (fire suppression-trained) to drive every truck furnished and shall furnish two fire-trained inmates or two trained employees to serve as crew persons on each fire truck.

51130.32.2 Reimbursement to Department for Use of Fire Apparatus

CDF shall reimburse the Department for costs of all employees and inmates furnished in accordance with the following rates and conditions:

- Pay rate to commence at the time the apparatus leaves the facility and stop upon its return thereto.
- Payment shall include the travel time to and from the fire from the facility and all work time.
- A CDC employee assigned to the fire apparatus shall maintain timekeeping records for the employees and inmates. The employee shall have the cooperating agency fire unit official certify the accuracy of this timekeeping before leaving the fire area.
- Hourly rate for employee and inmate labor shall be paid to CDC at the termination of the emergency assignment, upon receipt of invoices certified by the Warden or by the authorized representative of the facility concerned.

51130.32.3 Gasoline

CDF shall furnish gasoline, when available, for trucks furnished and operating in the fire area.

51130.32.4 Loss or Damage

The cooperating agency shall not be held liable to CDC for any loss or damage to equipment or apparatus furnished.

51130.33 Revisions

The Deputy Director, Institutions Division, or designee shall be responsible for ensuring that the contents of this section are kept current and accurate.

ARTICLE 15 — CONTROLLED SUBSTANCES

Revised January 5, 2016

52010.1 Policy

The California Code of Regulations (CCR) includes a disciplinary process and evidence control system for controlled substance-related offenses by inmates. The CCR also prohibits employees and visitors from being under the influence of, or possessing alcohol or controlled substances while on Department owned/controlled property. Exception: staff and adult guests residing in employee housing are authorized to maintain and consume alcoholic beverages within those residences, in accordance with local institutional policies and procedures.

Each Warden and Regional Parole Administrator (RPA) shall ensure that procedures for preventing the introduction of controlled substances and alcohol into their jurisdiction are in place and enforced.

Each Warden and RPA shall ensure that any controlled substance that is confiscated in their jurisdiction is recorded, stored, tested, and disposed of in accordance with applicable laws.

52010.2 Purpose

This section establishes standard procedures for recording, storing, field testing, and the disposal of controlled substances. This section also establishes a procedure to ensure that all urine samples obtained from inmates for laboratory analysis are collected and processed in a uniform method which consistently maintains the approved chain of evidence.

52010.2.1 Goal Statement

The CDCR utilizes a variety of methods for testing inmates and parolees to detect the use of controlled substances and alcohol, and responds to positive tests with sanctions and/or interventions. The purpose of the testing, sanctions, and interventions are to reduce drug use, to hold individuals accountable for their actions, to provide opportunities for long-term recovery from addiction, and to increase institutional security and public safety. All CDCR inmates and parolees are subject to testing. All confirmed positive tests shall result in sanctions and/or intervention.

52010.3 Definitions**Controlled Substance**

Controlled Substance means any substance, drug, narcotic, opiate, hallucinogen, depressant or stimulant as defined by Health and Safety Code (H&SC) section 11007. Also included are prescribed medications containing any of the substances identified in H&SC section 11007.

Controlled Medication

Controlled Medication means any drug which is prescribed by a physician and is given to a patient in controlled dosages.

Distribution/Distributing

Distribution/Distributing means the sale or unlawful disbursing, by an inmate or parolee, of any controlled substance, or the solicitation of, or conspiring with others in arranging for, the introduction of controlled substances into any CDCR institution, camp, contract health facility, or community correctional facility for the purpose of sales or distribution.

Laboratory

Laboratory means any toxicological or criminalistic laboratory which has been recognized by the state; other certifying agency, or which is accepted by any local, county, or state prosecuting authority to provide evidence as to the presence of controlled substances in human body fluids or confirm that a substance is or contains a controlled substance.

52010.4 Description of offenses**Possession, Distribution of Controlled Substances or Controlled Medications**

Inmates are prohibited from possessing, injecting, ingesting, or otherwise introducing into their body any controlled substance, controlled medication, or intoxicant while incarcerated or under the supervision of CDCR without specific authorization to do so from a licensed CDCR or contract physician or psychiatrist. Inmates are prohibited from distributing, exchanging, soliciting, or arranging for the introduction of controlled substances or controlled medications into any CDCR institution/facility. Visitors are prohibited from possessing or being under the influence of any intoxicant or controlled substance while on or within CDCR owned or controlled property.

Under the Influence of Controlled Substance or Intoxicants

Inmates are prohibited from being under the influence of alcohol, controlled substances, or other intoxicant not defined as a controlled substance, in any CDCR institution/facility.

Refusing to Provide a Urine Specimen

Inmates may not refuse to provide an adequate urine sample for the purpose of testing for the presence of controlled substance(s) when lawfully ordered to do so. If an inmate is unable to provide a urine sample, the inmate shall be offered eight ounces of water to assist in providing a urine sample. The inmate shall also be allowed up to three hours, under staff observation, to provide a urine sample. Inmates who refuse or are unable to provide a urine sample shall be subject to disciplinary action in accordance with CCR 3323(h)(5). If an inmate is unable to provide 20 cc of urine, within this time period, this shall be presumed a refusal. An inmate may rebut this presumption during the disciplinary process.

52010.5 Testing of Controlled Substances

The department shall prescribe the products, equipment, and methods for testing suspected controlled substances or for the use of alcohol. "Field" or on-site testing shall be conducted by trained personnel only.

52010.6 Basis for Field Test

Field tests may be performed on any suspected substance found on institution property or in the possession or under the control of any inmate, or in the possession or under the control of persons other than inmates who come on

institution property. Field tests of urine samples may be performed as a screening process prior to laboratory testing.

A sobriety test shall be conducted when there is reasonable suspicion the inmate may be under the influence of a controlled substance or alcohol.

52010.7 Field Testing Methods and Systems

All narcotic field test kits/systems shall be approved by the California Department of Corrections and Rehabilitation.

Approved departmental testing methods are as follows:

Field or On-Site Testing - The testing of confiscated suspected controlled substances.

Drug or Urine Testing - The securing of a urine sample from inmates for the purpose of testing for the presence of controlled substances or for the use of alcohol that the inmate has ingested, inhaled or injected into their body.

- Sobriety Testing - The testing of physical indicators such as slurred speech, dilated pupils, or impaired mobility which would indicate that the inmate is under the influence of a controlled substance or alcohol.

52010.8 Substances to be Recorded

Records shall be maintained which document seizures of all controlled substances listed in H&SC 11054, 11055, 11056, 11057, or 11058, and substances confirmed to be controlled medication.

52010.9 Recording of Confiscated Controlled Substances

The seizure of any controlled substance or medication shall be documented in an evidence log book to be maintained by each institution/facility. The documentation shall include the CDCR number and name of each inmate from whom controlled substances are confiscated; the name, title, address, and identification number of any other person(s) from whom controlled substances are confiscated; the type of substance(s) that were confiscated; the amount (by volume or weight) of each substance that was confiscated; the place where the substance(s) is to be stored; the disposition of each substance, and whether or not the substance is being held as evidence for prosecution purposes.

52010.10 Controlled Medication

Inmates shall not possess controlled medication in quantities exceeding the dosage specifically authorized by the institution's/facility's health care staff, nor may an inmate possess controlled medication prescribed to another inmate.

Identification of Controlled Medication

The identification of intact controlled medication may be confirmed by a licensed pharmacist and that confirmation may be used as evidence in a disciplinary hearing.

52010.11 Drug and Alcohol Paraphernalia

Inmates shall not use or possess any device, contrivance, instrument, or paraphernalia intended to be used for unlawfully injecting or consuming into the human body a controlled substance as identified in H&SC section 11014 or for the fermentation or distillation of alcohol.

52010.12 Causes for Urinalysis Testing

The securing of a urine sample from an inmate, for the purpose of testing for the presence of controlled substances or for the use of alcohol may be done for the following reasons: for the following reasons:

- Random Selection – When mandatory random testing is known to the inmate to be a condition for the inmate's participation in a specific program, assignment, or activity.
- Suspect – When there is reasonable suspicion to believe the inmate has possessed, distributed, used, or is under the influence of a controlled substance or alcohol.
- Mandatory Random Drug Testing (MRDT) – As part of an authorized disposition of a disciplinary hearing pursuant to CCR 3315(f)(4)(D).
- Mandatory Random Urinalysis Program – The inmate is selected by the department's mandatory standardized random drug testing selection process, in where, a small percentage of inmates are randomly selected at predetermined regular intervals (e.g., daily, weekly) from a data file produced from the department's Strategic Offender Management System.

52010.13 Random Selection Method

Random testing shall be conducted a minimum of four days per week. Random selection shall be made by a computer program which assures the random nature of the selection. Inmates shall be tested each time they are selected, regardless of the recency of the inmates' last test. Inmates shall not be subject to additional disciplinary action for a positive test if that positive test is cumulative evidence of a previously charged disciplinary action.

52010.14 Random Selection Frequencies

To determine the inmates to be tested on each day of testing, the CDCR numbers of the population subject to testing are entered into the computer program, and the program is adjusted to produce a selection equal to the percentage of the population to be tested on that day, according to the reason for the random selection, as follows:

Evidence Based Substance Abuse Treatment Program Population

Inmates in institutional programs providing substance abuse treatment are subject to random testing at a frequency of not less than ten percent of the institution's substance abuse program population per week.

Mandatory Random Drug Testing Population

Inmates subject to MRDT as described in DOM 52010.12 are subject to random testing according to the following frequencies:

First Offense - A frequency of 25 percent of the institution's MRDT population per week. Any inmate not randomly selected during the first three weeks of each month shall be tested during the fourth week.

Second Offense - A frequency of 50 percent of the institution's MRDT population per week. Any inmate not randomly selected during any week shall be tested the following week.

Third and Subsequent Offenses - A frequency of 100 percent of the institution's MRDT population per week. All inmates shall be tested no later than the last testing day of each week.

52010.15 Mandatory Random Drug Testing

Inmates found guilty of a rule violation related to the use, possession, sale, distribution, or introduction of controlled substances, drugs, or drug paraphernalia; or refusal to submit to a test for controlled substances or drugs shall be placed on the institution's MRDT list.

The institution Drug Testing Coordinator (DTC) shall establish and maintain the MRDT list and schedule.

Inmates placed on MRDT shall be subject to MRDT in accordance with CCR 3315(f)(4)(D).

The hearing official shall document the testing requirements on a CDCR Form 1879, Notice of Mandatory Random Drug Testing Requirements. The original document shall be scanned into the inmate's Electronic Records Management Systems file and a copy maintained by the DTC.

If the inmate transfers prior to completion of the MRDT period, the receiving institution shall impose the remaining MRDT period upon classification review.

52010.16 Drug Testing Coordinator

Each institution shall designate a DTC at the rank of sergeant or above. The DTC is responsible for:

- Monitoring the procedural operation of this section.
- Ensuring inmates found guilty in a disciplinary hearing of a drug-related offense are placed on the institutional MRDT list.
- Ensuring inmates placed on the MRDT list are tested in accordance with CCR 3315(f)(4)(D).
- Approving and reviewing the accuracy of the MRDT list prior to testing.
- Reviewing all drug testing logs for accuracy and completeness.
- Ensuring all staff involved in the drug testing process are properly trained.
- Ensuring that the institution maintains a sufficient stock of sample bottles, lids, and labels.

52010.17 Staff Requirements/Urine Sample Collection

Only staff properly trained and certified in the collection and processing of urinalysis samples shall be involved with the urine testing process.

- Staff observing the collection of the urine sample shall be of the same gender as the inmate being tested.

52010.18 Urine Sample Collection Procedures

The securing of a urine sample from an inmate for the purpose of testing for the presence of controlled substances or for the use of alcohol shall be conducted in accordance with CCR 3290(c).

When collecting the urine sample, staff shall ensure that reasonable security is maintained, consideration is given to the privacy of the inmate, and the test is conducted in a sanitary manner.

All urine collection shall be conducted in an area designated by the Institution Head.

Pre-Collection Duties

The following functions shall be completed prior to the collection of the urine sample(s):

- Prior to the test, staff shall conduct a thorough search of the area used to obtain the urine sample before the inmate enters the area. All potential contaminants shall be removed prior to the collection of the urine sample.
- Establish positive identification of the inmate by picture identification card.
- Ensure the inmate providing the sample removes any unnecessary garments or personal property and leaves these items outside the collection area.
- The staff member collecting the urine sample shall inform the inmate of the reason(s) for requesting the urine sample. The inmate shall also be informed a refusal to provide a urine sample shall result in disciplinary action.
- An inmate claiming the urine test may be affected by a prescription medication shall be offered a CDCR 7385, Authorization for Release of Protected Health Information form, in order for staff to obtain a copy of his/her Medication Administration Record (MAR) for later review under section 52010.23. The inmate will still be required to provide a urine sample.

Collection of Urine Sample

Staff shall adhere to the following process during the collection of urine sample:

- The sample collection shall be conducted in a sanitary setting, using universal precautions.
- The staff member shall wear disposable gloves during the urine sample collection process.
- The inmate shall be provided disposable gloves during the urine collection process and have access to clean running water after the urine sample collection is complete.
- Utilize only sample bottles, lids, and labels provided by the current contract laboratory.
- Clearly observe the flow of urine into the bottle.
- Ensure the inmate(s) provide at least 20 cc of urine (two-thirds of sample bottle) in order to adequately accomplish the required laboratory test.
- After filling the sample bottle, the inmate will be instructed to secure the bottle, rinse the outside of the bottle with cold tap water, and then hand the secured sample bottle to the collecting staff member.
- The staff member shall place the completed label on the sample bottle.
- Place a security seal on the bottle.
- The urine sample shall be processed in accordance with institutional procedures, which maintain the chain of custody of the sample. Staff shall adhere with the contract laboratory procedures when collecting, packaging, and storing urine samples.
- If the inmate is unable to provide a urine sample, the inmate shall be offered eight ounces of water to assist in providing a urine sample. The inmate shall also be allowed up to three hours, under staff observation, to provide a urine sample.
- Inmates who refuse or are unable to provide a urine sample shall be subject to disciplinary action in accordance with CCR 3323(h)(5). If an inmate is unable to provide 20 cc of urine, within this time period, this shall be presumed a refusal. An inmate may rebut this presumption during the disciplinary process.
- Reasonable accommodation shall be afforded to inmates with disabilities to facilitate their full participation in drug and/or alcohol testing as provided in these rules.
- Gloves used during the urine collection process shall be disposed of according to institutional procedures

52010.19 Urine Sample Test Records

Records of all urinalysis results shall be maintained in the institution's urinalysis logbook. The MRDT list shall be considered confidential and released to staff on an "as needed" basis only. Test results shall be logged, maintained, and processed by designated staff.

52010.20 Refusal to Produce a Urine Sample

If the inmate is unable to provide a urine sample, the inmate shall be offered eight ounces of water to assist in providing a urine sample. The inmate shall

also be allowed up to three hours, under staff observation, to provide a urine sample. Inmates who refuse or are unable to provide a urine sample shall be subject to disciplinary action in accordance with CCR 3323(h)(5). If an inmate is unable to provide 20 cc of urine, within this time period, this shall be presumed a refusal. An inmate may rebut this presumption during the disciplinary process.

52010.21 Types of Urinalysis Requests

Staff shall request a Basic Drug Panel analysis of the urine sample unless the inmate's behavior provides reasonable suspicion of other drug use. The Basic Drug Panel will detect the presence of the following substances:

Basic Drug Panel:

- Alcohol.
- Barbiturates (short and long acting).
- Amphetamines.
- Cannabinoids
- Cocaine.
- Codeine.
- Methamphetamines.
- Opiates Morphine (Heroin).
- Phencyclidine (PCP).

Additional urinalysis may be specifically requested to detect the use of the following substances:

- Synthetic Tetrahydrocannabinol (Spice).

The Basic Drug Panel analysis will be conducted on each sample submitted to the laboratory.

52010.22 Urine Sample Storage and Transfer

To ensure that the integrity of the sample is not compromised, the chain of custody must be maintained during processing and storage of the samples.

Each institution/facility must maintain a secure box for the storage of test samples. Only designated staff shall have access to the urinalysis lock box keys.

Upon completion of the test, the staff member conducting the test shall secure the sample in the urinalysis lock box.

A urinalysis logbook shall be maintained at each institution, which shall include the inmate's name, CDCR number, date of test and chain of custody of the sample.

Only designated staff shall remove the samples from the urinalysis lock box, and forward the samples to the laboratory for analysis. The date the sample was removed, the name of the staff member who removed the sample, and the date the sample was sent to the laboratory shall be entered into the institution's urinalysis logbook.

Staff must ensure the samples are processed in accordance with the laboratory contract.

52010.23 Processing and Documentation of Tests Results

The date that any positive test results are received by the institution/facility shall represent the date of discovery for disciplinary action.

Upon receipt of the laboratory test results, the results shall be logged in the institution's urinalysis logbook.

The DTC shall notify and forward a copy of the laboratory results to the program office where the inmate is currently housed.

The officer who collected the urine sample shall document the results of the positive test on a CDC Form 115 charging the inmate with a violation of CCR 3016, Possession of a Controlled Substance, Drug Paraphernalia and Distribution.

Medical Review Process

Inmates who test positive during the Mandatory Random Urinalysis Program and contend the positive urinalysis test result may have been caused by their prescribed medication(s), may submit a CDCR 7385, Authorization for Release of Protected Health Information, form to pharmacy staff in order to obtain a copy of his/her MAR at any time. Pharmacy staff shall provide a copy of the MAR to the Drug Testing Coordinator. The Drug Testing Coordinator shall contact the contracted laboratory or consult the contracted laboratory's written guidance to verify whether prescription medications were the cause for the positive test result(s). If it is determined by the contracted laboratory that the positive urinalysis result(s) are consistent with the inmate's prescribed medication(s) no disciplinary action shall be taken and the result shall not be used for any purpose.

If it is determined by the contracted laboratory that the positive urinalysis result(s) are inconsistent with the inmate's prescribed medication(s), the inmate shall be subject to the appropriate disciplinary action.

52010.24 Destruction of Controlled Substances

The evidence custodian shall coordinate with a representative from the local police, sheriff's department, or State DOJ to participate in a scheduled destruction of controlled substances.

The ranking staff person of the facility investigative unit shall verify the controlled substances to be destroyed and sign the CDCR Form 1754, Controlled Substances for Destruction, prior to delivery to the destruction site.

All controlled substances scheduled for destruction shall be submitted in sealed containers. Each box or bag shall contain not more than 15 separate pieces of evidence to facilitate random checks by the local enforcement agency coordinator assigned to the destruction site.

One investigative unit supervisor and the evidence custodian shall transport the substances scheduled for destruction to the actual destruction site and witness the destruction.

The officers shall sign the evidence log indicating the date, place and method of destruction.

The evidence custodian shall retain a copy of the court order, as discussed in section 52010.25, and the CDCR Form 1754.

Providing additional security required when transporting large quantities of controlled substances for destruction is the responsibility of the ranking investigating staff person submitting the controlled substances for destruction.

52010.25 Obtaining a Court Order for Destruction

Upon completion of the CDC Form 1754, the following documents shall be submitted to the court of jurisdiction to obtain a court order for destruction:

- A declaration that includes the following statements:
 - "I am a peace officer at (facility or parole unit)."
 - The cases are closed.
 - It is necessary that the items be destroyed.
- The actual completed court order to be signed by the judge.

52010.26 Controlled Substance Destruction Schedule

Destruction of controlled substances shall be on a semiannual basis.

During the months of January and July, the designated staff member/evidence custodian shall prepare a CDCR Form 1754.

Initiation of the procedure should be made well in advance of anticipated destruction date due to the lengthy process necessary to secure the appropriate court order.

All controlled substances seized during the previous six-month period that are not being held as evidence for a criminal trial or a disciplinary hearing shall be listed on the CDCR Form 1754.

52010.27 Revisions

The Director, DAI, or designee shall be responsible for ensuring that the contents of this Section are kept current and accurate.

52010.28 References

CCR (15) (3) §§ 300, 3016, 3290, 3315, 3323, and 3410.

H&SC §§ 11007, 11014, 11054, 11055, 11056, 11057, 11058, 11473, 11473.5, and 11474.

ARTICLE 16—INMATE COUNT AND MOVEMENT

Revised August 12, 2013

52020.1 Policy

The CCR 3274 permits the institution head to develop a system to physically count inmates under his/her jurisdiction and to accurately account for those inmates at all times.

52020.2 Purpose

The purpose of a count is to facilitate inmate control, accountability, and to expedite inmate movement throughout the institution/facility in accordance with the established count schedule as set forth in DOM 52020.4.1.

52020.3 Responsibility

The Correctional Captain/Facility Captain is responsible for ensuring that a detailed institution/facility count is accurately conducted at the designated times.

The Correctional Captain/Facility Captain shall establish a system that regulates staff/inmate movement throughout the institution/facility.

All employees shall ensure that inmates are not involved in gathering count information nor allowed access to count records.

52020.4 Count Criteria and Number of Counts

A physical count of all inmates shall be performed a minimum of four times each calendar day, unless otherwise authorized in writing by the Director. All inmate movement/activity shall cease when count has been initiated by Central Control. Exception: Emergency medical transports to outside facilities shall not be delayed for the purpose of the count. The staff member escorting the inmate shall confirm with control the inmate’s name, CDC number, and housing.

The Strategic Offender Management System (SOMS) automated count process shall be used to:

- Submit tentative out count rosters to Central Control.
- Submit actual positive count totals to Central Control.
- Submit actual negative count totals to Central Control.
- Compile, record, reconcile, clear, and document all Institution counts.
- Print Shift Count Packages for the Central Control Sergeant’s and the Watch Commander’s signatures.

Individual count totals conveyed to Central Control shall correspond with Central Control’s Master Count Record.

52020.4.1 Frequency of Counts

The frequency of institution/facility counts shall be determined by the Standard Count Schedule. All institutions/facilities shall make every effort to adhere to the Standard Count Schedule. This is based on the security needs of the individual institutions/facilities and custody designations of assigned inmates. Staff shall ensure that inmate activities are not scheduled to conflict with institution/facility counts.

Standard Count Schedule

<u>Mandated Times</u>	<u>Type of Count</u>
0030/0100	Positive Count.
0230/0300	Negative Count.
0430/0500	Positive Count.
1100/1200*	Close A Custody Count, Minimum Support Facility and Community Work Crew Count.
1600/1700	Positive Count.
2100/2300	Positive Count.

*This count does not include all inmates housed at the institution/facility; therefore, it is not inclusive of the four required counts.

52020.4.2 Method of Count

The count shall be performed by the physical observation of each inmate at his/her assigned housing unit or out counting of inmates at his/her specified work/activity location. Supervisors shall track inmates absent from their assignments. After the count is completed, it shall be entered in the Watch Commander’s Daily Activity Log.

52020.4.3 Camps’ Count Policy

There shall be at least four formal camp counts of all inmates in each 24-hour period.

Inmates shall be counted upon mounting and dismounting vehicles, and going to and returning from any place outside the camp or facility. Agency crew foremen shall make counts of inmates in their custody at frequent intervals, and shall count the inmates before leaving camp and upon returning to camp. Counts are required at least once during the morning, lunch time, between lunch, and the end of the work day, departure from the work area, and at other times recommended by the Camp Commander.

Emergency counts may be necessary at any time to determine if there has been an escape or to identify an escapee(s).

52020.5 Positive Count

A positive count is the actual number of inmates that each respective staff member has counted and reported to Central Control. (*Note:* A positive/physical count means to count a living, breathing person and physically see that person.)

The positive count shall be submitted to Central Control using the SOMS automated count process and is automatically populated with the date, time, and the name of the staff member who is logged into the SOMS application.

The count total and name of the person who actually conducted the positive count must be entered at the time of submission.

As directed by Central Control for the purpose of verifying unit positive counts, a vacant bed count may be requested.

If Central Control receives an incorrect positive count, a vacant bed count may be requested from the counting employee.

Upon direction from Central Control to perform a vacant bed count, the officer performing the count shall start with the lowest numbered cell/bed in numerical order, writing down the numbers of each unoccupied bed. Upon completion, the officer shall utilize this list and provide the vacant bed count to Central Control via telephone. Central Control shall substantiate this information, ensure all inaccuracies are corrected, and direct the officer to submit a revised Positive Count into SOMS utilizing the IPTS085D – Re-Enter for Housing Area count screen.

52020.5.1 Standing Count

During the 1600/1700 count, inmates housed in cells shall stand upright at their cell door and shall remain standing until counted by the officer conducting the count.

- Inmates housed in dormitories equipped with double tier bunks shall remain seated on their assigned bunk until the count is completed by the officer.
- In dormitories equipped with triple tier bed/bunks, the inmate assigned to the top tier bunk shall be seated on the top bunk, and the inmates assigned to the bottom and middle tier bunks shall be seated on the fold out stools until the count is completed by the officer.

Disabled inmates shall be reasonably accommodated, dependent on their disability.

52020.5.2 Negative Count

The Negative Count is the actual accounting of all vacant (unoccupied) beds at a given time whether these beds are assigned or not.

Due to double/triple bunking of inmates, it is necessary to ensure that inmates do not interchange their assigned beds. Each institution/facility shall perform a Negative Count at least once each day.

A Negative Count is the recording of all unoccupied beds in a housing unit. These bed numbers shall be submitted via the SOMS automated process utilizing the IPTS015C – Negative Count Worksheet.

52020.5.3 Out Count

To maintain continuity of operations, some inmates may not always be counted in their assigned housing units. These inmates shall be "out counted" by their supervisors and shall remain under direct supervision until the count is cleared.

The SOMS automated count process shall be used to submit tentative out count rosters to Central Control.

When SOMS is not available or the institution’s/facility’s electrical power fails staff shall manually prepare tentative out count rosters and submit the rosters to Central Control.

The tentative out count roster that is submitted to Central Control shall include cell/bed number, inmate’s name and CDC number, and the area where the inmate(s) will be out counted. Staff out counting inmates shall submit their tentative out count roster in SOMS using the automated out count process.

52020.5.4 Close Custody Count

SOMS identifies all inmates designated as Close A custody, and compiles them into the Close Custody Count. The Close Custody Count shall be submitted to Central Control using the SOMS automated count process. Close custody counts shall be conducted utilizing a positive picture identification card to count all inmates classified as Close A custody. When inmates present themselves, staff shall ensure that inmates resemble their picture identification card. In accordance with CCR 3017, all inmates classified as Close A Custody are responsible for reporting to the established location(s) designated by each individual institution/facility.

- Close A Custody inmates shall be counted while they are on work assignments, on recreation time, in housing units, or involved in any other activity. Close A Custody counts shall be scheduled in conformity with DOM 52020.4.1.
- The Watch Commander shall be notified and a search shall be initiated when the Close A Custody Count is not cleared 15 minutes after the count has been announced. If the unaccounted for Close A Custody inmate(s) is not located within 15 minutes of initiation of the search, an emergency recall of all inmates may be instituted by the Watch Commander.

52020.5.5 Informal Count

An informal count is a physical count and positive identification of inmates who are present at their program/work assignments. Informal counts shall be conducted by all employees supervising inmates.

These informal counts shall be completed on an hourly basis. Any discrepancies shall be reported immediately. Informal counts shall be conducted to ensure inmates are present in their assigned areas, such as housing units, work centers, minimum support facilities, and community work crews.

52020.5.6 Emergency Count

An emergency count shall be conducted to establish whether an escape has occurred, or in the event of an obvious escape (inmate seen climbing security fence, dummy in cell, etc.), to determine the exact identity of the inmate(s) involved. During an emergency count, all inmates shall be returned to their assigned cells/beds.

During business hours, emergency counts shall be approved at a level not less than the Correctional Captain, or in the absence of the Correctional Captain, the Watch Commander. During non business hours, emergency counts shall be approved by the Watch Commander or highest ranking officer on duty.

52020.5.7 Picture Count

When a positive or negative count or recount does not clear, and the identity of the out-of-place or missing inmate(s) cannot be determined, a picture identification of all inmates shall be performed. Since an accurate comparison of each inmate against their inmate identification picture card is a prerequisite for the picture count, an up-to-date picture of all inmates shall be maintained on an inmate picture file. Inmate picture files shall be maintained in Central Control.

Central Control is responsible for ensuring continued maintenance and absolute accuracy of the inmate picture files that are maintained in Central Control. The inmate picture files shall be maintained in a secured location within Central Control as described in Section 52020.6.4.

- During a picture count, a comparison of each inmate against his/her CDC identification card shall be conducted. If an inmate(s) cannot present his/her CDC identification card, the IPTR176 – Inmate by Housing Area report with “Include Inmate Photo” selected that is generated by SOMS can be used for a positive visual identification. In the event that a photo is not available in SOMS, the photo on the Central Control's inmate picture file shall be taken to the housing area and used for a positive visual identification. During a picture count, all inmates' identities and cell/bed numbers shall be compared to the IPTR176 – Inmate by Housing Area report, with “Include Inmate Photo” selected, that is generated by SOMS.

52020.5.8 Limited Visibility Count

When visibility is severely restricted (due to inclement weather conditions) a recall of all inmates shall be initiated and a limited visibility count shall be completed.

During limited visibility count, inmate workers who are on the critical workers list may be out counted. The critical workers list shall be developed by the Facility Captains and reviewed and approved by a designated Associate Warden.

Operations

The Watch Commander shall initiate limited visibility operations whenever severely reduced visibility conditions exist, which afford inmates an increased opportunity to escape. Limited visibility operations shall be initiated when the outer perimeter tower posts are unable to see one another clearly and distinctly and shall consist of:

- Initiating and clearing a limited visibility count.
- All inmate movement shall be cleared by the Watch Commander or higher and shall be under direct supervision.
- Continuing indoor programs within the facility.
- Terminating yard exercise and outdoor programs within the security perimeter.
- Posting foot patrols inside the security perimeter with designated safety equipment.
- Posting armed foot/vehicle patrols outside the security perimeter (not authorized at institutions with a lethal electrified fence unless the lethal electrified fence becomes nonoperational).
- On duty staff shall be utilized for posting inside and outside security perimeter patrols.

Institutions with a lethal electrified fence may conduct indoor programs (e.g., academic and vocational programs, industries and maintenance) within the security perimeter.

Institutions without a lethal electrified fence shall conduct programs (e.g., academic and vocational programs, industries and maintenance) in accordance with their limited visibility plans and security requirements.

In the event the lethal electrified fence becomes nonoperational during times of limited visibility, institutions are advised to revert to their operational procedures, which were utilized prior to the installation and/or activation of the lethal electrified fence.

Removal of Limited Visibility Operations

The Watch Commander shall promptly resume normal institution/facility operations when outer perimeter posts can see one another clearly and distinctly, or when a designated landmark can be seen clearly and distinctly by a designated post.

52020.6 Count Notification

The institution/facility count cannot be cleared until Central Control reconciles the Master Count Sheet.

Inmate movement may resume when the Central Control announces, via the institution/facility public address system or other available means, the institution/facility count is clear.

52020.6.1 Paper Count Slips in place of the SOMS Automated Process

The SOMS automated count process produces electronic count slips that include:

- Date and time of the count.
- Name of the person who is logged into SOMS and submitting the count.
- Count area.
- The reporting employee entered count total.
- The reporting employee entered name of the staff member who conducted the count

This automated process shall be used to submit actual positive and negative count totals to Central Control. These electronic count slips are permanently electronically attached to the completed Count Package.

When SOMS is unavailable or the institution's/facilities electrical power fails, Central Control staff shall conduct count by using a manual process. Facility staff shall prepare paper count slips, and or negative count slips, and submit slips to Central Control.

The count slips used for institution/facility positive counts shall be designed by each institution/facility Central Control to match the standardized SOMS count slip for the individual institution/facility design and be approved by the Correctional Captain. Count slips shall be prepared in blue or black ink and shall include:

- Current date.
- Time count commenced.
- Actual number of inmates counted.
- Housing unit.
- The printed name and signature of the employee who conducted each count.

The negative count slip is a recording of the total number of unoccupied cells/beds counted. In a unit/dorm utilizing double bunks, the following shall be denoted on the count slip, Upper (U) and Lower (L) or Right (R) and Left (L). When housing units utilize triple bunks, the following shall be denoted, Upper (U), Middle (M), and Lower (L). The negative count slip shall be submitted to Central Control and include the following:

- Date and time.
- Negative bed numbers and bed totals.
- Printed name and signature of the staff member conducting the negative count and the responsible Sergeant.

The positive count slips, out count slips, negative count slips, if applicable and adding machine tape shall be secured to the Master Count Sheet as one document and archived for one year unless they reflect evidence of an escape.

If a count slip reflects any kind of alterations, the Central Control shall request the submission of a new count slip.

52020.6.2 Central Control

Central Control shall monitor, reconcile and clear all official institution counts using the SOMS automated count process. They shall maintain a current, accurate record of all inmates to reflect all inmate movement. Once Central Control opens a Shift Count all area counts that are submitted to

Central Control shall match the tentative count compiled by SOMS and reflected on the Shift Count.

When SOMS is not available or the institution's/facility's electrical power fails, Central Control shall manually prepare a Master Count Sheet.

- On all watches, Central Control shall log times that official counts are received on a manually prepared Master Count Sheet. They shall maintain a current, accurate record of all inmates to reflect all inmate movement. Once a tentative count (out counts included) is set up, all areas shall match with the Central Control's Master Count.

Central Control Security

Central Control shall be staffed on a 24-hour basis. To prevent unauthorized access, the outer sallyport door shall be mechanically operated from inside Central Control. Once the identity of the person(s) being admitted has been determined and the outer sallyport door is secured, the inner door can be opened manually to allow authorized staff access into Central Control.

Additional Duties/Responsibilities

Central Control duties/responsibilities may also include: monitoring fire and security personal alarm systems; operating electrically controlled doors/gates; monitoring various perimeter mechanical or electrical alarm systems; operating telephone equipment; and storage/issuance of institution/facility keys, radio communication systems, batons, riot helmets, transparent polycap riot shields, chemical agents, weapons, and ammunition.

Central Control, on all watches, shall ensure that all information entered into SOMS is accurate by printing a Daily Movement Recap (DMR) report (produced in SOMS) the conclusion of their watch.

Central Control/Subarmory

Emergency weapons, ammunition, and chemical agents assigned to Central Control for storage/issuance purposes must be stored in a secured location in accordance with DOM 55050. If armed tower coverage is not provided, the Central Control staff shall be armed. All weaponry shall be inventoried in accordance with DOM 55050.

Telephone Off Hook Alarm System

The main telephone Off Hook Alarm System (OHAS) is normally located in Central Control. However, institutions/facilities may designate another area to install OHAS. When OHAS is activated, responsible staff shall notify the custody complex and the appropriate supervisory staff. Responsible staff shall maintain an OHAS Log to record all enunciated alarms (when this system is not automated), indicating the following information:

- Date and time of the alarm.
- Location of the alarm.

Each Correctional Captain is responsible for ensuring that a plan exists for appropriate staff response to the area wherever OHAS alarms originate. The plan shall include first and secondary response.

Note: Prior to canceling an OHAS alarm response, a staff member shall account for the staff/inmates assigned to the affected area.

Telephone Security Check Calls

For the purpose of verifying employee alertness and accountability, each Correctional Captain is responsible for designating areas that shall be required to make telephone security check calls each half-hour, commencing at 1930 hours and terminating at 0500 hours. Security Housing Units and Administrative Segregation Units may commence check calls earlier than 1930 hours depending on program needs.

Each institution/facility shall establish a central location that shall receive security check calls and maintain a log to record employees/areas that are designated to make security check calls. The watch office or Watch Commander shall be notified when an employee/area fails to make a security check call.

52020.6.3 Running Count

Central Control, on each watch, shall maintain a running count. The running count shall be manually updated during the shift any time there is a movement in a reportable count area that affects the institution/facility count. The running count shall be verified by cross-checking with the inmate picture file, and the DMR report.

The running count shall continue to be manually maintained, and shall also be used as a manual method of tracking the affect of inmate movement on the institution count as the movement occurs, during the period when SOMS is unavailable or the institution's/facility's electrical power fails.

52020.6.4 Inmate Picture File

Central Control shall maintain an inmate picture file that contains a picture of each inmate and is systematically sorted by the inmate's assigned housing. Central Control shall maintain absolute accuracy of the inmate picture file.

Note: When an inmate requires emergency transport out of the institution/facility (i.e., ambulance) and the inmate's CDC identification card cannot be located, the inmate's picture file maintained in Central Control, or the picture in SOMS may be used to positively identify the inmate and process the inmate out of the institution. Upon completion of the emergency transfer or when the inmate is returned to the institution/facility, Central Control staff shall ensure the inmate's picture file is properly returned/replaced by Receiving and Release.

The picture file shall continue to be manually maintained, and shall also be used as a manual method of tracking the affect of inmate movement on the Facility/Housing Unit counts as the movement occurs, during the period when SOMS is unavailable or the institution's/facility's electrical power fails.

52020.6.5 Inmate Housing Assignment Changes

The SOMS automated Bed Request Batch assignment process shall be used for:

- Submittal of bed assignment requests by the Housing Unit Correctional Officer or higher classification.
- Housing Unit Correctional Lieutenant/Sergeant or higher classification review and recommendation or denial of the bed assignment requests.
- Central Control Sergeant review and approval or denial of the recommended bed assignment requests.
- Monitoring of the approved or denied bed requests and the entering of the completed bed moves by the Housing Unit Correctional Officer or higher classification.

A permanent record of Bed Request Batches is maintained in SOMS for archival purposes.

When SOMS is unavailable or the institution's/facility's electrical power fails all Inmate housing assignment changes shall be accomplished by staff completing a GA Form 154, Inmate Transfer Form, upon approval of Central Control.

Without exception, Central Control shall not accept a GA Form 154 or SOMS Bed Request Batch that has not been signed/approved by the Facility Lieutenant/Sergeant or a higher classification.

The facility Correctional Lieutenant/Sergeant shall check for accuracy of the information prior to signing the manual GA Form 154 or approving the automated SOMS Bed Request Batch.

In the event that a manual GA Form 154 has to be completed, Central Control shall retain the original GA Form 154. The remaining three copies are distributed as follows and retained until entries appear on DMR:

- The duplicate copy shall be retained by the officer assigned to the housing unit from which the inmate(s) was housed.
- The triplicate copy and inmate's picture(s), if applicable, shall be retained by the housing officer assigned to the housing unit to where the inmate(s) will be housed.
- The quadruplicate copy shall be retained by the appropriate facility/program office.

52020.6.6 Inmate Daily Movement Sheet

The DMS is a combination of existing DDPS reports on work assignments, or custody classification changes, and the SOMS generated IPTR151 – DMR report that includes all arrivals, departures, temporary releases, out-to-courts, and family visits during the previous 24-hour period.

To allow for workload impact on assignment operations, DMS shall have an "effective date" listed to reflect the actual date the action is authorized.

For example:

- The inmate DMS is issued on 12-1-97, however, some of the actions are effective on 11-28-97, or will be effective on 12-3-97.
- The date shown in the "effective date" column is the official date of that specific action.
- The inmate DMS shall be completed prior to the conclusion of the first watch. The First Watch Commander shall check the accuracy of information on the DMS, authorize it to be published with their signature, and have sufficient copies distributed to meet the needs and requirements of each institution/facility.

52020.6.7 Housing Roster Report

The SOMS report menu can be used to generate a Housing Roster Report in various formats (i.e., IPTR122 - Housing Area Roster, IPTR176 - Inmates by Housing Area).

52020.7 General Movement

The following subsections provide for the assignment of responsibility to staff, and for the orderly release and return of inmates to/from their housing units or activities. This shall include the use of schedules and master pass lists. If applicable, these procedures shall provide for inmate movement outside normal traffic patterns, during daylight and night-time hours, limited visibility, or lockdown conditions.

All scheduled work/training program releases shall be announced to the general population. Inmate movement to and from assignments shall be supervised along established routes.

Personnel Movement Daylight

Normal staff movement during daylight hours, unless visibility is severely restricted do to inclement weather, does not need to be communicated post to post. Staff movement to any area, such as rooftops, tunnels, Security Housing Unit perimeter, and security fences shall be cleared by the Watch Commander.

Personnel Movement Night

Normal staff movement during first watch hours shall be communicated from post to post via the telephone, intercom, or two-way radio system in all areas where movement occurs. The methods of communication shall be designated by each individual institution/facility.

For the purposes of institutional safety and security, as well as staff accountability, off duty staff, vendors, and individuals not recognized attempting to enter the secured perimeter shall not be allowed to proceed until approval is obtained from the Watch Commander.

52020.8 Inmate Movement Policy

All uniformed and non-uniformed staff shall account for and ensure that all inmate releases, movement to activities, and return of inmates to the housing units, are approved and regulated by central control under the direction of the Watch Commander.

52020.8.1 Work/Training Call

All scheduled work/training releases established by the institution/facility shall be announced to the general population. Each institution/facility shall establish specific/designated controlled routes for all inmate movement during daylight and darkness hours.

Absent Inmates

The supervising employee receiving inmates into his/her area shall attempt to locate any inmates absent from work, academic, or vocational assignments.

If the inmate is not located within one-half hour, the supervising employee shall report the absence to the Facility/Program Sergeant and Central Control.

Prior to reporting an inmate absent from the work/training assignment, staff shall ensure that the inmate is not listed on the DMR as reassigned, and/or listed on the Master Pass list to report to a scheduled appointment.

Inmate Accountability

Work/training supervisors shall notify the custodial post that governs inmate gate passes, the exact number of inmates received within their areas of responsibility, and the names of the inmates who failed to report.

Work/training supervisors and designated custodial posts that govern inmate gate passes shall attempt to locate any inmate reported absent from their assignments. If the inmate(s) is not located within 30 minutes, the inmate's absence shall be reported to Central Control and the Watch Commander shall be notified.

52020.8.2 Gate Passes

The Inmate Assignment Lieutenant is authorized to issue three different types of gate passes. The gate pass shall identify those inmates, authorized by the classification committees, to work:

- Inside the perimeter fence, which requires inmates to pass through a work change area.
- Outside the perimeter fence of the institution/facility.
- Off institution/facility property.

When the inmate's custody is reduced/increased, the Inmate Assignment Lieutenant shall recall the existing gate pass and issue a new gate pass.

Gate Pass Security

Gate passes shall be secured in a metal box with a locking device. The gate pass box shall be divided into "in" and "out" sections. The gate passes shall be moved to the appropriate in or out sections of the box and shall immediately be moved when an inmate enters or exits the gate that controls gate passes. The gate officer shall keep the box locked, and shall not allow inmates to have access at any time.

Work Change Gate Pass

Work change gate passes shall be printed on "White" paper and shall contain the following information:

- Labeled with the work change gate's name or number.
- Assigned a sequential number.
- Inmate's photo, name, and CDC number.
- Inmate's assigned housing (pencil).
- Inmates custody, work/academic assignment, and activity restriction.
- Effective date, Regular Days Off, and scheduled hours of work.
- Signature of Inmate Assignment Lieutenant.

Outside Perimeter Fence Gate Pass

Outside institution/facility perimeter fence gate passes shall be printed on "Blue" paper, laminated, and in addition to the information required for the work change passes contain the following:

- Signature of Correctional Captain.
- Embossed.

Off Institution/Facility Property Gate Pass

Off institution/facility property gate passes shall be printed on "Green" paper, laminated, and contain the same information that is required for outside perimeter fence gate passes.

52020.8.3 Gate Pass Embossing Stamp

The Correctional Captain/Facility Captain shall obtain and maintain sole custody of an embossing stamp of unique design at all times. To authenticate gate passes, the Correctional Captain's/Facility Captain's signature and embossing stamp shall be affixed to all gate passes, except work change gate passes.

52020.8.4 Emergency Rescinding of Gate Passes

The Watch Commander, Facility Lieutenant, Inmate Assignment Lieutenant, or higher authority shall rescind a gate pass when the inmate demonstrates and/or disrupts an operation, or evidence indicates an inmate may attempt to escape.

The rescinding of a gate pass shall be appropriately documented (CDC Form 115, Report of Rules Violation, CDC Form 128B, Chrono-General, memorandum, etc.).

- Gate passes shall be rescinded upon receipt of a felony arrest hold or detainer, or when an inmate is pending adverse classification committee review.

52020.8.5 Master Pass List

Scheduled individual inmate movement shall be arranged by submitting a request to the Inmate Assignment Lieutenant's office one day preceding the effective day by the institutional established time.

A Master Pass List shall be prepared, audited, signed, and published from these requests by the Inmate Assignment Lieutenant.

52020.8.6 CDC Form 129, Inmate Pass

Staff shall ensure that all inmates listed on the master pass list receive a CDC Form 129, Inmate Pass. This pass shall be issued to individual inmates to authorize movement to specified locations at designated times.

Each institution/facility shall develop precautionary procedures to ensure blank CDC Form 129s are secured in areas not accessible to inmates.

Issuance to Inmates

CDC Form 129s shall be issued to inmates by housing unit staff by 2200 hours the day prior to the effective date on the pass. The CDC Form 129 shall contain the following information:

- Inmate's name and CDC number.
- Inmate's assigned housing.
- Date scheduled.
- Time scheduled.
- The destination.
- The arrival and departure time.
- The reason for the pass.

All non-priority pass forms shall be printed on plain white paper.

When unscheduled inmate movement is necessary, staff shall issue inmates a CDC Form 129 prior to allowing inmates to proceed without staff escort (i.e., medical/dental, authorized attorney visit, disciplinary hearing, or to complete Receiving & Release necessities, etc.). Staff shall call to inform other staff if an inmate(s) is expected to arrive at their location.

Scheduling Priority Appointments

Except for emergencies, medical services, and casework needs (priority ducats) passes shall not be scheduled during work/program hours. Pass scheduling shall comply with the work incentive law.

- When it is necessary to make casework contacts during an inmate's work hours, a "Priority Ducat Request" shall be initiated including only those inmates who will be on scheduled work assignments. This shall be done separately from nonpriority request.
- The priority request shall require either the approval of the chairperson of a properly constituted classification committee, or the approval of the originator's immediate supervisor. All priority passes shall be distinguished in accordance with DOM 53130.9.2, Priority Ducat System.

52020.8.7 Movement During Nonworking Hours

Inmates may participate in leisure activities during nonworking hours. Participation is based upon the inmate's privilege group. Movement to inmate activities shall be coordinated by the Watch Commander. Nonworking hour's activities include, but are not limited to, the following:

- Self-help groups.
- Recreational functions.
- Library.
- Canteen.
- Hobby programs.
- Entertainment from the outside community.

52020.8.8 Lockdown Movement

All movement of inmates during a lockdown shall be coordinated by the Watch Commander. Movement shall be restricted to those inmates cleared to perform essential or emergency services. Inmate movement shall be under direct staff supervision and/or escort.

Feeding

If controlled feeding is initiated during lockdown conditions, inmates shall be released in small manageable groups and shall be under constant supervision to and from dining halls.

Medical Appointments or Care

Inmates who require medical care, or have scheduled medical appointments, shall be under direct staff supervision and/or escort.

Daily Procedures

Daily institution/facility procedures governing movement of staff and inmates during lockdown conditions shall be published and distributed to all affected areas.

52020.8.9 Controlled Movement/Close Custody Movement

Inmates, designated as close custody, shall be supervised in accordance with CCR 3377.1.

Inmate Escorts

Inmate escorts shall be conducted as security and custody classification dictate. The following are examples to be used as guidelines for escorting inmates:

- The escorting staff member should be approximately 12 to 18 inches diagonally behind the inmate or inmates.
- The inmate may be in restraints (depending on custody classification and behavior).
- The escorting staff member may hold on to the restraints of the inmate (depending on the inmate's behavior or history of behavior).
- The escorting staff member may draw his/her baton for escorting restrained inmates in a general population setting if the staff member deems it necessary.
- For mass escorts, the first escorting staff member should be positioned beside the inmates being escorted, while the second escorting staff member is positioned 12 to 18 inches diagonally behind the last inmate being escorted.

52020.9 Revision

The Director, DAI, or designee shall ensure the contents of this Section are reviewed annually and make changes as necessary.

ARTICLE 17 — CONTROL OF DANGEROUS AND TOXIC CHEMICALS

Revised January 26, 2015

52030.1 Policy

All units of the Department shall meet or exceed the requirements of all rules, regulations and laws applicable to identification, training, use, storage, handling and disposal of hazardous chemicals; including those established in the Guidelines for the Control and use of Flammable, Toxic and Caustic Substances, and the Hazardous Substances Information and Training Act, Labor Code, Division 5, Chapter 2.5.

The Department shall provide a working and living area that is as free as possible from unsafe and unhealthy exposure which could lead to personal injury or illness.

52030.2 Purpose

This policy shall establish a method for the identification, receipt, training, issue, handling (or use), inventory and disposal of hazardous chemicals, which is in compliance with all federal, state, and local laws or ordinances.

52030.3 Definitions

The following sections shall define language usage in this section.

52030.3.1 Access

The right and opportunity to examine and/or copy.

52030.3.2 Legislative Act

Hazardous Substances Information and Training Act, Chapter 2.5 commencing with § 6360 of Part 1 of Division 5 of the LC.

52030.3.3 Acute Health Effects

Health effects which are manifested immediately or shortly after, and as a result of, an exposure to a hazardous substance.

52030.3.4 Analysis Using Exposure or Medical Records

Any compilation of data, or any research, statistic or other study based at least in part on information collected from health insurance claims records, provided that either the analysis has been reported to the employer or no further work is currently being done by the person responsible for preparing the analysis.

52030.3.5 Chemical Abstract Service (CAS) Number

The unique identification number assigned by the Chemical Abstract Service (CAS) to specific chemical substances.

52030.3.6 Caustic

A substance that can burn, eat away, or destroy man-made materials and animal tissue by chemical action; corrosive.

52030.3.7 Chemical Name

The scientific designation of a substance in accordance with the nomenclature system developed by the International Union of Pure and Applied Chemistry or the system developed by the Chemical Abstracts Service.

52030.3.8 Common Name

Any designation or identification such as code name, code number, trade name, or brand name used to identify a substance other than by its chemical name.

52030.3.9 Designated Representative

Any individual or organization to whom an employee gives written authorization to exercise a right of access shall be treated as the employee's designated representative for the purpose of access to his/her exposure records.

52030.3.10 Employee

A current employee, a former employee, or an employee being assigned or transferred to work where there will be exposure to toxic substances or harmful physical agents. Also, a deceased or legally incapacitated employee's legal representative may exercise all of the employee's rights under this interpretation.

52030.3.11 Emergency

Includes, and is not limited to, equipment failure, rupture of containers, or failure of control equipment, which could or does result in a release of a hazardous substance in the work place.

52030.3.12 Employee Exposure Records

A record containing any of the following information about employee exposure to toxic, hazardous chemicals (Title 8, CCR, Section 3204).

- Environmental monitoring or measuring, including person, area, grab, wipe, or other form of sampling; as well as related collection and

analytical methodologies, calculations, and other background data relevant to interpretation of the results obtained.

- Biological monitoring results which directly assess the absorption of a substance or agent by body systems (e.g., the level of chemical in the blood, urine, breath, hair, fingernails, etc.) but not including results which assess the biological effect of a substance or agent.
- Material Safety Data Sheets (MSDS) and/or Safety Data Sheets (SDS).
- In the absence of the above records, any other record which reveals the identity; e.g., chemical name, common name, or trade name of a hazardous chemical.

52030.3.13 Employee Medical Record

A record concerning the health status of an employee which is made or maintained by a physician, technician, or other health care personnel.

- Employee medical record includes:
 - Medical and employment questionnaires or histories (including job description and occupational exposures).
 - The results of medical examinations (pre-employment, pre-assignment, periodic, or episodic) and laboratory tests (including x-ray examinations and all biological monitoring).
 - Medical opinions, diagnoses, progress notes, and recommendations.
 - Descriptions of treatments and prescriptions.
 - Employee medical complaints.
 - Employee medical record does not include:
 - Physical specimens; e.g., blood or urine samples which are routinely discarded as a part of normal medical practice and are not required to be maintained by other legal requirements.
 - Records concerning health insurance claims if maintained separately from the employer's medical program and its records, and not accessible to the employer by employee name or other direct personal identifier; e.g., social security number, payroll number, etc.
 - Records concerning voluntary EAPs (alcohol, drug abuse, or personal counseling programs) if maintained separately from the employer's medical program and its records.

52030.3.14 Employer

A current employer, a former employer, or a successor employer.

52030.3.15 Expose or Exposure

Any situation arising from a work operation where a person may ingest, inhale, absorb through the skin or eyes, or otherwise come into contact with a hazardous substance; provided that such contact shall not be deemed to constitute exposure if the hazardous substance present is in a physical state, volume, or concentration for which it has been determined that there is no valid and substantial evidence that any adverse effect, acute or chronic, on human health may occur from such contact.

52030.3.16 Globally Harmonized System (GHS)

An international system of environmental and occupational safety information designed to protect workers and the environment from the hazards of hazardous chemicals.

52030.3.17 Hazardous Chemical

Any substance or mixture of substances which is classified as a physical hazard or a health hazard, a simple asphyxiant, combustible dust, pyrophoric gas, a hazard not otherwise classified,

or is included in the List of Hazardous Chemicals prepared by the Department of Industrial Relations, Division of Occupational Safety and Health's Director pursuant to Labor Code Section 6382.

52030.3.18 Hazardous Waste

A waste as defined in Section 66261.3 of Title 22, CCR, Division 4.5. "Hazardous waste" includes acutely hazardous waste, extremely hazardous waste, non-Resource Conservation and Recovery Act (RCRA) hazardous waste, RCRA hazardous waste, special waste, and universal waste.

52030.3.19 Impurity

A hazardous substance which is unintentionally present with another substance or mixture.

52030.3.20 Label

An appropriate group of written, printed or graphic information elements concerning a hazardous chemical that is affixed to, printed on, or attached to the immediate container of a hazardous chemical, or to the outside packaging.

52030.3.21 Material Safety Data Sheet (MSDS)

A document which supplies information about a particular hazardous chemical or mixture, as required by prior regulation. Note: MSDS use for received hazardous chemicals is allowed until June 1, 2015. Safety Data Sheets (DOM Section 52030.3.25) shall be exclusively used for hazardous chemicals received after June 1, 2015 MSDS's shall be retained for older hazardous chemical products.

52030.3.22 Manufacturer

A person or company who produces, synthesizes, extracts or otherwise makes a hazardous substance.

52030.3.23 Mixtures

A combination or a solution composed of two or more substances in which they do not react.

52030.3.24 Record

Any item, collection, or grouping of information regardless of the form or process by which it is maintained (e.g., paper document, microfiche or microfilm, x-ray film, or automated data processing).

52030.3.25 Safety Data Sheet (SDS)

Written or printed material concerning a hazardous chemical that is prepared in accordance with Title 8, CCR, subsection 5194 (g).

52030.3.26 Specific Written Consent

A written authorization containing the following:

- The name and signature of the person authorizing the release of information.
- The date of the written authorization.
- The name of the individual or organization that is authorized to release the medical information.
- The name of the designated representative (individual or organization) that is authorized to receive the released information.
- A general description of the medical information that is authorized to be released and purpose of release.
- A date or condition upon which the written authorization shall expire (if less than one year).

A written authorization does not authorize the release of medical information not in existence on the date of written authorization, unless this is expressly authorized, and is not in effect for more from date of written authorization. A written authorization may be revoked in writing at a time.

52030.3.27 Universal Waste

Any of the wastes that are listed in Title 22, CCR, Section 66261.9.

52030.4 Responsibility

Warden and Camp Director

The Wardens and Camp Directors shall monitor the supervision and control of hazardous chemicals. Wardens and Camp Directors shall ensure that adherence to the methods and procedures described in this plan are followed.

52030.4.1 Department Heads and Supervisors

Department heads and supervisors shall monitor daily compliance with this procedure in the areas of their responsibilities.

All supervisors shall:

- Control the use of all known hazardous chemicals within their jurisdiction.
- Maintain a completed MSDS or SDS and CDCR Form 2280, Hazardous, Toxic, And Volatile Substances Perpetual Inventory, for each such hazardous chemical used in the work area.
- Inform employees and inmates of the right to personally receive information regarding hazardous chemicals to which they may be exposed in accordance with the CCR Title 8 subsection 5194(d)(6).
- Maintain a constant daily inventory of all hazardous chemicals used or stored within the work area. Inventory lists shall be kept in a place inaccessible to inmates and separate from where items are stored.
- Provide on request of an employee, inmate or their representative, a copy of the MSDS or SDS for each hazardous chemical used in the work area.
- Notify employees of hazardous chemicals present in the work area prior to the job assignment. Such notification shall consist of the following:
 - A prominently posted list of hazardous chemicals. The list shall indicate the manner in which the appropriate MSD or SDS are available as well as access to medical exposure records.

- Prominently displayed binders containing the appropriate MSDS and SDS, provided that the number and location of binders are sufficient to give reasonable notice to all affected staff.
- Any other method of written notice listing the hazardous chemicals in the work area and the availability of MSDS or SDS at the work site.

Training

Each work area supervisor shall ensure that every staff person required to work with or use a hazardous chemical is appropriately trained per Title 8, CCR, Section 5194 in the safeguards and emergency procedures prior to being assigned to work with the hazardous chemical.

- Training shall be provided by the supervisor from information on the MSDS or SDS.
- OJT, in the form of weekly safety meetings with instruction on specific job tasks, shall be documented indicating the date provided, the name of attendees, subject covered, and any additional materials or information supplied.
- Classroom and/or specialized training shall be provided to staff and inmates pertaining to hazardous chemicals where OJT is not adequate.
- Training records shall be maintained by the supervisor of the work area with a copy to the employee or inmate's file and a copy to the IST officer (staff employees).
- Employees or inmates who have not received appropriate training shall not be allowed to work with the hazardous chemical until such time as the appropriate training is completed.

Provide appropriate training on the hazardous chemicals used within the work area prior to using the hazardous chemicals. Training shall consist of:

- Any health hazards associated with the use of the hazardous chemical or mixture.
- Necessary precautions for handling to prevent or minimize exposure to the hazardous chemical.
- Proper use and care of protective clothing and apparatus necessary for handling hazardous chemicals.
- Emergency procedures for spills, fire, disposal, and first-aid.
- Provide written information or training programs for understanding the MSDS or SDS.
- Furnish employees and inmates exposed to a hazardous chemical with information on the contents of the hazardous chemical, as stated on the MSDS or SDS for that hazardous chemical.

52030.4.2 Warehouse Manager/Supervisor

All deliveries of hazardous chemicals from a vendor shall be made directly to the institution warehouse. Warehouse staff are responsible for the proper receipt, labeling, and storage of such hazardous chemicals as provided in this section.

Upon receipt of any hazardous chemicals listed above, warehouse staff shall immediately check the hazardous chemicals against the purchase order to ensure receipt of the correct material and amount. The material must be appropriately marked to identify the hazardous chemicals and any related hazards. Containers not so marked will not be accepted by the warehouse staff.

The warehouse supervisor/manager shall:

- Ensure that each container is labeled according to the Globally Harmonized System (GHS) and National Fire Protection Association (NFPA) guidelines.
- Ensure that a properly completed MSDS or SDS is on file for the hazardous chemicals as soon as possible. Documentation on requests for MSDS or SDS should be maintained for any follow-up action as necessary. Specific instructions for acquiring a MSDS or SDS can be found in Title 8, of CCR, Section 5194.

Inventory Sheet

Prepare and ensure the completion of CDCR 2280 for each hazardous chemical received. The following information must be included on the inventory sheet:

- Date received.
- Hazardous chemical received (common name or brand name).
- Quantity received.
- Person receiving the hazardous chemical.
- Date hazardous chemical is dispensed (whole or part).

- Quantity of hazardous chemical dispensed (pint(s), gallon(s), etc).
- Person dispensing the hazardous chemical.

52030.4.3 Storage

Ensure that all hazardous chemicals are stored in their original containers or if transferred to another container, in an approved container for the specific hazardous chemical. All containers shall be appropriately labeled with the name of the hazardous chemical or mixture contained in it. The Globally Harmonized System (GHS) labeling and identification requirements shall be used to identify the hazard of the hazardous chemical, as appropriate.

Materials received from the vendor shall be immediately stored in a locked "hot room" in the warehouse complex or other designated location specifically constructed for this purpose. (Empty or unused areas in the warehouse will not be used to store these hazardous chemicals.)

Bulk quantities of selected flammable and corrosive hazardous chemicals shall be stored in the warehouse's "special structure room" designated for these hazardous chemicals.

- Oxidizing agents shall be separated in storage from flammable or combustible materials and from mineral acids (Title 8, CCR, Section 5179, Uniform Fire Code, and National Fire Protection Association (NFPA) Guidelines).
- Hazardous chemicals which, when mixed react violently, or evolve toxic vapors or gasses, or which in combination become hazardous by reason of toxicity, oxidizing power, flammability, explosiveness, or other properties, shall be separated from each other in storage by distance, partitions, or otherwise so as to preclude accidental contact between them (Title 8, CCR, Section 5184, the Uniform Fire Code, and National Fire Protection Association (NFPA) Guidelines).
- Special precautions shall be exercised to ensure that these hazardous chemicals are never stored with food items per the California Retail Food Code.

Gas Cylinders

All compressed gas cylinders, full or empty, shall be equipped with safety caps and chained to the storage racks provided for this purpose in the warehouse per the Uniform Fire Code and National Fire Protection Association (NFPA) Guidelines.

- All gas cylinders, full or empty, on the work site must be secured in such a manner as to prevent their being dropped or knocked over.
- All gas cylinders shall be marked so as to identify clearly the hazardous chemicals contained in them.

52030.4.4 Containers

All containers shall be clearly marked to identify the hazardous chemicals contained therein. No container shall be used for a hazardous chemical for which the container is not approved.

- Any containers with unidentified chemicals shall be reported to the fire chief or other hazardous materials specialist designee. Steps shall be taken within 24 hours to have contents identified.

If the discovery was during non-business hours, steps for identification shall be the following work day.

- Strict adherence to all laws and regulations pertaining to the storage and handling of hazardous chemicals shall be maintained at all times.
- Warehouse staff shall be appropriately trained in the storage and handling of all hazardous chemicals contained in the warehouse.

52030.4.5 Dispensing

All hazardous chemicals shall be dispensed in their original containers when possible. If smaller amounts are requested, only containers approved for the hazardous chemicals being dispensed shall be used.

The warehouse supervisor/manager shall dispense only the amount of the hazardous chemical indicated on the written request. Only the minimum amount needed for the specific job shall be requested.

The warehouse supervisor/manager shall distribute copies of appropriate MSDS or SDS for each hazardous chemical dispensed, to the appropriate supervisor requesting the hazardous chemical. If a prior MSDS or SDS for the hazardous chemical has been forwarded to the supervisor requesting the hazardous chemical, a new MSDS or SDS shall not be forwarded unless new information has been received on that hazardous chemical.

Whenever a new MSDS or SDS is received in the warehouse for any hazardous chemical which previously had a MSDS or SDS, the warehouse supervisor/manager shall inform users of the hazardous chemicals of any new information by transmittal of a copy of the new MSDS or SDS.

Unused supplies of hazardous chemicals shall be returned to the warehouse for proper storage, unless it is controllable in the work area in a secure, locked room appropriate for the hazardous chemical(s) involved.

All hazardous chemicals received or dispensed from the warehouse shall be immediately documented on the appropriate inventory form for that hazardous chemical.

52030.4.6 Audits

Monthly audits shall be performed by the warehouse supervisor/manager to ensure compliance to inventory documentation, dispensing of hazardous chemicals, etc. Copies of inventory audits shall be maintained until disposal and/or depletion of the hazardous substance, or for a period of two years.

Under no circumstances shall any inmate have access to the "hot room", MSDS and SDS, inventory logs, master lists of hazardous chemicals, or keys to any locked area containing hazardous chemicals.

The warehouse supervisor/manager shall ensure the proper distribution of supplies and hazardous chemicals from the warehouse.

Requests for any hazardous chemicals covered by this procedure shall be forwarded to the warehouse supervisor/manager in writing indicating who is requesting, the hazardous chemical requested, the amount, and when needed.

The warehouse supervisor/manager shall maintain an accurate inventory of all hazardous chemicals in the warehouse. They shall maintain a master list of all hazardous chemicals, with copies of applicable MSD or SD, in a locked (or secure) area separate from where the hazardous chemicals are stored.

CDCR Form 2280

A CDCR Form 2280, Hazardous, Toxic, And Volatile Substances Perpetual Inventory", shall be completed indicating all the hazardous chemicals located in the warehouse. Copies of the MSDS or SDS for each hazardous chemical shall be attached to the completed CDCR Form 2280. One set of copies of the CDCR Form 2280 and the attached MSDS or SDS shall be forwarded to the institution fire chief for their use in the event of a fire or other emergency.

- Perpetual (daily) inventories shall be maintained on all hazardous, toxic, volatile, flammable and caustic hazardous chemicals.
- The warehouse supervisor/manager shall maintain an inventory sheet (log) on each hazardous chemical.
- Documentation shall be appropriately entered on the log/form for the particular hazardous chemical each time a portion is issued.
- If a new hazardous chemical is received in the warehouse, an updated copy of the CDCR Form 2280 and the applicable MSDS or SDS shall be forwarded to the fire chief immediately.

52030.4.7 Fire Chief

The fire chief shall ensure that each work area using hazardous chemicals has an appropriate storage area for all hazardous chemicals used in the work area. The storage area shall be safe, secure, and inaccessible to inmates. Strict attention shall be paid to the proper methods for storage of different hazardous chemicals.

Fire chiefs shall monitor the supervision and control of hazardous chemicals at their assigned institution. Strict adherence to the methods and procedures described in this plan shall be maintained. The fire chief shall also:

- Control the use of all known hazardous chemicals within their jurisdiction.
- Ensure that staff required to implement or participate in the implementation of this procedure are made familiar with its contents.
- In the event of an uncontrollable "spill" of hazardous chemical, take charge of evacuation from the area and notify as soon as possible all agencies required by law i.e.; EPA, California Governor's Office of Emergency Services (OES), Certified Unified Program Agency (CUPA) and local Emergency Responders (e.g., outside Fire Department).
- File required reports in compliance with federal, state, and local laws.

52030.4.8 Employees

Department employees and inmates who work with hazardous chemicals shall be familiar with this procedure and shall observe all safety precautions including, but not limited to:

- In the event of a major spill or release of toxic or hazardous chemicals, the institution fire department shall be immediately notified for emergency response.
- Reporting any loss or misuse of hazardous chemicals to the immediate supervisor of the area where the loss or misuse occurred.

- Wearing and using appropriate personal protective equipment as required for use with the hazardous chemical(s).
- Immediately reporting any exposure to a hazardous substance to the supervisor in charge, and taking appropriate action to prevent further exposure to themselves or others. This may include appropriate medical follow-up.
- No hazardous chemical covered by this procedure shall be dispensed to inmates without direct supervision of staff. An exception may be made in the authorized use of gasoline (i.e., service stations, garages, lawn mowers, etc.).

If appropriate secure storage areas are not available in the work area for unused hazardous chemicals at the end of the work day, the remaining hazardous chemicals shall be returned to the warehouse for proper storage.

52030.4.9 Asbestos and Polychlorinated Biphenyls (PCB's)

All incidents involving the release of asbestos and polychlorinated biphenyls (PCB's) shall be reported immediately to the fire chief or other hazardous materials specialist and the Correctional Plant Manager (CPM) hazardous materials specialist.

The CPM and/or fire chief shall inspect or cause to be inspected the area of concern to determine if immediate action is warranted.

If the asbestos and/or PCB's release creates an immediate danger, the CPM shall notify the Associate Warden, Business Services or other manager who shall notify any and all agencies required by law.

The CPM shall take all necessary actions, including replacement or repair of contaminated material or equipment. All persons shall be evacuated from contaminated areas if warranted, until the area is returned to a safe condition.

For buildings constructed before 1979 that contain or are presumed to contain asbestos containing materials, the work site shall provide notification to employees as required by the Asbestos Notification Act.

52030.5 Hazardous and Universal Waste

Unstable or unusable hazardous chemicals that may become hazardous and universal waste shall be removed and disposed in a safe and healthful manner which complies with all federal, state, and local laws. The institution fire chief or other hazardous materials specialist shall be contacted to provide for the proper disposal of hazardous and universal waste.

Disposal Tax & Fee Forms

Hazardous waste generator tax and fee returns and forms must be filed by CDCR facilities that dispose of hazardous waste during the course of a calendar year.

- A fee return for the weight (tons) of hazardous and extremely hazardous waste disposed, for each calendar year is required by the State BOE, Department of Business Taxes. The fire chief or other hazardous materials specialist shall compile these reports returns.
- An EPA ID # Verification Fee and Manifests Fee Sheet must be completed and filed with the Department of Toxic Chemicals Control (DTSC).
- Failure to complete the above forms in the time designated shall result in a penalty and interest being imposed by the State BOE and DTSC. Therefore, the above forms shall be completed and any fees paid in a timely manner.
- It is imperative that all staff needing hazardous chemicals-hazardous and universal waste disposed contact the fire chief or hazardous materials specialist so that accurate coordination and collection of data can be completed.

A contract for hazardous and universal waste disposal shall be arranged with a licensed, approved hazardous waste transporter (Business Services has this information) to eliminate the possibility of improper disposal and subsequent liability to the Department or institution.

52030.6 Inspections

Ongoing inspections shall be performed by the following staff at the frequency indicated:

Daily

Daily inspections for fire and life safety, including proper supervision of hazardous chemicals, shall be performed by supervisors of each work and living area.

Weekly

Weekly inspections shall be performed by supervisors for fire and life safety, with documentation made of findings.

Monthly

Monthly fire and life safety and health inspections shall be performed by the fire chief and Chief Medical Executive (CME) or their trained designee(s). Reports of deficiencies shall be made and copies sent to the safety coordinator, the Warden and Camp Director and the area supervisor where the deficiencies are noted. Inspections shall also include spot checking for training of employees, safety meeting minutes, proper containment and use of hazardous chemicals, etc.

- Deficiencies shall be corrected within a reasonable time, dependent upon the nature of deficiency.
- All work procedures shall be performed in a healthy and safe manner.

Quarterly

Quarterly inspections shall be conducted by the fire chief or their designee for fire and life safety with findings documented and reports sent to the Warden. Inventories of chemicals used in the work area shall be noted in addition to the deficiencies mentioned above.

Annual

Annual State Fire Marshall and California Department Public Health (CDPH) inspections shall be conducted with the attendance of the fire chief and work or living area supervisor for the area being inspected. Complete cooperation shall be given to assist in a positive, thorough inspection.

- State Fire Marshall (SFM) reports and Environmental Health Survey reports (EHS) shall be forwarded to:
- Warden and Camp Director.
- Associate Warden, Business Services.
- CPM.
- CME.
- Institution Safety Coordinator, (aka Fire Chief).
- Director, Division of Adult Institutions.
- Director, Division of Administrative Services.
- Chief, Environmental Compliance Unit, FPCM.
- Deputy Director, Office of Audits and Court Compliance.
- Chief, Office of Employee Wellness.
- Associate Director (Mission), (DAI).

52030.6.1 Plan of Correction

The Warden and Camp Director shall forward a Corrective Action Plan to the Associate Director (Mission), (DAI) and all others mentioned in Section 52030.6, within 30 days (45 days for camps) indicating action planned to eliminate deficiencies noted in the SFM and EHS reports. This plan shall include:

- The nature of the problem.
- The method identified to resolve the problem.
- Expected date of completion.
- List staff members responsible for resolution.
- If problem cannot be corrected within 30 days, the reasons and expectation of when it will be corrected.
- The name and title of person preparing the plan of correction.

52030.7 Hazardous Chemical Misuse or Loss

Upon discovery that a hazardous substance material has been lost, stolen, or misused, the discovering staff person shall immediately notify the institution watch commander and the safety coordinator. A written follow-up shall be submitted within 24 hours indicating all the information (facts) of the incident. Discovery could be through an inventory or any method that identifies misuse of a hazardous chemical.

The watch commander and safety coordinator shall take action appropriate to the immediate need of the situation (lost, stolen, or misuse). If the hazardous chemical involved could pose a potential serious threat to the life, safety, and/or security of the institution, immediate action shall be taken.

- Under no circumstance, shall loss or misuse of hazardous chemicals be ignored.

A written report shall be submitted to the responsible unit captain and Associate Warden to facilitate a review of the operation in the area and take appropriate action to prevent recurrence.

52030.8. Hazardous Substance Exposure Records

Employee hazardous substance exposure records shall be kept in the employee's workers' compensation file, with a copy to the employee's personnel file. A separate envelope marked "Hazardous Substance Exposure Medical File" shall be red-tagged for easy identification.

- Upon employee transfer, staff exposure records shall be maintained and transferred to each successive institution and shall be forwarded to the SRC when employment is terminated.
- A permanent record shall be kept indicating any/all records forwarded to the SRC (the name of the employee and the date the records were forwarded).

Inmate hazardous substance exposure records shall be kept in the inmate's medical file. A separate envelope marked "Hazardous Substance Exposure Medical File" shall be red-tagged for easy identification.

Inmate exposure records shall be transferred to each successive institution and shall be maintained and forwarded to the SRC when incarceration is terminated (discharged or deceased).

A permanent record (the name and institution number of the inmate and date records were forwarded) shall be kept indicating records were forwarded to the SRC.

Both staff and inmate exposure records shall be maintained and preserved for at least 30 years post-employment or discharge from the Department.

52030.9 Title 8, CCR, Section 3204

State Compensation Insurance Form (SCIF) 3067 generated as a result of a hazardous substance exposure shall be stamped with red lettering in the upper right-hand corner "Hazardous Substance Exposure." This will allow for easy identification to the SCIF adjusters and their legal staff to ensure that these records shall not be destroyed.

Employees or their representatives requesting copies of any exposure medical records shall comply with the guidelines of Title 8, CCR, Section 3204. Employees shall first complete a CDC Form 965, Authorization for the Release of All Substance(s) Exposure and Medical Records.

Supervisors shall complete SCIF Form 3067 to report any employee exposures to hazardous chemicals.

52030.10 Revisions

The Director, Division of Adult Institutions, or designee shall ensure that the contents of this section is current.

ARTICLE 18 — TOOL CONTROL

Effective December 27, 1989

52040.1 Policy

Pursuant to the Penal Code, The Director has established a system for uniform tool control and prevention of unauthorized or improper use of tools.

52040.2 Purpose

To provide control and accountability for those tools and equipment items that pose a threat to persons or to the physical security of the institution.

52040.3 Responsibilities

Supervisors and managers shall monitor the control and inventory of tools in their respective department/area/unit.

52040.3.1 All Staff

All staff supervising inmates shall instruct inmates in the control and the proper usage of the tools.

52040.4 Tool Classification

All tools, instruments, implements, utensils, appliances, or devices used in performing work shall be classified into various tool groups.

52040.4.1 Critical Tools

Revised April 29, 1991

Critical tools include all tools that are extremely hazardous when uncontrolled, i.e., hacksaws and blades, cutting torches, large pipe wrenches, all types of knives, bolt cutters, axes, or any additional tools which work supervisors and instructors or the captain feel are dangerous to institution security or inmates' well being. Tools in this category shall be coded and marked to conform with DOM 52040.5.

Escape Priority Tools

- Inmates using escape priority tools shall require direct staff supervision while working within a secure perimeter. Inmates assigned to minimum security work crews, off reservation work details (ORWD), camp programs, or parole work furlough programs, do not necessarily require direct and constant supervision during the performance of their work assignments. Examples of escape tools include, but are not limited to, the following:
 - Bolt Cutters.
 - Oxy-acetylene equipment.
 - Hacksaws.
 - Ropes.
 - Ladders (over six feet in height).
 - Portable scaffolds.
 - Pipecutters.
 - Files.
 - Block and tackles.
 - Pneumatic jackhammers.
 - Metal cutting equipment.
 - Security screwdrivers.
 - Security wrenches.
 - Security torx bits and hex bits.
 - Sheet metal shears.

Dangerous Tools

- Dangerous tools may be utilized without direct staff supervision. Some examples of dangerous tools include, but are not limited to, the following:
 - Knives.
 - Hatchets.
 - Axes.
 - Chisels.
 - Hammers.
 - Screwdrivers.
 - Punches.
 - Scribes.
 - All sharp pointed tools.
 - Scrapers.
 - Loppers.
 - Diagonal pliers.
 - Electrician's pliers.
 - Side cutters.

52040.4.2 Non-Critical Tools

Tools not included in DOM 52040.4.1 are not normally classified as critical tools; however, the work supervisor may request a critical tool classification through the work supervisor's supervisor and captain. Examples of non-critical tools include, but are not limited to, the following:

- Lawn mower.
- Lawn rakes.
- Small open and closed wrenches.
- Long-handled gardening tools.
- Electrical testing equipment.

52040.4.3 Power Tools Grinders

Electrical, pneumatic and bench grinders shall have locking devices installed covering the grinding wheel as well as the switch or control, so that they cannot be operated except under direct supervision of staff. Grinders shall be locked when not in use. The work supervisor may request their supervisor, captain or higher authority to designate other power equipment to operate as stated.

Other Power Tools

Other power tools may be used without direct supervision. Examples are:

- Barber equipment.
- Drills, electric 1/4" and 3/8".
- Router.

- Vibrator sander.
- Belt sander.
- Skill-saw (wood cutting blade only).
- Roto-hammer, with fastener attachment for red-head anchor.
- Electric power snake (plumbing).
- Airless paint sprayer.
- Pipe cutters, 2 1/2" max.

52040.4.4 Emergency Tools

Tools for use by inmate electricians, plumbers, and other inmate tradesmen which may be needed at night or at other times when shops are closed shall be kept locked in boxes in locations designated by the Chief of Plant Operations and approved by the captain of the facility involved.

52040.4.5 Hobby Shop Tools

Hobby shop hand tools owned by inmates shall be marked with the inmate's name and number before being issued to inmates for hobby shop use. State-owned tools shall be controlled by the above-stated procedure. The hobby shop supervisor shall not issue tools defined as "critical" for in-cell use. Replacement stock shall be obtained from outside vendors.

Note: Each facility administrator/captain, with the hobby shop supervisor, shall approve/disapprove hobby tools based on risk or threat to the security of the institution.

52040.5 Tool Identification System

Each institution shall design a tool identification system, inscription/scribe code, to identify tools from various parts of an institution and to identify tools assigned to particular areas of responsibility. The identification of tools shall assist staff in returning lost or stolen tools to their proper area and identify inmate(s) in the event tools are used to effect an escape or used in a felony crime.

52040.6 Tool Storage

Each institutional shop, work area, or building, where tools are used and stored, shall have methods of issuance, storage and key control (refer to DOM 55020), for accountability of tools. Some examples are, but not limited to:

- Shadow board display.
- Tool box.
- Tool pouch.
- Tool locker.

Note: Each storage area shall include an inventory card for any custody staff to determine an immediate and accurate count of the tools.

52040.7 Key Tags (CHITS)

Revised April 29, 1991

All tools issued to inmates shall be with key tags (chits). Inmate key tags are to be of a design/format which is easily recognizable and distinct from staff key tags.

Inmates shall not loan tools to other inmates nor allow other inmates to turn in tools issued to them.

- Each inmate shall be assigned a number and a certain amount of tags. A roster shall be maintained of this assignment of tags.
- At the beginning of each work shift, each shop supervisor shall issue a shower curtain type hook with tags, to the assigned inmate. The supervisor shall count the tags prior to the issuance at the beginning of the shift and at the end of the shift. The inmate's tags shall be kept secure when not issued to the assigned inmate by the work supervisor.
- Each inmate shall maintain control for their tags. When an inmate wants a tool, they shall turn in a tag for a tool and when the inmate returns the tool, they shall receive their tag immediately.
- Tools shall be issued only to inmates assigned to that work area. If another shop needs a tool, the tool transfer from shop to shop shall be made by the shop supervisors.
- If the tool room inventory clears and an inmate has lost a tag, the inventory log shall be annotated with the date, time, and location where the tag was lost. If the tool room inventory does not clear at the end of the work period, the inmate(s) who have checked out the tool(s) shall be documented with a CDC 115. This shall not change the lost-tool procedure.

52040.8 Inventories Daily

Inventory listings of all tools shall be kept and these inventories shall be checked prior to the beginning and ending of each work or class period.

These checks shall also be conducted before all breaks, including lunch. The supervisor shall sign the Tool Inventory Check List.

- The supervisor shall maintain a master tool inventory which shall be secured and not available to inmates. The master tool inventory shall be used for daily and quarterly inventories.

Quarterly

A quarterly tool inventory shall be submitted by area inventory supervisors for all tools in their assigned areas to their respective department head. The inventory shall be completed and forwarded by the tenth of January, April, July, and October of each year.

Note: Under no circumstances shall an inmate be allowed to inventory tools. All inventories shall be forwarded by the area supervisor to their supervisor, their respective department head and the chief custodial officer.

52040.9 Loss of Tools

The loss of any tool(s) shall be immediately reported by telephone to the captain of the facility and the department heads concerned, prior to releasing inmates back to their respective quarters. The inmates shall be given an unclothed body search and the work area shall be searched. A "Loss of Tool Report" shall be prepared immediately by the staff person discovering the missing tool.

52040.10 Inspections/Searches

Any area within an institution where tools are stored shall be subject to unscheduled inspections/searches by custody personnel, as directed by the captain. This shall ensure that the area is secure and that compliance to this procedure is maintained.

- When violations of this procedure are determined by inspecting custodial personnel, a written report describing the specific area and violation shall be addressed to the captain and the division head.
- Any tool found improperly marked or not secured shall be confiscated and turned over to the captain. A memorandum directed to the captain and respective division head shall be prepared stating where, when and by whom the tool was found.

52040.11 Damaged, Broken, Obsolete, or Worn Tools

Damaged, broken, worn or obsolete tools shall be secured and controlled, just as other tools. Tools in this category shall be picked up, measured and inspected to ensure all parts are accounted for.

- Each institution head shall designate a person(s) (i.e., security squad, outside lieutenant, tool control officer) to dispose of the unusable tools at an off-institutional location.
- Each department head shall enforce the provisions of this procedure.

52040.12 Tool Replacement

Replacement of damaged, broken, worn out, or lost tools, or issuance of additional tools from the secure warehouse storage area shall have prior written approval.

Note: For CALPIA tool replacement, see DOM 52040.13.3.

- A tool request shall be directed to the requesting employee's immediate supervisor documenting the need for issuance of the required tool.
- The request shall be approved/disapproved by the employee's department head, then forwarded to the procurement officer and a copy to the captain.
- Tools shall be issued by the procurement officer or designated employee in accordance with this procedure. The procurement officer shall:
 - Remove the tools from the secure storage inventory located in the warehouse.
 - Ensure the inventory of requesting area is updated to include the tool that is needed.
 - Issue the tool after ensuring the tool has been marked for identification. (See DOM 52040.5.)

52040.13 Methods Warehouse

Revised April 29, 1991

Tool and tool-related material received at the warehouse from vendors shall be checked against a purchase order or subpurchase order. Issuance of tools shall be made utilizing an approved form, "Request for Tool(s)". Tools shall be issued only to staff.

- All tools shall be properly receipted out of the storage area (warehouse). All tools shall be properly marked and color coded for area identification.

- An inventory card shall be maintained on each tool stored in the warehouse.
- Receipts and issues shall be posted to the inventory each time a tool enters or leaves the warehouse.
- A list of tools specifying description and quantity shall be kept on all tools in the warehouse.

Hand tools used by inmates assigned to a warehouse shall be issued to inmate(s) adhering to DOM 52040.7. All tools shall be kept in secured tool boxes with a tool list posted inside the tool box.

52040.13.1 Restricted Housing Units

Restricted housing units shall maintain an inventory log with all serving lades, forks and spoons for the unit included in the log. When not in use, utensils shall be locked in the designated security lock box within the unit. Utensils shall be signed in and out for meals by the officer on duty. If a proper sink for cleaning the utensils is not available in the unit, the utensils shall be released to the culinary for washing after they have been accounted for by the unit officer. The utensils shall be signed in and out on the inventory log for the unit by the officer on duty. This is to be accomplished prior to the departure of any food carts from those areas.

52040.13.2 Plant Operations/Maintenance

Each plant operations maintenance shop shall maintain only those tools required for daily use and equipment maintenance. Each plant operations maintenance shop shall maintain a storage area (DOM 52040.6) for the control of tools and for a quick visual check of their assigned tools to ascertain if any are missing. Example of the shops are, but not limited to:

- Outground crews.
- Carpenter shop.
- Paint shop.
- Electric shop.
- Plumbing shop.
- Boiler room.
- Refrigeration shop.
- Water/sewage plant.
- Maintenance warehouse.
- Service station.
- Kitchen maintenance.
- Lock and key shop.

52040.13.3 CALPIA

Each CALPIA lead institution production manager shall maintain a controlled tool room which shall supply tools for the subdivisions and maintain control and inventory of the tool room. Each individual industry shop supervisor shall maintain a tool storage area for the tools assigned to the shop. The CALPIA lead institution production manager shall designate, control, and inventory tools in their shop. Examples of shops are, but are not limited to:

- Knitting mill.
- Laundry.
- Shoe factory.
- Printing shop.
- Textile factory.
- Metal fabrication.
- Dairy.
- Field crops.
- Furniture factory.
- Sewing machine repair.
- Mattress factory.

Issuance of Additional Tools

Replacement of damaged, broken, worn out, obsolete, or lost tools, or issuance of additional tools from the secure industry storage area shall be performed by the lead institution production manager or designated employee in accordance with this procedure.

- A tool request shall be directed by the employee to the immediate supervisor documenting the need for required tool.
- The request shall be approved/disapproved by the lead institution production manager before any tool is ordered from vendor.

- Upon arrival of all controlled tools at the CALPIA warehouse, the warehouse manager or designee shall:
 - Notify the sergeant assigned to industry and the designated tool control representative.
 - Check controlled tools and tool related material against purchase order or subpurchase order to assure inventory received.
 - All received controlled tools shall be locked in a secure storage area under the direct supervisor of the warehouse manager or designated employee.
- Ensure the inventory of requesting area is updated to include the needed tool on inventory card which specifies tool description and quantity.
- Before issue, tools shall be scribed and color coded to the ordering unit by the designated tool control representative. (See DOM 52040.5.)

52040.13.4 Education Division

The education division (academic and vocational) shall maintain inventories and control of all tools in the individual classes/shops. Tool rooms are located in each vocational shop area and a central tool room for the academic area. Each shop/class shall maintain only those tools needed for every day use and equipment maintenance. Shop supervisors and class instructors shall control and inventory tools in their shop or class area. Examples are, but are not limited to:

- Academic classrooms.
- Air conditioning.
- Auto mechanics.
- Culinary arts/meat cutting/baking.
- Drafting.
- Landscaping.
- Library.
- Machine shop.
- Masonry.
- Print shop.
- Radio/TV repair.
- Shoe repair.
- Arts in Correction.

52040.13.5 Culinary

Revised April 29, 1991

All tools used in the preparation and serving of food in the culinary area shall only be used under direct supervision of culinary staff. When not in use, tools shall be kept in a security locked box. In addition to inventory checks covered in DOM 52040.8, an inventory check shall be made prior to starting and after closing culinary operations by staff designated by the Warden or RPA and noted on the inventory log. The time of the inventory check shall be noted on the watch commander's report (Daily Report of Watch Activities). Any discrepancies shall be noted. Examples of tools are, but not limited to:

- Knives.
- Ladles.
- Long-handled spoons (over six inch handles).
- Long-handled forks (over six inch handles).
- Rotating discs from potato peeling machine.
- Band saw blades.

Note: When a band saw blade breaks or becomes unusable, it shall not be replaced until the blade is measured to ensure the total number of inches conforms with the replacement blade.

52040.13.6 Personnel Dining Area (Snack Bars)

Revised April 29, 1991

Tools for employee dining areas (snack bars), which use inmate workers, shall be coded, inventoried, and controlled by this procedure. Since tools are received by direct purchase, the snack bar manager shall add the new tools to the snack bar inventory and code the tools in compliance with the institutional identification system. Inventory control shall be on a daily basis by the snack bar manager.

52040.13.7 Medical Surgical Area

All surgical tools shall be kept in secured cabinets in locked rooms. A complete inventory log shall be maintained in the locked cabinet. Each set of tools shall be visible on cabinet shelves. Only medical staff shall have access

to and are accountable for the issuance of these tools. Under no circumstances shall inmates have access to the room or use of the tools without nursing staff or custody staff being present. After a surgery is completed, the tools shall be cleaned and accounted for by the nursing staff. All syringes and needles shall be kept under lock and key in designated areas.

Infirmary

Tools for the infirmity examination room and emergency treatment room shall be stored in locked instrument cabinets. Access to the instrument cabinets is limited to authorized medical staff. The authorized staff shall conduct an inventory of the instruments prior to leaving the work area for breaks, lunch, and at the end of their shift.

Note: The CMO shall be accountable for the total tool inventory for medical services. Due to the nature and size of tools (instruments), coding by institutional identification system may be impractical.

Dental Area

Dental tools shall be kept in security cabinets secured in the dental area. Each cabinet shall have an inventory sheet of the tools in the cabinet. Inmates shall not handle the equipment unless a dentist is present and has given approval. When not in use by a dentist, syringes and needles shall be secured in the dental operatory.

52040.13.8 Firehouse

A secure tool cabinet shall be located in the firehouse equipment room. The fire chief shall control and inventory the tool cabinet. Each tool box, utilized for fire equipment within the department, shall have a clearly posted inventory card for tools maintained in the box. The fire chief shall check and maintain an accurate daily inventory of each assigned firehouse tool box.

Firehouse tools shall be coded by the institutional identification system.

52040.13.9 Inside Security Areas

All tools obtained for use of various inmate work crews inside the security area shall be controlled and inventoried daily by the inmates' supervisor. Supervisors shall also check the tools prior to leaving the area for breaks, lunch, and at the completion of their shift. All tools shall be coded by institutional identification system. Examples of these areas are, but not limited to:

- Barber shops (staff and inmate).
- Canteen.
- Chapels.
- Clothing room.
- Control room (including emergency tool boxes).
- Housing units.
- Inside gardening crews.
- Locksmith.
- Receiving and release.
- Recreational/gym areas.
- Visiting room.
- Law library.

52040.13.10 Outside Security Areas

All tools for maintenance and use outside the security area of an institution shall be inventoried and controlled by the designated supervisor. Each area shall have a security storage area and inventory cards/sheets therein to ensure all tools are maintained and controlled. Examples of these areas are, but not limited to:

- Armory.
- Family visiting.
- Garage.
- Gardening crews.
- Range.
- Service station.
- Sewage plant.

52040.14 Outside Contractors

The Chief of Plant Operations shall provide technical instruction on projects, location of projects, types of materials and other security precautions to contractors during any construction within the security area. Exceptions to this shall be approved by the respective captain.

Tools provided by contractors working inside the security area shall be inventoried each day by the sallyport officers as the contractor enters and

exits the area. The escorting employee and the contractor shall ensure that no tools are left in the area when the contractor exits the facility.

52040.15 Staff State Tools

Supervisors carrying tools for work details inside the security perimeter shall control tools, when not in use, in secured locked tool boxes and/or tool lockers. Each set of tools shall have an inventory card/sheet to ensure all tools taken into an area are removed from the area.

52040.16 Staff Personal Tools

At times, employees feel that there is a need to use personally-owned tools or equipment within the institution in performing their assigned duties. This shall be permitted if written approval is obtained from the Warden prior to tools being brought into the institution. All personal tools when brought into or taken out of the institution shall be inventoried daily by the sallyport officer.

52040.17 Revisions

The Deputy Director, Institutions Division, or designee, shall ensure that the content of this section is current.

ARTICLE 19 — ARREST, SEARCH, AND SEIZURE

Revised December 16, 2014

52050.1 Policy

Pursuant to the Penal Code, the Secretary has established a system of searches in the maintenance of safety and security of each correctional facility.

52050.2 Purpose

This Article provides the proper process of arrest, searches, and seizures within the Department. The performance of the functions of arrest, search, and seizure shall be in accordance with all laws, rules, and regulations pertaining to those functions. Due process shall be afforded in all cases where applicable.

52050.3 Responsibility

Each Warden shall implement, govern, and monitor training of all persons who shall be required to conduct searches in departmental facilities.

- All managers and supervisors shall ensure their subordinates are aware of and comply with this Section, provide On the Job Training, and provide general supervision of scheduled search activity.
- All employees shall be aware of the content of this Article.

52050.4 Peace Officer Defined

Any correctional employee who meets the requirements as outlined in PC 830.5 is a peace officer.

52050.5 Definition of Arrest

An arrest is taking a person into custody, in a case and in the manner authorized by law. An arrest may be made by a peace officer or by a private person.

52050.5.1 Definition of Detention

Detention is the stopping of a person, other than an inmate, by a peace officer, for the purpose of conducting a brief investigation into the identity of the person and the nature of their presence when the officer reasonably suspects the person may be involved in criminal activity.

Any Department employee is authorized to stop and detain any inmate for the purpose of determining their identity and ascertaining the nature of their activity.

52050.5.2 Definition of Seizure

The taking, confiscating, possession or custody of contraband as outlined in DOM 52051.

- To hold under authority of law.
- To check the progress or spread of unlawful acts.

52050.6 Formalities in Making Arrest; Exceptions

The officer making the arrest shall inform the person being arrested of:

- The intention to arrest.
- The cause for the arrest.

- The authority to make the arrest, except when the officer effecting the arrest reasonably suspects that the person to be arrested is actually engaged in the commission of a crime, or the person to be arrested is pursued immediately after its commission, or after an escape.

The requirement that the officer inform the person to be arrested of the authority to arrest shall be deemed satisfied when the officer is in full uniform and is clearly visible to the arrestee.

52050.7 Miranda Rights

Any peace officer effecting an arrest of any person for any criminal offense shall advise the arrestee of their constitutional rights pursuant to the Miranda decision. The arrestee shall be advised of their rights prior to any interrogation, by reading verbatim the following to the arrestee in a language that the arrestee understands.

- You have the right to remain silent.
- Anything you say can and will be used against you in a court of law.
- You have the right to consult an attorney and to have an attorney present with you during questioning now or in the future.
- If you cannot afford to hire an attorney, one will be appointed for you at no charge.
- Do you understand each of these rights as I have explained them to you?
- Now that I have explained your rights, are you willing to make a statement without an attorney present?

The arresting officer shall, whenever practical, ensure that another peace officer is present when the arrestee is advised of these rights and the answer to these questions, along with any statement provided after a waiver of these rights, shall be documented in the appropriate incident reports.

An inmate has no right to silence during questioning by any Department staff member regarding non-criminal Department violations.

52050.8 Planned Arrest Procedure

Whenever possible, every arrest shall be planned to minimize risk of injury to staff, inmates, or to the public, or to destruction or damage to state property. Plans for arrests shall be formulated by or in conjunction with, or reviewed by the peace officer's supervisor. Plans for arrests shall consider at a minimum:

- Facts and circumstances of the criminal violation for which the person is being arrested.
- Criminal history with emphasis on potential for resisting arrest by use of weapons or dangerous instruments.
- The location of arrest and potential interference of other inmates or persons, or the potential risk to uninvolved inmates, other persons, or staff.
- Determine any special equipment needed.
- Determine tactics to be used.

52050.9 Unplanned Arrest Procedure

The peace officer may unexpectedly discover a person engaged in a criminal act requiring prompt arrest. The decision to arrest must be made quickly and without the opportunity to confer with their supervisor.

The officer shall promptly communicate to other staff the present situation and the need for assistance. Depending on the circumstances of the situation, the officer may need to take immediate intervening action before arrival of additional staff assistance. In this case, the officer should consider the elements of risk involved in effecting the arrest including:

- Facts and circumstances of the criminal violation for which the person is being arrested.
- Potential for resisting arrest by use of weapons or dangerous instruments in the immediate area.
- The location of arrest and potential interference of other inmates or persons, or the potential risk to uninvolved inmates, a victim, or other persons, or staff.
- Determine the most appropriate tactics to be used given available resources and response time of responding staff.

52050.10 Restraint Gear

Employees shall use only State-issued handcuffs, handcuff keys and other restraining equipment during the course of their duties. The possession of privately owned handcuffs, handcuff keys, and other restraint equipment is prohibited on institutional grounds.

52050.10.1 Restraint Gear - Handcuffs/Handcuff Keys

The Wardens shall procure and issue State-owned handcuffs/keys to all personnel occupying the following posts:

- All uniformed custody personnel with inmate contact assigned to AD-SEG, PHU, SHU, Management Control Unit (MCU), psychiatric unit, or outside inmate work crew.
- All uniform custody personnel with inmate contact assigned to general population housing unit.
- All personnel assigned to a security squad.
- All personnel assigned to search and escort duties.
- All yard officers.
- All transportation details.

52050.10.1.1 Issuance

State owned handcuffs/keys shall be issued on receipt of metal key tags bearing the employees name. The tags shall be placed on the respective handcuff/key board hook. (Refer to DOM 55020.14 Key/Locking Device Control).

52050.10.2 All Restraint Gear

All State owned restraint equipment, including handcuffs, shall be etched with the institution/regions initials (SQ, CMF, CTF, etc.) where the equipment is used and numbered for identification.

- Restraint gear shall be stored in an area inaccessible to inmates. Each area shall have provisions (hook boards, etc.) for individual and sets of restraint gear for daily and operational use.

52050.10.3 Restraint Gear Use

All personnel who are required to apply restraint equipment shall be knowledgeable and competent in the following areas:

- Departmental handcuff and restraint gear policy.
- Methods for practical application of handcuffs and restraint equipment.

Mechanical restraints may be used under the following circumstances:

- When transporting inmates.
- When there is a reason to suspect an inmate may engage in violence, where bodily injury may occur, based on present behavior or apparent emotional state.
- Under medical advice to prevent the inmate from suicide or self-inflicted serious physical injury.
- Under no circumstances shall mechanical restraints be used for punitive purposes. When mechanical restraints become necessary, no restraint equipment shall be placed about the neck nor applied in any way as to inflict physical pain, undue physical discomfort, restriction of blood circulation, or breathing.
- Restraint equipment shall not be used to secure an inmate to a stationary object except as a temporary measure. During transport, an inmate shall not be secured by any keyed locking device or equipment to any part of the transporting vehicle.
- When mechanical restraint is required, handcuffs alone or attached to a waist chain shall be the usual method. Other specialized restraints, such as leg irons or additional chains, may be permitted only when it appears that immediate circumstances exist to justify the use of such mechanical restraints.
- For application of restraint gear on pregnant inmates refer to Care, Treatment, and Security of Pregnant Offenders, DOM 54045.11.

Note: The use of specialized mechanical restraints shall be documented except when an inmate is being transported outside the institution.

52050.11 Loss of Handcuffs/Keys

Loss or the misplacing of handcuffs and/or keys shall be reported immediately to the employee's supervisor, who shall notify the watch commander. A written report shall be submitted by the responsible employee.

52050.12 Application

For application of restraint gear refer to Transportation, DOM 55060.

52050.13 Restraining a Private Citizen

The use of mechanical restraints (handcuffs) to physically restrain or control a private citizen on institutional grounds is authorized only when an arrest is being made for a misdemeanor or felony. A supervisor shall evaluate the necessity to apply mechanical restraints prior to their use unless the citizen attempts to flee, escape, or physically refuses to submit to arrest. Once the

private citizen has been restrained with handcuffs they shall remain cuffed until a disposition has been made by the local police authority.

52050.14 Search Policy

All managers and supervisors shall ensure their subordinates are aware of and comply with this search policy. Searches include:

- Unannounced and irregular timed searches of cells, dormitories, and living areas, inmates, residents, and their work and assignment areas.
- Frequent search and careful supervision of inmate workers both inside and outside the security area.
- Inspection of all vehicular traffic, supplies, packages, and mail entering the institution.
- Use of metal detectors wherever feasible.
- Complete search and inspection of each cell or living area prior to occupancy by a new inmate.
- Avoidance of unnecessary force, embarrassment, or indignity to the person being searched.
- Written authorization by the Warden or designee to conduct searches of visitors and their property.
- Compliance with the Public Safety Officer's Bill of Rights, GC 3300.
- Post orders describing minimum search frequency requirements, authority, and method for accomplishment.
- A walk-through metal detector at the facility entrance building to inspect all persons visiting the institution (community re-entry facilities are excepted).

52050.15 Search of Employees

As with all persons who come on the grounds or into the institutions and facilities of the Department, all persons employed by the Department are subject to inspection and search of their person, property, and vehicles, to the extent deemed necessary by the official in charge. Consent to search is a condition of employment which may not be withdrawn while in or on the grounds of an institution or facility of the Department.

- The appropriate supervisor/administrator shall inform each new employee of departmental consent to search policy.
- An employee may be subjected to a more intensive search than is normally required when the official in charge has reasonable suspicion that the employee is involved in the unauthorized or unlawful possession or movement of anything into or out of an institution or facility of the Department. Such an intensive search may include the employee's person, vehicle, and any locker, desk, or storage space assigned to or used by the employee.
- When the intensive search includes the employee's assigned locker, desk, or storage space provided by the Department, it shall be searched in the employee's presence, or with his/her consent, or with prior notification that a search will be conducted, or after a valid search warrant has been obtained. Whenever possible the employee shall be present during the search.
- When an employee is subjected to a more intensive search than is normally required, the employee shall be informed of the reason for the search and of the name of the official ordering the search before the search begins.
- Any search of an employee's person which involves the touching of the employee's clothed body or visual inspection of the employee's unclothed body shall be conducted in private and out of the sight and hearing of other employees and inmates. Such searches shall only be conducted, observed, and supervised by officials of the same sex as the employee.
- An intensive search of an employee's person, property, or vehicle shall be conducted by not less than two officials, at least one of whom shall be of a supervisory rank to assume official responsibility for the search.
- The intensive search of an employee's person, property, or vehicle shall be verbally reported to the administrator of the institution or facility or to the duty officer immediately upon completion of the search. This shall be followed with a written report to the administrator and an incident report to the Director if the search discloses or confirms any suspected criminal activity.

52050.16 Searching Inmates - Housing Unit

Post orders shall require that a minimum of three cells, rooms, dorms, or living areas in each housing unit is searched daily on each of the second and third watches by the assigned unit officer.

Insofar as possible, a cell, room, dorm, or living area and locker shall be searched immediately upon its vacancy and again, if there is a significant time lapse, before it is reassigned. Such inspections are required and shall be recorded for segregation, Disciplinary Detention, and SHU cells.

Every reasonable precaution shall be taken to avoid damage to personal property and to leave the inmate's quarters and property in good order upon completion of the search.

52050.16.1 Work and Non - Housing Area

Teachers, work supervisors, and instructors shall make a daily security and contraband search of the areas they supervise. Custody officer post orders shall require ongoing search each day and a thorough search of each inmate, work area, assignment shop, and classroom once each week.

Inmates are subject to an inspection of their person either clothed or unclothed when there is reasonable suspicion that the inmate may have unauthorized or dangerous items or substances concealed on their person. Such inspection may also be a routine requirement for inmate movement into or out of high security risk areas. Random or spot-check inspections of inmates shall occur as a means to prevent the possession and movement of unauthorized and dangerous items and substances into, out of, or within the facility.

52050.16.2 Reasonable Suspicion

A clothed body search may be initiated when there is reasonable suspicion based on articulable facts, circumstances, and rational inferences that a person has committed, is committing, or is about to commit a crime.

52050.16.3 Clothed Body Search of Male Inmates

Custody post orders shall require random clothed body searches of inmates, or when reasonable suspicion is established. Random search should be no more frequent than necessary to control contraband or to recover missing or stolen property; however, the routine search of inmates entering or leaving certain specified areas is not precluded.

- All institution staff are responsible for conducting random searches.
- This is a basic search alerting staff to possession of weapons or other serious contraband.
- A search shall be conducted with the inmate facing away from the staff member.
- Staff shall search inmates from the top of their head to the bottom of their feet, including shoes, all pockets, seams, and personal effects.

52050.16.4 Clothed Body Search of Female Inmates

Revised July 1, 2015

Body search procedures for clothed female inmates recognize, address, and minimize the effects of cross-gender contact inherent in the body search process by limiting this function to female correctional staff unless an emergency exists that threatens death, inmate escape, or great bodily injury to staff, inmates, or visitors.

Custody post orders shall require random clothed body searches of inmates, or when reasonable suspicion is established. Random search should be no more frequent than necessary to control contraband or to recover missing or stolen property; however, the routine search of inmates entering or leaving certain specified areas is not precluded.

- This is a basic search alerting staff to possession of weapons or other serious contraband.
- A search shall be conducted with the inmate facing away from the staff member.
- Staff shall search inmates from the top of their head to the bottom of their feet, including shoes, all pockets, seams, and personal effects.

Clothed Body Searches of female inmates shall be conducted by female correctional staff only, except in emergency situations as follows:

- When circumstances exist that require an immediate search of a female inmate in order to avoid the threat of death, escape, or great bodily injury to staff, inmates, or visitors; and only until sufficient numbers of female correctional staff are available to assume critical body search duties.
- Clothed Body Searches performed by male correctional staff during the emergency circumstances described above shall sweep the inmate's breast and genital area with the back of the hand for the purpose of discovering contraband directly related to the threat posed by the emergency. If cause exists for a more thorough search, the female inmate shall be detained until a female correctional staff member is available to conduct the search.

- At any time a male correctional staff member conducts a pat-down search of a female inmate, the search shall be documented. This documentation shall be completed utilizing a Notice of Unusual Occurrence which shall be reviewed by the supervisor and routed to the institutional PREA Compliance Manager (PCM). The PCM shall retain the completed document, in accordance with the Records Retention Schedule, for audit purposes.

Under no circumstances shall male correctional staff perform non-emergency clothed body searches of female inmates.

52050.16.5 Unclothed Body Search of Inmates

Revised July 1, 2015

Unclothed body searches:

- Correctional personnel, other than qualified medical staff, shall not conduct unclothed body inspections or searches of an inmate of the opposite sex, except in an emergency.
- Inmates assigned to designated areas, (i.e., vocational programs, industries, plant operations, warehouse, outside crews, etc.), may be subject to unclothed body searches before returning to the institution's general population.
- Routine unclothed body searches shall be conducted in a safe manner and in an area that allows the inmate to preserve some measure of dignity and self-respect. Routine unclothed body searches shall not be completed by staff of the opposite biological sex.
- The inmates shall be required to remove all articles from their pockets. All articles shall be inspected by staff. If it is suspected that an inmate is in possession of dangerous contraband, the inmate shall be detained and closely observed until there is sufficient staff to conduct a "safe" search. In this circumstance, the staff member conducting the search shall initially conduct a clothed body search and remove all articles from the inmate's person rather than allow the inmate to remove them.
- The inmate shall then completely disrobe. Staff shall inspect and search each item of clothing and visually inspect the inmate's body.
- The inmate shall face the staff member who shall visually inspect the inmate's hair, ears, mouth, nose, body, armpits, hands, scrotum, genitals, and legs. The inmate shall turn away from staff upon instruction and staff shall then inspect the inmate's back, buttocks, thighs, toes, bottom of the feet, and lastly, the anal area by having the inmate bend over, spread the cheeks of their buttocks, and cough.
- Unclothed body searches of inmates by staff of the opposite biological sex shall only be conducted in emergency situations. If a cross gender unclothed body search is required, the search shall be documented. This documentation shall be completed utilizing a Notice of Unusual Occurrence which shall be reviewed by the supervisor and routed to the institutional PCM. The PCM shall retain the completed document, in accordance with the Records Retention Schedule, for audit purposes.

52050.16.6 Unclothed or Clothed Body Search of Inmates in Enhanced Outpatient Program Administrative Segregation Hubs and Psychiatric Services Units

Effective January 30, 2015

- Inmates shall be subject to an unclothed body search as described in Section 52050.16.5 upon their initial placement into designated Enhanced Outpatient Program Administrative Segregation hubs and Psychiatric Services Units.
- Unclothed body searches shall be conducted within the cell unless the physical design prevents visibility, at which point the inmate will be escorted to an alternate private/secure setting where the unclothed body search will be conducted.
- Inmates exiting the unit will be subject to an unclothed body search as described in Section 52050.16.5 and scanned with a metal detector.
- Inmates returning to the unit who have been under constant staff supervision shall not be subject to an unclothed body search but shall be subject to a clothed body search as described in 52050.16.3 and scanned with a metal detector.
- Inmates removed from their cell for routine activity in the unit shall be subject to a clothed body search as defined in 52050.16.3 and scanned with a metal detector.
- When circumstance exists that would lead an objective, trained, and competent Correctional Officer to believe it is necessary, he or she can perform an unclothed body search as described in 52050.16.5. These searches shall be noted on the CDC Form 114-A, Inmate Segregation

Record. These searches shall only be conducted when necessary to control contraband or recover missing or stolen property.

52050.16.7 Unclothed and Clothed Body Searches of Transgender or Intersex Inmates

Effective July 1, 2015

In the event that there is an individual going through Receiving and Release (R&R) who self-identifies as transgender or self-identifies with a gender that seems not to match their biological sex, the search will be conducted by staff of the same biological sex as the inmate to be searched.

In the event that an individual's genital status is ambiguous, the search shall be conducted by a staff member that is the same biological sex as indicated in the inmate's records. (i.e., paperwork indicates male, inmate will be searched by a male staff member).

If staff are unable to determine the genital status through medical records or an interview with the inmate, the inmate shall be placed on single-cell status or in administrative segregation; for his/her safety, until the standard intake medical evaluation is completed. This standard medical examination will establish the genital status of the inmate. Once the information is collected and documented on the CDCR Form 128-C3, the Institution Classification Committee should determine appropriate classification and housing placement.

Many inmates consider their sexual orientation and gender identity to be private information, and the widespread knowledge of this information could impact the safety and well-being of sexual minorities such as lesbian, gay, bisexual, transgender and intersex (LGBTI) inmates. This information is considered sensitive and should be handled in a confidential manner. The information should only be communicated to staff when there is a justified "Need to Know". This information should never be communicated to other offenders. This will protect the rights and safety of the involved inmate.

52050.17 Clothed Body Search of Visitors

Any person coming onto the grounds of any Department facility or camp or any Department contracted facility, is subject to having their person, vehicle, and articles of property in their possession searched. Visitors to such a facility are subject to a routine inspection of their persons, vehicles, and any personal property in their possession. Such inspections shall be made to the degree consistent with the facility's security needs.

When peace officer staff determine that there is reasonable suspicion that the visitor is engaged in criminal activity including, but not limited to, the smuggling of unauthorized items or substances in or out of the institution, the visitor may be subjected to a thorough clothed body search.

- Each correctional facility shall provide for the posting of a warning sign, in English and Spanish, at the entrance onto the property stating: "Entrance constitutes consent of search of visitor's person, property, or vehicles."
- For detail information for searching inmate visitors, refer to DOM 54020.
- Contraband that has been seized as evidence in a search of a person, other than an inmate, shall be turned over to the responding law enforcement agency.
- A visitor may refuse to submit to an inspection or search. A refusal shall result in the visitor being denied entrance to the facility.

If there is reasonable suspicion that the person is engaged in felonious activity and that evidence of such crime may be destroyed or disposed of if a search is not immediately conducted, the peace officer, with the concurrence of the watch commander, may detain the person and the property or vehicle to be searched until such time as a search warrant can be obtained. In all such cases the Warden or their designee will be immediately advised of the circumstances and a decision made about the course of action to be pursued.

52050.18 Family Visit Search

Visitors to family visiting units shall be searched to ensure that no contraband or unauthorized items enter the institution grounds.

- During processing of inmate visitors, all authorized items to be brought into the institutional family visiting area shall be thoroughly searched.
- Items which are not authorized shall not be allowed inside the institution and shall be secured off the institutional grounds by the visitor.
- In the event felonious contraband (weapons, narcotics, etc.) is discovered in the possession or in the property of a visitor, procedure as described in DOM 52050.17 shall be followed.

52050.19 Body Cavity Search

Correctional personnel, other than qualified medical staff, shall not conduct a search of an inmate's body cavities, other than visual or metal detector inspections. The search shall be conducted in a medical setting and any physical intrusion into body cavities shall be performed by a physician.

52050.19.1 Probable Cause

A body cavity search of inmates shall only be initiated when there is probable cause to believe the person has secreted contraband within a body cavity. Prior to initiation and before each escalation of the search, the individual shall be given ample opportunity to voluntarily remove or surrender the contraband. Probable cause may be established by:

- Reliable confidential information.
- Irregularities found in the body cavities.
- Detection of contraband on the person.

Note: Probable cause is not dependent upon the outcome of the search.

52050.19.2 Authorization to Search

Authorization to initiate a body cavity search requiring any degree of intrusion shall be given by the Warden or designee after consideration of all information relating to probable cause.

52050.19.3 Supervision of Searches

All searches other than an initial visual or metal detector inspection and each progressive step shall be under the general supervision of a supervisory staff member not less than the level of lieutenant.

52050.19.4 Oral Cavity Searches

When an inmate is suspected of having secreted contraband in their mouth or attempts to swallow the evidence, no attempt shall be made to retrieve the contraband by force. A choke hold or any other physical restraint which prevents the person from swallowing or breathing shall not be used. If probable cause exists that evidence has been swallowed and that it is retrievable in usable form, the search process may be intensified as provided in this Article, (see Contraband Surveillance Watch).

52050.19.5 Methods

In conducting any search of an inmate's body cavities, all persons involved shall be sensitive to the personal dignity of the individual and the individual's right to privacy of their own body. However, such rights may be abrogated to the extent necessary to preserve the security of the institution and the safety of persons.

52050.20 Degrees and Types of Searches

The degree and intensity of the search shall be that least required to bring the search to a conclusion. As the search progresses, with each new piece of evidence to support the presence of contraband, the person shall be given ample opportunity to voluntarily remove and surrender the contraband.

The types of searches include:

- Visual and metal detector searches.
- X-ray examinations.
- Physical intrusions by a physician.
- Physical isolation and observation.

52050.21 X-Ray Examination

X-ray examinations for the purpose of confirming the ingestion of contraband or concealment of contraband in body cavities shall be utilized only upon approval of a medical doctor and under the same medical requirements and precautions as apply to x-ray examinations for other medical reasons. An x-ray examination shall be ordered and interpreted only by a physician, who shall make the following determinations:

- Whether or not a foreign object(s) is within the inmate's body.
- A determination, if possible, of the nature of any foreign object(s).
- The effects of forcible removal or failure to remove the foreign object(s) upon the inmate's health and safety.
- Recommendations for consideration regarding the least intrusive way to retrieve the contraband.

52050.22 Forcible Retrieval

The forcible retrieval of contraband by intrusion into the inmate's body shall be avoided except as follows:

- When a medical doctor has determined that failure to remove the contraband presents an imminent danger to the life of the inmate.
- The contraband is clearly identifiable and constitutes an imminent threat to the security of the institution or the safety of other persons.

- The contraband cannot be retrieved by any less intrusive or forcible manner.
- Surgery. Surgical removal of contraband from the body of an inmate shall be the decision of the institution's CMO, and in keeping with rights of the individual as would apply in any other surgical process.

52050.23 Contraband Surveillance Watch

The objective of placing an inmate on Contraband Surveillance Watch (CSW) is to retrieve concealed contraband without physical intrusion if possible; ensure that contraband is not circulated into the inmate population; and ensure the safety of the inmate suspected of having the concealed contraband.

When it becomes apparent through medical examination, direct observation, or there is reasonable suspicion that an inmate has concealed contraband in their body, either physically or ingested, and the inmate cannot or will not voluntarily remove and surrender the contraband, or when a physician has determined that the physical removal of contraband may be hazardous to the health and safety of the inmate, the inmate may be placed in a controlled isolated setting on CSW under constant visual observation until the contraband can be retrieved through natural means, or is voluntarily surrendered by the inmate.

This natural digestive process shall be used as an alternative to forcible intrusion into body cavities or surgery when a medical doctor determines that the natural method is feasible and does not pose a hazard, clear and present danger, or imminent threat to the inmate's health and safety. Each institution shall provide their respective Associate Director (AD) and Investigative Services Unit (ISU) a weekly CSW report (CSW Tracking Report). The CSW tracking report is due at noon each Monday (or next business day if the Monday falls on a holiday) and shall cover the period of the previous week (Monday thru Sunday). This report shall reflect all inmates on CSW for that period. The information contained in this report shall be forwarded by California Department of Corrections and Rehabilitation (CDCR) Headquarters' staff to the Office of the Inspector General on a weekly basis.

52050.23.1 Authorization and Approval

The request to place an inmate on CSW shall be made by the on duty Watch Commander, and approved at the level of Captain or above during business hours, or by the Administrative-Officer-of-the-Day (AOD) during non-business hours, on weekends or holidays.

Normally, inmates should be retained on CSW for a period of 72 hours, or until the inmate has provided at least three bowel movements free of contraband. When it is determined by medical or custodial staff that the inmate may still be in possession of contraband at the conclusion of the 72-hour time period, a search warrant, in cases where probable cause exists, shall be generated to retrieve the contraband. The search warrant shall be authorized at the level of Warden or Chief Deputy Warden (CDW). If a valid search warrant/court order is obtained, the contraband retrieval process shall be conducted in accordance with the warrant/court order; California Code of Regulations (CCR), Title 15, Section 3287(b)(5); and Department Operations Manual (DOM), Section 52050.19.

Retention of an inmate on CSW for a second 72-hour period may only be authorized by the Warden or CDW. Retention of an inmate on CSW beyond six days may only be authorized by the Director, Division of Adult Institutions (DAI) or Deputy Director, Facility Operations, DAI.

The justification for each 72 hour CSW extension (e.g., the inmate only had one bowel movement within the 72 hours) shall be clearly articulated and reflected on a CDC Form 128B General Chrono. The CDC Form 128B shall be generated by the manager responsible for the area in which the inmate is currently housed. The reason for the 72-hour extension shall also be noted on the weekly CSW tracking report.

CSW Placement/Retention Approval Matrix

CSW PERIOD	APPROVAL LEVEL
First 72 hrs	Captain or above
Second 72 hrs	Warden or CDW
Seven days or more	Director, DAI/Deputy Director, Facility Operations, DAI (72 hour increments)

Note: All CSW Placement/Retention approval periods will be in 72 hour increments.

52050.23.2 Isolated Settings

Inmates on CSW shall be placed on Administrative Segregation status in accordance with CCR, Title 15 Sections 3335 and 3336, issued a CDC Form 114D, Administrative Segregation Unit Placement Notice, and housed in an isolated setting for the duration of the CSW to meet the objective of

retrieving the concealed contraband. The CDC Form 114D shall be issued by the official ordering the CSW placement and a copy distributed, within 24 hours of the placement, to the Warden, Captain responsible for the initial review of CDC Form 114D, and institution ISU. The Warden's office shall ensure that a copy of the CDC Form 114D is forwarded to the respective AD by the first business day subsequent to the issuance of the CDC Form 114D.

Upon receipt of the CDC Form 114D, ISU staff shall conduct a review of the CSW placement to determine the viability of obtaining a search warrant to retrieve the contraband. If a search warrant to retrieve the contraband is deemed appropriate (i.e., probable cause established, etc.), ISU staff shall prepare a search warrant as directed by the Warden or CDW. An x-ray request shall be part of the search warrant. The search warrant shall be sent to the court/judge for resolution directly after the initial 72 hours of the inmate's CSW placement has elapsed.

The isolated setting shall be a cell that can provide the necessary security precautions of the institution/facility and large enough to accommodate a fully extended sleeping mattress. This setting may be in a general population area or in a segregated housing unit of the institution (i.e., Administrative Segregation or Security Housing Unit).

In a medical emergency situation, or when it is determined by a physician or other medical personnel (e.g., Physician Assistant, Nurse Practitioner, Registered Nurse) that the concealment of the contraband poses an imminent threat to the inmate's health and safety, the inmate shall be placed in a medically approved isolated setting in a Correctional Treatment Center, Outpatient Housing Unit, or General Acute Care Hospital. In such cases, the security and custodial supervision, and CSW responsibilities shall remain with the custodial personnel assigned to CSW detail under the direction of the Watch Commander. The isolated setting/cell's lights should be dimmed, as possible, during normal hours of darkness, if such action does not adversely impact staff's ability to observe and monitor the inmate.

52050.23.3 Placement in Isolated Setting

Prior to the inmate being placed on CSW in the isolated setting, the following shall be accomplished:

- The Watch Commander shall ensure that a medical assessment of the inmate is completed by a physician or other medical personnel (e.g., Physician Assistant, Registered Nurse, Licensed Vocational Nurse) prior to the inmate's placement on CSW. The medical assessment and the results shall be documented on a CDCR Form 7219, Medical Report of Injury or Unusual Occurrence.
- A CDC Form 114A, Inmate Segregation Record, shall be generated and maintained while the inmate is on CSW.
- The inmate shall be given an unclothed body search (see DOM, Section 52050.16.5).
- The isolated setting shall be thoroughly searched and cleaned.
- All moveable objects in the isolated setting shall be removed (except a mattress, blanket (from 2000 hrs to 0800 hrs) and stationary fixtures).
- The toilet (when present in the isolated setting) shall be covered in plastic and taped closed with the water turned off (if applicable).
- Female inmates shall be placed in a jumpsuit or two piece slip-on shirt and pants, one brassiere, one pair of panties, and one pair of socks. As an added method of security, inmates may be placed in two jumpsuits with the openings placed/worn in the opposite direction of each other.
- Male inmates shall be placed in one pair of boxer shorts, one T-shirt, and one pair of socks, or an approved jumpsuit or two piece slip-on shirt and pants with or without a T-shirt or boxer shorts. As an added method of security, inmates may be placed in two pairs of boxer shorts or two jumpsuits with the openings placed/worn in the opposite direction of each other.
- The legs and waist of the boxer shorts or slip-on pants and/or the arms and legs of the jumpsuit shall be taped closed to restrict the inmate's access to their body cavities. Tape should never be applied in a manner to restrict circulation nor directly over the inmate's skin.

The inmate shall remain under constant visual observation at all times while on CSW. Inmates on CSW shall be checked by a correctional supervisor (Sergeant or above) once a shift. The purpose of this check is to determine the inmate's wellbeing and ensure staff's adherence to the CSW policy. All supervisory checks/reviews shall be documented on the inmate's CDC Form 114A.

52050.23.4 Mechanical Restraints

The inmate shall be placed in handcuffs attached to a waist chain while on CSW. Leg restraints may be used in cases where custody staff determines the inmate poses a threat to the safety of himself and/or others, in accordance with CCR, Title 15, Section 3268.2 Use of Restraints.

Use of mechanical restraints on persons confirmed, or suspected by health care staff to be pregnant shall be subject to the following requirements (see also CCR, Title 15, Section 3268.2(e)):

- No leg restraints or waist chains shall be applied.
- If handcuffs are applied, the person's arms shall be brought to the front of her body for application.

Mechanical restraints shall not be placed on an inmate during labor, including during transport to a hospital, during delivery, and while in recovery after giving birth, unless circumstances exist that require the immediate application of mechanical restraints to avoid the imminent threat of death, escape, or great bodily injury. If such a threat exists, mechanical restraints may be used only for the period during which such threat exists (see CCR, Title 15, Section 3268.2(c)(5)). Four point restraints may be authorized when an inmate is disruptive or combative in accordance with CCR, Title 15, Section 3268.2 (c), and when approved by the Chief Medical Executive (CME) or their designee. The use of four-point restraint equipment shall be documented in the inmate's Uniform Health Record (UHR) in accordance with CCR, Title 15, Section 3268.2(f).

Hand Isolation Devices (HID) may be used at an institution when authorized, in writing, by the Warden or CDW. HIDs shall be purchased from an approved vendor only. Prior to placing a HID on an inmate confirmed, or suspected by health care staff to be pregnant, a physician shall be consulted and any potential risks fully discussed. The final decision to place the device on the inmate shall rest with the Warden or CDW and the reviewing physician. The consultation and its outcome shall be documented for inclusion in the inmate's health care record and central file. Inmates placed in a HID shall remain under constant and direct visual supervision at all times. In instances where a HID is used, staff shall update the inmate's CDC Form 114A to reflect usage times and correlating actions (e.g., 1200 hrs - One HID was removed allowing the inmate to eat lunch). Equipment Hygiene - HIDs shall be cleaned and sanitized on an ongoing basis (e.g., If soiled after a bowel movement, after termination of the CSW, etc.). In order to provide range of motion to a restrained extremity, a CSW inmate should be allowed free movement of each arm and leg at least once on 2nd and 3rd watch. Each restrained extremity should be released for a free movement period of at least 5 minutes on 2nd and 3rd watch. As appropriate to the situation, only one extremity need be released at a time. The application of additional restraints (e.g., Leg Irons, HID, etc.) other than handcuffs and waist chain shall be documented on the inmate's CDC Form 114A.

52050.23.5 Health and Safety Concerns

The inmate may be subjected to an x-ray examination in accordance with DOM, Section 52050.21 prior to their placement on CSW, and then again, thereafter, when it is determined to be necessary by the Chief Medical Executive (CME) or a physician. During the course of the CSW, if for any reason custodial staff observes a decline in the inmate's health, or it is believed that the inmate's health is affected by the concealed contraband, medical personnel shall be immediately contacted to conduct an assessment of the inmate's condition. In a medical emergency situation, the CME may authorize a physician to perform an intrusive search and remove the contraband in accordance with DOM Section 52050.19 and CCR, Title 15, Section 3287 (b)(5).

In the event a CSW inmate is transferred to an outside medical facility, notification shall be given to the Warden or CDW (during business hours) or the AOD (during non-business hours). In cases where the CSW inmate is admitted to an outside medical facility, the institution shall notify the respective AD within one business day of the admission.

Personal hygiene is an essential tool to maintain a healthy environment within an institutional setting and therefore each institution shall establish a process in which a CSW inmate is given the opportunity to wash (soap and water) his/her hands after each use of the restroom, prior to eating a meal, or when necessary to ensure appropriate hygiene. Running water may be substituted with a portable alternative such as a hand basin filled with water. During the periods in which an inmate is allowed to wash his/her hands, staff must take care to prevent the inmate from disposing of any contraband.

Isolated Setting Hygiene - The CSW isolated setting/cell's cleanliness must be appropriately maintained while the inmate is on CSW.

52050.23.6 Equipment

The equipment required for contraband watch shall include, but is not limited to, the following:

- Flashlight
- Expandable Baton
- OC Pepper Spray
- Handcuffs with Key

- Waist Chain
- Leg Restraints (Based upon documented security need)
- Latex Gloves
- Disposable Mask
- Bed pan/portable toilet or toilet liner (clear plastic bag)
- Evidence Bags
- Tongue Depressor or Probe

CSW procedures shall be located within the assigned post orders, and on site for immediate referencing by staff assigned to observe the inmate on CSW. Institutions having a need to use alternate restraint equipment not reflected in DOM, Section 51020.6 must submit a request to their respective AD for review and approval. If the request is subsequently approved, the institution may then procure the equipment from an approved vendor only.

52050.23.7 Voluntary Bowel Movement

When the inmate requests to have a bowel movement, the custodial staff assigned to CSW shall:

- Request additional custody staff coverage. Only a staff member(s) of the same gender as the inmate shall monitor the bowel movement.
- Provide the inmate with toilet paper and a portable toilet, or use of the previously lined toilet in the isolated setting.
- Remove the necessary restraint gear to allow the inmate the ability to facilitate his/her bodily functions.
- Once the inmate has completed the bowel movement, the portable toilet or toilet liner shall be immediately retrieved or removed and the inmate will be re-secured in the restraint equipment.
- Using a tongue depressor or probe, the fecal matter shall be searched for any contraband. The assisting custody staff member shall maintain constant supervision of the inmate while the assigned Correctional Officer completes the search.
- The presence or absence of contraband shall be documented per institution procedure and on the inmate's CDC Form 114A.
- If contraband is discovered, the contraband shall be processed as evidence in accordance with institution procedures, and documentation of the contraband shall be completed in accordance with DOM, Section 51030, Crime/Incident Reports, and a Rules Violation Report shall be completed.

52050.23.8 Removal from Contraband Surveillance Watch

The inmate may be removed from CSW when it is reasonably believed that the contraband has been relinquished or it is determined the inmate is contraband free. The request for the termination of an inmate's placement on CSW shall be made by the on duty Watch Commander, and approved at the level of Captain or above during business hours, or by the AOD during non-business hours. A CDC Form 128B shall be generated by the staff member approving the CSW termination. The CDC Form 128B shall have, at a minimum, the date of CSW termination, the name and classification of the approving authority, and the findings relative to the contraband recovered. The date of CSW termination and the findings relative to the contraband recovered shall also be documented on the weekly CSW tracking report. All documentation (e.g., CDC Form 128B, CDC Form 114D, CDC Form 114A, etc.) relative to the inmate's CSW placement shall be maintained in the inmates Central File and institution's ISU office for the purpose of reference and audit.

52050.24 Documentation

The placement of an inmate on CSW shall be documented per institution procedures by the Watch Commander requesting the placement of the inmate on CSW in accordance with Section 52050.23.1 of this policy. Each employee assigned to the CSW detail shall document all activities related to the inmate on a CDC Form 114-A for the duration of the inmate's placement on CSW. This includes, but not limited to, all searches performed prior to and during the inmate's placement on CSW, meals, hygiene, bowel movements, health concerns, medications, etc. Each Correctional Officer assigned to the CSW detail shall sign in and out at the beginning and end of the CSW observation period on the CDC Form 114-A. The CME or their designee shall document all medical decisions or issues relating to the inmate during placement on CSW in the inmate's UHR. Complete and detailed documentation of all body cavity searches other than visual or metal detector inspections shall be submitted to the Warden or their designee for review.

The report shall include the following information:

- Chronology of events leading to the search and escalation of the search process.
- Name and rank of all persons participating in the search process or supplying information which justified the search.

- All evidence and information regarding the justification for each degree of the search.
- Results at the conclusion of the search.

52050.25 Vehicle Search - Visitors

Authorization to initiate a search of a visitor's vehicle may be given by the watch commander after consideration of all information relating to reasonable suspicion (Refer to DOM 52050.19.1). Supervision of suspect vehicle search shall be limited to the supervisory rank of sergeant or above. Documentation shall be in accordance with DOM 52050.24.

52050.25.1 Vehicles Adjacent to Institutional Property

If probable cause exists warranting the search of a vehicle parked adjacent to institution property, the watch commander shall be notified and the driver and/or occupants of the vehicle shall be detained until the local law enforcement agency has been contacted and has responded.

Upon arrival of the local law enforcement agency, the Department peace officer shall apprise the law enforcement officer of all circumstances establishing probable cause for the detention. The local law enforcement officer shall then determine if a search should be undertaken. The Department peace officer shall remain present and render assistance and provide appropriate written reports to the agency as required.

52050.25.2 State Vehicles

All State vehicles shall be searched prior to use to ascertain that the vehicle is contraband free. When entering or departing the security perimeter, the vehicle shall be thoroughly searched by the custodial gate officer.

52050.25.3 Non-State/Common Carrier Vehicles

All non-state or common carrier vehicles are subject to search when entering or departing the institutional grounds. All non-state or common carrier vehicles shall be searched entering or departing the security perimeter of the institution.

- A systematic approach is essential to a thorough search. An effective search of a vehicle shall include passenger and freight compartments, trunk, motor compartment, roofs, and the undersides. A more thorough search, including hubcaps, under dash, spare tire, etc., shall be conducted if circumstances warrant or there is reason to suspect the presence of contraband.
- All vehicles leaving the institution shall be thoroughly searched to minimize the possibility of an inmate being concealed therein. Barrels and loads of loose materials such as leaves, refuse, etc., shall be thoroughly probed with a rod.

52050.25.4 Employee Vehicles

Covered in DOM 52050.15.

52050.26 Parcel Searches

- All correctional staff shall ensure inmates do not have access to any packages, parcels, mail, or containers entering the security area of an institution prior to proper inspection for contraband.

All incoming packages/mail addressed to inmates shall be inspected in accordance with DOM section 54010, Inspection of Incoming Packages/Mail.

52050.27 Canine Unit

The California Department of Corrections and Rehabilitation (CDCR) canine unit is comprised of both illegal drug and contraband detection service dogs. Each departmental canine team is comprised of one certified canine handler and one certified canine service dog. All departmental service dogs shall be drug and/or contraband detection trained. Each canine team shall attend and successfully pass the Department's 280-hour course of training in drug and/or contraband detection. Upon successful completion, a drug detection service dog will be able to detect the presence of the odor of marijuana, heroin, cocaine, methamphetamine, and derivatives of these drugs. Contraband detection service dogs will be capable of detecting the presence of the odor of tobacco and cell phones. At the discretion of the Statewide Canine Coordinator, contraband detection service dogs may also be trained in the detection of drug odor. Each departmental canine handler and service dog shall be recertified annually by the Statewide Canine Coordinator.

All Air Scan Service Dogs must attend and successfully pass the Department's 120-hour course of training; upon successful completion the Air Scan Service Dog will be able to successfully complete air scans of individuals. Air Scan Service Dogs must complete the Department's 280-hour course of training in narcotics detection prior to attending the Air Scan Service Dog Academy. Only a Passive Response Certified Narcotic Detection Team with a minimum of six months of experience shall be considered for air scan training and certification.

Service dogs shall not be used for verification of suspected drugs. Such verification shall be performed in accordance with existing drug testing procedures.

The mission of the canine unit is to combat the introduction of illegal drugs and contraband into CDCR facilities and reduce the overall level of drug/contraband and criminal activity within the inmate population, thereby enhancing the safety and security of the institution.

Selection of canine handlers shall be based upon overall experience, honesty, maturity, dedication, and a professed affection toward dogs. Canine service dogs shall not be utilized for any purpose other than drugs/contraband detection (i.e., cell extractions, escape details, response to violent incidents, event control, etc.).

Only departmental assigned canine handlers shall handle departmental service dogs.

Responsibility

The Statewide Canine Coordinator is responsible for purchasing, selling, retiring, or transferring of all service dogs; and the training and coordination/utilization of all departmental canine teams. The Statewide Canine Coordinator shall also be responsible for ensuring all departmental canine teams are in compliance with established regulations and policies governing departmental canine unit operations.

Canine units are assigned to individual institutions and have a dual reporting structure. Each is part of a "Regional Unit," Northern, Central, or Southern Region based on geographical location. Direct supervision rests with the Investigative Services Unit (ISU) Lieutenant at the institution housing that canine team, and is responsible for daily Fair Labor Standards Act and staff accountability. The appropriate Regional Canine Coordinator maintains daily functional supervisory and scheduling responsibility for each canine unit. When the canine handler is not engaged in canine duties, the handler shall lend support with other ISU functions as needed.

Injuries to a Canine Handler

In the event a canine handler is injured during the performance of their duties and is unable to care for or provide control of his/her assigned service dog, another canine handler shall be called to secure the service dog. If another handler is not available, a non canine staff member shall be directed to secure the service dog into the institution's kennel facility until another canine handler can respond. At the earliest time possible, the service dog shall be transported to the Regional Canine Coordinator or Statewide Canine Coordinator until such time the assigned canine handler is able to care for the service dog, or the dog is reassigned.

Injuries to a Service Dog

Canine handlers shall avoid situations requiring the service dog to remain in their respective canine vehicles for extended periods of time. Temperature extremes can be detrimental to the service dog's health and in extreme cases may result in death. Whenever the canine handler leaves the vehicle unattended, all doors shall be secured. If the service dog is in the vehicle in mild or cool weather, the windows shall be rolled down, with lattice inserts in place. During hot, humid weather, the vehicle may be secured with the engine and air conditioning running and windows partially opened. Only vehicles equipped with "secure idle" may be left running while inside institutional grounds. In such cases, the vehicle shall be under direct observation (i.e., tower or front entrance/gate staff member). Extreme caution to inside vehicle temperature on hot days shall be exercised with welfare checks of the service dog conducted as needed, but at least every thirty (30) minutes.

In the event a service dog sustains a life threatening injury or ingests any quantity of known or suspected drugs, the canine handler shall immediately call the closest available veterinary hospital for care. The canine handler shall administer appropriate first aid procedures as applicable. The telephone number for the [American Society for the Prevention of Cruelty to Animals](#) Poison Control Center is available through the Statewide Canine Coordinator.

Veterinary

Each institution is responsible for identifying a veterinary clinic in their geographical area for providing emergency services as well as yearly examinations/vaccinations. Emphasis shall focus on a veterinarian experienced with providing care for service dogs. All departmental canines shall be examined and vaccinated yearly or as required by the attending veterinarian.

Accidental Bites

In all cases of a service dog biting any person(s), staff shall obtain immediate medical aid for the victim. A service dog bite is a reportable incident. The canine handler shall return the service dog to its assigned kennel on grounds

and complete a CDCR Form 837-C, Crime/Incident Report Part C – Staff Report, for submission to the appropriate reporting authority. ISU staff shall obtain photographs of the victim's injuries immediately following medical treatment. These photographs shall be treated as evidentiary material.

Armed Post

All correctional peace officers assigned as a canine handler shall be issued departmentally approved Glock Model G22 .40 caliber pistol with 3 magazines containing a total 45 rounds of ammunition and equipment consistent with department policy.

Weapons shall be stored in an approved gun locker at the base of the appropriate weapons tower for accessibility 24 hours a day. A CDCR Form 656, Armory Entrance and Exit Log, shall be maintained and placed inside the gun locker for accountability purposes. A log entry, reflecting the handler's name, date, time out/in, and reason for drawing the weapon shall be completed by the canine handler each time the weapon is accessed.

Canine handlers issued side arms shall be armed during off site operations and while transporting their assigned service dog off institutional grounds. When at home, or away from the institution overnight, all weapons shall be secured in accordance with State and federal laws. A trigger guard shall be applied in order to safely secure the weapon.

Canine Vehicles

Due to the need for canine handlers to safely transport their assigned service dog, suitable State vehicles will be assigned to each handler. The vehicles shall be full/mid-sized sedans or Sport Utility Vehicles (SUV's). The vehicle shall be modified by removing the rear seats and installing a platform covered with a water proof material along with an anti-skid covering. The front driver's compartment and the rear passenger compartment shall be divided by an expanded metal partition to keep the service dog secured in the rear of the vehicle and ensure adequate ventilation in the rear of the vehicle. Pre-built/manufactured canine inserts may also be used. Canine vehicles shall be equipped with an ignition override system; such as "Secure Idle," as well as heat monitoring systems to ensure the safety of the canine. All handlers shall complete the standard home storage permit applications in accordance with departmental policy.

Home Kenneling

Service dog(s) shall be maintained at the respective handler's residence and permitted to socialize with the handler's family. This fosters good social behavior in the service dog.

- When on vacation or away for extended periods of time the service dog shall be kenneled with another handler or in a suitable departmental kennel. California State Prison-Solano and California Institution for Men have kennels which are suitable for extended kenneling. The appropriate Regional Canine Coordinator shall be apprised anytime a departmental canine requires kenneling.
- Service dogs maintained at a handler's residence shall be appropriately kenneled. A kennel shall be purchased at the expense of the home institution and measure approximately 5 feet wide, 10 feet long, 6 feet high with sanitizable flooring, i.e., composite flooring, concrete, etc. with a shade panel over the top and securable with a padlock. The handler shall clean the kennel daily.
- All food, cleaning supplies, and items necessary for home care of the service dog shall be provided by the institution and maintained at the handler's residence.
- Transportation of service dogs shall be via an appropriately equipped State vehicle only.
- The assigned State vehicle shall not be parked on a public street when stored at the canine handler's residence.
- Handlers are encouraged to garage or cover the vehicle when not in use in order to avoid any undue attention to the vehicle.

Obedience Training

Obedience training shall be conducted separate from detection scent training. Obedience training shall be conducted to the extent necessary for the assigned canine handler to adequately control his/her service dog in unfamiliar settings. At no time are electronic collars (bark collars) allowed to be used without the approval of the Drug Interdiction Lieutenant.

Scent Training

Scent training shall be conducted annually, quarterly, and at the discretion of the Statewide Canine Coordinator assuring each service dog's competency. All training shall be appropriately documented in each service dog's training records.

A canine handler is required to have narcotic training aids inventoried by the Regional Canine Assistant Coordinator and/or Statewide Canine Coordinator on a quarterly basis. Unannounced inventory inspections may be conducted at any time. A canine handler shall report any lost or spilled training aids. A copy of the Narcotic Training Aid Log shall be forwarded to the Institutions ISU Lieutenant, Regional Canine Coordinator, and/or Statewide Canine Coordinator. Each canine handler is required to complete a canine Narcotic Training Aid Log. This log is to be completed each time a training aid is used to ensure that no training aids are inadvertently left at a facility. This form shall be sent to the Statewide Canine Coordinator on a monthly basis.

Annual Canine Certification

Each Departmental canine handler and service dog shall complete and pass the CDCR Canine Academy prior to using a canine in the performance of duty. This certification shall meet the guidelines set forth by the California Peace Officers Standards and Training (POST). Each canine handler and service dog shall be recertified annually by the Statewide Canine Coordinator. Certifications shall consist of the following:

- Exterior vehicle search.
- Interior vehicle search.
- Individual search (drug detection canine only) (Air Scan)
- Individual article search.
- Inside building search.

Distraction aids may be used in any or all of the certification searches.

The canine team shall be capable of detecting marijuana, heroin, cocaine, and methamphetamines in vehicle interior/exterior, buildings, persons, and on articles of property. The canine handler shall be able to recognize the canine's alert and response. The canine handler's call as to the location of the aid shall be as specific as possible. The canine handler will reward the canine for a positive response only after confirmation on the location of the aid has been given by the certifying trainer/instructor. Training shall include and emphasize the importance of understanding both human and human-dog social cognitive factors in applied situations to prevent any false positive alerts. Each canine team shall complete all phases of certification (pass or fail).

Certification will be scheduled for two consecutive days at a location specified by the Statewide Canine Coordinator. If a canine team fails certification, remedial training shall be the responsibility of the trainer. The canine team shall be rescheduled for certification one week following the failed certification. In the event the canine team fails to certify at the second certification, training shall be scheduled one week after the failed certification and supervised by the Statewide Canine Coordinator. At the third scheduled certification, if the canine team fails to certify, the Statewide Canine Coordinator shall conduct an administrative review of the certification process used and the team's performance. Failure to certify is cause for removal from the canine program.

Canine Handler Equipment

The following list of equipment shall be issued to canine handlers and replaced as needed by the home institution:

- Six foot leash with snap clasp
- Fur saver choke collar
- One and one half inch flat leather collar
- Stainless steel food pan
- Stainless steel water pan
- Stainless steel water bucket
- Spill proof vehicle water bowl
- Jute Tug Toy (3)
- Kong rubber ball (2)
- De-shedding comb
- Kennel crate
- Traffic Lead

Mutual Aid

Departmental canine teams are available for both interdepartmental and outside law enforcement. All requests for canine unit assistance from institutions shall be made through the appropriate Regional Canine Coordinator who will evaluate the scope of the operation and deploy adequate canine resources.

CDCR institutions, the Office of Correctional Safety, the Office of Internal Affairs, and parole units have priority over outside law enforcement agency requests for mutual aid in the use of canine teams. The Statewide Canine

Coordinator holds the ultimate responsibility for the deployment of canine teams. The use of canine units shall be prioritized as follows:

- **First Priority:** Intelligence based institutional searches. Authorization by ISU Lieutenant and/or Institutional Warden with operational coordination between the ISU Lieutenant and the Regional Canine Coordinator.
- **Second Priority:** Random institutional searches. Authorization by the Institution Warden with operational coordination between the ISU Lieutenant and the Regional Canine Coordinator.
- **Third Priority:** Parole unit requests. Coordinated through the Regional Canine Coordinator with authorization from the Institution Warden and notification to the Statewide Canine Coordinator.
- **Fourth Priority:** Outside law enforcement agency requests. Coordinated through the Regional Canine Coordinator with authorization from the Institution Warden and Associate Director, General Population Males, or designee with notification to the Statewide Canine Coordinator.

Upon approval of the parole unit or outside law enforcement assistance the following shall apply:

- CDCR's canine unit's sole purpose during off site operations is to conduct searches of targeted areas using their assigned service dogs. Searches of persons under the jurisdiction of the Department are permissible. Searches of citizens not under the jurisdiction of the Department shall not be conducted without the existence of articulable probable cause or a search warrant for the search of a specific citizen.
- Canine unit staff shall not involve themselves in the outside law enforcement efforts in the securing of the search area and shall remain outside the targeted area until such time the residence or building has been secured.
- All occupants of the search area shall be cleared from the area to be searched to ensure there is no contact with the service dog(s).
- Prior to conducting any search, canine unit staff shall visually check the area to be searched to ensure there are no illegal drugs or dangerous items in plain sight that may cause injury to the dog. During the actual search, the canine handler is responsible for identifying any area the service dog alerts to. During the course of a search, the canine handler shall not retrieve any drugs or contraband discovered, unless absolutely necessary.
- Subsequent to the canine team completing their portion of the search, designated staff shall perform a tactile (hands on) search of the areas where the service dog alerted.
- Within 24 hours of the search operation, or no later than the close of business the following business day, a report is to be submitted and routed to the appropriate Warden, Regional Canine Coordinator, Statewide Canine Coordinator, and the Associate Director, General Population Males, documenting the details of the search to include a description of any drugs/contraband discovered during the search.
- When utilizing the service dog(s) outside and pursuant to a search warrant, the respective canine handler shall use his/her assigned service dog in a manner within the scope of the search warrant.
- When available, a minimum of two canine teams shall be deployed. This allows for larger areas to be searched and maximum utilization of the service dog in a shorter period of time.
- Drug service dogs shall be used in requests for probable cause purposes.
- Canine staff responding to a call-out or emergency shall be required to report in appropriate uniform.
- Overtime costs shall not be incurred without approval of the appropriate Warden or designee. The canine handler shall complete a detailed report upon completion of the search. The report shall be submitted to the Statewide Canine Coordinator via the Regional Canine Coordinator.
- Only CDCR approved equipment is allowed to be used on any Canine Operation.

Demonstrations

The canine unit may provide public demonstrations to further public relations. Requests shall be forwarded to the appropriate Regional Canine Coordinator for approval. All such requests shall be routed to the Statewide Canine Coordinator to ensure there are no operational conflicts. If the request is approved, the Regional Canine Coordinator shall assign sufficient personnel to provide the service.

52050.27.1 Canine Searches

Prior to any search, the canine team supervisor shall brief all staff assisting in the search process. The briefing shall include the objectives of the search, safety and security considerations, and each person's role in the search process.

Canine searches may also be conducted of all inmates, inmate living and work areas, and institution property.

- The canine handler executing the search shall assure assisting staff members order all inmates away from service dog(s). Inmates shall remain a significant distance away from the canine team(s) at all times. This includes passage to and from any chosen search site.
- If a violent incident occurs, and a canine team is conducting searches within the vicinity of the incident (i.e., riot, shots fired, etc.), the canine handler's foremost priority shall be protecting the safety of his/her assigned service dog. The handler shall remove the service dog from the affected area as soon as practical. Under no circumstances shall a handler release his/her custody of the service dog in order to respond to the incident.

Service dogs are trained to display a response to the presence of drug or contraband odors. As a service dog gets close to an odor source, it will "alert" the handler in any number of methods typically referred to as a "noticeable behavior change" as recognized by the handler.

With intermittent breaks, each service dog is capable of searching up to four hours per day in optimum conditions (peak efficiency is twenty to sixty minutes). Handlers shall make every effort to maintain their assigned service dogs in peak condition. During all searches, handlers shall remain cognizant of their service dog's physical needs (i.e., rest, relief, etc.).

During any service dog search, the canine handler shall not retrieve any drugs or contraband discovered, unless absolutely necessary. Staff shall not interfere, distract, or assist the canine team while conducting their portion of the search, unless specifically asked to do so by the canine handler.

Reporting

Anytime a drug detection service dog "alerts" to the odor of drugs while searching and drugs are subsequently discovered in that area, the canine handler shall document all pertinent details of the search, including the service dog's alert, on a CDCR Form 837-C. The report shall be submitted to the appropriate reporting authority.

Urinalysis Testing of Inmates

Drug detection service dogs "alert" to the presence of the odor of an illegal drug, not necessarily the drug itself. The dog's alert in and of itself is determined to be probable cause by the courts and probable cause to order submission by the inmate to a urine sample for testing of controlled substance. Orders for submission of urine samples shall be for cause and for the purpose of laboratory testing. Testing shall confirm or deny the presence of drugs, at a specified level, in the subject's urine.

Canine Searches Inside Security Perimeter

Canine searches inside the security perimeter shall be conducted frequently and unannounced. The appropriate Regional Canine Sergeant shall be responsible for scheduling and coordinating canine teams for searches within CDCR institutions and parole regions. The ISU Lieutenant of the respective institution shall be responsible to notify the Warden of the impending canine search and operations.

Canine Searches Outside Security Perimeter

Canine searches conducted outside the security perimeter (i.e., administration building, records, support/Prison Industry Authority warehouse, etc.), shall be conducted frequently and randomly. The ISU Lieutenant of the respective institution shall be responsible to notify the Warden of the impending canine search and operations.

Prior to any search, the canine team supervisor shall brief all staff assisting in the search process. The briefing shall include the objectives of the search, safety and security considerations, and each person's role in the search process.

Canine searches shall be conducted of all internal buildings, inmate housing living and work areas, warehouse storage areas, offices, common areas, maintenance shops, and any other area under the jurisdiction of the Department.

Internal Areas/Inmate Living Areas

- While moving through the facility, canines shall be leashed and under control at all times. The handler is responsible for the control and protection of his/her canine while on duty.

- The canine handler, executing the search, shall assure assisting staff members order all inmates away from canines. Inmates shall remain a significant distance away from the canine teams at all times. This includes passage to and from any chosen search site.
- Prior to conducting an interior area search, the canine handler shall make a visual inspection of the area(s) to be searched. During this inspection, a systematic search pattern shall be decided. If more than one canine team is conducting an interior area search, the area shall be divided and a decision made as to what area(s) each team will be responsible for.
- When conducting internal area searches, the canine handler shall be accompanied by facility security staff or regular shift officer. The accompanying staff shall assist the canine handler by recording pertinent information. Assisting staff will have keys to access areas to be searched and are responsible for securing these areas upon the canine handler exiting the area.
- When a canine alert occurs, the handler will advise the assisting staff of the location and objects to be searched. If no drugs or contraband are located after the search is conducted, the canine handler shall have the canine search articles that have been checked by the assisting staff to possibly better pinpoint the exact location of drugs or contraband.
- When a canine alert occurs in an area or on property belonging or assigned to a particular inmate, a search of the inmate and area shall be conducted and a urinalysis for the possible presence of drugs in the inmate's system shall be collected.
- Facility staff shall secure drugs or contraband in the evidence safe and complete all required report(s). Facility staff shall conduct any administrative action when required. Canine handlers shall complete a CDCR Form 837 C, Crime/Incident Report Part C – Staff Report, before completion of their shift to document any drug find.
- Each canine handler is to disallow harassment, physical assault, or verbal threat to a canine. Harassment, physical assault, or verbal threat may subject the offender to a misconduct and/or criminal prosecution.

Common Areas

- A common area is any area where inmates and visitors have access. Common areas include, but are not limited to, storage areas, showers, dayrooms, plumbing chases, lobbies, visitor waiting rooms, staff and public rest rooms, inmate rest rooms outside of secured cells, etc.
- Common areas are searched utilizing a Systematic Search Pattern (SSP), checking areas and contents of that area. When conducting a SSP, the perimeter area and any object or article that is located on the perimeter shall be searched. After the perimeter is searched, all objects or articles inside the perimeter interior shall be searched (i.e., tables in a dayroom, workbenches, power tools, etc.).

Warehouse Areas/Garages/Auto Shops

- Warehouse areas/garages/auto shops are generally very large areas with extremely high ceilings. If possible, multiple canine teams shall be used, dividing the interior of the warehouse into sections and assigning a specific section or area to each team.
- A canine handler searching these areas shall be alert to any antifreeze or other solvents that may be out in the open where a canine could easily ingest them.
- High areas shall be checked especially if a canine is giving a high response when conducting a search at ground level.
- To search items stored at extended heights not easily accessible to the canine team, equipment may be used to raise both canine and handler, when possible.

Mail Rooms/Incoming Inmate Mail

- A search of incoming inmate mail shall be conducted as frequently as possible by a canine team to detect the possible presence of drugs and/or contraband.
- The canine handler shall coordinate with mail room staff when incoming mail arrives and conduct a search of mail so as not to interfere with the timely inspection and processing of the mail.
- The canine team may also conduct a search of the mailroom itself. Any articles, packages, letters, and newspapers that a canine alerts on shall be carefully and thoroughly inspected for possible drugs and/or contraband being concealed in its contents. The Mailroom Supervisor shall do inspections with the canine handler present. Any drugs and/or contraband found shall be tested by the finding officer and processed in accordance with Department policy.

- The OIA Regional Special Agent-In-Charge (SAC), or OIA, Administrative Officer of the Day (AOD) shall be contacted for consideration of an exigent investigation upon the discovery of illegal drugs or other criminal contraband in any letter, package, or other item when there is a reasonable suspicion that the letter, package, or item is intended for a departmental employee, employee of other government agencies, contract employee, contractor and/or their employees, or volunteer.

Searches of Visitors

Any person coming onto the grounds of any Department facility is subject to search by a departmental canine as part of the Department's drug interdiction program.

All Visitors are subject to a search of their person and private property before entering, or while inside, any Department facility or Department grounds, to keep out contraband and illegal drugs. Contraband and/or metal detection device(s) and/or electronic drug detectors including but not limited to ION scanners and other available contraband and/or metal detecting device (s) technology, and passive canine units may be used for this purpose.

- Direct searches of visitors by Canine Units shall be conducted as described in the California Code of Regulations, Title 15, Section 3173.2. Prior to performing direct searches, search operations staff shall ensure that the area or objects used for search are free from contamination that may interfere with the search, i.e., chairs for sitting in, excessive property within search rooms, etc. Canine handlers shall search the area or objects used prior to the beginning of search operations and after any positive alert to ensure there are no cross contamination issues.
- A canine passive air scan search may be initiated based upon reasonable suspicion.
- The OIA Regional SAC or OIA, AOD shall be immediately contacted for consideration of an exigent investigation upon the discovery of illegal drugs or other criminal contraband in the possession or control of a visitor when there is a reasonable suspicion that a departmental employee, employee of other government agencies, contract employee, contractor and/or their employee, or volunteer is involved.

Searches of inmates for Contraband and Illegal Drugs

All inmates shall be subject to a search of their person and property to control and detect contraband and illegal drugs. Contraband and/or metal detection device(s) and/or electronic drug detectors including but not limited to ION scanners and other available contraband and/or metal detecting device(s) technology, and passive canine units may be used for this purpose.

- Direct searches of inmates by Canine Units shall be conducted as described in the California Code of Regulations, Title 15, Section 3287.
- A canine passive air scan search may be initiated based upon reasonable suspicion.
- The OIA Regional SAC or OIA, AOD shall be immediately contacted for consideration of an exigent investigation upon the discovery of illegal drugs or other criminal contraband in the possession or control of an inmate when there is a reasonable suspicion that a departmental employee, employee of other government agencies, contract employee, contractor and/or their employee, or volunteer is involved.

Searches of Employees, Contractors, and Volunteers for Contraband and Illegal Drugs

All Department employees, employees of other government agencies, contract employees, contractors and their employees, and volunteers are subject to a search of their person and private property before entering, or while inside, any Department facility or Department grounds, to keep out contraband and illegal drugs. Contraband and/or metal detection device(s) and/or electronic drug detectors including but not limited to ION scanners and other available contraband and/or metal detecting device(s) technology, and passive canine units may be used for this purpose.

- Direct searches of employees by Canine Units will be conducted as described in the California Code of Regulations, Title 15, Sections 3410.1 through 3410.2 and Department Operations Manual Section 52050.15. Prior to performing direct searches, search operations staff shall ensure that the area or objects used for search are free from contamination that may interfere with the search, i.e., chairs for sitting in, excessive property within search rooms, etc. Canine handlers shall search the area or objects used prior to the beginning of search operations and after any positive alert to ensure there are no cross contamination issues.

- A canine passive air scan search may be initiated based upon reasonable suspicion.
- The OIA Regional SAC or OIA, AOD, shall be immediately contacted for consideration of an exigent investigation upon the discovery of illegal drugs or other criminal contraband in the possession or control of any departmental employee, employee of other government agencies, contract employee, contractor and their employee, or volunteer.

52050.27.2 Canine Visitor Vehicle Searches [Reserved]

52050.27.3 Tracking Escaped Inmates

When it is determined that the canine unit is necessary for tracking escaped inmates, approval of the Warden or designee shall be obtained prior to requesting their services. Only canines specifically trained for tracking escapees may be utilized.

- The area where the escapee was last observed shall be secured and kept from any type of contamination (movement in that area, additional searching of the area, etc.) until the arrival of the canine unit.
- Upon establishing the track, the tracking team shall require the assistance of a minimum of two staff members. These staff members, in addition to weapons, shall be equipped with radios and restraint equipment.

52050.28 Electronic Drug Detection Equipment

The Department of Corrections and Rehabilitation has established a comprehensive drug and contraband interdiction program by implementing various drug and contraband interdiction strategies to prevent them from entering institutions. Among these strategies is the use of Electronic Drug Detection Equipment (EDDE) such as ION mobility spectrometry technology (ION Scanners), which are non-invasive devices that simultaneously test for a wide range of narcotics in seconds, detecting their presence on hands, articles of clothing, mail, and other objects.

52050.28.1 Drug Testing Coordinator

Each institution shall designate a Drug Testing Coordinator (DTC) at the rank of sergeant or above. The primary duties and responsibilities of the DTC are:

- Ensuring the institution designates an Electronic Drug Detection Equipment Administrator (EDDEA) to provide technical assistance and ongoing training.
- Ensuring all Electronic Drug Detection Equipment Operators (EDDEO) are properly trained.
- Ensuring the institution maintains a sufficient stock of consumables.
- Ensuring safety of installation and maintenance of EDDE.
- Reviewing all drug testing logs for accuracy and completeness, and ensuring their submission to the Enhanced Drug and Contraband Unit (General Population Males Mission) by the 5th of each month.

52050.28.2 Electronic Drug Detection Equipment Repair Technician

The DTC shall ensure that an Electronic Drug Detection Equipment Repair Technician (EDDERT) is available to each institution to provide technical assistance via designated vendor contract. The EDDERT shall:

- Perform preventative maintenance as required by the equipment manufacturer.
- Troubleshoot the EDDE as needed.
- Ensure safe installation and maintenance of EDDE.
- Provide training on the basic operation of the EDDE.
- Remove and replace (field-replaceable) parts.
- Conduct system test & alignment.
- Conduct diagnostics and tests for the EDDE.
- Calibrate and adjust the EDDE.

52050.28.3 Electronic Drug Detection Equipment Administrator

The Electronic Drug Detection Equipment Administrator (EDDEA) shall provide the following:

- Troubleshoot the EDDE as needed.
- Ensure safe installation and maintenance of EDDE.
- Ensure all EDDEO are properly trained.
- Remove and replace (field-replaceable) parts.
- Perform system start up maintenance procedures.
- Calibrate and adjust the EDDE.

52050.28.4 Electronic Drug Detection Equipment Operators

The Electronic Drug Detection Equipment Operators (EDDEO) shall:

- Maintain all equipment received.
- Report any deficiencies and failures to the DTC.
- Maintain all logs as required by this procedures manual.
- Conduct daily, weekly, and monthly maintenance of the equipment by using the Electronic Drug Detection Equipment Shift Maintenance log prior to each shift.
- Perform the start-up procedures and ensure verification of the operation of the system as set forth in the EDDE manufacturer's instructions prior to each shift.
- Ensure no person tampers with the equipment.
- Ensure scans of inmates are conducted in accordance with departmental policy. Operators conducting scans should swipe areas that the scan subjects would frequently touch with their hands (i.e., the front and back of their hands, front pockets, belt buckles, watch bands, shirt buttons, hair ornaments, and shoelaces). Operators shall not swipe a subject's buttock, groin, or breast areas.

52050.28.5 Searches

Revised October 13, 2015

EDDE may be used to search inmates, visitors, staff, employees of other government agencies, contract employees, contractors and their employees, volunteers, packages, mail, vehicles, Department property, and personal property brought onto institution grounds. Equipment shall be used in accordance with the manufacturer's instructions to avoid contamination of equipment operators and equipment.

EDDE scans of inmates, visitors, staff, employees of other government agencies, contract employees, contractors and their employees, and volunteers shall be conducted in a systematic and routine manner. EDDE swabs may be wiped along the following areas prior to scanning, e.g., hands and fingers and commonly touched or held articles such as pocket exteriors or openings, shoelaces, eyeglass handles, belt buckles, watch bands, bracelets, etc. At no time shall a swab be used on breast or groin areas. The swab will then be scanned by the EDDE.

Searches of Inmates

- If the presence of contraband is detected and confirmed, inmates shall be subject to an unclothed body search and ordered to submit to a urinalysis. Inmates require only one positive scan to be considered positive due to the reasonable unlikelihood of being inadvertently contaminated with drug residue from a secondary source. All inmate scanning results shall be documented on the EDDE ION Scanner Results Log – Inmates Scanned log.

Searches of Packages, Mail

- If the presence of contraband is detected and confirmed by the EDDE in packages or mail, the item(s) is to be confiscated and turned over to the ISU for investigation and disposition in accordance with Chapter 5, Article 41, Inmate Mail.
- All packages and mail testing shall be documented on the EDDE ION Scanner Results Log – Mail and Package log.

Searches of Inmate Visitors

- All inmate visitor testing results shall be documented on the ION Scanner Results Log – (Visitors).
- Visiting staff shall inform visitors they can refuse the enhanced inspection by the EDDE. Staff shall inform the visitor of further potential search and visitation options upon a positive alert or based upon the number of refusals occurring within a twelve month period as outlined in policy.
- If during the first scan of the EDDE, the scan result is negative, the visitor shall continue with processing into the visiting area.
- If the presence of contraband is detected on the first scan, the visitor shall be given the option of washing his/her hands with soap and water and a second scan shall be performed in the same manner as the first scan. If a visitor passes the second scan, they shall be permitted to have a regular visit and the scan shall not be recorded as a positive result. If the second scan is positive, the visitor shall be informed that he/she will be required to submit to a clothed body search as a condition of a non-contact visit, if space is available. Subsequently, if the clothed body search is negative for contraband, the visitor shall continue with processing into the non-contact visiting area. However, if the clothed body search results in the discovery of contraband, the visitor shall be denied entrance to the facility/institution and may be subject to arrest and referral for criminal prosecution. If the visitor

refuses to consent to a clothed body search, visiting shall be denied for the day.

- All positive alerts (second EDDE scans/passive air scans), refusals to submit to clothed body searches after a positive alert, and/or refusals to participate in the drug interdiction process shall be recorded on the SOMS visiting record. Upon the visitor's next attempt to enter a CDCR institution, he/she shall be informed that he/she shall be subject to the following:
 - First offense: A visitor who refuses to participate in a drug interdiction process may request a non-contact visit if space is available. The visitor shall be required to submit to a clothed body search as a condition of a non-contact visit. If the results of the search are negative for contraband, the visitor shall continue with processing for a non-contact visit. If the visitor refuses to consent to a clothed body search, visiting shall be denied for that day. A visitor, who refuses to submit to a clothed body search after a positive EDDE/passive air scan alert for the first time in a twelve (12) month period, shall be denied a visit for that day. Upon the visitor's next attempt to visit within a twelve (12) month period, the visitor shall not have the option of being randomly selected to participate in the drug interdiction process. The visitor shall participate in the drug interdiction process occurring on that day. If the visitor refuses to comply with this directive, visiting shall be denied for that day. If the institution is not conducting a drug interdiction process, the visitor will be allowed a contact visit consistent with departmental policies.
 - Second offense: A visitor who refuses to participate in a drug interdiction process or submit to a clothed body search after a positive EDDE/passive air scan alert for the second time in a twelve (12) month period shall be denied a visit for that day. The institution head or designee may issue an order to suspend the visitor from the institution within his/her jurisdiction for up to thirty (30) days, pursuant to CCR, Title 15, Sections 3176.1, 3176.2 and 3176.3. Upon the visitor's next attempt to visit within a twelve (12) month period, the visitor shall not have the option of being randomly selected to participate in the drug interdiction process. The visitor shall participate in the drug interdiction process occurring on that day. If the visitor refuses to comply with this directive, visiting shall be denied for that day. If the institution is not conducting a drug interdiction process, the visitor will be allowed a contact visit consistent with departmental policies.
 - Third offense: A visitor who refuses to participate in a drug interdiction process or submit to a clothed body search after a positive EDDE/passive air scan alert for the third time in a twelve (12) month period shall be denied a visit for that day. The institution head or designee may issue an order to suspend the visitor from the institution within his/her jurisdiction for up to twelve (12) months, pursuant to CCR, Title 15, Sections 3176.1, 3176.2 and 3176.3. Upon the visitor's next attempt to visit within a twelve (12) month period, the visitor shall not have the option of being randomly selected to participate in the drug interdiction process. The visitor shall participate in the drug interdiction process occurring on that day. If the visitor refuses to comply with this directive, visiting shall be denied for that day. If the institution is not conducting a drug interdiction process, the visitor will be allowed a contact visit consistent with departmental policies.
 - Fourth offense: A visitor who refuses to participate in a drug interdiction process or submit to a clothed body search after a positive EDDE/passive air scan alert for the fourth time in a twelve (12) month period shall be denied a visit for that day. The institution head or designee may issue an order to suspend the visitor from the institution within his/her jurisdiction for up to twelve (12) months and refer the case to the director or designee for review of permanent exclusion of a person from any or all institutions/facilities, pursuant to CCR, Title 15, Sections 3176.1, 3176.2 and 3176.3.
- When conducting scans of inmate visitors there will be occasions when legitimate circumstances exist that may result in a positive EDDE scan. Should the person being scanned claim the EDDE alarm is due to one or several prescribed medications, that person must present a letter of verification signed by a licensed physician, licensed physician's assistant, or certified nurse practitioner confirming the medications prescribed are the cause of the EDDE alarm before they will be

permitted a contact visit. The visitor shall be informed that he/she will be required to submit to a clothed body search in accordance with Section 54020.13.2, as a condition of visiting. Any item(s) brought into the facility/institution by that visitor shall be subject to a thorough search. If no contraband is discovered, the visit shall proceed. If the document is not readily available, the individual shall be informed that he/she shall be required to submit to a clothed body search as a condition for non-contact visiting, if space is available. If no contraband is discovered, the visitor shall be permitted to have a

- Denial of entrance into the facility/institution or the approval of a non-contact visit shall be in accordance with Chapter 5, Article 42.
- Inmate visitors, who appear to be under the influence of alcohol, drugs, or any other substance, to the extent that his or her presence in the facility/institution would pose a threat to his or her safety or the safety of others, or to the security of the facility/institution shall be denied entrance to the facility/institution.
- Inmate visitors found in possession of controlled substances are subject to arrest and referral for criminal prosecution pursuant to this Article.
- Any controlled substance(s) and or contraband confiscated shall be handled as evidence and in accordance with Chapter 5, Article 20.
- Upon request, a visitor may be given a copy of the EDDE printout of all positive scans for that visitor.
- The Office of Internal Affairs (OIA) Criminal Team Supervisor or Administrative Officer of the Day (AOD), shall be immediately contacted for consideration of an exigent investigation upon the discovery of illegal drugs or other criminal contraband in the possession or control of a visitor when there is reasonable suspicion that a departmental employee, employee of another government agency, contract employee, contractor and their employee, or volunteer is involved with the visitor.
- The arrest of a visitor shall not be made without consultation with OIA when there is reasonable suspicion that a departmental employee, employee of another government agency, contract employee, contractor or their employee, or volunteer is involved with the visitor. The OIA Regional Criminal Team Supervisor will assess the case factors and other investigative strategies prior to approval. In the event there are exigent circumstances where the need to act is immediate, OIA shall be notified as soon as possible thereafter.
- When an arrest is made by ISU, in accordance with CCR, Title 15, Sections 3176.2 and 3316(a), the CDCR 837 form series, Crime/Incident Report; arrest reports; and staff reports documenting the arrest shall be forwarded to the local District Attorney's office by ISU.

Employees, Contractors, and Volunteers

- Department employees do not have the right to refuse to be searched. Employees of other government agencies, contract employees, contractors and their employees, and volunteers can refuse to submit to search; however, refusal shall result in the denial of entry and may result in ~~followed by~~ a suspension from that CDCR institution for one year. Employees of other government agencies, contract employees, contractors and their employees, and volunteers can appeal the suspension to the institution head. A written response shall be provided within 15 working days from receipt of the appeal. If dissatisfied with the institution's response or action, the appellant may refer the appeal, with a copy of the institution's decision, to the director or designee who shall provide a response within 20 working days from the date of receipt. Employees, employees of other government agencies, contract employees, contractors and their employees, and volunteers shall be randomly selected for scanning with the EDDE. All scanning of individuals shall be conducted in a manner that affords privacy. When employees, employees of other government agencies, contract employees, contractors and their employees, and volunteers are scanned, the operator shall ensure that the audio alarm is deactivated and that a printout of all positive scans for the staff member, employee of another government agency, contract employee, contractor or their employee, or volunteer accompanies all written logs.
- If during the first scan of the EDDE, the scan result is negative, the individual will continue with processing into the institution.
- If the presence of contraband is detected on the first scan, the individual shall be given the option of washing their hands with soap and water and a second scan shall be performed in the same manner as the first scan. If the second scan is positive, and the presence of contraband is detected by the EDDE, supervisory staff shall be notified immediately. The individual shall be informed that he/she will be required to submit

to a pat down search by same gender supervisory staff in a private setting as a condition to enter the facility/institution. Any item(s) brought into the facility/institution by that individual shall be subject to a thorough search. If no contraband is discovered, the individual shall be allowed to enter the facility/institution.

- The OIA Criminal Team Supervisor or AOD shall be immediately contacted for consideration of an exigent investigation upon the discovery of illegal drugs or other criminal contraband in the possession or control of an individual.
- The OIA Regional Criminal Team Supervisor shall be contacted for consideration of an exigent investigation prior to the search of any departmental employee, employee of another government agency, contract employee, contractor and their employee, or volunteer when there is reasonable suspicion that the employee, employee of another government agency, contract employee, contractor and their employee, or volunteer is or will be in possession of illegal drugs or contraband. In the event there are exigent circumstances where the need to act is immediate, OIA shall be notified as soon as possible thereafter.
- All employees, employees of other government agencies, contract employees, contractors and their employees, and volunteers testing shall be documented on the ION Scanner ResultsLog - (Staff).
- An EDDE scan of an individual may be initiated consistent with established reasonable suspicion protocols.
- Employees, employees of other government agencies, contract employees, contractors and their employees, and volunteers who appear to be under the influence of alcohol, drugs, or any other substance, to the extent that his or her presence in the facility/institution would pose a threat to his or her safety or the safety of others, or the security of the facility/institution shall be denied entrance to the facility/institution.
- Individuals who are searched and found to be in possession of illegal drugs or contraband are subject to arrest and referral for criminal prosecution pursuant to this Article.
- If an arrest is initiated, those arrested, along with the drugs or contraband discovered, shall be turned over to ISU pending further direction from OIA.
- Once the pre-booking process has been completed by CDCR staff, the arrestee(s) shall be transported by CDCR personnel or by local police/sheriff's department to a designated detention facility. Arrestee(s) shall not be held at the pre-booking area beyond a reasonable amount of time necessary to complete the process.
- In all cases where an individual is arrested for committing a criminal act while on institutional grounds in accordance with CCR, Title 15, Section 3316(a) and DOM Section 31140.20, a copy of the CDCR 837 form series, Crime/Incident Report; arrest reports; and staff reports documenting the arrest shall be forwarded to the OIA regional office and to the OIA Classifications Intelligence Unit along with the CDCR Form 989 (Part A) Confidential Request for Internal Affairs Investigation / Notification of Direct Adverse Action, and other supporting documents. A criminal investigative report and complaint shall be filed with the local District Attorney's Office by OIA.
- Searches of employees, employees of other government agencies, contract employees, contractors and their employees, and volunteers shall be conducted in accordance with Section 52050.15.

52050.28.6 Training

All EDDEO training shall be in accordance with the manufacturer's/vendor's guidelines. The manufacturer shall conduct the initial training for all members. Any required follow-up training or new operator training shall be conducted at designated facilities by approved staff. The DTC shall be responsible for monitoring all training to ensure compliance with policy and uniformity of training methods.

52050.29 Revisions

The Director, Division of Adult Institutions, or designee shall ensure that the content of this Article is current and accurate.

ARTICLE 20 — DISPOSITION OF CONTRABAND

Revised August 13, 1992

52051.1 Policy

Pursuant to PC 12028, The Director has established a system for the disposition of contraband. Any contraband retrieved from a body cavity, or which is otherwise suspected of being contaminated, shall be handled using appropriate safeguards (e.g., disposable plastic gloves) and shall be placed in a container which shall be clearly labeled "contaminated."

52051.2 Purpose

To provide for controlled disposal or disposition of acquired contraband items that pose a threat to persons or to the physical security of a facility.

52051.3 Responsibility for the Disposition of Contraband

The Warden or RPA shall administer and monitor the handling and disposal of contraband.

52051.4 Definition of Contraband

Any unauthorized property, materials, supplies, items, commodities, and substances received or obtained by inmate(s) from any source is contraband. (Refer to CCR 3006, and DOM 54030, Inmate Property.)

52051.5 Controlled Substances

See DOM 52010.

52051.6 Clothing: State Issue or Personal

Revised February 2, 2011

See DOM 54060.

52051.7 Inmate Property

See DOM 54030.

52051.8 Handicraft

See DOM 101050.

52051.9 Tools

See DOM 52040.

52051.10 Dangerous or Toxic Substances

See DOM 52030.

52051.11 Disposition of Medication

Outdated and contraband medication which has been tainted by inappropriate handling by inmate patients (e.g., tampered with, misplaced, or sold) shall be disposed of by medical staff in accordance with DOM 52010.

52051.12 Confiscated Firearms, Parts, or Ammunition

Confiscated weapons, parts, or ammunition no longer required as evidence for an investigation or trial shall be turned over to the following individuals for disposal:

- In a facility, to an armorer or other designated person.
- In a parole office, to an individual designated by the RPA at the PA-II level or higher.
- In the LEIU, to a special/senior special agent designated by the Assistant Director, LEIU.
- In the Academy, to a lieutenant or higher level employee designated by Academy.

Firearms may be released to governmental agencies pursuant to PC 12028 or 12030 or surrendered to DOJ for destruction. If the firearms are to be destroyed, a Department Form 918, Firearm/Firearm Part Disposition Log, shall be presented to the local court of jurisdiction for approval of transfer in accordance with PC12030. Upon return of the approved release for destruction, State DOJ shall be advised by submitting the completed CDC Form 918 with cover letter to:

Firearms Section
Department of Justice
P.O. Box 13417
Sacramento, CA 95812

52051.13 Inmate Manufactured Weapons

Inmate manufactured weapons shall be retained in evidence pending legal appeal. Upon completion of legal litigation, they may be used for IST purposes. All weapons not being used for training purposes and being held pending prosecution or appeal shall be secured in a storage area until removed from facility grounds by an approved, certified metal vendor.

52051.14 Money

Under no circumstances shall any money be mutilated or destroyed. Money which is discovered or confiscated by any employee shall be disposed of as follows:

- Staff shall immediately notify their supervisor upon discovering or confiscating any amount of money. A written report which identifies the serial number and denomination of each bill and the number of each denomination of coin shall be completed by the employee. The report shall be witnessed by at least one other employee.

Contaminated money shall be placed in a plastic container which shall be sealed and clearly marked "contaminated." The container and report shall be turned in to the Associate Warden (AW), Business Services, or a designated Business Services representative for mailing to the Department of Treasury for destruction. The AW, Business Services, or representative shall enclose a letter designating how the check from the Department of Treasury should be drawn. The letter and contaminated money should be packaged and mailed to:

Department of Treasury
Bureau of Engraving and Printing
O. C. S. Room 344 BEPA
P.O. Box 37048
Washington, DC 20013

Non-contaminated money shall be turned in to the AW, Business Services, or a designated Business Services representative for deposit in the Inmate Trust Fund.

52051.15 Handling of Evidence

Relevant evidence includes any and all controlled physical evidence acquired and processed from the commission of a crime and/or uncontrolled evidence where strong possibilities exists that it can be associated with a definite suspect through latent prints or other investigative means.

- Controlled felonious contraband is physical evidence of a felonious nature that includes, but is not limited to, weapons or narcotics that can be placed as having been in the immediate possession or control of any person.
- Uncontrolled felonious contraband is physical evidence of a felonious nature that includes, but is not limited to, weapons and narcotics that cannot be placed in the immediate possession or control of any person.
- Information collected that has been found (upon examination) to have no value as evidence shall be retained for at least six months before being prepared for destruction or return.

52051.16 Handling of General Contraband

General contraband shall be disposed of as listed below:

- Nonmetallic contraband, e.g., cardboard, paper, etc., shall be disposed of by the facility garbage.
- Metal contraband, e.g., can lids, metal scraps, etc., which is not usable by an appropriate department, shall be secured in a storage area until removed from facility grounds by an approved, certified metal vendor.
- State issued items shall be rerouted to the appropriate Department(s) for disposition and/or repair for reissuing.
- Unauthorized items which were obtained by authorized means may be sent home by inmates at their own expense or may be donated to the facility. (Examples: wallets, combs, belts, shoes, televisions, and stereos.)

52051.17 Donated Contraband

Inmate donated items shall be disposed of by one of the following methods:

- Donated to a charitable organization.
- Rendered useless or inoperable by disposing of it as trash.
- Retained for reissue if useful.
- Television sets which conform to the limitation of DOM 54030 and are in working condition may be reissued to indigent inmates.

52051.18 Revisions

The Deputy Director, Institutions Division, or designee shall be responsible for ensuring that the contents of this section are kept current and accurate.

ARTICLE 21 — INMATE USE OF TELEPHONES

Revised February 29, 2008

52060.1 Policy

To provide inmates with the means and the opportunity to make personal calls to persons outside the institutions/facilities of the Department.

52060.2 Purpose

To establish procedures in the use of ininstitution/intrafacility telephones for business purposes, authorizing confidential phone calls between inmates and their attorneys of record, and the use of public telephones for personal calls by inmates.

52060.3 Use of Ininstitution Telephone by Inmate

Inmates shall not use ininstitution/intrafacility telephones except as specifically required and authorized by their assignment supervisor for communication with offices and personnel within the institution/facility.

Inmates shall identify themselves as "inmate (by name)" when answering or placing an ininstitution telephone call.

Inmates shall not use or be allowed access to an institution/facility telephone with the capability of direct connection with a public system, except as authorized in this Article.

52060.4 Public Telephone Access

Each institution/facility shall provide public telephones for the use of general population inmates to make personal calls.

Each institution/facility shall also provide Telecommunication Device for the Deaf (TDD) telephones for use by inmates with a documented severe hearing impairment for personal, emergency, and confidential calls. The TDD telephone calls are subject to the same policies and procedures as are in place for telephone calls for general population inmates with the following exceptions.

- Extended time shall be scheduled for these calls due to the time delay which results from the TDD relay process.
- TDD telephones may be necessary to provide accommodations for inmates and their callers with disabilities.

The institution/facility shall ensure effective telephone communication for inmates with disabilities and/or the disabled person(s) with whom they are communicating.

52060.5 Inmate Personal Calls

Inmates may make personal calls to persons outside the institution at designated times and on designated telephones according to their privilege group designation.

Limitations shall be placed on the frequency of such calls to allow equal access to Telephones. No limitation shall be placed on the numbers, identity, or relationship to the inmate of the person called, providing the person being called agrees to accept all charges for the call.

52060.6 Scheduling of Outside Telephone Calls

Revised December 14, 2012

Telephone sign-up sheets covering seven days will be maintained and logged weekly. Sign-up sheets shall be divided in 15 minute increments. Sign-ups for inmate telephone calls will be accepted during program hours on second and third watch only.

- Inmates must present their identification card to sign up.
- Inmates may not sign up for a call time slot during their work/training hours.

If an inmate fails to appear for the call at the designated time, the next scheduled caller will be allowed to place their call or the telephone will remain vacant.

Inmates shall not, under any circumstances, charge phone calls to credit cards or place third party calls.

Inmates shall not declare an Emergency Interruption to the telephone operator when placing telephone calls.

52060.7 Identification of Privilege Group*Revised December 14, 2012*

Officers supervising the telephone sign-up shall check privilege group to ensure eligibility for the call.

- Privilege Group A:
 - Telephone calls during the inmate's non-work/training hours shall be limited only by institution/facility telephone capabilities, and hours of general population unlock.
- Privilege Group B:
 - One personal telephone call period per month.
- Privilege Groups C, D, and &U:
 - Telephone calls on an emergency basis only as determined by institution/facility staff.
- DD:
 - All privileges generally associated with the inmate's work/training incentive group's status will be suspended during a period of DD.

Inmates housed in AD-SEG Units, either voluntarily or under the provisions of CCR, 3335, will be allowed to make outside telephone calls that approximate those for the work/training incentive group to which the inmate is assigned, except that individual calls must be specifically approved by the supervisor in charge of the unit before a call is made

52060.8 Confidential Telephone Calls

Wardens may delegate authority to specific staff members to authorize confidential telephone calls between an inmate and the inmate's attorney, or any other person when designated staff determines that confidentiality is warranted.

Approval and clearance for a confidential phone call between an inmate and their attorney shall be conducted according to Section 3282 of the Title 15. The CDCR Form 106-A shall be used to document clearance. The information in the CDCR Form 106-A shall be updated regularly, but no less frequently than annually.

Authorized confidential calls shall not be monitored or recorded. However, inmates will be under constant visual observation during the confidential phone call.

Confidential calls shall not be placed on designated inmate telephones.

52060.9 Emergency Calls*Revised September 25, 2007*

An emergency is defined as a death, serious illness, or accident involving an immediate family member as defined in Title 15, Section 3000. When a member of an inmate's family calls to convey an emergency message, the call shall be referred to the appropriate Chaplain or Correctional Counselor.

If the Chaplain or Correctional Counselor is not available, the call shall be referred to the Program Lieutenant. In the absence of the Program Lieutenant, the Watch Commander shall accept the call. The staff member accepting the call shall attempt to verify the emergency.

The inmate shall be informed of the message and may be permitted a monitored telephone call, which shall be placed as a collect call or paid for by the inmate's trust account.

If the inmate is permitted an emergency call, upon completion of the call, the staff member shall evaluate the inmate's reactions and behavior in order to determine whether or not an increase in custody and/or change of housing and/or follow-up counseling is required. If the staff member is unable to independently make a determination, the matter shall be referred to the appropriate administrator.

Trust account withdrawal telephone calls shall not be placed on public inmate telephones. Time and charges for approved calls shall be recorded on the CDC Form 193, Trust Account Withdrawal Order, by the staff who monitors the call. (See DOM 23000.) If the inmate is permitted to place a call, the time, date, person called, and the inmate's response shall be recorded on the CDC Form 128-B, General Chrono. The original sent to the Record's Office for the inmate's C-File and a copy to the inmate.

52060.10 Release From Work/Training Assignment to Respond to Emergency

Inmates shall be notified of an emergency while on their work/training assignment at the time of the emergency call.

If an inmate is requested by staff to respond to an emergency call during their work/training assignment, the inmate's supervisor shall release the inmate to respond to the staff's request.

The inmate shall receive "S" time credit for the authorized absence.

52060.11 Telephone Branding

Whenever an inmate makes a telephone call on an inmate telephone, the call may have an announcement before and at random intervals during the call. This announcement is known as branding and consists of the following:

Before the call the following may be heard by both the inmate and the person called:

This is the operator. I have a collect call from (inmate name), at a California correctional facility. This call and your number will be recorded. To deny charges, hang up now. To accept charges, press 5 now.

At random intervals during the call the following may be heard by both the inmate and the person called:

This recorded call is from an inmate at a California correctional facility.

52060.12 Telephone Monitoring

Inmate telephone calls on intrainstitution/intrafacility or designated inmate telephones are subject to being monitored at any time by institution staff.

52060.13 Notice of Monitoring

A conspicuous notice, in the English and Spanish languages, shall be posted at each telephone installation where inmates are normally permitted to make personal outside calls.

- The notices shall read: Any call placed on this telephone may be monitored and recorded without prior notice to the caller or the person called.
- Use of this telephone constitutes consent to monitoring, recording, and acceptance by the caller of the responsibility to inform the person called that their conversation may be monitored and recorded.
- When outside calls are permitted from a telephone where this notice is not posted, the staff member authorizing the call shall verbally inform the inmate of the notice information.

52060.14 Devices and Taping Capabilities

Telephone monitoring devices shall be utilized whenever the telephones are in use. Taping capabilities shall be used as needed by monitors.

If staff believes that illegal activities will transpire over the telephone during a particular call, that call shall be recorded.

Monitors shall terminate all inmate calls regarding:

- Drug trafficking.
- Proposed or actual violence.
- Any information adversely affecting the operation, safety, or security of the facility, transportation actions, the CDC, or its employees.
- Calls exceeding 15 minutes.
- Disrespectful comments and/or obscenities directed towards the telephone employee (operator).
- Monitors shall immediately report to the watch commander any information adversely affecting the security or safety of the institution/facility.

52060.15 Revisions

The Director, DAL, or designee shall ensure that the content of this Article is accurate and current.

ARTICLE 22 – GANG MANAGEMENT**(Previously contained in Restricted DEPARTMENT OPERATIONS MANUAL [DOM], Section 55070)***Revised September 23, 2005***52070.1 Policy**

The California Department of Corrections and Rehabilitation (CDCR) prohibit individuals under its jurisdiction from any type of participation in gang activity and maintains a pro-active stance in the arena of gang suppression.

The CDCR provides inmates and parolees the opportunity to disassociate themselves from gangs and gang activities, making available to them programs consistent with their custody/supervision needs.

52070.2 Purpose

This Section defines staff responsibilities and provides uniform procedures for the management of gangs.

52070.3 Gangs And Public Safety

The CDCR has determined that gangs and their activities are a threat to the security of prisons and jails and are a clear and present danger to public order and safety.

52070.4 Philosophy

The preservation of public safety is the guiding principle of the criminal justice system in the State of California. The CDCR strongly endorses this basic principle.

The CDCR is mandated to control convicted offenders through institutional housing and parole supervision. In addition, the CDCR provides opportunities for offenders to take responsibility for their lives and improve their chances to become positive members of the community.

The CDCR has determined that prison gangs and disruptive groups, through their illegal activities, are a threat to the security of all institutions and camps. They are also a definite danger to public order and safety.

This Article provides direction for implementing the CDCR's policy in the arena of gang management and suppression.

52070.5 Gang Management Strategy

The CDCR's gang management strategy shall be to identify gang affiliated inmates/parolees, track them, monitor their conduct, take interdiction action, and apply sanctions when they are found to be involved in illicit or unlawful gang activity.

52070.5.1 Document Gang Involvement and Activity

Staff shall document all allegations of inmate/parolee gang involvement and activity. The documentation shall be placed in the inmates'/parolees' central files and copies shall be routed to the gang investigators.

52070.5.1.1 Administrative Officer of the Day/Reporting Activity Of Gang Affiliated Inmates

The Administrative Officer of the Day, DAI, shall use the CDCR Form 837 series, Crime/Incident Report, to report, monitor, and compile statistical data regarding the activity of gang affiliated inmates.

The CDCR Form 837 series shall be accomplished and distributed per DOM, Chapter 5, Article 3. Additionally, the accomplishing staff shall route to their institution's gang investigator a copy of all CDCR Form 837 series, which report gang involved incidents.

Accomplishing staff shall ascertain whether any inmate involved in an incident is identified as a gang affiliate. If so, Part A of the CDCR Form 837 series shall be marked "GANG INVOLVED" in the Exceptional Activity section. Also, each inmate's validated or suspected gang affiliation shall be listed on Part-B1 of the CDCR Form 837 series.

Accomplishing staff shall ascertain whether an inmate is a validated gang affiliate by reviewing any pertinent documents in the inmate's central file to include, but not limited to, the CDC Form 812-A, Notice of Critical Information - Prison Gang Identification, and CDC Form 812-B, Notice of Critical Information - Disruptive Group Identification, which are contained in the central file.

52070.5.2 Gang Identification and Validation

Revised August 9, 2011

Departmental regulations and procedures for identification of gang affiliates shall be uniformly applied. Each institution, parole region, and field office of the Office of Correctional Safety (OCS) shall assign gang investigators to identify gangs and gang involved individuals. The Chief, OCS, shall have management responsibility for the validation of those inmates/parolees so identified by the gang investigators as outlined in this DOM Article.

52070.5.3 Gang Activity Interdiction

The gang investigators, under coordination of the Chief, OCS, shall join with task forces comprised of local, State, and federal law enforcement personnel to track, monitor and interdict, within the framework of law, the illicit and unlawful behavior of gangs.

52070.5.4 Gang Activity Sanctions

Inmates/parolees found to be in violation of criminal or administrative statutes shall be dealt with in the strictest possible legal manner. For inmates, this shall include, but not be limited to, loss of privileges, increase in custody, loss of work credits, enhancement of penalties, segregation from the inmate general population, and referral for criminal prosecution. For parolees, this shall include, but not be limited to, imposition of expanded special conditions of parole, increased levels of supervision, incarceration, referral to the Board of Parole Hearings for revocation proceedings and referral for criminal prosecution.

52070.6 Cooperation with Other Criminal Justice Agencies

Departmental gang investigators shall fully cooperate with investigators from other criminal justice agencies, on a need-to-know basis, regarding gang-involved investigations and information sharing.

Departmental gang investigators shall join and participate in local, regional, and statewide law enforcement task forces dedicated to gang intelligence sharing and gang activity suppression.

52070.7 Role and Authority of the Chief, Office of Correctional Safety

The Assistant Secretary, OCS, shall have management responsibility for SSU's Gang Intelligence Operations section and its gang investigators. Gang investigators shall be senior special agents, special agents, Correctional Lieutenants, and Correctional Sergeants assigned to the unit. The SSU gang investigators shall be selected by the Chief, OCS.

52070.7.1 Prison Gang Designations

The Assistant Secretary, OCS, shall determine when criminal groups have formed into actual prison gangs in accordance with the criteria established in this DOM Article.

52070.7.2 Coordinate Gang Program

The Assistant Secretary, OCS, shall coordinate the CDCR's gang intelligence, identification, validation, and suppression program and coordinate that program with other criminal justice agencies.

52070.7.3 California Gang Task Force Responsibility

The Assistant Secretary, OCS, shall have management responsibility for meeting the administrative needs of the California Gang Task Force (CGTF).

52070.8 Role and Authority Of Wardens

Wardens shall have management responsibility for their respective gang investigators.

Each institution shall have a gang investigator designated as an Institutional Gang Investigator (IGI) or investigative lieutenant. Gang investigators shall be Correctional Lieutenants. Gang investigators shall be selected by their Wardens.

Wardens shall ensure that gang involved or related occurrences and information are brought to the attention of appropriate personnel.

52070.9 Role and Authority of Regional Parole Administrators

Regional Parole Administrators (RPA) shall have management responsibility for their respective gang investigators. Each parole region shall have a Regional Gang Investigator. Gang investigators shall be in the Parole Agent II classification. Gang investigators shall be selected by their RPAs.

RPAs shall ensure that gang involved or related occurrences and information are brought to the attention of appropriate personnel.

52070.10 Role and Authority of the Parole Operations Administrator

The Parole Operations Administrator of the Division of Adult Parole Operations (DAPO) shall be responsible for developing and implementing the division's gang management procedures.

52070.10.1 Gang Investigator Functional Supervision

The Paroles Operations Administrator shall have functional supervision over the regional gang coordinators regarding the division's gang management procedures.

52070.10.2 Gang Involved Parolee Arrest/Incident Notifications

Revised August 9, 2011

The Paroles Operations Administrator shall ensure that the Gang Intelligence Operations Unit is promptly notified of all arrests or incidents involving gang-affiliated parolees. The Operations Administrator shall maintain a close working relationship with the SAC, OCS, and the Senior Special Agent, Gang Intelligence Operations, regarding gang management matters.

52070.11 Role and Authority of the SAC, OCS

The SAC, OCS, Gang Intelligence Operations or designee shall have functional supervision of the Senior Special Agent, Gang Intelligence Operations, and the IGIs, (as it relates to validations, debriefings, and gang investigations/intelligence). The SAC shall be apprised of all gang management matters affecting, or having a potential to affect, departmental policy or procedure.

52070.11.1 Relationship with DAPO and SSU

Revised August 9, 2011

The Office of Correctional Safety, Fugitive Apprehension Team Administrator, or designee shall maintain a close working relationship with the DAPO Administration regarding significant incidents involving parolees. All incidents which require arrest, surveillance, or consultation and are

considered serious in nature, high notoriety, public, or special interest cases, shall immediately be referred to the OCS Administrator, or designee for appropriate disposition.

52070.11.2 Gang Involved Inmate Incident Notifications

The institution and parole's Gang Investigators shall ensure that Gang Intelligence Operations is promptly notified of all arrests or incidents involving gang affiliated inmates.

52070.12 Role and Authority of the Senior Special Agent, Gang Intelligence Operations, SSU

The Senior Special Agent shall report directly to the SAC, OCS. The Senior Special Agent supervises the SSU Gang Intelligence Operations section which includes the SSU gang investigators (Special Agents), and the Correctional Lieutenants, Sergeants, and ancillary staff of the Gang Intelligence Operations Debriefing Team. The Senior Special Agent shall maintain a close working relationship with the SAC, Chief, Classification Services, and DAPO Administrator regarding gang management matters.

52070.12.1 Gang Investigator Functional Supervision Responsibility

The SAC, OCS shall have functional supervision over the DAI and the DAPO gang investigators regarding investigation, identification, validation, monitoring, and tracking of gang affiliates.

52070.12.2 Receiving and Disseminating Information

The SAC, OCS, or designee shall be the CDCR's main spokesperson regarding gang information and shall have primary responsibility for:

- Receiving, analyzing, coordinating, and disseminating pertinent prison gang and disruptive group data to assist respective managers regarding security of institution and parole operations.
- The sharing of this information between the Institutions, DAPO, the departmental training center, and other criminal justice agencies at the local, State, and federal levels.
- Information potentially affecting the policies and/or procedures of the CDCR shall require authorization from the Assistant Secretary, OCS or designee prior to being disseminated.
- Prior to releasing any gang related documents to any court or attorney, either voluntarily or under subpoena, the CDCR's Office of Legal Affairs (OLA) shall be contacted and informed of the request and the nature and contents of the documents requested/demanded. The OLA shall provide guidance for release. All documents released from the control of the OCS shall have the approval of the Assistant Secretary, OCS, prior to release.

52070.12.3 Preparing and Disseminating Reports

The SAC, OCS or designee shall be responsible for the preparation of charts, assessments, statistical reports, and other material as required to provide an accurate portrayal of gang activity. The SAC, OCS shall disseminate this information to departmental and other criminal justice agency managers and gang investigators on a need-to-know basis as authorized by the Assistant Secretary, OCS.

52070.12.4 California Gang Task Force

The SAC, OCS, or designee shall serve as coordinator of the CGTF. The CGTF is comprised of criminal justice agency personnel from numerous local, State, out-of-state and federal jurisdictions. As coordinator, the SAC, OCS, responsibilities include:

- Processing membership and guest applications.
- Maintaining records.
- Scheduling meetings at locations throughout the State.
- Chairing the two (2) day, each month, gang intelligence information-sharing meetings.
- Collecting, dispersing, and maintaining meeting fees.
- Handling correspondence.
- Preparing and distributing a monthly summary of reported gang activity.
- Preparing statistical reports.

52070.12.5 Gang Investigator Meeting

Prior to the CGTF meeting, the SAC, OCS, or designee shall meet with all departmental gang investigators to ensure that the CDCR is represented at the CGTF meeting by a cohesive, organized group. Additionally, this meeting shall serve as a training session regarding gang identification, validation, etc., and shall provide an opportunity to exchange gang-intelligence information at the operational level.

52070.12.6 Assistance and Data Requests

The Senior Special Agent shall be responsible for coordinating requests for gang activity data, training, and investigative assistance received from departmental as well as other criminal justices agencies.

52070.13 Gang Investigator Selection Criteria

To be eligible for selection by their respective managers, gang investigator candidates shall have the civil service positions of either Special Agent/Senior Special Agent, Parole Agent II, or Correctional Lieutenant and shall:

- Have a good working knowledge of prison gangs and disruptive groups.
- Be highly motivated to investigate organized criminal activity and gang affiliations.
- Be well organized, efficient, and possess good interpersonal, communication, and analytical skills.
- Have the necessary verbal skills to make presentations and conduct training regarding gangs to large audiences.

52070.14 Role and Responsibility Of Gang Investigators

The Regional Parole Gang Investigators shall be directly responsible through their chains of command to their respective RPA or designee, and shall be functionally supervised by the Parole Operations Administrator and the SAC, OCS.

The IGIs shall be directly responsible through their chains of command to their respective Wardens and shall be functionally supervised by the SAC, OCS, and the Senior Special Agent, Gang Intelligence Operations, SSU.

52070.14.1 Obtain and Share Information

The gang investigators shall have the primary responsibility in their respective institution or region for collection of information in regard to gang affiliations or gang-related criminal activities. They shall collect information from various sources and transmit this information to their respective Wardens or RPAs, SAC, OCS, and to the Senior Special Agent without delay.

The gang investigators shall maintain a close working relationship with other staff. They shall collect, analyze, and transmit any material or information of significance to their respective managers, SAC, OCS, and to the Senior Special Agent. They shall be responsible for documenting gang members and associates (and their visitors at respective institutions). They shall monitor new arrivals to their respective institutions or parole regions, particularly new commitments from and to Reception Centers. They shall identify and document inmates or parolees engaged in any gang activity. They shall maintain regular telephonic contact with other investigators, local law enforcement agencies, and other appropriate individuals as necessary so as to provide an avenue for the exchange of information.

The gang investigators shall maintain regular telephonic contact with the Senior Special Agent and shall convey important data, including inmate/parolee gang-involved incidents or arrests, without delay. These telephonic contacts shall be followed up by necessary reports and/or documents. Wardens and RPAs or their designees shall be apprised of all information obtained by their respective investigators so that the information will reach appropriate personnel.

52070.14.2 Provide Training

The gang investigators shall provide training for CDCR personnel and personnel from other jurisdictions on matters related to gangs. Should assistance be necessary, the Senior Special Agent may be contacted.

52070.14.3 Classification Resource

The gang investigators shall be a resource in the classification process in matters related to gangs.

52070.14.4 Meetings and Conference Calls

The gang investigators shall attend/participate in such meetings and telephone conference calls as are deemed necessary by the Chief, OCS, in concurrence with their respective managers. These meetings/conference calls shall be coordinated and supervised by the SAC, OCS, or the Senior Special Agent; for example, California Gang Task Force meetings, etc.

52070.14.5 Inmate/Parolee Cooperation with Other Jurisdictions

Whenever a gang investigator becomes aware that a high notoriety inmate or parolee wishes to cooperate with the CDCR and/or other law enforcement agencies regarding a debriefing or other gang information, or if the matter is potentially complicated, the SAC, OCS, and the Senior Special Agent shall be notified. The Senior Special Agent, in concert with the SAC, OCS, shall determine the debriefing process, etc. Thereafter, the respective manager shall be apprised of the debriefing or other information. All outside agency

requests for debriefing shall be referred to the applicable investigator and/or the Senior Special Agent.

52070.14.6 Provide Emergency Telephone Number

All gang investigators shall provide their managers, SAC, and the Senior Special Agent with a telephone number where they can be reached after working hours in the event of an emergency.

52070.15 Gangs Defined

As referenced in CCR Section 3000, a gang is defined as any ongoing formal or informal organization, association, or group of three (3) or more persons, which has a common name or identifying sign or symbol whose members and/or associates engage or have engaged on behalf of that organization, association, or group in two or more illicit activities which include, but are not limited to, planning, organizing, threatening, financing, soliciting, or committing unlawful acts or acts of misconduct classified as serious pursuant to CCR Section 3315.

52070.15.1 Prison Gangs Defined

A prison gang is defined as any gang which originated and has its roots within the CDCR or any other custodial system.

52070.15.2 Disruptive Groups Defined

A disruptive group is defined as any gang, other than a prison gang.

52070.16 Authorized Gang Investigations

Only gangs and their affiliates specified in this DOM Article shall be investigated.

52070.16.1 Prison Gang Investigations

Prison gangs, as designated by the Chief, OCS, and their affiliates shall be investigated.

52070.16.2 Designated Prison Gangs

- Aryan Brotherhood (AB).
- Black Guerrilla Family (BGF).
- Mexican Mafia (EME).
- Nazi Low Rider (NLR).
- Northern Structure (NS).
- Nuestra Familia (NF).
- Texas Syndicate (TS).

Recognized prison gangs shall be designated by the Chief, OCS. The Chief, OCS, may amend the above list of identified prison gang(s) as necessary.

52070.16.3 Disruptive Group Investigations

Disruptive groups, and their affiliates, as recognized by the Chief, OCS, the SAC, OCS, the departmental managers, individual Wardens, institutional managers, and/or gang investigators shall be investigated.

52070.16.4 Recognized Disruptive Groups

Disruptive groups include, but are not limited to:

- Precursor gangs that may become prison gangs.
- Street gangs.
- Revolutionary groups.
- Motorcycle gangs.
- Terrorist groups/affiliates.

52070.17 Identification of Gang Affiliates

The identification of gang affiliates shall be accomplished by gang investigators in accordance with DOM, Chapter 6, Article 2, Case Considerations.

52070.17.1 Documenting Gang Affiliation on a CDC Form 812-A Or B

If, after the thorough investigation and documentation prescribed by DOM, Chapter 6, Article 2, the gang investigator concludes the inmate/parolee is gang affiliated (active or inactive) or has had a change in gang status, the investigator shall complete either a CDC Form 812-A, Notice of Critical Case Information - Prison Gang Identification, or a CDC Form 812-B, Notice of Critical Case Information - Disruptive Group Identification. On the form, the gang investigator shall document the affiliation, category of involvement, and the original, independent source items of information contained in the central file, which were used to support the conclusion. The completed CDC Form 812-A/B shall be retained in the inmate's/parolee's central file and the inmate/parolee shall be given a copy. Current activity is defined as any documented gang activity within the past six (6) years consistent with CCR Section 3341.5(c)(5).

52070.17.2 Documenting Gang Affiliation on A CDC Form 128-B

The gang investigator shall also document in narrative fashion on a CDC Form 128-B, General Chrono, the inmate's/parolee's gang affiliation, category of involvement, and specify each original, independent source item of information contained in the central file, which was relied upon to support the conclusion. A CDC Form 128-B shall also be used to document insufficient evidence to support a conclusion of gang affiliation. Documentation shall begin with a definite conclusion of finding based upon the evidence. It shall not be inconclusive or equivocal. The completed CDC Form 128-B shall be retained in the inmate's/parolee's central file and the inmate/parolee shall be given a copy. The investigator shall also assure the inmate/parolee has received copies of all non-confidential documents used in the validation. All confidential information used in the validation shall be disclosed to the inmate via CDC Form 1030, Confidential Information Disclosure Form. This documentation shall be disclosed to the inmate/parolee per the procedure defined in this DOM Article.

52070.17.2.1 Example Language for CDC Form 128-B, Re: Gang Affiliation Conclusion

After a thorough review of the evidence, I have concluded that inmate/parolee John DOE, E-00000, is an associate (etc.) of the prison gang/disruptive group "X." This is supported by: (1) "Item"; (2) "Item"; etc.

52070.17.2.2 Example Language For CDC Form 128-B, Re: A Conclusion Of No Gang Affiliation

After a thorough review of the evidence, I have concluded there is no or insufficient information to support that inmate/parolee John DOE, D-00000, is affiliated with the/any prison gang/disruptive group "X." (provide an explanation.)

52070.17.2.3 Verification Of An Inmate/Parolee's Gang Identification

The verification of an inmate/parolee's gang identification shall be validated or rejected by the Chief, OCS, or his/her designee.

52070.18 Category of Gang Involvement

The identification of the category of an inmate's/parolee's involvement within a gang shall be based upon the strength of the required documentation in the inmate's/parolee's central file, not upon multiple, same source documentation. Only the categories in this DOM Article shall be used to identify an inmate's/parolee's gang involvement.

52070.18.1 "Delete" Category

"Delete" designates the inmate/parolee is no longer believed to have been an affiliate of a gang due to a lack of substantiation. This identification is used to remove an inmate/parolee from the gang data base.

52070.18.2 "Member" Category

"Member" designates an inmate/parolee who has been accepted into membership by a gang. This identification requires at least three (3) original, independent source items of documentation indicative of actual membership. At least one (1) of the sources shall be a direct link to a validated member or associate or former member (dropout) identifying the inmate/parolee as a member. The source items shall meet the requirements established in CCR Section 3378.

52070.18.3 "Associate" Category

"Associate" designates non gang members who are involved periodically or regularly with members or associates of a gang. This identification requires at least three (3) original, independent source items of documentation indicative of association with VALIDATED gang members and/or associates. At least one (1) of the sources shall be a direct link to a validated member/associate, such as a validated member/associate or former member/associate (dropout). The source items shall meet the requirements established in CCR Section 3378.

52070.18.4 "Inactive" Category

An inmate housed in general population as a gang member or associate may be considered for "inactive" status when the inmate has had no documented gang activity for two (2) years. If the inmate paroled during this two year period, the parole time may be used in calculating the two (2) years. The "inactive" status can be changed back to (active) member/associate if the Department receives one (1) piece of evidence indicating the inmate has re-involved himself/herself with gang activity.

An inmate housed in SHU as a result of his/her gang member or associate status, may be considered for "inactive" status by the Departmental Review Board (DRB).

Consistent with normal reviews, the IGI shall conduct a review of the inmate's gang status. If it has been determined by the IGI that the inmate has had no gang activity for a period of six (6) years, the IGI shall submit a request to the SSU to change the inmate's status to "inactive." If the SSU concurs with the IGI'S recommended gang status change, a new CDC Form

128B-2 shall be issued identifying the inmate as an "inactive" member/associate. Upon issuing a new CDC Form 128B-2 identifying the inmate as "inactive," the DRB shall be notified by the housing institution. At its convenience, but not to exceed 180 days, the DRB shall meet and consider the inmate for placement in a level IV, 180 design housing unit for a period of observation. At the DRB'S discretion, the inmate may be transferred to a level IV, 180 design institution.

If the inmate paroled from the SHU prior to his/her six (6) year IGI "inactive" review, and is then returned to CDCR custody on a parole violation or new term, the parole time will be taken into account for the total time. However, if the most recent source of activity used in the inmate's validation is less than six (6) years old, the inmate shall be returned to SHU placement until he/she has obtained a minimum of six (6) years without any documented gang activity.

The "inactive" status may be changed back to (active) member/associate if the Department receives one (1) piece of evidence indicating the inmate has reinvolved himself/herself with gang activity.

52070.18.5 "Dropout" Category

"Dropout" designates that the inmate/parolee was either a gang member or associate who has discontinued gang affiliation. This identification requires the inmate/parolee to have cooperated in, and successfully completed, the debriefing process as specified in this DOM Article, Sections 52070.20 through 52070.20.8.3.

52070.19 Debriefing

Debriefing is the process by which an investigator determines whether an inmate/parolee (subject) has dropped out of a gang. A subject shall be debriefed only upon his or her request, although staff may ask a subject if he or she wants to debrief. Debriefing shall entail a two-step process that includes an interview phase and an observation phase.

52070.19.1 Role And Responsibility of The Gang Intelligence Operations, Debriefing Team

The debriefing team is tasked with the responsibility of debriefing validated prison gang members desiring to disassociate themselves from the gang. The primary objective of the team shall be to debrief validated prison gang members housed in SHU. The team may be used to perform other functions at the discretion of the Chief, OCS.

52070.19.2 Debriefing Objective and Purpose

The objective of a debriefing is to learn enough about the subject and the subject's current gang to:

- Allow staff to reasonably conclude the subject has dropped out of that gang.
- Allow staff to separate the subject from identified active gang affiliates, protecting the subject from their retaliation.
- Allow staff to reclassify the subject regarding possible new custody, housing, and assignment needs.
- A debriefing is not for the purpose of acquiring incriminating evidence against the subject.

52070.19.3 Pre-Debriefing Miranda Warning Not Given

A waiver of the Fifth Amendment right against self-incrimination is not a precondition of a subject undergoing debriefing. Subjects who undergo debriefings are not first given Miranda warnings with the express intent that any information provided shall be used administratively and not against them in a criminal proceeding.

Additionally, a pre-debriefing Miranda warning is not deemed necessary because:

- The subjects shall be debriefed only upon their request (staff may inquire if they want to debrief).
- Subjects shall not be required to complete their debriefing.
- Subjects may terminate their debriefing at any time.

52070.19.4 Miranda Warning

If during a debriefing the subject begins to relate the commission of a serious, chargeable crime, the gang investigator may stop discussion about the matter and continue on with another topic. After debriefing completion, the gang investigator may Mirandize and question the subject about the crime.

A subject may provide information during the debriefing that indicates self-incriminating evidence about a crime. After debriefing completion, the gang investigator may Mirandize and question the subject about the crime.

52070.19.5 Debriefing Success Not Determined By Invoking Miranda

If the subject then exercises the right not to incriminate him/herself, the exercise of that right shall not affect the determination of whether the subject successfully participated in the debriefing.

52070.19.6 Reporting Alleged Violations of Law or Regulation

Information obtained during a debriefing alleging an individual other than a peace officer, public official, or public employee committed violations of law or regulations shall be documented in the debriefing report and shall be reported by the gang investigator who conducted or supervised the debriefing to the gang investigator of the institution or other agency having jurisdiction over where the violation occurred. The debriefing report shall identify the institution/agency and individual to whom the allegation was reported. The recipient IGI shall notify institution management per local procedure.

52070.19.7 Reporting Alleged Public Official Violations of Law Or Regulation

Information obtained during a debriefing alleging a peace officer, public official, or public employee committed violations of law or regulation shall be immediately reported by the gang investigator who conducted or supervised the debriefing to their respective Warden or RPA. The gang investigator shall notify the affected agency(s) of the allegation(s). Such allegations shall be reported separately on a memorandum. If there is more than one (1) peace officer or other official, prepare a separate memorandum report on each person (unless they are alleged crime partners). The memorandum(s) shall:

- Be typed by a confidential employee.
- Not be entitled a "debriefing."
- Be marked "Confidential-Employee (or public official, etc.) Involved," as appropriate.
- Contain an assessment of the informant's reliability.
- Identify the agency and person notified of the allegation.
- Be signed or countersigned by the gang coordinator/investigator.

The gang investigator shall deliver copies of the memorandum(s) to management per local procedure. Additionally, copies shall be delivered to concerned departmental officials on a strict need-to-know basis and to the Senior Special Agent.

Copies of these memorandum(s) shall not be placed in the central file of the subject or any other inmate/parolee.

52070.19.8 Debriefing Report

Information obtained during a debriefing shall be documented on a confidential memorandum entitled a "debriefing report." The debriefing report shall be signed or countersigned by the gang investigator.

52070.19.8.1 Confidential Designation

Preceding the debriefing report narrative, the gang coordinator/investigator or their assistant shall document the need to designate the debriefing report as confidential, either from the subject, others, or both. A confidential designation shall adhere to the CCR, Title 15 regarding confidential material. This encompasses information which, if known to the inmate/parolee (subject or others), would endanger the safety of any person or would jeopardize the security of an institution.

52070.19.8.1.1 Confidential From Subject

A debriefing report may be designated as confidential from the subject when the subject has requested a confidential designation and the gang investigator has determined security would best be served by filing the report in the subject's confidential folder rather than another section of the central file.

If the debriefing report is designated confidential from the subject only per the subject's request, the subject shall review the debriefing report, initial each page of the report, and sign a declaration at the top of the first page which reads: "I, _____, have read this report and attest that it accurately relates the information I provided. The only exception(s) appear on my attached written statement."

If there are no exceptions, the subject shall write the words "None" at the end of the declaration and initial.

If there are one (1) or more exceptions, the subject shall write them on a separate, signed statement. The gang investigator or their assistant shall attach this signed statement to the back of the debriefing report and indicate "see attached" on the report.

52070.19.8.2 Recapitulation of Gang Affiliates

All persons reported by the subject as being an affiliate, including dropouts, of any gang, including those previously noted in the narrative, shall be

documented on a list in alphabetical order. The list shall be at the end of the debriefing report.

If possible, the list shall contain each identified person's full name, moniker, CDC number (or the words "NON-CDC" and date of birth [DOB]), hometown/area, gang involvement (AB Assoc., NF Cat III, etc.) and CDCR location (institution, parole region, or discharged). The required information may be obtained from the debriefed subject or via OBIS and CLETS.

Only information referencing specific gang related association, participation, activities, and/or conduct shall be considered for, or as, a source item for validating the inmate/parolee as a member/associate of a gang. The CDC Forms 812 and 812-C shall be updated as any critical information becomes known and is documented in the inmate/parolee's central file. The forms shall also be reviewed and updated at the time of any change in the inmate/parolee's status or placement.

52070.19.8.3 Debriefing Report Disposition

The gang investigator shall be responsible for having a copy of the debriefing report placed in the central file confidential folders of the subject (if appropriate) and all other inmates/parolees identified in the report. At the conclusion of the debriefing process and after the subject has initialed the pages or provided any exceptions to the report as defined in this DOM Article, Section 52070.20.8.1.1, the investigator shall place, along with the copy of the debriefing report, a sealed envelope which shall contain any and all original hand written documents, letters, notes, or drawings provided by the subject during the course of the debrief. The investigator shall then have the sealed envelope placed into the subject's central file confidential folder. The investigator shall place a tracking sheet on the exterior of the sealed envelope to record the name, date, and purpose of any individual opening the envelope. The investigator may keep copies of the documents except for any document normally identified as a personal biographical history of the subject's gang activities.

The gang investigator shall immediately send a copy of the debriefing report to the Senior Special Agent.

The Senior Special Agent shall file the data for future retrieval and information needs. Additionally, the Senior Special Agent shall route copies of debriefing reports to all other gang coordinators/investigators for their confidential review.

The recipient gang investigators shall not duplicate, distribute, or copy the reports and shall return the reports to the Senior Special Agent by first-class mail for disposal.

52070.20 Validation of Gang Affiliates

"Validation" is the term used to describe the quality control review of gang affiliate identification. "Validation" is done to ensure that gang affiliate identifications are in compliance with departmental regulations.

52070.20.1 Validation Request by Gang Investigator

The gang investigator who verifies an inmate's/parolee's gang affiliation and category of involvement shall complete a Form Q, Gang Validation Worksheet (Exhibit "A"), a Form Q-1, Body Markings Diagram (Exhibit "B"), and a Form Q-2, Body Markings Photographs (Exhibit "C") on the inmate/parolee. The gang investigator shall attach to the completed Q series forms, a copy of the coordinator's CDC Form 128-B memorandum with copies of the supporting documentation. This shall be known as a validation package.

Prior to submission of a validation package to the OCS, or during the inactive review process, the subject of the investigation shall be interviewed by the IGI or designee and given an opportunity to be heard in regard to the source items used in the validation or inactive review. Inmates shall be given written notice at least 24 hours in advance of the interview. The interview may be held earlier if the inmate waives, in writing, the 24 hour preparation period. All source items referenced in the validation or inactive review shall be disclosed to the inmate at the time of notification. The inmate shall be given copies of all non-confidential documents unless otherwise requested in writing by the inmate. Confidential information used in the validation or inactive review shall be disclosed to the inmate via a CDC Form 1030, Confidential Information Disclosure Form. The interview shall be documented and include a record of the inmate's opinion on each of the source items used in the validation. Staff shall record this information and provide a written record to the inmate within fourteen (14) calendar days and prior to submission of the validation package to the OCS. The documented interview shall be submitted with the validation package or inactive review to the OCS for consideration in the approval or rejection of the validation or in consideration of the inmate's continued current active or inactive status.

The inmate's mental health status and/or need for staff assistance shall be evaluated prior to interview. Staff assistance shall be assigned per guidelines set forth in CCR Section 3318.

The gang investigator shall forward the validation package to the Senior Special Agent, Gang Intelligence Operations, SSU, or designee to request validation.

52070.20.1.1 Security of Q Series Forms By Gang Coordinator/Investigator

The Q series forms are work products that shall not be placed in the inmate's/parolee's central file. Further, disclosure of the category codes on the Form Q to inmates/parolees or unauthorized persons would adversely impact gang data base security, thereby jeopardizing the security of institutions and safety of individuals.

Note: The Q series forms (not filled out) are not considered RESTRICTED. However, once the Q series forms are used to record information regarding inmates/parolees, the forms shall then be classified as RESTRICTED.

52070.20.2 Validation Review by SSU

Gang Intelligence Operations, SSU, shall promptly perform a quality control review of all validation packages received. If the inmate's/parolee's gang affiliation and category of involvement has been properly identified, the identification shall be validated.

52070.20.3 Validation Action by Senior Special Agent

The Senior Special Agent or designee shall promptly document the validation action on a CDC Form 128-B2. The original CDC Form 128-B2 shall be sent to the originating gang investigator for placement in the inmate's/parolee's central file and a copy shall be sent for transmittal to the inmate/parolee. No gang affiliation shall be considered validated until this process is completed. This paragraph shall not apply to validation actions completed prior to this manual Section being placed into effect.

52070.20.4 Validation Rejection by Senior Special Agent

If the inmate/parolee has not been properly identified as a gang affiliate, the Senior Special Agent or designee shall promptly document on a CDC Form 128-B-2 that the identification does not meet current departmental standards for validation. The CDC Form 128-B2 shall direct that the erroneous CDC Forms 812-A/B and 128-B identifying the inmate/parolee as a gang affiliate be removed from the central file.

52070.20.4.1 Classification and Parole Representative (C&PR) or RPA I (Records Office Administration) Notification

The original memorandum shall be sent to the C&PR/RPA I (records office administration) of the originating institution/parole region for inclusion into the inmate's/parolee's central file and a copy shall be sent for transmittal to the inmate/parolee.

The C&PR/RPA I (records office administration) shall have the specified documents removed from the central file.

52070.20.4.2 Gang Investigator Notification

A copy of the memorandum shall be sent to the originating gang investigator. This copy shall cite the errors and/or deficiencies of the identification and shall contain suggestions about how to meet validation requirements. The validation package shall be returned to the originator along with a copy of the memorandum.

52070.20.5 C&PR Responsible For Marking Validation Documents

The C&PR shall be responsible for ensuring that each central file document identified and submitted as a source for gang validation is clearly and permanently marked according to its acceptance or rejection on the CDC Form 128B-2.

If the CDC Form 128B-2 identifies that the document was accepted as a source for validation, then the C&PR or designee shall mark the document with the statement; "This document meets the validation requirements established in CCR Section 3378."

If the CDC Form 128B-2 identifies that the document was rejected as a source for validation, then the C&PR or designee shall mark the document with the statement; "This document does not meet the validation requirements established in CCR Section 3378."

52070.21 Inmate/Parolee Appeals of Gang Identification And/Or Validation

Inmates/parolees may appeal their identified and/or validated gang affiliation and category of involvement pursuant to the CCR, Title 15 and the DOM.

52070.22 Gang Data Base

The restricted gang data base shall be maintained by the Gang Intelligence Operations section, SSU. It shall contain the names and identifiers of CDCR

inmates, parolees, dischargees, and others whose central files or other gang files may contain documentation indicative of specified gang affiliation.

The gang data base shall be compiled from validated gang identification documents.

52070.22.1 Gang Data Base Disclosure

Departmental gang investigators shall have direct access to the gang data base to assist them with identifying and tracking gang affiliates. Access may be by computer interface, floppy/CD diskette, or hard copy (printout).

When requested, departmental gang investigators may be issued a numbered gang data base diskette/CD and/or printout. The recipient shall be responsible for its security. The recipient shall be responsible for immediately returning the diskette or printout to the Senior Special Agent, Gang Intelligence Operations section by first-class mail within three (3) days of vacating the gang investigator position or upon instruction of the Senior Special Agent. Newly assigned staff shall be issued their own numbered copies.

Gang Intelligence Operations staff and gang investigators shall verbally share gang data base information with departmental personnel and personnel from other criminal justice agencies providing:

- The information shall be for intelligence use only.
- The identity of the requestor is clearly established.
- The requestor has an official need to know.

Except as provided for in this DOM Article, the gang data base shall not be disclosed, duplicated, or issued without authorization of the Chief, OCS.

52070.23 Critical Case Management System (CCMS) Computer Program

The restricted CCMS (pronounced see-miss) computer program is designed for departmental storage and retrieval of criminal intelligence information, including access to the SSU Gang Data Base and/or other gang records. Such access shall be by computer interface or floppy/CD diskette. CCMS shall be programmed not to print out any SSU gang records.

52070.23.1 CCMS Management Responsibility

The Assistant Secretary, Enterprise Information Services (EIS), shall have management responsibility for CCMS computer program installation, maintenance, and modification. The Assistant Secretary, EIS, shall coordinate with the Director, DAPO, the SAC, OCS, and the Senior Special Agent of Gang Intelligence Operations, SSU, regarding CCMS matters.

52070.23.2 CCMS Use

CCMS shall only be used by the DAPO gang investigators and Investigative Services Unit personnel for the storage and retrieval of criminal intelligence file information.

52070.23.2.1 Authorized Data Storage

Criminal intelligence files shall contain information only on the activities and associations of:

- Individuals who are suspected of being or having been involved in the actual or attempted planning, organizing, threatening, financing, or commission of criminal acts; or are suspected of being or having been involved in criminal activities with known or suspected crime figures.
- Organizations, businesses, and groups which are suspected of being or having been involved in the actual or attempted planning, organizing, threatening, financing, or commission of criminal acts; or are suspected of being, or having been, illegally operated, controlled, financed, or infiltrated by known or suspected crime figures.

52070.23.2.2 Unauthorized Data

Data excluded from criminal intelligence file storage includes material regarding religious, political, or sexual information which does not relate to criminal conduct.

52070.23.3 CCMS Security

Revised August 9, 2011

Computers or computer terminals that have the CCMS program shall be restricted to DAPO, gang investigators, Investigative Service Unit personnel, and OCS personnel use only.

Inmates/parolees shall have no access to a computer or computer terminal that has the CCMS program.

The CCMS program shall be only on computers which are protected by a security system approved by the Assistant Secretary, EIS (i.e., Watchdog).

In the event of computer failure, the authorized user shall contact the local Associate Information Systems Analyst (AISA) or EIS for assistance. No computer shall be removed from its assigned station for repair or other

reason unless the hard drive has been erased and reformatted either by magnet or system commands

52070.24 Gang Information Restriction

Revised August 9, 2011

Except OCS and as otherwise provided for in DOM, Chapter 6, Article 2 and this DOM Article, there shall be no departmental computer system or program, or other method of data storage, including written lists, which contains gang affiliation and/or gang intelligence information about individuals.

52070.25 Classification of Gang Affiliated Inmates

Gang affiliated inmates shall be classified in accordance with the CCR, Title 15 and the DOM on the basis of documented individual behavior and case needs.

At the inmate/parolee's annual review, any information or source items received/developed during the preceding year, which meets the validation requirements as defined in CCR Section 3378, shall be disclosed to the inmate/parolee on the CDC Form 812 A/B. The information need not be disclosed if it is part of an ongoing investigation or if disclosure would compromise an ongoing investigation. The inmate/parolee shall be interviewed regarding the information and a request shall be made to the OCS for an updated CDC Form 128B-2.

52070.26 Transfer Criteria for Gang Affiliated Inmates

Gang affiliated inmates shall be transferred in accordance with the CCR, Title 15 and the DOM on the basis of documented individual behavior and case needs.

52070.27 Visiting Privileges for Gang Affiliated Inmates

Gang affiliated inmates shall have visiting privileges in accordance with the CCR, Title 15 and the DOM on the basis of documented behavior and case needs.

52070.28 Work Assignments for Gang Affiliated Inmates

Gang affiliated inmates shall have work assignments in accordance with the CCR, Title 15 and the DOM on the basis of documented behavior and case needs.

52070.29 Mail for Gang Affiliated Inmates

Gang affiliated inmates may send and receive mail in accordance with the CCR, Title 15 and the DOM on the basis of documented individual behavior and case needs.

52070.30 Training for Staff

Peace officer and ancillary staff shall receive training regarding prison gangs and disruptive groups.

52070.30.1 Initial Peace Officer Training

Gang training shall be incorporated into the curriculum of the Correctional Officer and Parole Agent academies.

52070.30.2 Peace Officer and Ancillary Training

Peace officer and ancillary staff shall receive ongoing gang training within their respective institutions or regions.

52070.30.3 Newly Assigned Gang Investigators Training

Revised August 9, 2011

Gang investigators shall receive orientation training as soon as possible within thirty (30) days of their assignment from the Senior Special Agent or designee, Gang Intelligence Operations, OCS, and either the DAI, Chief of Investigative Services, or the DAPO, RPA, or designee.

The Senior Special Agent shall arrange and coordinate the training. The instructor shall designate the training location.

52070.31 Training For Personnel From Other Jurisdictions

The CDCR shall provide gang training, free of charge, for peace officers and non-sworn intelligence analysts from other jurisdictions.

52070.31.1 Training Center Guest Students

Qualified personnel from other jurisdictions may attend regularly scheduled Correctional Officer Academy basic gang classes at the departmental training center as guest students on a space-available basis.

Space availability shall be ascertained by subtracting the number of departmental students in the class from the classroom's maximum occupancy rating.

The training center administrator shall transmit to the Senior Special Agent, Gang Intelligence Operations, SSU, the scheduled times and dates of gang classes and the number of guest student spaces available for each class.

The Senior Special Agent shall maintain a list of qualified guest student applicants and shall schedule them for the available spaces. Both the training

center administrator and the applicants shall be notified in writing of the scheduling.

52070.31.1.1 Guest Student Qualifications

In order to qualify as a guest student, the applicant shall:

- Be a peace officer or non-sworn intelligence analyst.
- Be employed by a Department/agency which is a member of the California Gang Task Force.
- Obtain authorization to attend the class from the employing Department/agency, including arrangements for travel, lodging, and meals (which shall not be provided by the training center).

52070.31.1.2 Guest Student Applications

Guest student applications shall be submitted to the Senior Special Agent for review and approval.

52070.31.2 Training Given On-Site At Other Jurisdictions

Other jurisdictions may request on-site gang training for sizeable groups of their peace officers and non-sworn intelligence analysts.

These requests may be directed to any departmental gang investigator. The gang investigators shall provide the requested training upon approval of local management.

The requests from other jurisdictions for on-site gang training shall be granted as often as possible, in keeping with the gang investigators work/training schedules.

Gang investigators may contact the Senior Special Agent for assistance regarding gang training, if necessary.

52070.32 Revisions

The Assistant Secretary, OCS, shall ensure that the contents of this Section are accurate and current.

ARTICLE 23 — INMATE DISCIPLINE

Effective January 19, 1990

Updated January 30, 2015

52080.1 Policy

The Department provides a graduated system of inmate discipline designed to be administered commensurate with the seriousness of the offense. Discipline shall be so administered as to maintain control, conserve human values and individual dignity and promote socially desirable changes in attitude and behavior.

52080.2 Purpose

The inmate disciplinary system incorporates statutory and constitutional mandates and provides essential due process guarantees to ensure fairness and equal application. Wardens and RPAs shall ensure that inmate discipline is applied and administered in accordance with procedures provided in this section and in CCR 3310 through 3345.

Generally, breaches of conduct or law by inmates are observed by department staff. However, any person may initiate the disciplinary process by reporting a probable violation to a Department employee.

52080.3 Disciplinary Methods

Inmate discipline shall be dispensed by one or more of the following methods in institutions and community based correctional facilities:

- Verbal counseling. Misbehavior of a minor nature may be handled through verbal counseling and instruction. When, in the opinion of the staff member conducting the counseling/instruction, the problem has been corrected, a written report of the matter need not be submitted.
- CDC Form 128-A, Custodial Counseling Chrono. When counseling/instructions as described above are deemed unsuccessful in correcting the problem, a CDC Form 128-A shall be prepared. The CDC Form 128-A shall include complete circumstances regarding the misbehavior and a statement that repetition of the behavior may result in more serious disciplinary action. When minor contraband is involved, the CDC Form 128-A shall include disposition of the confiscated contraband. If a CDC Form 128-A is completed, one copy is given to the inmate and the original is placed in the inmate C-File. At this point, the disciplinary process ends.

- CDC Form 115, Rules Violation Report. Inmate behavior which is a violation of law, CCR (15), and/or approved procedure and not of a minor nature, shall be reported on a CDC Form 115.

52080.3.1 Supervisory Review

Disciplinary reports (CDC Form 115 and CDC Form 128-A) shall be submitted by the reporting employee to their immediate supervisor for review and approval. Supervisory review shall not delay prescribed time limits for subsequent action in the disciplinary process.

52080.3.2 Classification of CDC Form 115

A CDC Form 115 shall be submitted to designated staff at a job classification not less than the level required to conduct serious disciplinary hearings for classification of the violation report. CDC Form 115s shall be classified as either administrative or serious.

- Administrative. Criteria has been established in CCR 3314.
- Serious. Criteria has been established in CCR 3315.

The classification of a rule violation report determines the procedure to be followed in preparing for and in conducting a disciplinary hearing and the action that may be taken if the inmate is found guilty of the violation.

After proper classification of a CDC Form 115, the offender receives a copy of the typed CDC Form 115. CDC Form 804, Notice of a Pending CDC-115 is placed in the inmate C-File. The CDC Form 804 is used to ensure that the inmate is not approved for release or transfer to another facility while there is a pending CDC Form 115.

52080.3.3 Audit of Disciplinary Rule Violation Report

Upon completion of the hearing portion of the violation charges, an audit of the violation report shall be completed by the Chief Disciplinary Officer (CDO).

The audit shall ensure:

- The CDC Form 115 and 115-A are complete.
- The serious/administrative classification is correct.
- Due process and time constraints were met.
- Charges and circumstances of offense coincide.
- Assessed credit forfeiture conforms to division of offense and credit loss schedules (CCR 3323).
- Findings and disposition were justified by documentation.
- Investigative employee's/staff assistant's determination is appropriate.
- Ensures a copy of the completed CDC Form 115 and 115-A is delivered to the inmate within five working days of audit by CDO.

52080.3.3.1 CDO Actions

The CDO, following the audit shall, perform one of the following:

- Approve the CDC Form 115 as submitted.
- Order in writing with a copy to the inmate the CDC Form 115 reissued and reheard if:
 - CDC Form 115 is incomplete.
 - Due process rights were not afforded.
- Amend the CDC Form 115 classification and disposition to a lesser, but included charge.

52080.3.4 Approval of Disciplinary Methods/Actions

All disciplinary methods/actions are subject to the approval of the Warden or RPA. The Warden or RPA may set aside, dismiss, order a different action, or order a rehearing of the rules violation upon:

- Their own motion.
- Recommendation of staff.
- Inmate's request or appeal.

An order for a different method of discipline or hearing of disciplinary charges shall not result in any greater penalty or more severe action than originally taken.

EXCEPTION: Upon discovery of new information or evidence which was not available or reasonably discoverable at the time of the disciplinary action, the CDC Form 115 may be reissued and reheard by a different hearing officer. Findings and penalty assessed may occur without regard to the previous hearing.

52080.3.5 Chief Disciplinary Officer (CDO)

The CDO duties shall not be designated below the level of Associate Warden or PA. The CDO shall:

- Audit CDC Form 115 per the DOM 52080.3.3.

- Review the disciplinary process for problem areas and take corrective action as necessary.
- Review the treatment of inmates confined in DD and consider a modification of sentence when evidence indicates that the inmate is ready to conform to the rules.
- Refer all felonies occurring on institution property, including felony inmate conduct, to the institution's investigations unit for possible investigation and referral for criminal prosecution.
- Initiate disciplinary proceedings for cases referred for prosecution when an inmate revokes, in writing, a previous request for postponement of the disciplinary hearing; the DA declines prosecution; or court proceedings have concluded.
- Determine the proper senior hearing officer or committee level for Divisions A-1, A-2, and B serious CDC Form 115. This determination may be delegated to a captain, CC-III, or PA-III.
- Provide training in the disciplinary process.

Note: Conservation camps shall not forward serious CDC Form 115s to the CDO for examination due to the affect of geographic distances upon established time limits; however, telephonic discussion of the more serious violations is encouraged.

52080.3.6 Senior Hearing Officer (SHO)

SHOs shall not be designated below the level of captain; CC-III; PA-III; or an experienced lieutenant, CC-II and PA-II. Experienced means:

- An employee who is permanent at the designated staff level and who has received IST and/or OJT covering the responsibilities of an SHO, including observation of a minimum of five actual disciplinary hearings.
- The employee has been certified by the CDO or his/her designee, in writing, as competent to conduct hearings.

Note: A probationary, limited term, or training and development employee meeting the stated criteria and designated staff level may be used. Acting staff whose permanent position is at a lower level than that designated shall not be assigned.

52080.3.7 Hearing Officer (HO)

HO duties shall not be designated below the level of lieutenant or an experienced sergeant, CC-I, or PA-I. Experienced is defined in DOM 52080.3.6.

52080.3.8 Changing Rule Violation Classification

Revised April 29, 1991

Classification of rule violations may be changed as follows:

- The staff member who initially classified a CDC Form 115 according to the seriousness of the charges, or a staff member at a higher level, may change the classification of the report before the hearing is held.
 - If classification of the CDC Form 115 is changed, the inmate shall be issued a copy of the modified CDC Form 115 at least 24 hours prior to the hearing, unless the inmate, in writing, waives the 24 hour time period.
- The official conducting the disciplinary hearing may change a serious classification to an administrative classification as a finding of the hearing.
- The Warden or RPA may change a serious classification to an administrative classification before or after a hearing is held.

An administrative classification may not be changed to a serious classification after an administrative violation hearing except upon the order of the Warden, RPA, or the director for a rehearing of the charges as a serious violation.

- The rehearing order shall be in writing and a copy shall be given to the inmate. The order shall include the reason(s) for the rehearing order. The inmate shall be afforded all due process rights prior to and during the hearing.

52080.3.9 Disciplinary Hearing Worksheet

A CDC Form 115-B, Disciplinary Hearing Worksheet shall be completed for compiling necessary information to be recorded on CDC Forms 115/115-A.

Information in each section shall be completed at the hearing. Information required as follows:

- Inmate's:
 - Departmental Identification Number (CDC number).
 - Name.
 - Housing.

- Violated rule number(s).
- Date of CDC Form 115. (Date of issuance of CDC Form 115.)
- Institutional log number.
- Purpose of hearing.
 - Inmate rights explained.
 - Health of the inmate (good, fair, poor, and if a problem document same).
- How did the inmate plead?
- Was hearing postponed? If so, fully explain reason for postponement and date and time hearing reconvened.
- Evidence presented at hearing. (Be concise but thorough.)
- Were witnesses requested?
 - If granted, witness name, number, and their complete statement.
 - If not granted, the complete reason for denial.
- List other factors considered at hearing.
- Finding - guilty or not guilty.
- Disposition.
 - Explain.
 - What is the basis for the finding? Explain.

52080.4 Administrative Rule Violations

CDC Form 115s for misbehavior shall be classified administrative if the alleged conduct is of a minor nature as described in CCR 3314. Administrative rule violations include but are not limited to:

- Petty theft or unauthorized acquisition or exchange of personal or state property.
- Destruction or misuse of state property valued at \$400 or less.
- Possession of otherwise approved property, materials, items, or substances in excess of authorized limits.
- Possession of property, materials, items, or substances not authorized by the approved property list which presents no threat to security.
- Misuse of food.
- Out-of-bounds which presents no threat to security.
- Misuse of telephone privileges which presents no threat to security.
- Violations of mail regulations or procedures which presents no threat to security, including, the sending of disturbing or offensive correspondence, as described in CCR 3135.
- Violations of visiting regulations or procedures which presents no threat to security.
- Failure to meet work or program expectations which are within the inmate's abilities.
- Reporting late to or failure to attend a work or program assignment.
- Participating in gambling not likely to result in protective custody needs, serious injury or threat of serious injury.
- Use of vulgar or obscene language.
- Failure to follow a temporary community leave or community based correctional facility itinerary.
- Being under the influence of alcoholic beverages, drugs, or intoxicants in a community based correctional facility.

52080.4.1 Hearing Officer

An administrative rule violation shall be heard by a disciplinary hearing officer (HO) or senior hearing officer (SHO) with following dispositions:

- Find the inmate guilty if the facts support the charge.
- Dismiss the matter if the facts do not support the charge.
- Find the inmate guilty of the charge but, in the interest of justice or because of other extenuating circumstances, dismiss the formal disciplinary charge and report the inmate's behavior on a CDC Form 128-A as described in DOM 52080.3.
 - If treated as a counseling, the CDC Form 115 shall be disposed of as indicated in DOM 52080.15.
- Determine the violation to be more serious than is appropriate for an administrative violation hearing.
 - The HO shall terminate the administrative violation hearing and have the matter scheduled for a serious violation hearing. A new CDC Form 115 shall be issued and due process rights granted.

52080.4.2 Witnesses, Assistance

The inmate does not have the right to have an investigative employee assigned nor to call witnesses at administrative hearings. As deemed necessary by the HO, the inmate may be given assistance by staff to understand the proceedings.

52080.4.3 Administrative Violation Dispositions

If the inmate is found guilty of an administrative violation, one or more of the following authorized dispositions may be made:

- Counseling, with or without a reprimand.
- Temporary suspension of designated privileges for a period not to exceed 30 days from the date the inmate is or was deprived of the privilege.
- Confinement to Quarters (CTQ), DOM 52080.23 provides the definition of CTQ, for a period not to exceed five days. Inmates shall be released to go to work and program assignments.
- One or more weekend and/or holiday lockups not to exceed a total of ten days. Weekend and holiday lockups may not be imposed in addition to CTQ.
- Assignment to extra duty, not to exceed 40 hours.
- Place a restriction on the inmate's withdrawal from their trust account for violations of canteen regulations or procedures or for violations involving the deliberate destruction, damage, or misuse of state/private property when the inmate refuses to pay for the cost of repair or replacement of such property, as described in CCR 3090.
- Suspend all or part of any authorized disposition for a period not to exceed 90 days pending the inmate's acceptance and compliance with all specific conditions established for suspension of sentence.
- Invoke all or part of a currently suspended disposition for a previous violation when the finding of fact on the current violation also constitutes a finding of violation of the conditions established for the previously suspended sentence.

Note: The inmate shall have appeal rights and the procedure for appeals fully explained. The explanation shall be documented on CDC Form 115.

52080.5 Serious Rule Violations

Inmate misbehavior shall be classified as a serious rule violation if the act or action of the inmate is an act of force or violence against another person, a breach of or presenting a threat to institution/community based correctional facilities (facilities) security, a serious disruption of these facilities operations, the introduction, possession or use of dangerous contraband, controlled substances, participation in gambling that is more likely than not to result in protective custody needs, serious injury or threat of serious injury, or is an attempt to commit any such act coupled with a present ability to carry out the threat or attempt if not prevented from doing so. Serious rule violations include but are not limited to:

- Any act for which the inmate could be prosecuted for a felony, whether or not prosecution is undertaken.
- Any act for which the inmate could be prosecuted for a misdemeanor whether or not prosecution is undertaken.
- Any act or misconduct which is reportable to any parole board or releasing authority.
- Intentional destruction of state/private property valued at more than \$400, or intentional damage to state/private property requiring more than \$400 to repair or replace.
- Hideout or preparation to escape.
- Possession of escape paraphernalia.
- Tattooing or possession of tattoo paraphernalia.
- Possession of money in an amount of five dollars or more without proper authorization.
- Acts of disobedience or disrespect which by reason of intensity or context create a potential for violence or mass disruptive behavior.
- Willfully inciting or attempting to incite other persons to commit an unlawful act of force or violence.
- Refusal or failure to perform work or participate in programs as ordered or assigned.
- Participation in a strike or work stoppage.
- A pattern of administrative rule violations indicating significant maladjustment, which are of increasing seriousness or are of special significance in light of existing release date.

- Mail or visiting violations which create a threat to the safety of any individual or facility security, including the introduction of dangerous contraband or a controlled substance, or the obtaining or attempt to obtain a family visit by falsification of information.
- The throwing of any liquid or solid substance on a non-prisoner.
- Unauthorized possession of official departmental records or documents which could affect any inmate's sentence.
- Being under the influence of alcoholic beverages, controlled substances, or intoxicants in any facility.
- Participation in gambling that more likely than not will result in protective custody needs, serious injury or threat of serious injury.
- Refusal to submit to a test for controlled substances.
- Late return or failure to return from authorized temporary release.
- Unauthorized possession of materials or substance which has been diverted from its original manufactured state or purpose and has the potential to be made into a weapon (i.e., metal, paper, plastic, wood, wire, etc.)
- Involvement in a conspiracy to do any or all of the above.

52080.5.1 Hearing Official

Serious rule violations shall be heard by an institution disciplinary committee, disciplinary subcommittee, or a senior disciplinary hearing officer.

52080.5.2 Investigative Employee

The inmate may be assigned an employee to assist in the investigation, preparation or presentation of a defense at the disciplinary hearing if it is determined by the CDO that any of the following conditions exist:

- The inmate is illiterate.
- The complexity of the issues makes it unlikely that the inmate can collect and present the evidence necessary for an adequate comprehension of the case.
- The inmate's housing status makes it unlikely that the inmate can collect and present the evidence necessary for an adequate comprehension of the case.

52080.5.3 Witnesses

An inmate may request friendly and adverse witnesses to attend the hearing. Witnesses shall be called unless the person conducting the hearing denies the request for one of the following reasons:

- Endangerment of the witness.
- Determination that the witness has no relevant information.
- The witness is unavailable.

If an inmate's request for a witness is denied, the reasons shall be documented on the CDC Form 115-A. Whether or not the inmate requests a witness for a hearing, a witness may be called if the person conducting the hearing determines the witness may have information necessary to the finding of fact.

The reporting employee with relevant information shall attend the hearing if requested by the inmate. Under the direction of the person conducting the hearing, the inmate has the right to ask questions of all witnesses called.

- When an inmate whose disciplinary charges are being adjudicated is ordered to leave the hearing room, all witnesses, including staff witnesses, shall leave the room.

Nothing in this section shall preclude making a witness available for a hearing by telephone.

52080.5.4 Exclusion From Fact Finding Deliberations

Persons who reported the rule violation, or who supplied supplemental reports to the rule violation report, or who observed the alleged violation, or investigated the alleged misbehavior, or assisted the inmate in preparing for the hearing, or for any other reason have a predetermined belief that the inmate is guilty or innocent shall not sit as a fact finder in a disciplinary hearing nor be present while the fact finders are conducting deliberations to decide guilt or innocence and the appropriate disposition if the inmate is found guilty.

52080.5.4.1 Transferred Inmate Witness

An inmate witness shall not be transferred between facilities to testify at disciplinary hearings unless the CDO of the facility hearing the charges determines a fair and impartial hearing cannot be conducted without the presence of the inmate's witness. When an inmate is not available because of transfer, the CDO of the institution where an inmate witness is located shall be notified of the need to appoint an investigative employee to discuss the

case with the investigative employee of the institution conducting the hearing, to interview the witness, to prepare a written investigative report, and to forward the report to the institution where the hearing will be conducted.

52080.5.4.2 Transportation Personnel Witness

When a serious rule violation occurs during transportation of an inmate, transporting staff witnesses, if requested, shall be present at the hearing or shall be telephonically available for questioning during the hearing.

52080.5.5 Disposition Options

Upon completion of the fact-finding portion of the hearing, and based upon information presented in the disciplinary report and in the hearing, the following actions may be taken:

- The inmate may be found not guilty and the charges dismissed.
- The inmate may be found guilty of an administrative level violation rather than a serious level violation and the disciplinary report reclassified accordingly, with the inmate assessed an authorized administrative level disposition as provided in CCR 3314.
- The inmate may be found guilty as charged and assessed an appropriate serious level disposition.
- The inmate may be found guilty of a lesser but included offense, the offense group designation properly modified, and assessed the penalty disposition for that offense group.

52080.5.6 Dispositions of Serious Disciplinary Charges

An inmate charged with a serious rule violation may be subject to the following actions/dispositions:

- Immediate segregation from the inmate general population pending preliminary investigation of the charge, subject to the provisions of CCR 3317 and 3335.
- Classification review of segregated status pending a disciplinary hearing on the charge(s) when a disciplinary hearing is not held prior to the next scheduled meeting of the classification committee.
- Referral to the DA for possible criminal prosecution when the behavior is a criminal offense.
- A disciplinary hearing on the charge(s) and imposition of one or more of the following dispositions if found guilty as charged:
 - Mandatory forfeiture of credit on term of imprisonment for specific acts of behavior, as set forth in CCR 3323.
 - Any penalty authorized for an administrative rule violation as set forth in CCR 3314.
 - Designated privileges may be temporarily suspended for up to 90 days from the date the inmate is or was deprived of the privileges.
 - CTQ or confinement to DD for a period not to exceed ten days. An inmate may be released to go to work and program assignments if such release will not jeopardize institution security. A longer period of confinement requires prior approval of the director.
 - One or more weekend and/or holiday lockups not to exceed a total of ten days. This may not be imposed in addition to CTQ.
 - All or part of any disposition except the denial or forfeiture of credits on term of imprisonment may be suspended for a period not to exceed six months pending the inmate's acceptance and compliance with all specified conditions established for suspension of sentence. A disposition denying or forfeiting credit on term of imprisonment shall not be suspended.
 - Any currently suspended disposition for a previous violation may be invoked when the finding of fact on the current violation also constitutes a violation of the conditions established for the previously suspended sentence. In invoking the previously suspended disposition, confinement to quarters or to isolation status shall not be for longer than ten days except as provided in CCR 3322.
- Referral to a classification committee for review of credit forfeiture and possible program realignment.

52080.5.7 Classification Committee

Any behavior identified as serious in CCR 3315 or refusal or failure to participate in assigned program resulting in loss of credits, or which for any other reason requires reconsideration of previously prescribed custody, privilege group, work, program or housing assignments, shall be referred to a classification committee for review.

The classification committee shall do one or more of the following:

- Reaffirm previously prescribed custody classification, privilege group, work, program, and housing assignment.
- Realign previously prescribed custody classification, privilege group, work, program, and housing status which may include placement in zero credit earning status.
- Recommend transfer to another facility of the Department.
- Recommend placement in a specialized housing unit for management or security purposes.
- Affirm, disallow, or modify the credit loss action of a disciplinary hearing. The classification committee's review of a credit loss shall occur at the committee's next scheduled meeting following completion of the disciplinary process.
- The review of any disciplinary credit loss action shall constitute the first level of appeal review should the inmate subsequently appeal the CDC Form 115. The classification committee review shall ensure the CDC Form 115 is accurate, complete, contains required documentations, and the inmate received due process rights. The committee shall review any confidential material used during the disciplinary hearing to ensure proper application thereof.

52080.6 Referral for Criminal Prosecution

All conduct that constitutes a crime, which occurs on facility property, shall be referred by the Warden or RPA to appropriate criminal authorities for possible investigation and prosecution when there is evidence substantiating each of the elements of the crime to be charged.

Notwithstanding the existence of evidence substantiating each of the elements of the crime to be charged, conduct which constitutes a crime shall not be referred to the local DA for investigation and prosecution where the local DA has submitted in writing to the Warden or RPA, criteria for which certain crimes shall not be prosecuted, and where the crime involved meets those criteria.

The criminal authority to which a case is referred shall be requested to inform the Warden or RPA in writing within ten working days whether prosecution will or will not be undertaken. The inmate shall be notified in writing when their conduct has been referred to criminal authorities for possible prosecution.

The referral of an inmate's alleged criminal conduct to criminal authorities for possible criminal prosecution shall not stay the time limits for a disciplinary proceeding unless the inmate submits a written request to the chief disciplinary officer for postponement of the disciplinary proceeding pending the outcome of the referral or has signed the CDC Form 115-A requesting postponement of the disciplinary hearing.

52080.6.1 Inmate's Request for Disciplinary Postponement

When disciplinary proceedings have been postponed at the inmate's request pending the outcome of a referral to criminal authorities for possible criminal prosecution, the inmate shall not be entitled to any further departmental hearings on the question of guilt or innocence on the disciplinary charges before a disciplinary proceeding is held. Postponement of the disciplinary proceeding at the inmate's request or by staff shall not preclude release from segregated housing before the disciplinary proceeding is held.

52080.6.2 Revocation of Postponement Request

An inmate may revoke a request for postponement of the disciplinary proceeding at any time up until an accusatory pleading has been filed against the inmate by the criminal authority to whom the inmate's conduct has been referred for possible prosecution. The revocation of a request to postpone disciplinary proceedings shall be submitted in writing to the chief disciplinary officer.

When disciplinary proceedings have been postponed at the inmate's request, the disciplinary proceedings shall not be resumed until:

- The inmate has revoked the request to postpone disciplinary proceedings. The disciplinary proceeding shall be held within 30 days of receipt of the inmate's written revocation of a request to postpone the hearing.
- Notice is received that the criminal authorities do not intend to prosecute. The disciplinary hearing shall be held within 30 days of the receipt of such notice.
- Criminal proceedings have terminated. The disciplinary hearing shall be held within 30 days of receipt of the court's action.

52080.6.3 Criminal Authorities' Decision

A referral to criminal authorities or criminal authorities' decision not to prosecute, or a trial court's dismissal of criminal charges without having

found the inmate not guilty of criminal conduct shall have no bearing on the findings and disposition of disciplinary charges.

- A finding of guilty or not guilty by a court shall be accepted as the finding of fact on the same charges in a disciplinary hearing. If a court finds the inmate not guilty after a finding of guilty in a disciplinary hearing the disciplinary charges shall be dismissed.
- A court's action shall not bar or reverse a disciplinary action in the finding of fact and disposition of any lesser act of misbehavior relating to the criminal charge. A court's action on a finding of guilty to criminal charges shall not bar or reverse any authorized disciplinary action for the same charges.

52080.7 Housing Pending Disciplinary Proceedings

Depending upon the nature and the circumstances of an inmate's violation of rules, and whether the violation is or is not a serious violation, the inmate may be retained in regularly assigned housing, work and program assignments, be placed in segregated housing pending disciplinary proceedings, or be placed in CTQ.

If the inmate is placed in segregated housing pending disciplinary proceedings, the official making the housing determination shall see that the cause for the action is properly reported, as follows:

- The inmate's misconduct has been or will be reported as a serious rule violation on a CDC Form 115. The report shall serve as notice to all concerned, including the inmate, of the cause for action and pending disciplinary proceedings. The inmate shall be afforded the procedural safeguards of disciplinary proceedings, and a separate CDC Form 114-D, Administrative Segregation Unit Placement Notice, need not be prepared.
- The inmate is believed to have committed a serious rule violation, but sufficient information is not yet available to support a specific charge and the investigation is continuing. The cause for action shall be reported on a CDC Form 114-D. The order will serve as notice to all concerned, including the inmate, of the cause for action.

52080.8 Assistance to Inmates Investigative Employees

On serious rule violations, an investigative employee may be assigned within one working day after the charges have been submitted for processing. If a determination has been made that additional information is necessary for a fair hearing, an investigative employee shall be assigned even if the inmate has waived the assignment.

The investigative employee shall interview the charged inmate, gather information, question staff and inmates, screen prospective witnesses, and complete and submit a written report to the senior disciplinary hearing officer or chairperson of the disciplinary committee assigned to hear the charges.

The inmate may not select the investigative employee, but may object to the one assigned, in which case, a different investigative employee shall be assigned. The inmate's objection shall be expressed prior to the beginning of the investigation. An inmate's objection to and subsequent replacement of the second assigned investigative employee shall only be for compelling reasons.

A copy of any investigative employee's report shall be given to the inmate no less than 24 hours before a hearing is held.

An employee who witnessed the charged rule violation or who would otherwise serve as a disciplinary hearing officer or a member of a disciplinary committee hearing the case shall not serve as the investigative employee on the same case. The assignment of an investigative employee shall not preclude the assignment of a staff assistant.

When an investigative employee provides assistance to an inmate, in lieu of an assigned staff assistant or in addition to that provided by a staff assistant, the investigative employee shall do so as a representative of the official who will conduct the disciplinary hearing rather than as a representative of the inmate. An investigative employee is not subject to the provisions for confidentiality of information. Any investigative report shall be non-confidential.

52080.8.1 Staff Assistant

On serious rule violations, when the chief disciplinary officer determines that the nature of the inmate's need for assistance will require a confidential relationship, a staff assistant may be assigned to assist the inmate in the preparation and presentation of the inmate's defense.

- An inmate may refuse to accept the assistance of the first staff member assigned at the time of assignment or for good cause as determined by the chief disciplinary officer or designate at any time during the disciplinary process. If staff assistance is refused at the time of initial

assignment, a second staff member shall be assigned if requested by the inmate. An inmate's refusal to accept the second staff member's assistance shall not require the assignment of another staff member unless the chief disciplinary officer or designate determines that a fair hearing cannot be held without staff assistance. An inmate's rejection of an assigned staff assistant shall not cause delay of the disciplinary process so as to bar possible credit forfeiture.

- Upon assignment, the staff assistant shall inform the inmate of their rights and the procedures to be followed in disciplinary proceedings. The assigned staff assistant shall inform the inmate that the staff assistant will, upon the inmate's request, maintain confidentiality of information the inmate may disclose to the staff assistant concerning the inmate's involvement in circumstances surrounding the rule violation report to which the staff assistant was assigned, but not regarding any past or future behaviors which the inmate may disclose. The staff assistant shall then advise and assist the inmate in preparing for a disciplinary hearing, represent the inmate's position at the hearing, ensure that the inmate's position is understood, and that the inmate understands the decisions reached. Staff shall not give legal counsel nor specify the position the inmate will take in any disciplinary, classification, or criminal proceedings.

- The staff assistant shall inform the inmate that all evidence and information obtained and considered or developed in the disciplinary process may be used in court if the same charges have been or are to be referred to the DA for possible criminal prosecution.

- The assignment of a staff assistant shall not preclude the assignment of an investigative employee.

52080.9 Hearing Procedures and Time Limitations

CDC Form 115, CDC Form 115-A, and all non-confidential reports to be relied upon in a disciplinary hearing shall normally be given to the inmate within 24 hours after classification of the disciplinary report as a serious or administrative violation, and within 30 days of the misbehavior but not later than 15 days from the date of discovery of information leading to the disciplinary charges or, in the instance of an escapee, 15 days after the escapee's return to the custody of the department, or when an inmate is in out-to-court status, 15 days after return to the custody of the department.

- The department may delay written notice beyond 15 days when all of the following factors are true:
 - An act of conduct is involved which could be prosecuted as murder, attempted murder, or assault on a prison employee, or any person, whether or not prosecution is undertaken.
 - Further investigation is being undertaken for the purpose of identifying other inmates involved in the misconduct.
 - Within 15 days after the discovery of information leading to charges that may result in a possible denial of credit, the investigating officer makes a written request to delay notifying the inmate and states the reasons for the delay.
 - The Warden or RPA approves of the delay in writing.
- The period of delay under this paragraph shall not exceed 30 days. The inmate's hearing shall take place within 30 days of the written notice.

A hearing on the charges shall be held within 30 days from the date the inmate is given a copy of the rule violation report unless a case has been referred to criminal authorities for possible prosecution and the inmate has requested and been granted a postponement of disciplinary proceedings pending the outcome of such referral.

52080.9.1 Bar Against Credit Forfeiture

The following events shall act as a bar against forfeiture of behavior and participation credits:

- Failure to give the inmate a copy of the rule violation report within 15 days after the discovery of information leading to the disciplinary charges, unless conditions outlined in DOM 52080.9 are met.
- Failure to establish the fact that information or evidence for the rule violation report was not reasonably discoverable within 30 days or any sooner than it was discovered when the inmate is not given a copy of the rule violation report within 15 days after the alleged misbehavior took place.
- Failure to hold a hearing on the disciplinary charges within 30 days of the date the inmate was given a copy of the rule violation report. An exception to this time limit is provided when the case has been referred to criminal authorities and the inmate has requested and been granted a

postponement of the disciplinary hearing pending the outcome of the referral.

- Failure to hold a hearing within 30 days after the date notice is received of the outcome of a referral to criminal authorities, or within 30 days from the date the inmate revokes their request for the postponement of a hearing on the disciplinary charges if criminal authorities have not filed a complaint against the inmate.
- Failure to provide the inmate with a written explanation of the extraordinary circumstances which have prevented a disciplinary hearing from being conducted within 30 days of the date the inmate is given a copy of the disciplinary charges, and of a determination that the delay does not prejudice the inmate.

The bar of credit forfeiture does not affect other authorized dispositions.

A hearing may be postponed up to 30 days upon a written request of the inmate showing a reasonable need for postponement of the hearing.

- The postponement shall not act as a bar against denial or forfeiture of behavior or participation credit.

52080.9.2 Inmate Waiver to be Present At Hearing

An inmate may, upon written notice, waive the right to be present at any disciplinary hearing of charges against the inmate. In the absence of a waiver, the inmate shall be present at a disciplinary hearing unless:

- A psychiatrist has determined that the inmate suffers from a severe psychiatric disorder which will prevent the inmate from understanding or participating in the hearing, and there is a compelling reason or need to proceed with the hearing.
- The inmate is an escapee who has been found guilty of escape in a court of law, and the inmate has not been returned to the institution or jurisdiction from which the escape occurred.

When a hearing is held without the inmate being present, the reason for the inmate's absence shall be documented on the rule violation report at the time of the hearing.

52080.9.3 Hearing Disposition

Revised April 29, 1991

A finding of guilty shall be based upon a determination by the person(s) conducting the hearing that a preponderance of evidence submitted at the hearing substantiates the charge. At the end of the hearing, the inmate shall be advised of the findings, the disposition of the charge and the right to and procedure for appeal of the action. Within five working days, the inmate shall be given a copy of the completed rule violation report, containing the findings, disposition, and evidence relied upon to support the conclusions. The rule violation report is not complete until the CDO audit is accomplished.

When an inmate is charged with possession of unauthorized or dangerous items or substances, or when unauthorized or dangerous items or substances are associated with the commission of the charged violation, the hearing officer shall record the disposition of the item or substance in the disposition portion of the CDC Form 115 or 115-A.

52080.10 Hearings for Transferred Inmates

An inmate awaiting a disciplinary hearing shall not be transferred to another institution or facility until completion of such hearing, with the following exceptions:

- An emergency transfer to a higher security level based on charges of involvement in a major disturbance or serious incident.
- The inmate is charged with escape from a Level I or II institution/facility/camp and will not be returned to that facility/ camp from which they escaped.

When an inmate is transferred prior to a disciplinary hearing, or a rehearing is ordered on the charges subsequent to the inmate's transfer, one of the following methods shall be used to facilitate the hearing process:

- The Warden or RPA of the facility where the violation occurred may request the inmate be returned to the original facility, request the hearing be conducted by staff where the inmate is currently housed, or hearing officer(s) from the facility where the violation occurred may conduct the hearing at the facility where the inmate is currently housed.
 - The facility where the rule violation occurred may appoint an investigative employee to conduct an investigation and prepare a report.
 - If a staff assistant has been appointed, the staff assistant shall be present at the hearing.

52080.11 Confidential Material

Refer to DOM 61020.8.

52080.12 Disciplinary Credit Loss Schedule

Refer to CCR 3323.

52080.13 Conduct Reportable to the Releasing Authority

Rules of the BPH and those of the NAEA require that specific acts of inmate conduct be reported to the appropriate releasing authority when the inmate has an established or anticipated release date on an indeterminate term or period of confinement.

At the discretion of the appropriate releasing authority, a hearing for reconsideration of release may be held in conjunction with a disciplinary hearing for conduct that is also reportable to the releasing authority.

Releasing authority staff may sit in the fact finding and disposition phase of a disciplinary hearing held in conjunction with a hearing by the releasing authority for release reconsideration, however, they shall not act as fact finders or decision makers in the Department's disposition of disciplinary charges against an inmate. The releasing authority staff may participate in the fact finding phase of the disciplinary hearing as deemed necessary to bring out information that will aid them in determining an appropriate action relative to the inmate's scheduled or anticipated release.

The scheduling of a combined departmental disciplinary hearing and a releasing authority hearing does not stay the time limits for a disciplinary hearing in which work credit may be denied on a determinate term of imprisonment.

52080.14 Appeal of Disciplinary Actions

An inmate may appeal any disciplinary decision or disposition, including the denial of credits, or the process itself by filling out CDCR Form 602, Inmate/Parolee Appeal, and following the procedures outlined in DOM 54100.

52080.15 Records of Disciplinary Matters

Upon conclusion of disciplinary proceedings, all documents relating to the disciplinary process, findings and disposition shall be disposed of in the following manner:

- When an inmate is held responsible for the act charged, copies of all documents prepared for and used in the disciplinary proceedings shall be placed in the inmate's C-File. A copy of the completed CDC Form 115 or 115-A shall be given to the inmate. A copy of the completed CDC Form 115 or 115-A shall also be filed in the Register of Institution Violations as required in PC 2081.
- Refer to DOM 61020.9.1 regarding use of confidential information to support adverse disposition.
- When the inmate is found not guilty of the act charged, or when the charge is dismissed for other reasons, the documents prepared for and used in the disciplinary process shall not be placed in any file pertaining to the inmate. However, two copies of any CDC Form 115 or 115-A report used in the process shall be completed as to findings and disposition. One copy of the completed report shall be filed in the Register of Institution Violations. The original copy shall be given to the inmate. All other copies of the CDC Form 115 or 115-A report and all related supplemental reports shall be destroyed.
- When non-confidential information developed through the disciplinary process needs to be considered in future classification committee determinations affecting the inmate, or where events involved in the disciplinary process need to be explained, that information shall be recorded by the disciplinary hearing officer on a CDC Form 128-B, General Chrono , as a referral to the classification committee. Such information shall include, but is not limited to:
 - The reason for an inmate's placement in segregated housing prior to adjudication of the charges if that information has not been previously considered in a classification committee hearing.
 - Where any reason exists for retaining the inmate in segregated housing after a finding of not guilty or dismissal of charges.
 - When any program assignment or placement change needs to be considered in view of other inmate or employee animosity toward the individual. The CDC Form 128-B, as a referral to the classification committee, shall be placed in the inmate's C-File, and a copy shall be given to the inmate.
- The policy set forth in this section shall also apply when a prior finding of guilty to a violation reported on a CDC Form 115 is reversed or dismissed on appeal, or when information reported on a CDC Form 128-A is found to be incorrect or inappropriate on appeal.

- A finding of not guilty, dismissal, or reversal of a previous finding of guilty shall require an audit and updating of any documentation in the inmate's file which reflects a prehearing assumption of guilt or the original finding of guilt. Such documentation shall not be removed from the inmate's file, but shall be annotated with a cross-reference to a CDC Form 128-B report which shall reflect the most recent findings and action on the charge.
- Care shall be exercised in the wording and phrasing of comments on the CDC Form 128-B reports to avoid innuendos and implications that would lead a reader to believe that the inmate is in fact guilty of the charge without regard for the determination arrived at in the disciplinary hearing, in a court's finding, or in the reason for an ordered action on appeal.
- The inmate may retain or discard copies of the completed disciplinary report form and other supplemental documentation they may have been given during the course of the disciplinary process and proceedings.

52080.15.1 Register of Institution Violations

A Register of Institution Violations is a compilation of one completed copy of each rule violation report issued at a facility, maintained in chronological order. This registry shall be maintained for five calendar years.

52080.16 Restoration of Credits

Refer to CCR 3327.

52080.17 Disciplinary Free Periods

Refer to CCR 3328.

52080.18 Extraordinary Circumstances

Refer to CCR 3329.

52080.19 Length of Confinement

No inmate shall be kept in isolation or in CTQ status longer than ten days without the approval of the director. The CDO may shorten the ordered time spent in this status if the inmate is ready to conform to specified rules.

Time spent in segregation pending a disciplinary hearing, or pending investigation that resulted in a disciplinary hearing, shall be credited toward any segregated sentence imposed, unless there is good cause not to do so. Reasons for not granting credit shall be explained in the disposition section of the CDC Form 115. Not allowing credit for time spent in segregation shall not extend the isolation or CTQ sentence beyond 10 days.

No inmate shall be placed in CTQ or otherwise deprived of exercise as a disciplinary measure longer than ten days, unless, in the opinion of the Warden or RPA the inmate poses such an extreme management problem or threat to the safety of other inmates and staff that longer confinement is warranted. The written approval of the director is required in such cases.

52080.20 DD

DD is a temporary housing status which confines inmates so assigned to designated rooms or cells for prescribed periods of time as punishment for serious acts of misbehavior. An inmate shall not be assigned to DD except on the order of a disciplinary committee or a senior disciplinary hearing officer.

- DD may be served in a housing unit or section of a housing unit specifically designed for that purpose or in any room or cell which provides the necessary security, control, and restriction of the inmate's actions. When DD is ordered in a housing unit other than a designated DD unit, the conditions of detention shall be the same as prescribed for DD units.
- DD may be ordered as a continuous period of confinement or as intermittent confinement on holidays, weekends or days off from assigned work and program activities. When ordered as intermittent confinement, confinement shall not exceed ten days during a 35-day period. The chief disciplinary officer shall review the treatment of an inmate confined in DD and consider a modification of sentence when evidence indicates the inmate is ready to conform to the rules.

Time served in DD shall be computed on the basis of full days in detention. The day of placement and the day of release shall not count as a day of time served. Intermittent detention may extend from the end of the work day before the first full day of detention to the beginning of the work day following the last full day of detention.

- Continuous DD of an inmate shall not exceed ten full days without approval of the Director, Division of Adult Institutions.
 - If an extension beyond ten days is approved, the Warden shall note that fact in the disposition section of the rule violation report stating the reasons for the extension and the additional amount of

time the inmate shall be confined, and shall sign and date the notation.

A request for the director's approval to retain an inmate in DD for longer than 30 days shall be accompanied by a current psychological evaluation of the inmate's mental health. Such evaluation shall include a personal interview with the inmate by the mental health examiner.

52080.21 Conditions of Detention Unit

Insofar as the safety and security of the institution and for persons will permit, the physical facilities of designated DD units shall approximate those housing general population inmates.

52080.21.1 Detention Housing

Where adequate and secure facilities are available and the number of inmates assigned to designated DD units permit, inmates so assigned will be housed in single occupancy quarters. When the use of multiple occupancy housing is necessary, the number of inmates so assigned will not exceed the capacity of beds for which such quarters are equipped except as a temporary emergency measure. The Office of the Director, Division of Adult Institutions, or the departmental duty officer shall be notified when such an emergency exists for longer than 24 hours. Institution and department efforts shall be coordinated as necessary to resolve any overcrowding situation as quickly as possible.

52080.21.2 Personal Items

Inmates shall not be permitted to use or possess items of personally owned property, such as radios, television sets, tape players, musical instruments, and typewriters while undergoing DD. Personal items necessary for health and hygiene may be used if such items are not available for issue by the institution.

Inmates shall not be permitted to purchase, use, or possess edible or consumable canteen items while undergoing DD.

Inmates may be deprived of personally owned clothing and footwear while undergoing DD when adequate state clothing and footwear are issued. No inmate in DD shall be required to wear clothing that significantly differs from that worn by other inmates in the unit, except that temporary adjustments may be made for security reasons and for protection from self-inflicted harm. No inmate shall be clothed in any manner intended to degrade the inmate.

52080.21.3 Meals

Inmates in DD shall be fed the same meal and ration as is provided for general population inmates.

52080.21.4 Mail

The sending and receiving of first class mail shall not be restricted while an inmate is undergoing DD. Delivery or issue of packages, publications and newspapers shall be withheld during DD.

52080.21.5 Visits

Inmates undergoing DD retain the right to have personal visits. Privileges and amenities associated with visiting including physical contact with visitors may be suspended during the DD period. When the number, length or frequency of visits are limited, the inmate shall be permitted to choose who shall visit from among persons approved to visit before the detention period began.

52080.21.6 Personal Cleanliness

Inmates undergoing DD shall be provided the means to keep themselves clean and well groomed. Haircuts shall be provided as needed. Showering and shaving shall be permitted at least three times a week.

52080.21.7 Exercise

Inmates undergoing DD shall be permitted a minimum of one hour per day, five days per week, of exercise outside their cells unless security and safety considerations preclude such activity.

52080.21.8 Reading Material

State/vendor supplied reading material shall be provided for inmates undergoing DD. Such material may be assigned to DD units from the inmate library and shall represent a cross section of material available to the inmate general population. At the discretion of the Warden/facility manager, inmates enrolled in educational programs who have textbooks in their personal property may be permitted to study such material while undergoing DD.

52080.21.9 Legal Material

Inmates undergoing DD shall not be limited in their access to the courts. Legal resources may be limited to pencil and paper, which shall be provided upon request, for correspondence with an attorney or preparation of legal documents for the courts. Other legal material in an inmate's personal

property may be issued to the inmate in DD if litigation was in progress before detention commenced and legal due dates are imminent.

52080.21.10 Privileges

All privileges generally associated with the inmate's work/training incentive group status shall be suspended during a period of DD. This includes but is not limited to:

- Personal non-emergency telephone calls.
- Handicraft activities.
- Use of recreational equipment.
- The viewing of television.

52080.21.11 Restrictions

A written report by the administrator or supervisor in charge of a DD unit shall be submitted to the chief disciplinary officer when an inmate undergoing DD is deprived of any usually authorized item, activity or privilege. A special report to the chief disciplinary officer and to a classification committee shall be made when an inmate's circumstances indicate a continuing need for separation from general population or from specific persons.

52080.22 Administration and Supervision of Detention Units

Each Warden and RPA shall establish a supplement to this manual section for the DD of inmates which delineates the housing for detention units as either a unit or section of a unit designated for this specific purpose or in conjunction with other special purpose housing of inmates.

The administration of DD units may be delegated to a staff member at not less than the level of captain.

The supervision of DD units may be assigned to a staff member at not less than the level of sergeant.

52080.22.1 Staff Visitation

Inmates assigned to DD units shall be visited daily by the supervisor in charge of the unit and by an institution mental health provider, physician, Licensed Vocational Nurse, or Psychiatric Technician. An inmate's request to be visited by other staff shall be promptly referred to the staff member. A timely response shall be given to such requests whenever reasonably possible.

52080.22.2 Supervisor's Responsibilities

The supervisor in charge of a DD unit shall ensure:

- The physical security of the unit.
- The control of contraband within the unit.
- Safe, sanitary, and decent working and living conditions within the unit.

When any condition within the unit or the behavior, conduct or appearance of any inmate confined therein appears to warrant the attention of specific or specialized staff, the matter shall be promptly brought to the attention of appropriate staff.

52080.22.3 Suicide Risks

Inmates undergoing DD who are diagnosed by qualified medical staff as a suicide risk shall be moved to a hospital or infirmary setting, and medical staff shall assume placement, observation, and supervision of the inmate. Such movement and supervision shall be in cooperation and coordination with custody staff.

52080.22.4 Management Cell

Revised January 30, 2015

Management Cell Status (MCS) placement is to urgently address an inmate's dangerous or destructive behavior that may imminently cause cell damage or injury to a person. MCS may only be authorized when the inmate has used materials of any kind to cover up windows, damage lighting, windows and/or doors. The authority to place an inmate on MCS shall not be designated below the level of Lieutenant. The Administrative Segregation Unit (ASU) Lieutenant, or watch commander, shall initiate contact with the respective Associate Warden/Administrative Officer-of-the-Day (AOD) and make notification of MCS placement. The Lieutenant will document the cause for MCS on a CDC 128-B, General Chrono and document MCS placement on the CDC 114-A, Inmate Segregation Record. The respective Associate Warden, or designee at a level no less than Captain, shall review MCS daily, making a notation of the review on the CDC 114-A. The reviewing manager, after consulting with the licensed mental health practitioner about the inmate's progress on an established behavior plan, will make a determination on a daily basis to either, grant additional items of property within the cell, or remove the inmate from MCS based on the inmate's current behavior and compliance with rules. These decisions will be based

solely on the inmate's behavior while on MCS. On weekends and holidays, the AOD shall personally review MCS placement and complete the daily notation on the CDC 114-A. The respective Captain will have functional responsibility to ensure compliance with the MCS review procedures. The Warden, or designee at a level no less than Captain, or AOD, may authorize the release of an inmate from the MCS by written order, and record on the inmate's CDC 114-A.

In the event an inmate's disruptive behavior continues and requires retention beyond 72 hours, authorization of the Chief Deputy Warden or Warden is required. In addition, a licensed mental health practitioner shall consult with the Chief Deputy Warden or Warden regarding the inmate's behavior plan and barriers to progress, as well as any significant risk of exacerbation of mental illness if MCS is maintained. The Lieutenant will document approval of the extension by the authorizing officer on a CDC 128-B and include a description of the inmate's disciplinary history in ASU/segregated housing unit (SHU)/psychiatric services unit (PSU), with specific dates and rule violations, counseling, disruptive behavior, etc. A copy will be placed with the inmate's CDC 114-A, distributed to the respective Associate Warden, Captain, and Lieutenant, and documented in the daily transactions on the CDC 114-A. The respective Captain, or designee, will provide daily updates during executive staff meetings.

To extend an inmate's MCS beyond six calendar days, approval from the respective Associate Director must be obtained. The Chief of Mental Health must also review the behavior plan for adequacy and a revised behavior plan shall be developed if the current plan is determined to be inadequate. The Warden or designee will contact the respective Associate Director's office to schedule a conference call. A memorandum detailing the history leading to MCS and the need to extend beyond six calendar days will be forwarded to the respective Associate Director for approval or disapproval. Once a decision has been rendered, the decision will be noted on the inmate's CDC 114-A and the memorandum detailing the decision will be placed with the CDC 114-A.

To extend an inmate's MCS beyond ten calendar days, and every 3 days thereafter, approval from the Division of Adult Institutions (DAI), Deputy Director, Field Operations must be obtained. The Chief of Mental Health must also review the behavior plan for adequacy, and a revised behavior plan shall be developed if the current plan is determined to be inadequate. The Warden or designee will contact their respective Associate Director's office to schedule a conference call with the Deputy Director. A memorandum detailing the history leading to MCS and the need to extend beyond ten calendar days will be forwarded to the Associate Director prior to the conference call with the Deputy Director. The approval or disapproval will be documented on the memorandum and a copy placed in the folder containing the CDC 114-A. Prior to placing an inmate on MCS and upon removal, the inmate shall be examined by the on-duty licensed mental health provider in a clinic or Triage and Treatment Area setting. Each examination shall be documented on a CDCR Form 7219, Medical Report of Injury or Unusual Occurrence, and retained with the inmate's CDC 114-A.

No Enhanced Outpatient Program (EOP) inmate will be placed on MCS. If an EOP inmate is engaging in behavior that requires and justifies placement on MCS, that inmate will be evaluated by a psychiatrist and if necessary, transferred to a crisis bed or a higher level of care. Clinical interventions such as individualized positive behavior plans may be implemented without imposition of MCS placement.

Inmates placed on MCS shall receive an emergency mental health referral. A mental health practitioner (psychiatrist, psychologist, or social worker) shall conduct an evaluation to determine if crisis issues exist and if a referral to a higher level of care is needed. At each consideration of extension, the inmate shall be considered for referral to a higher level of care, as well as if there is a significant risk of exacerbation of mental illness if MCS is maintained.

Following the initial mental health clinical contact, the licensed mental health practitioner shall consult with the Lieutenant and discuss how the inmate's mental health conditions affect the inmate's behavior. If placement occurs after a controlled use of force, the mental health practitioner shall communicate the results of the mental health assessment and interventions. The licensed mental health practitioner shall immediately work in conjunction with custody staff to develop an individualized behavior plan designed to provide positive reinforcement (for example, restoration of privileges) in response to specific appropriate behaviors. The behavior plan shall not be used to extend placement on MCS. Individual behavior plans may be continued after removal from MCS.

The licensed mental health practitioner shall make a daily clinical contact with the inmate until removal from MCS to ensure continued psychiatric

stability and evaluate for the emergence of crisis issues and/or need for higher level of care. Individualized strategies for coping with placement on MCS shall be reviewed with the inmate. The licensed mental health practitioner shall also monitor the efficacy of the behavior plan and recommend modifications as needed. All mental health contacts shall occur in confidential out-of-cell settings.

The mental health practitioner shall document that the initial evaluation occurred on a CDC 128-B.

The details of the behavior plan shall also be documented on a CDC 128-B. The CDC 128-B shall not include information regarding specific mental health diagnoses, conditions, or other protected health information. Placement on MCS will not preclude an inmate from access to health care.

Upon removal from MCS, all documents related to the MCS, will be forwarded to the records office for inclusion in the inmate's central file.

Each institution shall designate cells in ASU/SHU as management cells. Other cells in ASU/SHU may also be used as management cells if the designated cells are unavailable. When placed on MCS, all inmate property and clothing will be removed from the cell, and documented on the CDC Form 1083, Inmate Property Inventory, with the exception of:

Male Institutions

- One state issued mattress
- One blanket
- One T-shirt
- One pair of boxer shorts
- One toothbrush with tooth powder/toothpaste
- One bar of soap
- One towel
- Daily supply of toilet tissue
- Legal materials (priority legal user status only)
- Health care appliances

Note: Inmates identified as transgendered (Male to Female) in accordance with DOM Section 62080.14 shall retain one brassier while on MCS.

Female Institutions

- One state issued mattress
- One blanket
- Three brassieres
- Three pairs of panties
- Night gown/smock
- One toothbrush with tooth powder/toothpaste
- One bar of soap
- Two towels
- Daily supply of toilet tissue
- Feminine hygiene products
- Legal materials (priority legal user status only)
- Health care appliances

Note: Inmates identified as transgendered (Female to Male) in accordance with DOM Section 62080.14 shall retain up to three pairs of boxer shorts while on MCS.

Inmates with priority legal user status will be allowed to maintain possession of their legal paperwork as long as their placement on MCS did not involve said material (e.g., covering cell window with legal papers).

Yard privileges shall continue for inmates placed on MCS. Yard privileges may be suspended for behavior not related to the behavior requiring placement on MCS. Yard privilege suspension may not exceed five days. Reason for yard suspension shall be documented on the CDC 128-B and recorded on the inmate's CDC 114-A.

If an inmate is on MCS during his/her regularly scheduled Institutional Classification Committee (ICC) review, the MCS retention or removal will be reviewed and documented on the CDC Form 128-G, Classification Chrono. Inmates on MCS beyond ten days must be seen at the next scheduled ICC for retention or removal review and the outcome will be documented on the CDC 128-G. The individualized mental health plan will be addressed by the mental health clinician present in the ICC reviews and documented on the CDC 128-G.

52080.22.5 Detention Records

A CDC Form 114, Isolation Log shall be maintained in each designated DD unit. Specific information required in this log shall be kept current on a daily

and shift or watch basis. A completed logbook shall be retained in the unit for as long as any inmate recorded on the last page of that log remains in the unit. Storage and purging of logbooks shall be in accordance with department schedules. (Refer to DOM 72010.) One isolation log may serve a DD unit and other special purpose segregation units that are combined and are administered and supervised by the same staff members.

A separate record shall be maintained on each inmate undergoing DD. This record shall be compiled on CDC Form 114-A, Inmate Segregation Record. In addition to the identifying information required on the form, all significant information relating to the inmate during the course of detention, from reception to release, shall be entered on the form in chronological order.

52080.23 Confinement to Quarters

The term "confinement to quarters" (CTQ) refers to an authorized disciplinary hearing action only whereby an inmate is restricted to their assigned quarters for a period not to exceed five days for administrative rule violations or ten days for serious rule violations.

52080.24 AD-SEG

When an inmate's presence in an institution's inmate general population presents an immediate threat to the safety of the inmate or others, endangers institution security or jeopardizes the integrity of an investigation of an alleged serious misconduct or criminal activity, the inmate shall be immediately removed from general population and be placed in AD-SEG. AD-SEG may be accomplished by confinement in a designated segregation unit or, in an emergency, to any single cell unit capable of providing secure segregation.

Temporary AD-SEG:

Pending a classification committee determination of the inmate's housing assignment, which may include assignment to one of the segregation program units or to the inmate general population, an inmate may be placed in a designated temporary housing unit.

An inmate's placement in temporary segregation shall be reviewed by the Institutional Classification Committee (ICC) within ten days of receipt in the unit. Action shall be taken to retain the inmate in temporary segregation or release to general population. ICC shall review the inmate at least every 30 days thereafter until the inmate is removed from temporary segregation.

ICC shall refer for CSR review and approval any case in which an inmate is retained in temporary AD-SEG for more than 30 days beyond initial ICC action. ICC shall designate an anticipated length of time needed to complete the investigation or conclude court proceedings. ICC shall recommend one of the following:

- Transfer to another facility.
- Continue in temporary AD-SEG pending completion of an investigation or resolution of court proceedings.

52080.25 Order and Hearing for Placement in Segregated Housing (CDC Form 114-D)

Authority to order an inmate to be placed in AD-SEG, before such action is considered and ordered by a classification hearing, may not be delegated below the staff level of lieutenant except when a lower level staff member is the highest ranking official on duty.

The reason for ordering an inmate's placement in AD-SEG shall be clearly documented on a CDC Form 114-D by the official ordering the action at the time the action is taken.

In addition to explaining the reason and need for an inmate's placement in AD-SEG, the official ordering the action shall determine and document on the CDC Form 114-D:

- If the inmate needs the assistance of an interpreter or a person capable of explaining the process so the inmate understands.
- If the inmate desires to call witnesses. If so, the inmate shall submit in writing the names of the desired witnesses.
- If the inmate wishes to present documentary evidence at a classification hearing on the reason or need for retention in segregated housing. If the inmate does wish to present documentary evidence, an investigating employee shall be assigned.

A copy of the CDC Form 114-D, with the "order" portion of the form completed, shall if practical, be given to the inmate prior to placement in AD-SEG but not later than 48 hours after such placement. Copies of the CDC Form 114-D with the order portion completed shall also be submitted to the Warden, RPA, or designated staff for review and possible further action. A copy of the CDC Form 114-D shall be routed to the inmate's C-File as a notice of the inmate's current status and pending action(s).

A CDC Form 128-B shall accompany the original CDC Form 114-D which shall depict important inmate case factors such as: enemies that may be housed in the same AD-SEG unit; the inmate's gang affiliation status, if any; medical/psychiatric problems; pending visitation restrictions; or the location of pertinent confidential information.

52080.26 Review of Segregation Order

Within two working days following an inmate's placement in AD-SEG, designated staff at not less than the level of captain shall review the order portion of the CDC Form 114-D. If retention in AD-SEG is approved at this review, the following shall be accomplished at this level:

- Schedule the inmate for ICC within ten days of placement in AD-SEG.

52080.27 Classification Committee Hearing on Segregated Housing Order

A classification committee hearing for consideration and determination of the need to retain an inmate in segregated housing, for the reasons set forth in a segregation order, CDC Form 114-D, shall be held as soon as it is practical and possible to do so, but in no case longer than ten days from the date the inmate was initially placed in segregated housing, except for the following reasons:

- The CDC Form 114-D has been withdrawn and the inmate has been returned to general population status.
- A continuing state of emergency exists within the institution. Under such circumstances the hearing shall be held as soon as it is safe and practical to do so.

The inmate shall be present at the classification hearing on an AD-SEG order except under the applicable conditions as described in CCR 3320(f) relating to disciplinary hearings. If the classification committee hearing is held without the inmate present, the reason shall be documented on the segregation order form. Any staff member assigned to assist the inmate shall be present at the hearing.

52080.27.1 Retention for Disciplinary

When the reason for an inmate's placement in AD-SEG is a disciplinary matter and likely to result in a formal report of violation of institution rules on a CDC Form 115 or a referral to the appropriate criminal authorities for possible criminal prosecution, the classification hearing shall assume the alleged misconduct or criminal activities to be factual as reported in the segregation order. The hearing shall not consider evidence or information relating to the guilt or innocence of the inmate. ICC may continue the inmate in AD-SEG pending resolution of the disciplinary issues or consider placement in a specialized security unit based upon other non-disciplinary reasons necessitating such placement.

52080.27.2 Retention for Non-Disciplinary

When the reason for an inmate's placement in AD-SEG is for non-disciplinary reasons, the classification committee hearing shall consider all available evidence or information relating to the validity of the reasons given for such placement as well as the need to retain the inmate in AD-SEG pending resolution of the situation or circumstances set forth in the AD-SEG order.

52080.27.3 Witnesses for Hearing

Based upon the finding of the investigative employee, the ICC shall permit the inmate to present witnesses and documentary evidence at the hearing unless the chairperson of the committee determines in good faith that permitting such evidence shall be unduly hazardous to institution safety. The reason for disallowing witnesses or evidence shall be documented in the "hearing" portion of the CDC Form 114-D and in the CDC Form 128-G, Classification Chrono.

52080.27.4 Determinations

The determinations of the classification hearing shall be documented in the hearing portion of the CDC Form 114-D, and in the CDC Form 128-G. Such documentation shall include an explanation of the reason and the information and evidence relied upon for the action taken. The completed CDC Form 114-D and any CDC Form 128-G resulting from hearings shall be routed to the inmate's C-File. The inmate shall be given a copy of all completed forms and of all other documents relied upon in the hearing except those containing restricted/confidential information.

52080.28 Release From AD-SEG

Release from segregation status shall occur at the earliest possible time in keeping with the circumstances and reasons for the inmate's initial placement in AD-SEG. Nothing in this article shall prevent the official ordering an inmate's placement in AD-SEG, or a staff member of higher rank in the same chain of command, from withdrawing an AD-SEG order before it is acted upon or prior to a hearing on the order after consulting with and obtaining the

concurrence of the administrator of the general population unit to which the inmate shall be returned or assigned. Release from segregated housing after classification committee confirmation shall be effected only upon the written order of an equal or higher authority.

52080.29 Retention in AD-SEG After Expiration of Term/11 Months Indeterminate

Procedural safeguards apply to inmates retained for administrative reasons after the expiration of a SHU term. SHU terms of confinement shall be set or reduced by classification action.

A CDC Form 114-D shall be initiated, giving written notice of the reasons for retention in sufficient detail to enable the inmate to prepare a response or defense. Except in an emergency, a copy of the order shall be given to the inmate prior to the expiration of the term of confinement. In no case shall notice be given later than 48 hours after the expiration of the term.

During the subsequent classification committee hearing, the inmate shall be given a reasonable opportunity to present witnesses and documentary evidence unless institution officials determine in good faith that presentation of the evidence would be unduly hazardous to institutional safety. The reason for disallowing designated evidence shall be explained in writing by the hearing body on the segregated housing order.

A copy of the completed segregated housing order containing a written decision, including references to the evidence relied upon and the reasons for retention in segregated housing beyond the expired term or one year of indeterminate confinement, if so retained, shall be given the inmate upon completion of the hearing.

52080.30 Segregation From General Population - Not AD-SEG

Revised February 16, 2007

Segregation from general population for the reasons and under the circumstances described below are not AD-SEG and are excluded from the other provisions of this section:

Medical

When an inmate is involuntarily segregated from the general population for medical or psychiatric reasons by order of medical staff and the inmate's placement is in a hospital infirmary, or in other housing as a medical quarantine, the inmate shall not be deemed to be in AD-SEG.

When personnel other than medical staff order an inmate placed in AD-SEG for reasons related to apparent medical or psychiatric problems, that information shall be immediately brought to the attention of medical staff. The appropriateness of AD-SEG or the need for movement to a hospital setting shall be determined by medical staff.

When medical or psychiatric reasons are not the primary reason for an inmate's segregation, AD-SEG status will be continued even if the inmate is moved to a hospital setting.

Orientation and Layover

Newly received inmates and inmates in transit or layover status may be restricted to quarters (RTQ) for that purpose. Such restrictions shall not be more confining than is required for institution security and the safety of persons, nor for a period longer than the minimum time required to evaluate the safety and security factors and reassignment to more appropriate housing. No inmate shall be placed in RTQ for more than ten days.

DD

Placement in DD is an ordered action of a disciplinary hearing and is not AD-SEG except as provided in CCR 3338(a)(2) and (3).

Confinement to Quarters

CTQ is an ordered action of a disciplinary hearing and is not AD-SEG.

PHU

PHU inmates endorsed by CSR action, not requiring segregation other than for protective custody.

Psychiatric Services Unit (PSU)

PSU inmates posing a serious threat to general population housing, not requiring hospitalization, endorsed by CSR action.

52080.31 SHU

Refer to CCR 3341.5 and DOM 62050.13.2.

52080.32 Case Review

The case of every inmate assigned to a segregated housing unit shall be continuously reviewed and evaluated by custodial and casework staff assigned to the unit. Staff will confer on each case no less frequently than once a week during the first two months of the inmate's segregated status. Such case reviews will not be necessary during any week in which the inmate's case is reviewed by a regular or special classification committee or

by staff who are authorized to take classification actions. Any significant observations, determinations or recommendations shall be documented on the inmate's CDC Form 114-A.

A psychological assessment of the inmate's mental health will be included in the case review and classification committee review of inmates assigned to segregated housing units. When any indication of psychiatric or psychological problems exists, the case shall be referred to the institution's psychiatrist or psychologist for further evaluation and recommended classification committee actions.

52080.33 Conditions of Segregated Housing

In keeping with the special purpose of a segregated housing unit, and with the degree of security, control and supervision required to serve that purpose, the physical facilities of special purpose segregated housing shall approximate those of the general population.

52080.33.1 Restrictions

When an inmate in AD-SEG is deprived of any usually authorized item or activity and the action and reason for that deprivation is not otherwise documented and available for review by administrative and other concerned staff, a report of the action shall be made and forwarded to the unit administrator as soon as possible.

52080.33.2 Clothing

No inmate in AD-SEG shall be required to wear clothing that significantly differs from that worn by other inmates in the unit, except that temporary adjustments may be made in an inmate's clothing as is necessary for security reasons or to protect the inmate from self-inflicted harm. No inmate shall be clothed in any manner intended to degrade the inmate.

52080.33.3 Meals

Inmates assigned to AD-SEG shall be fed the same meal and ration as is provided for inmates of the general population, except that a sandwich meal may be served for lunch. Deprivation of food shall not be used as punishment.

52080.33.4 Mail

Inmates assigned to AD-SEG shall not be restricted in their sending and receiving of personal mail, as authorized by CCR § 3138 except that incoming packages may be limited in number and in content to that property permitted in the segregated unit to which an inmate is assigned.

52080.33.5 Visits

Inmates endorsed for or assigned to a SHU shall not be allowed contact visits.

52080.33.6 Personal Cleanliness

Inmates assigned to AD-SEG shall be provided the means to keep themselves clean and well groomed. Haircuts shall be provided as needed. Showering and shaving shall be permitted at least three times a week. Clothing, bedding, linen and other laundry items shall be issued and exchanged no less often than is provided for general population inmates.

52080.34 Revisions

Revised January 30, 2015

The Director, Division of Adult Institutions, or designee shall ensure that the content of this article is current.

ARTICLE 24 — FIRE PROTECTION

Revised November 25, 1997

52090.1 Policy

The Department shall provide reasonably safe facilities for inmates and furnish a place of employment that is reasonably safe and healthful.

Fire and safety related activities shall be in accordance with updated revisions of the CCR. In the event that state or local codes are not

applicable, recommendations/standards of the National Fire Protection Association (NFPA) (current edition) shall apply.

Life safety and fire prevention are the responsibility of every employee. Each employee shall attend appropriate training for providing a reasonably safe working and living environment for staff, inmates, and visitors.

The Warden at each facility shall have in place fire prevention and suppression programs.

52090.2 Purpose

The purpose of this section is to provide for the prevention and prompt, efficient suppression of fire within the institutions and to ensure that all concerned, by an effective means of communication, know and understand their role in a fire safety program.

52090.3 Fire Department Organization

Each fire department shall have the following positions:

- Fire Chief, Correctional Facility.
- Firefighters, Correctional Institution.
- Inmate firefighters. Each institution shall be minimally staffed at a level of four (4) inmate firefighters per fire engine and two (2) per supplemental vehicle if applicable, with the exception of LAC and NCWF.

Fire Service/Training Specialist, Correctional Facility or Firefighter, Correctional Institution, may be established on a part-time/permanent intermittent basis at the discretion of the appointing authority.

52090.4 Institution's Fire Chief's Responsibilities

The Fire Chief:

- Performs administrative duties and manages the fire department's operation and personnel.
- Develops training programs for fire fighting personnel (including inmates) utilizing the California Fire Service Training and Education Program (CFSTEP), and Certification Programs, recognized by the State Fire Marshal (SFM).
- Develops work schedules for firefighters/personnel under their jurisdiction.
- Coordinates staff training in fire prevention and suppression methods and technology through, and with the cooperation of, the IST Office.
- Makes or provides for frequent inspections of the institution for fire and life safety hazards and reports findings from the inspections to the Warden/designee.
- Participates in the safety program of the institution.
- Provides inspection and maintenance of fire fighting equipment/systems throughout the institution.
- Takes command during a fire /hazardous material or other life safety related emergency implementing the incident command system as required by the CCR (19) Standardized Emergency Management System including:
 - Directing fire fighting operations, rescue operations, building evacuations, etc., with the assistance and cooperation of custody personnel.
 - Ensure that water from fire hoses is not directed into occupied inmate housing units, cells, or dormitories, unless absolutely necessary to extinguish a fire.

- Requests mutual aid in accordance with established facility plans and procedures.

- Conducts post-fire investigations after the fire is suppressed to determine the cause and prepares required reports.

- Notifies the SFM's Office, Arson and Bomb Investigation Unit, of all fires and explosions pursuant to H&SC 13107.

Note: SFM may choose not to investigate every fire. The decision rests with the SFM.

- Maintains the fire station, adjacent grounds, all hydrants, exterior standpipes, etc., in conjunction with the Correctional Plant Manager.
- Assists the SFM's representative on all SFM inspections or surveys.
- Performs as lead person and staff resource for developing and maintaining an effective emergency evacuation plan for every area of the facility in cooperation with all departments. The plan shall provide for quarterly fire drills, the manner in which they are to be conducted, and the designated staff responsible for evacuation procedures.

- Develops fire prevention programs and fire safety procedures in cooperation with appointed facility personnel and the office of the SFM.
- Performs custodial duties relating to inmates assigned to the fire department.

52090.4.1 Institutional Firefighters' Responsibilities

The institutional firefighter(s) and/or Fire Training Specialist:

- Acts as Fire Chief in their absence when designated.
- Assists the Fire Chief in training, fire prevention, safety, hazardous material, inspections, investigations, and carries out duties as assigned by the Fire Chief.
- Inspects fire apparatus and equipment at the fire department at the beginning of each tour of duty.
- Ensures the cleanliness, orderliness, and sanitation of fire department facilities.
- Assists the Fire Chief in record keeping and completing required reports as necessary.
- Responds to emergency alarms in accordance with procedures.
- Performs custodial duties relative to inmates assigned to the fire department and maintains accountability of inmates, equipment, and tools.

52090.4.2 Inmate Firefighters

Inmate firefighters:

- Shall be assigned to the fire department as a full-time assignment.
- Shall be fed and quartered at the fire department as space and food preparation facilities are available.
- Shall maintain the fire department building, grounds, and equipment.
- Shall be on call at all times.
- Shall participate in fire training through SCC, when possible and program space exists. Regular OJT provided at each facility fire department shall be in accordance with the CFSTEP.
- Female inmate firefighter shall be trained by a qualified Fire Training Officer or Fire Chief.

52090.4.3 Supervisory Staff Responsibilities

Supervisory staff shall ensure daily visual inspections of their immediate work areas are performed, making certain that fire extinguishers are placed in their assigned location and charged; fire hoses have not been altered or tampered with; evacuation routes, plot plans, and exit signs are posted; and the area conforms to all fire and life safety regulations.

52090.4.4 Non-Supervisory Staff Responsibilities

All employees shall notify their supervisors of any fire hazard condition.

Suspected malfunctioning, damaged, or missing fire suppression equipment required in the work or living areas shall be reported to the supervisor of the area and to the fire department immediately.

All employees shall be familiar with the requirements of their assignments, including the appropriate actions to follow in the event of a fire or other life-threatening emergency.

52090.5 Definitions

Accident(s)

Deviations from planned events that cause an unexpected and undesirable end result or effect.

Emergency Evacuation Plans

A posted plan of the area with exits clearly marked the layout of the area, and arrows indicating the appropriate direction to take.

- Posting shall be by means of a durable sign having a contrasting color from the background to which it is attached. Other effective means of communication, including verbal orientation, shall be used for inmates with disabilities for whom such signs do not provide the needed communication.
- Figures shall be of an approved type and shall be maintained in a legible manner.
- No person shall deface or remove such signs except as authorized by the Fire Chief.

Evacuation

Movement of occupants to a safe area of the facility, a minimum of 50 feet from the building, or to the designated area of refuge of sufficient size to accommodate all occupants.

Exit(s)

A continuous and unobstructed means of egress to a public way; and shall include aisle(s), intervening doors, doorways, corridors, exterior exit balconies, ramps, stairways, smoke-proof enclosures, horizontal exits, exit passageways, courts, and yards.

Fire Drill(s)

A practiced plan which follows a written evacuation plan of action for removal of staff, inmates, and visitors in the event of a fire or major emergency. Written evacuation plans must be in accordance with the NFPA standards and approved by the SFM. Fire drills shall be performed quarterly by all appropriate staff.

First-Aid

Treatment of minor scratches, cuts, burns, splinters, abrasions, etc., which do not ordinarily require further medical care. May also include any emergency treatment provided by a person certified in first aid and/or cardiopulmonary resuscitation (CPR) for the purpose of sustaining life until appropriate professional medical personnel can arrive.

Healthful and Safe

Freedom from danger to the life and well being of staff, inmates, and visitors as the nature of the employment and environment reasonably permits. Healthful shall also mean clean.

Injury Illness Prevention Program

A written program to ensure that employees comply with safe and healthy work practices.

Personnel and Staff

Any non-incarcerated person employed by the Department and/or working under the jurisdiction thereof.

52090.6 Training Firefighters

All firefighters, including the Fire Chief, shall be trained in the latest methods of fire prevention and suppression in accordance with the CFSTEP. Staff firefighters should attend the Basic Safety Training Course offered by the Office of Insurance and Risk Management Program.

All full-time firefighters shall be required to maintain current peace officer standard training according to PC 832 and other legally mandated training required by their bargaining unit contracts.

Technical training available through SCC, other fire service agencies, local colleges, etc., shall be coordinated through the local IST Manager, to meet the employee record keeping requirements, and the institution Fire Chief.

All fire department personnel shall be trained and certified in first aid and CPR.

Practice Drills

Mandatory team drills for staff firefighters shall be held for a minimum period of four hours per quarter. Drills shall include training in fire prevention methods, fire suppression techniques, operation of apparatus and life support equipment, and joint mutual aid training per local agreements.

Fire Department Training Records

Fire department staff training records shall be maintained by the Fire Chief at the fire department with a copy forwarded to the institution IST office.

52090.6.1 Training Other Staff

As soon as possible after reporting to work, all new staff shall be trained in the proper steps to take in the event of a fire or other life threatening emergency. Training shall include, at minimum:

- Fire and emergency reporting procedures for the institution.
- Location and use of fire extinguishers.
- Knowledge of fire exits and evacuation routes.
- Effects of smoke inhalation.
- Proper manner of reporting emergencies and safety hazards.

Administrative and Custodial Supervisors

Administrative and custodial supervisors shall attend annual refresher courses to ensure they are current in meeting their training needs for fire and life safety compliance.

All supervisory staff shall be trained in appropriate fire and life safety and sanitation inspections to ensure clean, healthy, and safe working and living environments within their own and adjacent work areas.

All institution staff, including administrative staff, shall attend quarterly fire drills as often as possible. Fire drills shall be documented by supervisors on Health and Welfare Agency Form DS 5003, Fire/Evacuation Drill Report. Attendance shall be documented as OJT by the area supervisor in the employee's training file.

52090.7 Fire Prevention Inspections

Inspections shall provide for correction of areas that may be potentially dangerous or deficient in meeting acceptable fire and life safety standards.

The maximum degree of safety shall be provided to protect staff, inmates, and visitors from injury or illness caused by fire or other hazards.

Staff shall conduct inspections at the specified interval and in the manner prescribed.

52090.7.1 Daily Inspections

Assigned staff shall conduct daily visual inspections of their immediate work or living areas to ensure fire extinguishers are placed in their assigned location and charged; fire hoses have not been altered or tampered with; evacuation routes, plot plans, and exit signs are posted; and all areas conform to fire, safety, and health regulations.

52090.7.2 Weekly Inspections

Weekly inspections shall be performed in every work and living area. These inspections should be performed by the immediate area supervisor. Deficiencies or items needing correction shall be brought to the attention of the area department/section head so that corrective action can be taken quickly.

52090.7.3 Monthly Inspections

On-going monthly inspections for compliance with safety, hazardous materials, and fire prevention standards shall be performed by the area department/section head.

- Inspection reports shall be consistent with the Injury and Illness Prevention Program.
- Copies of the monthly inspections shall be forwarded to the Fire Chief and safety coordinator.

52090.7.4 Quarterly Equipment/Systems Inspections

Quarterly inspections shall be performed on all manual or automatic alarm systems, sprinkler systems, communications systems, detection equipment, and all other types of fire protection equipment, including exit locking devices, doors, fire trucks, and equipment for fire fighting. These systems may be inspected monthly if time and staff allows. The Fire Chief or their designee shall perform these inspections. (Sprinkler systems shall be serviced by State licensed personnel as required by the CCR.)

52090.7.5 Semi-Annual Inspections

Semi-annual inspections for compliance with safety and fire/accident prevention standards shall be performed by the Fire Chief and/or their designee of the entire institution/facility and grounds. A report shall be generated by the Fire Chief through the chain of command to the Warden on all activities of the fire department and inspection deficiencies not corrected as required by code.

52090.7.6 Annual Inspections

Annual inspections should be performed by SFM in the manner prescribed by law.

- The SFM has statutory responsibility for institution fire prevention and public safety inspections. The SFM shall have access for annual fire and life safety inspections to all areas within the institution and grounds. The Fire Chief, or designee, shall accompany the SFM on each inspection. Each area supervisor is responsible to participate in the inspection of their own working or living area. Reports of these findings shall be forwarded to:
 - Warden.
 - Assistant Deputy Director, Office of Environmental, Health and Safety Management.
 - Deputy Director, ASD.
 - Assistant Director, OOC.
 - Deputy Director, Institutions Division.
 - Deputy Director, P&CD.
 - Chief, PFAB.
 - Fire Chief.

52090.8 Records Retention for Fire Inspections

Records of all inspections and corrective actions taken shall be maintained by the fire department for the current year, plus two (2) years.

52090.9 Fire Equipment Maintenance

The Fire Chief is responsible for the maintenance and repair of all fire fighting equipment. All fire equipment shall be inspected, tested, and maintained in serviceable condition to ensure its proper operation when a fire or other life-threatening emergency occurs.

52090.10 Fire Alarm Systems

All fire alarm systems, fire detection systems, automatic sprinklers or extinguishing systems, communications systems, and all other equipment, materials, or systems required shall be maintained in an operable condition at all times. When the fire protective qualities of such equipment, materials, or systems are disrupted or diminished, immediate action shall be instituted to reestablish such equipment, material, or systems to their original normal and operational condition.

52090.10.1 Fire Hydrants

The fire department is responsible for numbering, checking, testing, color-coding, and lubricating all fire hydrants. In addition, the fire department is responsible for the following:

- Hydrants shall be inspected quarterly and flow tested annually. Any repairs necessary shall be reported by the Fire Chief to the Correctional Plant Manager.
- Plot plans indicating the location of fire hydrants throughout the facility grounds shall be maintained at the firehouse.
- The area immediately adjacent to the fire hydrants shall be maintained free of grass, shrubbery, parked cars, or other obstructions.

52090.10.2 Fire Extinguishers

Fire department staff shall service or test portable fire extinguishers and shall secure a certificate of registration from the SFM. The required fee is to be paid by the State for fire department staff or inmates required to possess this certificate of registration.

- Fire department staff shall be trained, pursuant to CCR, to conduct the appropriate service and testing.
- Fire extinguishers shall be serviced as specified in CCR (8) General Industry Safety Orders. Servicing shall be performed in accordance with the CCR.

52090.10.3 Fire Vehicles

The Fire Chief shall ensure the maintenance and repair of all vehicles assigned to the fire department. Such maintenance and repair shall be performed on a "first priority basis for fire vehicles." The primary objective of this provision is to keep vehicle out-of-service time to an absolute minimum. Overtime shall be authorized when necessary.

In order to accomplish the stated primary objective, maintenance and/or repair services shall be performed by one of the following:

- Fire department personnel.
- Personnel assigned to the facility garage.
- A local independent dealer, vendor, or repair facility which shall be determined by the Fire Chief in cooperation with an inspector of automotive services from the DGS.

Records of all maintenance and repair work performed by the facility garage or outside vendors shall be maintained by the vehicle maintenance garage. Vehicle Daily Inspection forms conducted by the fire department staff/inmates shall be kept at the fire department and stored for the current year, plus two (2) years.

52090.11 Fire Equipment Inventory

A complete inventory of all fire fighting equipment, apparatus, and vehicles shall be maintained. This inventory shall specify the equipment item(s), name, date of purchase (or age), installation (if available), and condition upon last inspection. If a replacement item has been ordered, indicate the date the order was placed.

52090.12 Room Capacity Designation

Rooms used for assembly, classrooms, or similar purposes having an occupant load of fifty persons or more, where fixed seats are not installed, shall have an occupant load (capacity of the room) posted in a conspicuous place near the main exit from the room.

- Posting shall be by means of a durable sign having a contrasting color from the background to which it is attached.
- Figures (lettering) shall be of an approved type and shall be maintained in a legible manner.
- No person shall deface or remove such signs except by authority of the SFM.

52090.13 Fire Emergency Exit

Emergency exits shall be provided to ensure the safety of staff, inmates, and visitors. Exits should be positioned in such a manner that if one exit is blocked by fire and/or smoke, the other exit is available. All exits shall be continuously visible at all times, kept clear and free of obstructions, and

maintained in a usable condition. Exits shall lead directly to a hazard free area where adequate supervision can be provided.

Provision for emergency access and exit shall be in accordance with the CCR to allow for efficient removal of handicapped persons.

No person may impede, modify, or otherwise obstruct any designated emergency exit without approval of the Fire Chief.

52090.14 Fire Equipment Entrance to Security Area

Fire apparatus and personnel responding to an emergency scene shall not be detained. Each institution shall develop procedures to ensure compliance.

52090.15 Response to Fires and Fire Alarms

The fire department shall respond to all fires and fire alarms.

- Off-duty firefighters may be called in to work whenever their services are needed during a fire or inmate disturbance.
- No fire fighting member/staff shall leave the scene of a fire, fire drill, or other situation where apparatus/equipment has been used until the apparatus/equipment is returned to service condition, unless given express permission by the Fire Chief or their designee.
- Fire department staff shall take matters of internal operations to the Fire Chief.
- Fire department staff shall direct all persons seeking information relative to fires or the fire department operations to the Fire Chief.
- The fire department also may be required to respond to other institutional emergencies.

52090.16 Changes in Fire Policy

The Fire Chief shall make recommendations to the Warden with respect to matters of policy, personnel, and administration of the fire department.

52090.17 State Fire Marshal's Orders

All written SFM's orders, special or otherwise, shall be conspicuously posted on a bulletin board for a minimum of three days or until the SFM cited condition (violation) is corrected. All citations shall be maintained for the current year, plus two (2) years.

The SFM has certain responsibilities concerning fire, life, and panic safety in the institution. A working arrangement exists with the SFM's Office for them to periodically confer with the Associate Warden, Business Services, the Fire Chief, and/or any other interested supervisory personnel in the fulfillment of fire and life safety needs in the institution. The SFM's Office will also assist the Fire Chief in developing procedures pertaining to fire suppression in the institution.

- Whenever it becomes necessary to remodel or otherwise modify existing buildings (add or remove walls, install additional doors, etc.), plans shall be submitted to the Fire Chief for review and comment/approval. Plans shall be forwarded by the P&CD in Central Office, to the SFM for final approval prior to the beginning of a project.

52090.18 Fire Reporting

It is the duty and responsibility of every employee discovering a fire or fire hazard to report it to the fire department immediately or as soon as reasonably possible.

- All fire emergencies shall be reported by the fire department emergency telephone number. A record of all fire calls shall be maintained indefinitely at the institution fire department.
- Any fire which has been extinguished by other than fire department staff or inmates shall be reported by the fire department business telephone number.

When reporting a fire, employees shall provide the following information:

- Exact location and extent of the fire.
- Amount of smoke present.
- Action being taken to control the problem.
- Information relative to any disturbance accompanying the fire.
- Whether inmates or staff are being (or have been) evacuated.
- Nature of any known hazardous substances located within the fire area.

If possible, take corrective action to combat the fire and/or evacuate the area.

52090.19 Evacuation(s)

Fire protection practices and departmental policy mandate that all employees be instructed and trained concerning their duties and responsibilities should it become necessary to conduct an emergency evacuation for any fire or life threatening condition.

Fire emergency and evacuation plot plans and routes shall be conspicuously posted in every area throughout the institution. Area supervisors shall ensure

that all employees and inmates are aware of the correct route to take in the event of an evacuation. Special instructions shall be provided for inmates with disabilities to effectively communicate the correct route to take in the event of an evacuation.

Fire and emergency evacuation procedures shall be modified as necessary to ensure the safe and efficient evacuation of individuals with disabilities. Particular attention should be given to housing units designated for inmates with disabilities. Whenever possible, inmates with disabilities, who may require assistance during an emergency evacuation, should be housed in cells and dorms closest to the emergency exits.

Evacuations may be ordered prior to or during a fire or other emergency by the Fire Chief, institution firefighter, unit lieutenant or other personnel in charge of the life threatening area.

Whenever possible, at least two designated exits shall be identified to permit the prompt evacuation of staff, inmates, and visitors.

Evacuation drills shall be held quarterly under varying conditions on all three watches by designated supervisors. Such drills shall be actual unless the drill would cause a security or unusual safety problem with removing the inmates.

- Where actual evacuation is not feasible due to custody, safety, and welfare of staff or inmates, staff will walk through the evacuation procedures without actual evacuation.
- Such walk through drills shall be monitored by the area supervisor to ascertain that actual evacuation could be accomplished as required. All staff and inmates will be familiar with fire evacuation routes, exits, and procedures.

At the conclusion of fire drills, the area supervisor shall complete a DS 5003 indicating the necessary information, and forward a copy to the Fire Chief.

52090.20 Post Fire Investigation(s) and Reports

A complete report of all fires, hazardous materials, medical, standbys, public assist, or mutual aid incidents shall be prepared by responding fire department staff and forwarded to the SFM's Office as required by California Fire Incident Reporting System.

- Fire department staff shall conduct a complete investigation of the scene to ensure that the fire is completely extinguished.
- All materials burned or destroyed by the fire shall be itemized and the name of the person or persons involved shall be recorded on the report.

52090.20.1 Individual Fire Injury or Death

On fires where an inmate or employee is injured or dies as a result of the fire, or when the Fire Chief considers conditions related to a certain incident sufficiently unusual, a written report accompanied by appropriate photographs shall be completed and copies submitted to the SFM and the Assistant Deputy Director, Office of Environmental, Health and Safety Management, Central Office. In addition a copy of the written report shall be sent to the Division of Labor Statistics and Research, DIR.

52090.21 Mutual Aid

Mutual Aid, by definition, is a fire district request for supplement fire suppression aid in the event of a fire or other emergency beyond the immediate control of that district.

- The Fire Chief or designee may either request assistance from or dispatch firefighters and equipment to the fire district outside of the institution grounds, in accordance with the established local Mutual Aid Plan, existing agreements with the fire district requesting the assistance, and the state OES.
- Mutual aid requests or responses shall not place the institution in jeopardy or violate minimum safety standards.
- Mutual aid requests shall be processed through the institution Fire Chief or designee.
- When a request is received, the Fire Chief or firefighters shall determine the type of fire equipment required and the number of inmate firefighters or staff needed to respond.
- Mutual aid requests from fire districts may be verbal or in writing (prior to the emergency). Such requests shall outline the area to be responded to and the type of incident anticipated. The fire department may respond to such requests, based upon availability of required firefighter staffing and equipment that can be excused from regular duty assignments at the time of the emergency.
- Only inmates who have been so classified in accordance with local procedures in conjunction with the CCR or DOM 62070, once approved for use, are eligible to participate in mutual aid responses.

- Fire apparatus (engines/vehicles) shall be driven by the Fire Chief or firefighter only, when off institution property. All fire department staff shall be trained and licensed in accordance with the VC.
- Prior to leaving the institution grounds with inmate firefighters, the Fire Chief or firefighter shall call the watch commander and advise them of the location of the emergency, names and numbers of inmate firefighters, and staff responding.
- Upon return to the institution after a mutual aid call, the employee in charge shall call the watch commander to advise of the return and report any unusual incidents or activity while away from the institution.
- Inmate firefighters shall not drive on a public road, except in an extreme emergency.
- On extended mutual aid responses where the crew is to be away from the institution for more than one day, the employee in charge shall notify the watch commander at least every 24 hours, or as soon as practical thereafter, of the status of the crew.

ARTICLE 25—INMATE INDECENT EXPOSURE AND SEXUAL DISORDERLY CONDUCT MANAGEMENT

Effective-September 2007

52100.1 Policy

Indecent Exposure and Sexual Disorderly Conduct will not be tolerated by the California Department of Corrections and Rehabilitation (CDCR). Penal Code (PC) Section 314 defines Indecent Exposure as “the willful and lewd exposure of a person, or the private parts thereof, in any public place or in any place where there are present other persons to be offended or annoyed thereby.” Sexual Disorderly Conduct is defined in California Code of Regulations (CCR) Section 3000 as “every person who touches, without exposing, their genitals, buttocks or breasts in a manner, or other circumstance of this touching, that demonstrates it is for the purpose of sexual arousal, gratification, annoyance, or offense, and that any reasonable person would consider this conduct offensive.”

52100.2 Purpose

To ensure that every Indecent Exposure or Sexual Disorderly Conduct incident is reported, tracked, managed, subject to discipline, and referred for prosecution as set forth in this policy. An inmate who engages in Indecent Exposure or Sexual Disorderly Conduct shall be subject to a variety of Security Measures in an attempt to identify, prevent, reduce, and eliminate the opportunity to repeat the behavior.

It is the policy of the Department to provide support to every employee who observes an Indecent Exposure or Sexual Disorderly Conduct incident. Such support can include the Employee Assistance Program, the Employee Post Trauma Program, the Equal Employment Opportunity (EEO) referral process, and the imposition of Security Measures as described in Section 52100.4.

52100.3 Implementation

Incident Reporting and Tracking:

Every Indecent Exposure or Sexual Disorderly Conduct incident shall be documented by the observing employee on a CDC Form 115, Rules Violation Report (RVR).

Indecent Exposure is classified as either a Division D or a Division B offense. If the inmate has no prior criminal convictions for PC Section 314, Indecent Exposure, or PC Section 288, Lewd Act on a Child or Dependent Person, the inmate will be charged with the Division D offense of Indecent Exposure. If the inmate has any prior criminal conviction for PC Section 314 or 288, the inmate will be charged with the Division B offense of Indecent Exposure with a Prior.

In addition, the Indecent Exposure shall be reported as an incident on the CDCR Form 837, Crime/Incident Report. All Indecent Exposure Incident CDCR 837's shall be referred to the District Attorney.

An inmate who masturbates or engages in inappropriate touching of his/her genitals, buttocks, or breasts in public without exposing his/her genitals, for example under the clothing, will be charged with the Division E offense of Sexual Disorderly Conduct.

An inmate who engages in Indecent Exposure or Sexual Disorderly Conduct shall be referred for a mental health assessment through the submittal of a CDCR Form 115-MH, Rules Violation Report: Mental Health Assessment Request.

All employees observing an Indecent Exposure or Sexual Disorderly Conduct incident shall be provided the opportunity to complete a CDCR Form 2152, Employee Report of Inmate Sexual Misconduct. All Supervisors are required to complete the appropriate sections of the CDCR 2152, regardless of the employee's decision to complete the form.

Inmate clerks shall not prepare or type an Indecent Exposure or Sexual Disorderly Conduct RVR

The assigned Captain shall be responsible for identifying all Indecent Exposure and Sexual Disorderly Conduct offenders within their area. A tracking list shall be distributed on a monthly basis to Correctional Administrators, Facility Lieutenants, the Chief/Senior Psychiatrist or Chief/Senior Psychologist, and the Indecent Exposure Review Committee (IERC), (see Section 52100.5 “Monitoring”).

This list is highly restrictive and shall not be duplicated, but shall be available for staff review at the facility/unit program office.

52100.4 Security Measures

Inmates who engage in acts of Indecent Exposure or Sexual Disorderly Conduct will be subject to Security Measures that are designed to decrease the opportunity for the inmate to repeat the behavior and/or minimize the impact that the behavior has on prison staff and others. Security Measures are tools used by staff for a determinate period to identify, prevent, reduce, and eliminate the behavior.

There are two types of Security Measures. They are immediate Security Precautions and post Disciplinary Restrictions.

Security Precautions:

Immediate Security Precautions are implemented following a report, whether verbal or written, of Indecent Exposure or Sexual Disorderly Conduct. Correctional Officers/Sergeants shall implement Security Precautions. These Security Precautions shall be approved, tracked, and reviewed by the Lieutenant/assigned Captain on a weekly basis. In an Administrative Segregation Unit (ASU), Security Housing Unit (SHU), and Psychiatric Services Unit (PSU) the assigned Captain in consultation with the Interdisciplinary Treatment Team (IDTT) may remove or extend these precautions based on the overall case factors and institution security needs as appropriate.

Security Precautions include:

- Solid door with yellow placard, cell and/or side-window covering, or other devices primarily used to alert staff of an inmate's propensity to engage in Indecent Exposure or Sexual Disorderly Conduct behavior and secondarily used to limit the inmate's ability to observe staff while engaging in the behavior.
- Use of an Exposure Control Jumpsuit to limit the ability of the inmate to engage in the behavior.
- Temporary restriction from yard or other settings which may provide a venue for the behavior.
- Substitution of activity setting to reduce the possibility of the behavior impacting staff.

Application of Security Precautions:

Upon the first and subsequent Indecent Exposure or Sexual Disorderly Conduct offense(s), the inmate shall be identified on an Indecent Exposure Offender Tracking Memorandum.

Common Area Offenses:

If the Indecent Exposure or Sexual Disorderly Conduct occurs outside of the cell/bed area in the General Population (GP) the following protocols shall be followed:

All offenses: Place in Administrative Segregation/status. Apply yellow cell front covering and Exposure Control Jumpsuit.

No yard access for 10 days followed by Exposure Control Jumpsuit while outside of cell.

If the Indecent Exposure or Sexual Disorderly Conduct occurs outside of the cell/bed area in ASU/SHU the following protocol shall be followed:

All offenses: Apply yellow cell front covering.

First offense: No yard access for 10 days followed by Exposure Control Jumpsuit while outside of cell, and apply yellow window covering in an equipped facility.

Second offense: No yard access for 10 days followed by Exposure Control Jumpsuit while outside of cell, and apply yellow window covering in an equipped facility.

If the Indecent Exposure or Sexual Disorderly Conduct occurs outside of the cell in PSU the following protocol shall be followed:

All offenses: Apply yellow cell front covering.

First offense: No yard access for 10 days, followed by concrete yard for 60 days. Exposure Control Jumpsuit optional.

Second offense: No yard access for 10 days, followed by concrete yard for 120 days. Exposure Control Jumpsuit optional.

In Cell/Bed Area Offenses:

If the Indecent Exposure or Sexual Disorderly Conduct occurs inside the cell/bed area in the GP the following protocol shall be followed:

All offenses: Place in Administrative Segregation/status. Apply yellow cell front covering.

If the Indecent Exposure or Sexual Disorderly Conduct occurs inside the cell/bed area in ASU/SHU the following protocol shall be followed:

All offenses: Apply yellow cell front covering.

If the Indecent Exposure or Sexual Disorderly Conduct occurs inside the cell/bed area in PSU the following protocol shall be followed:

All offenses: Apply yellow cell front covering.

Restricted to 30 days concrete yard access.

If the Indecent Exposure or Sexual Disorderly Conduct offense occurs in a PSU Group setting the following protocol shall be followed:

Immediately remove inmate from group and return to cell.

Apply yellow cell front covering.

First offense: Refer to IDTT. Recommend 30-day suspension of group where, on a case-by-case basis, IDTT/clinical staff may temporarily restrict the inmate from group activity. Exposure Control Jumpsuit status upon return to group for 30 days with IDTT review and approval.

Second offense: Refer to IDTT. Recommend 60-day suspension of group where, on a case-by-case basis, IDTT/clinical staff may temporarily restrict the inmate from group activity. Exposure Control Jumpsuit status upon return to group for 90 days with IDTT review and approval.

All Security Precautions are reviewed weekly with the IDTT.

Any group suspension for Enhanced Out Patient level of care inmates requires clinical staff authorization.

Yellow Cell Front Coverings:

The application, review, and removal of yellow cell front coverings will be as follows:

The placement of yellow cell front coverings is mandatory for all Indecent Exposure and Sexual Disorderly Conduct offenses as a Security Precaution.

The reporting employee may initiate this Security Precaution immediately. The reporting employee shall submit a CDC 128-B advising of the yellow cell front covering. Distribution will include C-File, inmate, housing unit, and program office. If the reporting employee does not submit the Chrono, it is the Incident Commander's responsibility to ensure that a CDC 128-B is completed.

For the first offense the yellow cell front covering shall be applied for 90 days from the date of the offense.

For a second offense within 12 months from the most recent offense, or while on yellow cell front status, the inmate will be placed on yellow cell front status for 6 months from the most recent offense, which will run concurrent with the existing precaution.

Cell Front Covering Requirements:

The Warden will have the discretion to use solid yellow placards or cell front coverings, according to their cell front designs and material on hand, (lexan, paper, cardboard, etc.) as long as there is a review process in place to remove the Security Precautions when an inmate's behavior has been corrected.

Solid door: This type of door requires a yellow placard (yellow paper). Yellow paper is applied to the cell front windows as well as the count window, where applicable, leaving approximately eight to nine inches from the top or bottom of the windows uncovered, depending on the angle of control booth visual or upper/lower tier. When removing an inmate from a cell, conducting hourly security checks, and/or during count, it is required practice to remove the yellow paper completely in order to appropriately complete these duties.

Exposure Control Jumpsuit:

Exposure Control Jumpsuits are not to be used in the GP as the inmate requires close monitoring when wearing a jumpsuit.

The placement of an inmate onto Exposure Control Jumpsuit status is mandatory for all out-of-cell Indecent Exposure and Sexual Disorderly Conduct incidents as a Security Precaution in SHU and ASU.

The placement of an inmate onto Exposure Control Jumpsuit status is optional for all Indecent Exposure and Sexual Disorderly Conduct out-of-cell offenses in PSU.

The reporting employee may initiate this Security Precaution by submitting a CDC 128-B. If a CDC 128-B is not submitted by the reporting employee, the Incident Commander is responsible to ensure that a CDC 128-B is completed.

First offense: An inmate shall be placed on Exposure Control Jumpsuit Security Precaution for 30 days from the date of the offense.

Second and Subsequent offenses: Should the inmate re-offend within 12 months of the most recent offense, or while on jumpsuit status, the inmate will be placed on jumpsuit status for 90 days from the most recent offense, which will run concurrent with the existing precaution.

Disciplinary Restrictions:

Disciplinary Restrictions are applied as a result of a disciplinary action where inmates are afforded due process.

Inmates found guilty of committing an Indecent Exposure or Sexual Disorderly Conduct offense through the inmate disciplinary process may be subject to credit and privilege loss.

The suspension of privileges based on a finding of guilt in a disciplinary hearing, pursuant to CCR Sections 3007, 3323(d)(7), 3323(f)(5), and 3323(g)(8) shall be assessed as follows:

First offense: A finding of guilt in a disciplinary hearing for Indecent Exposure or Sexual Disorderly Conduct may result in the loss of privileges including, but not limited to, any or all of the following, for up to a 90 day period:

- (1) Canteen.
- (2) Appliances.
- (3) Vendor packages.
- (4) Telephone privileges.
- (5) Personal property.

Second or subsequent offense: A finding of guilt in a disciplinary hearing for Indecent Exposure or Sexual Disorderly Conduct may result in the loss of any or all of these privileges for up to a 180 day period.

Following the completion of the disciplinary process and a finding of guilt, security precautions and disciplinary restrictions may remain in affect for a period of time designated by the Senior Hearing Officer (SHO) consistent with this policy. If a finding of not guilty results, the security precautions shall be removed.

District Attorney Referrals:

All Indecent Exposure incidents shall be referred to the District Attorney per the current Memorandum of Understanding between the institution and the District Attorney.

This Memorandum of Understanding will include an explanation concerning the reason Indecent Exposure misdemeanor cases require prosecution.

The IERC shall publish a status report concerning Indecent Exposure incident cases referred to the District Attorney no less than quarterly. A copy of the status report shall be provided to the Warden and the District Attorney.

Classification:

Any inmate charged with an Indecent Exposure or Sexual Disorderly Conduct offense shall be placed in ASU and reviewed by the ICC to determine the appropriateness of ASU retention, pending disciplinary matters, and/or future housing considerations.

Inmates found guilty in a disciplinary hearing of committing an Indecent Exposure (either Division D or Division B offense) may also be subject to the imposition of an "R" suffix custody designation (refer to DOM Section 62010.4.3.1.).

A review of the "R" suffix custody designation shall be initiated by the Institutional Classification Committee (ICC) when an inmate has been found guilty in a disciplinary hearing for Indecent Exposure.

Assessment of SHU Term:

A determinate period of confinement in a SHU may be established for an inmate when found guilty of an Indecent Exposure or Sexual Disorderly Conduct per CCR Section 3341.5(c)(9)(K) "Sexual Misconduct." The term

shall be established by the ICC utilizing the standards in the SHU Term Assessment Chart in CCR Section 3341.5.

Family Visiting Restrictions:

Per CCR, Title 15, Section 3177(b)(1)(A), an inmate may be restricted from family visiting even without a criminal conviction, provided there is substantial evidence of such misconduct. Substantial evidence includes a guilty finding on a disciplinary report. Therefore, a guilty finding for Indecent Exposure may prohibit the inmate from family visiting. This prohibition may be permanent. This restriction on family visiting is not a penalty imposed by the SHO as part of the disciplinary disposition. A classification committee may impose this restriction when family visiting is reviewed. In the hearing summary, it is sufficient for the SHO to note the inmate has been found guilty of an offense listed under the CCR, Title 15, Section 3177(b)(1)(A), as prohibiting family visiting.

Mental Health Referral and Evaluation:

An inmate who engages in Indecent Exposure or Sexual Disorderly Conduct shall be referred for a mental health assessment through the submittal of a CDCR Form 115-MH, Rules Violation Report: Mental Health Assessment Request. At the same time, custody staff will implement Security Precautions as described in Section 52100.4.

Offenders who are already enrolled in the Mental Health Services Delivery System (MHSDS) will have this issue addressed by the IDTT assigned to that unit. The IDTT may recommend specific behavioral security precautions, in addition to appropriate adjustments to medications and/or other therapeutic interventions, in an effort to identify, prevent, reduce, and eliminate the behavior.

The receipt of the mental health assessment by mental health clinicians shall be reviewed for potential further mental health screening or a comprehensive mental health evaluation to determine if the inmate has a condition that warrants entry into the MHSDS. A diagnosis of Exhibitionism requires entry into the MHSDS under the medical necessity designation.

The results of Indecent Exposure or Sexual Disorderly Conduct related Mental Health Assessments shall be provided to the IERC no less than quarterly.

Training:

Training will be provided to impacted personnel necessary for the ongoing management of the Indecent Exposure and Sexual Disorderly Conduct Procedures.

Employee Policy Recommendations regarding Indecent Exposure or Sexual Disorderly Conduct Incidents:

All staff shall be allowed to make policy recommendations regarding Indecent Exposure or Sexual Disorderly Conduct incidents to their supervisor at any time. Written recommendations shall be submitted to the employee's supervisor who shall forward the recommendation to the IERC for consideration.

52100.5 Monitoring

The IERC will monitor the implementation and effectiveness of the policy and procedures set forth above. The IERC will meet no less than quarterly. The IERC is comprised of administrative staff at the level of Associate Warden, Chief or Senior Psychiatrist and Chief or Senior Psychologist, other program staff as appropriate, and other mental health staff as appropriate, Custodial Management, Litigation Coordinator, and a Recorder who will prepare minutes from the meeting. The IERC will evaluate policy compliance and effectiveness, and monitor the impact of Security Measures, and clinical programs using the tracking reports, Incident Reports, and the Employee Report of Inmate Sexual Misconduct.

The Warden will forward monitoring information to headquarters on a regular basis and headquarters will monitor the activities of the IERC.

52100.6 Revisions

ARTICLE 26 — AIR SPACE MANAGEMENT

Effective September 21, 1989

52110.1 Policy

The Department shall maintain operational control of the air space immediately adjacent to and above each institution consistent with State and Federal laws and regulations.

52110.2 Purpose

The purpose of this section is to provide guidelines for maintaining operational control of each institution's air space.

52110.3 Institution Air Space

Air traffic is controlled by the Federal Aviation Administration (FAA). The FAA has rules governing all movement of aircraft.

Federal Aviation Regulation (FAR) 91.79 requires a fixed wing aircraft to maintain a minimum altitude of 1,000 feet above the highest point of land or structure within a horizontal radius of 2,000 feet from the aircraft.

A helicopter has no altitude restrictions other than that which does not endanger persons or property below and which, if the engine failed, would allow the aircraft to safely auto-rotate to the ground. These altitude standards apply to all normal air traffic in the vicinity of an institution.

All aircraft observed violating FAR 91.79 shall be reported to the appropriate Air Route Traffic Control Center:

- Northern California (415) 797-3200.
- Southern California (805) 947-4101.

52110.4 Air Traffic Restrictions

The FAA has the authority (FAR 91.91) to restrict aircraft from flying over designated areas. There are two types of restrictions:

- Permanent.
- Temporary.

Permanent restrictions are usually limited to areas containing:

- Military bases.
- National Monuments.
- Areas consistent with greater public safety or security.

Temporary restrictions are granted on an as needed basis for a single event such as:

- To protect persons or property from danger during disaster relief.
- To prevent an unsafe congestion of sightseers and other aircraft above an incident that has or may generate a high degree of public interest.

A temporary restriction may be requested from the FAA Air Route Traffic Control Center and if granted will result in a Notice to Airman (NOTAM) of this restriction. See DOM 52110.3 for the Air Route Traffic Control Center telephone numbers.

52110.5 Responsibility

Each Warden or designee shall:

- Coordinate and implement communication with outside agencies to ensure a clear understanding of departmental policy regarding air traffic needs, emergency response and escape procedures.
- Develop or refine mutual aide agreements with local law enforcements or other airborne units. These units may assist in prevention of escapes, identification of unauthorized aircraft in the vicinity, and give air space protection during a critical incident or major disturbance.
- Identify and clearly mark a helicopter landing area for emergency landings, rescue flights, or public official visits. The landing site shall be outside the security area and, if possible, within the coverage of an armed post.
- Establish supplemental procedures for notification/reporting violations of air space and specify the contact person for notification/coordination with other agencies.
- Ensure that updated post orders are available to all armed posts informing them of the policy concerning air space control, including use of firearms, emergency landings, attempts to escape, authorized low altitude flyovers and emergency rescue.
- Ensure that all staff and inmates are informed by written and/or verbal notice of the policy regarding air traffic. Warning signs shall be posted as necessary.

52110.6 Emergency Situations

If any aircraft enters an institution's air space without prior permission, attempts shall be made to wave it off.

If it appears to be in distress, attempts shall be made to direct it to the designated landing site or adjacent area.

Occupants shall be directed to remain in the aircraft, under security coverage, until the situation can be resolved.

52110.7 Escape Attempts

If any aircraft entering an institution's air space appears to be involved in an escape attempt, all means shall be taken to prevent or halt an escape.

Attempts shall be made to direct an aircraft away from inmate occupied and/or security areas. The use of weapons fire as a warning is prohibited.

Firearms shall not be discharged in a direction that would endanger innocent employees or civilians not involved in an escape attempt.

Firearms shall not be used to bring down or disable an aircraft in flight.

Once an aircraft being used for an escape attempt has landed, all efforts will be made, including the use of firearms, to disable the aircraft and render it unable to fly.

Weapons fire may be returned at any attacker within an aircraft when that is the only means available to save the lives of innocent and/or uninvolved persons.

Recommended target areas for helicopters are to the transmission and motor located below the large horizontal rotor blades on top of the main cabin, and the rear tail rotor. Destroying the wheels or propeller of a fixed wing aircraft will disable it.

Inmates shall be ordered to move away from the aircraft. Failure to do so is considered an attempt to escape and shall be treated consistent with existing policy.

52110.8 Revisions

The Deputy Director, Institutions Division, shall ensure that the content of this section is accurate and current.

CCR (15) (3) § 3295.

Federal Aviation Regulations 91.79 and 91.91.

ARTICLE 27 — UNASSIGNED

ARTICLE 28 — UNASSIGNED

ARTICLE 29 — SOCIAL SERVICES AND COUNSELING

Effective September 22, 1989

53030.1 Policy

The Department shall provide a range of individual counseling and social services designed to meet the casework and program needs of inmates.

53030.2 Purpose

This section establishes objectives to ensure the maximum constructive impact of correctional staff on inmates within the correctional setting.

53030.3 Definition

Social services are programs or activities designed to assist inmates in their adjustment to institution living or to educate and provide skill training to prepare the individual for return to the community.

53030.4 Responsibility

Each Warden shall establish and maintain counseling and social service programs in conjunction with inmate classification procedures and individual program or casework needs.

The program shall be administered by a staff member preferably at the associate Warden level.

All institution personnel shall be familiar with social services available at their facility and shall inform inmates of available services when appropriate.

Correctional counselors shall provide needed casework services which may be augmented by volunteer community resources as detailed in DOM 31040, Volunteers.

53030.5 Reception Centers

Every inmate committed to the Department shall be assigned to the caseload of a Correctional Counselor upon reception.

Inmates shall be provided an orientation to the Department which shall include information related to the:

- CCR (15) (3).
- CCR (15) (2) BPT Rules.

- Available institution social services.
- The work incentive program.

53030.6 Institution Social Services

Every inmate shall be assigned to the caseload of a Correctional Counselor upon arrival at the receiving institution.

Correctional counselors shall qualify, by experience and education, to provide individual and group counseling services, as needed.

The Correctional Counselor shall be available for scheduled individual interviews and shall provide for a regularly scheduled "open line".

Inmates may request scheduled interviews by "Request for Interview" forms or through contact at "open line".

Counselors may ducat inmates from their assignments to facilitate necessary casework contacts when such contacts cannot be reasonably made during the inmate's off-time hours including the inmate's regular days off. (Refer to DOM 53130, IW/TIP)

The assigned counselor shall monitor the inmate's participation in program activity considering mutually established goals.

Social services provided shall include but not be limited to:

- Program development and evaluation.
- Institution adjustment.
- Parole planning.
- Interpersonal relationships.
- Family planning.
- Marital, family relationships.
- Parental education.
- Substance abuse.
- Crisis intervention.
- Assessment of special needs.
- Referral to available academic, vocational, religious, recreational, work and community programs.

53030.7 Community Resources

For additional information, refer to DOM 31040, Volunteers; DOM 53020, Inmate Activity Groups; and DOM 53130, IW/TIP.

53030.8 Revisions

The Deputy Director, Institutions Division, or designee shall ensure that the content of this section is current and accurate.

53030.9 References

PC § 3409.

ACA Standards 2-4472 - 2-4480.

ARTICLE 30 — INMATE SMOKING POLICY

Revised August 22, 2005

53040.1 Policy

Smoking, possession, or use of tobacco products by inmates, is prohibited. A tobacco product in the possession of an inmate is considered contraband.

53040.2 Purpose

This Article sets forth the operational practices associated with the Department's ban on inmate smoking and tobacco possession. Implementation of the ban is based on the Penal Code (PC) Section 5038.1 and the applicable regulations are found in the Title 15 of the California Code of Regulations (CCR), Sections 3006, 3187, 3188, and 3189.

53040.3 Definitions

For purposes of this Article, the following definitions shall apply:

- Smoke or smoking means inhaling, exhaling, burning, or carrying any lighted cigarette, cigar, pipe, or smoking paraphernalia used for consuming the smoke of tobacco or any other burning product.
- Tobacco product means any product that contains tobacco, the prepared leaves of any plant belonging to the nicotiana family, which shall include, but not be limited to, cigarettes, loose tobacco, cigars, snuff, chewing tobacco, or any other preparation of tobacco, tobacco substitutes, smoking paraphernalia, and all other items developed or processed for the primary purpose of facilitating the use or possession of tobacco or tobacco related products as well as packaging material.

Packing material includes, but is not limited to, snuff or cigarette containers.

53040.4 Tobacco Use Cessation Assistance.

All institutions/facilities shall provide tobacco use cessation assistance to inmates in a manner consistent with its physical design and security requirements. However, no institution/facility is obligated to purchase tobacco cessation aids for inmates pursuant to this Policy. Tobacco use cessation assistance may include, but will not be limited to, the following:

- Tobacco use cessation classes.
- Distribution of printed tobacco cessation material.

53040.5 Inmate Violations

Inmates violating the provisions of this Policy and the limitations of CCR, Title 15, Sections 3006, 3187, 3188, or 3189 on July 1, 2005, and thereafter shall be subject to the disciplinary process set forth in the Department Operations Manual (DOM), Chapter 5, Article 23, Inmate Discipline, and the disciplinary methods, administrative and serious rule violation provisions of CCR, Title 15, Sections 3312, 3314, and 3315.

53040.6 Revisions

The Chief Deputy Secretary, Adult Operations, or designee shall ensure that the content of this Article is accurate and current.

ARTICLE 31 – UNASSIGNED

ARTICLE 32 — UNASSIGNED

ARTICLE 33 – UNASSIGNED

ARTICLE 34 – UNASSIGNED

ARTICLE 35 — UNASSIGNED

ARTICLE 36 — INSTITUTION PUBLICATIONS

Effective October 2, 1989

53100.1 Policy

Institutions may publish a newspaper, newsletter or magazine with the specific authorization of the Warden.

Inmates may participate in the publication of such newspapers, magazines, or newsletters with specific authorization of the Warden.

If an institution publication is authorized, as provided above, it shall be produced as part of the work, training or education program of the institution.

53100.2 Purpose

The purpose of this section is to provide guidelines for the approval and preparation of institution publications and ensure compliance with legal and administrative requirements.

53100.3 Purpose Of Institution Publications

The publication shall provide a useful and constructive service by disseminating information of interest to inmates and staff, such as institution events and activities, policies and procedures, law changes, and court decisions.

It shall provide work experience and training in journalism, printing and related fields.

53100.4 Responsibility

The Warden shall appoint an administrative editor from his/her immediate staff (i.e., administrative assistant, chief deputy, PIO, etc.) who shall ensure that guidelines set forth by recent court decisions and departmental policies are adhered to. The administrative editor shall work closely with the supervising editor in the selection of inmates assigned to the institutional publications and shall review all publications prior to printing.

The administrative editor shall attempt to resolve disagreements pertaining to the style, content, etc. of the institutional publications that may occur

between the inmate editor and the supervising editor prior to the issue reaching the Warden.

53100.4.1 Supervision of Inmate Staff

Supervision of inmates in preparing an institution publication shall be the responsibility of the supervising editor. The supervising editor shall be an instructor in journalism or other qualified employee appointed by the Warden. The supervising editor shall participate in the planning and editing of each issue. The production of a satisfactory publication requires the continuing attention and effort of the supervising editor.

53100.5 Volunteer Assistance and Instruction

Institutions shall try to obtain assistance for the inmate staff from a journalist at a nearby college/university or local newspaper. Inmate reporters and editors shall be provided with journalism textbooks and other instructional material. Where possible they shall be offered basic instruction in journalism ethics and news writing.

53100.6 Selection of Inmate Staff

The administrative and supervising editors shall be responsible for submission of the names of recommended inmate editors and reporters to the Warden for final decision. Selections shall be made from interested inmates who have writing skills and an understanding of basic journalistic ethics. Inmates selected for these positions shall have demonstrated by prior job performance and behavior a sense of responsibility and personal maturity.

53100.7 Timekeeping

The supervising editor shall record the work time of the inmate editor and reporters for purposes of pay and the Inmate Work Incentive Program.

53100.8 Responsibility for Content

The Warden shall be responsible for the content of the institutional publication.

Under the direction of the Warden by the administrative editor, the supervising editor shall:

- Have authority to select, edit, or reject articles, illustrations and layouts.
- Work with the inmate editor to assure that journalistic standards of relevancy, accuracy, objectivity, fairness, and balance are maintained.
- Regularly evaluate in writing the performance of the inmate editor and reporters. Consistently poor performance evaluations shall be cause for removing an editor or reporter from the staff of the publication.

53100.9 Content

Publications shall be written, illustrated and produced in accord with the highest journalistic standards. Relevancy, accuracy, objectivity, fairness and balance shall be required in all articles.

Publications shall not be designed to cover events and issues outside of the institution, except for matters directly related to institution or departmental operations, such as new laws or court decisions affecting inmates. Articles and news stories should be relevant in the context of prison operations.

Material written by persons not assigned to the staff of the publication is contributed material. Pertinent articles may be accepted from outside contributors. The source of all contributed material shall be included.

Reprinting of news stories and articles from other publications is discouraged, as this practice does not provide experience or training in news writing. When an occasional reprint may be appropriate, the source must be noted.

No inflammatory material shall be published which might threaten institution safety or security. Material offensive to a race, gender, nationality, religious faith or similar group is prohibited. Lewd, obscene, pornographic, sexually suggestive, libelous or defamatory material, or use of profane or vulgar terminology is prohibited. Reports and articles shall not attack any individual or serve as a vehicle for individual inmate complaints, or as a substitute for the departmental inmate appeal procedure.

No advertising material of a commercial nature shall be printed.

Responsible editorial comments by inmate editors and reporters may be included in institution publications. All such material shall carry the by-line of the author and a short editor's note indicating that the expressed opinions are those of the author and do not necessarily represent the position of the management and staff of the institution or the department.

53100.10 Names and Photographs

Names and photographs of inmates and rank and file employees shall not be used without their permission. Names of management employees may be used without permission when the manager is an official source of information or comment. If an employee or inmate is the frequent subject of

published articles or illustrations, he or she may give a single blanket approval for subsequent publication of his or her name and picture.

53100.11 Editing Disagreements

Disagreements may occur between the supervising editor and the inmate staff regarding the style, language, content, or layout of a particular article or edition. Every effort shall be made to resolve such disagreements relying on basic journalistic standards as previously defined. The volatility of the prison environment shall be considered in evaluating sensitive material.

When a disagreement on content cannot be resolved, a special editing/ appeal process shall be used. If the issue cannot be resolved, the material in question shall be submitted by the supervising editor to the administrative editor. He/she shall render a decision (within three working days) which may include reasonable editorial changes. If a mutually satisfactory solution cannot be arrived at, the material shall be forwarded to the Warden for review, decision, or transmission to the Assistant Director, Communications. The Assistant Director shall render a decision within three working days following receipt of the questioned material. The Assistant Director may require editing of material to conform to journalistic standards.

53100.12 Suspension and Termination

Institution publications may be temporarily suspended during lockdowns and other emergencies with the approval of the Warden. Publications may be terminated only with the approval of the Director.

53100.13 Director's File Copy

A copy of each issue of each publication shall be sent to the Assistant Director, Communications.

53100.14 Expense and Circulation

The expense of publication shall be covered as general operating expense of the institution.

Subscriptions from outside individuals and organizations may be accepted. Subscription prices shall be determined with the approval of the Warden. Prices shall cover only the cost of production, handling and mailing and shall not be established to return a profit. Solicitation of subscriptions is prohibited.

Exchanges or free circulation shall be limited to schools, libraries, government agencies, other prisons and organizations involved in activities related to prisons. Mailing lists shall expire and be reviewed by October 1 of each year. The supervising editor may approve the sending of single copies of the publication to individuals or groups who have performed a service to the institution. Lists of such mailings shall be subsequently forwarded to the Warden.

53100.15 Revisions

The Deputy Director, Institutions Division, shall ensure that the content of this section is accurate and current.

ARTICLE 37 — UNASSIGNED

ARTICLE 38 — INMATE ADVISORY COMMITTEES

Effective January 2, 1990

53120.1 Policy

"Inmate Advisory Council," hereinafter referred to as "IAC," is a departmental term used to describe the body of inmates selected by the general inmate population of each institution to act in an advisory capacity to the Warden, and his or her administrative staff, in matters of common interest and concern to the general inmate population and administration.

With the approval of the Warden, a local IAC may use a title other than IAC, providing the title adequately conveys the group's advisory role. Examples are:

- Men's Advisory Council (MAC).
- Women's Advisory Council (WAC).
- Resident's Advisory Council (RAC).

53120.2 Purpose

The IAC serves a dual purpose, both of equal importance.

- The first is to provide inmates of the institution with representation and a voice in administrative deliberations and decisions affecting the welfare and best interest of all inmates.
- The second purpose is to provide the Warden and their administrative staff a vehicle to communicate administrative actions, and the reasons for same, with general inmate population.

53120.3 Responsibility

The scope of IAC activity, as an advisory and communication resource, is limited only by the Warden's prerogatives in this area.

The IAC and its individual members shall not be given nor attempt to assume responsibility or authority over the actions or activities of employees or other inmates.

Administrative staff and IAC representatives shall not rely on personal contacts, written or verbal communications between themselves and administrative staff as a vehicle for implementing or changing institutional routines and procedures.

53120.4 Representation

IAC representation shall be limited to areas of institution operation that have a direct impact on the general inmate population or on substantial segments of the population as determined by the Warden.

IAC representation shall be provided for all ethnic segments of the general inmate population and of inmates within a designated representation area or activity. This shall be accomplished through the election of all IAC representatives by the entire inmate population or by only those inmates of each ethnic segment of the population.

All inmates to be represented and who desire to participate in the election of an IAC representative shall be given an equal voice in the choice of representatives.

53120.5 Selection

When subcommittees of the IAC are established to represent specialized segments of the inmate population participation in the election of representatives shall be limited to those inmates in the particular area or segment of the population to be represented.

Duly elected IAC representatives shall elect the temporary representative to fill a vacancy (up to one month) in IAC offices.

The election of IAC members may be by secret ballot or other democratic process. This process must be free of irregularities, coercion, duress, or reprisal in or resulting from an individual inmate's election.

Employees and persons other than inmates may not nominate or select IAC representatives.

53120.5.1 Supervision of Selection

Employees of the institution shall supervise the election process of all IAC representatives.

When a secret ballot or other written or printed material is used, employees shall directly supervise, distribute, collect and tabulate the results.

IAC representatives shall be permitted to closely monitor the entire process.

Ballots or other written or printed material used in the process shall be delivered to the Warden or to designated staff, and shall be retained for no less than 30 days for review in case of alleged irregularities.

53120.5.2 Eligibility for Nomination

Eligibility for nomination, election, and retention as a member of the Inmate Advisory Council (IAC), shall be limited only by the inmate's ability to effectively function in that capacity. Disciplinary violations shall not bar an inmate from nomination, election to, or retention on the council unless they reflect behavior detrimental to the effectiveness of the committee.

53120.5.3 Authorization - Other Inmate Committees

Establishment of an IAC shall not preclude the Warden from establishing other inmate committees to perform special services or to act as a representative group for all inmates for special purposes and under specified conditions, as permitted in the CCR 3231.

Unless such special committees or groups of inmates are composed exclusively of IAC members, the committee or group shall not be considered as an IAC or subcommittee or branch of the IAC.

53120.6 Individual Grievances

Unless specifically authorized by the Warden, the IAC shall not function as a grievance committee nor involve itself in an individual inmate's grievance or request for action on an appeal.

The IAC may address grievances of concern to the general inmate population and bring the matter to the attention of the Warden or other administrative staff having authority to act on the matter.

Grievances and appeals relating to individual employees shall not be discussed by the IAC or its members with other employees at less than the level of Lieutenant. A matter that may relate to the general inmate population will be the only exception.

53120.6.1 Inmate Advisory Committee Member Retaliation

IAC members are prohibited from personal confrontation or threats to take an employee's decision or action to higher authority under the authority of the IAC.

53120.6.2 Employee Retaliation

Employees shall refrain from confrontations or threats of action simply because the inmate is a member of the IAC.

If the conduct of persons, either employees or IAC representatives, warrants the attention of higher authority, a factual report should be submitted to that proper authority.

53120.7 Communications

All formal meetings of the IAC, whether meeting alone or with staff, shall be recorded and made a permanent record of the IAC's activity.

Agenda, minutes of meetings, and other paperwork generated by IAC business shall be approved by the Warden or chief deputy Warden or designee prior to general distribution.

53120.7.1 Inter-facility Exchange of Minutes

IAC's may correspond and exchange copies of meeting agenda and minutes by the staff member designated by the Warden as the institution's IAC coordinator with prior approval and agreement between respective Wardens.

Any such mail deemed to be a threat to the security of either institution, the safety of employees, inmates or other persons, or likely to cause dissension, disorder or violence shall be denied at the point where such determination is made.

The Warden of the sending institution shall be informed of the denial and reasons for the denial, as will the chairperson of the sending institution's IAC.

53120.7.2 Inmate Advisory Committee Correspondence Legislation/Media

As an inmate representative group the IAC shall be permitted to correspond with members of the legislature, other elected and appointed governmental officials, and with representatives of the news media to the same extent as is permitted individual inmates under the CCR, relating to confidential correspondence.

Such correspondence by the IAC shall be confidential and subject to the same inspection as other confidential correspondence.

53120.7.3 General Population Awareness of Inmate Advisory Committee Activities

The general inmate population should be aware of all formal agenda items and the results of the IAC's meetings with the Warden and their administrative staff. Wardens shall provide bulletin boards in conspicuous locations throughout the institution, facilities and units, accessible to the general inmate population, or space made available on such existing bulletin boards, for posting of approved informational material by the IAC.

Provision shall be made for the duplication and distribution of approved IAC informational material to the general inmate population.

Where they exist, institution publications and institution radio systems may also be utilized for this purpose, with approval of the Warden.

53120.7.4 Candidate/Member Visibility

Wardens shall make the candidates for IAC membership and IAC members highly visible and recognizable to the general inmate population and staff.

This may be accomplished through the publication and posting of the names and photographs of candidates and members.

Visibility of IAC members may also be enhanced by the designing and issuing of conspicuous and highly recognizable shirts or jackets.

Institutions are encouraged to develop other ways and means to accomplish this desirable recognition of IAC members.

53120.7.5 Staff Response

Wardens and designated staff who have the delegated authority to consider and act on formal agenda items or issues shall provide the IAC with a timely written response.

The response shall clearly indicate the action taken, the reasons for the action, the manner and approximate time of implementation, or of any referral to higher authority and the reason or need for referral.

If no action will be taken, the reason for this decision shall be specified.

53120.7.6 Inmate Advisory Committee Notice of Changes to CCR

A copy of all departmental Notices of Proposed Changes in the CCR, as well as Rules Revision Bulletins announcing adopted changes in the CCR, shall be given to each institution's IAC.

The IAC's response to proposed changes, acting on behalf of the institution's general inmate population, is encouraged.

The IAC's may send responses separately and directly to the department's LAD-RMU or include their response attached to the Warden's response to such notices and bulletins.

This does not preclude individual inmate response to such notices and bulletins.

53120.8 Departmental Directives

Wardens shall place their IAC on the institution's local distribution list for department administrative bulletins and other department directives and announcements when such informational material concerns or is of concern to the general inmate population.

This may be by direct routing or through the institution's IAC coordinator.

In order to avoid resentment and possible confusion, staff who are concerned or affected by the information, instruction, or direction given in such material should be informed of that information as soon as or before such information is disseminated to inmates, including the IAC.

53120.9 Accommodations

Each Warden shall provide adequate facilities, equipment and supplies for the IAC to carry out its approved activities. This shall include designated IAC office(s), office furniture, typewriter and office supplies and stationery. Provisions shall also include duplicating equipment or ready access to such service.

The IAC shall be given every reasonable assistance to carry out its approved activities, but must secure permission from proper authority on each occasion requiring institution resources not specifically assigned to the IAC office.

53120.10 Staff Involvement

The effectiveness of an IAC is primarily dependent upon recognition and demonstrated support of its authorized activities by administrative and supervisory staff.

53120.10.1 Warden

Wardens shall convey and demonstrate to all employees and the general inmate population their recognition and support for IAC functions and activities that they have personally authorized through delegated authority.

All employees and the inmate population shall be made to understand that the IAC is the Warden's council, and as such deserves appropriate recognition and respect when it is performing as authorized.

53120.10.2 Delegation

Wardens may delegate the authority and responsibility for routine supervision and direction of IAC activity to staff members at not less than the level of Lieutenant.

An institution staff member, at not less than the level of Captain, shall be assigned the function of institution coordinator for the IAC.

53120.10.3 Captain's Involvement

Captains shall be directly involved in the activities of the IAC within their respective program units, as is the Warden in the overall administration of the institution.

Captains may delegate specific aspects of supervision, direction, and responsibility for IAC activities within the unit to subordinate supervisory personnel assigned to the unit.

53120.10.4 Custodial Supervisory Staff

Supervisory peace officer personnel assigned as the officer-in-charge of inmate housing areas on each shift or watch shall work directly with the IAC on issues and questions that may arise during that shift or watch which can be resolved at their level of authority.

Second level supervisory staff are considered to be a critical level for success or failure of an IAC, both from the viewpoint of inmates and administration.

The interest and attitude of these supervisory staff members will inevitably be reflected in the interest and attitudes of subordinate staff and inmates.

53120.10.5 Other Personnel

Other personnel, both supervisory and non-supervisory, should know and understand the purpose, function and role of the IAC.

Other personnel may be involved in IAC activities as deemed necessary by the Warden and their administrative staff in resolving issues relating to their particular area of expertise.

53120.10.6 Orientation/Training

All employees and inmates shall be trained in the objectives and operation of IACs.

The Warden may include members of the IAC in the orientation for new inmates and employees.

53120.11 Warden Meeting With Inmate Advisory Committee

Wardens are urged to personally meet with IAC representatives no less frequently than once each calendar month to discuss non-emergency issues that have not been resolved at lower level review with other staff.

Agenda items for scheduled meetings with the Warden shall be submitted at least one week in advance of the scheduled meeting, together with a summary of all IAC efforts at the lower levels of staff review.

When an effort to resolve matters at a lower level is not indicated, the Warden may defer any action on the matter pending the IAC's attempts to resolve the matter at lower levels.

Wardens and other staff who meet routinely with IAC should also submit an agenda to the IAC at least one week in advance of the scheduled meetings.

IAC representatives may bring emergency issues to the attention of the Warden without pre-arrangements of a formal agenda.

This may be through direct telephone contact with the Warden or through his or her office staff.

53120.11.1 Institution Coordinator

Meetings of IAC representatives with the institution's IAC coordinator shall be scheduled no less often than once each calendar month, separate and apart from the IAC's meeting with the Warden.

Issues, questions, recommendations or requests resolved at this level need not be referred to the Warden except in the form of minutes of such meetings for informational purpose.

The coordinator may also require the submission of a formal agenda for such meetings.

IAC representatives may bring emergency issues directly to the institution coordinator of the IAC.

It is anticipated that most meetings requested on an emergency basis shall be handled at the coordinator's level or be referred by the Warden to that level for appropriate action.

53120.11.2 Program Unit Supervisors

Meetings of IAC representatives with program unit supervisors shall be scheduled as needed.

A formal agenda is optional at such meetings.

A written summary of subject matter discussed and of decisions and actions shall be made a matter of record and distributed as is indicated for formal agenda and the minutes of meetings.

At the Captain's level, an open-door policy is most desirable in terms of the IAC having timely access to administrative staff.

53120.11.3 Custodial Supervisory Staff

Meetings of IAC representatives with supervisory custodial personnel shall normally be unstructured, informal, and without a need for agenda, minutes, or written summary except to refer subject matter to a higher authority, or when supervisory personnel are assigned to act for or on behalf of the Captain.

53120.11.4 Other Staff

Meetings of IAC representatives with other staff may be arranged on an as-needed or on a regular basis to resolve issues and questions relating to specific institutional areas and activities, such as canteen, food services, recreation, work, training, and medical services.

This may also be accomplished through standing subcommittees of the IAC established for a particular purpose.

53120.11.5 Non-supervisory Personnel

The IAC, its officers and individual members, shall not attempt to transact IAC business with non-supervisory personnel who do not have the authority to act on issues or questions of concern to the IAC, nor will IAC members attempt to force or enforce higher level staff decisions on employees.

If the actions of an employee appear wrong, the employee's supervisor shall correct the situation. The IAC should be encouraged to bring the matter to the attention of supervisory and administrative staff if the concern is one of genuine interest to the general inmate population.

53120.11.6 Director's Staff

Meetings of the IAC with the Director's staff may be held with individual IACs at the institution where the IAC operates, at regional meetings where

selected IAC representatives from several institutions are brought, or on a statewide basis at one location.

Such meetings will be scheduled at the discretion of the Director.

53120.12 Inmate Advisory Committee Appeals

Formal appeal procedures may be utilized by an IAC on any decision or action, when the matter is not resolved through normal IAC communication channels with the Warden.

Wardens' staff and IACs are urged to consider every reasonable means to resolve issues at the lowest possible level before utilizing the appeals process.

No reprisal at any level or in any form will be tolerated against an IAC or its members for performance of authorized and approved actions and activities.

Misbehavior while conducting IAC business, or under the guise of IAC business, shall be cause for disciplinary or other corrective action.

The routine process of the IAC's referral of issues, and requests, to the level of authority required for an action, is not an appeal process.

53120.13 Suspension

The Warden may suspend the membership of any individual IAC member or the activities of the IAC when there is reason to believe the individual's actions or those of the IAC presents a threat to institutional security, the safety of persons, or is counterproductive to the best interests and welfare of the general inmate population.

When suspension of IAC activities is contemplated, the Warden shall immediately notify the office of the Director of the reason for such contemplated action.

A written report shall follow if the IAC is suspended.

The Warden shall also notify the general inmate population of the action and the reason for it.

At the discretion of the Director or upon request by the Warden, the Director may assign departmental staff to investigate the matter and report their findings to the Director and to the Warden concerned.

Every effort will be made to reactivate an inmate IAC in the shortest time possible, commensurate with institution security and safety.

53120.14 Privileges

Wardens are encouraged to grant such privileges to the IAC as may be seen as fair and justified by staff and the general inmate population for services rendered.

This may include but is not limited to:

- Establishing IAC chair or vice chairperson as full-time assignments, as provided in the CCR, 3043.5(a)(1). Only two such assignments shall be authorized at each department facility.

53120.15 Organization

In general practice, the IAC should consist of two major organizational units.

- A general council with the number of members dependent upon the number of inmates, areas or activities to be represented.
- An executive committee with the membership elected by the members of the general council.

The number of executive committee members is at the discretion of the Warden and dependent upon the number that can effectively participate in executive sessions with the Warden.

In addition to these two major organizational units, there may be subcommittees selected to deal with special areas of concern.

Institutions with subordinate facilities, such as reception centers, north, south facilities, etc., may establish separate IACs for these facilities.

53120.16 Constitution and By-Laws

The Warden shall require that the IAC be governed in its operation by a constitution and by-laws prepared by the inmate group with the advice and guidance of a designated staff member. Such constitutions and by-laws shall be in compliance with existing rules, regulations, and procedures approved by the Director. The constitution and by-laws shall be approved by the Warden.

The following is the format for constitutions and by-laws for Inmate Advisory Councils.

- Article 1 - Name.
- Article 2 - Objectives. This article should contain a clear statement to the effect that the council serves in an advisory capacity to the Warden and that no administrative responsibilities are implied or to be assumed.

- **Article 3 - Membership.** A brief statement of eligibility for membership, ensuring all inmates the right to vote and defining those who may be elected to membership on the council.
- **Article 4 - Officers.** A listing of the officers of the council, normally a chairman, vice-chairman, secretary and sergeant-at-arms. A statement regarding the term of office of elected officers of the council, and the frequency of elections.
- **By-laws.**
 - **Section 1 - Membership.** A statement describing the areas or units represented by members of the council. Generally this provides for representation of the various housing units within the institution, but may include the selected representatives from various work assignments.
 - **Section 2 - Nominations.** Provides a system of nomination for selection to the inmate council.
 - **Section 3 - Election.** A description of the election process, which may include secret ballots and supervision of the elections by free personnel.
 - **Section 4 - Method of Filling Vacancies.** Describes method for handling vacancies created by transfer, release, removal, recall or election to an elective office on the council.
 - **Section 5 - Duties of Officer.** Statement of the duties of each officer.
 - **Section 6 - Meetings.** Statement of the time, place and frequency of meetings.
 - **Section 7 - Committees.** A listing of the standing committees of the council plus provision for special committees as the need exists.
 - **Section 8 - Parliamentary Authority.** A general provision that Robert's Rules of Order shall be the authority for parliamentary procedures.
 - **Section 9 - Executive Committee.** To provide for an executive committee of the council ordinarily consisting of the selected officers and two or more elected members from the council.
 - **Section 10 - Activity Cards.** Provision may be made to issue special activity cards to members of the council for their use in conducting business of the council.
 - **Section 11 - Removal of Members.** Provisions shall be made to remove members through recall by their constituents or by administrative order.
 - **Section 12 - Amendments.** General provision for a method to make amendments to the by-laws.

53120.17 Revisions

The Deputy Director, Institutions Division, or designee shall ensure that the contents of this section are current.

53120.18 References

PC § 5055.

CCR (15) (3) §§ 3043.5(a)(1) and 3231.

ARTICLE 39 — IW/TIP

Revised December 5, 2006

53130.1 Policy

California law provides that all persons sentenced to prison under PC § 1170 shall serve the entire sentence imposed by the court, except for a credit reduction in time served in the custody of the Secretary of the Department of Corrections and Rehabilitation (CDCR) for performance in credit qualifying work, training or educational programs, or other program activity. Every inmate shall have a reasonable opportunity to participate in a full-time credit qualifying assignment, consistent with institutional security and available resources.

53130.2 Purpose

This procedure defines criteria, staff/inmate responsibilities, and instructional information necessary for implementation of the departmental IW/TIP as provided for in PC §§ 2933 and 2934. Each Warden and RPA shall ensure administration of the Department's inmate work/training programs in accordance with these standards and procedures.

53130.3 Eligibility Criteria

Work-time credits are a privilege, not a right. Credits must be earned by inmates through satisfactory performance in a credit qualifying work, education or training assignment. Eligibility to earn day-for-day credits shall be determined by the type of crime committed and the specific date on which the commitment offense occurred.

53130.3.1 Inmates Serving Life Terms

Exceptions

Inmates serving sentences of 25 years to life, 15 years to life, or life with possibility of parole are not eligible for work-time credits under PC § 2933, except for those life inmates sentenced under the following PC sections:

- PC § 191.5(d).
- PC § 217.1(b).
- PC § 667.51(d).
- PC § 667.7(a)(1).
- PC § 667.75.
- The above life term cases are eligible to earn PC § 2933 credits toward reduction of their minimum eligible parole dates.

Life Terms with Enhancements or Consecutive Sentences

Inmates sentenced to life terms, who also have determinate sentence law (DSL) enhancements imposed on the life term, or who have consecutive DSL terms to serve with a life term, may be eligible to receive PC § 2933 credits on the DSL enhancements and/or the consecutive DSL term(s). (Refer to DOM § 73030.19, Case Records.)

53130.3.2 Crimes Committed on or After 1-1-83

Inmates sentenced to prison on non-life terms, whose crimes were committed on or after 1-1-83, shall automatically be eligible to receive day-for-day credits under the provisions of PC § 2933.

53130.3.3 Crimes Committed Before 1-1-83

Inmates sentenced to prison on non-life terms, whose crimes were committed prior to 1-1-83, may elect to receive credits pursuant to PC § 2933. Inmates in this category shall be afforded the opportunity to waive their rights to receive credit reduction on their sentences under PC § 2931 (one day credit for two days served) and become eligible to receive credits pursuant to PC § 2933 (one day credit for one day served).

- Eligible lifer cases described in DOM § 53130.3.1 shall require a waiver on crimes committed prior to 1-1-83.

53130.4 Time Credit Waiver

Pursuant to PC § 2934, eligible inmates may apply in writing, using CDC Form 916 (7/88), Time Credit Waiver, to receive work-time credits provided in PC § 2933. The following conditions shall apply prior to a waiver being effective and accepted by the Department:

Conditions for Acceptance of Time Credit Waiver

- Assignment to, and performing in, a full-time credit qualifying program.
- A waiver shall not be accepted from inmates who are within 30 days of their release dates or if the waiver is to be retroactive and recomputation of sentence credits would make the inmate overdue for release.
- Upon assignment to a credit qualifying full-time program, the inmate shall present a waiver form to their counselor/caseworker for verification of the program. The counselor/caseworker shall witness the form and enter the date upon which the waiver is effective. The counselor shall forward the waiver to records for inclusion in the inmate's C-File.
- When it is substantiated by staff that an inmate was not provided an opportunity to exercise a waiver, the waiver shall be effective the date the inmate would otherwise have been eligible because of performance in a full-time credit qualifying program.
- Accepted waivers shall be irrevocable.
- All credit attributable to that portion of an inmate's sentence served prior to the effective date of the waiver shall be retained by the inmate, except credit that was forfeited for any disciplinary violation. (Refer to DOM §§ 73030.8.11 and 73030.8.2 for additional details.)

53130.5 Work/Training Groups

Inmates subject to the provisions of PC § 2933 shall earn credits in accordance with their work/training group designation as determined by

classification committee action. The following eight work/training group designations shall be utilized by the Department:

- Group F: Full-time conservation camp work assignment.
 - Two days credit for each day of qualifying performance (two-for-one).
- Group A-1: Full-time work/training assignment.
 - One day credit for each day assigned to this work group (day-for-day).
- Group A-2: Involuntarily unassigned.
 - One day credit for each two days served, or three months credit for each six months served.
- Group B: Half-time work/training assignment.
 - Credit earning; same as provided in A-2 above.
- Group C: Voluntarily unassigned.
 - Zero credit earning.
- Group D-1: Indeterminate lockup status.
 - One day credit for each two days served, or three months credit for each six months served.
- Group D-2: Serving SHU term with disciplinary credit loss, or voluntarily unassigned in Administrative Segregation Unit (ASU), SHU or PSU.
 - Zero credit earning.
- Group U: Unclassified (process cases).
 - One day credit for each two days served, or three months credit for each six months served.

53130.5.1 Work Group Criteria and Definitions

Assignments and reassignments of inmates to work/training incentive groups shall be effected by classification committee action. Full-time assignments shall normally require eight hours of participation per day, five days per week exclusive of meals. Half-time assignments, four hours of participation per day, five days per week exclusive of meals.

Full-Time Assignments (Group A-1)

- The work day shall not be less than 6.5 hours and the work week no less than 32 hours. Those programs requiring an inmate to participate during other than the normal schedule of eight hours per day, five days per week (e.g., ten hours per day, four days per week) or programs that are scheduled for seven days per week, requiring inmate attendance in shifts (e.g., three days of ten hours and one day of five hours) shall be designated as "special assignments" and require departmental approval prior to implementation. A CDC Form 128-B or E chrono shall be placed in the inmate's C-File stating the hours of participation required for full-time sentence reduction credits. "Special Assignment" shall be entered on the inmate's timekeeping log by the staff supervisor.
- The following assignments and combination assignments shall be considered as credit qualifying full-time programs:
 - Full-time education and training program. Elementary school, high school, and vocational training programs require the same minimum hourly participation as the full-time work assignment.
 - Any combination of half-time work, school or training program resulting in full-time assignment requires the same minimum participation as a regular full-time work assignment. Each combination half-time assignment requires the same minimum participation as a half-time work assignment.
 - A full-time college program may be combined with a half-time work or vocational training program equating to a full-time assignment. The college program shall consist of 12 units in credit courses leading to an associate degree in two years or a bachelor's degree in four years.
 - A full-time Bridging Education Program (BEP) requiring the same minimum participation as a regular full-time assignment. Participation will be evaluated on course curriculum, instructor evaluation, and completed assignments.
- An inmate diagnosed by a physician and/or psychiatrist as totally disabled and therefore incapable of performing a work/training assignment, shall remain in work group A-1 throughout the duration of their total disability.
- An inmate diagnosed by a physician and/or psychiatrist as partially disabled shall be assigned to a work/training assignment within the physical and/or mental capability of the inmate as determined by the

physician and/or psychiatrist, unless changed by disciplinary action or classification committee action.

Involuntarily Unassigned (Group A-2)

- An inmate willing but unable to perform in a full-time assignment.
 - An inmate placed on a waiting list pending availability of a full-time assignment.
 - An inmate unassigned by classification committee action awaiting an adverse transfer to another institution.

Half-Time Assignments (Group B)

- The work day shall be no less than three hours and the work week no less than 15 hours.
 - Full-time enrollment in college consisting of 12 units in credit courses leading to an associate or bachelor's degree shall be classified as a half-time assignment.
 - A work/training assignment of four hours per workday, excluding meals, five-days per-week.

Voluntarily Unassigned (Group C)

- An inmate who refuses to accept or perform in work/training assignment, or who is deemed a program failure as defined in CCR § 3000 and who is placed on non-credit earning status by a classification committee.
 - An inmate shall remain in this status until reclassified for placement in a credit qualifying work/training assignment (A-1 or B), or placed on an assignment waiting list (A-2).
 - An inmate must submit a written request for reclassification to be considered for assignment and removal from work group C no earlier than 30 days from the date of placement.
 - An inmate shall be scheduled for a hearing within 30 days of receipt of a written request.

Indeterminate Lockup Status (Group D-1)

- An inmate assigned to a segregated housing program .
 - ASU, SHU, or PSU.
 - Inmates placed in assignments by classification committee action while in this status shall be placed in the appropriate work/training group, consistent with their assignment.

Determinate Lockup Status (Group D-2)

- An inmate assigned to a determinate SHU term which included a forfeiture of credits shall not be placed in a credit earning assignment during the period of credit forfeiture, or 180 days, whichever is less, starting from the date of change in custodial classification. An inmate confined in a secure housing unit for a division A-1 offense, as designated in CCR § 3323(c), and which included great bodily injury on a non-prisoner shall not receive participation or work-time credits for up to 360 days. Upon completion of the period of credit forfeiture, the inmate shall be re-evaluated by a classification committee.
 - An inmate's status in work group D-2 may be extended in up to six-month increments by a classification committee in unusual cases where no credit qualifying program can be assigned the inmate without causing a substantial risk of physical harm to staff or others. At the end of the designated period (six months or less), the determination shall be reviewed by an institution classification committee.
 - An inmate in ASU, SHU or PSU, on indeterminate or determinate lockup status, who is deemed a program failure as defined in CCR § 3000, may be assigned work group D-2 by a classification committee.
 - An inmate assigned to work group C at the time of placement in ASU, SHU, or PSU, or who refuses to accept or perform work/training assignments, shall be assigned work group D-2.
 - An inmate assigned to work group D-2 must submit a written request for reclassification to be considered for removal from that work group. If work group D-2 has been assigned based solely upon the inmate already being assigned to workgroup C at the time of placement in ASU, SHU, or PSU, the request may be submitted no earlier than 30 days from the original work group C assignment date. If work group D-2 has been assigned following placement into ASU, SHU, or PSU, for refusing to accept or perform a work/training assignment, or for being deemed a program failure as defined in CCR § 3000, the request for

removal must be submitted no earlier than 30 days from the date work group D-2 was assigned. Subsequent to the mandatory 30 days placement on work group D-2, if the inmate submits a written request for removal, and work group D-2 has not been assigned pursuant to CCR § 3044(b)(7)(A) or 3044(b)(7)(B), a classification hearing shall be scheduled within 30 days of receipt of the written request to consider removal from work group D-2.

Unclassified (Group U)

- An inmate undergoing reception center processing.
 - An inmate shall remain in this status from the date of reception until classified at their assigned institution unless he/she is assigned to a full-time BEP.

53130.5.2 Case Records Responsibilities

Case records staff shall be responsible to process and calculate time credits and release dates of inmates subject to the provisions of PC § 2933 through information provided by the courts, classification committees and program staff. (Refer to DOM § 73030, Time Computations.)

Time Credit Calculations

All classification actions and inmate appeal actions affecting an inmate's release date, e.g., work group changes, credit forfeitures and/or restorations, etc., shall be forwarded to case records for calculation of a new release date. Time credit calculations shall be computed and processed per DOM § 73030. The inmate shall receive a copy of all release date changes and/or modifications.

53130.6 Privileges

Revised December 14, 2012

Privileges for each work/training incentive group shall be those privileges earned by the inmate. Inmate privileges are administratively authorized activities and benefits required of the Secretary of the CDCR, by statute, case law, governmental regulations, or executive orders. Inmate privileges shall be governed by an inmate's behavior, custody classification and assignment. A formal request or application for privileges is not required unless specified otherwise in this section. Institutions may provide additional incentives for each privilege group, subject to availability of resources and constraints imposed by security needs. Privileges shall be governed by the following conditions:

- To qualify for privileges generally granted by this Section, an inmate shall comply with rules and procedures and participate in assigned work/training activities.
- Privileges available to a work/training incentive group may be denied, modified, or temporarily suspended by a hearing official at a disciplinary hearing upon a finding of an inmate's guilt for a disciplinary offense as described in CCR §§ 3314 and 3315 or by classification committee action which changes the inmate's custody classification, work/training group, privilege group, or institution placement.
- Disciplinary action denying, modifying, or suspending a privilege for which an inmate would otherwise be eligible shall be for a specified period not to exceed 30 days for an administrative rule violation or 90 days for a serious rule violation.
- A permanent change of an inmate's privilege group shall only be made by a classification committee action under provisions of CCR § 3375. Disciplinary or classification committee action changing an inmate's privileges or privilege group shall not automatically affect the inmate's work/training group classification. Worktime credit earning shall be affected only by a work/training group change by a classification committee.
- No inmate or group of inmates shall be granted privileges not equally available to other inmates of the same custody classification and assignment who would otherwise be eligible for the same privileges.

Privileges During Lockup

Changes in privilege group status due to the inmate's placement in lockup:

- An inmate housed in ASU, SHU, or PSU shall be designated privilege group D. However, if assigned to a qualifying work/training program within the special housing unit, the inmate shall be assigned privileges of a higher group, if such privileges are available within the assigned housing unit.
- An inmate working in lockup units while serving a determinate SHU term shall be retained in privilege group D only, irrespective of their work/training assignment.

Re-Entry

An inmate in a re-entry furlough assignment shall be eligible for available privileges subject to working eight hours per day and shall not require a privilege group designation. A re-entry inmate placed in a county facility shall be entitled to the same privileges afforded to county prisoners and provided for under terms of the Department's contract with the county facility.

All privileges shall be conditioned upon the inmate's compliance with the procedures governing those privileges, continued eligibility in the privilege group, good conduct and acceptable participation in their work/training assignment. Inmates returned to custody from parole may be eligible to receive privileges based on their participation in a work/training assignment.

53130.6.1 Privilege Group Criteria

Five privilege groups have been established which provide a graduated system of incentives to promote a desire to achieve positive goals. Criteria for assignment to a specific privilege group shall be as follows:

- Group A.
 - Assignment to a full-time credit qualifying work/training program.
 - Diagnosed by a physician and/or psychiatrist as totally disabled and incapable of performing a work/training assignment.
 - Diagnosed by a physician and/or psychiatrist as partially disabled and assigned to a work/training program within the mental or physical capabilities of the partial disablement as determined by medical staff.
- Group B.
 - Assignment to a half-time work/training program.
 - Involuntarily unassigned.
 - Temporarily placed into the group by a hearing official as a disposition pursuant to CCR § 3314 or 3315.
- Group C.
 - Inmates who refuse to accept or perform in a work/training assignment or are deemed a program failure as defined in CCR § 3000.
 - Temporarily placed into the group by a hearing official as a disposition pursuant to CCR § 3314 or 3315.
 - A classification committee action pursuant to CCR § 3375 places the inmate into the group. An inmate placed into this group by a classification committee action may apply to be removed from privilege group C no earlier than 30 days from the date of placement. Subsequent to the mandatory 30 days placement on privilege group C, if the inmate submits a written request for removal, a classification hearing shall be scheduled within 30 days of receipt of the written request.
- Group D.
 - Inmates in special housing units, voluntarily or under the provisions of CCR §§ 3335-3345 who are not assigned to either a full-time or half-time work/training program.
- Group U.
 - Reception center inmates undergoing processing.

53130.6.2 Group Privileges and Restrictions

Privileges for Group A are as follows:

- Family visits limited only by the institution/facility resources, -security policy, CCR § 3177, or other law.
- Visits during non-work/training hours, limited only by availability of space within facility visiting hours; or during work hours when extraordinary circumstances exist as defined in DOM § 53130.7.1.
- Maximum monthly canteen draw as authorized by the Secretary of the CDCR.
- Telephone access during the inmate's non-work/training hours, limited only by institution/facility telephone capabilities.
- Access to yard, recreation and entertainment activities during the inmate's non-working/training hours and limited only by security needs.
- Excused time off as described in DOM § 53130.7.
- The receipt of four personal property packages, 30 pounds maximum weight each, per year; exclusive of special canteen purchases.
- Special canteen purchases as provided for by DOM § 54070.

Privileges for Group B are as follows:

- One family visit each six months, unless limited by the provisions of CCR § 3177(b), or other law.
- Visits during non-work/training hours, limited only by availability of space within facility visiting hours; or during work hours when extraordinary circumstances exist, as defined in DOM § 53130.7.1.
- One-half of the maximum monthly canteen draw as authorized by the Secretary of the CDCR.
- One personal telephone access period per month.
- Access to yard, recreation, and entertainment activities during the inmate's non-working/training hours and limited only by institution/facility security needs.
- Excused time off as described in DOM § 53130.7.
- The receipt of four personal property packages, 30 pounds maximum weight each, per year, exclusive of special purchases.
- Special canteen purchases as provided for by DOM § 54070.

Privileges for Group C are as follows:

- No family visits.
- One-fourth the maximum monthly canteen draw as authorized by the Secretary of the CDCR.
- Telephone calls on an emergency basis only as determined by institution/facility staff.
- Yard access limited by local institution/facility security needs. No access to any other recreational or entertainment activities.
- No personal property packages.
- No special canteen purchases.

Privileges for Group D are as follows:

- No family visits.
- One-fourth the maximum monthly canteen draw as authorized by the Secretary of the CDCR.
- Telephone calls on an emergency basis only as determined by institution/facility staff.
- Yard access limited by local institution/facility security needs. No access to any other recreational or entertainment activities.
- The receipt of one personal property package, not to exceed 30 pounds maximum weight, per year, exclusive of special purchases as provided in CCR § 3190. Inmates shall be eligible to acquire a personal property package after completion of one year of Privilege Group D assignment.
- One special canteen purchase of one television or one radio or one radio/TV combination unit.

Privileges for Group U are as follows:

- No family visits.
- Canteen purchases. One-half of the maximum monthly canteen draw as authorized by the Secretary of the CDCR.
- Telephone calls on an emergency basis only as determined by institution/facility staff.
- Yard access, recreation, and entertainment limited by local institution/facility security needs.
- Excused time off as described in DOM § 53130.7.
- No special canteen purchases.
- No personal property packages.

53130.6.2.1 Changing Privilege Groups

Revised December 14, 2012

Permanent changes of inmate privilege groups shall be made by classification committee action.

Reduction/Suspension of Privilege

Privileges may be temporarily suspended or reduced by either classification committee action or as part of a disciplinary disposition as described in DOM § 53130.6.

53130.7 Excused Time Off

Revised October 14, 2009

Excused Time Off (ETO) shall be authorized by the work supervisor/employer. Inmates assigned to work/training groups A-1 and B may use ETO during approved absences from their assigned work/training assignment.

53130.7.1 Use of ETO

Revised September 25, 2007

ETO must be approved by the work/training supervisor and may be denied based on institutional operational needs or security. Departmentally approved activities for which ETO may be approved by work/training supervisors shall be limited to the following:

- Family visiting. An inmate scheduled for a family visit may be permitted to visit in the visiting room (regular visit) on the first day of a family visit while awaiting processing, and on the last day of the family visit.
- Regular visiting under extraordinary circumstances. Following are extraordinary circumstances for which use of ETO is authorized:
 - Out-of-State visitors. Upon substantiation that the visitor(s) resides out of State, a distance greater than 249 miles, and is in California for a temporary stay of 30 days or less, and the visitor(s) has not visited with the particular inmate for four months. No more than two such visits shall be permitted for each such occurrence.
 - Excessive distance. When a visitor must travel a distance of 250 miles or more, and has not visited the inmate within the last 30 days.
 - Weddings. When an inmate marries, the inmate may, with five working days prior approval, use ETO for a visit on the wedding day.
 - Handicapped. When a visitor is handicapped as defined by California law and must rely on special transportation to the institution. Approval is required five working days prior to the visit.
 - Family emergencies. When death, serious illness, or injury occurs to an inmate's immediate family member as defined in section 3000 of the Title 15; clergymen, family members including registered domestic partners, or close friends may visit the inmate to offer condolences or inform the inmate of the occurrence.
 - Infrequent visits. When a visitor unexpectedly arrives who has not visited in the last six months. Infrequent means not more than one visit each six months.
 - Visiting during authorized absence. An inmate shall be permitted to visit using ETO during approved periods away from assignment involving circumstances beyond the inmate's control. (Refer to DOM § 53130.8.)
 - Work assignment conflicts. When the inmate has not received a visit in the last 30 days and would otherwise be prohibited from visiting because of a conflict in work, training, or education assignment.
- Temporary community leave.
- Attendance at approved religious services or approved religious functions. For routine religious services, the use of ETO shall be limited to instances where it is not possible to change the conflicting work/education assignment.
- Non-routine recreation and entertainment activities.
- Emergency telephone access.
- Medical lay-in status.
- Short term medically unassigned status for 29 days or less.

Usage Limits and Recording

ETO shall be authorized by the work supervisor/employer in no less than 15 minute increments. An inmate shall not be required to use ETO for any service that the Department requires.

- Inmates shall not receive pay while on ETO.
- Use of ETO hours shall be recorded by work supervisors on the daily inmate timekeeping log.
- Use of ETO for any other reason than outlined above shall require approval by the Secretary of the CDCR.

53130.8 "S" Time

"S" time (security time off) shall be noted on timekeeping documents for an authorized absence from an inmate's work/training assignment that is required by the prison administration and/or beyond the inmate's control.

Inmates shall receive sentence-reducing credit commensurate with their designated work group. Inmates removed from their work/training assignment for an authorized reason shall retain their existing work/training

group status unless otherwise impacted by a classification committee or disciplinary action.

53130.8.1 Authorized Use of "S" Time

Revised September 25, 2007

"S" time shall be authorized for the following reasons:

- Institutional lockdown.
- Emergency recall.
- Attorney visits.
- Fog or inclement weather conditions.
- Work/training supervisor's absence when no relief supervisor is provided.
- Removed to out-to-court status.
- Three working days prior to transfer to another institution.
- Ten working days prior to parole or discharge, including institution base camps.
- Conservation camp inmates shall receive 15 days "S" time prior to release.
- Thirty working days prior to parole or discharge on California inmates serving their terms in other jurisdictions.
- Appearances at classification hearings or casework interviews which cannot reasonably be conducted during the inmate's off duty hours.
- Staff interviews with an inmate regarding a death notice or emergency involving a member of the inmate's immediate family as defined in Section 3000 of the Title 15.
- Emergency or life threatening medical or dental treatment.
- Temporary interruption/delay in the inmate's work/training assignment through no fault of the inmate.
- Medical consultant appointments with other than state employees.
- M-2 job development and/or initial M-2 screening interview.
- Board of Parole Hearings (BPH) hearings.
- Interviews with representatives of other governmental agencies.
- Delay in reporting to work/training assignment because of delayed meal schedule, unlocks, and clearing of the institutional count.
- Interview for staff preparation of a PC § 1170(d) report to the court.
- Temporary leave processing for a family emergency.
- A serious disciplinary hearing if overtime would be required for a staff witness to attend the hearing.

All other institution services and/or circumstances requiring an inmate's presence or participation shall be scheduled or conducted on the inmate's off-duty hours.

The granting of "S" time for reasons other than listed in this Section shall require approval by the Secretary of the CDCR or their designee.

53130.8.2 Priority Ducat System

The counseling series and medical department shall be permitted to ducat inmates for casework services or medical treatment during their assigned work hours under the following conditions:

Casework Purposes

- The counseling series shall be authorized to use the regular institutional pass (ducat) system for routine casework contacts. When it is necessary to make casework contacts during an inmate's work hours, a "priority ducat request" shall be initiated including only those inmates who will be on scheduled work assignments. This shall be done separately from any normal ducat request and the priority request shall require either the approval of the chairperson of a properly constituted classification committee or the approval of the originator's immediate supervisor.
- Based on a properly approved "priority ducat request" a pass shall be issued which shall be clearly identified in one of two ways. The pass shall either be printed on different color paper clearly distinguishing it as a priority ducat or the word "priority" shall be clearly stamped or printed on the ducat in bold red letters. At the termination of the contact with the inmate, the arrival time and departure time shall be recorded on the back of the pass. This shall be returned by the inmate to their work supervisor for purposes of timekeeping and inmate accountability. Inmates off the job for properly approved casework contacts shall be given "S" time by their work supervisors upon receipt of a properly authorized priority ducat with the arrival and departure

times recorded on the reverse side, signed or initialed by the recording employee.

Health Care Services

- All health care appointments, medical, dental and mental health shall be via the priority ducat process.
- At the termination of the medical contact, the inmate's arrival and departure time shall be recorded on the back of the pass. The pass shall be returned by the inmate to the work supervisor to facilitate accountability and timekeeping by the work supervisor. "S" time shall be recorded by the work supervisor for the time spent away from the work/training assignment under these circumstances.

53130.9 Assignments

Inmates shall be assigned to appropriate work/academic/vocational programs by classification committee action. Ethnic balances shall be considered when making assignments.

Pending assignment to a permanent work/training program, or when a regular program is temporarily suspended, inmates may be assigned, with or without their consent, to any work/training program decided upon by a classification committee or staff member responsible for the assignment of inmates.

Each prison shall establish Bridging Education Programs as work training incentive assignments to provide education programming. Inmates who are undergoing reception center processing, and are day-for-day credit eligible per PC § 2933, will be assigned to the BEP upon their arrival at the reception centers. Inmates who are day-for-day credit eligible and housed in general population institutions will be eligible to be assigned to the BEP. Participation in the BEP will be evaluated on course curriculum, instructor evaluation, and completed assignments. Assignment to an approved BEP shall qualify as a full-time assignment in work group A-1.

Inmates with the following case factors shall not be placed in Bridging Education Programs:

- Inmates who do not meet the criteria to earn day-for-day credits per PC § 2933, or are sentenced to an indeterminate term, who are undergoing reception center processing.
- Inmates who do not meet the criteria to earn day-for-day credits per PC § 2933, or are sentenced to an indeterminate term, who are housed at a general population institution.
- Inmates who are housed in segregated housing (e.g., ASU, SHU, PSU, etc.).
- Inmates housed in facilities where the BEP is not available (e.g., CCF, DMH, etc.).

The reception center Inmate Assignment Officer shall have the authority to initiate a classification action to assign inmates to reception center Bridging Education Programs and affect a work/training group change.

General population inmates may be assigned to Bridging Education Programs following a classification committee review as detailed in CCR § 3376.

A classification committee action shall not be required to remove inmates from Bridging Education Programs if no other changes in work/training group, custody designation or work waiting list is required.

53130.9.1 Performance Standards

Inmates shall perform assigned tasks diligently and conscientiously, and shall not pretend illness, or otherwise evade attendance or avoid performance in their assigned work and program activities. Inmates must report to their place of assignment at the time designated by the institution's schedule of activities and as instructed by their assignment supervisor. Inmates may not leave an assignment without permission.

Job Description

A job description shall be developed for each distinct inmate work/training position. The job descriptions shall set forth the minimum acceptable standards of participation and performance and the possible consequences for failure or refusal to meet the standards. Inmates shall sign and be given a copy of their job descriptions.

Program Evaluation Reports

Quarterly performance evaluations shall be prepared by staff on all assigned inmates using the following forms:

- Work assignments. CDC Form 101, Work Assignment.
- Education/vocation program. CDC Form 128-D, E, F, or L Educational/Vocational Progress Evaluation as appropriate.
- Medical. CDC Form 128-C, Medical-Psych-Dental Chrono.

Upon termination of an inmate from an assignment for any reason, an appropriate program evaluation report, as described above, shall be submitted by the work/training/medical supervisor.

Request for Removal from Program

Staff requests for removal from a program shall be submitted to the inmate's counselor on a CDC Form 128-B for consideration by an appropriate classification committee.

53130.9.2 Special Assignments

Special assignments are defined as departmentally approved special programs, temporary or short-term assignments for departmental convenience, and certain medical/psychiatric categories which require specific applications or procedures regarding credit earning eligibility. The following assignments/categories shall be determined special assignments:

Inmate Councils

- The chairperson and vice chairperson of an institution/facility Inmate's Advisory Council shall be considered a credit qualifying full-time assignment (work/training group A-1).

Pre-release Program

- Inmates assigned to a full-time institution/facility pre-release program shall retain full credit earning status (work/training group A-1).

Bridging Education Program

- Assignment to an approved BEP as described in DOM § 53130.5.1 shall qualify as a full-time assignment in work group A-1.

Transfer/Pre-parole/Discharge Status

Prior to a regular transfer, parole, or discharge, inmates shall be reassigned to checkout status and awarded credit in the following manner:

- Transfer. Three days "S" time prior to transfer.
- Discharge. Ten days "S" time prior to discharge.
- Parole. Ten days "S" time prior to parole.

Conservation Camps

Inmates assigned to a camp, except conservation center base camps, shall receive 15 days "S" time prior to parole or discharge.

53130.9.2.1 Medical/Psychiatric Special Assignments

Medical/psychiatric categories to be considered as special assignments are as follows:

- Light duty.
- Short-term medical/psychiatric or dental unassignments/lay-ins.
- Long-term medical/psychiatric unassigned cases.
- Temporary medical/psychiatric unassignment.
- Medically disabled.
- On-the-job injuries.
- Inpatient hospitalization cases.
- Medical/psychiatric treatment category cases; "H," "N," and "I."
- DMH placements per PC §§ 2684, 2690, and 1364.

53130.9.2.2 Credit Earning/Work Group Criteria

The credit earning status and work group designations for the above listed special assignments shall be determined by the following:

Light Duty Assignments

Inmates determined to have long-term medical/psychiatric work limitations shall be processed in the following manner:

- The inmate shall receive a medical/psychiatric evaluation to determine the extent of the disability and to delineate the capacity to perform work and/or training programs for either a full or partial workday. If the inmate is deemed capable of working only a partial work program, full credit shall be awarded for participation in such a program.
- The medical/psychiatric evaluation shall be reviewed by a classification committee.
 - If the classification committee concurs with the light duty recommendation, the case shall be referred to the institution assignment officer. The assignment officer shall make an effort to provide an assignment which is within the institution's resources and the inmate's capabilities. Upon placement in the assignment, the inmate shall be reclassified into work/training group A-1. Such cases shall be scheduled for semi-annual review by medical staff and a unit classification committee.
 - If the classification committee disagrees with the medical program recommendation, the case shall be returned to the

medical department with a CDC 128-G describing the difference of opinion or the rationale for the request for the second medical evaluation. Upon receipt of the second medical evaluation, the unit classification committee shall again review the case. If the committee disagrees with the second medical evaluation, it shall refer the matter to the institution classification committee for final determination of the inmate's work group/credit earning status.

Short-Term Medical/Psychiatric/Dental Unassignments or Lay-Ins

Inmates who are sick and require a medical/psychiatric lay-in or a medical unassignment for 29 days or less shall retain their existing work group and utilize ETO during the authorized absent period. Sick time must be approved/authorized by the appropriate institution medical authority.

The appropriate medical staff shall initiate a CDC 128-C specifying the reasons for the approval and the expected date that the inmate shall be able to return to work. The original shall be sent to the records office. The inmate shall be responsible for notifying their work supervisor. Sick time must be approved/authorized by the appropriate institution medical authority. The work supervisor shall record each day of the inmate's absence with the symbol "E" (excused).

Long-Term Medical Psychiatric Unassigned Cases

In cases where the medical condition necessitates that the inmate become medically unassigned for 30 days or more, the doctor shall initiate a CDC 128-C which shall indicate a date that the inmate shall be able to return to work. The original CDC 128-C shall be sent to the records office with copies to the assignment lieutenant and the classification committee coordinator in the inmate's housing/program unit. The assignment lieutenant shall change the inmate's status to medically unassigned pending reclassification. The classification committee shall confirm the inmate's medical/psychiatric unassigned category and change the inmate's work/training group status as follows:

- Inmates in the general population shall be changed to work/training group A-2, involuntary unassigned, to be effective the thirtieth day of unassignment.
- Inmates in lockup units who are in work/training group A-1 or B shall be changed to work/training group D-1, to be effective the first day of placement into Administrative Segregation.
- Inmates in lockup units who are in work/training group D-1 or D-2 shall be retained in their respective D-1 or D-2 work/training group.

Medical/Psychiatric Disability Status Determination

When an inmate has a disability that limits his/her ability to participate in a work, academic, vocational or other such program, medical/psychiatric staff shall document the nature, severity, and expected duration of the inmate's limitations on a CDC Form 128-C. Medical/psychiatric staff shall not make program assignment recommendations/decisions on the form. The form shall be forwarded to the inmate's assigned correctional counselor who will schedule the inmate for a classification committee review. The classification committee shall:

- Have sole responsibility for making program assignment and work group status decisions.
- Determine the inmate's program and work group status based on the information on the CDC Form 128-C and feedback from staff from the affected work area, academic/vocational program, and the Inmate Assignment Lieutenant or Work Incentive Coordinator.

Only when an inmate's documented limitations are such that the inmate, even with reasonable accommodation, is unable to perform the essential functions of any work, academic, vocational or other such program, will the inmate be placed in one of the two following categories by the classification committee:

- **Temporary medical/psychiatric unassignment.** When an inmate's medically determinable physical/mental impairment is expected to last for less than six months. Inmates in temporary medical/psychiatric unassignment shall:
 - Be scheduled for classification review any time there is a change in his/her physical/mental impairment or no less than every six months for reevaluation.
 - Be assigned work group A-2 credit earning status if unassignment is for less than six months.
 - Be assigned work group A-1 credit earning status and appropriate privilege group retroactive to the first day of the temporary medical/psychiatric unassignment if the inmate's condition lasts six months and the classification committee still cannot assign the inmate due to his/her impairment.

- **Medically disabled.** When an inmate's medically determinable physical /mental impairment is expected to result in death or last six months or more. The inmate's credit earning status shall be in accordance with work group A-1 and privilege group A.

On-The-Job Injuries

On-the-job injuries shall be documented on CDCR Form 7219 by the CMO. With the exception of inmates assigned to work group F, inmates shall be retained in their existing work group until medically approved to return to work. Work group F inmates shall revert to work group A-1 effective on the date the CMO determines the on-the-job injury excludes the inmate from conservation camp placement providing that the CMO's exclusion determination is within 29 days following the date of the inmate's removal from conservation camp assignment. If the CMO's exclusion determination is not within the 29 days, the inmate shall revert to work group A-1 effective the thirtieth day following the date of the inmate's removal from conservation camp assignment.

Medical/Psychiatric Inpatient Hospitalization

Inmates determined to be in need of short-term (29 calendar days or less) inpatient care shall be retained in their existing credit earning category. In the event that a longer period of inpatient care is required, the attending physician/psychiatrist shall prepare a CDC Form 128-C for referral to a unit classification committee. The classification committee shall confirm the inmate's inpatient unassigned category and change the inmate's work/training group status as follows:

- Inmates in the general population shall be changed to work/training group A-2, involuntary unassigned, to be effective the thirtieth day of unassignment.
- Inmates in lockup units who are in work/training group A-1 or B shall be changed to work/training group D-1, to be effective the first day of placement into Administrative Segregation.
- Inmates in lockup units who are in work/training group D-1 or D-2 shall be retained in their respective D-1 or D-2 work/training group.

Medical/Psychiatric Treatment Categories

Inmates who are assigned into the below list of medical/psychiatric treatment categories or transferred to a state hospital, unless otherwise specified, shall be deemed incapable of performing a work/training assignment. Inmates so designated shall be classified as work/training group A-1.

Category H

For inmates who require medical services and/or surgical care in an acute general hospital. This category is provided at CMF, CIM, COR, and CMC-East. Inmates with medical needs that cannot be met in CDCR hospitals may be transferred to a community hospital with the Warden's approval.

Category N

For inmates with chronic medical illnesses requiring skilled nursing or intermediate level medical care. This program has licensed nursing staff on duty at all times and is provided at CMF, CMC-East, and CCWF. Female inmates requiring this level of service shall be transferred to a community hospital unless special arrangements can be made at the CIW's infirmary. This category is not for inmates in infirmaries for undergoing short-term treatment of minor illnesses.

Category I

For inmates with major mental illness of psychotic magnitude requiring inpatient psychiatric hospitalization such as those with an acute, recurrent, or chronic illness which requires intensive treatment. This category includes inmates who are determined to be:

- Acutely psychotic, severely depressed or suicidal.
- Mentally ill inmates who are management problems, providing the psychosis warrants treatment in a hospital setting.

Category I is provided at CMF and the Salinas Valley Psychiatric Program (SVPP) at SVSP and this designation shall be made by CMF or SVSP staff. Other institutions with inmates who appear to meet category I criteria shall transfer such cases to CMF or the SVPP for inpatient psychiatric observation pending category classification.

Females requiring treatment in this category shall be referred to a state hospital.

DMH

The DMH also provides inpatient services for inmates who may be transferred from any CDCR adult institution pursuant to PC §§ 2684 and 2690.

Inmates transferred to DMH and retained under the jurisdiction of the Department per PC §§ 2684 and 2690 shall be deemed incapable of

performing a work/training assignment. Inmates so designated shall be classified as work/training group A-1.

Experimental Treatment

Inmates transferred to DMH to participate in a voluntary experimental treatment program per PC § 1364 shall be required to participate in a full-time credit qualifying work/training assignment in order to earn full work-time credit.

For details concerning specifics of DMH psychiatric placements, refer to DOM § 53130.12.

53130.9.2.3 Reception Center/Layover (Credit Earning Status)

Inmates undergoing processing in reception centers, not on layover (en route) status, who are eligible to earn day-for-day credit per PC § 2933, are eligible to be assigned to a full-time BEP.

Inmates undergoing processing who are ineligible to earn day-for-day credits per PC § 2933, or inmates on layover (en route) status in other institutions shall only be assigned into half-time assignments. Any exceptions to this policy require special approval from the Director, Division of Adult Institutions.

Process or layover status inmates placed on a half-time assignment shall have their time recorded on the reception center timekeeping log CDC Form 1690. This form shall be filled out by the work supervisor on a daily basis. The completed form shall be maintained in a secure area for four years at the initiating institution. A copy shall not be placed in the C-File. A copy may be issued to the inmate upon written request.

This temporary assignment status shall not require any change in the inmate's work/training group status.

53130.10 Timekeeping/Reporting

Work/training supervisors shall be responsible to record and report all work/training time and absences of inmates assigned under their supervision as outlined in this section.

Inmate Work Supervisor's Time Log

The Inmate Work Supervisor's Time Log, CDCR Form 1697, shall be used to record work attendance for inmates housed within the institution, work furlough and return-to-custody facilities, the exception being those mandated by Education, CalPIA and the camp program. This timekeeping log shall be the source document for the resolution of complaints or appeals.

This document is to be secured in a locked metal container and upon completion shall be retained at the location designated by local administration for a period of four years. Any staff member responsible for recording the work or training time and absences of each inmate shall also be responsible for the security of the documents.

The top portion of the Work Supervisor's Time Log must list the following information and be printed legibly in ink, preferably black.

- CDC number.
- Inmate's name.
- Ethnicity.
- Month.
- Year.
- Job title.
- Position number.
- Pay rate (hourly).
- Regular days off.
- Hours of assignment.
- Work/training supervisor's name.
- Work/training supervisor's title.
- First line supervisor's name.
- First line supervisor's title.

Work/training supervisors are responsible for recording and reporting all work/training time and absences of inmates assigned to their supervision. When an inmate is reassigned, paroled or transferred during the month, a diagonal line shall be drawn through the appropriate dates of unassignment and a notation made indicating the reason. (e.g., transferred, paroled, out-to-court, AD-SEG.)

Mismanagement/Falsification of Timekeeping Logs

Mismanagement and/or falsification of inmate timekeeping logs by staff is a violation of GC §§ 6200 and 6201 which may result in adverse personnel action and/or prosecution.

Security of Timekeeping Logs

Timekeeping logs are considered legal documents from which sentence reduction credits for inmates are computed. Timekeeping logs shall be securely stored. Inmates shall not have unauthorized access to any timekeeping log. Any staff member who reviews, processes, audits, or handles timekeeping logs shall be responsible for their security.

53130.10.1 Completion/Processing of Timekeeping Logs

Work/training supervisors shall complete and process timekeeping logs on inmates under their supervision using the following symbols and procedures:

- "X" - with the number of hours an inmate is on their assignment; i.e., X-6, X-7 1/2, or X-16.
- "A" - with the number of hours of unauthorized absence.
- "E" - with the number of hours of ETO authorized by the work/training supervisor shall be recorded in 15-minute increments.
- "R" - when the inmate is on regular days off.
- "RX" - with the number of hours worked during the inmate's regular day off.
- "H" - when the inmate is authorized time off for a state holiday.
- "HX" - with the number of hours worked during a state holiday.
- "S" - with the number of hours an inmate is unable to report to work through no fault of the inmate as defined in DOM § 53130.8.

Forwarding Timekeeping Logs

Upon completion of the work month, reassignment, or notification of pending transfer, the work/training supervisor shall immediately forward the completed timekeeping log to his or her immediate supervisor who shall audit and sign the timekeeping log. Timekeeping logs that have not been completed as outlined in this article and/or are missing information, shall be returned to the work/training supervisor for correction.

Prerelease Checkout Status

Case records staff audit an inmate's release date at least 9 months, 45 days, and 10 days prior to the scheduled release. If the projected release date is changed, the inmate and the inmate's counselor shall be notified. The records office staff shall notify the assignment lieutenant of the names of inmates who are scheduled for release. The assignment lieutenant shall publish the inmate's name and number on the daily movement sheet (DMS) indicating prerelease checkout status 10 working days prior to release.

Work/training supervisors shall review the DMS for inmates who have been assigned to their supervision. They shall complete the timekeeping log for parole/discharge inmates by awarding "S" time for the 10 working days prior to scheduled release. Conservation camp inmates shall receive 15 days "S" time prior to release. All timekeeping documents shall be submitted to the appropriate records office the following working day after notification of prerelease status.

Transfer Notification

A list of transfers scheduled for the following week shall be issued by the records office staff. Managers and supervisors shall ensure that the timekeeping documents for those inmates being transferred are submitted 3 working days prior to the inmate's departure. If notification of transfer is received in less than 3 days, the timekeeping log shall be submitted immediately. Inmates being transferred shall be awarded "S" time for the 3 working days prior to departure.

53130.10.2 AD-SEG Placement/Timekeeping Process

The term "AD-SEG" shall be used on the DMS to identify inmates placed on lockup status.

Work/training supervisors shall review the DMS daily to determine if any of their assigned inmates have been placed on lockup status. If so, the following processes shall occur:

- The work supervisor shall draw a diagonal line through the appropriate date on the inmate timekeeping log writing "AD-SEG" on the line. The timekeeping log shall be signed by the work/training supervisor and by his or her immediate supervisor. In the event that the inmate is released from lockup and returned to the assignment, the work/training supervisor shall begin a new timekeeping log.
- A classification committee shall evaluate the reasons for placement in AD-SEG to ensure that an appropriate work group is awarded. If the placement was due to a disciplinary action which resulted in a finding of not guilty or pending an investigation which resulted in the inmate's release, the classification committee shall prepare a CDC 128-G stating the facts of the case and shall return the inmate to the same work group he or she was in prior to AD-SEG placement. The work

group effective date shall coincide with the original date established prior to AD-SEG placement.

- If the placement in lockup was due to a disciplinary action which resulted in a finding of guilty or due to an investigation which resulted in classification committee action which changed the inmate's custody classification, work/training assignment, or facility placement, the classification committee shall classify the inmate's work-time, credit-earning status to D-2 from the date of lockup to date of classification action.

53130.11 Transfers

The work/training group and credit-earning status of inmates being transferred shall be governed and processed by the following criteria:

Nonadverse Transfer

Inmates shall not be placed in a lower work/training group as a result of a non-adverse transfer, including intra-facility. A non-adverse transfer is defined as movement of an inmate to a less restrictive institution or program where the security level is the same or lower, movement to a secure perimeter form a non-secure camp or Level I (Minimum Support Facility) by order of the prison administration for non-adverse reasons or transfers from reception centers; e.g., from Level III to Level II due to a lowering of an inmate's classification score; to the same level of facility due to overcrowding, special skills, or special program assignments.

With the exception of inmates assigned to work group F, an inmate transferred for non-adverse reasons shall retain their work/training and privilege group status. Work group F inmates shall revert to work group A-1 effective the date removed from camp assignment.

Inmates in vocational/training programs at the sending facilities shall be assigned same or similar programs, if eligible, at the receiving facilities unless such programs are full or unavailable. If the receiving facility's program is full or unavailable, the inmates shall be placed on any existing waiting list. If eligible, inmates on waiting lists at the sending facilities shall be merged into the receiving facility's waiting lists based on credit earning status, release date, and the length of time they have already spent on the sending facilities waiting list. Inmates who are PC § 2933 day-for-day credit eligible, shall be given priority for assignment.

Inmates shall be merged into the receiving institution's waiting list in the following manner:

- First, those inmates who are day-for-day credit eligible, approved for the program and are not assigned work group A-2. Inmates eligible to earn credits per PC § 2933 shall be given priority for placement on waiting lists, with the inmate with the earliest release date given first priority.
- Second, those inmates who are day-for-day credit eligible and already designated work group A-1. Inmates eligible to earn credits per PC § 2933 shall be given next priority for placement on waiting lists and the inmate with the earliest release date shall be given first priority.
- Third, those inmates who are not PC § 2933 day-for-day credit eligible and are already designated work group A-1. Inmates will be placed on waiting lists based upon the work group effective date.
- Fourth, those inmates who are not PC § 2933 day-for-day credit eligible and are not assigned work group A-2. Inmates will be placed on waiting lists based upon the work group effective date.

Adverse Transfers

Inmates in a work/training group A-1 or F who are transferred as a result of an adverse classification action, shall be reclassified to involuntarily unassigned status and placed in work/training group A-2 by the sending institution to be effective the date of transfer. The inmate shall remain in group A-2 until reclassified. An inmate in group A-2, C, or D at the time of transfer shall be retained in that group pending receiving institution classification.

Special Housing Unit Transfers

Inmates found guilty of a credit loss offense that may result in a determinate term of SHU confinement shall be evaluated for SHU placement by an institutional classification committee (ICC). If the committee concludes that SHU placement is required, it shall establish a MERD. The committee shall reclassify the inmate to credit earning group D-2 (zero credit) effective the date of placement in lockup status and shall retain the inmate in AD-SEG until transfer to an appropriate institution.

DMH Transfers

Inmates transferred to the DMH, and retained under jurisdiction of the Department, shall be classified prior to actual transfer by the sending institution. The transfer chrono, CDC Form 128-G, shall reflect the reasons

for the transfer and any change in the inmate's credit earning group. (Refer to DOM § 53010.9.2.2 for details on credit earning for DMH transfers.)

- The hub institution shall maintain the inmate's records and apply appropriate time credits.

Re-Entry Transfers

Inmates who are accepted for a work furlough/re-entry program will be transferred as a non-adverse transfer and they shall retain their current work/training group status while en route.

53130.12 Denial/Forfeiture/Restoration of Credits

The terms denial/forfeiture and restoration of credits shall be defined as follows:

Denial

- Refers to an inmate's inability to earn credits as a result of the inmate's own actions as follows:
 - Failure or refusal to perform assigned, ordered, or directed work or program activities.
 - Unauthorized absences from assignment.
 - While serving a SHU term wherein a disciplinary credit loss is imposed, but not to exceed the number of days of credit forfeited.

Credits shall be denied inmates who are serving SHU terms resulting from disciplinary action and concurrent credit loss. No credit shall be earned for the same period of the credit loss. This non-earning period shall commence effective the date of lockup. The period may be extended by a classification committee in six-month increments when it is determined that a substantial risk exists to the safety of persons or the security of the institution. For those inmates remaining under PC § 2931, the non-earning period applies to participation credit.

Forfeiture

- Refers to a removal of credits through disciplinary action that an inmate has earned or is projected to earn in the future.

Restoration

- Refers to a return or reinstatement of forfeited credit through classification committee action or through the inmate appeal system.

53130.12.1 Credit Forfeiture Procedure

Forfeiture of credit shall be governed by the provisions contained in CCR § 3323, Disciplinary Credit Loss Schedule, and PC §§ 2932 and 2933.

Appropriate credits shall be forfeited as part of the disposition following a finding of guilty for a serious rule violation.

Classification Committee Review

Disciplinary cases resulting in a loss of credit shall be reviewed by a classification committee which shall determine the appropriateness of the credit forfeiture and any program/housing changes required as a result of the rule infraction circumstances. The results of the committee action shall be forwarded to the records office for recalculation of the inmate's release date.

53130.12.2 Restoration of Credit Procedure

Credits forfeited for disciplinary offenses on or after 1-1-83 shall be considered for restoration, subject to limitations outlined in PC §§ 2931 through 2933.

Non-Restorable Credits

Credit shall not be restored for any disciplinary offense in which a victim died or was permanently disabled.

- One hundred and eighty days of credit forfeited for the commission of any felony listed in CCR § 3323 as a division A-1 offense shall not be restored.
- Ninety days of credit forfeited for either conspiracy or attempt to commit a division A-1 offense shall not be restored.

Inmates may apply for credit restoration through their counselor, or re-entry specialist, using CDC Form 958, Credit Restoration Application.

Eligibility/Hearing Determinations

The CDC Form 958 shall be reviewed by the counselor/re-entry specialist to determine eligibility for a scheduled hearing as follows:

- When criteria for restoration is met, a classification hearing shall be scheduled and held within 30 days of receipt of the application.
- When criteria for restoration is not met, a written explanation shall be provided by the counselor/re-entry specialist on the CDC Form 958 and the form returned to the inmate.

- Hearing decisions resulting in credit restoration shall be forwarded to the records office by a copy of the CDC Form 128-G, for recalculation of the inmate's release date.
- Credit shall not be restored in an amount which will make the inmate overdue for release. The counselor/re-entry specialist shall carefully review the work records and disciplinary history of inmates with close release dates who are seeking restoration. The counselor shall recommend to the committee the number of days credit that can reasonably be restored at the hearing without making the inmate overdue for release. In any event, the inmate shall be advised at the hearing that the records office will determine the actual release date which shall include a minimum of 10 staff working days for release processing.
- Credit shall not be restored if it is determined at the hearing that the inmate has refused or failed to participate in a work/training assignment during the required disciplinary free period.

53130.12.3 Disciplinary Free Periods

All credit, (100 percent), forfeited through the disciplinary process is restorable, except those credits deemed non-restorable by statute.

Inmates are eligible to apply for restoration of restorable credits in the percentage amounts shown, following completion of disciplinary free periods as outlined in the following formula:

- Division A or A-1 offenses.
 - Twenty-five percent following disciplinary free period of one year.
 - If less than one year remains before the inmate's anticipated release date, an application may be made within 90 days of the anticipated release date when the inmate has remained disciplinary free for a minimum of four months.
- Division B or C offenses.
 - Fifty percent following disciplinary free period of six months.
 - If less than six months remain before the inmate's anticipated release date, an application may be made within 90 days of the anticipated release date when the inmate has remained disciplinary free for a minimum of three months.
- Division D or E offenses.
 - One hundred percent following disciplinary free period of six months.
 - If less than six months remain before the inmate's anticipated release date, an application may be made within 90 days of the anticipated release date when the inmate has remained disciplinary free for a minimum of two months.
- Division F offenses.
 - One hundred percent following disciplinary free period of three months.
 - If less than three months remain before the inmate's anticipated release date, an application may be made within 60 days of the anticipated release date if the inmate has remained disciplinary free for a minimum of one month.

Disciplinary Defined

Disciplinary free, as defined in this section means no guilty finding for a CDC Form 115, Rule Violation Report, classified as either administrative or serious during the required disciplinary free period.

Additional Applications

If less than one hundred percent of the restorable, forfeited credits are restored by the committee, the inmate may make additional applications for restoration upon the completion of additional disciplinary free periods.

53130.12.4 Factors in Aggravation

A finding of substantial factors in aggravation by a classification committee during a restoration hearing shall be cause to postpone credit restoration consideration for one additional disciplinary free period.

Factors in aggravation may regard the specifics involved in the commission of the violation or the prior behavioral pattern of the perpetrator as follows:

Factors Relating to the Act

- The act involved great violence, great bodily harm, a threat to do great bodily harm or other acts showing a high degree of cruelty, viciousness or callousness.
- The perpetrator was armed with or used a weapon at the time of the act.
- The victim was particularly vulnerable.

- The act involved multiple victims.
- The perpetrator induced others to participate in the act or occupied a position of leadership/dominance over the other participants.
- The perpetrator threatened witnesses, prevented or dissuaded witnesses from testifying, induced others to perjure themselves, or in any way interfered with the investigation of the act.
- The perpetrator committed other acts which could have resulted in the loss of additional credits.
- The plan, sophistication or professionalism with which the act was carried out, or other facts, indicated premeditation.
- The perpetrator used or involved non-prisoners in the act.
- The act involved an actual, or attempted, taking of a hostage.
- The act resulted in the damage to property of great monetary value.
- The act involved a large quantity of contraband.
- The perpetrator took advantage of a position of trust or confidence.

Factors Relating to the Perpetrator

- Inmate has a pattern of violent conduct.
- Inmate's prior record indicates numerous acts or increasing seriousness of behavior.

53130.13 Credits for Interstate Transfer Inmates

The Western Interstate Corrections Compact and the Interstate Corrections Compact Agreements enable the Department to transfer and exchange prisoners with other states.

Inmates who agree to their placement in another state or federal institution or who are serving a concurrent term in another jurisdiction, shall be eligible to earn work credits as authorized under provisions of PC § 2933.

The inmate's work/program participation must be verified on a regular basis by a delegated official of the Host State or federal institution and reported to the Interstate Compact Unit.

- Reports must be submitted every six months.
- Work/participation hours must be comparable to California institution hours.

53130.14 Revisions

The Director, Division of Adult Institutions, or designee shall ensure that the contents of this Section are accurate and current.

ARTICLE 40 — JOINT VENTURE

Revised September 12, 2008

53140.1 Policy

The Secretary of the Department of Corrections and Rehabilitation (CDCR) shall establish Joint Venture Program (JVP) operations within State prison facilities to allow businesses as a Joint Venture Employer (JVE) to employ inmates confined in the State prison system for the purpose of producing goods or services. Such programs shall be patterned after operations outside of prison so as to provide inmates with the skills and work habits necessary to become productive members of society upon their release from State prison.

The JVE and any and all agents and employees of the JVE are an independent business entity and are not officers or employees of the State. "Joint Venture Program" is merely the colloquial name of the program, and does not create or connote a "joint venture" partnership or any other business relationship between a JVE and the State as defined under California law or any other law.

Nothing in these provisions is intended to establish an employer/employee relationship between any inmate participating in the JVP and the State of California, the CDCR, or any individual agency or office of the State of California.

53140.2 The Prison Inmate Labor Initiative of 1990

The Prison Inmate Labor Initiative of 1990, also known as Proposition 139, mandates that inmates who are confined in State prison or county jails should work as hard as the taxpayers who provide for their upkeep, and that those inmates may be required to perform work and services in order to do all of the following:

- Reimburse the State of California or counties for a portion of the costs associated with their incarceration.
- Provide restitution and compensation to the victims of crime.
- Encourage and maintain safety in prison and jail operations.
- Support their families to the extent possible.
- Learn skills which may be used upon their return to free society.
- Assist in their own rehabilitation in order to become responsible law abiding citizens upon their release from a State prison or a local jail.

Priority consideration shall be given to establishing Joint Venture projects that will retain or reclaim jobs in California, support emerging California industries, or create jobs for a deficient labor market.

53140.3 Purpose

This procedure establishes guidelines for the uniform interpretation, application, and administration of the JVP.

53140.4 Definitions

The purpose of this Section is to provide clarification and definition of requirements and terms regarding Joint Venture projects.

Joint Venture Program (JVP)

For the purpose of this Section, JVP means the program responsible for implementing the Prison Inmate Labor Initiative of 1990 (Proposition 139).

Joint Venture Program Unit (JVPU)

The staff responsible for the administration of the JVP.

Joint Venture Employer (JVE)

Any public entity, nonprofit or for profit entity, organization, or business which contracts with the CDCR for the purpose of employing inmate labor under the provisions of Proposition 139.

Inmate-Employee

Any inmate who is employed by a JVE.

Prison Industry Enhancement Certification Program (PIECP)

Under the Office of Justice Programs, the Bureau of Justice Assistance (BJA), PIECP administers and monitors the Federal guidelines for all JVPs nationwide.

53140.5 Responsibility

Headquarters

The Administrator of the JVP Unit (JVPU) is responsible for implementing the Prison Inmate Labor Initiative of 1990 (Proposition 139), and the Prison Industry Enhancement Certification Program (PIECP) Federal guidelines, April 1999 or most recent revision. This shall be accomplished by negotiating contracts and leases with fiscally sound and ethically managed businesses which will create JVP businesses to employ inmates under the provisions of Proposition 139. The JVPU will assist institutions in implementing JVPs, assist and monitor JVEs, and maintain and coordinate all inmate payroll functions.

Warden

Each Warden is responsible for the implementation of appropriate Joint Venture projects at his or her institution. This shall include participation in the processes of the contract/lease development, problem identification/resolution, and ongoing operational management. In addition, the Warden is responsible for appropriate administrative and security support to facilitate the success of the project.

The Warden shall determine all necessary security procedures for the JVP business. Discipline of inmate-employees is the responsibility of the CDCR and the Warden.

Joint Venture Coordinator

Each Warden will appoint a Joint Venture Coordinator who is responsible for the direct implementation/coordination of that institution's JVP. This position is responsible for providing a stable, readily available, and properly screened inmate workforce as well as appropriate administrative, security, and training support to facilitate the success of the project. Each Coordinator is responsible for providing JVPU with inmate hiring documentation, including any information on changes, terminations, or paroling inmates (see CDCR Form 1873, Inmate-Employee Payroll Distribution – Joint Venture Program (JVP)). In addition, each Coordinator is responsible for the

completion of the CDCR Form 1872, Inmate Participation Agreement-Joint Venture Program (JVP), for each inmate employee.

Joint Venture Employer (JVE)

As defined in California Penal Code (PC) Section 2717.1(b), the JVE shall be the sole employer of all inmate-employees in the program. The JVE shall be solely responsible for determining the applicability of, and ensuring compliance with, all State and Federal laws concerning employment of inmates and free staff including, but not limited to, applicable wage and hour laws and record keeping requirements. Nothing in this Section should be construed to modify the responsibility of the State and defined in the California Code of Regulations (CCR), Title 15, Division 3, Section 3484.

The final decision in the hiring of inmates shall be made by the JVE.

The JVE shall be solely responsible for paying comparable wages in accordance with applicable Federal and State laws including, but not limited to, Employment Development Department (EDD) guidelines.

California Prison Industry Authority (CALPIA)

The CDCR may contract with CALPIA to operate and manage the JVP pursuant to PC Section 2717.1 et seq. The CALPIA shall cooperate with the Warden of each facility to ensure that there is no conflict between the CALPIA operation and the proposed Joint Venture project.

Division of Adult Parole Operations

The Parole Agent in the field is responsible for coordinating the introduction of the paroled JVP inmate to the Employment Development Department (EDD) representative located in their unit.

Community Correctional Center/Facility

Any Community Correctional Center/Facility may participate in the JVP as long as it is certified by the CDCR. Inmate-employees must have been convicted in a California jurisdiction.

Employment Development Department

The JVP will obtain from EDD, wage data, applicable Standard Occupational Classification Code (SOC), and survey data from Occupational Employment Surveys (OES) for each inmate-employee's job description.

53140.6 Federal Certification

The Bureau of Justice Assistance (BJA) administers the PIECP. Federal guidelines (Federal Register: April 7, 1999, Volume 64, Number 66) outline Federal participation and certification requirements. The CDCR is required to ensure that businesses that enter into an agreement with the CDCR be designated by BJA as having met all program guideline requirements. This designation allows businesses to engage in interstate commerce pursuant to Title 18 U.S. Code Section 1761(c) for the sale of prisoner-made goods.

This designation shall remain in effect until cancelled, through written notice, by the CDCR. The BJA may cancel State certification if it finds that California's JVP businesses are not being conducted in conformity with the requirements of the Federal guidelines.

53140.6.1 Sale of Inmate Goods or Services to the Public

PC Section 2717.7 allows for services performed and articles manufactured by JVP inmate-employees to be sold to the public. PC Section 2812, which prohibits the sale of inmate-provided services or inmate-manufactured goods to the public, is not applicable to the JVP. Also, under Title 18, U. S. Code Section 1761(c), the PIECP exempts participating agencies from Federal restraints placed on the marketability of prison-made goods by permitting the transport of such goods in interstate commerce.

53140.7 Joint Venture Policy Advisory Board

The Joint Venture Policy Advisory Board (Board) was created as a result of the Prison Inmate Labor Initiative of 1990. The Board shall serve to advise the Secretary of CDCR on policies that further the purpose of the JVP. The Board shall meet at the call of the Chairperson.

Membership

As mandated by statute, the Board shall consist of the following individuals:

- The Secretary of CDCR (Chairperson).
- The Director of EDD.
- Five members to be appointed by the Governor.
 - One member shall represent organized labor.
 - One member shall represent industry.
 - Three members shall represent the public.

Five members shall constitute a quorum, and a vote of the majority of the members in office shall be necessary for the transactions of the business of the Board.

All members shall serve for four years.

Purposes and Duties

The duties of the Board are to advise/assist the Secretary on policies that further the purposes of the Prison Inmate Labor Initiative of 1990 and provide advice on strategies for accomplishing the following activities:

- Advise/assist in the development of approaches to prospective JVEs in the businesses that may be interested in establishing Joint Venture projects.
- Advise/assist CDCR in assessing the economic impact of prospective Joint Venture projects in the business community.
- Advise/assist in the development of strategies to promote the Joint Venture concept within the business community.
- Provide advocacy for program expansion and resources.
- Provide input and react to proposed policy and program changes.
- Provide ongoing assessment of program effectiveness.

53140.8 Criteria for Inmate Placement in the JVP

Inmate participation in the JVP is voluntary as evidenced by their written consent (see CDCR Form 1872, Inmate Participation Agreement-Joint Venture Program (JVP)). Each institution, in cooperation with the JVE, shall establish participation eligibility criteria. These criteria shall address custody level, excluded commitment offenses, previous work history, disciplinary record, length of time to serve, required skills and abilities, and education level. The decision to hire an eligible inmate shall be made by the JVE. The JVE shall determine the number of inmates required to maintain production, and shall determine when increases/decreases in the inmate workforce are required.

Inmates with an "Immigration Hold/Detainer" shall not be permitted to participate in the JVP as stipulated under Federal Immigration guidelines.

Inmate employment is "at will" and as such, is at the complete discretion of the CDCR and the JVE, and may be lawfully terminated with or without cause, but not for unlawful reasons.

As a condition of employment, all inmate-employees agree to participate in random urine testing.

53140.8.1 Social Security Number

JVP inmate-employees shall have a verified social security number. The JVP Coordinator shall be responsible for verifying social security numbers in the inmate-employee's Central File or by any other available methods prior to referring an inmate to the JVE for an interview.

An inmate cannot be employed by the JVE unless his/her social security number is verified. It is the inmate's responsibility to contact the U.S. Social Security Administration Office to resolve any issues if verification of the social security number cannot be established.

53140.8.2 Required Inmate Employment Documents

Once selected for employment by the JVE, the JVP inmate-employee shall sign the CDCR Form 1872, Inmate Participation Agreement-Joint Venture Program (JVP). The inmate shall receive a copy of the CDCR Form 1872. The JVP Coordinator is responsible for completing the CDCR Form 1873, Inmate-Employee Payroll Distribution – Joint Venture Program (JVP). The Coordinator shall send this form as well as the Inmate Participation Agreement to the JVPU. A bank signature card signed by the inmate-employee is also required.

53140.8.3 Strikes by JVP Inmate-Employees

JVP inmate-employees are not permitted to strike or be utilized as strike breakers.

53140.9 Procedures for Terminating an Inmate who is Participating in the JVP

Pursuant to Department Operations Manual (DOM) Section 53140.8, inmate employment is "at will" and as such, is at the complete discretion of the CDCR and the JVE, and may be lawfully terminated with or without cause, but not for unlawful reasons.

If the inmate refuses to work, quits, or is removed from the JVP, he/she shall be immediately returned to their housing unit, temporarily unassigned, and referred to a classification committee for placement either on a facility waiting list, or if they refuse to work, in a non-credit earning group pursuant to CCR, Title 15, Section 3375. The JVPU must be notified as soon as possible of this termination.

The JVE shall operate in a similar fashion as conducted outside of the prison. Should the JVE wish to terminate an inmate for work related reasons, the following procedures shall be followed:

- The JVE shall inform the inmate-employee and Joint Venture Coordinator at the facility.

- The inmate-employee shall be immediately removed from the JVP worksite and returned to his/her housing unit. The JVE shall complete a CDC Form 128-B, Chrono General.
- The JVP Coordinator shall inform the JVPU of the termination by completing the CDCR Form 1873, Inmate-Employee Payroll Distribution – Joint Venture Program (JVP). If the inmate-employee has been accused of violating any section of the CCR related to the termination of his or her employment, then a CDC Form 115, Rules Violation Report, shall be completed by the JVE.

53140.10 Comparable Wages for Inmate-Employees

The JVE shall pay inmates participating in a Joint Venture project, a wage that is comparable to wages paid by the JVE to non-inmate employees performing the same or similar work for that employer. If the JVE does not employ non-inmate employees for the same or similar work, compensation shall be comparable to wages paid for such work of the same or similar nature in the locality in which the work is to be performed.

53140.11 Job Descriptions

A job description shall be developed by the JVE for each inmate position, establishing the standards of acceptable participation and performance. The job description must be in sufficient detail to include all tasks performed, the skills required for the job, and all machinery to be used in the job. The inmate-employee shall sign a copy of the job description, acknowledging the conditions of employment, and shall receive a copy. The JVE shall submit to the JVPU for its review and approval, detailed job descriptions for any new job position created annually, upon activation of a new JVP business, or when there is a twenty-five percent or more change in job duties. The JVE shall certify the accuracy of all job descriptions under oath.

If the JVE has non-inmate employees performing the same or similar work, a detailed job description, wage rate, and a wage plan for its non-inmate work force shall be submitted to the JVPU.

53140.12 Wage Plans

Each JVE shall submit a wage plan annually to the JVPU for its review and approval that reflects the JVP business's compliance with comparable wage standards. Wage plans may take into consideration a worker's experience, seniority, performance, the technical nature of the work being performed, and other relevant factors.

The entry level wage shall be increased by a minimum of two and one-half percent for each 2,080 work hours. Deviation from this wage increase is authorized only where the JVE provides a reasonable performance-based rationale for denial of the increase. The JVE shall notify the JVPU and the affected inmate-employee of such performance deficiencies. Performance deficiencies shall be documented in the inmate-employee's file and provided to the inmate-employee no later than the date by which the required minimum raise is denied. The JVP Administrator shall have the final authority to determine the reasonableness of the JVE's performance-based rationale.

An inmate-employee shall receive a written performance evaluation after every 1,040 hours worked regarding the worker's performance and whether the JVE intends at that time to deny any required wage increase.

53140.13 Wage Plan Compliance

Pursuant to CCR, Title 15, Section 3486, if a JVE is not in compliance with the Wage Plan, the JVE shall be given thirty days to come into compliance. At the close of thirty days, if the JVE remains non-compliant, the administrator of JVP shall provide the JVE with a thirty day cancellation notice indicating a material breach of the Standard Agreement. If this breach concerns inmate wages, the JVE will forfeit amounts held as a security deposit. If at the close of the thirty day period specified in the cancellation notice, the JVE has not come into full compliance, the JVE shall be immediately terminated from the JVP.

53140.14 Employment Development Department

Annually, upon the creation of any new job position, upon the alteration of any existing position, or upon the establishment of any new JVP business, the JVPU is responsible for submitting job descriptions for each inmate-employee position to EDD. The EDD shall, upon completion of their review, provide wage survey data for each inmate-employee job description, and will make the wage information available to the CDCR on an annual basis. In addition, the JVPU will request wage data from EDD on any new JVEs throughout the year or as needed. EDD will also provide information on whether the employment of inmates would result in the displacement of currently employed and unemployed non-inmate workers performing the same work in the locality.

If the JVE does not employ non-inmate workers in the same or similar job positions as those worked by its inmate-employees, the EDD will determine the SOC applicable to each position.

Using the SOC, the EDD will randomly select twenty OES by industry from the locality of the JVE's prison work site. If twenty OES surveys are unavailable from that locality, the EDD will obtain OES surveys from the most appropriate proxy locality. In the event twenty OES surveys are unavailable statewide, the total available statewide shall be used to identify entry level wages.

If, in the opinion of the Administrator of the JVPU, the entry level wage should be reviewed, the Administrator may request that the EDD pull an additional twenty OES surveys. This will be the final review. In the event of different survey results, the Administrator will designate the entry level wage supported by one of the two wage surveys.

53140.14.1 Entry Level Wage

A minimum entry level wage for a JVE that does not employ non-inmate workers in the same or similar job position as those worked by its inmate-employees will be established as described in DOM Section 53140.14. The minimum entry level wage will be the lowest wage in the reporting wage range interval reported to the EDD for which a minimum of twenty percent of the survey data reflects a wage included in or lower than that wage interval. In no event can the minimum entry level wage be lower than the minimum wage under Federal or State laws or local ordinances.

53140.15 Compensation of Inmate-Employees

Earned wages paid by the JVE will be distributed to inmates by the CDCR once per month regardless of the frequency the employer issues payroll. Wage payments shall be made no less than twice a month by the JVE, and delivered according to instructions provided by the JVPU.

The JVE shall provide to the JVPU all applicable inmate-employee payroll data.

53140.15.1 Inmate Payroll Distribution

JVEs are responsible for withholding all Federal, State, and local payroll taxes from the wages of inmate-employees. Net wages, after taxes, shall be distributed as follows:

- Twenty percent for costs of room and board shall be remitted to the CDCR.
- Twenty percent for any lawful restitution fine or contributions to any fund established by law to compensate the victims of crime.
- Twenty percent for support of family pursuant to State statute, court order, or agreement of the inmate. If the inmate-employee chooses not to send money to a family member, and there is no court-ordered withholding, these funds will be deposited in mandatory savings for the inmate-employee.
- Twenty percent to the inmate-employee's trust account.
- Twenty percent to mandatory inmate savings account to be released by the CDCR to the inmate-employee upon parole.

53140.15.2 Inmate Restitution Fines

JVP deposits are exempt from fines and direct orders of restitution deductions enumerated in CCR, Title 15, Section 3097(j), except for any lawful restitution fine as described in DOM Section 53140.15.1.

53140.15.3 Inmate Savings Accounts

Inmate-employee savings accounts are restricted and under the control of the JVPU. Each inmate-employee's savings, plus the interest accrued on that savings, shall be provided to the inmate upon his/her release. Inmate-employee savings accounts are intended solely for the deposit of wages earned from employment with the JVE.

Wardens may authorize an early withdrawal of up to fifty percent of the balance of an inmate-employee's savings in cases where the inmate-employee is sentenced to 15 years or more and he/she has accrued \$6,500 or more from Joint Venture wages in their account (See Title 15, Section 3485(i)(3)). Examples of reasons for early withdrawal would include personal or family obligations of an urgent nature. JVP Coordinators should contact the JVPU for instructions on the procedure for this early withdrawal.

Inmate-employees who terminate from JVP with a savings account balance of \$500 or less may voluntarily elect to close their account and have the balance forwarded to their institutional trust account in order to avoid account fees. JVP Coordinators should contact the JVPU for instructions on the procedures for this provision.

53140.15.4 Selection of Victim Restitution Organizations

Each Warden/Community Correctional Facility Director shall select a suitable victim restitution organization with the following criteria:

- Any selected program shall be a fund established by law for the purpose of providing crime victim compensation. Examples of a fund established by law include District Attorney's Victim/Witness Programs or a crime victim program that has obtained a local governmental agency's resolution authorizing the program to receive funds, i.e. Board of Supervisors or City Council.
- Programs/organizations shall provide direct victim services (e.g., rape crisis, domestic violence, victim/witness, child abuse).
- Programs have been established in either the public or private sector.

These funds are to be used for direct services to crime victims (e.g., emergency funds for immediate victim needs, counseling, relocation costs, temporary needs such as immediate or crime-related day care fees). These funds are not to pay for overhead/operating costs of an agency or program.

Wardens shall contact the JVPU for assistance in determining eligibility of any crime victim fund.

The JVPU will provide for the transfer of funds to the designated crime victim compensation program on an annual basis.

53140.16 JVPU Responsibilities

- The JVPU shall monitor compliance with PC Section 2717.1 et seq., and Prison Industry Enhancement Certification Program Federal guidelines.
- The JVPU shall provide statewide coordination and support to effect program compliance and uniformity.
- The JVPU shall provide statewide oversight in the development, maintenance, amendment, and termination of JVP Standard Agreements (contracts) and leases.
- The JVPU shall provide information and assistance to institution staff and JVP businesses.
- The JVPU shall train institution staff on JVP duties and responsibilities.
- The JVPU shall contract with a private financial services firm to perform the distribution of JVP inmate payroll, and the collection of appropriate payroll data.
- The JVPU shall open and maintain bank accounts for the savings portion of JVP inmate-employee compensation. Inmate-employees shall have no access to these accounts until they are released. Upon release, JVPU will make available to the inmate-employee the savings account funds.
- The JVPU shall conduct a minimum of four unannounced on-site visits for all new JVEs and annually for all existing JVEs to determine the accuracy of the job descriptions and wage plan. The JVPU will provide a written report including the observations and findings of each visit, and maintain these records for five years.
- The JVPU will maintain a database which includes each inmate-employee's date of hire, hourly wage, hours worked, and the SOC Code for each inmate position.
- The JVPU shall conduct desk audits every ninety days from a random selection of ten percent of the inmate-employee workforce, reviewing salary levels to verify the wage rates established by the wage plan are being paid.

53140.17 JVE Responsibilities

- The JVE shall be responsible for completing inmate-employee work incentive time-keeping documentation, the CDCR Form 1697, Inmate Work Supervisor's Time Log, according to CDCR requirements.
- The JVE shall complete quarterly inmate-employee performance evaluations in the CDC Form 101, Work Supervisor's Report.
- The JVE must represent and warrant that the JVE business will not result in the displacement of any non-inmate workers performing the same work. The JVE agrees not to displace its non-inmate employees with inmate-employees.
- The JVE must comply with all applicable record-keeping requirements set forth in the California Labor Code and applicable Industrial Welfare Commission (IWC) Wage Orders.
- The JVE is solely responsible for compliance with all applicable Federal, State, and local laws and regulations. Nothing in this Section should be construed to modify the responsibility of the State as defined in the CCR, Title 15, Section 3484.

- The JVE shall adhere to all applicable Federal, State, and local health and safety laws and regulations.
- The JVE shall pay inmate-employees a wage that is comparable to wages paid to non-inmate employees performing the same or similar work in the locality in which the work is to be performed.
- The JVE will submit to the JVPU, detailed job descriptions for each inmate position.
- The JVE shall submit a wage plan annually to the JVPU.

53140.17.1 Notices

The JVE shall post at the JVP worksite, and provide to each inmate-employee, a notice of applicable employment laws and relevant Labor Code provisions.

The JVE shall post at the worksite, the CDCR Inmate Appeals and Non-Retaliation Notice provided by the JVPU.

53140.18 Inmate Hours and Work Schedule

As a part of the contract negotiations, the Warden and the JVE will establish the normal hours and days of the week that inmate-employees will work.

53140.19 Inmate Appeal

The CDCR's approved Inmate Appeal Procedures, CCR, Title 15, Section 3084.1 apply to the JVP. Under these provisions, an inmate-employee may appeal the substance or application of any written or unwritten policy, decision, or condition of CDCR or of the JVE to which the inmate-employee is employed, or appeal any behavior or action directed toward the inmate-employee by the staff of either the State, the JVE, or another inmate-employee. Inmate-employees may file complaints regarding alleged violations of their employment related rights under PC Section 2717.8, relevant Labor Code provisions, and applicable Industrial Welfare Commission Wage Orders.

To address JVE related matters, inmates shall not be subject to retaliation by the CDCR for their use of the inmate appeal process pursuant to CCR, Title 15, Subsection 3084.1(d). Inmates shall not be subject to retaliation for exercising rights guaranteed under the State Labor Code or elsewhere in law to address JVE related matters.

Pursuant to CCR, Title 15, Subsection 3084.7(m) any current or former JVP inmate-employee who believes he/she has a grievance regarding a wage and hour or retaliation claim against a JVE, shall complete the CDC Form 602, Inmate/Parolee Request For Appeal, within 15 working days after the occurrence of the alleged violation. The informal and first level response will be deemed waived. The institution's Appeals Coordinator shall log the appeal and immediately forward the appeal to the JVP Administrator. The Administrator, JVP, has thirty (30) working days in which to respond to the appeal.

The JVP Administrator shall attempt to resolve the grievance. If the inmate-employee is dissatisfied with the JVP Administrator's resolution, including rejection for timeliness, the inmate-employee may file a complaint with the Labor Commissioner. The inmate-employee will be advised of his/her rights and responsibilities for filing a complaint with the Labor Commissioner, the Division of Labor Standards Enforcement (DLSE). Rejection by the JVP Administrator does not limit or change the right of the inmate-employee to file a complaint with the DLSE. Any complaint filed with the Labor Commissioner will be governed by the DLSE's time frames for filing grievances including, but not limited to, Labor Code Section 98.7 and Code of Civil Procedure, Sections 337, 338, and 339, and is deemed filed when the CDC Form 602, Inmate/Parolee Request For Appeal is filed.

No inmate-employee may be discriminated against or discharged for filing an appeal or a complaint regarding wage and hour or retaliation violations on the part of a JVP employer. If the Labor Commissioner determines that no violation has occurred and that the complaint was frivolous, unreasonable, groundless, or was brought in bad faith, the Commissioner may direct the complainant to pay reasonable attorney's fees to cover the costs of any hearing(s) associated with the complaint.

53140.20 Custody Costs

During normal working hours, custody costs are the responsibility of the institution. Under normal situations, if custody is available or budgeted for the area where the JVE is located, no costs will be billed to the JVE. If the JVE requires custody staff during time periods not normally covered by institutional custody staff, the JVE will be charged for this custody cost at the discretion of the Warden.

53140.21 Workers' Compensation Insurance

The CDCR will provide workers' compensation coverage for inmates employed in the JVP. In return, the JVE will pay the CDCR a fee equal to 75 percent of the published rate for the classification of similar private

employers as outlined in the California Workers' Compensation Insurance Manual.

All inmate-employees' claims will be processed by the institution. The JVE is responsible for completing all required CDCR forms relating to any work related accident.

53140.22 Parole Procedures

The JVP Coordinator shall inform the JVPU thirty to sixty calendar days prior to the parole of an inmate-employee. This information should include the parole date, identification of the parole unit and parole agent if known. The JVPU shall close the savings account, inform the financial service, and arrange for remaining savings and final payroll to be forwarded to the paroled inmate-employee.

53140.23 Lease Agreements

The Director of the Department of General Services (DGS) with the consent of the CDCR may let, in the best interest of the State, any real property located within the grounds of a facility of the Department to a public or private entity for a period not to exceed five (5) years for the purpose of conducting a JVP. The lease may provide for renewing the lease for additional successive terms not to exceed a total of twenty (20) years. Any lease for State property entered into pursuant to this section may be at less than market value when the Director of DGS determines it shall serve a statewide public purpose (Government Code Section 14672.16(b)).

53140.24 Standard Agreement (Contract)

A Standard Agreement (Contract) shall be entered into between CDCR and any public entity, non-profit or for profit entity, organization, or business for the purpose of employing inmate labor pursuant to the Prison Inmate Labor Initiative of 1990. These contracts are non-competitively bid, and are awarded for five-year terms up to a total of twenty (20) years.

53140.24.1 Security Deposit

The JVE shall provide CDCR with a Security Bond or equivalent security. This requirement shall be included in the Contract. The amount of the bond shall be not less than two months wages for the inmate-employee workforce contemplated by the JVE after six months of operations, and shall be determined on a case-by-case basis based on, but not limited to, the size of the inmate-employee workforce and the size of space leased by the JVE. The bond or its equivalent shall be retained by the CDCR and may be used by the CDCR in the event a JVE fails to submit payroll or defaults on any of its obligations to the State. The CDCR shall apply the bond first to pay past due wages to inmate-employees and thereafter to unpaid obligations to the State, including, but not limited to, rent, utilities, workers' compensation, and custody costs.

53140.24.2 Contract Termination

Termination of a Joint Venture contract shall be completed in compliance with State contract regulations. See DOM Section 22040.21 for further details.

53140.25 In-Service Training

The Warden, or designee shall determine the type and amount of orientation training to be provided to the JVE non-inmate staff prior to occupying the facility, and any relevant annual updates particularly on the topic of Inmate-Staff Relations. All effort will be made to include only topics appropriate to the JVE non-inmate employees.

53140.26 Institutional Communications

The JVEs shall be included in the distribution of all relevant information that is circulated to institutional Departments.

53140.27 Institutional Lockdowns

When an institution lockdown occurs that affects the JVEs operation, inmate-employees will be designated as critical workers, and returned to work as soon as possible without effecting the safety and security of the institution.

53140.28 Personal Protective Equipment

The JVE's non-inmate personnel shall be required to be in possession of a whistle whenever they are on facility property. Personal alarm devices shall be provided to JVEs if they would be provided to CDCR employees working in similar conditions.

53140.29 Incident Investigation

Institution staff shall investigate any unusual occurrences or incidents that occur in the JVP worksite. The investigation shall be conducted in compliance with all departmental rules, regulations, and expectations.

53140.30 Revisions

It is the responsibility of the JVPU Administrator, or designee to ensure that the contents of this Article are kept current and accurate.

ARTICLE 41 — INMATE MAIL

Revised July 26, 2008

54010.1 Policy

The California Department of Corrections and Rehabilitation (CDCR) encourages correspondence between inmates and persons outside correctional institutions/facilities. The sending and receiving of mail by inmates shall be uninhibited except as provided for in this Article. Mail shall be delivered to inmates, regardless of housing, unless it is: contraband per the California Code of Regulations (CCR), Title 15, Article 1, Section 3006; or is Disturbing or Offensive Correspondence, per CCR, Article 4, Section 3135, or excessive property per the Department Operations Manual (DOM), Chapter 5, Article 43, Inmate Property.

54010.2 Purpose

The purpose of this Article is to provide guidelines for orderly processing of inmate mail and to give direction to staff, inmates, and their correspondents concerning institution/facility mail requirements.

54010.3 Compliance

Correspondents are personally responsible for the contents of their mail. All persons corresponding with inmates must comply with existing laws, regulations, and local rules. Violations of law or the CCR, Title 15, Division 3, may be referred to the appropriate federal, State, or local authorities for proper disposition. Such violations may also result in the temporary suspension or the denial of correspondence between the involved parties. Each newly arrived inmate shall be promptly informed of all Department regulations and procedures governing inmate mail. Upon receipt at each subsequent institution, inmates shall be promptly informed of all institutional policies and procedures governing mail.

54010.4 Definitions of Classes of Mail

First Class Mail

The United States Postal Services (USPS) regulations define First Class Mail as all matter wholly or partly in writing or typewriting, all actual and personal correspondence, all bills and statements of account, and all matter sealed or otherwise closed against inspection. The maximum weight for a First Class letter is 13 ounces.

All First Class Mail shall be delivered to the inmates as soon as possible, but not later than seven (7) calendar days from receipt of the mail from the Post Office.

Standard Mail

USPS regulations define Standard Mail as mail used for advertising mail, catalogues, and newsletters of a non-personal nature that are not required to be mailed as First Class Mail. The maximum weight for Standard Mail is 16 ounces. Standard mail used to be referred to as "Bulk Mail."

Periodicals

USPS regulations define Periodicals as a class of mail consisting of magazines, newspapers, or other publications formed of printed sheets that are published at least four times a year at regular, specified intervals (frequency) from a "known office of publication." Periodicals usually must have a list of subscribers and/or requesters, as appropriate.

Package Services

USPS regulations define Package Services as Parcel Post, bound Printed Matter, Media Mail, and Library Mail.

With the exception of Parole Clothes and third party special purchase health care appliances, inmates shall not be allowed to receive Package Services directly from personal correspondents. Packages containing parole clothes or third party special purchase medical assistive devices must be clearly marked with either "parole clothes" or "health care appliance" on the outside of the package. Personal correspondents do not include the Courts, Law Firms,

County, State and Federal Agencies, Publishers, Bookstores, Book Distributors, etc.

All incoming packages, regardless of their contents or whom they are addressed to, shall be put through an x-ray machine to prevent the introduction of contraband into the institution.

All packages received in the mailroom that are addressed to an inmate shall be processed through Receiving and Release where they will be searched, inventoried, and issued to the inmate.

All appropriately addressed mail shall either be delivered to the inmate, or forwarded per the CCR Subsection 3133(f) and DOM Section 54010.25.

54010.5 Paper, Envelopes, and Stamps for Indigent Inmates

Indigent inmate means an inmate who has \$1.00 or less in their Inmate Trust Account for 30 consecutive days.

Upon an indigent inmate's request, writing paper, envelopes, a writing implement, and the postage required for five 1 ounce First Class letters per week shall be supplied. Indigent inmates shall only be given the supplies for five letters per week in accordance with DOM, Chapter 5, Article 43, Inmate Property.

Except as provided in CCR, Subsection 3138(h) and DOM Section 54010.5.2 for mail to the courts or to the Attorney General, indigent inmates may request to mail correspondence that weighs more than one ounce. Indigent inmates must relinquish the appropriate number of indigent envelopes to either their assigned Correctional Counselor or housing unit staff with the item to be mailed. If the item to be mailed weighs more than five ounces, the indigent inmate must relinquish all five indigent envelopes. Staff must forward the indigent envelopes with the item to be mailed to the mailroom with the notation that it is to be mailed for the indigent inmate. In order to facilitate this mailing, if requested, staff shall provide the indigent inmate with one appropriately sized envelope.

Foreign mail requiring postage in excess of the minimum required for First Class Mail shall be limited to two of the five letters.

Indigent envelopes issued to an inmate become their property. The inmate shall be allowed to utilize the envelopes regardless of current financial status. A charge shall not be placed against future deposits to the inmate's trust account to recover the cost of materials and postage provided while the inmate was indigent as defined above.

Indigent inmates desiring to correspond with their attorney or any other confidential correspondents per CCR, Section 3141, shall be required to utilize their weekly allotment of indigent supplies to send such correspondence.

54010.5.1 Processing Request for Indigent Inmate Envelopes

All inmate requests for indigent envelopes shall be authorized by the Institutional Inmate Trust Account Office.

Any inmate attempting to use a State issued envelope intended for an indigent inmate or found altering envelopes that were not issued to them, shall receive progressive discipline.

54010.5.2 Postage for Indigent Inmates for Correspondence to the Courts and Other Persons as Required

In addition to indigent writing supplies and postage for the five 1 ounce letters per week, indigent inmates shall have free and unlimited mail to any court or Attorney General's Office.

Upon request, institutions shall also provide indigent inmates free copying and postage of legal documents required by the court, plus one copy for the opposing party and one copy for the inmate's records.

If the case is accepted by the court, the need for future copies of legal documents and necessary postage will be evaluated on a case-by-case basis.

A charge shall not be placed against future deposits to the inmate's trust account to recover the cost of materials, copying, and postage provided, while the inmate was indigent as defined in DOM Section 54010.5.

54010.5.3 Indigent Inmate Writing Supplies

Each institution shall establish local procedures for the issuance of writing supplies to indigent inmates.

Indigent inmates shall be given no more than five indigent envelopes per week, and shall be given enough paper to allow them to send out five 1 ounce First Class letters per week. Inmates are not allowed to trade, transfer, or swap indigent inmate supplies with another inmate.

54010.6 Recipient's Address

All outgoing mail shall be properly addressed. It must contain the sender's name, Department identification number, and the return address designated by the institution for inmate mail (to include housing). It shall also contain the recipient's Name, Address, City, State, and appropriate zip code.

All incoming mail shall be properly addressed. Appropriately addressed mail shall include the inmate's name and Department identification number. The mail should also include the address designated by the institution for inmate mail. The receiving institution is required to update any mail piece that does not reflect accurate housing or institutional location.

Appropriately addressed, Standard Mail must be addressed to an individual inmate, showing their name, CDCR number, and the address for the applicable institution.

All appropriately addressed mail shall either be delivered to the inmate, or forwarded per CCR Subsection 3133(f) and DOM Section 54010.25.

54010.7 Identifying Mail Originating from California State Prison

All outgoing mail including, but not limited to, letters, packages, and parcels shall be clearly identified as originating from a California State Prison or Community Correctional Facility. Outgoing mail shall be stamped or labeled, utilizing black ink only, with block letters not exceeding one-quarter inch in height, and the stamp or label not exceeding two and one-half inches in width by one and one-half inches in height. The stamp or label shall read "California Department of Corrections and Rehabilitation."

54010.8 Inspection and Reading of Incoming and Outgoing Mail

All non-confidential inmate mail, incoming or outgoing, is subject to being read in its entirety by designated staff.

All non-confidential inmate mail that is "returned to sender" shall be opened and inspected before being returned to the inmate.

The only weight limits that can be imposed for incoming mail are outlined in DOM Section 54010.4.

All incoming mail shall be inspected for contraband prior to issuance. Mail shall only be disallowed if it violates CCR Sections 3006, 3135, any other applicable regulations, or DOM Sections 54010.13 and 54010.14.

Institutions shall not require incoming books, magazines, or newspapers to have an institution pre-approved "vendor approved" label affixed to the packaging. Per CCR Subsection 3133(b)(4), a departmentally approved vendor is any publisher, book store, or book distributor that does mail order business.

Books, periodicals, or other publications that are mailed from a religious organization bookstore shall be considered as coming from an authorized vendor.

54010.8.1 Items Enclosed in Incoming First Class Mail

In addition to the written word, such as letters, internet downloads, newspaper clippings, religious pamphlets or leaflets, or photocopies of written words, etc., First Class Mail can have the following items enclosed:

- Photographs.
- Calendars.
- Blank greeting cards (No 3-dimensional attachments or stamps).
- Postage embossed envelopes, maximum of forty.
- Blank envelopes.
- Writing paper/tablets (white or yellow lined only – no cotton paper).
- Typing paper (no cotton paper).
- Legal paper; to include colored paper required by court (no cotton Paper).
- Children's drawings.
- Forty postage stamps (unless there is a rate change; then the intent is forty stamps at the old rate and forty stamps at the amount needed to equal the new rate). Personalized postage stamps will not be accepted.

The weight limits for First Class Mail are outlined in DOM Section 54010.4. The size and quantity of items listed above is limited per DOM, Chapter 5, Article 43, Inmate Property.

Inmates may receive photographs in First Class mail in accordance with the exception of the following:

- All photographs must comply with the CCR Section 3006, and DOM Section 54010.14.
- Amount and size shall not exceed allowances specified in DOM, Chapter 5, Article 43, Inmate Property.
- Photo albums (available through the canteen and the Vendor Package Program).
- Photographs with attached backing are not permitted.
- Photographs framed in such a manner that they cannot be adequately searched are not permitted.

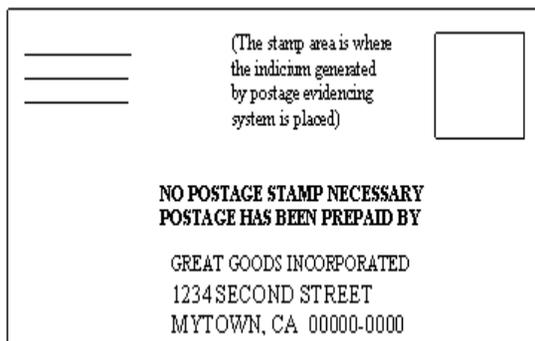

- Poloroid photographs are not allowed.
- Negatives are not allowed.
- Slides are not allowed.

Any unacceptable mail shall be immediately returned to sender with the envelope annotated "Unauthorized Mail, Return to Sender." Inmates shall be notified pursuant to CCR Section 3136.

54010.8.2 Metered Envelopes in Correspondence

Per the USPS Domestic Mail Manual, Section 604, metered reply envelopes sent in with correspondence must adhere to the following conditions:

- The postage amount must be enough to prepay the postage in full.
- Indicia may be printed directly on the mail piece or on a label and must be positioned in accordance with 604.4.8.3 (Position of Indicum on Mail Piece). An applied label must meet the standards in 604.4.8.11 (Adhesive Tape of Label).
- Indicia used to prepay reply postage, except for Information Based Indicia (IBI) generated by a Personal Computer Postage system, must not show the date.
- IBI generated by a Personal Computer Postage System to prepay reply postage must show the date the licensee printed the indicium and must include the words "REPLY POSTAGE."
- The mail piece must be pre-addressed for return to the licensee. Prepaid reply mail is delivered only to the address of the licensee. When the address is altered, the mail is held for postage.
- Except for those Personal Computer Postage systems with the capability to print an address for the given class or size of mail piece, the address side of reply may be prepared by any photographic, mechanical, or electronic process or combination of such processes (other than handwriting, typewriting, or hand stamping). For those Personal Computer Postage systems with the capability to print destination addresses for the given size and class of mail piece, the address must be prepared using the Personal Computer Postage system.
- The words "NO POSTAGE STAMP NECESSARY POSTAGE HAS BEEN PREPAID BY" must be printed above the address.
- For bar-coded letter-size First Class Mail reply mail for all postage evidencing systems except Personal Computer Postage, a Facing Identification Mark (FIM) A may be used. For Personal Computer Postage, FIM D is required for prepaid reply when the indicium is printed directly on the mail piece.
- The address side must follow the style and content as described in this Section and shown in the illustration below. Nothing may be added except a return address, FIM, or bar-code.

This is the only type of Metered envelope that will be allowed to come in to any inmate with correspondence.

54010.9 Inspection of Incoming and Outgoing Packages

All incoming packages addressed to an inmate shall be opened and inspected in the presence of the inmate. The contents of the package are inspected to record authorized personal property and to prevent the introduction of contraband.

Delivery by staff of packages and special purchases shall be completed as soon as possible, but not later than 15 calendar days, except during the holiday season and during lockdowns of affected inmates.

Packages shall be inspected pursuant to institutional policy. Packages shall be processed and issued from a designated distribution area. All outgoing packages shall be inspected for contraband prior to being sealed and mailed.

- When there is reasonable cause to believe the mail presents a threat to the security of the facility or the safety of persons, mailing or delivery

may be delayed to allow for staff translation of the correspondence, if needed. When such delay exceeds 48 hours from the date received at the facility or from the date submitted for mailing by the inmate, the inmate shall be promptly notified in writing of the delay, the reason for the delay, and all subsequent determinations and actions regarding that item of mail.

54010.10 Internet Downloaded Material, Electronic Mail Correspondence, and Newspaper Clippings

Inmates may receive First-Class Mail containing newspaper clippings, Internet downloaded articles, photocopies of clippings/articles, or electronic mail (e-mail). Prior to issuance, they shall be reviewed to ensure that they comply with CCR Sections 3006, 3135, and DOM Sections 54010.14 and 54010.15.

54010.11 Certified Mail

Certified mail that is received at the institution can be signed for by institutional staff since the USPS designates them as the agent of record. However, the person to whom the Certified mail is addressed must sign for delivery before receiving the mail piece.

54010.12 Confidential Correspondence

Confidential correspondence is a right guaranteed by law. Using confidential correspondence for personal non-business correspondence, the transmission of contraband items, or the smuggling of letters and other communications to be forwarded to persons not listed in DOM Subsection 54010.11 is an abuse of this right and such proven abuse shall be subject to legal, administrative, and disciplinary action.

Confidential Correspondents will not be limited to First Class mail standards. Mail received from confidential correspondents will be processed regardless of weight or postage class.

54010.12.1 Persons with Whom Inmates May Correspond Confidentially

Persons and employees of persons with whom inmates may correspond confidentially, and receive correspondence confidentially from, include:

- All state and federal elected officials.
- All state and federal officials appointed by the governor or the President of the United States.
- All city, county, State, and federal officials having responsibility for the inmate's present, prior, or anticipated custody, parole, or probation supervision.
- County agencies regarding child custody proceedings, as clearly identified in the communication and listed on the envelope.
- All state and federal judges and courts.
- Any attorney at law, on active status or in good standing, listed with a state bar association.
- All officials of a foreign consulate.
- The Secretary, Undersecretary, Executive Director, Assistant Secretaries, Division Directors, Associate Directors, the Chief, Inmate Appeals, and the Chief, Office of the Ombudsman.
- A legitimate legal service organization that consists of an established group of attorneys involved in the representation of offenders in judicial proceedings that includes, but not limited to:
 - The American Civil Liberties Union.
 - The Prison Law Office.
 - The Young Lawyers Section of the American Bar Association.
 - The National Association of Criminal Defense Lawyers.
 - California Appellate Project.

Per DOM Subsection 54010.11, all incoming confidential mail from an attorney or legal service organization shall include the attorney's name, title, and return address of their office.

Institution mailroom staff shall contact the CDCR, Office of Legal Affairs, if there is any question regarding the legitimacy of a legal service organization.

54010.12.2 Processing Outgoing Confidential Mail

In order to be accepted and processed as confidential correspondence, an inmate's letter shall comply with the following requirements:

- The letter shall be addressed to a person, official, or office listed in Subsection 54010.11.
- The address of the attorney must match the address listed with the State Bar.

- The inmate's full name, Department identification number, and address of the facility shall be included in the return address appearing on the outside of the envelope.

The word "Confidential" shall appear on the face of the envelope. Mail received in the mailroom without this notice of confidentiality shall be processed as regular mail. If for any reason the mail cannot be processed as regular mail, it shall be returned to the sending inmate.

Inmates shall post confidential mail by presenting the mail unsealed to designated staff. In the presence of the inmate, the staff shall remove the contents of the envelope upside down to prevent inadvertent reading of the contents. Staff shall remove the pages and shake them to ensure the absence of prohibited material. If no prohibited material is discovered, the contents shall be returned to the envelope and sealed. Staff shall place their signature, badge number, and date across the sealed area on the back of the envelope. Staff shall then deposit the confidential mail in the appropriate depository.

If prohibited material is found in the confidential mail, the prohibited material shall be confiscated; however, the letter may be returned to the inmate or mailed following the process outlined above. If the prohibited material indicates a violation of the law or intent to violate the law, the matter may be referred to the appropriate authorities for possible prosecution. Administrative and/or disciplinary action shall also be taken against all parties involved.

It is the responsibility of staff to transport inmate mail to the appropriate depository as designated by the Warden.

54010.12.3 Processing Incoming Confidential Mail

Incoming letters must show the name, title, return address, and office of persons listed in Subsection 54010.11 on the outside of the envelope for them to be processed as confidential correspondence. An attorney's return address must match the address listed with the State Bar. A notice of or a request for confidentiality is not required. Letters that are appropriately addressed with a return address that indicates it is from any of the persons or employees of persons outlined in Section 54010.11 shall be processed and treated as confidential correspondence whether or not they are stamped as such. Designated staff shall open the letter in the presence of the addressed inmate at a designated time and place. Staff shall remove the contents of the envelope upside down to prevent inadvertent reading of the contents. Staff shall remove the pages and shake them to ensure the absence of prohibited material.

Inmates shall sign for all confidential mail at the time of delivery. This shall be accomplished by use of a permanent log book or use of receipts. If receipts are used, the receipts shall be forwarded to the mailroom for filing. The log book, at a minimum, must record the date of delivery, the inmates name and departmental identification number, and the senders name and address.

54010.12.4 Confidential Enclosures

Newspapers, published articles, pamphlets, books, etc., enclosed in confidential correspondence shall not be treated as confidential mail and shall be handled as outlined below.

54010.12.5 Examination of Enclosures in Confidential Correspondence

The inmate may consent to an immediate examination of the enclosure by staff who issues the mail. Such examination shall be limited to the extent necessary to determine if the enclosure may be safely admitted into the institution/facility under the standards of CCR Sections 3006, 3134, 3135, and 3145, or DOM Sections 54010.8.1, 54010.13, and 54010.14. If the enclosure can be safely admitted into the institution/facility, it shall be given to the inmate. If, in the examiner's opinion, the enclosure does not meet the standards of CCR and cannot be safely admitted into the institution/facility, it shall be referred to staff at not less than the Correctional/Facility Captain level for final determination. If the enclosure is not released to the inmate at this level, the process outlined in DOM Section 54010.15 shall be followed and the inmate shall be allowed to return the enclosure to the sender or dispose of it pursuant to CCR Section 3191(c).

54010.12.6 Inmate Declines Consent for Examination of Confidential Enclosures

The inmate may decline to consent to examination of enclosures in confidential mail by any staff. When this occurs, the enclosure shall be immediately placed in an envelope and sealed in the presence of the inmate. The separate envelope will, at the inmates choosing, be returned to the sender with the mailing cost charged to the inmate's trust account, or disposed of pursuant to CCR 3191(c). The inmate is entitled to keep the letter or correspondence and the envelope it came in.

54010.12.7 Restriction of Confidential Mail Privileges

Administrative action may be taken to restrict, for cause, the confidential mail privileges afforded to an attorney based upon the information contained in this Article. The confidential mail privilege may be a statewide suspension for any offense that could be prosecuted as a felony. Only the Secretary or his/her designee shall issue a statewide suspension of confidential mail privileges.

A first offense of a non-serious mail rule violation of the Department's mail regulations shall result in a written warning or up to a six-month suspension of the attorney's confidential mail privileges.

A second offense of a non-serious mail rule violation shall result in modification/suspension of confidential mail privileges for a period of up to 12 months.

A third offense of a similar nature and/or a first offense that could be charged as a felony that jeopardizes the safety of persons or the security of the facility, shall result in confidential mail privileges being suspended for a minimum period of one year or beyond for an indefinite period.

The attorney must petition the Warden or Secretary for reinstatement of his/her confidential mail privilege.

54010.13 Staff Confidentiality Requirements

Any person who examines the content of mail under the authority of this Article or in connection with an appeal by an inmate of a ruling under this Article shall keep the content of the examined material in strict confidence.

No original, copy, excerpt, or summary of personal correspondence to or from an inmate shall be made or be placed in an inmate's C-file unless such correspondence is or has been the subject of:

- Legal, disciplinary, criminal investigation, or casework determination and actions affecting the inmate.
- When the recipient of an inmate's disturbing or offensive mail corresponds with the facility and requests administrative action subject to CCR Section 3135.
- If an inmate requests that a copy of personal correspondence be placed in their C-file and the inmate's caseworker deems it appropriate to do so based on the relationship of the correspondence to the inmates incarceration.

54010.14 Correspondence that is Offensive/Threatening/Contains Security Concerns

Non-confidential correspondence may be disallowed if the text of such correspondence presents a danger or a threat of danger to any person or place. The authority to disallow such correspondence shall not be delegated below the level of Correctional/Facility Captain.

Disagreement with the sender's or receiver's morals, values, attitudes, veracity, or choice of words shall not be cause for correctional staff to disallow mail. Correctional staff shall not challenge nor confront the sender or receiver with value judgments.

Certain correspondence, including but not limited to the following, is disallowed, regardless of values or morals in order to ensure the safety and security of the institution/facility:

- Any mail of a character tending to incite murder, arson, a riot, or any form of violence or physical harm to any person or any ethnic, gender, racial, religious, or other group.
- Threatens blackmail or extortion.
- Contraband, or sending or receiving contraband.
- Concerns plans to escape or assist in an escape.
- Concerns plans to disrupt the order, or breach the security of any institution/facility.
- Concerns plans for activities which violate the law, these regulations, or local procedures.
- Contains coded messages.
- Describes the making of any weapon, explosive, poison, or destructive device.
- Contains illustrations, explanations, and/or descriptions of how to sabotage or disrupt computers, communications, or electronics.
- Contains maps depicting any area within a ten-mile radius of an institution/facility.
- Contains gambling or lottery information or paraphernalia.
- Contains obscene material in nature as described in Section 54010.15.
- Contains human or animal hair, substances, or fluids.

54010.15 Obscene Material

Inmates shall not possess or have under their control, obscene material and/or mail containing information concerning where, how, or from whom obscene material may be obtained.

Obscene material means catalogs, advertisements, brochures, and/or material taken as a whole, which to the average person applying contemporary statewide standards, appeals to the prurient interest. It is material which taken as a whole, depicts or describes sexual conduct, and when taken as a whole, lacks serious literary, artistic, political, or scientific value.

Additionally, material is considered obscene when it appears from the nature of the matter or the circumstances of its dissemination, distribution, or exhibition that it appeals to deviant sexual groups.

Material subject to the test of the above includes, but is not limited to:

- Portrays sexually explicit materials, which are defined as materials that show frontal nudity including personal photographs, drawings, and magazines and pictorials that show frontal nudity.
- Portrays, displays, describes, or represents penetration of the vagina or anus, or contact between the mouth and genitals.
- Portrays, displays, describes, or represents bestiality, sadomasochism, or an excretory function, including urination, defecation, or semen.
- Portrays, displays, describes, or represents the nudity of a minor or person who appears to be under 18 years old.
- Portrays, displays, describes, or represents conduct that appears to be non-consensual behavior.
- Portrays, displays, describes, or represents conduct that appears to be forceful, threatening, or violent.
- Portrays, displays, describes, or represents conduct where one of the participants is a minor, or appears to be under 18 years old.

54010.16 Notification to Inmates of Disapproval-Mail/Packages/Publications and Disposition of Undelivered Mail

Disapproved material that is in clear violation of CCR Sections 3006, 3135, 3139, and 3135 or DOM Subsections 54010.11, 54010.13, 54010.14, and 54010.21 shall be referred to staff not below the level of Correctional/Facility Captain for determination and appropriate action. Disapproval of material that is not in clear violation of the above noted CCR and DOM sections shall be referred to the Warden, but not lower than the Chief Deputy Warden, for determination and appropriate action. The CDCR Form 1819, Notification of Disapproval-Mail/Packages/Publications, shall be utilized by each institution/facility when incoming or outgoing mail/packages/publications addressed to or being sent by an inmate are withheld or disallowed. Additionally, in accordance with CCR, Subsection 3134(i), the CDCR Form 1819 informs the inmate of the reason, disposition, name of official disallowing the mail/package/publication, and the name of the official to whom an appeal can be directed.

When inmate mail is disapproved based on the criteria established in CCR Section 3006 and 3135, DOM Subsection 54010.8.1, or DOM Section 54010.13 and 54010.14, a copy of the CDCR Form 1819 and the supporting document(s) (e.g., a photocopy of representative pages) shall be retained by each institution/facility for a minimum of seven years for litigation purposes.

After seven years if the material is not needed it shall be destroyed.

If a lawsuit has been filed as a result of mail being disapproved, the CDCR Form 1819 and the supporting document(s) will be retained for two years from the conclusion of the suit.

It is noted that a publication can be a book, magazine, newspaper, or periodical.

54010.17 Non-English Language Mail

Correspondence in language other than English to or from an inmate is subject to the same regulations governing all other mail and may be subject to a delay for translation of its contents by staff.

When such delay exceeds normal mail processing by five business days, the inmate shall be notified in writing of the delay, the reason for the delay, and subsequent determinations and actions regarding that item of mail.

If staff is unable to translate the letter and its contents within 20 business days of notice to the inmate, then the letter shall be delivered to the inmate untranslated.

54010.18 Funds Enclosed in Correspondence

Funds may be mailed to an inmate in the form of:

- Money order.
- Certified check.
- Personal check.
- Any other negotiable means except cash and Travelers Checks.

The check or money order shall be made payable to the California Department of Corrections and Rehabilitation with the inmate's last name and Department identification number. This information shall be on the face of the check or money order.

The following restrictions apply:

- Funds from other inmates/parolees shall be only accepted from approved correspondents who are members of the same family, or the parent of the inmate's child(ren).
- Funds received in the mail shall be removed from the envelope by mailroom staff and processed as follows:
 - Staff shall ensure that the inmate's name and Department identification number are on the check or money order. Staff shall, if necessary, make every effort to affix the information to the front of the check or money order. The institution/facility endorsement stamp shall be placed on the back of the check or money order.
 - The envelope shall be imprinted with a stamp that reads "Funds enclosed." The date, amount, and initials of the person processing the funds shall be recorded on the envelope before it is forwarded to the inmate.
 - The stamped envelope is the inmate's receipt for the funds.
 - Cash shall not be accepted for an inmate.
 - Cash received in incoming mail will be returned to the sender. Mailroom staff shall complete a memorandum for disallowed cash money to the inmate, informing them that cash was received and will be returned to sender. The envelope containing the cash and two copies of the memo will be forwarded to the Inmate Trust Office. The two copies of the memo shall be folded around the envelope and held in place with a rubber band/paperclip. The information in the center of the form shall be clearly visible to the reader. The Inmate Trust Office will process the cash and mail per current departmental policy.
 - Mailroom staff shall arrange the day's remittances in numerical order. The remittances shall be listed in sequence on the report of collections. This report shall include each inmate's name, Department identification number, type of payment (check, money order), amount, and the total received.
 - The report shall be prepared in triplicate and distributed with the original and secondary copies sent to the Inmate Trust Office, and the triplicate retained in the Mailroom.

54010.18.1 Receipt of Social Security/Welfare/Tax Refund Checks

Generally, inmates are not eligible to receive Supplemental Security Income (SSI) checks from the Social Security Administration, Veteran Affairs Benefits, or Welfare checks from the California Department of Social Services/County Welfare agencies. Depending upon eligibility, inmates may be allowed to receive tax refund checks.

A facility representative shall be appointed by the Associate Warden, Business Services, to assist outside agencies in determining an inmate's eligibility.

Mailroom staff shall deliver all received SSI, Veteran Affairs Benefits, and/or welfare and/or tax refund checks to the Inmate Trust Office. The Accounting Officer shall notify the facility representative that checks are being held pending determination of eligibility of the inmates to receive the checks.

The facility representative shall contact the appropriate agency.

Unauthorized checks shall be returned to the appropriate agency.

54010.18.2 Receipt of U.S. Government Checks for Deceased or Discharged Inmates

When a U.S. Government check is received for an inmate who is deceased or discharged from CDCR, the following shall occur:

- The check and envelope shall be returned to the sending agency with the necessary information shown as to the inmate being deceased or discharged.

54010.18.3 Receipt of U.S. Government Checks for Transferred or Paroled Inmates

If an inmate has been transferred to another institution/facility, the check shall be forwarded including a note requesting the inmate to notify the state or federal agency of their change of address. Mail received for inmates who have been paroled shall be forwarded to the office of the parole region to which the inmate was released, or if unable to locate the parolee, the check should be returned to the originating state or federal agency.

54010.18.4 Personal Checks

Funds not in the form of money orders or certified checks shall not be released for spending by the inmate until the funds have cleared the bank upon which they were drawn. When personal checks are received, the face of the envelope in which the check was received shall be imprinted with a stamp that reads, "\$_____ personal check has been accepted at this time."

54010.18.5 Foreign Currency

No foreign currency shall be accepted. If foreign currency is received, the entire envelope and its contents shall be returned to sender with a pre-printed notice to the sender which states: "Unauthorized item _____."

54010.19 Contests

Inmates shall not participate in any contest when a financial obligation is involved or when such participation shall result in an expense to the facility beyond the cost of processing mail.

If lottery tickets, lottery scratchers, or other contest materials are discovered in incoming inmate mail, the entire envelope and its contents shall be returned to sender with a pre-printed notice to the sender which states: "Unauthorized item _____."

54010.20 Inmate Manuscripts

Manuscripts include, but are not limited to, written, typed, or printed articles of fiction and nonfiction, poems, essays, gags, plays, skits, paintings, sketches, drawings, or musical compositions created by an inmate.

Any manuscript remains the property of the inmate who created it. It may be retained in the inmate's possession, unless it violates CCR Sections 3006, 3134, or 3135 or DOM Sections 54010.13 or 54010.14.

If unauthorized State materials have been used in the creation of a manuscript, the item shall be confiscated pending disciplinary action and reimbursement by the inmate for the unauthorized use of State material.

Incoming and outgoing manuscripts shall be processed as regular mail in accordance with the provisions of this Article.

54010.21 Publications

Inmates may subscribe to, purchase, or have the items listed below purchased for them by a third party:

- Newspapers.
- Periodicals.
- Magazines.
- Books.

If subscriptions or books are purchased for the inmate by a third party (or donated to an inmate) they must be mailed directly from a book store or publisher. If subscriptions or books are purchased for the inmate by a third party (or donated to an inmate) they must be mailed directly from a book store, book distributor, a publisher, or a religious organization. Personal correspondents cannot mail books, periodicals, or publications directly to inmates and state that they are a donation.

There shall be no "Approved Vendor Lists" for any publication.

The CDCR shall distribute a centralized list of disapproved publications that are prohibited as contraband. Publications that are enumerated on this centralized list are not allowed in any institutions. Local institutions may not add items to the centralized list.

54010.21.1 Processing/Inspection of Incoming Magazines and Newspapers

All magazines and newspapers shall be inspected prior to issuance to ensure that they comply with CCR Sections 3006, 3134, and 3135 or DOM Sections 54010.13 and 541010.15.

In order to expedite the issuance of magazines the following shall be adhered to:

- Magazines that contain page flap samples of perfume shall be issued to inmates.
- Attached free CD's, packaged samples of perfume or stickers from magazines shall be removed. The removal of these items will not require the issuance of a CDCR Form 1819, Notification of Disapproval-Mail/Packages/Publications, as the item was not ordered by the inmate. Rather, it is an advertisement that was not solicited.

Sample packages of lotions or moisturizers can either be removed before delivery to the inmate, or be left in the magazine and given to the inmate. The removal of any sample item will not require the issuance of a CDCR Form 1819, Notification of Disapproval-Mail/Packages/Publications, as the item was not ordered by the inmate; rather it is an advertisement that was not solicited.

No other items shall be removed from a magazine or other publication in order to issue it to an inmate. If any other items that violate departmental policy are contained in the magazine or publication, it shall be withheld or disallowed and processed per DOM Section 54010.15.

Staff shall not delay the delivery of an inmate's publications for personal use.

54010.21.2 Processing/Inspection of Incoming Books

All incoming paperback and hardback books, and any enclosures within them, must be inspected prior to being altered and/or issued; per CCR Section 3134; to ensure that they comply with CCR Sections 3006, and 3135 and DOM Sections 54010.13 and 54010.14.

For hardback books, staff shall allow the inmate to determine whether he/she will accept the book with the cover removed or, if he/she declines that option, decide how it is to be disposed of per CCR Section 3191(c). If the inmate chooses to accept the hardback book staff shall, in front of the inmate, remove the entire cover from the book. Before removing the cover, staff shall insure that it does not violate any other departmental policy. If upon removal of the cover the book becomes unstable (the pages are no longer bound together), staff shall take measures to ensure that the pages are kept intact, such as with a rubber band or a clip.

Delivery by staff shall be completed as soon as possible, but not later than 15 calendar days after the institution receives the book, except during the holiday season and during modified programs of affected inmates.

Hardback books shall be processed and issued from a designated distribution area.

54010.21.3 Notification to Publisher for Disapproval of Publication

When incoming books, magazines, or publications to an inmate are withheld or disallowed, a letter shall be sent to the publisher explaining why the item was denied. A book, magazine, or publication denied to the entire population based on a violation of departmental regulations or policy, shall only require one letter per institution to be sent to the publisher. At a minimum, the letter must include the reason why the book, magazine, or publication was denied, the names and CDCR numbers for all inmates affected, the applicable CCR section that is in violation, and the fact that the Publisher has the right to appeal this issue in accordance with CCR Section 3137(c) and DOM Section 54010.27.

The letter must be sent within 15 calendar days of the determination to censor the book, magazine, or publication.

When a book, magazine, or publication is withheld based on the criteria established in CCR Sections 3006 or 3135 and DOM Sections 54010.13 and 54010.14, a copy of the Letter of Notification to the Publisher and the supporting document(s) (e.g., a photocopy of representative pages) shall be retained by each institution/facility for a minimum of seven years for litigation purposes.

After seven years if the material is not needed for a lawsuit or any other purpose, the material shall be destroyed.

If a lawsuit has been filed, as a result of a publication being disapproved, the CDCR Form 1819 and the supporting document(s) will be retained for two years from the conclusion of the lawsuit.

The letter of Notification to Publisher for Disapproval of Publication shall be done in conjunction with the process outlined in DOM Section 54010.15 for notification to the inmate.

54010.22 Correspondence between Inmates/Parolees/Probationers

Inmates shall obtain written authorization from the Warden/Regional Parole Administrator or their designee/assigned probation officer, person in charge of the County Jail and/or other State Correctional Systems, at a level not less than Correctional Captain/Facility Captain or Parole Agent III to correspond with any of the following:

- Inmates under the jurisdiction of any county, state or federal, juvenile or adult correctional agency.
- Persons committed to any county, state or federal program as a civil addict.
- Persons on parole or civil addict outpatient status under the jurisdiction of any county, state or federal, juvenile or adult correctional agency.
- Persons on probation.

Inmates may be allowed to correspond with the above provided they meet the criteria of no known gang affiliation, or involvement with a known terrorist or conspiracy organization.

54010.22.1 Process for Approval/Denial of Correspondence Requests

Inmates may initiate requests to correspond with the above by sending their Correctional Counselor I (CCI) an Inmate Request for Interview form. Parolees may initiate request by contacting their Parole Agent (PA).

The CCI/PA shall interview the inmate/parolee and/or review their C-file/Field File to obtain the information required to process an inmate's Request for Correspondence Approval. If an inmate's request to correspond with another inmate/parolee is denied, the CCI/PA shall annotate the reason for denial on the Inmate Request for Interview. The Inmate Request for Interview shall be returned to the inmate. A CDCR Form 1074, Request for Correspondence Approval, shall not be generated for the initiating inmate whose request is denied.

When reviewing the initiating inmates C-file, staff shall ascertain whether prior approval exists. If prior approval exists, a copy of the previously approved CDCR Form 1074 shall be forwarded to both institutional mailrooms.

When an initiating inmate's request to correspond with another inmate meets the criteria for approval, and no prior approval exists, the CCI/PAI shall ensure that a CDCR Form 1074 is completed.

If the request is approved, staff shall retain the fifth page at the requesting institution/parole office. The remaining four pages shall be forwarded, intact, to the institution/parole office/probation office/other county, state or federal facility where the other requested correspondent is housed. Neither a photocopy of the CDCR Form 1074, nor the fifth page, shall be forwarded to the C-File or mailroom while the correspondence approval is pending.

If the request to correspond is denied at the institution/parole office/probation office/other state correctional facility, the reason for denial shall be annotated on the CDCR Form 1074, and it shall be returned, in its entirety, to the sending institution/ parole office.

Copies/photocopies shall not be delivered to the requested inmate, the receiving institutions mailroom, or the housing unit.

Upon receipt of the disapproved CDCR Form 1074, staff at the sending institution/field office shall ensure that the 2nd page is returned to the initiating inmate.

If correspondence is approved at the institution/parole office, staff shall ensure that the CDCR Form 1074 is completed. They shall retain the third and fourth pages for distribution. If the third page and fourth pages are not legible, the CCI/PAI shall make photocopies of the first page prior to forwarding the completed CDCR Form 1074 to the sending institution.

The approved CDCR Form 1074 is distributed as follows:

- Page 1 (original) returned to initiating inmate/parolees institution/parole office for placement in the initiating correspondents file.
- A photocopy of page 1 (original) shall be made for the mailroom at both the sending and receiving institutions.
- Page 2 (NCR Copy) returned to initiating inmate/parolees institution/parole office for deliver to the inmate.
- Page 3 (NCR copy) kept by the receiving institution/parole office for placement in the requested correspondents file. If this page is not legible, a photocopy of page 1 shall also be placed in the C-File, attached to page 3.
- Page 4 (NCR copy-or photocopy) kept by the receiving institution/parole office for the requested correspondent. If this page is not legible, a photocopy of page 1 shall be made and given to the requested correspondent with page 4.

Photocopies of the CDCR Form 1074 shall not be made for the housing unit(s). The housing units shall not keep records of approved correspondents.

The mailroom supervisor shall establish and maintain a record of approved CDCR Form 1074's.

When a CDCR inmate requests to correspond (and meets the criteria for approval) with an inmate in a county, state, or federal facility, the CCI shall ensure that a CDCR Form 1074 is completed along with a cover letter that thoroughly explains the need for the CDCR Form 1074. Upon receipt of the approved CDCR 1074 from the specific agency, the CCI shall distribute the form as outlined above.

When a request for correspondence between inmates is received from another county, state, or federal facility (and meets the criteria for approval) the CCI shall ensure that a CDCR Form 1074 is completed and returned to the agency with a cover letter that thoroughly explains the need for the CDCR Form 1074. Upon receipt of the approved CDCR 1074 from the specific agency, the CCI shall distribute the form as outlined above. If the request is denied, the CCI shall ensure that a letter is forwarded to the requesting agency thoroughly explaining the denial.

There shall be no limits set on the number of times approved inmates can correspond with one another unless revoked per the procedures outlined below.

The approval to correspond may be revoked due to disciplinary violations involving correspondence between the inmates/parolees or as a result of a classification action based on safety and security. Any such restriction, or revocation of approval, shall be communicated to inmate(s)/parolee(s) and to the warden(s)/parole administrator(s) of the institution/facility where the inmate(s)/parolee(s) are housed.

54010.22.2 Correspondence between Inmates in SHU/ASU/PSU/THU/BMU

Wardens at institutions where there are Security Housing Units (SHU), Administrative Segregation Units (ASU), Psychiatric Security Units (PSU), Transitional Housing Units (THU), and Behavior Management Units (BMU), shall, in their local procedure, outline any further restrictions on correspondence due to safety and security concerns. The local procedure shall follow the processing procedures outlined in DOM subsection 54010.21.

The most restrictive an institution can be is to limit correspondence between inmates to only the following:

- Immediate Family Members as defined in CCR Section 3000.
- Co-litigants on active cases, until the case is resolved.
- Incarcerated natural parent of the inmate's child.

A facility may not restrict mail privileges between an inmate and any of the above three types of correspondents, unless they violate CCR Section 3006 or other aspect of the regulations.

54010.22.3 Transfers

Approval to correspond, pursuant to DOM Section 54010.21, shall remain in effect upon transfer to another departmental facility or another parole office.

If an inmate's transfer is based on case factors that create security concerns, such as placement in SHU/ASU/PSU/THU/BMU, a reexamination by committee of all approved correspondence shall be conducted. The CCI shall review and recommend to committee whether to continue approval of the correspondence.

54010.22.4 Unapproved Correspondence

If an institution/parole office receives mail from an unapproved inmate/parolee correspondent, staff shall mark the envelope with "Not an Approved Correspondent" or equivalent language and return it to the sender.

54010.23 Mailing of Confidential Documents with Inmate Trust Account Withdrawals

Confidential mail submitted with a CDC Form 193, Trust Account Withdrawal Order, to pay for filing fees or other costs, may be left unsealed so that the voucher (check) can be enclosed after the trust account withdrawal has been processed. Inmates who do not wish to forward this type of mail unsealed should attach a stamped, appropriately addressed envelope to the confidential mail so the check can be enclosed and forwarded in the extra envelope.

54010.24 Mail Returned by the U.S. Post Office

All undelivered letters and packages returned to an institution/facility by the post office shall be opened and inspected before being returned to the inmate. This inspection is to determine if the content originated with the inmate sender identified on the letter or package, and to prevent the transmission of contraband, material, substances, and property that an inmate is not authorized to possess in the correctional facility.

The inspection of returned mail includes regular mail and letters that were mailed as confidential correspondence.

In the case of returned confidential correspondence, the envelope shall be opened in the presence of the inmate. It shall be examined and read to the degree necessary to determine if it was sent by the inmate and opened or tampered with before its return to the institution/facility. Upon completion of this examination, the returned correspondence shall be given to the inmate. Any contraband found in the returned correspondence shall be

confiscated and processed per DOM Section 54010.15. Appropriate disciplinary action shall be taken.

54010.25 Un-mailed Correspondence

If for any reason set forth in this Article, any First Class Mail is not accepted for mailing, or is accepted for mailing but is not properly mailed, the inmate shall be notified in writing of the reason for refusal to accept or to promptly mail the item(s). When the delay in mailing exceeds 5 business days the notice shall be sent and shall include the disposition of such mail. Unless retention of such mail is required in administrative, legal, or disciplinary proceedings against the inmate or other persons, it shall be promptly mailed or returned to the inmate.

54010.26 Forwarding Mail

Mail received for an inmate who has been transferred from the institution/facility where the mail is received, shall be immediately forwarded to the institution/facility, administrative office or agency that has current custody of the inmate.

Mail addressed to an inmate who has been transferred or released shall not be returned to the sender as "Addressee Unknown" unless the individual has been discharged from CDCR.

First Class Mail and Periodicals addressed to an inmate who has been transferred within the CDCR shall have a label affixed with the current address and shall be forwarded via the USPS. For inmates who have paroled, the affixed label shall state "Parole (Northern or Southern) Region" and shall show that Parole Region's address. Whenever possible, the Strategic Offender Management System should be accessed and the parolee's mail should be forwarded to the specific unit that is listed.

Standard Mail that has a "Mailer Endorsement", but is undeliverable because the inmate is not currently housed at the institution, shall be returned to the USPS for processing. Mailroom staff shall affix a label to the Standard Mail piece showing the correct address before returning it to the USPS for processing. For inmates who have paroled, the label affixed to the Standard Mail piece shall state "Parole (Northern or Southern) Region" and shall show that Parole Region's address. The Mailer Endorsement will appear either near the address block or below the return address in the top left corner of the mail piece. A mailer endorsement is any of the following phrases:

- Address Service Requested.
- Forwarding Service Requested.
- Change Service Requested.
- Return Service Requested.

Staff may dispose of any Standard Mail piece that does not have a Mailer Endorsement, and that is undeliverable because the inmate is not currently housed at the institution.

Daily newspapers that are delivered by courier will not be forwarded nor will they be held for an inmate who is temporarily away from the facility for longer than 72 hours. Exceptions will be made when the absence results from the inmate's participation in Department or facility approved activities such as a community release program, firefighting, or other disaster control assignments. Newspapers that are delivered by the USPS will have a forwarding address label affixed and shall be returned to the USPS for processing.

54010.27 Forwarding Confidential Correspondence from the Court

All confidential correspondence for inmates that must be forwarded will be done on a daily basis. If delivery of confidential correspondence from the courts is impeded because the addressee's name and CDCR number do not conform to each other, the mailroom will contact the Litigation Coordinator who will telephone the court to clarify the identification of the addressee in order to expedite delivery of confidential correspondence. Staff will document their efforts to identify the addressee when confidential correspondence from the courts cannot be delivered. The Litigation Coordinator will inform the courts of the circumstances preventing delivery.

54010.28 Appeals Relating to Mail and Correspondence

Inmates, their correspondents, and publishers may appeal Department regulations, and their application relating to mail and correspondence.

Inmates shall use established appeal procedures as provided in CCR, Section 3084, etc. seq.

Persons other than inmates should address any appeal relating to Department policy or regulations to the Secretary of the California Department of Corrections and Rehabilitation. Appeals relating to a specific institution/facility procedure and/or practice shall be addressed in writing to the Warden or Associate Director of the institution/facility where the appeal issue arises. A written response shall be provided within 15 business days.

Appeals that are not satisfactorily resolved at this level may be forwarded in writing to the Secretary who shall provide a written response within 20 business days.

54010.28.1 Appeals of Withheld Mail

An inmate who submits an appeal in accordance with CCR Section 3084, after being noticed that mail is being withheld pending appeal, shall stay any disposition of the mail until an appeal decision is made at the third level of appeal review.

If the inmate's appeal is denied at the third level of appeal review, the item of mail shall be disposed of per CCR 3191(c).

54010.29 Complaints from Recipients of Inmate Mail

If the receiver of any mail, confidential or non-confidential, directs a written complaint to the Department administration or to institution/facility officials, consideration shall be given to any reasonable remedy sought by the individual. This may include discussion of the complaint with the inmate in an attempt to resolve the matter, reading of all mail, including confidential mail addressed to the individual, and either disallowing only that which appears to perpetuate the problem, or disallowing all mail to the individual. Complaints and requests for action which would, if approved, restrict an inmate's correspondence, and any action taken in response to such complaints or requests shall be fully documented via CDC Form 128 B, Chrono-General. The inmate shall receive a copy of the documentation and the original shall be placed in the inmate's C-file. An exception to the prohibition contained in Section 54010.12 against placing copies of an inmate's personal correspondence in the inmate's C-file may be made under the circumstances described herein.

54010.30 Temporary Absence

Mail shall be held for an inmate who is temporarily away from the institution/facility when the inmate's return is anticipated within one week.

54010.31 Revisions

The Director, Division of Adult Institutions, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

ARTICLE 42 — VISITING

Revised May 1, 2003

Updated May 10, 2010

54020.1 Policy

The California Department of Corrections and Rehabilitation (CDCR) encourage inmates to develop and maintain healthy family and community relationships. It is a privilege for inmates to have personal contact visits while confined in CDCR institutions and facilities. Visiting in CDCR institutions and facilities shall be conducted in as accommodating a manner as possible in keeping with the need to maintain order, the safety of persons, the security of the institution/facility, and the requirements of prison activities and operations.

Employees are to be alert, courteous, and professional in their dealings with inmates, inmate visitors, and members of the public. The employee shall maintain a helpful, but professional, attitude and demeanor.

Except as is necessary to enforce standards of conduct, prevent the introduction of contraband, and ensure valid identification, visitor privacy shall not be imposed upon.

Video-recording devices may be utilized in visiting areas, excluding family visiting units or confidential attorney consultation areas.

Smoking is prohibited in all CDCR facilities/institutions. All tobacco and tobacco products are prohibited.

54020.2 Purpose

This Article establishes methods and procedures to administer the inmate visiting program and provides operational direction to staff, inmates, and visitors.

54020.3 Definitions

Revised September 25, 2007

Minor

As used in this Section, a minor is an unemancipated person, under 18 years of age, who is not the spouse of the inmate being visited.

Clothed Body Search

A clothed body search entails individuals being physically searched by staff. Staff will use their hands to conduct a security search of the person in question. Additionally, staff may use other detection devices to conduct such security searches. Individuals may also be asked to remove outer garments, heavy clothing, and/or shoes to complete the security search.

Unclothed Body Search

An unclothed body search may consist of the removal of a portion or all of an individual's clothing so as to permit a visual inspection by staff of the body and body cavities for security reasons. Additionally, staff may use other non-intrusive detection devices to conduct the security search of the person in question.

Immediate Family Members

In accordance with California Code of Regulations (CCR), Title 15, Division 3, Section 3000, immediate family members are defined as:

- Legal spouse.
- Registered domestic partner.
- Natural parents.
- Adoptive parents, if the adoption occurred and a family relationship existed prior to the inmate's incarceration.
- Stepparents or foster parents.
- Grandparents.
- Brother or sister, stepbrother or stepsister, foster brother or foster sister.
- Natural children, adoptive children, and grandchildren of the inmate.
- The inmate's legal stepchildren.
- Aunts, uncles, and cousins are not considered immediate family members unless a bona fide foster relationship exists.

Exclusion

An administrative action by the Director or institution head to bar, for cause, a person from entering a CDCR institution/facility when that person would otherwise be permitted to enter.

Suspension

An action by the institution head or designee, which temporarily ceases the visiting program or suspends an individual visitor's access to the visiting program for a specified time.

Termination

An action by the official in charge of visiting, which ends a visit in progress.

Revocation

The denial of visiting privileges or access to the institution/facility for an indeterminate length of time when visiting has been previously approved.

54020.4 Access to Visiting Policies and Regulations

Revised April 3, 2014

New inmate arrivals shall receive current written visiting policies and procedures. Institutions/facilities shall allow visitors access to all visiting policies and regulations. Copies of all visiting regulations and policies shall be maintained by visiting staff to provide access to all interested parties. Institutions/facilities shall post visiting dress standards and a schedule of visiting days and hours in all visiting centers and processing areas.

54020.5 Dignitaries

Revised April 3, 2014

Dignitaries, as defined in DOM Chapter 1, Article 14 shall be required to produce official identification, sign the official visitor's log book, receive a visitor's pass, and declare and present the contents of briefcase, computer bags, or other allowable property for evaluation. For accountability purposes, the dignitary information shall be recorded in the Strategic Offender Management System (SOMS) as a non-regular visit.

Refer to DOM Chapter 1, Article 14 for definitions and instructions related to tours and visits by official visitors and dignitaries.

54020.6 Official Visits by Other Departments/Agencies/Foreign Officials and Other Distinguished Visitors

Revised April 3, 2014

Officials of other departments/agencies/foreign officials and other distinguished visitors shall be required to produce official identification, sign the official visitor logbook, receive a visitor's pass, and submit to a search consisting of a contraband/metal detection and visual search of briefcase or

other allowed property. For accountability purposes, this information also must be recorded in SOMS.

- Commissioners and Deputy Commissioners of the Board of Parole Hearings are not required to submit to contraband/metal detection inspections.

Refer to DOM Chapter 1, Article 14, for definitions and instructions related to visits by members of other departments/agencies.

54020.7 Visiting Days and Hours

Each institution/facility shall establish a schedule that provides a minimum of 12 visiting hours per week. Each institution head shall develop an operational supplement to this Section, which includes their respective visiting schedules as follows:

- Visiting days.
 - Four-day visiting: Thursday through Sunday.
 - Three-day visiting: Friday through Sunday.
 - Two-day visiting: Saturday and Sunday.
- Visiting hours.
 - Holiday visiting schedule.
 - Security Housing Units (SHU) and Administrative Segregation Units (ASU) visiting requirements.
 - The institution/facility shall specify procedures and criteria for scheduling an appointment.

Any routine modification to visiting hours and/or days shall be posted in areas accessible to visiting participants at least two weeks prior to implementation. Inmates may visit only during non-work/training hours including "S" time, except as provided in CCR Section 3045.

Emergency Modifications of Visiting Schedule Information

Visiting may, without prior notification, be terminated, temporarily suspended, or modified in response to an institution/facility emergency as determined by the institution head or designee. Modification of the visiting schedule, including updates to the telephonic visiting information system, shall be posted as soon as practical. The visiting supervisor or designee is responsible for ensuring that the telephonic visiting information system is kept updated on a daily basis to ensure minimal impact on visitors.

54020.8 Visitor Application Procedure

Revised April 3, 2014

All adult visitors shall be required to obtain the institution/facility's approval before being permitted to visit, except as otherwise authorized in this Article. Visitor applicants shall complete and sign a CDCR Form 106, Visiting Questionnaire. In order to retain the status of approved visitor, a new CDCR Form 106 shall be submitted whenever there is a change in the visitor's address, telephone number, or arrest history or periodically upon request. The frequency of any periodic update initiated by the institution/facility shall be no more than once every two years.

Upon receipt of an updated CDCR Form 106 and absent information that would warrant immediate disapproval, the visitor shall be allowed to visit pending review and approval of the updated information.

A new CDCR Form 106 shall be submitted prior to visiting any inmate returned to an institution/facility from parole, or admitted into a substance abuse treatment control unit while on parole.

Any visitor approved at one institution/facility shall be approved to visit the same inmate upon a transfer to another institution/facility provided the visitor's approval status remains unchanged.

The CDCR Form 106 shall be processed as follows:

- The inmate is responsible for mailing CDCR Form 106 to any prospective visitor(s).
- The applicant shall return the completed form with an original signature via a common carrier or personal delivery to the institution, Attn: Inmate Visiting.
- The CDCR Form 106 shall not be accepted from inmates.
- Visiting staff will process only those Visiting Questionnaires that have been sent by the inmate to a prospective visitor in accordance with the provisions of CCR Subsections 3172(a) and (e). Forms reproduced from any other source, such as from an Internet download, will not be accepted for processing.
- Some other legitimate verification of inmate mailing of the questionnaire may be proved with an original dated signature provided by the inmate on the form in question. Questionnaires lacking such inmate mailing verification may not be processed absent alternative

proof that the requirements of 3172(a) have been met or there is explanation for the absence of a signature.

Acceptable explanations for the absence of a signature include, but are not limited to:

- A documented physical and/or mental condition or disability that may exclude the inmate from mailing and/or signing the questionnaire.
- Verification of inmate mailing has been established by other means, such as a date officially stamped by the institution or by a staff signature.
- In accordance with CCR Subsection 3172(e) the visitor has been directed to update a questionnaire on file by designated staff in conjunction with a periodic review or a change in name, address, telephone number, or arrest history.
- When the completed CDCR Form 106 is received and processed at the institution/facility, the inmate shall receive a SOMS Notice of Visitor Approval/Disapproval.
- Inmates shall be responsible for notifying visitor applicants of their approval to visit.
- Visitors may be required to contact the Department of Justice regarding their criminal or arrest history.

54020.8.1 Approval/Disapproval of Application to Visit

The authority to approve or disapprove a CDCR Form 106 shall not be delegated below the rank of correctional sergeant, parole agent II, or correctional counselor II. An application to visit may be disapproved in accordance with CCR Section 3172.1.

54020.8.2 Arrest History Inquiry

Revised April 3, 2014

Upon receipt of the CDCR Form 106 an arrest history inquiry shall be completed and a determination to approve or disapprove visiting should be made within 30 working days at a minimum, a Criminal Identification and Information (CI&I) report shall be obtained if the California Law Enforcement Telecommunication System lists a CI&I number for the applicant. Reasons for delay beyond 30 days may be provided to prospective visitors upon inquiry by the individual applicant.

Notification

If the visiting application is disapproved, the applicant and the inmate shall receive from visiting staff via SOMS Notice of Visitor Disapproval, written notification of the disapproval and the process to appeal the decision. The visitor shall be informed of the specific reason(s) for disapproval.

54020.8.3 Reconsideration of Disapproval

Revised April 3, 2014

Reconsideration of disapproval shall occur upon receipt of supporting documentation and information, and included on a new CDCR Form 106 subject to the provisions of CCR Section 3172.1.

54020.8.4 Revocation of Approval to Visit

Revised April 3, 2014

An individual's approval to visit may be revoked when:

- Information that would have resulted in visiting disapproval becomes known after visiting approval has been granted.
- Any activity or event occurs subsequent to an approval to visit that would have resulted in disapproval of the initial application.

54020.8.5 Violations of State Law on Institution/Facility Property

Visitor violations of State or federal law on institution/facility property may be referred to prosecuting authorities in accordance with CCR Section 3176.2. The visitor's visiting privileges shall be revoked pending investigation and/or court disposition. If the visitor is not prosecuted or not referred for prosecution, the visitor shall be subject to action in accordance with CCR Subsections 3176.2(a) and (b). If the visitor is found not guilty or a court dismisses the charges, visiting approval may be restored upon the written request of the visitor.

54020.9 Extenuating Circumstances for Visitor Approval

Revised September 25, 2007

Exceptions to approval requirements for visitors may be made when death, life-threatening illness, or injury occurs to an immediate family member, including registered domestic partner, of the inmate.

Family emergency exceptions shall be made only for an inmate's immediate family members as defined in Section 3000 of the Title 15 or clergy.

Each request to visit because of a family emergency shall require proof of the emergency and approval of the supervisor in charge of visiting.

Visitors must present acceptable picture identification and pass an arrest history inquiry in accordance with this Section.

The visit shall be conducted under the direct supervision of visiting or designated staff.

54020.10 Visiting Requirements for Minors

Revised April 3, 2014

Minors shall be accompanied by an adult who has been approved to visit the inmate.

Approval of an emancipated minor's visit requires a one-time submission of a certified copy of the court order of emancipation. Staff shall note that the original is certified, and verification of the order shall be noted in SOMS. The emancipated minor is subject to all the rules and regulations as set forth for adult visitors.

If the accompanying adult is not the parent, legal guardian, or spouse of the minor, a notarized written consent shall be required from the person with legal custody of the minor, or a certified copy of a court order authorizing the minor to visit while accompanied by a designated adult.

- The notarized written consent or court order shall state the duration of approval and must be presented each time the minor visits. The notarized written consent must be renewed annually.
- Staff shall note the notarized consent form is current and shall annotate it in SOMS.

54020.10.1 Visiting Restrictions for Minors

Revised May 10, 2010

Any inmate convicted of specified criminal acts against minors shall be prohibited from visiting with minors in accordance with provisions of CCR Section 3173.1.

- For inmates convicted of Penal Code (PC) Section(s) 261, 264.1, 266c, 285, 286, 288, 288a, 288.5, or 289 when the victim is a minor, visitation with the minor victim shall be prohibited, except as authorized by an order of the juvenile court pursuant to Welfare and Institutions Code Section 362.6. Visitation pursuant to such an order shall be limited to non-contact status.
- For inmates convicted of PC Section(s) 261, 264.1, 266c, 269, 285, 286, 288, 288a, 288.5, or 289 when the victim is a minor, visitation with any minor who is not the victim of the crime shall be limited to non-contact status except as authorized by the Institution Classification Committee.
- For inmates convicted of PC Section(s) 273a, or 273d, visitation with the minor victim shall be limited to non-contact status.
- For inmates convicted of violating PC Section(s) 187, 269, 273a, 273ab, or 273d, when the victim is a minor, visitation with any other minor shall be limited to non-contact status except as authorized by the Institution Classification Committee.
- When an inmate has been arrested, but not convicted of any crime involving a minor victim included in this Section, a classification committee shall determine whether all visitations with a minor(s) is to be limited to non-contact status.
- Unless otherwise prohibited, the inmate's visiting status shall be unrestricted until a classification committee has done the following:
 - Made a case-by-case determination whether the inmate poses a threat of harm to minor visitors in contact visitation.
 - Considered the circumstances of the misconduct involving a minor victim in determining whether the inmate poses a threat of harm to minor visitors in contact visitation. In making its determination, the classification committee shall consider, but is not limited to, arrest reports, probation officer reports, court transcripts, and parole revocation transcripts.
- If a classification committee determines that the inmate will pose a threat of harm to minor visitors in contact visitation, it will order all the inmate's visitation with minors be restricted to non-contact visiting status.
- If the inmate disagrees with the decision of a classification committee, the inmate may file an inmate grievance via the CDC Form 602 appeal process as outlined in CCR Sections 3084.1 through 3085.

54020.11 Processing Visitors

Revised April 3, 2014

Upon arrival at the visitor processing area, the visitor shall be issued a SOMS, Visitor Pass.

Visiting staff shall:

- Request picture identification in accordance with this Article. A certified copy of each minor's birth certificate or county-embossed abstract of birth shall be presented.
- Verify approval to visit via the inmate visitor approval list in SOMS.
- Determine visiting status; e.g., non-contact, order for an unclad body search or other restriction/instructions, and follow any special instructions posted in SOMS.
- Enter the date of the visit in SOMS.
- Stamp the right wrist of all visitors age seven and older with fluorescent ink prior to their entrance into the institution/facility.
- Search/Inspect all visitors in accordance with CCR Section 3173.2.

Staff shall identify visitors prior to their exit from the institution/facility by positive physical identification, inspection of their identification card, SOMS visitor pass and wrist stamp.

54020.11.1 Visiting Program Reasonable Accommodation

Revised December 16, 2010

Subject to the Americans with Disabilities Act and other applicable law, reasonable accommodations shall be afforded visitors and inmates with disabilities to facilitate their full participation in contact, non-contact, and family visiting.

54020.11.2 Processing Visitors with Medical Implants, Prosthetic, or Assistive Devices

Revised April 3, 2014

Visitors with temporary medically implanted or prosthetic devices, wheelchairs, or other assistive devices who cannot clear contraband/metal detection devices shall be required to present a signed letter which includes the address, telephone number, and the California Medical License number (if applicable) of their physician, psychiatrist, prosthetist, or orthotist.

Visitors with permanent medically implanted or prosthetic devices shall be required to present a letter with the initial submission of an application requesting visitation with an inmate. A visitor who had already been approved to visit and later has a permanent or prosthetic device(s) installed shall be required to submit medical verification as prescribed in CCR Subsection 3173.2(d). Once accepted, this verification will be incorporated into SOMS and will only require update to coincide with changes to the visitor's permanent implanted or prosthetic device(s).

The verification letter shall:

- Be renewed at least every two years or coinciding with the requirement for updating visitor information.
- Detail the specific location of the medical implant or prosthetic device in or on the body.
- Detail the specific type of mobility impairment and verify the need for a wheelchair or assistive device.

Processing Visitors with Medical Implants or Prosthetic Devices

Staff shall conduct an inspection of the prosthetic device to the extent possible without the removal of clothing. A hand-held contraband/metal detection device shall be utilized to process visitors with medical implants.

Any required removal of prosthetic and medical implants for inspection will be done in private setting or area.

If reasonable suspicion exists to believe that a visitor is attempting to introduce contraband or substances into or remove contraband out of the institution and the visitor has a medical implant, prosthetic device, or uses a wheelchair or assistive device(s), a search will be initiated in accordance with this Section. Licensed physician and/or nursing staff of the same sex shall be present to assist with the unclad body search consistent with the duties of their classification.

Processing Visitors with Wheelchairs or Mobility Assistive Devices

The visitor shall be asked to temporarily transfer from his/her personal wheelchair to an institutional wheelchair while an inspection of the visitor's wheelchair is conducted.

Institution/facility staff are not authorized to physically assist the visitor with the wheelchair transfer.

Hand-held contraband/metal detection devices shall be used to process the visitor during the transfer from his/her personal wheelchair to the designated wheelchair.

If the visitor provides no written verification of impairment and/or need for assistive device and/or refuses to comply with the transfer, the visit shall be denied by the appropriate staff.

Visitors who present letters signed by their physician, etc., which details a specific type of mobility impairment which precludes the wheelchair transfer or verifies the need for using battery-powered or custom designed wheelchairs, shall be exempt from the wheelchair transfer requirement.

When an institutional wheelchair is not available or the visitor is unable to transfer to another wheelchair, the visitor is exempt from the transfer requirement.

Visiting staff shall conduct a visual inspection of the wheelchair and hand-held contraband/metal detection devices shall be used to process visitors deemed exempt from the wheelchair transfer requirement.

54020.12 Proof of Identity

Revised December 16, 2010

All Adult visitors shall present picture identification before being permitted to visit. The following are acceptable forms of identification for visitors:

- Valid driver's license with picture.
- Valid Department of Motor Vehicles identification card with picture.
- Valid government-issued passport with picture.
- Armed Forces' identification card with picture.
- Identification cards issued by the United States Department of Justice or United States Immigration and Naturalization Service.
- Picture identification Matricula Consular De Alta Seguridad (MCAS) issued by the Mexican Consulate.

54020.13 Inspection/Search of Visitors

Revised May 10, 2010

All persons, their property or possessions, and/or vehicles when on institution/facility property are subject to inspection/search to the degree necessary to ensure institution/facility security and prevent the introduction of contraband.

Visitors shall not be forcibly searched unless institution/facility officials possess a court-issued warrant to conduct the search or the visitor is being detained for unlawful actions or activities in accordance with CCR Section 3292.

54020.13.1 Contraband /Metal Detection Devices

Revised January 10, 2014

All visitors shall be processed into the security area through a contraband/metal detection device and/or a hand-held wand metal detector device. Visitors shall have property in their possession searched prior to being allowed entry into the institution/facility. Visitors shall remove all items from their pockets and remove jackets, belts, shoes, etc. These items shall be placed in a designated area for inspection by the visitor processing center staff.

Additional screening will occur when an individual sets off the alarm of the metal detector, an individual is selected for additional screening, or an individual has provided documentation to substantiate a condition that precludes successful screening by metal detector. Additional screening may include a hand-held wand inspection in conjunction with a clothed body search of the visitor's body (including the torso), a clothed body search alone, or an unclad body search.

When additional screening is required, visitors should let staff know of any personal needs or concerns they may have due to religious or cultural considerations, disability, or other medical concern. Additional searches will be conducted by staff of the same gender as the visitor.

Staff shall use a hand-held wand inspection to identify what may have set off the alarm on the walk-through metal detector or to confirm an alarm present during the initial screening. During the wand inspection procedure the visitor shall be asked to stand with feet and legs apart and arms out to the side while the staff member passes the wand in close proximity to all areas of the visitor's body.

A visitor who fails to clear any contraband/metal detection device may be subject to a clothed or unclad body search prior to beginning a visit.

Before the clothed or unclad search is conducted, authorization and visitor consent shall be obtained in accordance with this Article.

54020.13.2 Clothed Searches of Visitors

Revised January 10, 2014

Staff may conduct a clothed body search and use a variety of detection devices when the visitor fails to clear any contraband/metal detection device, or information has been obtained indicating that a visitor is in possession of contraband as described in DOM Chapter 5, Article 20. To ensure security, a clothed body search may be used in conjunction with the hand-held wand inspection. A clothed body search may also be performed as a stand-alone

procedure, when appropriate, or to resolve alarms set off during an inspection by a metal detector. A clothed body search may include touching sensitive areas of the body.

Visiting staff of the same sex as the visitor shall conduct authorized clothed body searches.

In emergency situations, custody staff of either sex may conduct a clothed body search.

Removal of outer garments, heavy clothing, and possibly shoes may be requested to complete the security search.

Discretion shall be exercised when issuing instructions to persons being searched.

Clothed body searches may be conducted on reasonable suspicion that the visitor is carrying contraband.

54020.13.3 Unclothed Searches of Visitors

Revised January 10, 2014

Staff may conduct an unclothed visual body search and use a variety of detection devices to conduct a more intensive security search of the visitor's person when the visitor fails to clear any contraband/metal detection device, or information is obtained that a visitor is in possession of contraband as described in DOM Chapter 5, Article 20. An unclothed body search is a security procedure that involves visual inspection of a person's body with all of their clothing removed and a thorough inspection of the person's clothing for the purpose of detecting contraband. This procedure may be conducted with the visitor's consent when there is a reasonable suspicion that the visitor is carrying contraband and when no less intrusive means are available to conduct the search.

Unclothed searches are especially appropriate when clothed searches prove inconclusive and the presence of contraband remains a reasonable suspicion.

Unclothed body searches shall be accomplished in accordance with the following provisions and recorded on a CDC Form 888, Notice of Request to Search.

Visiting staff of the same sex as the visitor shall conduct authorized unclothed body searches. The search shall be conducted in a private setting, in a dignified manner, and by at least two staff members. Unclothed body searches may be done on probable cause.

Consistent with their duties or classification, a licensed physician and/or nurse of the same gender shall be present to observe and assist in searches when an unclothed body search is required of visitors having a medical implant, prosthetic device, wheelchair, or assistive device(s).

Discretion shall be exercised when issuing instructions to persons being searched.

If staff identifies what appears to be contraband in a body cavity and the visitor refuses to remove the suspected contraband from the body cavity, the visitor shall be detained and referred to the local law enforcement agency.

When probable cause exists that a visitor has concealed contraband in a body cavity; local law enforcement shall be summoned. CDCR staff shall not perform any body cavity searches of visitors.

A copy of the CDC Form 888 excluding confidential information shall be given to the visitor.

54020.14 Visitor Consent for Search

When a clothed or unclothed body search of a visitor is authorized and/or necessary due to the failure to clear any contraband/metal detection device, the visitor shall be verbally informed of the reason(s) for the search and the name of the official ordering the search. Before the search is conducted, the visitor shall provide written consent by signing a CDC Form 888.

A CDC Form 888 shall be completed for each person searched, including minors. The parents or legal guardian of the minor shall be required to consent to the search of minor children by signing the CDC Form 888.

A copy of the CDC Form 888 and all information relied upon for ordering the search shall be sent to the institution head or designee immediately following the search.

Within 24 hours, a detailed written report shall be submitted to the institution head and shall include the following information:

- The reason for the clothed or unclothed search of the visitor's person or exceptional search of property or vehicle.
- The visitor's response.
- The results of the search.

On weekends and holidays, this report shall be submitted to the institution head on the first working day following the search.

54020.14.1 Refusal to Submit to a Search

Visitors who refuse to submit to a clothed or unclothed body search shall have their visiting privileges denied for that day. Future visits may be conditional upon the visitor's willingness to submit to a clothed or unclothed body search prior to each visit.

Any parent or legal guardian refusing to provide consent for clothed or unclothed search of a minor shall be denied the opportunity to visit that day.

The institution head may delegate authority, to authorize clothed and/or unclothed body searches of visitors and search their property or vehicles, to staff at the level of correctional captain or higher. The Administrative Officer of the Day (AOD) shall exercise this authority in the absence of appropriate staff.

The visiting supervisor/watch commander shall advise the captain/administrator in charge of visiting of a search of a minor. During non-business hours the AOD shall be notified.

54020.14.2 Documentation of Information Leading to a Search of a Visitor

Revised April 3, 2014

When staff obtains information that indicates that a visitor may be in possession of contraband on institution/facility property, the employee shall document the information on a confidential memorandum.

The report shall include:

- The name and number of the inmate(s) intended to be visited.
- Visitor's name, physical description, personal relationship to the inmate; e.g., wife, sister, brother, etc. (if known).
- Specific details of the circumstances.
- Means by which the documenting employee obtained information.

The report shall be personally delivered to the correctional custody captain or designated staff for approval to conduct an unclothed body search of the designated person.

A written report documenting the reason for any exceptional probable cause search of a visitor's person, property, or vehicle shall be submitted to the institution head or designee by the official in charge of visiting no later than the first working day following the incident. This report will also include any visitor's response and the results of the search.

A copy of the SOMS Notice of Visitor Warning/Termination/Suspension/Denial/Revocation, with all confidential information redacted shall be given to the inmate whom the person visited or intended to visit, and to the prospective visitor(s).

54020.14.3 Searching of Minors

The accompanying parent or legal guardian of the minor must consent to, and shall be permitted to, witness the search. The procedure to search a minor is as follows:

- A custody supervisor and at least one other staff member of the same sex of the minor shall be present during the search.
- Care shall be exercised not to traumatize the minor(s) being searched.

If personal contact is necessary to facilitate the search, it shall be performed by the parent or legal guardian at the direction of, and to the satisfaction of, the searching officer. If a minor experiences difficulty in comprehending instructions, the parent or legal guardian shall be utilized to relay instructions.

Simultaneous searches of minors of the opposite sex in the same area is prohibited.

If necessary, visiting staff shall supervise minors while separate searches are conducted.

54020.15 Allowable Visitor Items

Revised April 3, 2014

Visitors may be permitted to take the following items into the visiting area:

Miscellaneous Items

- One pair of eyeglasses.
- One handkerchief or a small package of tissues, no bandannas.
- One comb and/or hairbrush, non-metallic, no pointed ends or detachable parts.
- Two keys on a ring with no other attachments. One key may be an electronic car key.
- Visiting locker key.
- Identification.

- One transparent coin purse, maximum two compartments, maximum size of 6" x 8".
- Fifty dollars per adult visitor and twenty dollars per minor visitor, coin or one dollar bills only.
- Indian Medicine Bag. (Upon inspection and approval.)
- Two small (less than 12 inches in length) solid toys.

Baby Items

The following baby care items are permitted for each baby:

- One transparent diaper bag.
- Six disposable diapers.
- Three factory-sealed jars of baby food.
- Any combination of the following: two factory-sealed single serving size, ready to feed bottles of baby formula or two transparent plastic baby bottles, either empty or containing pre-mixed formula/milk/juice/water.
- Two factory-sealed, single serving size packets of powdered baby formula.
- One change of clothes.
- Single-layer baby blanket.
- One transparent pacifier.
- Factory-sealed baby wipes.
- One baby feeding spoon (plastic).
- One single-layer burp cloth.
- One infant carrier.

Necessary Reasonable Accommodations

The following items are permitted, as-needed, and upon submission of verifiable documentation from a medical doctor that a physical or mental limitation exists, for visitors who require reasonable accommodations to ensure that proper hygiene is met:

- One to two articles of clothing (pants).
- Two adult incontinence products (diapers).
- A container of cleaning wipes.
- Wheelchair and one additional assistive device (i.e., cane, walker, etc.).

The one or two articles of clothing (pants) shall be maintained in a secure location (e.g., locker at the visitor processing center readily available to the visitor as needed or the visitor's secured vehicle). When necessary, visiting staff shall provide a disposable jumpsuit and clear plastic bag for soiled diapers and/or articles of clothing. The visitor may use the jumpsuit to walk to the visiting processing center and retrieve clean articles of clothing previously stored there. The disposable jumpsuit will be collected and disposed of in accordance with institution procedures. The visitor will be allowed to return to the visiting room to resume their visit.

If necessary due to physical inability to walk and/or stand without an assistive device, visitors will be allowed to bring with them a wheelchair and one additional assistive device (i.e., cane, walker, etc.), to provide a sufficiently stable platform while in a toilet facility to allow a visitor to stand while a diaper and/or clothing is changed, and if necessary due to physical limitations, visitors are also allowed one non-inmate caregiver of the same sex to assist with personal hygiene needs as well as to assist the visitor back into or out of a wheelchair or toilet facility. Persons designated as caregivers must meet all visitor requirements set forth in DOM Article 42, Visiting.

Visitors requiring reasonable accommodations in order to meet proper hygiene, must submit with their visitor application, verifiable documentation from a medical doctor that a physical or mental limitation, for which accommodation is needed, exists. Approved visitors must bring with them a copy of this documentation on the day of the visit.

Photographs/Documents

Photographs, papers, or documents permitted into the visiting area for the inmate's examination shall be retained by the visitor and carried from the visiting room and the institution/facility at the conclusion of the visit.

Photographs, papers, or documents require approval of the institution/facility designated staff.

Ten approved photographs may be allowed; maximum size 8" x 10"; no false backs or instant photographs.

During processing, visiting staff shall:

- Inspect and count the items.
- Record the number of items on the SOMS Visitor Pass.

Upon conclusion of the visit, staff shall again count the items verifying the amount with the number recorded.

The institution/facility shall provide, upon request, one pencil and notebook paper to be checked out by the adult visitor, as needed. At the conclusion of the visit, the pencil shall be returned to visiting room staff. The paperwork shall be inspected for contraband and the visitor shall be allowed to remove the paperwork from the institution/facility.

Institutions/facilities may provide games, children's books, crayons, and coloring books upon receipt of donations from the community.

54020.16 Lockers

Lockers may be available in some visitor processing areas for storage of items that are not permitted into the visiting areas.

The institution/facility shall not be responsible for the loss or theft of personal items left in lockers.

54020.17 Visitor Medication

Visitors may retain only life-sustaining, condition-stabilizing medication with the prescribing physician's written statement of its immediate need, and only in the physician's prescribed amount immediately required to sustain or stabilize the condition during the visit.

The physician's written statement shall include the physician's medical license number, address, and phone number.

All medication shall be in its original pharmacy container with the patient's name, pharmacy, name of medication, prescribed dosage, and the physician's name indicated on the container's label.

54020.18 Number of Approved Visitors

Limitations shall not be placed on the number of visitors approved to visit an inmate.

The number of visitors allowed in the visiting area at one time is limited as follows:

- No more than five visitors per inmate, including minors. Visitors in excess of five may be accommodated by means of rotation through the visiting area on a one time basis. Such rotation shall be considered a single visit in the event it is necessary to terminate a visit in progress.
- Non-contact visits shall not exceed three visitors, including minors. Visitors in excess of three may be accommodated by means of rotation through the visiting area on a one time basis. Such rotation shall be considered a single visit in the event it is necessary to terminate a visit in progress.

54020.19 Visitor Emergency Medical Assistance

Emergency medical attention may be provided to visitors who become ill, injured, or require medical attention while on institution/facility property. The responding staff member shall make every effort to preserve life.

- This may include first aid, CPR, and other life-saving measures for which the employee is trained and/or certified. Life support measures shall be continued until the medical personnel arrive.
- Staff may contact a visitor's relative or friend to assist in the transportation of the visitor. An ambulance may be summoned for visitors requiring emergency medical attention. The institution/facility is not responsible for payment of services provided by outside agencies.
- The watch commander shall immediately be notified, and the appropriate documentation shall be completed.

If a visitor alleges injury, or was involved in an accident on institution/facility property, a STD Form 268, Accident Report, shall be completed by visiting staff.

54020.20 Visitor Basic Dress Standards

Revised January 10, 2014

Visitors shall remain fully clothed when visiting. Appropriate attire includes undergarments; a dress or blouse/shirt with skirt/pants or shorts; and shoes or sandals.

Visitors over 36" tall shall adhere to the following dress standards.

- Shoes or sandals shall be worn at all times. Shower shoes and bedroom slippers will not be allowed.
- Buttons, snaps, and zippers shall remain fastened.
- Undergarments shall be worn beneath translucent clothing, under all circumstances.
- For security reasons, no brassiere will have metal underwire.
- All shorts and skirts, including slits in the garment, shall not expose more than two inches above the knee when standing.

Prohibited Attire:

Prohibited attire consists of, but is not limited to, the following:

- Clothing that resembles state-issued inmate clothing worn to visiting (e.g., blue denim or blue chambray shirts and blue denim pants, reception center attire).
- Clothing that resembles law enforcement or military-type clothing, including raingear, when not legitimately worn by an individual on active duty or in an official capacity.

Clothing that:

- Exposes the breast/chest area, genitals, or buttocks.
- By design, manner worn, or due to the absence of, allows the anatomical detail of body parts or midriff to be clearly viewed.
- Are sheer or transparent or excessively tight.
- Attire or accessories displaying obscene/offensive language, drawings, or objects.
- Head coverings, readily removable hair pieces, or gloves, with the exception of clear see-through rain gear for inclement weather.
- Any other clothing, garment, or accessory that when compared to the expressly specified standards above would warrant disapproval.

Exceptions:

Hats, wigs, gloves, religious veils, or hairpieces are permitted with the prior written approval of the institution head or designee.

- Approval shall be based on verification of the visitor's necessity to wear the hat, wig, gloves, or hairpiece.
- Approval of hats and gloves shall be based on weather conditions at the institution/facility.
- Approved hats, wigs, gloves, religious veils, or hairpieces shall be inspected by visiting staff prior to the visit.

54020.21 Processing of Inmates

Revised January 4, 2006

Before allowing inmates into the visiting area, staff shall:

- Search the inmate in a manner consistent with institution/facility security prior to, and upon conclusion of, each visit.
- Verify the inmate's identity.

Inmates shall be permitted to take any of the following items into the visiting area:

- One handkerchief.
- One comb.
- One wedding band.
- One religious medal on a necklace.
- Prescription eyeglasses.
- Approved medical assistive device.
- Written or printed legal material or case-related documentation pertaining to the inmate's case for an attorney visit only.
- One article of approved Religious headgear may be worn in the visiting area.

54020.21.1 Inmate Visiting Dress Standards

Inmates shall wear only those items of state-issued clothing issued to them at the time of the visit.

Inmates are permitted to wear one each of the following state-issued clothing items:

- Shirt.
- Pair of pants.
- Belt.
- Jacket.
- Pair of socks.
- Pair of shoes.
- Under garments.

Inmates may wear the following state-issued or personal items, if allowed at the institution/facility at the time of the visit:

- Thermal clothing.
- Sandals or shower shoes may be permitted for inmates housed in institution/facility medical units.

Exceptions to the approved inmate attire shall be based on medical necessity, and authorized by the health care manager or treating physician.

54020.21.2 Authorization of Excused Time off for Visits

Revised April 3, 2014

An inmate's work supervisor may approve excused time off (ETO) from a work assignment to participate in a visit in accordance with CCR Section 3045.2.

During lockdowns, when visiting programs have not been suspended, inmates prevented from working as a result of the lockdown may be permitted ETO visits during their normal work hours.

- When inmates are not required to report to their work assignments because of temporary suspension of the work program, they may be allowed to participate in ETO visits.

In each instance, the approval or disapproval of this action shall be documented in SOMS on a CDC Form 128-B, General Chrono, by the approving authority.

Inmates should not be denied visiting opportunities solely on the basis of the unanticipated absence or temporary unavailability of their work supervisor.

54020.21.3 Inmate Refusal to Visit

Revised April 3, 2014

Inmates may refuse to see a visitor. The refusal shall be documented in SOMS on a CDC Form 128-B and shall be signed by the inmate. If the inmate refuses to sign the form, the staff member having knowledge of the refusal shall document the refusal on the CDC Form 128-B.

The original form shall be placed in the inmate's file and the visitor and the inmate shall be given a copy.

Refusal by the inmate to see a visitor on one occasion shall not result in the visitor's removal from the approved visitor list, unless the inmate requests removal.

Inmates who desire to remove a visitor from their visiting list shall make a written request to the supervisor in charge of visiting. It is the inmate's responsibility to notify visitors of their removal from the visiting list.

Visitors shall be removed from the visiting list on the date the request is received by visiting staff for a minimum of six months, and this information shall be recorded in SOMS.

The inmate may make a written request to place the visitor back on the visiting list in accordance with this Section at the conclusion of the six-month period.

54020.22 Non-Contact Visiting

Revised April 3, 2014

Inmates assigned to Administrative Segregation Unit / Security Housing Unit (ASU/SHU) are not normally eligible for contact visits. On a case-by-case basis, the institution head or designee may allow contact visits for inmates in ASU.

Inmates not assigned to an ASU/SHU may be placed on non-contact visiting status for specific periods of time by disciplinary disposition, or classification committee action in accordance with CCR Sections 3170(d) and 3176.4.

Visitors who have made appointments in advance for non-contact visits shall be given priority.

- Non-contact visits shall be scheduled in one-hour increments and may be extended depending on space availability and scheduling. When overcrowding occurs, those who have visited at least one hour and who have been visiting for the longest time may have their visits terminated as outlined in CCR Subsections 3176(a)(9) and (10).
- Each institution/facility shall develop an operational supplement for the scheduling of non-contact visits.
- Inmates undergoing reception center processing shall be limited to non-contact visiting. If the institution does not allow non-contact visiting, the institution head shall develop an alternative visiting plan to allow visiting in accordance with this Section.
- Inmates determined to be disabled and housed at a reception center for periods exceeding 61 days solely due to their disability, shall be allowed regular visiting privileges in compliance with this Article.

54020.22.1 Temporary Imposition of Non-Contact Visits

Revised April 3, 2014

In accordance with CCR Section 3176.4(a) the ranking custody officer on duty, or the supervisor in charge of visiting, may temporarily impose noncontact visiting restrictions but may not deny visiting as a security measure. Non-contact visiting may be imposed as a temporary measure for willful failure or refusal to abide by visiting regulations. This status may be invoked pending the outcome of a disciplinary or classification committee hearing. In addition, an inmate on non-contact visiting status may have all visits temporarily suspended when displaying disruptive behavior during a

visit. The reason(s) for the non-contact visiting status or suspension of visiting shall be recorded in SOMS and the affected inmate shall be given a copy of the documentation. Subsequent disciplinary or classification committee action shall supersede any temporary action.

54020.22.2 Non-Contact Visits for General Population Inmates

Non-contact visiting for general population inmates shall be imposed by a classification committee for specified periods of time when there is substantial reason(s) to believe that physical contact with a visitor(s) or with other inmates may:

- Endanger the safety of persons.
- Jeopardize the security of the institution.

Non-contact visiting may be imposed in accordance with CCR Sections 3170(d), 3176.3, and 3315.

54020.22.3 Review of Newly Arriving Inmates for Visiting Status

The initial classification committee shall review all newly arrived inmates who are eligible for general population placement to determine visiting status.

Criteria for imposition of non-contact visiting status shall include, but are not limited to:

- Violations of visiting regulations.
- Recent or repeated possession of contraband (such as money, narcotics, and/or paraphernalia, escape tools or devices, etc.), the evidence or circumstance of possession of which suggests illicit acquisition through the visiting process and/or from smuggling into the institution/facility.
- Assaultive, irrational, or bizarre behavior suggesting that the inmate has a high violence potential and may prove disruptive to the visiting program.
- Escape risk or escape history.
- The inmate is temporarily housed at an institution/facility of another law enforcement agency.
- The inmate may be placed on non-contact visiting if assigned to a drug rehabilitation program which requires non-contact visiting.

54020.23 Rule Violations Related to Visiting

A Hearing Officer or Senior Hearing Officer may place limitations and restrictions on an inmate's visits for specified periods of time when the inmate is found guilty of rules violations related to visiting, distribution/possession of controlled medications, or possession of contraband likely to have been introduced through visiting;(i.e., money, jewelry), or by classification committee action in accordance with CCR Sections 3170.4(e) and 3315.

54020.24 Food in Visiting Areas

Visitors and inmates are permitted only those items purchased in their respective visiting areas.

- Inmates and visitors may not take any food items from the visiting area.
- Visitors at CDCR Conservation Camps are permitted to bring the following vendor-sealed food items to the picnic visiting area:
- Prepared, non-marinated, unprepared, and/or lunch meats.
 - Cheeses.
 - Non-alcoholic beverages.
 - Six 12-ounce unopened cans or plastic bottles per inmate and visitor.
 - One unopened quart of milk per inmate and visitor.
 - One unopened six-ounce jar of instant coffee.
 - One unopened 16-ounce jar of barbecue sauce and/or steak sauce.
 - Individual sealed condiment packets: ketchup, mustard, mayonnaise, relish, sugar, etc.
 - One large unopened bag of chips per inmate and visitor.
 - Four hot dog buns per inmate and visitor.
 - Four hamburger buns per inmate and visitor.
 - One package of tortillas per inmate and visitor.
 - Two unsliced fruits per inmate and visitor.
 - One potato per inmate and visitor.
 - One onion or pepper per inmate and visitor.
 - Two bakery product servings per inmate and visitor.

Food items taken into designated visiting areas shall be consumed during the visit or taken from the visiting areas by the visitors at the conclusion of the visit.

54020.25 Visiting Photo Program

Photographs may be taken of the inmate and/or visitor in designated visiting area locations when purchased through the institution/facility's photo program.

Inmates and visitors shall be authorized to retain any approved photographs taken during the visit.

54020.26 Visiting with More Than One Inmate

Revised April 3, 2014

Except for visits with immediate family members as defined in Section 3000 of the Title 15, visiting with more than one inmate at the same time shall require the approval of the institution head or designee. Consistent with all other requirements specified in DOM 54026.10.1.

Visiting more than one inmate at the same time shall require that both inmates are approved to visit in the same visiting room and that either:

- The visitor(s) has prior written approval from the institution/facility head or designee, or
- The visitor(s) and inmates are immediate family members including registered domestic partner.

54020.27 Visiting in CDCR Hospitals and Infirmaries

Revised April 3, 2014

Authorization from the health care manager and the correctional captain or AOD shall be obtained to approve visits for inmates housed in CDCR infirmaries or hospital facilities.

- Visitors shall be immediate family members as defined in Section 3000 of Title 15 including registered domestic partner.
- Visitors shall be supervised by custody staff during the visit.
- Approval for visits by minors shall be obtained from the institution head or designee.
- Visitors shall only be authorized to retain two keys on a single key ring (with no attachments), life sustaining medication, and a valid form of identification.

The length of visiting in a CDCR infirmary, hospitals, or community hospitals shall be determined by the institution head or designee based on staff availability.

54020.28 Visiting in a Community Hospital

Revised September 25, 2007

Visits for inmates in a community hospital may be approved under the following conditions:

- The inmate has a life-threatening or critical illness/injury.
- The visitor is an immediate family member including registered domestic partner.
- The visitor has prior approval to visit the inmate in an institution/facility.
- The institution head or designee approves the visit.
- The attending physician authorizes the visit.

Visitors in a community hospital shall comply with the CDCR visiting rules and any restrictions or requirements imposed by the institution/facility or hospital.

The length of visiting in a CDCR infirmary, hospitals, or community hospitals shall be determined by the institution head or designee based on staff availability.

54020.29 Visiting Conduct

Revised May 10, 2010

Each inmate and visitor is responsible for their conduct during visits. Violation of laws, whether or not on CDCR property, and/or CDCR policies or regulations, may result in restrictions, suspension, denial, revocation of visiting privileges, and/or arrest.

An inmate and their visitor may briefly embrace and kiss at the beginning and end of each visit. Except for holding hands, no other body contact is permitted except as specified below:

- An inmate may hold his or her minor children. Inmates may also hold minor children accompanied by an adult. Such contact will be monitored to ensure compliance with CCR Sections 3007 (Sexual Behavior) and 3173.1 (Visiting restrictions with minors).

- Nursing mothers shall be discreet and covered when breast feeding their child in the visiting room. Failure to do so shall result in termination of visiting for that day.
- Minors shall remain under the constant control and supervision of the accompanying adult.
- Visitors shall not leave the designated visiting area except at the conclusion of the visit.
- All food or beverage items shall be consumed or disposed of at the conclusion of the visit. During contact visits, the inmate and visitor may exchange or examine any items of property or consume any items of food or beverage that either party is permitted to bring into or purchase in the visiting area. Inmates may retain photographs that were taken during the visit.
- Inmates shall not retain any items taken into any visiting area by the visitor except legal materials approved in accordance with CCR Subsections 3178(n) and (o).
- In accordance with CCR Section 3006, inmates shall not be authorized to possess contraband as defined in CCR Section 3000.
- Inmates shall clean their respective visiting area upon conclusion of the visit.

54020.29.1 Suspension or Exclusion of Visitors from the Visiting Program

Revised April 3, 2014

All visitors entering the institution/facility for the purpose of visiting an inmate are subject to all applicable policies, regulations, local procedures, and laws:

- Visitors violating a policy, regulation, or law are subject to denial, suspension, or revocation of a visit in progress or exclusion from the visiting program in accordance with CCR Subsections 3176-3176.3.
- Actions affecting a visitor's access to the visiting program shall be recorded on SOMS titled Notices.

When verbal warning and/or restrictions fail to achieve compliance, or fail to correct the conduct by a visitor, the visit shall be terminated for the day.

For serious or repeated violations of the rules, regulations, or procedures and/or upon belief of the visitor's involvement in a criminal act and pending the outcome of an investigation, the official in charge of visiting may impose a suspension of the visitor's access to the visiting program for up to six months in accordance with CCR Subsection 3176.1(c).

- The institution head or director or designee, as appropriate, and in accordance with CCR Subsections 3176.1(d) and (e), may impose suspension for up to twenty-four months when visitors are involved in misdemeanor or felony criminal activities on institution/facility property.
- Subsequent discovery of information that would have resulted in disapproval or disqualifying contact are grounds for revocation of the previously granted permission to visit an inmate.

The warning, visit termination, suspension, and revocation information recorded in SOMS shall clearly state the reason for the action and the length of time any sanction or action taken will apply. The notification content of the form shall include the signature of the official taking the action and advise the visitor of the right to appeal in accordance with CCR Section 3179. An original shall be provided to the visitor at the time of the action or mailed to the visitor's last known address within five working days of the action. Records shall be maintained in SOMS and the institution head shall be notified.

In all instances of exclusions made in accordance with the provisions of CCR Subsection 3176.3, a written report will be made to the Director via the Deputy Director, Division of Adult Institutions or appropriate Associate Director designee within two working days of the effective date of the order.

54020.30 Denial or Termination of Visits Due to Overcrowding

Revised April 3, 2014

Visits may be terminated or denied when the visiting areas are in use to maximum capacity, and there are other approved visitors waiting to visit.

Termination of visits due to overcrowding shall be based on the recorded order of arrival time of the inmate (first in/first out). Exceptions to this termination procedure are as follows:

- Excessive distance: The visitor has traveled a distance of 250 miles or more and has not visited within the last 30 days. This exception shall be applied to allow two consecutive days of visiting.

- Disabled Visitor: A visitor who is certified as disabled as defined by California law and must rely on special transportation to the institution.
- Weddings: When a visitor is married to an inmate on that particular day.
- Family Emergencies: When death, serious illness, or injury occurs to an inmate's immediate family including registered domestic partner. Clergy or approved visitors may visit the inmate to offer condolences or inform the inmate of the occurrence.
- Infrequent Visits: When an inmate receives not more than one visit each six months. A visit meets this definition when the inmate normally receives few visits, and a visitor arrives unexpectedly.

When visit terminations are complete and the overcrowding situation persists, the visits of those remaining shall be terminated as necessary. When overcrowding occurs, those who have visited at least one hour and who have been visiting for the longest time may have their visits terminated as outlined in CCR, Subsection 3176(a)(9) and DOM Article 42, Section 54029.1.

Upon termination of a visit due to overcrowding, the official taking the action shall prepare a SOMS Termination Notice explaining the reason for termination. The visiting supervisor authorizing the action shall sign the notice.

Records shall be maintained in SOMS and copies forwarded to the institution head, the inmate and the visitor.

Any visitor whose visit is terminated due to overcrowding shall not be allowed to re-enter on the day of termination.

54020.31 Suspension of Visiting Program

The institution head or designee may suspend the visiting program during an emergency.

54020.32 Attorney Visitations and Consultation

Inmates have a right to access the courts and the judicial system. It is the policy of the CDCR to facilitate both correspondence and personal consultation for this purpose.

An attorney visit is a private consultation between an inmate and his/her attorney or representative.

Conversations between an inmate and an attorney or attorney representative shall not be listened to or monitored with the exception of visual observation by staff as required for the safety and security of the institution/facility.

Attorneys or attorney representatives shall not be permitted to attend or participate in any conference or committee meeting of staff and the inmate concerned, except as may be authorized by law or regulation.

54020.32.1 Clearance and Approval for Attorney Visit

An attorney or attorney representative seeking an in-person consultation with an inmate shall contact the institution/facility at which the inmate is housed. Such request(s) shall be in advance and can be made in person, in writing, by telephone, or facsimile directed to the staff designated in the institution/facility's operational supplement to this Section.

The following personal and professional information is required in writing for approval of the attorney's request to visit:

- Inmate's name, CDCR number, and date of birth.
- Proof of the attorney's current registry, in good standing, with a state bar association and indication of the jurisdiction(s) licensed to practice law.
- The attorney's date of birth, mailing address, and valid driver's license or state-issued identification card number.

The requesting attorney must also report any prior felony convictions, explain any prior suspension or exclusion from a correctional facility, and declare one or more of the following:

- They are the attorney of record either by appointment by the court, appointment by the Board of Parole Hearings, or at the inmate's request.
- They have been requested by a judge to interview a named inmate for purpose of possible appointment as counsel by the same court.
- They are seeking to visit an inmate who may be a witness relevant to a legal matter.
- They are seeking to interview an inmate at that inmate's request for the purpose of possible representation.
- They have been requested by a third party to consult with the inmate when the inmate cannot do so because of a medical condition, disability, or other circumstance.

Any false statement or deliberate misrepresentation of facts specific to the information requested above shall be grounds for denying the request and/or cause for subsequent suspension or exclusion from all institutions/facilities administered by the Department.

- The attorney or attorney representative must present a copy of the declaration to staff prior to each visit with the specified inmate. The original declaration shall be maintained on file at the institution where the inmate is housed.
- Any written information required by CCR Subsection 3178(d) may be submitted by facsimile transmission.

Processing of Attorney Visit Requests

Upon receipt of the written request and required information, a California Law Enforcement Telecommunications System (CLETS) check through the Department of Justice and verification of the attorney's credentials through the governing state bar association shall be conducted. The institution/facility conducting this background check shall subsequently maintain and update, as appropriate, all records relevant to processing such requests. Once the clearance and verification has been obtained, the attorney shall be contacted to schedule the initial visit. The attorney clearance shall be granted only for the institution/facility that conducted the clearance.

Attorneys and attorney representatives must report any change in personal or professional information, arrest history, and declarations in order to retain their approval/clearance, which shall otherwise be indefinitely valid throughout the inmate in question's period of confinement at the institution/facility. Upon the inmate's return to custody, a new visiting request and declaration shall be submitted.

Each institution/facility shall maintain a current list of all approved attorneys.

Exceptional or Unscheduled interviews

Should an attorney believe information acquired in the course of a scheduled visit warrants immediate follow-up in the form of a separate interview with a different inmate, the opportunity for an exceptional or unscheduled interview with the other inmate may be requested at the conclusion of the visit in progress. Such requests shall be honored subject to reasonable operational limitations and upon completion of a declaration in accordance with the requirements of **DOM 54020.31.1**. If the request imposes an unreasonable burden on staffing or unduly disrupts an institution function, (i.e., interferes with count or feeding), it will be deemed unreasonable. Under such circumstances, the attorney shall be so informed and a visit with the inmate in question may be scheduled in accordance with the procedures set forth above.

54020.32.2 Inmate Notification of Attorney Visit

Revised April 3, 2014

The visiting sergeant or designee shall notify the inmate of the scheduled attorney visit via the CDC Form 1081, Notice of Attorney/Legal Visit. It is the inmate's responsibility to appear for the visit at the scheduled time. Approval or disapproval of any attorney request to visit shall be documented on the SOMS Notices. If disapproved, the inmate shall be notified via the CDC Form 128-B.

Visits during Work/Training Hours

When an appointment is scheduled during an inmate's work/training hours, the inmate shall be released from the assignment.

54020.32.3 Attorney Visiting Hours

Attorney visits shall normally be accommodated and/or scheduled during the institution/facility's established regularly scheduled visiting hours and days.

When regular visiting is scheduled on both weekdays and weekends, the scheduling preference will be weekdays because of the personnel and resources needed for the greater volume of weekend visits by friends and relatives.

When an institution/facility regular visiting schedule provides for inmate visitation only on weekends, an attorney visit shall be scheduled as specified below upon request of the attorney or designated attorney representative. Upon authorization of the attorney visit, the visit shall be scheduled during weekday business hours.

With the exception noted below, attorneys or attorney representatives who have not been previously approved to visit should provide the institution in writing with the information required by **DOM 54020.32.1** no less than five business days in advance of the desired date of the visit.

This advance verification is necessary in order to conduct clearance checks, verifications, and to permit scheduling of available staff and facilities.

If the clearance cannot be obtained and approved prior to the requested visit date, the attorney or attorney representative shall be contacted and informed of the reasons for the delay.

Attorneys with a compelling need to visit an inmate during other than the established visiting hours shall submit a request to the institution head or designee.

- Written verification of a Board of Parole Hearings hearing or consultation, scheduled evidentiary hearings, and trial or court filings that are within 30 days from the date of the visit are examples of acceptably documented compelling or emergency need for the attorney visit.

Attorneys previously approved to visit at the institution/facility shall request private consultations no less than two business days in advance.

- Two business days written, faxed, or phoned notices to schedule an attorney visit are particularly appropriate for attorney visits during regularly scheduled visiting days, or when scheduling an attorney visit during a normal weekday at an institution that only provides for regular visiting during the weekend, or to schedule an attorney visit on a non-scheduled visiting weekday because of scheduling conflicts or other declared need.
- When a previously approved attorney or attorney representative is unable to provide the two business days notice due to a scheduling conflict or for some other declared need, the institution head or designee may authorize a visit with 24-hour notice so long as the visit does not interfere with the safety and security of the institution/facility and as necessary to accommodate the attorney visit on a non-scheduled visiting day.
- Under extraordinary circumstances, attorneys who have not been previously approved to visit and are unable to provide the required information within five business days may be authorized by the institution head or designee to visit with no less than **24-hour notice so long as the visit does not interfere with the safety and security of the institution.

54020.32.4 Location of Attorney Visits

Attorney visits shall be conducted in institution/facility visiting rooms.

Inmates shall be granted contact or non-contact visits, according to their visiting status at the time of the attorney visit.

- When a compelling need exists, the institution head or designee may grant an inmate on non-contact visiting status a contact attorney visit. Such visits shall occur in private visiting accommodations specified by the institution facility in accordance with this Section.
- If an attorney or attorney representative does not desire private accommodations, the attorney or attorney representative may visit the inmate on any regularly scheduled visiting day and shall be provided the same accommodations as a regular visit, with the exception that, notwithstanding the limitations of **DOM 54020.15**, legal documents may be exchanged in accordance with **CCR Section 3178(o)**.

54020.32.5 Processing

An approved attorney or attorney representative and any accompanying authorized support personnel shall be processed upon arrival at the institution/facility in the manner set forth in **DOM 54020.11**.

- Attorneys, representatives, and authorized support personnel with appointments shall be expeditiously processed, and if necessary to do so, may be advanced to the front of any processing line.

All items, legal or related case documents and required equipment or apparatus in possession of the above identified individuals, shall be inspected prior to entry into the institution/facility. Once inspected and cleared, these materials may then be conveyed into the confidential consultation area.

- Attorneys shall also be required to present proof of active registry with a state bar association and a copy of the declaration of the reasons for the consultation as specified above.
- Attorney representatives and litigation support personnel shall be required to provide valid written authorization by an attorney who has been cleared and approved in accordance with **DOM 54020.32.1**.

No more than two attorneys, or attorney representatives and litigation support personnel, may visit privately with an inmate or witness at the same time. Exceptions may be authorized by the official in charge of visiting when an attorney declares that litigation support personnel are needed to assist in the legal process/proceeding, commensurate with space and staff availability.

54020.32.6 Attorney Representatives/ Litigation Support Personnel

An attorney or court may designate, by name and in writing, representatives to interview an inmate or witnesses on behalf of an attorney. Such designated representatives shall be afforded the same accommodations and services as an attorney, providing all other requirements of this Section are met.

Representatives acting on behalf of an inmate's attorney shall be one of the following:

- Private investigator, licensed by any state and sponsored by the attorney or appointed by the court.
- A law student sponsored by the attorney.
- An employee of an attorney, legitimate legal service organization, or licensed private investigator who is sponsored by the attorney or licensed private investigator.
- A legal paraprofessional sponsored by the attorney or appointed by the court.
- An investigator who is employed by a government agency, public agency, or public institution.

Litigation support personnel include, but are not limited to, the following individuals retained or sponsored by the attorney or attorney representative in a formal capacity as specified below:

- Certified language interpreters, sign language interpreters, and court reporters.
- Polygraph examiners.
- Licensed mental or medical health care professionals.

Such personnel may accompany the attorney or attorney representative during the private consultation in order to assist in the legal process, proceeding, or case investigation.

With the exception of licensed mental or medical health professionals, the attorney or attorney representative must accompany all litigation support personnel assisting in the performance of legal functions during any private consultation.

For purposes of this Section, verifiable proof of employment or sponsorship shall be, at minimum, a formal agreement between parties outlining the duties or services to be performed by the designee and the start date of such services.

54020.32.7 Authorization of Attorney Representative

A letter of authorization to act on the attorney's behalf shall be signed by the attorney or judge and the designee. The letter must be dated within 180 days of the visit and clearly indicate that the representative is a court appointee or authorized agent of the attorney as appropriate and specific to DOM 54020.32.6 and shall contain the following:

- The designee's name and position of employment or title.
- The designee's date of birth, driver's license, and Social Security number.
- Certification in the form of a license that the representative is a licensed private investigator retained by the attorney or appointed by the court; or valid identification that the investigator is employed by a government agency, public agency, or public institution; or a letter in the form of a declaration that the attorney representative is being sponsored by the attorney and that the attorney accepts responsibility for all actions taken by the attorney representative.
- The name and CDCR number of the inmate(s) to be visited.

Designations of litigation support personnel and personnel admitted in accordance with the deposition provisions of DOM 54020.32 shall be in writing, dated within 30 days of the visit, and signed by the attorney and/or judge.

- The letter of authorization, required designations, copy of any employment contract or sponsorship agreement, and declaration of purpose of visit shall be submitted to the institution head or designee for review.
- The letter of authorization shall be presented by the attorney representative or litigation support personnel, along with verifying proof of identity at the time of the scheduled visit and shall be subject to verification.

In declaring that the attorney assumes full responsibility for the actions of their designees, the attorney is certifying that the designee is performing a recognized legitimate legal function. Therefore, upon proof of misconduct or deliberate misrepresentation of the part of the designee or upon proof that the designee is not employed by or has no verifiable sponsored relationship with the attorney, the attorney risks losing the ability to designate others to act on

their behalf or may face suspension of their own attorney visiting privileges on a departmentwide basis in accordance with CCR Section 3178(s).

54020.32.8 Exchange of Confidential Material

All items, documents, and case related materials conveyed into the confidential consultation area shall be inspected. The purpose of the inspection is to ensure the contents pose no threat to the safety or security of the institution/facility, including the introduction of unauthorized drugs, controlled substances, and/or contraband as defined in CCR Section 3006.

Staff may open and inspect, but shall not read any part of a legal written or printed document without the express consent of the inmate, attorney, or attorney representative.

All legal documents or associated case related materials the attorney or attorney representative provides or receives from the inmate are deemed necessary for the furtherance of a legitimate legal process, proceeding, or action. Therefore, the exchange of any other item or document can result in restriction, suspension, and/or exclusion of the attorney's visiting privileges on a departmentwide basis in accordance with CCR Section 3178(s).

After proper inspection, written and printed material may be exchanged. The attorney or attorney representative may retain, and take from the visiting area and institution/facility, any legal document or case related material given to him or her by the inmate and not otherwise prohibited by law or regulations. After inspection, inmates may retain and take from the visiting area any legal documents and case related materials not otherwise prohibited by law or these regulations and given to them by the attorney or attorney representative.

Staff shall limit inspection(s) to the extent minimally necessary to ensure that the contents pose no threat to the security or safety of the institution/facility.

Legal documents or case related materials refused by an inmate shall be returned to the attorney or attorney representative in person or by mail.

54020.32.9 Depositions

Depositions should be scheduled by prior arrangement. The attorney desiring the deposition must make a written request to the institution head or designee, which includes the following:

- Inmate's name and CDCR number.
- Deposition date and time.
- Name of court reporter.
- Name of videographer (if applicable).
- The court reporter's and videographer's date of birth, social security, and driver's license numbers.

The requesting attorney shall be responsible for notifying the court reporter of all requirements necessary for entry into the institution/facility in accordance with this Section.

54020.32.9.1 Audio Recording

With the inmate's consent, an attorney or attorney representative may record the interview. The institution/facility shall provide audio recording equipment.

The attorney or attorney representative must provide factory-sealed audio tape(s).

54020.32.9.2 Video Recording

With prior approval of the institution head and the inmate's consent, a video recording of the interview may be made.

- The attorney or attorney representative must provide factory-sealed videotapes.
- Unless provided by the institution/facility, video recording equipment shall be thoroughly searched for contraband.
- If the equipment cannot be searched without the risk of damage, the interviewer shall agree to pay for the cost of escort and control of the equipment while it is on institutional/facility property. Charges for the escort and control services shall be at the escort officer's current pay rate, including overtime, if applicable.

54020.33 Family Visiting General Information

Family visiting is a privilege earned by the inmate through successful program participation.

- Misconduct on the part of the inmate or visitor(s), violation of a law, rules, or regulation may be cause for termination of the visit.
- Family visits are restricted to the living quarters and the yard assigned for the family visit.
- Visitors shall not be permitted to leave and return during the visit.

54020.33.1 Inmate Family Visiting Eligibility

Eligibility for participation in the Family Visiting Program (FVP) is subject to the provisions of CCR Sections 3044 and 3177.

Family visiting shall be restricted as necessary to maintain order, the safety of persons, the security of institution, and required prison activities and operations, pursuant to CCR Section 3170.

54020.33.2 Inmate Applications for Family Visits

Revised April 3, 2014

Each inmate's assigned Correctional Counselor I (CC-I) is responsible for determining his/her eligibility to participate in the FVP.

Applicants shall submit their initial institutional request, on a CDC Form 1046, Family Visiting Application, to their respective CC-I.

The CC-I shall evaluate the following areas of specific interest:

- Escape history.
- Commitment offense and behavior history to determine eligibility, pursuant to CCR Section 3177(b) (1).
- Current case factors to determine eligibility pursuant to CCR Section 3177(d).

If the CC-I finds that based on criteria, the inmate is ineligible; they shall annotate specific reasons for denial on the CDC Form 1046 and in SOMS under "Inmate Case Notes". If one or more of the above factors are present and the CC-I cannot readily make a determination for eligibility, a case conference with the CC-II and/or the Facility Captain shall be held to determine eligibility. If necessary, the case shall be referred to a classification committee for approval or disapproval.

Upon review and approval, the CC-I shall complete a CDC Form 128 B noting the approval and/or restrictions. Forward a copy to the family visiting coordinator, and record the results in SOMS. After the initial approval, all subsequent requests shall be submitted on a CDC Form 1046, Family Visiting Application, directly to the family visiting coordinator.

Proof of marriage or registered domestic partnership shall be established by the family visiting coordinator. A certified copy of the marriage certificate or Certificate of Registered Domestic Partnership, issued by the Secretary of State, shall be presented to the coordinator prior to each visit.

Family visits shall be scheduled with specified family members as defined in Section 3000 of the Title 15. Once an application is submitted, no changes or substitutions of visitors shall be permitted.

54020.33.3 Requests for Specific Family Visiting Dates

Inmates may request specific dates for a family visit. When applying for a specific family visiting date, inmates shall submit two alternate dates.

A reasonable effort shall be made to accommodate the inmate's preference; however, no scheduled family visit shall be canceled to accommodate a preferred date request.

If all requested dates are filled, the next available date will be determined by the family visiting coordinator and offered to the inmate.

54020.33.4 Notification of Scheduled Family Visiting Dates

Revised April 3, 2014

A SOMS Notice Family Visiting Inmate Notification, shall be provided to the inmate upon scheduling of family visiting dates.

- It shall be the inmate's responsibility to return the signed form to the family visiting coordinator within ten working days to secure the dates.
- Exchange of family visiting dates shall not be permitted.

54020.33.5 Visiting Status Changes

Any disciplinary or classification committee action that restricts, suspends, or denies an inmate's regular visiting, shall also apply to participation in the FVP for the duration of the imposed sanction.

54020.33.6 Inmates on Non-Contact Visiting Status

Inmates on the FVP list, who are placed on temporary non-contact visiting status as a result of pending disciplinary charges and/or classification committee action, shall not be permitted to participate in the FVP until the pending charges or classification committee action that led to the restricted status is resolved.

The inmate's name shall remain on the list until all the charges and/or committee actions are resolved.

If an inmate's family visit is canceled due to pending disciplinary and/or classification action and the inmate is found not guilty, the visit shall be rescheduled on the first available date.

54020.33.7 Cancellation of a Family Visit

During emergency situations, the family visiting coordinator shall make a reasonable effort to notify the family of the cancellation of the family visit.

54020.33.8 Processing Inmates for Family Visiting

Inmates shall present their CDCR identification card to the family visiting coordinator, report to a designated area for inspection of their property, and submit to an unclothed body search.

Inmates shall submit urine samples as ordered by the family visiting coordinator.

The family visiting coordinator shall complete a CDC Form 1070, Family Visit Inmate Property Inventory- Male Inmate Items/1070-A, Female Inmate Items, as appropriate.

The inmate shall be escorted to the proper family visiting unit.

Inmates shall be authorized to bring the following items into a family visit:

- Two changes of underwear.
- Toothbrush.
- Safety razor.
- Items in accordance with this Article.

The family visiting coordinator, or staff, shall provide a brief orientation of the unit to the occupants.

54020.33.9 Urinalysis

Inmates participating in the FVP shall, at minimum, submit to a urinalysis upon completion of the visit. Refusal to submit to a urinalysis shall result in disciplinary action; visit cancellation, and removal from the FVP by classification committee action.

54020.33.10 Family Member Participation

Revised September 25, 2007

Participation in the FVP is restricted to the inmate's immediate family members including registered domestic partner.

- A certified copy of the marriage certificate shall be presented to the family visiting coordinator prior to each visit by the inmate's spouse.
- A certified copy of the Certificate of Registered Domestic Partnership, issued by the Secretary of State, shall be presented to the family visiting coordinator prior to each visit by a registered domestic partner of an inmate.

54020.33.11 Minor's Participation

Unescorted minors shall not be permitted to participate in the FVP, except as authorized by the institution head or designee.

Notarized, written approval of the parent or legal guardian is required when a minor accompanies an adult who is not the parent or legal guardian of the minor.

The approval shall specify by name, the approved family member who is authorized to chaperone the minor and the specific date of each family visit authorized for the minor's attendance.

Adult children of the inmate, 18 years of age or older, shall present their birth certificate and a valid form of identification prior to each family visit.

54020.33.12 Standby Family Visits

Standby family visits are not authorized.

54020.33.13 Family Visiting Length and Visitor Reporting Requirements

Institutions shall require family visitors to check-in at the visitor processing area prior to 11:00 a.m. on the day of the visit.

- Family visitors shall report to the visitor processing area at the time designated by the institution.
- Visitors failing to report to the visitor processing area by 11:00 a.m. without the notification and approval of the family visiting coordinator are subject to cancellation of the visit and suspension of FVP privileges for six months.

Inmates and visitors shall be permitted to spend approximately 46 consecutive hours in the family visiting units.

54020.33.14 Processing of Visitors for Family Visiting

Visitors shall report to the visitor-processing center. All visitors shall be searched in accordance with this Section. All personal articles shall be inspected. Those items that cannot be visually or manually inspected shall be x-rayed or disallowed.

The family visiting coordinator shall transport the visitors and their property in a state vehicle to their respective family visiting units when necessary.

54020.33.15 Authorized Property for Family Visiting

Revised September 25, 2007

Visitors are authorized to possess the following items while participating in the family-visiting program:

- One bag of clothing per visitor; no suitcases are permitted.
 - Clothing shall be in paper, plastic, or fabric bags.
- Basic personal hygiene and cosmetic items in the amount necessary for the length of the family visit.
 - No aerosol containers.
- Disposable diapers only.
- Children's toys.
 - Simple games, coloring books, crayons, or pencils (as authorized by the institution).
- Locker key.
- Prescribed medications in accordance with this Article.
- Prescribed birth control pills.
- A spouse or registered domestic partner shall be permitted to bring in a maximum of ten commercially sealed condoms per visit.
 - Condoms in unsealed packaging shall not be permitted into the institution.
 - All unused condoms shall be retained in their sealed packaging and taken from the institution by the visiting spouse or registered domestic partner.
 - Under no circumstances shall an inmate be permitted to possess condoms outside of the family visiting quarters.

54020.33.16 Food for Family Visiting

Revised May 10, 2010

Inmates participating in the FVP shall be required to purchase all food for the visitor and themselves with funds from their trust account. A minimum of two meals per day, per person, shall be purchased prior to commencement of the family visit.

Family Visiting Food Menu

Each institution shall maintain a family-visiting menu from which to choose. The family visiting menu shall provide the following food items:

- Minimum of five, maximum of ten, breakfast entrees.
- Minimum of five, maximum of ten, lunch entrees.
- Minimum of five, maximum of ten, dinner entrees.
- Beverages, including bottled water, milk, and soda.
- Fresh fruit.
- Maximum of ten miscellaneous items.

Visitors with infants may be allowed the following items:

- Powdered or bottled formula in vendor-sealed containers.
- Baby food in vendor-sealed jars.

Medically Prescribed Diets

Visitors shall be allowed to bring medically prescribed food items to a family visit under the following conditions:

- The visitor shall provide a physician's statement to the family visiting coordinator, which includes a description of the diet, and describes why the diet must be continued during the visit.
- All food items must be vendor-sealed with recognizable labels.

If an inmate is being supplied a nourishment bag and/or food supplements ordered by a physician or dentist, the inmate shall be provided with the prescribed dietary additions during the visit.

Funds for FVP Meals

Inmates shall submit a completed FVP menu form with a CDC Form 193, Trust Account Withdrawal Order, authorizing a charge to the inmate's trust account, to the family visiting coordinator at least three weeks prior to the visit.

At least two weeks prior to the visit, a copy of CDC Form 193 shall be delivered to the trust office by the family visiting coordinator. If sufficient funds are not available in the inmate's trust account, the family visiting coordinator shall inform the inmate that the scheduled visit has been canceled.

Funds sent to an inmate's trust account specifically designated for family visit food item and accompanied by a completed, signed CDC Form 1839, Exemption of Family Visit/Temporary Community Leave Funds from Restitution Fines/Orders, shall be exempt from restitution fines or orders.

Processing of Food Order

On the day of the visit, the family visiting coordinator shall facilitate the delivery of the food order to the visiting units at the commencement of the visit.

Unclaimed Food Items

If a family visit is canceled due to institution operations after the purchase of a food order, the inmate may request reimbursement to their trust account for the amount of the food order.

Reimbursement of trust account funds shall be limited to family visit cancellations due to institutional actions such as:

- Suspension of the FVP due to institution emergency.
- A disciplinary hearing finding of not guilty after a charge of misconduct which restricted family visiting privileges.

Such reimbursement is subject to the provisions of DOM Chapter 5, Article 53, Section 54100, and applicable Victim Compensation and Government Claims Board rules.

If the family visit is canceled due to the actions of the inmate and the inmate has been charged for the food, the institution shall allow person(s) designated by the inmate to claim the food within 72 hours of the cancellation.

The final disposition of food remaining unclaimed after 72 hours shall be the responsibility of the institution.

54020.33.17 Family Visitor Medication

Medication shall be retained in a secure location by designated staff. Verification of the need to possess medication shall be provided by a physician's statement.

Visitors may retain only life-sustaining, condition-stabilizing medication with the prescribing physician's written statement of its immediate need, and only in the physician's prescribed amount immediately required to sustain or stabilize the condition during the visit. Female visitors may retain their birth control pills.

Other required medications shall be distributed to the visitor at prescribed times by staff designated by the institution.

Any unauthorized items may be secured in a visiting locker and retrieved at the conclusion of the visit.

54020.33.18 Family Visiting Count Procedures

Inmates in the family visiting quarters shall present themselves for count in accordance with institutional procedures. A minimum of four counts per 24-hour period shall be conducted.

Inmates who fail to present themselves for count are subject to disciplinary action and termination of the family visit.

54020.33.19 Unscheduled Inspection/Search of Family Visiting Units

Every effort shall be made to ensure the privacy of the inmate and their visitor(s). However, the safety of persons and security of the institution may require the inspection and/or search of a family visiting unit while a visit is in progress.

The watch commander has the authority to order a search/inspection when the need arises. The watch commander and/or visiting supervisor shall be responsible to ensure that the search/inspection is conducted in a courteous and professional manner.

54020.33.20 Condition and Cleanliness of Family Visiting Units

Each inmate shall be responsible for the care and cleanliness of the family visiting unit during a visit.

Before and after each family visit, the family visiting coordinator and each inmate scheduled to visit, shall conduct a detailed inspection of their assigned unit to verify the unit's condition, cleanliness, and contents. A CDC Form 1069, Family Visiting Inventory, shall be completed by the family visiting coordinator.

Each inmate shall be subject to disciplinary action, which may include suspension from participation in the FVP, for any willful damage of the unit and/or furnishings or for failure to maintain the cleanliness of the FVP unit. Inmates and/or visitors may be excluded from the FVP for willful damage of the family visiting unit. Prior to each family visit, the inmate shall submit a completed CDC Form 193.

Each family visiting unit shall be thoroughly cleaned by the occupants prior to the conclusion of each visit. Cleaning materials and equipment shall be provided by the institution.

54020.34 Appeals Related to Visiting

Revised May 10, 2010

Visitors who wish to discuss visiting-related issues are encouraged to contact the visiting supervisor for resolution. Interviews shall be conducted or scheduled at the earliest opportunity. Visitors and/or inmates may register

complaints/appeals regarding visiting through procedures contained in CCR Section 3179 and DOM Chapter 5, Article 53.

54020.35 Transfer of Visiting Records

Revised April 3, 2014

The inmate's visiting file shall be forwarded in accordance with DOM Chapter 7, Article 3.

54020.36 Revisions

The Director, Division of Adult Institutions, or designee shall ensure that this Article is accurate and current.

ARTICLE 43 — INMATE PROPERTY

Revised December 30, 2005

54030.1 Policy

Inmates shall be permitted to possess in their quarters/living areas, state-issued and authorized personal property as established in the Authorized Personal Property Schedule (APPS), located in Appendix A, and based upon criteria delineated in Section 54030.7. The APPS is the primary reference for allowable inmate property and identifies limitations to the number of items allowed, dimension restrictions, if applicable, cost/value limitations, etc. The APPS standardizes allowable inmate property departmentwide based upon assigned Privilege Group and/or assigned security level and/or institution mission, constitutional and legal mandates, and gender considerations. Any requests to add or delete items from the APPS must be forwarded to the Deputy Director, Division of Adult Institutions (DAI), for review and approval prior to implementation. Approved modifications shall be reflected in the institution's local Operational Procedure regarding Inmate Property. The possession of personal property is a privilege and is subject to conditions and restrictions established in California Code of Regulations (CCR) Sections 3044, 3314, and 3315.

Inmates may not exchange, borrow, loan, give away, or convey personal property to or from other inmates.

Note: As a result of the standardization of allowable inmate property, some items are no longer permissible based on the APPS. Non-clear case appliances currently possessed by inmates shall be allowed to be retained until no longer operational. Inmates shall be allowed to retain other items of personal property that are no longer authorized until either transferred or for a period of up to one year after which time they will be considered disapproved property and disposed of per Section 54030.12.2, Processing Disapproved Property.

The Authorized Personal Property Schedule (APPS) is removed from this article and relocated to Appendix A. The APPS can be accessed at the following link:

[Authorized Personal Property Schedule \(APPS\) \(Rev. 4/1/14\)](#)

54030.2 Purpose

This Section establishes inmate personal property volume limits; describes the forms necessary for the processing of property; establishes liability and methods of acquisition of personal property; lists approval criteria, and describes the approval process for vendors; provides for acquisition of religious items, and the disposal of contraband; establishes protocols for the handling of inmate personal property during transfer, extradition, escape, discharge, and upon death in custody. This Section also establishes a standardized list of allowable personal property items in the form of the APPS, based upon privilege group, and/or assigned security level, and/or institution mission, and a method for institutions to obtain exemptions to the standardized list.

54030.3 Responsibility

The institution head shall administer this policy within their respective institutions/facilities.

Associate Warden Operations

The Associate Warden, Operations, shall implement and monitor the operation of this procedure.

54030.4 Volume

The combined volume of state-issued and authorized personal property shall not exceed six cubic feet, except as specifically allowed in Section 54030.10.

54030.5 Required Forms

Revised July 22, 2013

Departmental employees involved in the handling of an inmate's property shall document such involvement on the following CDC forms as appropriate:

CDC Form 104, Property and Cash Receipt-Arrival: A CDCR Form 104 shall be completed by Reception Center staff upon receipt of new arrivals. The CDCR Form 104 is used to document an inmate's cash, personal securities, and property, and is used to document the proper disposition of unissued property and inmate funds.

CDC Form 143, Property Transfer Receipt: A CDC Form 143 shall be required to document the number of containers/boxes of personal property an inmate is transferring with and the progress of containers/boxes in transit. The CDC Form 143 may be used to identify multiple inmates with multiple boxes of property (Bill of Lading).

CDC Form 160-H, Inmate Property Control Card: A CDC Form 160-H shall be required to record and maintain a record of all registerable property and its value. The CDC Form 160-H provides accountability to discourage theft and bartering of property of significant value or security interest (e.g., television, radio, handicraft tools, etc.).

CDC Form 1083 Inmate Property Inventory: A CDC Form 1083 (male or female) shall be completed when there is a need to inventory an inmate's property (e.g., Administrative Segregation Unit [ASU] placement, inter-institutional transfer, Out to Medical (OTM), Out to Court (OTC), extradition, property control, etc.), to ensure all property is accounted for and to provide a vehicle for the evaluation of inmate property claims. The CDC Form 1083 is the only acceptable document for this purpose.

54030.6 Liability

In permitting inmates to possess items of personal property while they are incarcerated, the Department does not accept liability for the theft, loss, damage, or destruction of such property resulting from the intentional or careless act or activities or riotous behavior of any inmate(s). The Department does not accept liability for the loss or destruction of personal property in the inmate's possession or control at the time of any willful act by the inmate, such as escape, which exposes such property to loss or theft before it can be recovered and controlled by staff.

Correctional staff shall assume responsibility for an inmate's property upon notice that an inmate is being retained elsewhere by taking control of that inmate's property. If the property cannot be secured, as in a double occupied cell or dormitory, the property shall be removed and stored in a secured area.

Normally upon notification of the inmate being retained elsewhere, but within 24 hours, the inmate's property shall be inventoried, packaged for transfer, and placed in a secure area. A copy of the CDC Form 1083 signed by the person who inventoried the property, shall be furnished to the inmate.

The Department shall accept liability for the loss or destruction of inmate personal property when it is established that such loss or destruction results from employee action. Inmates shall utilize the inmate appeal process if unable to resolve a personal property claim with staff pursuant to Section 54100. If the issue involves a prescribed health care appliance belonging to an inmate with a documented disability, the inmate may utilize the CDC Form 1824, Reasonable Modification or Accommodation, to attempt to resolve the issue. Upon acceptance of liability, staff shall provide similar items of equal or greater value to the inmate when such items are available via donated property items consistent with Section 54100.22. If donated items are not available, monetary compensation to the inmate for such loss shall not exceed either:

- The dollar value as documented on CDC Form 160-H, Inmate Property Card.
- The cost of the item for which they have a receipt.
- The replacement value of a similar item as determined by a custody supervisor. Staff recommendations to the Victim Compensation and Government Claims Board regarding monetary reimbursement will be made accordingly.

The Department shall not assume responsibility for property abandoned by an escapee. Staff shall inventory the property as specified in these regulations and provide secure storage. The final disposition of the escapee's property shall be processed in accordance with Penal Code (PC) Sections 5062 and 5063.

54030.7 Inmate Personal Property Acquisition

Inmate personal property shall not be accepted at the front entrance gate or visiting desks. Inmates may be allowed to acquire specific items of personal property through the following methods:

Special Purchases

Facilities shall allow for inmates to purchase the below listed items utilizing funds in their inmate trust account. Special purchases of the below listed items shall not be counted as a personal property package. Special purchases must be from departmentally approved, special purchase vendors.

Facilities may submit for departmental approval, local special purchase vendors as required, to provide religious items, handicraft material, health care appliances, subscriptions to local newspapers, etc. The facility requesting departmental approval of a special purchase vendor must submit the approval request to the office of the Deputy Director, DAI, along with rationale for approval and a statement that the vendor meets the local facility's security and business requirements.

Note: The approval criteria for Personal Property Package vendors established in Section 54030.9 does not apply to special purchase vendors.

The amount charged an inmate for ordering entertainment appliances, a musical instrument, handicraft material, periodicals, or fiction books as a special purchase shall include a ten percent service charge. Service charges shall be deposited in the inmate welfare fund.

Special purchases of health care appliances, correspondence courses, nonfiction books, and legal materials are not subject to service charges.

Facilities will make available to all inmates, procedures for special purchases. Purchases of health care appliances, correspondence courses, religious items, and handicraft material require an inmate to obtain prior approval. Submission of special purchase requests shall be based on established local procedures.

Health Care Appliances, prescribed by health care staff and subject to approval by designated custody staff. Health care appliances may be purchased by third parties. All health care appliances are to be received by designated health care staff from an approved vendor and inspected by designated custody staff prior to issuance. Health care appliances are not subject to the six cubic foot property limitation or count towards the two appliance limit as described in Section 54030.7 (DOM 54030.11).

Correspondence Courses and materials subject to approval by designated custody and educational staff. Correspondence courses shall be received by designated education staff and inspected by designated custody staff prior to issuance (DOM 54030.10.3).

Legal Material, such as legal reference materials and books, legal pads, and pencils not available in the institution canteen. Legal material purchases are to be received by Receiving and Release (R&R) staff and inspected prior to issuance (DOM 54030.10.2).

Religious Items, subject to approval by designated custody staff and institutional chaplain. Religious items shall be received by the institutional chaplain and inspected by designated custody staff prior to issuance (DOM 54030.10.9).

Entertainment Appliances/Musical Instruments, as described in the APPS are to be shipped directly from a departmentally approved vendor in factory sealed packages, received by R&R staff, and inspected prior to issuance. Packages that are damaged or opened shall be refused (DOM 54030.10.6).

Books and Periodicals, purchases and subscriptions shall be submitted according to local procedures and may be purchased for an inmate by a third party. (*Note:* For purposes of this Section a departmentally approved vendor is any publisher or book store that does mail order business as outlined in CCR Section 3138(f)(1)).

Handicraft Material, restricted to inmates approved to participate in the handicraft program. Handicraft items shall be received by the handicraft manager and inspected by designated custody staff prior to issuance (DOM 54030.10.4).

54030.7.1 Personal Property Packages

Inmates may receive personal property based upon assigned privilege group as specified in Section 54030.8. Items of authorized property shall be limited to the items/categories listed in the APPS contained in Appendix A. Personal property packages shall be ordered by inmates or third parties via a departmentally approved vendor. A departmentally approved vendor may be chosen by an inmate or third party to provide items for inclusion into a personal property package. While no more than one vendor may be used per package, inmates and their correspondents will be able to choose a different vendor for subsequent personal property package purchases. Personal

property packages are limited to a 30 pound maximum weight limit and maximum dimensions of 24" x 24" x 24".

Wardens are authorized to utilize non-departmentally approved vendors for purchases of personal property packages to meet specific religious dietary needs of inmates (kosher, halal, etc.). All religious specialty foods must be consistent with the criteria and categories established in the APPS in Appendix A. Approval of religious specialty vendors shall be at the discretion of the Warden or Warden's designee (level of Associate Warden or above).

A request for a personal property package purchased from a locally approved religious specialty vendor is subject to approval by designated custody staff and the institutional chaplain. The receipt of a personal property package from a religious specialty vendor shall be counted as a regular personal property package.

Individual purchases of entertainment appliances and musical instruments by inmates using funds in their trust account or by third party shall not be counted as a personal property package unless additional items of personal property are also included.

Quarterly personal property packages may be received by inmates at any time during a quarterly period. Upon arrival of a package at an institution, designated staff shall verify the eligibility of the inmate to receive the package before issuance. Prior approval is not necessary as the arrival date of a package at an institution shall be the basis for the eligibility determination.

Facilities will make available to all inmates, procedures for the receipt of packages from approved vendors in accordance with limits set for their assigned privilege group. Facilities are responsible for ensuring that current vendor catalogs and order forms are available in the inmate library and visiting room.

When a package is received at a facility with an address insufficient to locate the inmate, staff shall exhaust all avenues of information in locating the inmate before returning the package to the sender including, but not limited to, determining whether the inmate is OTC, OTM, transferred to another institution/jurisdiction, or parole.

Issuance of inmate packages shall be as soon as possible, but not later than 15 calendar days from delivery to the institution, except during the holiday season and emergency lockdowns. For purposes of this Article, the holiday season is designated as beginning on November 15 and ending on January 15.

Institutions may temporarily suspend delivery of inmate packages to all portions of the institution during emergency lockdowns.

Upon resumption of normal operations, inmates that are released from lockdown status, housed in an institution/facility experiencing a partial lockdown, shall continue to receive packages within 15 calendar days.

Issuance of packages to inmates affected by lockdown status may be temporarily suspended for up to 90 calendar days (one quarter). After 90 days, issuance of previously stored packages is mandatory. A lockdown shall not result in the loss of a quarterly package.

Packages received for inmates that are on lockdown status may be temporarily stored in appropriate locations designated by the institution/facility. The institution/facility is responsible for identifying and designating adequate storage space, including emergency overflow storage as required, until such time as staff are able to issue packages.

Inmates previously affected by lockdown shall receive unissued inmate packages within 15 days after their release from lockdown status.

Institutions shall not instruct vendors to stop shipment of packages unless authorized by the Deputy Director, DAI. Upon receiving authorization from the Deputy Director, DAI, the institution shall be responsible for notification of the inmate population. The inmates shall be responsible for notification of family or other correspondents.

Packages shall not be returned based solely on the existence of a lockdown.

54030.7.2 Service Charge

The amount charged an inmate for a self-purchased personal property package order shall include normal taxes and a ten percent service charge. Service charges shall be deposited in the inmate welfare fund. This service charge is exclusive of such costs as state sales tax, freight, and handling. Personal property packages sent from third parties via approved vendor shall not be subject to any service charge.

54030.8 Personal Property Package Criteria

Items of personal property may be purchased from approved vendors by third parties of the inmate or purchased directly by the inmate. Authorized items, appliances, or food may be acquired by utilization of this package procedure

consistent with the APPS in Section 54030.17. The determining factor in the number of packages an inmate may receive per year is the privilege group in which the inmate is placed in accordance with the work/training program.

Inmates may obtain approved appliances and/or musical instruments from approved vendors by having them ordered by correspondents or using the funds in their inmate trust account. A limit of two appliances applies to all inmates based upon the following definition, with the exception of female hair care appliances as described in Section 54030.10.6.

Note: For purposes of this Article, an appliance is defined as:

- 1) Any electrical appliance, (excluding prescribed medical appliances and battery rechargers) that relies on institution/facility power resources to operate (all electrical appliances are subject to the two appliance limit).
- 2) Any audio/visual entertainment appliances, such as radios, televisions, cassette/disk players, etc. (all audio/visual appliances are subject to the two-appliance limit, regardless of electric or battery operated power source.)
- 3) Battery operated, non-entertainment appliances that do not rely on institution/facility power resources (battery operated, non-entertainment appliances are not subject to the two-appliance limit).

Items shall be shipped to the inmate's respective institution/facility by the approved vendor in a factory sealed container.

It is the responsibility of the inmate and/or the third party to ensure that packages are ordered in advance to ensure adequate delivery time.

The year shall begin January 1 and end on December 31. The quarters are:

1st - January 1 through March 31.

2nd - April 1 through June 30.

3rd - July 1 through September 30.

4th - October 1 through December 31.

Privilege Group A/ Privilege Group B

Inmates in Privilege Group A & B shall be allowed four packages per year (one per quarter) not to exceed 30 pounds each.

Privilege Group C

Inmates in Privilege Group C shall not be allowed a Personal Property Package. Inmates prohibited from receiving a package resulting from recent placement into Privilege Group C shall not be allowed to retain a package which was ordered prior to Privilege Group C placement. Disallowed packages shall be disposed of pursuant to Section 54030.12.2.

Privilege Group D

Inmates in Privilege Group D, including those inmates housed in ASU/Security Housing Unit (SHU) and Psychiatric Services Unit (PSU) shall be permitted to acquire one personal property package per year not to exceed 30 pounds each. Eligibility to acquire a personal property package commences one year after the date of Privilege Group D assignment.

Inmates in SHU/PSU may also purchase an entertainment appliance via the Special Purchase Process. Eligibility to acquire an entertainment appliance commences one year after the date of Privilege Group D assignment.

Inmates prohibited from receiving a package as a result of ASU placement shall be allowed to retain the package in their stored personal property if the package was ordered prior to ASU placement and the inmate was otherwise qualified to receive it.

Privilege Group U

Inmates in Privilege Group U shall not be allowed a Personal Property Package.

Note: The local Inter-Disciplinary Treatment Team (IDTT) may further restrict or allow additional authorized personal property on a case-by-case basis above that allowed by the inmate's assigned Privilege Group.

54030.9 Personal Property Package Vendor Approval

Vendors for Personal Property Packages, except those vendors approved locally for special religious foods as provided for in Section 54030.7.1, must receive Department approval prior to providing services to institutions/facilities.

The Deputy Director, DAI, has the authority to establish vendor approval guidelines for Personal Property Packages and to add or remove vendors from the approved list.

Vendors must submit a completed vendor application package to the Deputy Director, DAI. Requests for approval must include all additional materials and catalogs of items provided with prices. The vendor name and contact information will be provided to the institutions/facilities upon approval.

It is the intent of the Department to ensure Inmate Package Program catalog items are priced competitively with common retailers in major markets.

The CDCR reserves the right to withdraw any vendor approval subject to 30 calendar day's written notice to the vendor. However, any agreement can be immediately terminated for cause. The term "for cause" shall mean that the vendor fails to meet the terms, conditions, and/or responsibilities of an agreement. In this instance, the agreement termination shall be effective as of the date indicated on the State's notification to the vendor.

54030.9.1 Personal Property Package Vendor Criteria

Vendors submitting requests for Department approval shall meet the following minimum requirements:

1. All merchandise offered for sale by the vendor is subject to price comparison. Price comparison shall be conducted by the CDCR during initial vendor approval and throughout the length of any agreement or contract based upon advertised catalog prices.

Vendor prices will be compared with non-sale prices on an identical product for product basis at major retailers in the following major California markets:

- Fresno
- Los Angeles
- Sacramento
- San Diego

A resulting median price for the specific product will be identified. The vendor's advertised catalog price shall not exceed the median price by more than ten percent.

If identical items are not located during the initial price comparison in the major California markets identified above, the CDCR may extend the price comparison to include other states, if necessary.

If identical items are not located during an extended price comparison, similar items may be relied on as determined by the CDCR. The basis for any price comparison shall be the sole discretion of the CDCR.

The vendor will be notified if the prices of merchandise are in excess of the ten percent limit. If prices are determined by the CDCR to be excessive, the vendor will be requested to reduce prices within the acceptable price range as determined by the CDCR or remove the item from inmate availability. Inability or unwillingness of or by the vendor to comply with a CDCR price reduction/removal request within 30 calendar days of notification shall be cause for termination of any agreement or contract and shall result in disapproval of the vendor to provide services.

2. Vendor shall maintain insurance with Commercial General Liability with Warehouse Legal Liability for a minimum of \$1,000,000 per occurrence.
3. Vendor shall possess a valid California city or county business license (if applicable) or if a corporation located within the State of California, incorporation documents or letter from the Secretary of State or if not a California business, an affidavit that business is in good standing with the state, province, or country in which business is headquartered.
4. Vendor must provide a self-certified Inventory Report showing a minimum of \$250,000 worth (advertised retail value) of merchandise on premises (subject to physical verification by the CDCR).
5. All merchandise purchased by a single order must be packaged in one single container. Multiple boxes are not permitted.
6. Must provide copies of CDCR approved catalogs and order forms, free of charge, to institutions/facilities. Catalog must indicate prices for all items and expiration dates of prices. Prices advertised in catalogs must have a guaranteed minimum term of 12 months.
7. Upon vendor approval, all catalogs, order forms, and web sites must prominently display the following disclaimer:

The California Department of Corrections and Rehabilitation (CDCR) has approved this independent vendor to sell merchandise to inmates and the public. CDCR's brief review and approval of this vendor was strictly limited to minimum security requirements and general business intent. The CDCR is not affiliated with this vendor and does not guarantee that the vendor will fulfill any obligations, perform as expected, nor permanently remain in business, nor does the CDCR guarantee the vendor's products in any way. Any purchases from this vendor are at the buyer's sole risk. The CDCR assumes no liability whatsoever for such purchases, nor any aspect thereof. Any issues or disputes regarding the vendor's products are the sole responsibility of the buyer and/or the vendor, and the CDCR is not obligated to mediate or resolve any such disputes.

8. CDCR approved catalog must only present items authorized for purchase by CDCR inmates based upon Privilege Group.
9. Catalog must identify items allowable by Privilege Group as identified in Appendix A.
10. Vendor must require customer to select a Privilege Group prior to completion of a purchase. The selection of a Privilege Group shall act to restrict the purchase of merchandise not allowed by the selected Privilege Group. Refer to the APPS located in Appendix A for more information.
11. Items listed in catalogs must regularly be in stock. Catalogs and order forms shall clearly indicate that back orders or substitutions shall not be permitted. In the event that an item is out of stock, a refund will be issued to the purchaser.
12. Two copies of the purchase receipt or shipping invoice shall be included in each package and a copy shall be forwarded to the purchaser if purchased by a non-inmate. (*E-mail confirmation is acceptable for orders placed over the Internet.*)
13. Maximum allowable package weight is 30 pounds. This weight limit includes merchandise, packing material, and packaging (tare weight). Packages in excess of 30 pounds shall not be accepted and returned at the vendor's expense.
14. The catalogs and web sites must include the shipping weight of each individual item and a method of calculating the total gross weight of the inmate package as customers are limited to a gross weight of 30 pounds or less.
15. Maximum allowable package dimensions are 24" x 24" x 24".
16. All catalogs and web sites must clearly inform customer of the 30 pound weight limit.
17. All packages must be labeled either Privilege Group A/B or Privilege Group D based upon the contents of the package. Privilege Group D packages may only contain items authorized for Privilege Group D.
18. The vendor's return policy must be clearly stated in catalogs and on web sites. The CDCR shall not be a party in any dispute between the vendor or the purchaser.
19. The vendor is responsible to correct any errors in package contents. When an incorrect item is received in a vendor package, CDCR staff shall verify and may contact the vendor to request a United Parcel Service call tag in order to ship the incorrect item back to the vendor. This does not preclude individual facilities from alternative methods of resolution.
20. Must restrict knowledge of identities of both package recipients and purchasers from staff responsible for assembling packages.
21. Vendor staff responsible for receiving orders, assigning purchase order numbers, and/or secure numerical identifiers shall not be allowed to assemble packages.
22. Vendors must conduct pre-employment urinalysis testing on all employees and provide evidence of such on demand.
23. Vendors must provide names and identification information of all staff on demand. Current state driver's licenses are accepted as valid identification.
24. Vendors employing staff possessing felony convictions less than 10 years old shall be disqualified. Vendors employing staff possessing drug-related arrests or convictions less than 5 years old shall be disqualified.
25. Vendors must be willing to submit to, and cooperate with, frequent CDCR inspections without notice.
26. Vendors' receiving, packaging, and shipping areas must be monitored by a Closed Circuit Television System. Video tapes or other medium providing a record of activities in packaging and shipping areas must be maintained for a minimum of 30 days. All videos must provide a date and time stamp and the ability to identify vendor staff.
27. Vendors must employ the security measures described in Section 54030.9.2.
28. Packages must be sealed with tamper resistant tape.
29. Approval and use of vendors must result in no expense to the CDCR.
30. Vendors must be capable of supplying packages within no more than 10 days after purchase. Occasional delays in shipments are understood and will not be reason for disapproval of a vendor.
31. Institution personnel shall maintain a verified copy of the shipping invoice in order to assist in the resolution of any disputes between the vendor and the purchaser. However, all order disputes are solely

between the purchaser and the vendor and must be settled without additional involvement of the CDCR.

54030.9.2 Shipping Security

Prior to each shipment of packages, the vendor shall provide the receiving institution a shipping manifest containing inmate names, CDC numbers, and a list of secure numerical identifiers (confidential purchase order numbers) that corresponds to each package shipped. The shipping manifest shall be sent to the institution via e-mail or facsimile (FAX) as determined by the institution. Under no circumstances shall the shipping manifest accompany the shipment of packages.

Packages shall display only the secure numerical identifier. Neither the inmate's name, CDC number, shipping manifest containing secure numerical identifiers, nor any other inmate identifying information may be shipped with a package. Standard shipping labels may be used, but shall only provide the vendors return address, the institution's address, and the secure numeric identifier. The numeric identifier and inmate's Privilege Group shall be clearly displayed on each package to facilitate comparison with the shipping manifest.

54030.10 Property Classifications/Restrictions

The following subsection gives direction on the control, possession, recording, and disposition of inmate property.

54030.10.1 Food and Hygiene

Inmates may possess food and personal care/hygiene items in their quarters/living area consistent with their privilege group unless otherwise prohibited by departmental policy as outlined in CCR Section 3190(a). The maximum amount of food and personal care/hygiene items an inmate may possess shall not exceed the amount which can be purchased through the canteen by the inmate in one month, as required by CCR Section 3094 and as described in CCR Section 3190(e). Inmates shall be required to maintain their purchase receipt to verify purchases until such items are expended. Possession of canteen items (personal hygiene and other miscellaneous items), except for consumable food items, shall be consistent with the six cubic foot limitation.

Inmates shall be permitted to temporarily exceed the six cubic foot volume limit by the amount of the current month's purchase of consumable food items verifiable by the current month's canteen receipt. By the following month's canteen draw, the inmate is expected to be within established volume limits.

In the event the inmate does not comply with these provisions for consumable food items (canteen in excess of the one month standard as described in CCR Section 3094 or exceeds the temporary excess allowed for consumable food items or is not able to produce a receipt for items) as described above, the inmate will be required to dispose of property of his/her choice pursuant to Section 54030.12.2 to become compliant with the volume limitation policy.

54030.10.2 Legal Materials

Inmates may possess legal materials/documents and/or books in their quarters/living area consistent with the six cubic foot limitations, except as otherwise set forth in this Section. In addition to the six cubic feet limitation of authorized property as set forth in this Article, inmates may possess up to one cubic foot of legal materials/documents related to their active cases in their assigned quarters/living area. Inmates may request that the institution/facility securely store excess legal materials/documents related to their active case(s) when such materials/documents exceed this one cubic foot additional allowance. Only that material in excess of the additional one cubic foot shall be stored. *Note:* An active case may be defined as any legal action, cause, suit, writ, etc. that an inmate is currently involved in writing or responding to.

A suitable area as designated by the Warden shall be reserved for the storage of excess legal material. A log record of material(s) stored showing inmate's name, number, date of storage, and the materials receipt and removal shall be required.

The material shall be placed in a box and sealed at the time of storage with the initials of the inmate and staff member involved. When the material is removed, the inmate shall acknowledge its removal by signing the log record.

Upon an inmate's request, staff shall schedule appointments for the inmates to have access to their stored materials. Inmates shall have access to their stored legal material one time per week, if they have an active case.

Inmates assigned to ASU/SHU/PSU shall provide the necessary identifying information for staff to access stored legal material. The inmate is responsible for organizing stored legal material in a manner that allows staff to identify a specific box for exchange.

Legal books shall not be stored by the institution/facility. Inmates who require access to the excess active case legal materials/documents from secured storage may exchange such documents for active case materials/documents in their quarters/living area upon written request to the property coordinator or designee on a box-for-box basis while adhering to the limitations set forth in this Section. Legal materials/documents and books that do not pertain to the inmate's active case(s) and are in excess of the allowable property limitation shall be disposed of pursuant to Section 54030.12.2.

54030.10.3 Correspondence Course Materials

Inmates may possess correspondence course materials, including textbooks, in their quarters/living area as approved by the Supervisor of Correctional Education Programs (SCEP) or designee and designated custody staff consistent within the six cubic feet limitation. Correspondence courses requiring tools, construction kits, or other materials that may pose a threat to the institution's security or the safety of persons shall not be allowed. The SCEP or designee shall provide the inmate with a CDC Form 128B, General-Chrono, indicating approval of the course and materials supplied. The inmate must display this chrono conspicuously in their quarters/living area.

54030.10.4 Inmate Handicraft

Inmates who participate in handicraft programs may possess in their quarters/living area, handicraft articles, and written and artistic material produced or created by that inmate, consistent with departmental regulations and within the six cubic feet limitation. Facilities may designate additional storage for handicraft articles and materials based upon availability of space. Excess handicraft items, articles, or materials in an inmate's possession shall be confiscated and disposed of in accordance with Section 54030.12.2.

Inmate donation of handicraft items, articles, tools, and materials to the institution is subject to provisions of Section 101050.14. Such articles shall be controlled by the handicraft manager, become the property of the State, and shall be utilized in the same manner as other State owned tools and materials.

54030.10.5 Education Materials

In addition to the six cubic feet limitation of authorized property as set forth in this Article, inmates who are assigned to institution Academic or Vocational Educational Programs shall be allowed to possess State provided textbooks/materials necessary to complete their education requirements in their quarters/living area. Inmates must sign a CDC Form 193, Trust Account Withdrawal, for replacement costs prior to being issued the material. Inmates shall have posted in their cell a CDC 128-B signed by the appropriate instructor indicating the inmate is authorized to possess the listed texts and/or materials. Any course textbooks furnished by the State shall be returned to the Education Department at the end of the course or upon the inmate's transfer or parole. State supplies not returned in serviceable condition will result in the Trust Account Withdrawal form being submitted for the replacement value. The Supervisor of Correctional Education Programs shall be responsible for determination of the replacement value of educational supplies.

54030.10.6 Appliances / Musical Instruments

Privilege Groups A and B

Inmates assigned to Privilege Group A or B may possess up to two appliances, with the exception of female hair care appliances, as indicated in Section 54030.8.

Based upon inmate grooming standards as described in CCR Section 3062(f) female inmates may possess up to three appliances when one of the appliances is a hair care appliance.

Note: In order to facilitate female hair care needs, female institutions shall maintain a hairdryer in each housing unit for inmate use.

One musical instrument with case may be substituted as one of the two appliances in their quarters/living area consistent with the six cubic foot limitations. When an inmate assigned to Privilege Group A or B is placed in Administrative Segregation, any appliances and/or musical instrument shall be inventoried and stored pending the outcome of ASU placement. If the inmate is released back to the general population and maintains their Privilege Group A or B status, the appliance(s) and/or musical instrument shall be returned to the inmate. If the inmate receives a SHU/PSU term, the inmate shall be required to dispose of the appliance(s) and/or musical instrument in accordance with Section 54030.12.2.

Note: Inmates housed at conservation camps shall not possess personal television sets.

Privilege Groups C and U

Inmates assigned to Privilege Group C or U may not possess any appliances (i.e., television, radio, CD player, etc.) or musical instruments, nor may they purchase any electrical entertainment or battery-operated type of appliances.

When an inmate is placed on Privilege Group C via a classification committee action, the inmate shall be required to dispose of any appliance(s) and/or musical instrument in accordance with Section 54030.12.2.

Privilege Group D (ASU/SHU/PSU)

Inmates assigned to ASU may not possess any appliances or musical instruments.

Inmates assigned to SHU/PSU may possess and/or acquire through the inmate personal property package process or Special Purchase process, one entertainment appliance as outlined above and as identified in the APPS located in Appendix A. Eligibility to receive an entertainment appliance commences one year after date of Privilege Group D assignment. Inmates assigned to Privilege Group D may not possess a musical instrument.

54030.10.6.1 Additional Appliance/Musical Instrument Requirements

Appliances may be AC plug-in or may use an AC/DC adapter. Battery operated non-entertainment appliances shall not be counted against the two-appliance limit. Inmates may purchase and use rechargeable batteries with a recharger unit. Recharger units and AC/DC adapters are considered appliance accessories and shall not be counted as a separate appliance. Inmates shall not possess or use a remote control device. Entertainment appliances with internal mechanisms for recording, downloading, or transmitting shall not be allowed. All appliances, including entertainment appliances, shall be portable models. Entertainment appliances with antennas shall be built in. Entertainment appliances shall have earphones or earplugs that shall be worn on the head or in the ear when the appliance is in use within the housing units.

All appliances shall have the inmate's name and number engraved on the back and be sealed by staff. Staff shall make the necessary entries on the inmate's CDC Form 160-H before releasing the property to the inmate. Any inmate who breaks or tampers with the seal may be subject to disciplinary action and confiscation of the item. Inmates that are found guilty of breaking or tampering with the seals of any personal appliance may have the appliance confiscated and disposed of in accordance with Section 54030.12.2.

Inmates ordering new or replacement appliances shall be required to purchase clear-case appliances. Non-clear case appliances shall be eliminated through attrition.

Musical instruments and case combined dimensions shall not exceed 46" x 24" x 12".

54030.10.6.2 Repair of Appliances

In the event of a malfunctioning appliance, the inmate shall be responsible for returning the unit to R&R for shipment to an authorized repair vendor or institution vocational repair shop, if available. The inmate shall have a minimum of \$50 on their trust account for estimates only. If the unit costs more to repair, the inmate shall be contacted regarding the cost. The inmate must forward the necessary funds to the vendor prior to repair.

Inmates are prohibited from keeping inoperable appliances in their possession. Appliances that cannot be repaired or for which the inmate has insufficient funds for repair shall be disposed of per Section 54030.12.2.

54030.10.7 Clear Technology

Inmates shall be restricted to only clear personal care/hygiene items encased in clear containers or tubing based upon availability. An exemption from using clear personal care/hygiene items encased in clear containers or tubing shall only be authorized by the institution's health care manager or chief medical officer and only when an exemption is deemed medically necessary by a physician. Such exemption shall not exceed one year. If the condition persists, another exemption request shall be submitted by the inmate.

Inmates ordering new or replacement appliances shall be required to purchase clear case appliances. Inmates currently possessing non-clear case appliances shall be allowed to keep those appliances until they are no longer functioning. Non-functioning, non-clear case appliances are considered contraband and shall be disposed of according to Section 54030.12.2.

54030.10.8 Personal Clothing

Inmates shall not be permitted any personal clothing items other than those listed in the APPS located in Appendix A. No advertising, letters, or pictures depicting or reasonably associated with alcohol, gangs, profanity, sex, nudity, weapons, drugs, or drug paraphernalia shall be authorized.

54030.10.9 Religious Items

Personal religious items may be authorized as described in, but not limited to, Section 101060. Inmates may possess authorized religious items consistent within the six cubic feet limitation.

Religious items are subject to approval by designated custody staff and the institutional chaplain. Custody staff shall consult institutional chaplains and spiritual leaders whenever possible when considering the disapproval of religious items.

Procedures

Institutional chaplains shall be responsible for approving all inmate requests for spiritual items. Spiritual packages must be received from an approved, recognized vendor and must be received in one of the following ways:

Purchased by a third party from an approved vendor.

Purchased by the inmate from an approved vendor.

Items arriving via family or friends, or items shipped from other than approved, recognized vendors, shall be disposed of in accordance with Section 54030.12.2.

54030.10.10 Membership Cards

Inmates shall not possess any membership cards, identification cards, or service-type cards other than those issued by the Department.

54030.10.11 Contraband

Anything not permitted or in excess of the maximum quantity permitted or no longer functioning as designed or that have been modified or tampered with or which is received or obtained from an unauthorized source is contraband. Possession of contraband may result in disciplinary action and confiscation of the contraband (CCR 3006).

The inmate shall be given a written notice for any item(s) of personal and authorized State-issued property that is removed from their quarters during an inspection/search and the disposition made of such property. The notice shall also list any contraband or any breach of security noted during the inspection/search.

54030.11 Health Care Appliances

Approval for an inmate to permanently or temporarily possess or retain a health care appliance requires a clinical prescription for the appliance and shall be documented on a CDC Form 128C Medical, Psych, Dental, Chrono.

Inmates shall be allowed to retain possession of a prescribed health care appliance until a health care evaluation is performed providing that safety and security of the institution/facility will not be compromised. Health care appliances are not subject to the six cubic foot volume limitation nor count towards the two-appliance limit as described in Section 54030.8.

Approved health care appliances include durable medical equipment, assistive devices, adaptive equipment, prosthetic or orthotic appliances, or equipment or medical support equipment, which include, but are not limited to:

- Eyeglasses.
- Prosthetic Eyes.
- Dental prosthesis.
- Prosthetic limbs.
- Orthopedic braces or shoes.
- Hearing aids.
- Wheelchairs.
- Canes.

54030.11.1 Disallowance of Health Care Appliances

Following review and/or inspection of the appliance should custody supervisor determine that a significant safety or security concern appears to exist, the institution Health Care Manager, Chief Medical Officer, Chief Physician and Surgeon, or Chief Dentist, Correctional Health Services Administrator, or Physician on Call, or Medical Officer of the Day shall be consulted immediately to determine actions required to safely accommodate the affected inmate-patient's needs. Accommodation appropriate to the safety and security of the institution may include, but should not be considered limited to:

Modification of the appliance. If this alternative is chosen, equivalent, effective, alternative accommodation must be provided the inmate/patient while the original appliance is being modified.

Replacement of the appliance with an acceptable one. If this alternative is chosen, equivalent, effective, alternative accommodation must be provided the inmate/patient while the alternate appliance is being procured.

Special housing. If this alternative is chosen, and housing in a medical bed is required because of nursing care needs that would not be necessary if the

inmate/patient could be allowed an effective appliance, the inmate/patient must be seen as being housed solely on the basis of a disability.

Expedited transfer to a designated institution.

Substitution of non-medical personal services for an appliance (where Inmate Assistant programs have been established) or expedited transfer to an institution where such programs exist.

54030.12 Property Issuance

When issuing items of property to an inmate, whether originating from a special purchase or an inmate package, issuing staff are required, at a minimum, to visually observe and physically hand each item of registerable and non-registerable property to the inmate. Staff shall not be responsible for conducting an inventory of non-registerable property during the issuance process.

At the completion of the issuance process, the inmate shall verify that the property is correct as compared with the shipping invoice contained inside the package by signing the staff copy of the shipping invoice. If a discrepancy is identified, the inmate is responsible for showing the discrepancy to staff who shall note the discrepancy on the staff copy of the invoice. One copy of the invoice is retained by the institution/facility for a minimum of one year and one copy of the invoice is provided to the inmate. While resolution of discrepancies is strictly between the purchaser and the vendor, the copy of the invoice maintained by institutional staff shall serve as verification of any discrepancy claims.

54030.12.1 Property Registration

Personal property items, which are not consumable and that possess enough intrinsic value to be a significant target for theft or bartering, are considered registerable property. Registerable personal property is identified in the APPS located Appendix A.

When designated items are identified as registerable, such items must be registered under the inmate's name and number on the CDC Form 160-H, Inmate Property Control Card. Staff shall include the purchase date and purchase price, and attach a copy of the purchase receipt to the CDC Form 160-H, if available.

It is the responsibility of the inmate to account for all registerable property listed on the CDC Form 160-H. Staff shall document property inmates cannot account for on appropriate forms (CDC 128 A, CDC 115).

The inmate, in writing, shall report all registerable property that is lost, stolen, or worn-out to R&R personnel as soon as the loss or unusable wear is discovered. A description of the item(s) and the circumstances surrounding the loss shall be included in the report.

54030.12.2 Processing Disapproved Property

Unauthorized inmate personal property, including that which is altered, exceeds volume limitations, or is beyond repair, shall be disposed of in accordance with the provisions of this Section. The institution shall not store unauthorized inmate property except as provided for inmates placed in ASU as provided for in Section 54030.13.2.

Inmates shall sign the CDC Form 1083 indicating their choice of disposition and agreement to the method for disposing of their property. If the inmate makes no selection or has insufficient funds, staff shall document that fact and determine the method of disposition. Unauthorized personal property shall be disposed of as follows:

Mail the item to an address provided by the inmate via United States Postal Service (USPS) or common carrier at the inmate's expense. This option is not available for inmates with insufficient funds in their trust account.

Return the item to the sender via USPS or common carrier at the inmate's expense. This option is not available for inmates with insufficient funds in their trust account.

Note: Unopened packages received by the institution via USPS or common carrier for an inmate ineligible to receive a package, may be returned to sender at no expense.

Donate the item to a charitable organization as designated by the institution/facility.

Donate the item to the institution/facility.

Render the item useless and dispose of it according to institution/facility procedures.

Failure to provide an address of an individual willing to accept the personal property will result in the property being donated to a charitable organization, donated to the institution/facility, or render as useless and dispose of per institution/facility procedures. Inmates are not permitted to send their property to any State agency or agent of the State. Failure to comply may result in disciplinary action.

54030.13 Movement of Personal Property

The following subsection gives direction, disposition, and processing of inmate property when being transferred, placed in ASU, out-to-court, medical, or extradition.

54030.13.1 Transfers

Upon an inmate's transfer between institutions of the Department, the sending institution shall inventory the inmate's property on a CDC Form 1083. R&R staff shall account for all personal property and document the disposition of any property not allowed at the receiving institution. For purposes of inmate transport, canteen and hygiene are included within the six cubic feet of allowable property.

The APPS shall be used as the basis for determination of property decisions. Changes in an inmate's privilege group and volume limitations are addressed in the APPS located in Appendix A.

When the inmates report to R&R with their personal property, they shall be informed that any item that cannot be transported or will not be accepted at the receiving institution based upon a change to privilege group shall be disposed of by the methods outlined in Section 54030.12.2.

A signed copy of the CDC Form 1083 shall be placed in each box containing the inmate's personal property. A copy shall also be provided to the inmate and a copy retained by the sending R&R and receiving institution to facilitate the resolution of inmate property claims. The receiving institution shall document the disposition of any disallowed property items that were not identified and confiscated by the sending institution.

The CDC Form 143 shall be completed by R&R staff and a copy shall be provided to transporting staff.

All boxes/containers used to transport inmate property shall not exceed 24" x 24" x 24" maximum dimensions nor contain in excess of 30 pounds of property each.

All health care appliances belonging to an inmate shall be transported with the inmate upon transfer. Upon an inmate paroling, all health care appliances permanently issued to the inmate shall be retained and maintained by him/her. Health care appliances temporarily issued to the inmate for use during incarceration shall be retained at the institution.

**54030.13.2 Temporary Placements, Transfers, and Returns
Administrative Segregation**

Unissued authorized property for inmates on ASU status shall be inventoried by appropriate staff and stored in areas designated for property storage pending the outcome of ASU placement. Property inventory shall be completed in accordance with Section 54030.6.

Upon initial ASU placement, the institution must provide the inmate basic hygiene and writing materials, (i.e., fish kit). In addition, the inmate shall be provided access to his/her personal address book and stamps in order to facilitate access to correspondents and the courts.

If the Institution Classification Committee retains the inmate in ASU after initial ASU review, the inmate shall have access to canteen as provided for in Section 54070.6.1 based upon a schedule determined by the facility. Additionally, the inmate shall have access to all authorized personal property as determined by the APPS located Appendix A.

If the inmate is released back to the general population and maintains his/her original Privilege Group status, the personal property shall be returned to the inmate. If the inmate receives a SHU/PSU term, the inmate shall be required to dispose of all unauthorized property prior to transfer in accordance with Section 54030.12.2.

The property of inmates on temporary transfer status shall be processed as follows:

Out-To-Court

Inmates going out-to-court who are not returning the same day shall report to R&R with all of their personal property. R&R staff shall inventory and store the property until the inmate returns from court. If an inmate is paroled or discharged while on out-to-court status, all tangible property, such as clothing, appliances, and paperwork shall be stored for a period of one year. Intangible property, such as inmate funds, shall be maintained for a period of three years. If no claim is made on the property after expiration of time frames, final disposition shall be in accordance with PC Sections 5062 and 5063.

In institutions that have authorized property storage areas within the housing unit, staff from the respective unit may inventory and store the inmate's property.

Hospital/Out-Patient Housing Unit (OHU) / Correctional Treatment Center(CTC)

Inmates transferring to the hospital, OHU, or CTC who are not returning the same day shall turn in all property to the housing unit officer or R&R. The property shall be inventoried and properly stored in accordance with this Section until the inmate returns from the hospital/OHU/CTC.

Inmates going to the hospital/OHU/CTC and returning the same day shall not be required to store their property in the property room.

Inmates placed in the hospital/OHU/CTC due to accident or emergency shall have their property collected, inventoried, and stored in R&R (or other approved area) by the housing unit officer or designee.

Inmates transferring on medical and return status to other institutions shall store their property in R&R or other designated areas.

Return

Upon release/return from the hospital/OHU/CTC or special housing units, the inmate's property shall be returned. The inmate shall be provided an opportunity to sign the property inventory form acknowledging receipt of the property. Issuing staff shall also sign the property inventory form acknowledging the inmate's receipt or refusal to sign.

54030.13.3 Extradition

Inmates or parolees requiring extradition transport from any state or territory of the United States are personally responsible for the disposition of their personal property. It is the inmate's responsibility to make arrangements with the holding agency for the disposal, storage, or mailing of their property prior to being transported by extradition agents. Extradition agents shall not be responsible for inmate property left at the sending agency/institution. At no time shall inmate property be checked onto airplanes or transported in the baggage compartment of the aircraft. The only exception is wheelchairs or other prescribed health care appliances.

Inmates being extradited shall not retain any property on their person except prescribed medications and health care appliances as necessary, e.g., prescribed eyeglasses. Only authorized property that can fit into a 10" x 12" clasp envelope including, but not limited to, jewelry, wallet, watch, family pictures, or printed material shall be allowed to be transported with the prisoner. Inmate property shall be inventoried on a CDC Form 1083. A copy of the CDC Form 1083 shall be placed in the sealed envelope, a copy shall be provided to the inmate, and a copy shall be retained by the extradition agent. The envelope shall then be secured in the agent's carry-on baggage or secured compartment in a transportation vehicle. The inmate may wear his/her own clothing and shoes if deemed appropriate for transport purposes by the assigned State agents.

Inmates being extradited from the CDCR to other jurisdictions, states, or territories of the United States may be allowed to retain all or a portion of their property as determined by the transporting extradition agent. In cases where personal property is not permitted to be transported, inmates shall be provided the opportunity to select appropriate disposition of their property as follows:

Inmates permanently transferring to the custody of another agency shall be provided with the opportunity to mail all property to an address of their choosing via the USPS or common carrier at the inmate's expense.

Indigent inmates shall have property shipped to an address of their choosing at the CDCR's expense.

Note: If no address is provided or previously mailed property is returned as undeliverable, all tangible property shall be placed in storage for a period of one year. Intangible property shall be maintained for a period of three years. If no claim is made on the property after expiration of time frames, final disposition shall be in accordance with PC Sections 5062 and 5063.

Inmates temporarily transferring OTC and other temporary transfers, shall have property stored pending their return to CDCR custody. All property will remain in storage until the inmate is either returned to CDCR custody or paroled or discharged. If paroled or discharged, all tangible property shall be stored for a period of one year. Intangible property shall be maintained for a period of three years. If no claim is made on the property after expiration of time frames, final disposition shall be in accordance with PC Sections 5062 and 5063.

54030.14 Release Clothing

Inmates scheduled for parole or awaiting discharge may be sent a release-clothing package via USPS or common carrier no earlier than 30 days prior to their scheduled parole or discharge date. Inmate release-clothing packages, limited to one set of clothing, shall be retained in a secure location by departmental staff.

54030.15 Escapes' Property

The Department shall not assume responsibility for property abandoned by an escapee until such time as the escape is discovered and the property is inventoried.

All personal property of escapees shall be inventoried and transferred to the investigating lieutenant. In accordance with PC Section 5062 tangible property shall be stored for a period of one year. Intangible property shall be maintained for a period of three years. Final disposition of property shall be in accordance with PC Sections 5062 and 5063.

54030.16 Deceased Inmate Property

All personal property of a deceased inmate shall be inventoried on a CDC Form 1083 and stored in a location designated by the Warden. The deceased inmate's Central File shall be reviewed for written directions of the decedent as to the next-of-kin. The deceased inmate's property shall be shipped to the next of kin as designated on the SOMS - Notification in Case of Death, Serious Injury, or Serious Illness, at the inmate's expense. If funds are not available in the inmate's trust account, the property shall be shipped to the person designated on the SOMS - Notification in Case of Inmate Death, Serious Injury, or Serious Illness only after contact and willingness to receive property is established.

If no willing recipient can be identified or previously mailed property is returned as undeliverable, all tangible property shall be placed in storage for a period of one year. Intangible property shall be maintained for a period of three years. If no claim is made on the property after expiration of time frames, final disposition shall be in accordance with PC Sections 5062 and 5063.

54030.17 Revisions

The Deputy Director, DAI, or designee shall ensure the contents of this Section are current.

Case No. 117925, In the Superior Court of the State of California for the County of Marin.

ARTICLE 44 — PRISON RAPE ELIMINATION POLICY

Revised July 1, 2015

54040.1 Policy

The California Department of Corrections and Rehabilitation (CDCR) is committed to providing a safe, humane, secure environment, free from offender on offender sexual violence, staff sexual misconduct, and sexual harassment. This will be accomplished by maintaining a program to address education/prevention, detection, response, investigation, and tracking of these behaviors and to address successful community re-entry of the offender. CDCR shall maintain a zero tolerance for sexual violence, staff sexual misconduct and sexual harassment in its institutions, community correctional facilities, conservation camps, and for all offenders under its jurisdiction. All sexual violence, staff sexual misconduct, and sexual harassment is strictly prohibited. This policy applies to all offenders and persons employed by the CDCR, including volunteers and independent contractors assigned to an institution, community correctional facility, conservation camp, or parole.

Retaliatory measures against employees or offenders who report incidents of sexual violence, staff sexual misconduct or sexual harassment as well as retaliatory measures against those who cooperate with investigations shall not be tolerated and shall result in disciplinary action and/or criminal prosecution. Retaliatory measures include, but are not limited to, coercion, threats of punishment, or any other activities intended to discourage or prevent a staff or offenders from reporting the incident(s) or cooperating with investigation of an incident(s).

54040.2 Purpose

The purpose of this policy is to ensure compliance with Public Law 108-79, the Prison Rape Elimination Act of 2003 (PREA), California Assembly Bill 550 (Chapter 303, Statutes of 2005), the Sexual Abuse in Detention Elimination Act, and 28 Code of Federal Regulations, Part 115, National Standards to Prevent, Detect, and Respond to Prison Rape. It will provide guidelines for the prevention, detection, response, investigation, and tracking of sexual violence, staff sexual misconduct and sexual harassment against

CDCR offenders. A further purpose of this policy is to provide guidelines for the successful community re-entry of offenders.

Lastly, this policy informs staff of their responsibility and liability as specified in the law.

54040.3 Definitions**Aggressor**

A person who attempts to commit, or commits sexual violence, staff sexual misconduct or sexual harassment.

Bisexual

A person who is sexually attracted to both sexes.

Coercion

A threat, however communicated, to commit an offense; to inflict bodily injury in the future on the person threatened or another, to accuse a person of any offense, to harm the credit or business reputation of any person, to take or withhold action as a public servant, or to cause a public servant to take or withhold action.

Cross-Gender

Of the opposite biological sex. Example: Male Custody Staff patting down female Inmates is cross-gender searching.

Gay

Slang term for a homosexual.

Gender Expression

A person's expression of his/her gender identity, including appearance, dress, mannerisms, speech, and social interactions.

Gender Identity

Distinct from sexual orientation and refers to a person's internal, deeply felt sense of being male or female.

Gender Non-conforming

Gender characteristics and/or behaviors that do not conform to those typically associated with a person's biological sex.

Intersex

An individual born with external genitalia, internal reproductive organs, chromosome patterns, and/or endocrine systems that do not seem to fit typical definitions of male or female.

Lesbian

A female homosexual.

LGBTI

An acronym that refers to sexual minorities, including lesbian, gay, bisexual, transgender and intersex.

Locally Designated Investigator (LDI)

The Investigative Services Unit Investigator or other designated institutional staff who have been trained to conduct investigations into allegations of sexual violence and/or staff sexual misconduct.

"Need to Know" basis

When the information is relevant and necessary in the ordinary performance of that employee or contractor's official duties.

Non-consensual

Not giving permission for or consent to an action being taken by another person.

Offender

Any inmate, ward, parolee, or other person currently under the jurisdiction of the CDCR.

PREA Compliance Manager (PCM)

Institutional employee with sufficient time and authority to coordinate the institutions efforts to comply with the CDCR Prison Rape Elimination Policy.

PREA Coordinator

Agency wide Coordinator with sufficient time and authority to develop, implement, and oversee agency efforts to comply with the PREA standards in all institutions.

Rape

Refer to PC Section 261.

Sexual Violence (committed by offenders) will Encompass:

Abusive Sexual Contact

Contact of any person without his or her consent, or by coercion, or contact of a person who is unable to consent or refuse AND intentional touching, either directly or through the clothing, of the genitalia, anus, groin, breast, inner thigh, or buttocks of any person.

Nonconsensual Sex Acts

Contact of any person without his or her consent, or by coercion, or contact of a person who is unable to consent or refuse AND contact between the penis and vagina or the penis and the anus including penetration, however slight; or contact between the mouth and the penis, vagina, or anus or penetration of the anal or genital opening of another person by the hand, finger, or other object.

Sexual Assault Response Team (SART)

A coordinated interdisciplinary team of law enforcement, prosecution, contract medical, and advocacy experts collaborating to meet the forensic needs of the criminal justice system, and the medical and emotional needs of the victim of sexual violence or staff sexual misconduct.

In the CDCR, unless an institution has been previously authorized for contracted on-site SART exams, they will utilize the resources available via contract at the local community hospital for SART examination of the victim and offender-suspect.

Sexual Harassment by an offender (towards an offender)

Repeated and unwelcome sexual advances, requests for sexual favors, or verbal comments, gestures, or actions of a derogatory or offensive sexual nature by an offender toward another offender.

Staff Sexual Harassment (towards an offender)

Repeated verbal comments or gestures of a sexual nature to an offender by a staff member, contractor, or volunteer, including demeaning references to gender, sexually suggestive or derogatory comments about body or clothing, or obscene language or gestures.

Staff Sexual Misconduct

Any threatened, coerced, attempted, or completed sexual contact, assault or battery between staff and offenders.

Any sexual misconduct by staff directed toward an offender, as defined in California Code of Regulations (CCR), Title 15, Section 3401.5 and Penal Code (PC) Section 289.6. The legal concept of "consent" does not exist between staff and offenders; any sexual behavior between them constitutes sexual misconduct and shall subject the staff member to disciplinary action and/or to prosecution under the law.

Staff

Any person employed by the CDCR, including employees, volunteers, and independent contractors assigned to an institution, community correctional facility, conservation camp, parole, or headquarters. Employee refers to those individuals who are appointed through civil services employment laws and assigned to a CDCR institution.

Transgender

A person whose gender identity differs from their birth sex.

Transgender Man

A person whose birth sex was female but who understands oneself to be, and desires to live life as a male.

Transgender Woman

A person whose birth sex was male but who understands oneself to be, and desires to live life as a female.

Victim

For purposes of this policy, a victim is an offender who has been subjected to inmate sexual violence, staff sexual misconduct, or sexual harassment.

Victim Advocate

An individual typically employed by a Rape Crisis Center whose primary purpose is the rendering of advice or assistance to victims of sexual assault and who has received a certificate evidencing completion of a training program in the counseling of sexual assault victims issued by an approved counseling center. The Victim Advocate will be summoned to assist the alleged victim of an in-custody sexual assault including rape, sodomy, oral copulation, or forcible acts of sexual penetration. In cases where an outside Victim Advocate is not available, a designated employee will be summoned, if available; an employee who has been certified by a rape crisis center as trained in counseling of sexual assault victims and who either:

(1) A psychiatrist, psychologist, licensed clinical social worker, psychiatric mental health registered nurse, staff person with a master's degree in counseling, or others listed in Evidence Code section 1010; or

(2) Has the 40 hours of specialized training listed in Evidence Code section 1035.2 and is supervised by a staff member in subsection (1) above. If a designated employee is utilized as a Victim Advocate proof of required training must be on file in their personnel or IST file.

Victim Support Person

Any person of the alleged victim's choosing which could include another offender, personal friend, or family member including registered domestic partner.

54040.4 Education and Prevention

Staff Training

All staff, including employees, volunteers, and contractors, shall receive instruction related to the prevention, detection, response, and investigation of offender sexual violence, staff sexual misconduct, and sexual harassment. This training class will be conducted during new employee orientation, annual block training, and will be included in the curriculum of the Correctional Training Academy. The training will be gender specific based on the offender population at the assigned institution. Participation in the training will be documented on a CDCR 844, Training Participation Sign-in Sheet.

Employees shall also be trained in how to conduct cross-gender pat-down searches, transgender pat-down searches, and unclothed body cavity searches. When conducting these types of searches, employees shall ensure that these searches are conducted in a professional, respectful manner, and in the least intrusive manner possible consistent with security needs. Searches shall be conducted in accordance with policy, procedure and training as per CCR, Title 15, Section 3287(b).

Institutions shall train all staff on how to communicate professionally with inmates, including inmates who identify themselves as Lesbian, Gay, Bi-Sexual, Transgender, Intersex, and Gender Non – Conforming in accordance with Inmate/Staff Relations Training, on file with the Office of Training and Professional Development (OTPD).

Specialized training may be offered to employees who volunteer to act as victims' advocates. This training includes certification by a rape crisis center as trained in the counseling of sexual assault victims. For any employee volunteer who is not a psychiatrist, psychologist, licensed clinical social worker, psychiatric mental health RN, staff person with a master's degree in counseling, or other's listed in Evidence Code section 1010, this specialized training also includes the 40 hours of specialized training listed in Evidence Code 1035.2. Only employees who voluntarily agree to act as a victim advocate shall be utilized in that capacity. Employees who volunteer will be subjected to background clearance to ensure no prior history of violence.

All employees who are assigned to investigate sexual violence and/or staff sexual misconduct will receive specialized training per PC Section 13516 (c). The curriculum utilized in the class must be OTPD approved. The Hiring Authority or PREA Compliance Manager (PCM) shall ensure employees investigating incidents of sexual violence and/or staff sexual misconduct are properly trained.

Offender Education

Verbal and written information shall be provided to offenders which will address:

- Prevention/Intervention.
- Reporting.
- Treatment and Counseling.

Initial offender orientation on PREA will be provided to the offender population in reception centers (RC) via either written or a multi-media presentation on a weekly basis in both English and Spanish.

Approved PREA posters which contain departmental policy and the sexual violence, staff sexual misconduct, and sexual harassment reporting telephone numbers shall be posted in designated locations throughout the institution and parole offices. At a minimum, these areas shall include all housing units, medical clinics, law libraries, visiting rooms, program offices, and offender work areas.

The PREA Brochure entitled "Sexual Assault Awareness" and the PREA booklet entitled "Sexual Abuse/Assault – Prevention and Intervention" will be distributed during initial processing in RC institutions. Both the brochure and booklet shall be available through correctional counselors at each institution, and the information will also be included in each institution's offender orientation handbook.

Appropriate provisions shall be made to ensure effective communication for offenders not fluent in English, those with low literacy levels, and those with disabilities.

Institutions may consider the use of offender peer educators to enhance the offender population's knowledge and understanding of PREA and sexually transmitted diseases.

PREA offender education shall be documented on a CDC Form 128-B, General Chrono. The offender shall be asked to sign the CDC Form 128-B indicating they received the training. Refusal to sign will be noted by staff on the CDC Form 128-B. The CDC Form 128-B shall be forwarded to Inmate Records for appropriate scanning into the Electronic Records Management System (ERMS).

Preventative Measures

Each institution shall enable offenders to shower, perform bodily functions, and change clothing without non-medical staff of the opposite biological sex viewing their breast, buttocks, or genitalia, except in exigent circumstances or when such viewing is incidental to routine cell checks. Except in circumstances where there would be an impact to safety & security, modesty screens shall be placed strategically in areas that prevent incidental viewing.

In order to minimize cross gender exposure, staff of the opposite biological sex shall announce their presence when entering the housing unit. This announcement is required at the beginning of each shift and/or when the status quo within the housing unit changes.

This policy shall be included in each institution's orientation handbook. This will allow the inmate to take into consideration that staff of the opposite gender may be present when performing bodily and bathing functions.

Security Rounds

A custody supervisor assigned to each facility or unit shall conduct weekly unscheduled security checks to identify and deter sexual violence, staff sexual misconduct and sexual harassment of any kind. These security checks shall be documented in the Unit Log Book in red pen. The Unit Log Book shall indicate the date, time, and location the security check was conducted.

54040.5 Searches

Institutions shall document all cross-gender strip searches and cross-gender visual body cavity searches in accordance with DOM Section 52050.16.5, and shall document all cross-gender pat-down searches of female inmates in accordance with DOM Section 52050.16.4 utilizing the Notice of Unusual Occurrence (NOU). Completed NOU forms shall be reviewed by the supervisor and routed to the institutional PCM to retain for audit purposes. If the search is incidental to an emergency or crime that constitutes a CDCR Form 837, Crime Incident Report, the search shall also be documented within the incident report.

54040.6 Offender Housing

Offenders at high risk for sexual victimization, as identified on the electronic Initial Housing Review, shall not be placed in segregated housing unless an assessment of all available alternatives has been completed, and a determination has been made that there is no available alternative means of separation from likely abusers.

Offenders at high risk for sexual victimization shall have a housing assessment completed immediately or within 24 hours of placement into segregated housing. If temporary segregation is required, the inmate shall be issued an Administrative Segregation Placement Notice, explaining the reason for segregation is the need to complete a housing assessment based on the high risk for sexual victimization. If a determination is made at the conclusion of the assessment that there are no available alternative means of separation from likely abusers, the inmate will be retained in segregated housing and issued an Administrative Segregation Placement Notice, explaining the reason for retention. The assigned counseling staff shall schedule the offender for appearance before the Institution Classification Committee for discussion of his/her housing needs.

Single Cell Status

The process of review and evaluation for single cell status shall be initiated during RC processing as part of initial screening. This process will include completion of the electronic Initial Housing Review, which includes questions related to sexual violence and victimization. Upon the offender's arrival at his/her assigned institution, this information will again be assessed and an Initial Housing Review will be updated as necessary. Offenders will not be disciplined for refusing to answer, or not disclosing complete information related to their sexual orientation or sexual violence history.

The offender shall be referred to a classification committee for determination of single cell status in accordance with CCR Section 3377.1(c), based on documented evidence that the offender may not be safely housed in a double cell or dormitory situation. An offender's need for single cell status shall be reviewed as part of initial/annual classification, or any time an offender is referred for transfer or placement consideration.

54040.7 Detection, Notification and Reporting

Offenders may report violations of this policy to any staff member verbally or in writing, utilizing the Inmate Appeals Process, through the sexual assault hotline, or through a third party.

The department shall not rely on offender interpreters, offender readers, or other types of offender assistants except in limited circumstances where an extended delay in obtaining an effective interpreter could compromise the offender's safety, the performance of first-response duties, or the investigation of the offender's allegations.

CDCR employees have a responsibility to protect the offenders in their custody. All staff are responsible for reporting immediately and confidentially to the appropriate supervisor any information that indicates an offender is being, or has been the victim of sexual violence, staff sexual misconduct, or sexual harassment. In addition to reporting, employees have a responsibility to assist the offender and refer him/her to medical/mental health for evaluation. Staff shall ensure the reporting of information is done as soon as possible and in a confidential manner. A CDCR Form 837, Crime Incident Report, shall be submitted for each allegation of Sexual Violence against an offender by an offender in compliance with DOM Section 51030.3, except as described in DOM Section 54040.7.3.

An offender may report sexual violence, staff sexual misconduct, or sexual harassment that occurs under the jurisdiction of the CDCR to any staff member. If the staff who receives the report is non-custody, he/she shall immediately notify his/her supervisor and the Watch Commander. Each employee who observes the incident or is provided a report by the victim must complete required reports.

An offender may also report sexual violence, staff sexual misconduct, or sexual harassment that occurs under the jurisdiction of the CDCR, to the Ombudsman for Sexual Abuse in Detention Elimination in the Office of the Inspector General. In addition, offenders being retained solely for civil immigration may contact consular officials or officials at the Department of Homeland Security.

Staff are reminded that victims of sexual violence, staff sexual misconduct, or sexual harassment may be seriously traumatized physically and/or mentally. Staff are expected to be sensitive to the offender during their interactions with him/her.

Screening for Appropriate Placement

Based on information that the offender has been a victim of sexual violence or victimization, the custody supervisor conducting the initial screening shall discuss housing alternatives with the offender in a private location. The custody supervisor shall not automatically place the offender into administrative segregation. Consideration shall be given to housing this offender with another offender who has compatible housing needs. If single cell status is appropriate, the custody supervisor may designate the offender for single cell housing pending a classification review.

Per the Department's Mental Health Services Delivery System (MHSDS), all offenders shall receive a mental health screening within the required timeframe after arrival at an institution.

Any staff member, with significant concern that an offender may be subject to sexual victimization, shall immediately notify a custody supervisor who will refer that offender for a mental health evaluation per existing policy regarding mental health referrals. This referral will be completed using the CDCR Form 128-MH5, Mental Health Referral Chrono.

Referral for Mental Health Screening

If it is reported by an offender during the initial intake screening, that he/she has experienced prior sexual victimization or previously perpetrated sexual abuse, whether it occurred in an institutional setting or in the community, staff shall ensure that the inmate is referred to mental health utilizing the CDCR Form 128-MH5, Mental Health Referral Chrono.

54040.7.1 Notification via Inmate Appeals or Form 22 Process

Any employee receiving notice of alleged staff sexual misconduct via a completed CDCR Form 602, Inmate/Parolee Appeal, CDCR Form 22, Inmate/Parolee Request for Interview, Item or Service, or CDCR Form 602HC, Inmate/Parolee Health Care Appeal shall immediately notify the institution head, unit supervisor, or highest-ranking official on duty as required by CCR, Title 15, Sections 3401.5, 3084.9(a)(5), 3084.9(a)(5)(A), or 3086.

54040.7.2 Notification via Third Party Reporting of Misconduct Against an Employee, Contractor, or Volunteer

When a third party, on behalf of an inmate, makes an allegation of staff sexual misconduct or sexual harassment against a departmental employee, contractor, or volunteer, that allegation or complaint shall be submitted in

writing to the hiring authority of the area in which the individual is assigned. Complaints against departmental employees should be filed in accordance with CCR 3391. The term "third party" includes staff members, family members, attorneys, or outside advocates. Inmates will file complaints against staff utilizing the CDCR Form 602.

Complaints determined to involve personnel from other agencies or institutions shall be forwarded to the proper Hiring Authority through the chain of command for appropriate response.

When a third party files such a complaint on behalf of an offender, a supervisory employee shall take the inmate to a private setting to discuss the complaint and assess immediate housing needs.

Third Party reports of staff sexual misconduct or staff sexual harassment shall be forwarded to the Hiring Authority. The Hiring Authority shall forward the documented third party report of the allegation to a Locally Designated Investigator (LDI). The LDI will conduct inquiry work until sufficient information is obtained to warrant an Office of Internal Investigations (OIA) investigation, or the information collected refutes the allegation, as determined by the hiring authority. The inquiry and/or investigative information will be thoroughly documented on a Confidential Memorandum. The Confidential Memorandum shall be maintained with the investigatory file. Standard investigatory procedures will be utilized and the complaint will be logged on the CDCR Form 2140, Internal Affairs Allegation Log.

Any allegation of staff sexual misconduct or staff sexual harassment believed to constitute an emergency shall be reported immediately to a supervisor. The supervisor shall notify the Watch Commander who shall immediately notify the Hiring Authority. Notification to the OIA, Regional Office, Special Agent in Charge (SAC) or OIA Administrative Officer of the Day (AOD) shall also be made when immediate investigative action is necessary. In the event of such an emergency, staff shall follow-up with a written report within one (1) day of learning the information. Examples that constitute an emergency are as follows:

- Possible loss of life or serious bodily injury;
- Serious breach of facility security;
- Further aggravation of a potentially dangerous situation;
- Activities which seriously compromise or jeopardize an investigation;
- An illegal activity which may occur imminently.

54040.7.3 Notification via Third Party Reporting of Sexual Violence or Sexual Harassment Against an Offender

When a third party, on behalf of an inmate, makes an allegation of sexual violence or sexual harassment against an offender, that allegation or complaint shall be submitted in writing to a custody supervisor. The Custody Supervisor shall forward the documented third party report of the allegation to the Locally Designated Investigator (LDI) for investigation and determination of the appropriate disposition.

Complaints determined to involve offenders from other agencies or institutions shall be forwarded to the proper hiring authority through the chain of command for appropriate response. Any allegation believed by staff to constitute an emergency shall be reported immediately to a supervisor. See examples listed in previous section.

The allegation will be investigated and documented on a Confidential Memorandum or CDC Form 128-B, General Chrono utilizing standard investigatory procedures, as outlined in DOM, Chapter 5, Article 44, Section 54040.12. If warranted the suspect may be subject to administrative/criminal proceedings per DOM, Chapter 5, Article 44, Section 54040.11.

Completion of a CDCR 837, Crime Incident Report is required on third party reports and anonymous reports only if the allegation is substantiated.

54040.7.4 Notification from/to Other Confinement Facilities

Upon receiving an allegation that an offender was the victim of sexual violence or staff sexual misconduct while confined at another institution/confinement facility, the hiring authority where the allegation was received shall notify the hiring authority of the institution or appropriate office of the agency where the alleged sexual violence or staff sexual misconduct occurred. This initial notification shall be made via telephone contact or electronic mail and will be followed up with a written summary of the alleged victim's statements. Such initial notification shall be provided as soon as possible, but no later than 72 hours after receiving the allegation. The institution or facility where the alleged sexual violence or staff sexual misconduct is reported will be responsible to complete the SSV-1A form.

The Hiring Authority or agency office receiving notification that an incident occurred at their institution, shall assign and ensure that the allegation is investigated and reported in accordance with DOM Section 54040.12. Upon

completion, a closure report shall be returned to the institution where the alleged incident was reported.

54040.8 Response

It is the expectation that all staff shall maintain professional behavior when interacting with an alleged victim of sexual violence or staff sexual misconduct, and display sensitivity to the potential emotional impact of the situation. All staff are reminded that this is a very serious situation. Incident-specific information shall be treated as confidential, and disclosure made only to employees who have a "need to know" and to other persons and entities as permitted or required by law.

Initial Contact

Upon the initial contact with an employee, that employee will take the alleged victim to a private secure location. The Initial Contact Guide has been developed to assist employees in completing the tasks associated with initial contact.

The employee shall make every effort to ensure the victim does not:

- Shower;
- Remove clothing without custody supervision;
- Use the restroom facilities and/or;
- Consume any liquids.

When receiving an allegation from an offender of sexual violence or staff sexual misconduct that occurred in a detention facility while the offender was a minor, it will be the responsibility of the Watch Commander to notify the appropriate agencies.

54040.8.1 Custody Supervisor Responsibilities

The custody supervisor has significant responsibility in this policy, and a Custody Supervisor Responsibilities Checklist has been developed to assist in identifying the duties to be completed.

If the victim alleges staff sexual misconduct, the Hiring Authority will be immediately notified via the Watch Commander. The Hiring Authority will assign a LDI to conduct inquiry work-until sufficient information is obtained to warrant an OIA investigation, or the information collected refutes the allegations, as determined by the Hiring Authority. The inquiry and/or investigative information will be thoroughly documented on a Confidential Memorandum. The Confidential Memorandum shall be maintained with the investigatory file. The complaint will be investigated utilizing standard investigatory procedures. Upon conclusion of the investigation, the alleged victim will be provided written notification of the findings as described in DOM Section 54040.12.4.

Any allegation of staff sexual misconduct or staff sexual harassment believed by staff to constitute an emergency shall be reported immediately to a supervisor. Notification to the OIA, Regional Office, SAC or OIA AOD shall also be made when immediate investigative action is necessary. In the event of such an emergency, staff shall follow-up with a written report within one (1) day of learning the information. Examples that constitute an emergency are as follows:

- Possible loss of life or serious bodily injury;
- Serious breach of facility security;
- Further aggravation of a potentially dangerous situation;
- Activities which seriously compromise or jeopardize an investigation;
- An illegal activity which may occur imminently.

The custody supervisor must tell the victim that his/her name will become a matter of public record unless he/she requests that it not become a matter of public record, per PC Section 293 (a). The victim should be provided the Victim of Sex Crimes form to complete to either request or waive confidentiality of his/her name. If the victim chooses to have his/her name remain confidential, any written report concerning these offenses must indicate that the victim requested confidentiality of his/her name per PC Section 293(a). If the victim has requested confidentiality, the victim's name and address may not be released except to specified persons or as authorized by law.

Please refer to DOM Section 54040.12.1 for information related to the inmate being transported for a forensic examination.

The custody supervisor shall assign a custody escort to the victim who shall remain with the victim for the entire exam process, whenever possible. Gender preference should be considered when assigning a custody escort to the victim. The custody escort will ensure effective communication (i.e., complexity of the issues, language barriers, and literacy).

A Watch Commander Notifications Checklist has been developed to identify the tasks to be completed.

When the call is made to request the ambulance, it is critical to inform the dispatcher that the injured offender is the victim of sexual assault/battery. At the time the victim is sent to the outside hospital or on-site location, the Watch Commander is required to contact the Rape Crisis Center to request a Victim Advocate be dispatched. If one is not available, designated, trained staff from the facility will be dispatched or called in to act as the Victim Advocate as defined in Section 54040.3.

Crime Scene Preservation

The custody supervisor shall ensure that a perimeter has been established and an officer has been posted to keep persons out of the crime scene area. The custody supervisor shall ensure the assigned officer(s) maintain a chronological log of all persons entering the crime scene area and their purpose for entering the crime scene area. ISU staff and/or trained personnel shall process the crime scene including collecting and securing evidence. ISU staff shall photograph/videotape the crime scene and evidence collected, make a diagram of the crime scene, and collect/package all evidence.

Evidence

Care must be taken to ensure that any potential evidence is identified, preserved, and collected. Examples of evidence include, but are not limited to any clothing worn by the victim and suspect, hair or clothing fibers, dried or moist secretions, semen, blood or saliva stains, stained articles of clothing, blankets, or other foreign materials on the body of the victim or suspect, fingernail scrapings, and any other trace evidence (including the rape examination kit).

Based on when/where the incident occurred, a designated evidence officer will be requested to collect evidence that may be destroyed if not preserved. The designated evidence officer and any other employee who collects evidence will process it according to institutional procedure.

All DNA related evidence taken from the body of the victim or suspect (i.e., fingernail scrapings, body fluid, hair, etc.) must be collected by the SANE, this individual is located at the SART location, in accordance with State of California, Office of Emergency Services Reporting Instructions. Refer to the institutions local MOU or DOM Supplement regarding processing of the clothing that the victim and suspect wore at the time of the incident. All other evidence such as clothing (from his/her bed area) and bedding will be collected per institutional procedure.

Once the SANE has finished collecting the evidence, it will be returned to the custody escort to transport back to the institution where it will be secured in an evidence locker and logged appropriately, maintaining the chain of custody.

Parole or other Community Based Housing Incidents

If a parolee reports sexual violence by another parolee, local law enforcement will be contacted. If a parolee reports staff sexual misconduct or staff sexual harassment, the employee to whom the report was made will contact his/her supervisor and document the notification in a report. The parole supervisor will contact their Regional Administrator. The Regional Administrator will assign a LDI to conduct an inquiry until sufficient information is obtained to warrant an OIA investigation, or the information collected refutes the allegations, as determined by the Hiring Authority. The inquiry and/or investigative information will be thoroughly documented on a Confidential Memorandum. The Confidential Memorandum shall be maintained with the investigatory file. The complaint will be investigated utilizing standard investigatory procedures. Upon conclusion of the investigation, the alleged victim will be provided written notification of the findings as described in DOM Section 54040.12.4.

If an incident of sexual violence or staff sexual misconduct is reported at a contract facility responsible for housing CDCR offenders, the contracted employee shall initiate the Initial Contact Guide.

54040.8.2 Victim Advocate and Victim Support Person

Victims of the crimes listed below have the right under PC 264.2 and PC 679.04 to a Victim Advocate and Victim Support Person for both the medical examination and the investigatory interview:

- PC Section 261 Rape.
- PC Section 261.5 Unlawful sexual intercourse with person under 18.
- PC Section 262 Rape of spouse.
- PC Section 286 Sodomy.
- PC Section 288a Oral copulation.
- PC Section 289 Forcible acts of sexual penetration.

Victim Advocate and Victim Support person for Medical Examination

In incidents where an offender has alleged sexual violence or staff sexual misconduct, the watch commander or designee shall immediately notify the local Rape Crisis Center whenever a victim of a sexual violence or staff sexual misconduct, is treated at the local SART location and/or transported to an outside hospital for any forensic examination.

Per PC Section 264.2, the victim of the crimes listed above has the right to have a victim advocate present and a victim support person of the victim's choosing at the examination. In most cases, the victim advocate will be from the local rape crisis center. The victim support person may be excluded from the examination if the watch commander/designee or medical provider determines that the presence of the victim support person would be detrimental to the purpose of the examination or poses a threat to the safety and security of the institution or outside hospital. If a victim support person is excluded, the watch commander/designee or medical provider who made the decision shall document the reason on the CDCR Form 837 (i.e., if time for the support person to attend would result in a significant delay and/or the person requested would present a risk to the safety/security of the institution).

A Memorandum of Understanding (MOU) between the Institution and Local Rape Crisis Center (Victim Advocate) shall be established to ensure that both agencies understand their roles and responsibilities when responding to sexual violence or staff sexual misconduct.

Victim Advocate and Victim Support Person for Investigatory Process

Per PC Section 679.04, victims of the crimes listed previously in this article, have the right to have a victim advocate and a victim support person of the victim's choosing present at any interview by law enforcement, the district attorney, or defense attorneys.

If the investigator or the district attorney determines that the presence of the victim support person would be detrimental to the interview, the victim support person may be excluded from the interview. The victim must be notified verbally or in writing of this right by the attending investigator or the district attorney prior to the interview. Reasons for exclusion of the victim support person are the same as identified previously in the medical examination process and shall be documented on the CDCR Form 837.

54040.8.3 Medical Services Responsibilities

California Correctional Health Care Services (CCHS) medical staff will provide indicated emergency medical response taking steps not to contaminate evidence.

The assigned RN will initiate the CDC Form 7252, Request for Authorization of Temporary Removal for Medical Treatment and have it delivered to the Watch Office or designated area to expedite the transportation process. To the extent possible, staff in the Triage and Treatment Area (TTA) will maintain physical separation and visual separation between the victim and suspect(s).

CCHCS Medical staff will conduct follow-up testing for sexually transmitted infections/diseases and HIV as indicated.

A Chief Medical Executive or designee will determine if the injuries sustained by the victim are serious as defined in CCR, Section 3000, and shall document this determination on a CDCR Form 7219, Medical Report of Injury or Occurrence and CDCR Form 837-C for use in the inmate disciplinary process and provide to custody.

54040.8.4 Transportation Responsibilities

The transportation sergeant or designated sergeant shall maintain Sexual Assault/Battery Transportation Kits in a plastic storage bin. This kit will consist of:

- One clean jumpsuit;
- Two pieces of "examination table" type paper (approx. 18" x 36" each);
- Two Evidence Collection Envelopes;
- Two Evidence Collection Paper Bags; and
- Two pairs of latex gloves and other required personal protective equipment (PPE).

A Transportation Checklist has been developed to identify the duties to be completed related to the transportation of Sexual Assault victims and suspects.

54040.9 Forensic Medical Examination

The victim will be taken to the designated outside hospital, or on-site location, where SART Contract Staff will complete the forensic exam. The SANE shall provide the required Forensic Medical Examination, per the Office of Emergency Services, as well as the appropriate Forensic Medical Report: Acute (<72 hours) Adult/Adolescent Sexual Assault Examination,

the Forensic Medical Report: Non-Acute (>72 hours) Child/Adolescent Sexual Abuse Examination, or the Forensic Medical Report: Sexual Assault Suspect Examination. These examinations will consist of an explanation of the process, the offender's signature on consent forms (some offenders will require assistance to explain the consent forms prior to signing them), discussion of the incident and when/how it occurred, and a detailed physical examination that will include evidence collection and photographs. As required in Penal Code section 2638 (part of AB 550), immediate HIV/AIDS prophylactic measures will be provided. In addition, information regarding sexually transmitted infections, HIV and pregnancy options, will be discussed with the victim and/or suspect. Testing for sexually transmitted infections, HIV, and pregnancy (if appropriate) will be offered.

54040.10 Return to Triage and Treatment Area/Receiving & Release

Upon the return of the victim from the SART/SANE Exam, the offender will be assessed following Inmate Medical Services Policies and Procedures (IMSP&P). The TTA Registered Nurse will also complete a request for an emergent Suicide Risk Evaluation (SRE). Mental Health staff will evaluate the victim within four hours of referral. Until that time, the offender shall be placed under constant and direct supervision to ensure he/she does not attempt to hurt him/herself or someone else.

Staff are reminded to be aware of warning signs of post-trauma mental health problems. These behaviors would typically be a change from their usual behavior prior to the alleged assault. No single behavior listed below indicates mental health problems, but if several or more are present you should make a referral to or consult with the mental health program.

- Sleep problems
- Agitation or restlessness (for example, pacing in the cell or housing unit)
- Suspiciousness or heightened vigilance – may have an exaggerated startled response
- Withdrawal from customary activities and friends
- Loss of appetite
- May stand and stare blankly
- Hyperactivity
- New ritualistic or highly repetitive behavior
- Crying or tearfulness
- Fear of others
- Inmate has a marked change in personality
- No longer wants to engage in activities
- Self-injurious or suicidal behavior
- May be heard putting themselves down or be very critical of themselves
- Bizarre or unusual behavior or outbursts
- Fear of venturing beyond “security blanket” areas
- Newly developed clinginess on friends or custody staff
- May display impulsiveness or violence toward others (new behavior)

Upon the victim's return to the institution TTA or designated medical location, the custody supervisor will arrange housing for the victim. All housing options should be considered, including input from the victim regarding his/her housing preference, a bed move, a transfer to a sister institution and safety concerns. Consideration should also be given to housing the victim with another offender with compatible housing needs.

Mental Health Responsibilities:

All victims of sexual violence or staff sexual misconduct shall be referred for an emergent SRE. The SRE must be completed by a qualified and trained staff member. The SRE shall be conducted as soon as possible, but no more than four hours after referral, and shall include a face-to-face evaluation of the victim in a confidential setting. If the SRE indicates a heightened risk for suicide, the mental health staff member shall complete a full mental health evaluation. All victims of sexual violence or staff sexual misconduct shall be referred for a routine Mental Health Evaluation regardless of the outcome of the SRE.

The mental health clinician completing the routine Mental Health Evaluation shall ensure that the victim receives services as outlined in the Mental Health Services Delivery System (MHSDS) Program Guide, which includes criteria for inclusion in the MHSDS program based on qualifying diagnoses or medical necessity. Any stressors related to the reported sexual violence/staff sexual misconduct (e.g., safety/security issues or fear of retaliation) shall be

documented in the Health Record and considered in the decision regarding the victim's need for mental health services. Any victim who requests to be included in the MHSDS and be provided mental health services related to a reported sexual violence/staff sexual misconduct shall be provided services according to the MHSDS Program Guide. If appropriate, the victim shall be given educational materials to provide information related to the medical and mental health conditions which may result after a sexual violence/staff sexual misconduct. Victims shall be monitored for, signs and symptoms of self-harm, post-traumatic stress disorder, depression, and other mental health consequences.

Consideration during medical treatment (including counseling) must be given to:

- Sexually Transmitted Disease (STD) Conversion.
- Presence of Hepatitis B and/or C.
- HIV Testing.
- Pregnancy options, if appropriate.

Specific responsibilities of mental health staff shall be consistent with statewide IMSP&P and/or MHSDS Program Guide, supplemented by local operating procedures.

54040.11 Suspect Processing

Offender on Offender

To the extent possible, all staff will ensure that there is no physical, verbal, or visual contact between the victim and suspect. The suspect will be escorted to the TTA or designated medical location for medical screening and then to the SART location as necessary. The suspect must consent to the forensic examination or custody staff will take steps necessary to obtain a search warrant or will follow procedures outlined in a Memorandum of Understanding (MOU) with the local District Attorney's Office. The custody supervisor will contact ISU, or the local District Attorney's Office for assistance in obtaining a search warrant. Steps identified earlier in this article for collection of evidence, transportation, and physical examination of the alleged victim shall be the same for the suspect.

Upon completion of the forensic medical examination, the suspect will be re-housed in the Administrative Segregation Unit (ASU). The custody supervisor shall complete the required forms for ASU placement.

ISU staff or the LDI will provide a Miranda warning and interview the suspect to obtain his/her account of the incident.

Staff on Offender

Immediate efforts shall be made to eliminate sight and sound contact between the victim and the staff member. Suspects are afforded due process; therefore, when a staff member is identified as a suspect, and before processing, contact with the Hiring Authority and OIA should be made. The Hiring Authority or designee shall determine if the employee should be placed on administrative time off consistent with departmental policy during the course of the investigation.

54040.12 Investigation

All allegations of sexual violence, staff sexual misconduct, and sexual harassment shall be investigated and the findings documented in writing. Except in limited circumstances or exigent circumstances, investigators shall not rely solely on inmate interpreters, readers, or other types of inmate assistance during a sexual violence, staff sexual misconduct, or sexual harassment investigation.

Staff on Offender

Allegations of staff on offender sexual misconduct or staff sexual harassment will be immediately reported to the Hiring Authority via the Watch Commander. The Hiring Authority will assign an LDI to conduct an inquiry until sufficient information is obtained to warrant an OIA investigation, or the information collected refutes the allegations, as determined by the Hiring Authority. The inquiry and/or investigative information will be thoroughly documented on a Confidential Memorandum. The Confidential Memorandum shall be maintained with the investigatory file. The complaint will be investigated utilizing standard investigatory procedures. Upon conclusion of the investigation, the alleged victim will be provided written notification of the findings as described in DOM Section 54040.12.5.

Any allegation of staff sexual misconduct or staff sexual harassment believed by staff to constitute an emergency shall be reported immediately to a supervisor. Notification to the OIA, Regional Office, SAC or OIA AOD shall also be made when immediate investigative action is necessary. In the event of such an emergency, staff shall follow-up with a written report within one (1) day of learning the information. Examples that constitute an emergency are as follows:

- Possible loss of life or serious bodily injury;
- Serious breach of facility security;
- Further aggravation of a potentially dangerous situation;
- Activities which seriously compromise or jeopardize an investigation;
- An illegal activity which may occur imminently.

Offender on Offender

All sexual violence allegations to include sexual assaults, attempted sexual assaults, and sexual battery committed by offenders, as well as allegations of sexual harassment committed by offenders shall be investigated by the LDI. These staff designated by the hiring authority will be responsible for completion of the investigation and will follow standard investigative procedures.

The LDI or Custody Supervisor may utilize the Sexual Assault/Battery Interview Guidelines when questioning the alleged victim regarding the specific facts of the allegation. The ISU Lieutenant or LDI shall be responsible for completing the Survey of Sexual Violence (SSV-IA).

Credibility of an alleged victim, suspect, or witness must be determined based on sound facts and evidence rather than an individual's status.

Pursuant to PC Section 293(b), the Victims of Sex Crimes form must be attached to all criminal reports relating to offenses listed in Government Code section 6254(f), which in adult prisons are: PC Sections 220, 261, 261.5, 262, 264, 264.1, 266(c), 273(a), 273(d), 273.5, 286, 288, 288(a), 289, 422.6, 422.7, 422.75, and 646.9.

54040.12.1 Investigation of Sexual Violence or Staff Sexual Misconduct – less than 72 hours post incident

If the alleged incident is reported or discovered less than 72 hours after the occurrence, in addition to the provisions discussed in DOM Section 54040.8, the custody supervisor shall secure the alleged crime scene (if feasible) and secure the alleged suspect (if he/she can be identified) for potential forensic processing. The custody supervisor shall determine the need to transport the inmate for a forensic exam as follows:

- Sexual Harassment Incidents: The victim/suspect will not be transported for a forensic exam.
- Abusive Sexual Contact Incidents: The SART/SANE shall be consulted to make a determination as to whether the victim/suspect should be taken for a forensic examination. The victim may refuse the forensic examination and the refusal should be video recorded.
- Nonconsensual Sex Acts: The victim/suspect shall be transported for a forensic examination. The victim may refuse the forensic examination and the refusal should be video recorded.

54040.12.2 Investigation of Sexual Violence or Staff Sexual Misconduct – more than 72 hours post incident

If the alleged incident is reported or discovered more than 72 hours after the occurrence, in addition to the applicable provisions discussed in this article, the custody supervisor shall secure the alleged crime scene (if feasible) and secure the alleged suspect (if he/she can be identified) for potential forensic processing. The victim may be questioned using the Sexual Assault/Battery Interview Guidelines. The SART/SANE nurse shall be consulted to make a determination as to whether the victim/suspect is to be taken for a forensic examination. The victim may refuse the forensic examination and the refusal should be video recorded. In addition, the victim should be asked if he/she retained any evidence of the incident (i.e., soiled clothing/bedding, etc.). If so, these items shall be gathered by the ISU evidence officer and processed per the institutional evidence collection procedures. Medical staff shall conduct an examination of the victim and alleged suspect to determine the presence or absence of physical trauma, and perform follow-up testing for sexually transmitted diseases and pregnancy testing, as appropriate. Medical staff shall also refer the victim to Mental Health for evaluation/counseling.

54040.12.3 Reporting to Outside Agencies

All terminations for violations of agency sexual misconduct or harassment policies, or resignations by employees that would have been terminated if not for their resignation, shall be reported to any relevant licensing body by the hiring authority or designee.

54040.12.4 Reporting to Outside Agencies for Contractors

Any contractor or volunteer who engages in staff sexual misconduct shall be prohibited from contact with offenders and shall be reported to relevant licensing bodies by the hiring authority or designee.

54040.12.5 Reporting to Offenders

Staff on Offender

Following an offender's allegation that a staff member has committed sexual misconduct against an offender, the alleged victim shall be informed as to

whether the allegation has been substantiated, unsubstantiated, or unfounded. The PCM or designee shall inform the offender (unless the allegation has been determined to be unfounded) whenever the alleged abuser has been;

- The staff member is no longer posted within the inmate's unit;
- The staff member is no longer employed at facility;
- indicted on the alleged sexual misconduct; or
- convicted of the alleged sexual misconduct.

Offender on Offender

Following an investigation into an offender's allegation that he or she suffered from sexual violence by another offender, institution shall inform the alleged victim if the allegation has been substantiated, unsubstantiated or unfounded. The institution shall also inform the alleged victim whenever the alleged abuser has been:

- indicted on the alleged sexual violence; or
- convicted of the charge.

The agency's obligation to report/inform the offender of changes shall terminate if the offender is released from the agency's custody.

54040.13 Allegation Follow-up

For at least 90 days following a report of sexual violence or staff sexual misconduct, the institutional PCM shall assign a supervisory staff member to monitor the conduct and treatment of inmates or employees who reported the sexual violence or staff sexual misconduct and of the victim to ensure there are no changes that may suggest retaliation. The PCM has the discretion to assign this monitoring in other circumstances: If the reported conduct is sexual harassment, when a volunteer or independent contractor made the report of sexual violence, staff sexual misconduct, or sexual harassment, or if any person fears retaliation for cooperating with an investigation. The assigned supervisor shall notify the institutional PCM of any such changes. The PCM shall act promptly (in accordance with DOM Article 14, section 31140.22) to remedy any such retaliation and ensure a CDCR Form 2304 or 2305, Protection Against Retaliation, is initiated. Items to be monitored on the CDCR Form 2304 or 2305 include: periodic inmate status checks, inmate disciplinary reports, housing or program changes, or negative performance reviews or reassignments of staff. The monitoring shall continue beyond 90 days if the initial monitoring indicates a continuing need. The PCM shall track all Protection Against Retaliation forms and maintain all documentation, as required in the Records Retention Schedule.

The obligation to monitor shall terminate if the investigation determines that the allegation is unfounded or proven false.

54040.14 Classification Process

In cases of alleged sexual violence, staff sexual misconduct or sexual harassment, a determination shall be made for all victim(s) and offender suspect(s) if placement in an ASU is warranted, for reasons outlined in CCR Section 3335 and the reason shall be documented on the Classification Committee Chrono. Following ASU placement, an administrative review shall occur in accordance with CCR Section 3337.

Consideration during Institution Classification Committee (ICC) must be given to:

- Completion of Departmental Disciplinary Process.
- Yard assignment while in ASU.
- Single or double cell status.
- Referral to the District Attorney for Criminal Prosecution.
- Housing including a consideration of alternate General Population Facilities, Sensitive Needs Yard placement, Out-of-State placement (requires Departmental Review Board (DRB) approval), or Indeterminate SHU (DRB approval).

54040.14.1 PREA Victims Non-Disciplinary Segregation

PREA victims being removed from general population may be placed on non-disciplinary segregation status, in accordance with CCR Section 3335(b) and shall be assessed for any ongoing safety concerns. The assessment shall be documented on the inmates CDC Form 114-A, Inmate Isolation Segregation Record.

The assigned custody supervisor will be responsible for reviewing the circumstances of the incident and documenting his/her observations on a CDC Form 128-B, General Chrono. The assigned custody supervisor will attend the initial ICC and will make a recommendation regarding the need for continued housing on this status. ICC will consider the supervisor's input and make the final decision on retention or release from non-disciplinary segregation status.

A custody supervisor is required to conduct assessments every thirty days from the date the inmate is initially placed on non-disciplinary segregation status. These assessments will be documented on the CDC Form 114-A.

When the assigned custody supervisor determines the inmate's non-disciplinary segregation status is no longer needed, he/she shall submit a CDCR Form 128-B requesting the inmate be seen by ICC for housing review.

54040.15 Disciplinary Process

Upon completion of the investigative process, the existing disciplinary process, which includes referral for criminal prosecution and classification determinations, shall be followed.

If the allegation of sexual violence warrants a disciplinary/criminal charge, a CDCR Form 115, Rules Violation Report shall be initiated. The offender who is charged will be entitled to all provisions of CCR Section 3320 regarding hearing procedures and time limitations and CCR Section 3316, Referral for Criminal Prosecution.

54040.15.1 Alleged Victim – False Allegations

Following the investigation into sexual violence, or staff sexual misconduct, if it is determined that the allegations made were not in good faith or based upon a reasonable belief that the alleged conduct occurred, the offender making the allegations may be subject to disciplinary action. A charge of "making a false report of a crime," a Division "E" offense, is appropriate only if evidence received indicates the offender **knowingly** made a false report. An allegation deemed unsubstantiated or unfounded based on lack of evidence, does not constitute false reporting.

54040.16 Referral of Completed Cases for Independent Review

Designated staff in CDCR headquarters shall provide the Sexual Abuse in Detention Elimination Ombudsperson with copies of all completed Survey of Sexual Violence Incident – Adult (SSV-IA) forms. CDCR Form 602 Inmate Appeals, Ward Grievances, sexual assault investigation reports, and other data related to allegations of sexual assault will be made available to the Office of the Sexual Abuse in Detention Elimination Ombudsperson upon request.

54040.17 Institutional PREA Review Committee

The purpose of this Section is to set forth California Department of Corrections and Rehabilitation (CDCR) policy governing the sexual violence and staff sexual misconduct incident review process. The policy has its foundation in CFR, Chapter 28, Prison Rape Elimination Act (PREA) standards.

Per 28 CFR, Standard §115.86, each Hiring Authority is required to conduct an incident review at the conclusion of every sexual violence or staff sexual misconduct investigation, including allegations that have not been substantiated. A review is not required for allegation's that have been determined to be unfounded.

Upon completion of the investigation, the PREA Incident Folder will be created. The PREA Incident Folder will consist of the applicable reports; CDCR Form 837, Confidential Memorandums, Rules Violation Reports (as appropriate) and the SSV-IA form. The PREA Incident Folder will be routed to the Institution's PCM where staff suspect names shall be redacted.

The PCM shall make a good faith effort to reach a judgment on whether staff's actions prior to, during, and subsequent to the reporting of the incident are in compliance with regulations, procedure, and applicable law and determine if follow-up action is necessary.

The PCM shall normally schedule these PREA incidents for review by the Institutional PREA Review Committee (IPRC) within 60 days of the date of discovery.

Institutional PREA Review Committee (IPRC):

The IPRC is a committee of institution staff chaired by the respective Institution Head tasked with reviewing these PREA related incidents except those determined to be unfounded.

The IPRC shall meet to review these PREA incidents on at least a monthly basis, or on a schedule to ensure all cases are reviewed within 60 days of the date of discovery.

The IPRC shall normally be comprised of the following staff:

- Hiring Authority or designee, as chairperson and final decision maker;
- PREA Compliance Manager;
- At least one other manager;
- In-Service Training Manager;
- Health Care Clinician;
- Mental Health Clinician; and
- Incident Commander or Investigative Services Unit Supervisor.

The IPRC shall:

- Consider whether the allegation or investigation indicates a need to change policy or practice to better prevent, detect, or respond to sexual abuse;

- Consider whether the incident or allegation was motivated by race; ethnicity; gender identity; lesbian, gay, bisexual, transgender, or intersex identification, status, or perceived status; or gang affiliation; or was motivated or otherwise caused by other group dynamics at the facility;
- Examine the area in the facility where the incident allegedly occurred to assess whether physical barriers in the area may enable abuse;
- If the staffing plan was not complied with, this fact shall be documented during this review and addressed in the corrective action plan.
- Assess the adequacy of staffing levels in that area during different shifts;
- Assess whether monitoring technology should be deployed or augmented to supplement supervision by staff;
- Prepare a report of its findings and any recommendations for improvement;
- Determine a plan to correct findings and document in the report;
- Document implementation of the Action Plan or reasons for not doing so, and
- Submit the report to the Hiring Authority for final review.
- The final report will be provided to the appropriate Associate Director, upon approval of the Hiring Authority, if the findings require physical plant modification or other fiscal resource needs that can't be addressed through their existing budget (i.e., staffing).

Departmental PREA Coordinator

28 CFR, Standard §115.88, requires the agency to review data collected pursuant to standard §115.87 in order to assess and improve the effectiveness of its sexual violence prevention, detection, and response policies, practices, and training.

On an annual basis:

1. The Departmental PREA Coordinator will forward to each institution, a data collection tool which will be utilized by the institutional PCM to summarize information gathered through the Institutional PREA Committee.
2. The institution will complete the data collection tool and return it to the Departmental PREA Coordinator.
3. The Departmental PREA Coordinator will review the information contained on the data collection tool.
4. The Departmental PREA Coordinator will prepare an annual report of the findings and corrective actions for each facility, as well as the agency as a whole.
5. The report will be routed through the chain of command to the Agency Secretary for review and approval.
6. Once approved by the Secretary, the annual report will be forwarded to the Office of Public and Employee Communication for placement on the CDCR Website.

Records Retention

All case records associated with such reports including incident reports, investigation reports, offender information, case disposition, medical and counseling evaluation findings, recommendations for post-release treatment and/or counseling shall be retained in accordance with the CDCR Records Retention Schedule.

54040.17.1 Annual Review of Staffing Plan

Whenever necessary, but no less frequently than once each year, in consultation with the PREA Coordinator, the institutional PCM and the Program Support Unit shall assess, determine, and document whether adjustments are needed to: (1) The staffing plan; (2) The facility's deployment of video monitoring systems and other monitoring technologies; and (3) The resources assigned to ensure adherence to the staffing plan.

54040.18 Community Re-entry

Institutions shall provide victims of in-custody sexual violence, or staff sexual misconduct with access to mailing addresses and phone numbers of outside rape crisis organizations, victim advocacy groups and immigrant services agencies per 28 CFR, Part 115, Standard 115.53.

Mental Health Services shall be provided as directed under the Mental Health Responsibility section 54040.10.

The victim may be referred to the Parolee Outpatient Clinic, local mental health agencies, and Crisis Intervention Centers, as the need arises.

54040.19 Tracking – Data Collection and Monitoring

The PCM or the Parole Employee Relations Officer shall report investigations into allegations of sexual violence and staff sexual misconduct on the monthly update of the Yearly Tracking Report (YTR), including whether the perpetrator was a staff member or offender, disposition and

current status. This information shall be reported to the Department's PREA Coordinator by the fifth day of every month. Additionally, the ISU Lieutenant or Locally Designated Investigator shall be responsible for completing the Survey of Sexual Violence-Incident Adult (SSV-IA). The SSV-IA will be submitted to the Department PREA Coordinator no later than two business days from the date of the allegation. This information shall also be provided (via copy of the CDCR Form 837, Crime Incident Report) to the Offender Information Systems Branch (OISB) for compilation and tracking.

The OIA shall maintain records of investigations into allegations of staff/offender sexual misconduct, and will report by case number, the type of sexual misconduct, subcategory (male staff with female offender, female staff with male offender, etc.); whether the allegations were sustained; and whether a DA referral was made.

The CDCR shall aggregate the incident-based data at least annually. The data collected shall include, at a minimum, the data necessary to answer all questions from the most recent version of the Survey of Sexual Violence conducted by the Federal Department of Justice. CDCR shall maintain, review, and collect data as needed from all available documents including incident reports, investigation files, and PREA incident reviews. CDCR shall also obtain incident-based and aggregated data from every private facility with which it contracts for the confinement of its inmates. Upon request, the agency shall provide all such data from the previous calendar year to the federal Department of Justice no later than June 30.

Reports shall include a comparison of the current year's data and corrective actions with those from prior years and shall provide an assessment of the agency's progress in addressing sexual violence and staff sexual misconduct. The report shall be approved by the CDCR Secretary and made readily available to the public through the CDCR website. Specific material may be redacted from the reports when publication would present a clear and specific threat to the safety and security of a facility; however, the report must indicate the nature of the material redacted.

54040.20 PREA Data Storage and Destruction

CDCR shall ensure that all PREA data collected are securely retained. All aggregated PREA data, from facilities under CDCRs direct control and private facilities with which it contracts, shall be made readily available to the public at least annually through the CDCR website. Before making aggregated PREA data publicly available, all personal identifiers shall be removed. PREA data collected shall be maintained for 10 years after the date of the initial collection.

54040.21 Revisions

The Agency Secretary shall be responsible for ensuring that the contents of this Article are kept current and accurate.

ARTICLE 45 - CARE, TREATMENT, AND SECURITY OF PREGNANT OFFENDERS

Effective June 9, 2006

54045.1 Policy

The California Department of Corrections and Rehabilitation (CDCR) staff shall ensure a pregnant offender is not placed in restraints by the wrists, ankles, or both during labor, including during transport, delivery, and while in recovery after giving birth, except as provided in Penal Code Section 5007.7. Health care staff shall provide medical care for the pregnant offender population. Pregnant offenders shall receive, within the second trimester of gestation, a dental examination, periodontal evaluation, and the necessary periodontal treatment in order to maintain periodontal health during the gestation period.

54045.2 Purpose

This policy will ensure the safety of female offenders and the unborn child during pregnancy. It will also ensure medical care concerns are met regarding the pregnant offender population and birth of children at local hospitals and to establish protocols which prevent or treat gingivitis and/or periodontitis during pregnancy.

54045.3 Medical Care – Reception

The pregnant offender's medical care is initiated in Receiving and Release (R&R) when it is determined, by self report or physical appearance that the offender is pregnant, confirmed by physical examination and laboratory test results.

A Registered Nurse (RN) or Medical Technical Assistant (MTA) shall conduct the initial health screening in R&R. The health care staff shall notify the Obstetrical (OB) Coordinator by telephone or written documentation of the offender's name, CDC number, and any pertinent medical information regarding the offender's pregnancy status. The R&R RN shall notify the Supervising Obstetrician if information provided by the offender or from written information indicates that the offender has any medical conditions that place the patient in a high-risk status. The RN shall notify the Supervising Obstetrician, Health Care Manager/Chief Medical Officer (HCM/CMO) or designee if the offender needs to be seen for any urgent/emergent conditions.

A priority ducat for laboratory work to verify the pregnancy will be issued to all suspected pregnant offenders within three (3) business days of arrival at the institution.

A priority ducat for an examination by the OB Physician or OB Nurse Practitioner (NP) will be issued to all pregnant offenders within seven (7) business days of arrival at the institution.

A CDCR form 7410, Comprehensive Accommodation Chrono, for lower bunk and lower tier housing, if housed in a multi-tier housing unit, will be issued to all pregnant offenders.

Pregnant offenders on methadone maintenance shall be recommended for immediate transfer to the California Institution for Women (CIW) through the CMO to CMO transfer process. (Refer to methadone treatment for pregnant offenders later in this Article).

54045.4 Medical Follow-up

Positively identified pregnant offenders shall be provided with the following:

- Within seven (7) business days, the pregnant offender shall be scheduled for her first OB visit wherein a thorough history and examination shall be performed by the Supervising Obstetrician or NP, to determine the term of pregnancy and plan of care. Diagnostic studies shall be ordered based on the information provided in the Hollister Maternal/Newborn Record System forms.
 - Pregnant offenders shall be referred for HIV counseling and testing.
 - Pregnancy termination counseling regarding pregnancy interruption shall be provided if requested by the offender.
 - Pregnant offenders shall receive pregnancy and childbirth education, information pamphlets, and other pertinent material.
 - Pregnant offenders shall receive prenatal vitamins, iron, and folic acid.
 - Pregnant offenders shall receive two (2) extra cartons of milk, two (2) extra servings of fresh fruit, and two (2) extra servings of fresh vegetables daily. The physician may order additional nutrients as necessary.
 - Pregnant offenders shall be issued a CDCR Form 7410 for any medical accommodations or restrictions if indicated.
 - Pregnant offenders shall be referred to the dentist on a priority basis for evaluation and treatment of periodontal disease.
 - The OB Coordinator shall prepare, in advance, a Request for Authorization of Temporary Removal form for all pregnant offenders within 30 days prior to the delivery date. These forms shall be delivered to the Watch Commander's office. This shall enable custody staff to prepare the offender for transportation to an outside facility in a timely manner.
- Pregnant offenders shall be scheduled and ducated for their OB visits as follows, unless otherwise indicated by the supervising OB or NP:
 - Every 4 weeks in the first trimester and up to 24 – 26 weeks gestation.
 - Every 3 weeks up to 30 weeks gestation.

- Every 2 weeks up to 36 weeks.
- Weekly after 36 weeks up to delivery.
- Pregnant offenders shall be provided additional services based on the information provided in the Hollister Maternal/Newborn Record System forms.
- Every pregnant offender shall be referred to a Medical Social Worker for Case Management, to discuss placement of her unborn child and options available for proper placement and care of the child after delivery. A Medical Social Worker shall assist the pregnant offender with access to a phone to contact relatives even during their unendorsed status regarding newborn placement. The Medical Social Worker shall initiate and oversee the management of all newborn placements.

54045.5 Outside Consultation – Labor

Each institution housing pregnant offenders, based on geographical location in relation to the hospital, shall develop a local operating procedure to ensure a safe and healthy delivery.

When the pregnant offender is sent for medical treatment or consultation to an outside facility, copies of all prenatal forms and the completed referral forms to the outside facility shall accompany her. Any paperwork returning with the offender shall be given to the RN on duty in the Triage and Treatment Area (TTA), OHU or CTC, who shall notify the Supervising OB of the offender's return, medical status, and recommendations.

At the time of labor/deliver, a copy of all prenatal forms shall accompany the offender to the hospital.

54045.6 Emergency Transport

The HCM/CMO shall ensure that all institution medical staff are instructed in the emergency protocol. In the event of an emergency transport for the delivery of a baby, the Supervising Obstetrician, Physician, or RN shall immediately be notified and provide appropriate assistance and/or orders. A pregnant offender in labor shall be treated as an emergency and shall be transported immediately via ambulance. The HCM/CMO or supervising Obstetrician shall be informed of all emergencies by the medical staff on duty and be appraised of the offender's labor status.

The RN in the OHU, CTC, or OB clinic shall prepare all copies of prenatal forms that shall accompany the offender to the hospital. These prenatal forms shall be taken to the Watch commander's office immediately.

Custody staff shall prepare and accompany the offender for transportation to the outside facility via ambulance following emergency transport procedures.

All emergency medical transports shall take immediate priority and be expedited through the Vehicle Sallyport. The Watch Commander must take all necessary steps to ensure the emergency transport is processed as quickly as possible. Emergency medical transports shall be allowed to depart institutional grounds before, during, or after any institutional count.

The Outside Patrol Sergeant shall coordinate with the Central Control Sergeant and the Watch Commander for clearance of the offender being transported through the Vehicle Sallyport. The Watch Commander shall immediately notify the Correctional Captain/Administrative Officer-of-the-Day (AOD) in the event an emergency medical transport is delayed for any reason.

The Watch Commander shall notify the AOD of a child's birth. Notification shall include the name and CDC number of the offender, time of departure, location of transport, and time of delivery. The medical department shall notify the Watch Commander of any non-routine deliveries.

54045.7 Postpartum Care

Upon return, any inmate-patient who delivers a child via C-Section shall be admitted to the OHU or CTC via the TTA. Any offender who delivers a child vaginally shall be assessed in the TTA to determine appropriate housing and initiate postpartum care.

Orders for routine postpartum care shall be noted and initiated by the RN in the TTA, CTC, or OHU.

The Supervising Obstetrician or RN/NP shall determine when the offender is cleared for housing in the general population.

Medical lay-in shall be completed by the Supervising Obstetrician or RN/NP. A ducat shall be issued for the offender's 6-week postpartum check-up. At the post-partum check-up, the Supervising Obstetrician or RN/NP shall determine whether the offender may be cleared for full duty or if medical restrictions are still warranted.

Offenders housed in the CTC shall follow the CTC policies and procedures as written.

Offenders shall be afforded family planning services if their release and/or parole date fall within 6 to 8 weeks after delivery.

54045.8 Unit Health Records (UHR)

The OB Coordinator shall maintain a health record, which includes the offender's name, CDC number, housing status, expected date of delivery, and the Hollister Maternal/Newborn Record System forms.

All documentation regarding pregnancy-related information shall be placed inside the Unit Health Record (UHR) by the Medical Records Department staff.

The Medical Records Department shall be notified of all pregnant offenders. Their responsibilities include:

- Entering the offender's name on the OB roster for distribution.
- Updating the roster every two weeks and distribute it to pertinent staff.
- Obtaining the offender's consent for record release and sending for any necessary medical records as requested by the provider. Prenatal records shall be faxed immediately.
- Maintaining the confidentiality of the UHR in accordance with Section 3370 of the Title 15.

54045.9 Methadone Maintenance

The CDCR shall provide methadone treatment to all pregnant offenders who have been on heroin or who are currently receiving methadone treatment.

The HCM/CMO or designee shall ensure that all medical staff are instructed on the Methadone Maintenance Treatment Programs protocol and procedures of the institution. Offenders on methadone maintenance shall be recommended for immediate transfer to CIW through the CMO to CMO transfer process.

The time and the last administered daily dose of methadone shall be verified by the OB Coordinator or RN on duty in the OHU, CTC, or TTA after hours, on weekends, and holidays; and reported to the HCM/CMO and the classification and Parole Representative.

While awaiting transfer, the OB Physician or the Physician on Call (POC) after hours shall admit the offender to the OHU or CTC where she shall remain until the transfer process is complete.

54045.10 CIW Methadone Treatment

The RN in R&R shall notify the Supervising Obstetrician of any offender being processed in R&R who is determined to be pregnant either by her own admission, physical appearance and/or written documentation, and who has used heroin within 2-3 days prior to incarceration either by her own admission or written documentation by the parole agent. The offender shall be referred to verify pregnancy, drug screening, and initiation of methadone if treatment is indicated.

Any pregnant offender receiving methadone treatment shall be enrolled in the Methadone Maintenance Program at the institution.

The RN or MTA in R&R shall notify the Supervising Obstetrician of any pregnant offender on methadone treatment who has transferred from another institution, county jail, or from the community. Once methadone treatment, including the dose, has been verified, the offender shall be enrolled in the Methadone Maintenance Program. The treating physician of the methadone program shall provide regular assessment of all pregnant offenders on methadone.

A methadone chart shall be initiated and maintained to include all the forms required by the State and Federal Drug and Alcohol Departments.

54045.11 Security

Staff shall supervise pregnant offenders in the same manner as other female offenders, with the exception of application of restraint gear and physical restraint of pregnant offenders with force. Restraint gear (handcuffs) and physical restraint shall only be utilized when a pregnant offender poses a threat to the physical safety of herself or others (including the unborn child), threat of substantial damage to state property, or attempted escape. **No leg restraints or waist chains shall be applied to pregnant offenders.** In every instance, special effort shall be made to avoid harm to the unborn child. If handcuffs are applied, the offender's arms shall be brought to the front of her body for application.

When transporting the offender off grounds for medical care and treatment, the application of restraint gear shall be restricted to handcuffs to the front of the offender only. The Request for Authorization of Temporary Removal for Medical Treatment Form (CDC Form 7252) shall state in the "Remarks" section, "Application of restraint gear limited to handcuffs in front of offender only." **At no time shall a pregnant offender who is in labor be placed in restraints by the wrists, ankles, or both, including during transport, delivery, and while in recovery at the hospital after giving birth.** Recovery is the length of time the offender stays in the hospital after giving birth.

Pregnant offenders who have committed a serious disciplinary offense warranting placement in an Administrative Segregation Unit (ASU) shall be placed in segregation status, pending medical evaluation and administrative review. When escorting an offender to the ASU, application of restraint gear shall be restricted to handcuffs to the front of the offender only. No leg restraints or waist chains shall be applied to pregnant offenders. The Physician or RN shall perform the medical evaluation, with concurrence of the POC, within 24-hours, to document the offender's suitability for housing in the ASU. Pregnant offenders housed in the ASU shall be housed on the lower tier. Housing status, i.e., ASU or Security Housing Unit, does not require a special level of medical care. Medical care, regardless of housing status, shall be based on the offender's medical condition as determined by appropriate medical care providers.

The Facility Captain shall conduct the Administrative Segregation Placement Order review and hearing in accordance with applicable California Code of Regulations. If it is determined that the offender's medical condition would not preclude housing in the ASU and her behavior warrants continuous segregation, the offender shall be retained in the ASU and housed on the first tier in a lower bed. The offender shall be referred to the Institutional Classification Committee if retention is recommended beyond 10 days. While in ASU, the offender shall continue to receive prenatal medical care and treatment.

54045.12 Diagnosis of Periodontal Disease

Pregnant offenders, in the second trimester, shall receive a comprehensive full mouth periodontal examination, charting, and classification to determine the periodontal condition and an appropriate treatment plan. The second trimester is the safest period in which to provide routine dental care. The emphasis in the dental treatment during this time period is to control active disease and eliminate potential problems that occur later in pregnancy. Elective dental care and treatment is best postponed since prolonged chair time should be avoided to prevent complication of supine hypotension. Pregnant offenders shall have their plaque index score determined and recorded on a CDCR Form 237B or 237C.

54045.13 Treatment of Periodontal Disease

Pregnant offenders shall benefit from the Periodontal Disease Program as delineated here and in Inmate Dental Services, Chapter 2.5, Periodontal Preventive Program for Pregnant Inmates.

54045.14 Education

Methods and procedures to control periodontal disease shall be taught and demonstrated to pregnant offenders by dental staff as outlined in Chapter 2.4, Periodontal Disease Program.

54045.15 Clinical Treatment

Pregnant offenders, in the second trimester, shall receive routine scaling and prophylaxis regardless of their ability to comply with acceptable personal oral hygiene procedures during the gestation period. This treatment shall occur within their second trimester of gestation. A re-evaluation shall be accomplished within the first half of the third trimester.

Pregnant offenders with moderate or advanced periodontitis shall receive non-surgical deep scaling and root planning procedures, regardless of their ability to comply with acceptable personal oral hygiene procedures during the gestation period. This treatment shall occur within their second trimester. A charting and re-evaluation shall be accomplished 30 days following completion of deep scaling and root planning procedures, and subsequent follow-up care planned.

The attending dentist shall not utilize subgingival periodontal medication (e.g., Atridox, Periostat, etc.) in the treatment of pregnant offenders. Tetracycline medications are contraindicated in the treatment of pregnant women.

All pregnant offenders' periodontal treatment visits shall be documented by the attending dentist on the appropriate CDCR Form 237B or 237C.

54045.16 Child Birth

During pregnancy, the offender may elect to have a support person present during child birth. The support person may be an approved visitor or the institution's Doula. The approval for the support person will rest with the Warden or designee and will be on a case-by-case review. Reason for denial shall be provided to the offender in writing and must address the safety/security concerns for the offender, infant, public, and/or staff.

Offenders shall be allowed to walk as prescribed by the attending doctor. The area used to walk around will be determined based on security needs.

54045.17 Visiting

Appointed guardians of the child and individuals who wish to visit the inmate-patient and child in the hospital shall comply with applicable California Code of Regulations, Article 7, Visiting Rules.

54045.18 Pregnant Offender Property

Pregnant offenders will be allowed one additional larger pair of shoes to accommodate the swelling of their feet.

54045.19 Breastfeeding

Offenders shall be informed of the benefits of breastfeeding. In addition to the benefits, offenders should be educated about breastfeeding with active tuberculosis, HIV infection, illicit drug use, and while on certain prescribed medication. Offenders who choose to breastfeed their baby shall be allowed access to a breast pump and refrigerator/freezer to store the pumped milk. The breast pump shall be a manual pump able to be cleaned with soap and water. Coordination for the milk to be picked-up by the child's care giver shall be arranged prior to pumping and storing the milk.

54045.20 Community Treatment Programs

Any offender who gives birth after her receipt by the CDCR shall be provided notice of and written application for the Community Prisoner Mother Program (CPMP) and declared eligible to participate upon meeting the criteria. The notice shall contain the guidelines for qualification, the timeframe for application, the program, and the process for appealing a denial of admittance.

Family Foundations Program (FFP) is an alternative sentencing program in which mothers are recommended for placement by the sentencing court. When an offender who meets the criteria for FFP placement is received in prison, staff shall refer the offender's case back to the sentencing judge recommending placement into the FFP program.

Any community treatment program shall include, but is not limited to:

- Prenatal Care.
- Access to prenatal vitamins.
- Childbirth education.
- Infant care.

54045.21 Revisions

The Associate Director, Female Offender Programs and Services, or designee, shall ensure the contents of this Section are current.

ARTICLE 46 – INMATE HOUSING ASSIGNMENTS

Effective April 13, 2009

54046.1 Policy

It is departmental policy and therefore the expectation that inmates accept Inmate Housing Assignments (IHA) as directed by staff. Additionally, it is the expectation all inmates double cell when instructed to do so by staff and this policy is adhered to in the General Population (GP), an Administrative Segregation Unit (ASU), or a Security Housing Unit (SHU). The procedures for GP shall also apply to inmates who are housed in specialty program housing units such as a Protective Housing Unit, Transitional Housing Units, etc. If staff determines an inmate is suitable for double-cell housing, the inmate shall be expected to accept the housing assignment. Inmates shall be held accountable and responsible for their actions, and be subject to disciplinary action and consideration for placement in more restrictive housing for refusing a double-cell housing assignment. All IHA's shall be made on the basis of available information, individual case factors, and objective criteria necessary to assign appropriate housing for all inmates. The IHA policy will ensure housing practices are made consistent with the safety, security, and treatment of the inmate, as well as the safety and security of the public, staff, and institutions.

54046.2 Purpose

The purpose of the IHA policy is to establish the procedures for determining the initial and subsequent housing assignments of inmates. This policy

informs staff and inmates of their responsibility, provides details of the double-cell housing process and the expectation for all inmates to accept double-cell housing, and explains the ramifications for noncompliance.

54046.3 Responsibility

The Warden/Administrator of the institution/facility shall be responsible for maximizing proper bed utilization, ensuring inmates are appropriately housed at the institution, implementing departmental policy in accordance with prison design and institution safety and security. Staff must use correctional experience and training, correctional awareness, and a sense of correctional reasonableness to determine suitability for dormitory, celled, and single-celled housing.

54046.4 Review of Inmate's Case Factors

All staff involved in the review and approval of an inmate's housing assignment must be cognizant of all available factors to be considered prior to determining an inmate housing assignment.

When evaluating compatibility, the approving authority shall consider each inmate candidate's background and make a discretionary decision based on case factors that include, but are not limited to, the following:

- Length of sentence.
- Enemies and victimization history.
- Criminal influence demonstrated over other inmates.
- Vulnerability of the inmate due to medical, mental health, and disabilities.
- Reason(s) for segregation.
- History of "S" suffix determination.
- History of in-cell assaults and/or violence.
- Prison gang or disruptive group affiliation and/or association.
- Nature of commitment offense.

Staff involved in the review of an inmate's case factors must be particularly aware of case factors that indicate an inmate has been either the victim of, or the perpetrator of, a sexual assault, and must screen for appropriate housing pursuant to Chapter 5, Article 44.

A classification committee and/or the screening authority shall review the Central File (C-file) and other available information to determine if the inmate has a history of in-cell assaultive, abusive, or predatory behavior towards a cellmate, or has been the victim of a sexual assault. A staff member at the level of a correctional supervisor or above shall be designated as the screening authority. Staff shall weigh circumstances documented in the C-file such as:

- Documented reports from a prior cellmate(s) the inmate intimidated, threatened, forced, and/or harassed him or her for sex.
- Documentation the cellmate(s) refused to return to a cell occupied by the inmate because of fear, threats, or abuse perpetrated by the inmate.
- Documentation the inmate has been the victim of a sexual assault.
- Adjudicated Department Rules Violations Reports (RVR) where the inmate was found guilty as a perpetrator in an act of physical abuse, sexual abuse, sodomy, or other act of force against a cellmate.

54046.5 Initial Screening

Revised September 6, 2013

Upon arrival at an institution reception center, a program institution, or an ASU or SHU, an inmate shall be screened for an appropriate housing assignment. The screening authority shall review the C-file and other available information, interview the inmate, and complete the Strategic Offender Management System (SOMS) Initial Housing Review (IHR).

Based on available information, including an interview with the inmate, the screening authority shall determine if the inmate is suitable for dorm/cell housing with or without restrictions. Restrictions are any case factors which may limit the inmate's placement options at the institutions, such as, but not limited to:

- Security issues including ASU and SHU placement.
- Request for Protective Custody.
- Medical or mental health case factors.
- Integrated Housing Code.

Staff will continue to ensure current housing policies regarding special category inmates such as *Coleman, Plata, Madrid, Armstrong, and Clark*, covered under specific litigation, remain in place during the housing process. Staff will also ensure those inmates in need of effective communication will be provided appropriate accommodation during the process.

Additionally, the screening authority shall review prior in-cell behavior towards cell partners. Verification an inmate is or has been predatory

towards a cell partner, has a history of in-cell sexual abuse, is or has been assaultive towards a cell partner, has been the victim of in-cell physical or sexual abuse, or demonstrates any significant in-cell violence against a cell partner, shall require the inmate be referred to a Unit Classification Committee (UCC) and/or an Institution Classification Committee (ICC) for single-cell status consideration.

The screening authority shall document the placement concerns which require single-cell assignment on the IHR. If the information is derived from the inmate interview, the screening authority shall document the interview information on a CDC Form 128-B, General Chrono, and reference it as supporting documentation by date on the IHR. If single-cell status is recommended by a screening authority at the level of Correctional Sergeant, an approving authority at the level of Correctional Lieutenant or above will document their approval, or disapproval, on the IHR/Single Cell approval.

54046.5.1 Initial Screening—Administrative Segregation Unit/Security Housing Unit

Upon placement in an ASU or SHU, inmates shall be screened for an appropriate cell assignment. The segregation authority shall be a designated staff member at the level of Correctional Lieutenant or above. The segregation authority shall review the C-file and other available information, interview the inmate, and shall be responsible for ensuring the completion of CDC Form 114A-1, Inmate Segregation Profile.

Based on the available information, including an interview with the inmate, the segregation authority shall determine if the inmate is suitable for single-/double-cell housing.

Verification an ASU or SHU inmate is or has been predatory towards a cell partner, has a history of in-cell sexual abuse, is or has been assaultive towards a cell partner, has been the victim of in-cell physical or sexual abuse, demonstrates any significant in-cell violence against a cell partner, or has a history of propensity for victimization, shall require the inmate be single celled pending administrative review and subsequent ICC review and approval.

The segregation authority shall document placement concerns which require single-cell assignment on the CDC Form 114A-1. If the information is based on the inmate interview, then the segregation authority shall document the interview information on a CDC Form 128-B, and reference it as supporting documentation by the date on the CDC Form 114A-1. In cases where the segregation authority temporarily approves an inmate for double-cell assignment pending Administrative Review, the decision shall be based upon an evaluation of the inmate's case factors through review of the C-file or completed CDC Form 114A-1, consideration of reasons for ASU placement, and the interview with the inmate. The segregation authority shall complete a CDCR Form 1882-B, Administrative Segregation Unit/Security Housing Unit Double-Cell Review, and sign the CDC Form 114A-1, Inmate Segregation Profile, in the Special Information section, in the Double Cell/Pending Administrative Review box.

During the first workday following an inmate's placement in ASU, the Administrative Reviewer shall review the screening authority's cell determination and confirm or amend the screening authority's temporary cell assignment.

The Administrative Reviewer decision shall be based on:

- Interview with the inmate.
- Review of the C-file and/or completed CDC Form 114A-1.
- Circumstance of ASU/SHU placement.
- Any medical issues and/or mental health clinical staff input.

The Administrative Reviewer shall note the decision for double cell or single cell assignment on the CDC Form 114-A, Inmate Segregation Record, in the Daily Activity section, CDC Form 114A-1, and the CDC Form 114-D, Order for Placement/Retention ASU. The case shall be referred to ICC to review the inmate's long-term housing assignment.

ICC shall review the inmate's housing and safety concerns. ICC shall determine if the inmate is compatible with the other inmate assigned to the cell, if double celled. If the inmate is the only inmate assigned to the cell, ICC shall evaluate if the inmate is cleared for double-cell occupancy, or designate the inmate as being on single-cell status.

If ICC confirms single cell assignment, an "S" suffix shall be applied to the inmate's custody designation. This information shall be documented as a committee action on the CDC Form 128-G, Classification Chrono, entered in the Distributed Data Processing System (DDPS), and noted on the CDC Forms 114A, 114A-1, and 262, Custody Classification Assigned. Additionally, at each subsequent ASU/SHU review, ICC shall determine the suitability for double-/single-cell occupancy.

54046.6 Documentation*Revised September 6, 2013*

The decision regarding inmate housing and determination of suitability for dormitory or celled housing, eligibility for double housing, or designation of single-cell status, shall be documented as follows:

- IHR.
- CDCR Form 1882-B.
- In the Evaluation section of the Institutional Staff Recommendation Summary for Reception Center inmates.
- On the CDC Form 128-G during the following actions:
 - Initial Review.
 - Annual Review.
 - Housing Review (including reasons for segregation).
 - Referral to the Classification Staff Representative.
 - Referral to the Departmental Review Board.

The designation of an "S" suffix shall be documented and affixed to the inmate's custody on the following documents and data:

- CDC Form 262.
- Distributed Data Processing System.
- CDC Form 128-G.
- IHR.
- Temporary Single Cell Status Request.

Affixing and removing Single Cell and Temporary Single Cell Designation in SOMS

SOMS can accommodate the two types of Single Cell designations, **Temporary Single Cell** and **Single Cell** status ("S" suffix that has been affixed by Classification Committee).

The Temporary Single Cell is designed to appropriately house an inmate pending confirmation by Classification Committee and affixing an "S" suffix. A Temporary Single Cell is affixed in SOMS via SOMS screens IPTT105-Initial Housing Review or IPTS028B-Temporary Single Cell Status Request.

An "S" suffix must be entered in the Distributed Data Processing System (DDPS) via the Counselor entry screen. Once the entry is made in DDPS the "S" suffix is automatically transferred to SOMS within an hour of entry. Once SOMS has received the "S" suffix designation it is reflected in the Inmate Header and SOMS prevents the "S" suffix inmate from being housed with another inmate.

Review and Approval/Denial of Temporary Single Cell Status on the SOMS IHR

Temporary Single Cell requests must be approved by a staff member at the level of Correctional Lieutenant or higher. The Approving staff member shall note the Approval or Denial of the Temporary Single Cell in SOMS.

Confirmation/Denial of Temporary Single Cell requests at Classification Committee review in SOMS.

If as a result of Committee decision the Temporary Single Cell inmate will be given an "S" suffix, the approval will be entered on SOMS screen IPTS028B and the "S" will be entered in the Counseling entry screen of the DDPS. Once the "S" is entered in DDPS it will automatically update SOMS and the "S" will be displayed in the inmate's SOMS Header.

If Committee elects to disapprove the "S" suffix no entry will be required in DDPS. However, the decision to remove the Temporary Single Cell must be entered in SOMS in order to remove the Temporary Single Cell status from the inmate.

If an inmate has been incorrectly identified as single-cell status after a UCC/ICC action, a subsequent UCC/ICC action shall be required to remove/correct the "S" suffix.

To reduce the possibility of housing single-cell status inmates with another inmate or non-designated single-cell housing status inmate, staff shall review the housing status of all inmates being processed for a bed cell move via SOMS prior to authorization.

54046.7 Double-Cell Assignments in General Population*Revised September 6, 2013*

Unless approved for single-cell assignment, inmates are expected to share occupancy of living quarters, either in a dormitory setting or within an individual cell. The day of arrival at an institution, or a reception center, an IHR shall be completed, and if the screening authority determines there are no double-cell prohibitions, the inmate shall be expected to double cell. If the inmate refuses to double cell, progressive discipline shall be initiated, and the inmate will be considered for alternative and more restrictive housing.

54046.7.1 Double-Cell Assignments in ASU or SHU

In an ASU or SHU, determining double-cell assignment shall be based upon an evaluation of the involved inmate's case factors through a review of the C-file, the reason for ASU or SHU placement, and an interview with the affected inmate(s). In these cases, the segregation authority shall complete a CDCR Form 1882-B, and sign the CDC Form 114A-1, Special Information section, in the Double-Cell/Pending Administrative Review box. The segregation authority shall note the decision for single or double-cell assignment on the CDC Form 114-A, Daily Activity section, and CDC Form 114A-1. The case shall be referred to ICC to review the inmate's long-term housing assignment.

Unless approved for single-cell assignment, an inmate in ASU or SHU is expected to share a cell with another inmate. The process for assigning more than one inmate to the same cell in ASU and/or SHU shall be initiated by a staff recommendation or per request by the inmate candidate. The documentation of the process shall be recorded on the CDCR Form 1882-B.

Approval of double-cell assignments shall be based upon a review of the C-file, an interview with each inmate candidate, consideration of each inmate's signature affirming compatibility, and an evaluation of security concerns. Each inmate candidate who agrees to the assignment is expected to sign the CDCR Form 1882-B to indicate compatibility prior to double celling the inmates. If an inmate refuses to sign the agreement, then this shall also be documented in the designated section of the CDCR Form 1882-B.

A staff member at the level of Correctional Officer, CC-I, or above shall complete parts 1 and 2 of the CDCR Form 1882-B by identifying the initiator of the request, interviewing each inmate candidate, and having the inmate candidates sign the form to indicate their placement in the same cell is a compatible assignment. The staff member performing this function shall also provide his or her printed name and signature as the staff witness, and date the CDCR Form 1882-B.

The staff witness shall then forward the CDCR Form 1882-B to a staff member at the level of Correctional Lieutenant, CC-II, or above. The approving authority shall be responsible for considering each inmate's case factors and deciding whether to approve or disapprove the proposed cell assignment. An approving authority may determine there is no information available to indicate the inmates are incompatible, but there are other circumstances that lead the evaluator to believe approving the assignment would be contrary to legitimate penological interests or may threaten institution safety and security.

54046.8 Single-Cell Criteria

Single-cell status shall be considered for those inmates who demonstrate a history of in-cell abuse, significant in-cell violence towards a cell partner, verification of predatory behavior towards a cell partner, or who have been victimized in-cell by another inmate. Staff shall consider the inmate's pattern of behavior, not just an isolated incident. Staff must weigh information in the inmate's C-file with correctional awareness and knowledge of the inmate population, facility environment, and the level of supervision in the housing unit. The following factors must be considered when evaluating single-cell status:

- An act of mutual combat in itself does not warrant single-cell status.
- Predatory behavior is characterized by aggressive, repeated attempts to physically or sexually abuse another inmate.
- Documented and verified instances of being a victim of in-cell physical or sexual abuse by another inmate.

Staff shall consider whether the inmate has since proven capable of being double celled.

The classification committee shall consider the circumstances of a prior assault, length of time in general population without disciplinary violations, precipitating factors, or new issues affecting the inmate's behavior.

When confidential information is relied upon to designate single-cell status, the reliability of the source shall be determined in accordance with the California Code of Regulations (CCR), Title 15, Section 3321, and shall be properly disclosed to the inmate via the CDC Form 1030, Confidential Information Disclosure.

54046.8.1 Single-Cell Assignments in ASU or SHU

In cases where an inmate on single-cell status is being referred for transfer to the General Population, the ICC is required to address the removal or the retention of the single-cell status as part of the referral for transfer review. The committee shall document the specific reason(s) on a CDC Form 128-G supporting the removal or retention of the single-cell status.

54046.9 Classification Review

The UCC/ICC shall review and determine an inmate's need for single-cell status as part of the Initial and the Annual Classification Review. If upon review a UCC determines the "S" suffix is no longer warranted and an ICC imposed the "S" suffix, the UCC shall refer the case to ICC for review and final determination.

As it is the expectation all inmates will double cell, the determination of single-cell status shall be documented as part of the ICC review and updated at the inmate's annual classification committee review. Prior to referral for transfer or placement consideration, the UCC or ICC shall determine the inmate's need for continued single-cell status. A classification committee's decision regarding involuntary cell assignments or housing status reevaluations shall be documented on a CDC Form 128-G.

54046.10 Recommendation for Double Cell or Single Cell Due to Mental Health Concerns

In cases where single-cell status is recommended by clinical staff due to mental health or medical concerns, a classification committee shall make the final determination of an inmate's cell assignment. The classification committee shall consider the clinical recommendations made by the evaluating clinician with assistance from the clinician who participates in the committee and review the inmate's case factors when determining the housing assignment. Single-cell status based upon clinical recommendation is usually a temporary short-term measure and must be periodically reviewed, minimally at an inmate's annual review or more frequently at the UCC/ICC or clinician's request.

54046.11 Disciplinary Factors

If an inmate refuses to be housed in appropriately determined housing, they shall be subject to the disciplinary process, with the potential to be housed in alternative and more restrictive housing. Refusal to participate will result in the issuance of a RVR for Conduct, CCR subsection 3005(c), Refusing to Accept Assigned Housing, for the specific act of Willfully Resisting, Delaying, or Obstructing any Peace Officer in the Performance of Duty (CCR subsection 3323(f)(6)), and shall be considered after the first RVR for placement in more restrictive housing such as an ASU or a SHU.

Violation of Refusing to Accept Assigned Housing of subsections 3005(c), 3323(f)(6), and 3323(g)(8) shall result in:

- First offense violation shall result in placement in Privilege Group C for up to 90 days.
- Second offense and subsequent offense violation(s) within a 12-month period shall result in placement on Privilege Group C for up to 180 days and a referral as a program failure to classification committee for placement on Work Group C and Privilege Group C. An inmate who is deemed a program failure by a classification committee is subject to having their personal property/appliances disposed of in accordance with procedures outlined in Section 3191.

Following the completion of the disciplinary process and a finding of guilt, security precautions and disciplinary restrictions may remain in effect for a period of time designated by the Senior Hearing Officer consistent with this policy. If a finding of not guilty results, the security precautions shall be removed.

54046.11.1 Placement in more Restrictive Housing

Any inmate charged with Refusing to Participate in the IHA shall be considered for placement in an ASU and reviewed by the ICC to determine the appropriateness of ASU retention, pending disciplinary matters and/or future housing considerations. At each ICC review, the inmate's case factors shall be reviewed for the appropriateness of the double cell or dormitory approval status, and to determine if the inmate will participate in the IHA if case factors do not preclude such.

54046.11.2 Assessment of SHU Term

A determination period of confinement in a SHU may be established for an inmate when found guilty of Refusing to Participate in an IHA. The term shall be established by an ICC utilizing the standards set forth in the SHU Term Assessment Chart in CCR Section 3341.5.

54046.12 Revisions

The Director, Division of Adult Institutions or designee shall be responsible for ensuring the contents of this Article are kept current and accurate.

DOM, Chapter 5, Article 44.

ARTICLE 47 – INTEGRATED HOUSING

Effective January 18, 2008

54055.1 Policy

It is the policy of the California Department of Corrections and Rehabilitation (CDCR) that race will not be used as a primary determining factor in housing its inmate population. All inmate housing assignments shall be made on the basis of available information and individual case factors necessary to implement an integrated housing plan. This policy will ensure that housing practices are made consistent with the safety, security, treatment, and rehabilitative needs of the inmate, as well as the safety and security of the public, staff, and institutions.

It is the intent of the Department to establish a housing policy for male inmates that integrates them Department-wide, and that is consistent with housing practices already in place for female inmates.

54055.2 Purpose

The purpose of the Integrated Housing Policy (IHP) is to safely integrate inmates in celled and dormitory housing. This policy informs staff and inmates of their responsibilities, provides details of the integrated housing process and codes, and explains the ramifications of noncompliance.

54055.3 Definitions**Integrated Housing**

Integrated Housing refers to the housing of inmates into beds without using race as the sole determinative criterion while minimizing any potential impact upon an inmate's safety, and maintaining the safety and security of the public, staff, and institutions.

Integrated Housing Code

The Integrated Housing Code (IHC) is a housing code that reflects the inmate's eligibility to be racially integrated in a housing environment. The inmate may be eligible to be housed with all races, with only certain races, or with only his own race based on individual case factors. The IHC will be assigned during the reception center intake process and is subject to review by a classification committee.

54055.4 Integrated Housing

An inmate's race will not be used as a primary determining factor in housing an institution's inmate population. Inmate housing assignments shall be made on the basis of available documentation and individual case factors to implement an IHP. Individual case factors include, but are not limited to:

- History of racial violence.
- Commitment offense/time to serve.
- Classification score.
- Custody level.
- Education.
- Disciplinary history.

Housing assignments will be determined in a manner that will ensure that the safety, security, treatment, and rehabilitative needs of the inmate are considered, as well as the safety and security of the public, staff, and institutions.

54055.5 Information Technology and Integrated Housing

The information contained in this section is applicable to male inmates. The CDCR will update the authorized computer tracking system fields to include coding that will be used to identify each inmate's eligibility to integrate. Based on a review of an inmate's individual case factors, all available information, and a personal interview with an inmate, an IHC will be assigned.

54055.5.1 Integrated Housing Codes

Revised October 9, 2013

- RE Racially Eligible: an inmate can live with members of any race.
- RP Restricted Partially: an inmate is unable to live with members of a particular race(s).
- RO Restricted to Own: an inmate can live only with member of his own race/ethnicity.
- RT Temporarily Restricted by Custody: this is used whenever custody has concerns about the inmate's ability to be appropriately housed, pending further review.
- RR Restricted by Refusal: an inmate is otherwise eligible for integrated housing but refuses to participate. This inmate shall be restricted by management to ensure safety and security, but the basis of the restriction is the inmate's refusal.

Racially Eligible

Inmates that are racially eligible to house with any race will be coded as RE in the Strategic Offender Management System (SOMS) Integrated Housing Review. It is the expectation of the CDCR that all inmates will be coded RE, unless specific case factors dictate otherwise. Those inmates that have been victims or perpetrators of racially motivated crimes shall be evaluated on their case factors in totality before being determined racially eligible or ineligible for an integrated housing assignment.

Restricted Partially

Inmates considered ineligible to house with inmates of a particular race shall be coded RP for Restricted Partially. For example, a Black inmate may be determined to be ineligible to house with Hispanic inmates, but eligible to house with White or Other inmates. This inmate would be coded RP. His ineligibility to house with another race/ethnicity shall be based on individual case factors. The individual case factors shall be considered by custody and classification staff in assigning this code. Assignment of this code will require staff to identify the races/ethnic groups with whom the inmate is determined ineligible to house.

Restricted to Own (Race)

Inmates who are determined eligible to be housed with only their own race or ethnic group based on individual case factors will be coded RO for Restricted to Own. During the intake process or classification process, when available information and case factors indicate the inmate cannot successfully house with inmates of other races, the IHC of RO will be applied. Inmates who are deemed restricted to their own race will not necessarily be precluded from integration in other aspects of institutional operations such as an integrated cellblock, dormitory setting, or program assignments.

Temporarily Restricted by Custody

Inmates with insufficient information or documentation for the Receiving and Release supervisor to make an objective determination shall be coded RT for Temporarily Restricted by Custody. This code may be used when conflicting information arrives with the inmate or when questionable statements or behavior by the inmate are observed that are not consistent with the inmate's claim of eligibility. This code may also be used during the inmate's incarceration when his observed behavior is not consistent with his assigned eligibility code and it is therefore appropriate to have the assigned code reviewed by classification committee. The IHC of RT is temporary and shall be changed when additional information and documentation are obtained and evaluated.

Restricted by Refusal

Inmates who are determined eligible to house with inmates of other races, but who simply refuse to be housed with a race other than their own, will be coded RR for Restricted by Refusal. This code will be used when an otherwise eligible inmate refuses to accept a housing assignment consistent with his IHC, and his case factors and all available information and documentation do not preclude such placement. Refusal to accept an integrated housing assignment, when all available documentation and information does not preclude such, shall result in disciplinary action. Additionally, the inmate will be deemed a threat to the safety and security of the institution, and will be considered for alternative and more restrictive housing such as an Administrative Segregation Unit (ASU), or a Security Housing Unit (SHU).

54055.6 Receiving and Release Responsibility for Determining Integrated Housing Eligibility

Inmates arriving in Receiving and Release at an institution will be interviewed by a custody supervisor in accordance with the established process for intake. The interview process will elicit initial information about the inmate that will be used, in conjunction with any known case factors, to determine the inmate's housing eligibility. Staff will also consider other available information that would indicate or present an immediate risk or safety concern for the inmate, such as, but not limited to:

- Security issues including ASU placement.
- SHU.
- Request for Protective Custody.
- Prison gang or disruptive group affiliation or association.
- Medical or mental health issues.
- Length of term.
- Height, weight, and age.

Receiving and Release supervisors shall use the information provided during the interview with all available information and documentation to determine the inmate's eligibility for an integrated housing assignment.

54055.7 Housing and Discipline

Revised October 9, 2013

Inmates will be housed in the first available and appropriate bed, consistent with their assigned IHC. Staff shall not delay housing an inmate in the first available and appropriate bed for the sole purpose of accomplishing an integrated assignment between races/ethnicities. When housing inmates, staff shall be alert to security issues that may be present, including the inmate's prior placement in an ASU or SHU or documented safety concerns. Integrated housing procedures do not supersede housing policies governing the placement of inmates into special programs including, but not limited to, those of the Mental Health Services Delivery System.

Inmate movement will be initiated using existing departmental practices, inclusive of the SOMS internal movement/bed assignment processes, and housing and control room index cards.

Any inmate that refuses to be appropriately housed consistent with his assigned IHC shall be subject to the disciplinary process applicable to the specific act.

54055.8 Non-Compliance with the IHP

Non-compliance with the IHP by an otherwise eligible inmate will require review of the individual case factors. Every inmate is expected to comply with the IHP in the absence of precluding case factors. Non-compliance shall subject the inmate to disciplinary action and consideration of being housed in alternative and more restrictive housing in keeping with departmental policy regarding program failure.

Disciplinary Process

Inmates refusing to participate in the IHP, when all case factors deem they are eligible to participate, shall be issued a Rules Violation Report (RVR) for Conduct, California Code of Regulations Section 3005(c), Conduct, for the Specific Act of Willfully Resisting, Delaying, or Obstructing any Peace Officer in the Performance of Duty (Title 15 subsection 3323(f)(6)), a Division D offense. The inmate shall be recoded with an IHC of RR, Restricted by Refusal. The inmate shall be considered after the first RVR for placement in more restrictive housing such as an ASU or a SHU. At any time during this process the inmate may elect to participate in the IHP.

Disciplinary restrictions will be applied as a result of a disciplinary process where inmates are afforded due process. Inmates found guilty of committing a Refusal to Participate in the IHP offense through the inmate disciplinary process may be subject to credit and privilege loss process. The suspension of privileges based on a finding of guilt in a disciplinary hearing, pursuant to CCR Section 3269.1, shall be assessed as follows:

- First offense: A finding of guilt in a disciplinary hearing for Refusal to Participate in the IHP may result in the loss of privileges including, but not limited to, any or all of the following, for up to a 90 day period:
 - Canteen.
 - Appliances.
 - Vendor Packages.
 - Telephone Privileges.
 - Personal Property.
- Second or subsequent offense: A finding of guilt in a disciplinary hearing for Refusal to Participate in the IHP may result in the loss of any or all of these privileges for up to a 180 day period.

Following the completion of the disciplinary process and a finding of guilt, security precautions and disciplinary restrictions may remain in effect for a period of time designated by the Senior Hearing Officer consistent with this policy. If a finding of not guilty results, the security precautions shall be removed.

Classification

Any inmate charged with Refusing to Participate in the IHP shall be considered for placement in an ASU and reviewed by the Institution Classification Committee (ICC) to determine the appropriateness of ASU retention, pending disciplinary matters, and/or future housing considerations. At each ICC review, the inmate's case factors shall be reviewed for the appropriateness of the inmates IHC, and to determine if the inmate will participate in the IHP if case factors do not preclude such.

Assessment of SHU Term

A determinate period of confinement in a SHU may be established for an inmate when found guilty of Refusing to Participate in an IHP per Section 3005(b), Conduct, Refusing to Participate in an IHP. The term shall be established by the ICC utilizing the standards set forth in the SHU Term Assessment Chart in CCR Section 3341.5.

54055.9 Temporary Suspension of Assignments to Integrated Housing

In the event that management determines that a temporary suspension of assignments to integrated beds within a unit is warranted, the Warden or designee shall request approval from their mission-based Associate Director for a temporary suspension of integrated housing assignments consistent with the lockdown and modified program protocols defined in Department Operations Manual Article 55015. Regular housing assignment procedures shall be resumed in accordance with the IHP policy upon resolution of the incident.

54055.10 Revisions

The Director, Division of Adult Institutions, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

CCR, Title 15, Division 3, Section 3269.

ARTICLE 48 – TRANSITIONAL HOUSING UNIT

Effective December 21, 2009

54058.1 Policy

The Transitional Housing Unit (THU) provides a program of observation to evaluate that an inmate has successfully disassociated from prison gang activity, and that they are capable of programming in a General Population (GP) setting.

54058.2 Purpose

Inmates must have completed the first phase of the debriefing process from a validated prison gang in order to be placed into the THU. Placement into the THU can be from either a Security Housing Unit (SHU) or from GP. Inmates will be admitted into the program to participate in multifaceted programming components designed to verify the inmate is able to successfully integrate back into the GP.

54058.3 Criteria for Entry into the THU

The THU is primarily designed for inmates who have served lengthy SHU terms due to validated gang affiliation and activity, although it shall also be made available to inmates currently housed on a GP who are involved in gang activity but desire to participate in the debriefing process. The Correctional Counselor shall screen inmate candidates and present them to the Institutional Classification Committee (ICC) for approval. The minimum eligible criteria shall consist of:

- The debriefing interview as set forth in California Code of Regulations, Section 3378.1(b) must be satisfactorily completed at the institutional level through the Institution Gang Investigator, and the debriefing package submitted to the Office of Correctional Safety.
- The inmate must be willing to commit to personal change and provide staff with sufficient evidence of their sincerity to the extent that staff feel confident of that commitment.

The debriefing process is designed to review and monitor the sincerity of each individual and ensure that the inmate participating in the process is not a threat to staff or other inmates, and has sincerely renounced all prison gang activities.

The first portion of the debriefing process is designed to obtain sufficient verifiable information from the inmate about their gang related activity, which is detrimental to the gang such that the gang will no longer accept the subject as either a member or associate. Also, a successful debriefing provides staff with information about the gang's structure, activities, and affiliates.

The second portion of the debriefing process will involve participation in the THU program. The THU program allows for a period of staff observation, and a time for the inmate to adjust back into an integrated group yard setting and double celled housing. This observation/adjustment period helps to ensure that an inmate will be able to program with inmates of all races and ethnic groups, as well as other disassociated prison gang members/associates.

54058.4 Methods

This article provides the policies that are necessary to establish a THU at a designated institution. The THU program will be up to a 6 month program consisting of components to include, but not be limited to, conflict resolution, anger control, substance abuse education, communication skills, individual counseling, and group exercises.

THU inmates shall be required to attend and actively participate in the program, and shall be assigned work group/privilege group A1A. Inmates shall be advised of program expectations and that inappropriate behavior may result in the issuance of a Rules Violation Report. Any disciplinary action deemed serious in nature, or one that is related to gang activity, shall result in referral to an ICC for program review and possible removal from the THU.

54058.5 Stages of the Program

The THU program at the designated institutions will be carried out in three stages.

Stage 1 – Orientation Status

Upon arrival at the designated institution, THU designated inmates shall be placed on orientation status not to exceed 14 calendar days. This period of orientation has been established for the inmate's safety. It affords inmates the opportunity to familiarize themselves with the prison and apprise appropriate staff members of any problem situation, such as potential enemies, prior to being placed in the actual THU program. During the orientation period, the inmate shall be housed in a THU orientation designated section, and considered for double cell housing by ICC. Inmates shall appear before a classification committee to affirm proper endorsement into the THU program and for appropriate program assignment.

During this period:

- Inmates' program activities will be limited to housing unit activities, and will not include yard or dayroom activities. Authorized emergency phone calls will be allowed. All inmates shall be fed in their cell during this phase.
- Inmates shall be escorted when it is necessary for them to leave the unit.
- Interviews, tests, and other activities related to the orientation process shall be conducted within the orientation unit, when possible.
- Inmates will be reminded that gang related activity or behavior of any nature will not be tolerated, and will be grounds for dismissal from the program.
- All inmates on THU orientation status will be instructed to contact the assigned housing unit floor officer and/or assigned correctional counselor about questions or issues that arise.
- Following their appearance before committee, eligible inmates will be removed from THU orientation status and assigned to the second stage of the program.

Stage II – Program and Participation

Upon completion of the Stage 1 orientation, participants shall be placed in the THU GP portion of the program, for approximately five and one-half months.

During this period:

- Inmates are allowed to participate in dayroom and yard activities, as well as eat in the THU dining hall.
- Inmates are required to double cell in accordance with the Department's Integrated Housing and Housing Assignment Policy (see Title 15, Sections 3269 and 3269.1). Failure to comply may result in the inmate failing to satisfactorily complete the THU program.
- Inmates must participate in one or more of the available self help group activities, such as Alcoholics Anonymous, Narcotics Anonymous, Conflict and Anger/Lifelong Management, Substance Abuse Education, Basic Vocational Skills, and Alternatives to Violence or victim awareness programs. Inmates must also participate in any assigned Adult Basic Education and General Education Development.
- Inmates in this stage of the program shall be allowed special purchases, canteen draw, and allowed to attend religious services when offered. These privileges shall not conflict with a work assignment unless otherwise permitted in regulations.
- Inmates are eligible for work assignments as THU mentors, THU housing unit porters, or THU clerks.

Stage III - Completion

Upon satisfactory completion of the THU program, inmates shall be housed in a specific portion of the THU housing unit, and will be referred to a classification committee for transfer consideration. Pending transfer, inmates will be assigned as mentors to other THU inmates or to other work assignments as available, and retain their work/privileges group designation.

Inmates failing to satisfactorily complete the THU program shall be referred to ICC for further program and housing determination.

54058.6 THU Custody Operations

Custody operations are designed to provide adequate services for an inmate's housing and program needs. These services, with certain limitations, are the same basic services offered to GP inmates. They shall allow the THU inmates meaningful interaction with other inmates within the THU program. Limitations will occur in the process of ensuring THU inmates are separate at all times from other GP inmates due to potential safety concerns related to gang disassociation. Although it is recognized that the THU inmates will ultimately be integrated into various GP settings, their initial status and program restrictions require that THU inmates be separated from non-THU inmates. All movement to any satellite service or function outside of the THU housing unit shall be by staff escort and require the securing of all accessible gates, doors, and adjacent inmate programs. All canteen will be dispersed inside the THU. Visiting accessibility is required and must be incorporated into the institutional visiting schedule, according to the Department's inmate visiting regulations.

All specifics relative to such inmate activities as canteen, telephone calls, dayroom activities, etc., shall be set forth in the designated institution's DOM supplement.

54058.7 Revisions

ARTICLE 49 - INMATE CLOTHING AND LAUNDRY EXCHANGE SERVICES

Effective January 8, 1990

54060.1 Policy

The Department shall provide and maintain a basic issue of clothing for all inmates that shall enable them to present a neat and acceptable appearance in their assignment and leisure time activities.

54060.2 Purpose

This Article establishes the procedure for the issue, exchange, replacement, and laundry of clothing and linen.

54060.3 Initial Budgeted Complement

Clothing and bedding provided to inmates shall be limited to the styles and types approved for Prison Industry production. Other clothing requirements shall be acquired through the normal purchasing process. Funds shall be budgeted to provide a complement of clothing items on an initial and replacement basis.

54060.4 Male Reception Center Clothing

Updated February 2, 2011

Male inmates being processed upon reception to the Department shall be issued quantities of clothing in accordance with items detailed in DOM 54060.6. Green outer clothing may be issued in lieu of regular blues.

- Inmates have the option of sending personal clothing in their possession upon arrival at the reception center to:
 - Family or friends at their own expense.
 - Donating the clothing to the institution.
 - Donating the clothes to a charitable organization.

54060.4.1 Female Reception Center Clothing

Updated February 2, 2011

Female reception center inmates shall be issued quantities of clothing in accordance with the items detailed in DOM 54060.6.1. Personal clothing may be worn in lieu of institutional-issued clothing.

- Female inmates upon arrival at a reception center for processing have the option of retaining three sets of personal clothing consisting of pants and tops or dresses. Lettering, pictures or logos on clothing is not permitted except manufacturer's logo.
- Excess personal clothing, at the inmate's option, shall be:
 - Sent to family or friends at inmate's own expense.
 - Donated to the institution.
 - Donated to a charitable organization.

54060.4.2 Basis for Budgeted Clothing at Reception Centers

- Shoes, socks, and underclothing shall be budgeted on the number of cases processed, while other items of clothing shall be based on the average daily population.

54060.5 Special Clothing

Special clothing shall be provided for all workers who have assignments that require either distinctive clothing or protective clothing, such as culinary, medical/dental, gym, conservation camps and maintenance assignments. When special clothing is required, it shall be purchased from the operating expense allotment of that particular activity.

54060.5.1 Transportation Clothing

During interdepartmental transportation of male inmates, red, one-piece coveralls shall be provided by the transportation unit on an exchange basis with the respective institutions. Female inmates shall be provided two-piece orange jump suits for interdepartmental transfer by the transportation unit. Inmates shall wear their regular issue shoes, socks, underclothes, T-shirts and may take one handkerchief.

54060.5.2 Court Clothing

Inmates appearing in court shall be dressed in clean, blue denim or khaki chambray shirts and trousers unless otherwise ordered by the court (male and female).

54060.5.3 Release Clothing

Inmates shall be encouraged to supply all or a portion of their release clothing. An inmate may have clothing at home to wear upon release preferable to state-issued clothing. Additionally, the inmate's family or friends may be able to supply clothing for release. These possibilities shall be explored with the inmate by institutional staff.

Institutions may offer alteration services for privately furnished release clothing.

State-issued release clothing shall be kept to a minimum. State-issued release clothing shall be charged against the inmate's release allowance.

54060.5.4 Reentry Clothing

Prior to an inmate's transfer to a reentry program, the sending institution shall provide appropriate dress-out clothing in keeping with the inmate's reentry program needs.

54060.5.5 Special Altered Clothing

Updated February 2, 2011

For inmates that require specially made clothing, non-medical, the captain, or designee shall submit a written request for the clothing to the clothing distribution supervisor. For inmates requiring clothing modification for medical reasons, the CMO shall initiate the request. Informational copies of the requests shall be distributed to linen issue, laundry supervisor and the warehouse manager. The item restriction (DOM 54060.6) shall not apply to specially altered clothing.

54060.6 Standard Clothing Issue for Male Inmates

Revised May 27, 1992

The minimum standard clothing complement for male inmates, including initial issue, is as follows:

- Three pair jeans, blue denim
- Three shirts, blue chambray
- Four T-shirts, white
- Six pair socks, stretch
- Four pair shorts
- One jacket, blue denim
- One belt, web
- One pair work shoes
- Two sheets
- One pillow case
- Two blankets
- Two towels

No lettering or pictures, exclusive of manufacturer's logos.

Inmates assigned to special jobs (e.g., dairy, garage, and plumbing) may be allowed to have extra clothing, extra exchange, or both, as determined by the Warden.

54060.6.1 Standard Clothing Issue for Female Inmates

Revised May 27, 1992

Female inmates may wear their personal clothing rather than their state issued clothing. The minimum standard clothing complement for female inmates, including initial issue, is as follows:

- Three blouses/T-shirts
- Three pair slacks
- Three bras (complement each six months)
- One dress (muu-muu)/robe/duster
- One coat
- Five panties (complement each six months)
- One nightgown
- One pair work shoes
- Six pair socks
- Two sheets
- One pillow case
- Two towels
- Two blankets

No lettering or pictures, exclusive of manufacturer's logos.

54060.6.2 Nylon Jacket and Liner

In addition to the denim jacket, a nylon cloth jacket and liner may be provided for inmates who are required to work out-of-doors in inclement weather on a regular basis.

54060.7 CDC Form 176 Clothing Record Card

All clothing issues shall be posted on a CDC Form 176, Clothing Record Card. The CDC Form 176 shall be retained in the clothing room. Inmates shall be held accountable for all issued clothing.

54060.7.1 New Arrivals - Male Inmates

When entering an institution, each male inmate shall be issued by the institution's receiving and release (R&R) staff the following:

- One shirt.
- One pair blue jeans.
- One pair shorts.
- One T-shirt.
- One pair socks.
- One pair shoes.
- Two sheets.
- One pillow case.
- One towel.
- Two blankets.

The R&R sergeant shall send the clothing room a laundry slip with the inmate's name, number, and the size of clothing needed in addition to the new arrival issue.

54060.7.2 Initial Clothing Issue ("Fish" Bundle)

Updated February 2, 2011

Upon receipt of a laundry slip, the clothing room shall issue new arrivals a "fish" bundle. The bundle shall bring each inmate's complement of state-issue clothing up to standard issue as outlined in DOM 54060.6.

54060.7.3 New Arrivals - Female Inmates

Updated February 2, 2011

The Associate Warden, Business Services, or designee shall establish the schedule and location of exchange for all clothing and linens.

A new female inmate arrival will be provided state issue clothing up to the maximum allowable in DOM 54060.6.1 that was not received during reception processing.

54060.8 Clothing and Linen Exchange

The following clothing and linen exchange shall be provided to inmates each week and shall be limited to a one-for-one laundry exchange:

- Two shirts/two blouses.
- Two pairs jeans/two pairs slacks.
- Three T-shirts.
- Three undershorts/three panties.
- Two sheets.
- One pillow case.
- Three pairs socks.
- Two towels.

54060.9 Damaged/Worn Out Clothing or Linen

Inmates and correctional employees shall not dispose of damaged/worn out clothing or linen. These items shall be returned to the clothing room. All items deemed repairable shall be repaired and reissued. Non-repairable items shall be set aside for "rag" usage or discarded at the discretion of the clothing room supervisor. Exchanges shall be recorded on CDC Form 176.

54060.9.1 Issue or Exchange of Shoes/Boots

The Department has established the issuance of serviceable used shoes/boots to inmates on an as-needed basis. The clothing room supervisor shall personally review all requests and make a determination on whether to issue replacement. If the supervisor does not have a pair of serviceable used shoes/boots in the requested size, they shall issue from new stock to the inmate concerned.

54060.9.2 Orthopedic Shoes

For inmates requiring orthopedic shoes, the institution physician shall provide written approval, by a CDC Form 128-C, medical chrono, specifying the type or variance needed. The chrono and copies shall be distributed to the inmate, clothing distribution, medical file and C-File.

54060.9.3 Mattress Exchange

All mattresses shall meet construction and flammability standards established for CALPIA products. Damaged or worn out mattresses shall be taken to the designated location during established hours of exchange. The Associate Warden, Business Services, or designee shall establish the schedule and locations for the exchange. Unit/program staff shall inspect all mattresses periodically for replacement.

54060.9.4 Blanket Exchange

Blankets that have been soiled or worn out shall be exchanged, one-for-one, at the designated location and pursuant to an established schedule. Exchange shall be bi-annual or on an as-needed basis upon approval by correctional staff.

Inmates having a documented allergy to wool shall be issued a thermal cotton blanket. The institution physician shall provide a CDC Form 128-C, medical chrono, confirming the allergy. The CDC Form 128-C shall be distributed to the C-File, medical file, clothing room supervisor and inmate. Exchange shall be on an as needed basis.

54060.9.5 Contaminated Inmate Clothing and Bedding

State-issued/personal clothing, linen, pillows, mattresses and blankets which have become contaminated shall be placed in a marked "contaminated" plastic bag or container and taken directly to a designated location for proper decontamination or disposal.

54060.9.6 Shortages

Inmates shall account for their issued clothing and bedding. If a shortage occurs, through no fault of the inmate and verified by correctional staff, the short items shall be replaced.

- Inmates who have lost issued clothing and bedding shall notify unit staff who shall issue a replacement slip to the clothing room. A CDC Form 193, Trust Account Withdrawal Order, shall be prepared for replacement costs and submitted with the replacement slip.

54060.9.7 Excess Clothing

Inmates may possess only those items of state clothing and linen that have been issued and items of personal clothing authorized and acquired in accordance with departmental procedure. Excess items of state clothing and linen shall be confiscated by correctional staff and returned to the clothing room for reissuing.

54060.9.8 Altered Clothing and Linen

Inmates shall not alter state-issued clothing or linen in any manner without specific authority to do so. If regular issue clothing does not meet a special need because of physical problems, the institution medical officer may authorize special issue.

- Inmates shall not alter their own or another inmate's personally owned clothing in any manner that would change its characteristics or style from that approved for its acceptance into the institution.

54060.10 Rags

All linens and underwear (T-shirts and shorts) that are declared beyond repair or usage by the institution clothing room supervisor shall be used as rags. The laundry room personnel shall dye these yellow. Any inmate having in their possession torn clothing or linen that is not dyed shall be subject to disciplinary action.

- Deliberate destruction of state-issue property shall result in a CDC Form 115, Rules Violation Report, being submitted.

54060.11 Special Housing Clothing

Inmates housed in special housing units who are unable to go to the laundry room shall exchange clothing and linen in their respective unit. Correctional staff shall prepare a clothing/linen exchange list with the size requirements to meet the needs of the inmates. Once clean linen and clothing is received, the unit staff shall exchange on a one-for-one basis according to the unit's pre-arranged schedule.

54060.12 Departing Inmates

All inmates departing an institution (i.e., transferred, paroled, and discharged) shall return their complete clothing and linen issue to receiving and release (R&R). The only exception may be items that may be needed for overnight; and these items shall be returned to R&R prior to departure. All items returned shall be posted on CDC Form 176, Clothing Record Card. R&R shall return all items collected to the laundry.

- Special housing inmates' release check-out shall be completed in their units.

54060.13 Revisions

ARTICLE 50 — CANTEEN

Revised November 19, 2010

54070.1 Policy

Canteens for inmate use shall be established in all institutions and camps of the Department pursuant to the California Penal Code (PC) Section 5005. The administration of canteens shall conform to all applicable laws, regulations, and the content of this procedure.

Designated staff shall assure:

- That all funds earned as profit from such canteens shall be deposited in the Inmate Welfare Fund (IWF).
- That unless a uniform price on a canteen item is established, articles in inmate canteens shall be sold at the lowest possible price that assures the profit margin established in the annual budget and is sufficient to support the institution's IWF program.
- That all commodities sold in canteens are approved items for that purpose.
- That a price list is established, kept current, and posted at the inmate canteen. Copies shall be made available to inmates and a copy shall be forwarded to the IWF Manager, Central Office.

54070.2 Purpose

The purpose of this section is to provide a standardized inmate canteen procedure that establishes guidelines for use, storage, accountability, and ordering of supplies. It provides for the purchase of approved merchandise for the inmate population from outside vendors, and establishes a method to prevent the introduction of contraband and/or unauthorized items into the prison through special canteen orders.

54070.3 Responsibility

The Warden shall be responsible for the administration of the institutional canteen program. They may delegate the administration/supervision of this program to the Associate Warden of Business Services.

Associate Warden, Business Services

The Associate Warden of Business Services shall assign or delegate one of their subordinates to:

- Supervise the canteen manager.
- Ensure canteens are well-stocked with approved sale items and a list of available approved merchandise, prices for each item, and canteen operating hours are posted at each canteen.
- Implement the provisions of this section.
- Periodically consult with the inmate Institution Advisory Council (IAC) and/or their inmate canteen committee in canteen stock selections.

Captain

The captain shall ensure that all canteen lines are properly supervised and controlled during the canteen hours of operation.

Sufficient custody staff shall be assigned to provide direct supervision and control to ensure the safety and security of the canteens.

54070.4 Trust Statements

Inmates shall be issued account statements upon their written request from the Trust Office that reflects an inmate's current balance, provided 90 days have elapsed since their previous request.

Inmates shall be permitted to withdraw from their accounts by signing a canteen sales receipt.

54070.5 Canteen Draw Schedule

A canteen draw schedule developed by the trust office and approved by the Warden or their designee, shall:

- Be published at least semi-annually.
- Be posted in the housing units at each institution and camp.
- List three canteen draws for each month based on the last two digits of the inmate's departmental identification number.

Each inmate may withdraw funds from their trust account for canteen purchase no less than once per month in accordance with the posted schedule.

If an inmate misses a scheduled draw for their group (last two digits), they may submit a request for a "make-up" draw.

Note: Due to overpopulation at some institutions, some Wardens do not authorize a "make-up" draw.

54070.5.1 Canteen Sales Receipt

When purchasing merchandise inmates shall:

- Complete an itemized order list prior to purchasing canteen items.
- Place a clear thumb print or three fingerprints on the canteen sales receipt.
- Sign the canteen sales receipt each time a purchase is made to acknowledge the amount of the purchase and the remaining balance. Segregated inmates shall sign the approved canteen shopping list prior to submitting it to the segregation unit staff authorizing the Trust Account withdrawal, and upon receipt of the merchandise, shall sign the approved institution distribution forms to verify the amount purchased and received.

54070.5.2 Non-routine Canteen Draw

Newly arrived inmates may, within 30 days of arrival, be permitted to make purchases at the canteen during any scheduled draw regardless of their last two digits of departmental identification number. Such exceptions shall not be made for the inmate's subsequent draws.

- Conservation camp inmates shall submit their request for canteen draw to the camp lieutenant or designee.
- Segregation inmates shall not be permitted to go to canteen and shall submit their canteen shopping list to the segregation unit staff.
- Outpatient Housing Unit (OHU), Correctional Treatment Center (CTC), General Acute Care Hospital (GACH), or Department of Mental Health (DMH) patients shall submit their canteen shopping list to the OHU, CTC, GACH, or DMH unit staff.

54070.6 Maximum Monthly Canteen Draw

Revised December 14, 2012

The maximum amount allowed to be withdrawn from an inmate's trust account for the purpose of canteen purchases is \$220.00.

The maximum amount an inmate may withdraw for canteen purposes is in accordance with their IW/TIP privilege group. (Refer to DOM, Section 53130 or CCR, Section 3044.) The maximum draw for each privilege group is:

- Privilege group A: Maximum monthly canteen draw as authorized by the Secretary.
- Privilege group B: One-half the maximum monthly canteen draw as authorized by the Secretary.
- Privilege group C: One-fourth the maximum monthly canteen draw as authorized by the Secretary.
- Privilege group D: One-fourth the maximum monthly canteen draw as authorized by the Secretary.
- Privilege group U: One-half of the maximum monthly canteen draw as authorized by the Secretary.

Withdrawal orders received by the Trust Office, requesting an amount larger than the inmate's work/training privilege group maximum authorized draw shall be reduced by Trust Office staff to comply with the inmate's work/training privilege group limit. An inmate's regular canteen purchases shall not exceed the limits above or the inmate's trust account balance, whichever is less.

- All inmates shall present their picture identification card to the canteen staff to purchase canteen items or ducats.
- Canteen staff shall review SOMS to determine the inmate's privilege group.
- Each inmate shall complete an itemized order list prior to arrival at the canteen for purchases.

54070.6.1 AD-SEG Inmate

Inmates confined to AD-SEG status shall submit their canteen shopping list to the unit staff. Inmates assigned to this unit shall draw according to the last two digits of their identification numbers the same as the general population. Orders placed by these inmates shall be delivered by staff. The inmates shall not be permitted to go to the canteen. Segregated inmates shall sign the approved canteen shopping list prior to submitting it to the segregation unit staff authorizing the Trust Account withdrawal and upon receipt of the merchandise, shall sign the approved institution distribution forms to verify the amount purchased and received.

54070.6.1.1 General Population Lockdown

During a general population lockdown, canteen purchases may or may not be permitted at the Warden's discretion.

54070.6.2 OHU, CTC, GACH, or DMH Inmate

OHU, CTC, GACH, or DMH patients shall submit their canteen shopping list to the OHU, CTC, GACH, or DMH unit staff for processing.

Patients shall submit their lists of canteen purchases to the OHU, CTC, GACH, or DMH unit staff for the appropriate draw each week up to their maximum monthly privilege group amount or their available trust account total, whichever is less. The OHU, CTC, GACH, or DMH staff shall submit the order to the canteen and return the filled order to the inmate.

54070.6.3 Camp Inmate

Conservation camp inmates shall submit their request for canteen draw to the camp lieutenant or designee for processing.

54070.6.4 Transferred Inmates

Inmates arriving at the institution from other institutions shall be allowed to keep any item purchased at the canteen of the institution from which they came, unless the articles were obtained in an illegal manner or are not allowable property at the receiving institution.

Inmate canteen ducats shall not be transferred to other institutions. These ducats shall be returned to the canteen to be canceled when the inmate is transferred and the value of the ducats shall be posted on the inmate's trust account.

54070.6.5 Inmates on Loss of Privilege Status

Inmates on loss of canteen privilege pursuant to 3090(d) status shall not purchase canteen during the period of loss of canteen privileges. One monthly draw shall be lost for each 30 day loss of privileges. The disciplinary hearing officer or disciplinary committee shall notify the canteen and trust office in writing of the loss of canteen privileges.

54070.7 Redemption of Canteen Yard Ducats

On May 31 of each year ducats of a different color shall be made available and only these ducats shall then be authorized. The institution shall provide sufficient notice of the ducat exchange by posting this information in a conspicuous location available to the inmate population and by using any other means available which shall have the effect of notifying all inmates.

June 30 is the established date by which to exchange old ducats for new.

Upon expiration of the established period of time, ducats shall not be accepted for purchase, exchange, or redemption, except in cases of extenuating circumstances, such as the inmate being out-to-court or in any medical or mental health facility licensed under Title 22 of the California Code of Regulations.

54070.8 Hours of Operation

A working canteen schedule for each facility shall be established by the Business Office and approved by the Associate Warden, Business Services, and shall consider input from the Inmate Advisory Council. The hours that canteens shall be open each day shall be posted for the benefit of all concerned. The canteens shall be closed on inventory days.

54070.9 Quantity

Inmates shall not possess canteen items and ducats (combined) in excess of the authorized monthly allowable canteen dollar limit as set by the Director. Possession of canteen items and/or ducats in excess of this limit shall result in the issuance of a disciplinary report and confiscation of the excess items and/or ducats.

Special purchases of merchandise not carried in stock shall not be included in this limitation.

Confiscated items shall be stored in a secure area pending adjudication of the disciplinary charges and resolution of any appeal of the disciplinary finding or disposition.

If the confiscation is upheld through the disciplinary/appeal process the confiscated items shall be disposed of as described in DOM, Section 52051.

54070.10 Inventories

The canteen and the IWF canteen warehouse shall be closed a minimum of two days each month for inventory and reconciliation of the Inventory Reconciliation Report (IRR).

The IWF canteen warehouse shall be inventoried by a materials and stores supervisor and verified by the canteen manager.

At least two teams consisting of either canteen civil service personnel only or two teams consisting of a civil service employee and an inmate on each team shall take separate monthly inventories of the canteen merchandise. The two counts are then compared and any differences shall be recounted. The Consolidated Inventory Report (CIR) shall be prepared by a civil service employee only. The original listing of the monthly count sheets shall be retained along with the working copy of the monthly CIR.

Upon verification of both the IRR and CIR, the reports shall be turned in to the IWF accountant by the canteen manager.

54070.11 Revisions

The Director, Division of Adult Institutions, shall ensure that the content of this Article is accurate and current.

PC § 5005.

CCR (15) §§ 3090(a), (b) and (c), 3091 - 3095.

ARTICLE 51 — FOOD SERVICE

Revised July 13, 2010

54080.1 Policy

The California Department of Corrections and Rehabilitation (CDCR) shall provide inmates with a healthy and nutritionally balanced diet, served in an orderly manner with food flavor, texture, temperature, appearance, and palatability taken into consideration. Current Recommended Dietary Allowances (RDA), and Dietary Reference Intakes (DRI) as established by the Food and Nutrition Board of the Institute of Medicine, National Academy of Science, shall be considered authoritative in setting levels of nutritional need. Sanitation, safety, and food handling standards and practices shall be established and maintained in keeping with applicable requirements established by the Industrial Safety Standards (California Code of Regulations (CCR), Title 8) and the California Health and Safety Code (H&SC).

54080.2 Purpose

This Article provides instructions and guidelines for properly administering the food service program at CDCR institutions.

54080.3 Responsibility

The Departmental Food Administrator (DFA) represents the CDCR in all food service issues and activities. The DFA develops, administers, and monitors CDCR's food service programs while the institution heads are responsible for their respective food service operations and oversight of Institution Chaplains. Physicians at each institution are responsible for ordering outpatient therapeutic diets, nourishments, and supplements.

54080.4 Review of CDCR Menu

The standardized CDCR Menu and nutritional analysis shall be reviewed by a registered dietitian on an annual basis to ensure compliance with the RDA and DRI. This review shall be coordinated through the DFA's office and any findings shall be reported to the DFA.

54080.5 Hot Meals

No more than 14 hours shall elapse between the evening meal and breakfast. A minimum of two hot meals shall be served every 24-hours with three meals provided at regular hours during each 24-hour period. Variations to

the two hot meals per day requirement may be allowed to accommodate religious observances and religious diet programs and institution emergencies. Inmates shall be allowed 20 minutes in the dining halls to eat their meals after receipt of their food tray. The institution head or designee may, at his/her discretion, modify the time allotment based on operational necessity. The time allotment may be increased by the Chief Medical Officer for inmates in licensed health care facilities, or due to an individual inmate's documented medical or disability requirements.

54080.6 Diets

The standardized CDCR "Heart Healthy" menu shall be followed by all institutions for all general population meals. Physicians ordering a therapeutic diet shall be limited to renal dialysis, gluten-free diets, or other situations as defined by Division of Correctional Health Care Services (DCHCS).

The DFA shall ensure that:

- The CDCR food plan meets the dietary needs of most inmates by providing a CDCR "Heart Healthy," low fat, low salt diet.
- A nutritional analysis of the CDCR food plan is done whenever menu changes are made.
- That standardized CDCR recipes are maintained, consistent with the CDCR menu.

Each institution's food service program is responsible for the procurement, and preparation of Physician-ordered nourishments. Either institutional Food Service or DCHCS is responsible for distribution of nourishments to inmates. Procurement, preparation, and distribution of inmate nutritional supplements are the responsibility of institutional DCHCS and/or institutional Food Service staff.

Institution heads and correctional food managers (CFM) shall ensure consistent adherence to the CDCR standardized menus and recipes, and CDCR Menu Substitution Guidelines.

54080.6.1 Vegetarian Diet Program

Any inmate with determined religious, personal, or ethical dietary needs may request to participate in the vegetarian diet program. Participation in the vegetarian diet program requires the approval of an institution chaplain. The approval process and administration of the vegetarian diet program will be in accordance with established procedures as defined in DOM 54080.14.

54080.7 Food Service Handbook

In addition to this Article, the Food Services Handbook provides information and copies of the forms necessary to keep food service records. The Food Service Handbook shall be issued to all Associate Wardens, Business Services, and CFMs, and maintained in inmate libraries.

54080.8 Emergency Food Supply

June 6, 2014

Each institution shall at all times maintain sufficient quantities of non-perishable food items, such as canned stew or pork-free beans, to serve at least eight meals to the inmate population in an emergency. If judged necessary, the emergency food supply may be maintained separately from general supplies. The emergency food supply shall be rotated into the menu within 36 months of purchase. Departmental Correctional Food Managers shall rotate one-third of the emergency food items annually.

54080.9 Food Management System

The Food Management System (FMS) is the CDCR approved personal computer program for institutions. The FMS may be used to generate a quarterly food ration and cost analysis, and other reports using the Inventory Control, Recipe Production, and Menu Planner functions.

54080.10 Menus

The DFA shall develop and distribute menus semi-annually to the institutions. Copies of the standardized menus are to be maintained by the DFA for five years, including current year. In agreement with a low fat and low sodium menu plan, CDCR institutions serve pork free meals. The institution menus shall reflect the standardized menus in like food served, quantity, portion, size, color, flavor, and nutritional value, with particular attention to levels of fat and sodium to assure CDCR heart healthy goals. Established standardized menu substitution guidelines and policies shall be used when making menu substitutions. Institutions shall follow CDCR standardized recipes. Institution menus shall be generated in the office of the CFMs at least one week in advance and posted in locations accessible to staff and inmates. Any menu changes that vary from the standardized menu shall be noted in red ink on the approved standardized menu. This will become the "menu as served," and be forwarded to the DFA within 30 working days after completion of each quarter.

54080.11 Food Sampling

To maintain proper standards for the preparation and serving of foods in institutions, each institution head, or designee shall designate an employee to sample all items of food prepared prior to service to the inmates. If the food sampler believes that a food item is not edible, the food sampler shall:

- Immediately notify the CFM or supervising correctional cook.
- Request that the item be immediately checked and appropriate action taken.
- Complete the Meal Sample Report generated by the FMS.

54080.11.1 Meal Sample Report

The Meal Sample Report shall be generated from the CFM and completed by the individual designated to sample the meal. Inmates, randomly selected, should also sample meals. A report shall be completed for each meal served and submitted to the CFM and Associate Warden, Business Services, or designee. The report shall include at least the following:

- Date items sampled.
- Copy of menu for the meal.
- Description of replacement items, if applicable.
- Signature of sampling employee or inmate.

54080.11.2 Retention of Food Samples

The CFM shall retain a sample of each food item served to the inmates to determine which food items may be the source of contamination in the event of alleged food poisoning or infection. These meal samples are to be retained at all kitchens and serving units. At the serving of each meal, a tray with a minimum of four ounces of each food item offered shall be prepared, covered with plastic or aluminum wrap, dated, and stored in a specified locked section of a secure refrigerator where it shall be retained for a 72-hour period for cook/serve operations, and 120 hours for cook/chill operations. In case of allegations of food poisoning or infection, these samples shall be made available for analysis by institution medical staff or a representative from Department of Health Services (DHS). Each CFM shall maintain an approved food sampling kit in the food service area for use in the event of a food borne illness outbreak.

54080.12 Pork/Pork Derivatives

In agreement with a low fat and low sodium menu plan, CDCR institutions shall serve pork-free meals. Therefore, pork or pork derivatives are not included in CDCR institution recipes or on CDCR standardized menus. CDCR Camps may be provided food from other sources. As a result, pork may be part of Camp meals. If pork is served in a camp, the camp food services staff shall identify all inmate menu items containing pork and/or pork derivatives for the benefit of those inmates desiring a pork-free diet for religious reasons. Food services staff shall implement and enforce the identification of all food items containing pork, or prepared or seasoned with pork derivatives with a "P" on the menu. If there is uncertainty as to whether an item contains pork, it shall be identified with an asterisk (*). Menus shall be prominently displayed.

54080.13 Foods for Religious Events

Inmate religious groups shall not be permitted more than two events each year where foods with recognized religious significance are provided by the institution in place of the regularly planned meal. These event meals must be verified as specifically connected to a religious event and approved and sponsored by a Chaplain. A Chaplain means a local Institution Chaplain or designee representing the religious group. The cost to the institution of meals for a religious event shall not exceed that of the meal replaced, unless approved by the CFM. Special ceremonial foods that cannot be provided by the institution may be provided through the chaplain or an outside source(s).

At least 30 days, but no more than 90 days, prior to the event, the Chaplain of the approved religious group must submit a written request to the institution head or designee, which includes at least the following:

- Date of event.
- Location of event.
- Proposed menu.
- Specific ceremonial foods.
- Number of inmates, and when applicable, guests to be served.

54080.14 Institution Religious Diet Program

Each institution shall make reasonable efforts, as required by law, to accommodate those inmates who have been determined to require a religious diet.

- Within the institution, religious meals shall not be restricted from inmates based on their classification or housing placement.

- If a medical diet is ordered for an inmate, it shall take precedence over the religious diet.
- Inmates who are transferred shall continue to have the ability to participate in their current religious diet program at the receiving institution, barring medical needs or other extraordinary circumstances. The inmate Central File (C-File) shall contain verification of religious diet participation (CDCR Form 3030, "Religious Diet Request," and CDCR Form 3030-A "Religious Diet Program Agreement").
- The current Religious Diet Card shall be transferred with the inmate's property and be provided to the inmate upon the inmate's arrival. During the initial processing at the receiving institution, staff shall identify the inmate as a participant in a Religious Diet Program and notify the CFM and appropriate Chaplain or designee of the inmate's arrival. The Chaplain or designee at the receiving institution shall oversee the inmate for continuing eligibility and any compliance violations.
- Each institution shall provide ongoing religious awareness training for custody and food service staff, and others as appropriate. This may be provided in regularly scheduled In-Service Training, Equal Employment Opportunity training, or on-the-job training.
- No staff may disparage an inmate's religion or religious views, or attempt to dissuade an inmate from participating in the Religious Diet Program.
- Early call may be used, and is encouraged, for serving religious diets.
- The Religious Diet Program will consist of three distinct options:
 - A vegetarian diet program.
 - A Jewish kosher diet program.
 - A religious meat alternate program

Vegetarian Diet Program

Vegetarian meals shall be available at all CDCR institutions statewide. Institution vegetarian meals shall be lacto-ovo vegetarian (includes dairy products and eggs), and may contain fish when it appears on the menu. Inmates with determined religious, personal, or ethical dietary needs and showing a Religious Diet Card shall be provided with an approved vegetarian protein alternate, often from that same days' scheduled meal. Inmates may participate in the program, by submitting to any appropriate Chaplain a CDCR Form 3030 Religious Diet Request.

Jewish Kosher Diet Program

A Jewish Kosher Diet Program (JKDP) shall be established at designated CDCR institutions statewide, for Jewish inmates desiring to practice Jewish kosher law.

- Each designated institution with a JKDP shall endeavor to have a Jewish Chaplain or Rabbi employed at all times. In the absence of an employed Jewish Chaplain, the institution shall either make arrangements to utilize the services of a CDCR Jewish Chaplain from a neighboring institution, or consult with the Boards of Rabbis of Northern or Southern California to administer the JKDP.
- Institutions that have an operational JKDP but have a vacant Jewish Chaplain position shall fill the position as soon as possible, but shall continue to operate the JKDP. However, no inmates will be added to the JKDP in those institutions unless they meet either criteria below:
 - The inmate has already been approved by a Jewish Chaplain to participate in the JKDP at another institution; or
 - A CDCR Jewish Chaplain from a neighboring institution, or a consultant from the Boards of Rabbis of Northern or Southern California approves the inmate.
- Only Jewish inmates, as determined by a Jewish Chaplain, may participate in the JKDP.
- If a Jewish inmate is housed at an institution that does not have a JKDP, he/she may, upon request, be considered for transfer to another institution that meets their kosher need and classification.
- The JKDP is offered solely in designated institutions. Therefore, prior to referral to a classification committee, the assigned counselor at the sending institution shall contact the receiving institution's CFM to ensure that the receiving institution has an operational JKDP. Classification committees shall ensure that, barring medical needs or other extraordinary circumstances, the inmates currently participating in the JKDP are transferred only to those institutions that currently have an operational JKDP. If an exception is made by classification committee and the recommendation for transfer is not to an institution

with a JKDP, reasons for the exception will be fully documented in the CDC Form 128-G, Classification Chrono.

- Only a Jewish Chaplain, Rabbi, representative(s) of the Boards of Rabbis of Northern or Southern California, or their designee shall have the authority to administer, oversee, and approve participation in and removal from the JKDP.
- Each designated institution shall arrange for appropriate training for all inmate workers, and custody and food service employees involved in the supervising, ordering, preparation, and serving of Jewish kosher meals.
- The observance of Passover constitutes a single religious event requiring kosher Passover foods be provided during the eight days of observance.
- All designated institutions shall adhere to the CDCR standardized Jewish kosher menus and approved procedures for purchasing, preparing, and serving Jewish kosher meals.
- The JKDP shall otherwise be administered in accordance with the provisions of this Article.

Oversight Responsibilities

A Jewish Chaplain, Rabbi, representative(s) of the Boards of Rabbis of Northern or Southern California, or their designee shall oversee the JKDP in order to assure the program is following CDCR policy and procedures and kosher laws. Oversight responsibilities include:

- Reviewing each institution's JKDP annually for compliance with kosher law and CDCR policy. Results of the review shall be provided to the CFM.

Observance of Jewish Fasting Days

Inmates participating in the JKDP shall have the option to fast on a recognized Jewish fasting day, for the period required by that day. The Jewish Chaplain will provide food services with a list of those participating at least three days ahead of the intended fast. A Jewish Kosher inmate who chooses to fast will not be provided any regular meals for the recognized fasting day. The fasting inmate will instead be provided with an approved sack meal, to be eaten at the end of the fasting period. The sack meal will be equivalent to two (2) kosher sack lunches. Under no circumstances can the inmate give away, trade, or sell a sack meal. Doing so may result in a compliance violation of the Religious Diet Program Agreement.

The following are recognized Jewish fasting days:

Yom Kippur (Day of Atonement) – A 25-hour fast, from sunset to the following sunset. Observed in early fall on the 10th day of the Jewish month of Tishrei.

Fast of Tisha B'Av – A 25-hour fast, from sunset to the following sunset. Observed in the late summer on the 9th day of the Jewish month of Av.

Fast Of Esther – A short fast, from sunrise to sunset of the same day. Observed in early spring on the 13th day of the Jewish month of Adar.

Fast of the 17th of Tammuz – A short fast, from sunrise to sunset of the same day. Observed in early summer on the 17th day of the Jewish month of Tammuz.

Fast of Gedaliah – A short fast, from sunrise to sunset of the same day. Observed in the early fall on the 3rd day of the Jewish month of Tishrei.

Fast of 10th of Tevet – A short fast, from sunrise to sunset of the same day. Observed in winter on the 10th day of the Jewish month of Tevet.

Religious Meat Alternate Program

A Religious Meat Alternate Program (RMAP), offering meat that has been certified as halal, shall be available at all institutions. Muslim inmates may participate in the program, as determined by a Muslim Chaplain or designee Chaplain. Each institution shall endeavor to have a Muslim Chaplain employed at all times. In the absence of an employed Muslim Chaplain, the institution shall either utilize a designee Chaplain or make arrangements to utilize the services of a CDCR Muslim Chaplain from a neighboring institution.

Non-Muslim inmates with a religious dietary need may seek participation in the program by submitting to any appropriate Chaplain a CDCR Form 3030 Religious Diet Request, for determination by the Religious Review Committee RRC, as described by CCR Section 3210(d).

The RMAP is only offered at the dinner meal. Inmate participants in the RMAP shall receive the vegetarian option at breakfast and lunch. An inmate participant must show his or her religious diet card in order to receive the RMAP or vegetarian option.

All institutions will offer standardized departmental RMA items, and will adhere to approved procedures for procuring, and serving the RMA.

Each institution shall arrange for ongoing and appropriate training for all inmate workers, and custody and food service employees involved in the supervising, ordering, and serving of the RMA.

A designee Chaplain shall:

- Oversee the program and determine inmate compliance violations.
- Review each institution's RMAP annually and provide results of the review to the CFM.

Participation in a Religious Diet Program

A Religious Diet Card will be issued to the inmate by the Chaplain, or their designee. The Religious Diet Card shall follow the inmate if he/she is transferred to another CDCR institution.

At each meal, a positive check list will identify the inmates that have received a religious meal. This list may be used to issue a CDC Form 128-B, General Chrono, for Religious Diet Program Non-Compliance.

The following CDCR forms shall be used:

- Religious Diet Request (used for all religious diet requests)
- Religious Diet Program Agreement
- Religious Diet Program Agreement - Notice of Non-Compliance
- Religious Diet Cancellation Request
- Religious Diet Card

The Institution chaplain or designee shall document an inmate's participation in the JKDP, vegetarian diet program or the RMAP using the appropriate CDCR forms (i.e., Religious Diet Card, Religious Diet Request, Religious Diet Agreement, Religious Diet-Notice of Non-Compliance, and Religious Diet Cancellation Request). The completed originals shall be placed in the inmate's central file (miscellaneous section), as indicated on the forms.

Inmate Responsibilities

Inmates have the responsibility to:

- Complete a CDCR Religious Diet Request form and submit it to the appropriate Institution Chaplain or designee.
- Show their Religious Diet Card obtained from the Chaplain or designee when receiving a religious meal.
- Follow the conditions in the signed Religious Diet Program Agreement.

Chaplain Responsibilities

Chaplain means a local Institution Chaplain—or their designee representing the religious group. Upon receiving a completed inmate's "Religious Diet Request" form, the Chaplain, or their designee shall:

- Ensure that no more than 30 calendar days shall pass from the day the Chaplain receives the completed "Religious Diet Request" in which a determination of program eligibility is made, and an accepted inmate begins receiving the religious meals requested.
- Interview the inmate to explain the three religious diet options, including what the meals consist of.
- Determine the inmate's religious diet eligibility, with one exception:
 - The RRC shall determine the eligibility of a non-Muslim inmate to participate in the RMAP. When a non-Muslim inmate seeks the RMAP, the Chaplain shall forward the CDCR Form 3030, Religious Diet Request, to the RRC for consideration.
- If Religious Diet Program eligibility is determined, explain the Religious Diet Program Agreement.
- Have the inmate sign all required documents. Document an inmate's refusal to sign any of the required documents.
- Complete and distribute the Religious Diet Request, and if applicable the Religious Diet Program Agreement as indicated on the forms, within two working days.
- Notify the inmate of the decision in writing (by copy of their Religious Diet Request).
- Enter pertinent information for each inmate approved to participate in the Religious Diet Program onto a religious diet participant list within 24 hours of approval. Food Service will begin serving those approved for religious meals normally within two days of receiving this notification.
- Along with food service staff, regularly monitor the religious diet lists to ensure that all participating inmates are served their religious dietary meals with minimal delay.
- Update the list identifying inmate religious diets every 30 days and provide the list to the CFM.

- Coordinate with the CFM to determine which dining area will provide the inmate his/her meals.
- Provide each approved inmate with a Religious Diet Card. Collect Religious Diet Cards that are no longer valid.
- Meet with inmates, giving them the opportunity to respond to allegation(s) of noncompliance with Religious Diet Program. Utilize the Religious Diet Program Notice of Noncompliance form.

Monitoring for Religious Diet Program Inmate Compliance

Any staff may report an incident of an alleged inmate Religious Diet Program Agreement compliance violation, as described on the CDCR Form 3030-A, Religious Diet Program Agreement.

The incident report must be in writing using a CDC Form 128-B, General Chrono, citing CCR, Title 15, Section 3054. All written reports shall be sent to the appropriate Chaplain who shall make the final determination of continuing eligibility.

54080.15 Meals Served to Non-Inmates

The meal charge for State employees and persons other than official guests in State-operated dining rooms maintained and operated for inmates shall be \$1.00 plus sales tax. The meal charge for institution-operated employee dining rooms shall be in accordance with this section.

54080.15.1 Reimbursement for State Purchased Food

Outside guests attending inmate banquets, luncheons, or other special events where State-purchased food is provided shall be charged a minimum of \$1.00 plus sales tax per meal, per guest. Funds collected in excess of \$1.00 plus sales tax, for the event shall be accompanied by a statement, signed by a non-inmate representative of the group, which reads: "We donate the sum of \$_____ to the Inmate Welfare Fund." If the cost of the meals exceed the allowance of \$1.00 per meal, an additional charge to the inmate group's trust account shall be made in accordance with this section.

54080.15.2 Institution Operated Employee Dining Rooms

In institution-operated employee dining rooms, meal charges shall be set by the institution and shall reflect the actual cost of serving an average meal, including staffing costs. Employee dining rooms shall not be allowed to operate at a loss.

54080.15.3 Employee Meetings

At conferences, workshops, training classes, or other employee meetings held at an institution, coffee and/or other beverages may be served only if the total cost for the refreshments is paid by the participants.

54080.15.4 Official Guests

Representatives of any city, county, state, federal, or foreign government who are guests of CDCR, and official staff who are inspecting the food services operation may be provided a sample of the meal served to inmates free of charge. Examples include persons on a grand jury, state legislators, officials of foreign prisons, or official CDCR or state inspectors.

54080.15.5 Group Visits and Tours

Meals may be served to participants of tours or visitors of approved groups in accordance with this section.

54080.16 Employee Uniforms

Food service staff, supervising correctional cooks, correctional supervising cooks, correctional bakers, correctional butcher/meat cutters shall wear the CDCR-approved uniform to distinguish them from inmates assigned to food-service duties. This uniform shall consist of:

- TROUSERS: dark brown, equivalent to Big Mac or Levis. Not tight-fitting.
- SHIRTS: tan, equivalent to Big Mac or Levis with the CDCR patch over the left breast pocket.
- CAPS: solid brown, baseball type, to match clothing, with the CDCR patch and the employee classification rocker arm above/atop the patch.
- JACKETS: brown color with the CDCR patch on the left breast.
- SHOES: brown or black, smooth leather. Soles must be oil resistant and non-skid type, no buckles or design (no cowboy, tennis, or gym-type shoes or boots).
- BELT: black or dark brown.
- WHISTLE: gold or chrome or black in color; metal only.
- ALARM HOLDER: black leather.
- DEPARTMENTAL NAME PLATE

The following items are optional:

- SMOCK: tan with CDCR patch over the left breast.

- **JUMPSUIT:** solid brown with CDCR patch over the left breast. Employees shall report to their assigned area in clean uniforms, which are in good condition.

54080.17 Inmate Smocks /Aprons

Each inmate food handler shall be provided a clean white smock or apron and other appropriate clothing. Such garments will be maintained in the food service area and stored in a sanitary manner separate from personal clothing.

54080.18 Sanitation Standards

Sanitation standards are based on the H&SC. Standards for sanitation, sanitation training, purchasing, receiving, storage, preparation, holding, and serving of food shall meet the requirements set forth in the most current H&SC, Sections 113975 through 114180 (California Retail Food Code (CFC)), the State law regulating food establishments and facilities, and CDCR food service policy. The CFM is responsible for ensuring compliance with all standards at their respective institutions.

54080.18.1 Sanitation Inspection

An inspection of the food service area of each institution/camp shall be performed at least every year by a state-registered sanitarian with the environmental health section of the DHS. Administrative audits may be conducted throughout the year at various institution locations on a rotating basis.

Institution Head or Designee

The institution head-or designee shall inspect the institution/camp kitchens at least once each month, record the findings on an institutional inspection report form, and keep the report on file for inspection by the DFA or State sanitarian.

Correctional Food Manager

The CFM or designee shall prepare a weekly sanitary inspection and report using the institutional inspection form. This report shall be kept on file at the institution for a minimum of two years. Additional inspections of the food service area shall be performed by institutional staff as often as necessary to enforce food service standards.

54080.18.2 Suspected Foodborne Illness Outbreak Procedures

Each institution/camp shall adopt the statewide standardized Suspected Foodborne Illness Outbreak Operational Procedures, issued October 2004. The CFM shall ensure that all procedures pertaining to food service responsibilities are enforced, including the maintenance of a food sampling kit. A copy of the Foodborne Illness procedures shall be located in the Food Service Handbook in the central kitchen.

54080.19 Food Service Training

The CFM is responsible to ensure that an adequate food service employee training program is in effect, and that all food service personnel participate in the required training.

In accordance with CFC, each institution must have at least one staff working in food services that has successfully passed an approved and accredited food safety certification examination. The CDCR encourages food safety certification and/or training of all food service staff, culinary custody staff, and inmate workers.

Methods of training shall include verbal and written instruction and demonstration, and shall include technical and safety instruction regarding inmate food service worker responsibilities.

Hazardous materials training shall be provided to all food service staff to ensure the safe handling of hazardous materials. The institution fire department is responsible for providing training to all food service staff including inmate workers.

The CFM shall maintain Material Safety Data Sheets (MSDS) in all areas where chemicals are used. Food service staff and inmates shall be trained on the MSDS program so they understand the hazardous properties of the chemicals they work with.

54080.20 Health and Safety Law and Regulations

A Hazard Analysis Critical Control Point (HACCP) program shall be developed and followed at each institution/camp to ensure food safety. The HACCP program shall include written policies and procedures and a system for assuring compliance. The Critical Control Points shall be identified in the program as well as corrective action procedures.

Food handlers (staff and inmates) shall be instructed on the importance of sanitation, personal hygiene, and the safe preparation and service of food. Food handlers shall have clean hands and fingernails, wear hairnets or caps that entirely cover their hair, wear clean garments, be in good health, and follow hygienic food handling practices as required in CFC.

A medical clearance shall be required prior to placing an inmate in a food handling assignment. Food service correctional officers and correctional cooks shall hold daily inspections of all workers who handle food for cleanliness, open sores, proper clothing, hair nets (covers) or any condition that may contaminate the food. Inmates found to have open sores or other conditions that may contaminate food shall be referred to the institution's health care services staff for examination. Medical clearance shall be obtained prior to their return to work. Staff found to have open sores or other conditions that may contaminate food shall be excluded from any type of food handling or preparation until they are no longer considered contagious. All food handlers shall be instructed on the importance of proper hand washing. Hand washing signs shall be posted in all food service restrooms. Enforcement of proper and frequent hand washing of inmate workers and staff shall be a priority of the CFM.

The temperature of refrigeration units and dishwashing machines shall be recorded daily on the log maintained by the CFM for a minimum of two years. Dishwashing machines shall be inspected daily to ensure proper operation. This inspection is also noted on the log. Refer to the Food Service Handbook and CFC for further information.

54080.21 Restricted Food Items

Supervisory food service staff shall ensure that restricted food items that may be used to produce alcohol are stored in a lockable receptacle, caged area, and/or maintained in a locked supply room. Supervisory food service staff shall also provide a method to strictly control and provide direct supervision of inmates handling any restricted food item. Restricted food items include, but are not limited to: yeast, sugar, bread/pastry dough, and heavy syrup canned fruit.

Supervisory food service staff shall maintain a running inventory log of all restricted items. The log shall indicate the date, time, and amount of supplies, either dispensed, used, or received and the name of the staff authorizing the transaction.

ARTICLE 52 —REQUEST FOR INTERVIEW, ITEM, OR SERVICE

Effective July 29, 2011

54090.1 Policy

It shall be Department policy to facilitate communication between staff and inmates and parolees via a written request process. Effective communication is essential to the orderly management of correctional settings as well as the success of prison, parole supervision, and rehabilitation programs. For that reason, the Department promotes constant communication between staff and inmates and parolees. Normally, when requesting items or service, the use of informal means of communication is encouraged for timely resolution of requests. When it is useful or necessary to document these attempts however, the provisions of this article shall afford inmates and parolees a means for so doing.

54090.2 Purpose

The purpose of this article is to:

- Establish a process to facilitate requests for interviews, items, and services.
- Afford the inmate or parolee the opportunity to create a record of their attempt to contact staff when requesting interviews, items, or services.
- Establish a transparent process subject to supervisor's review for the purpose of improved oversight of local operations.

54090.3 Responsibility

Each hiring authority shall implement this written request process to ensure its efficient and consistent operation in accordance with the policy and purpose provisions of this article.

54090.4 Written Request Process

Inmates and parolees may request interviews with staff and/or request items and services via a CDCR Form 22, Inmate/Parolee Request for Interview, Item or Service. This form has been redesigned to achieve expanded non-conflicting communication objectives. Timely resolution of many routine matters will be achieved through application of the processes and practices set forth in this article and henceforth applied uniformly toward that end.

- The written request process may be used when the inmate or parolee seeks a response to an issue related to his or her confinement or parole.
- This process is not intended to preclude or inhibit inmates or parolees from engaging in verbal communication and making verbal requests to staff outside of the written request process.
- Inmates and parolees shall be considerate in the use of this process, making allowance for staff who are otherwise occupied by submitting their requests reasonably and in a manner not to interfere or delay a peace officer in performance of his or her duties.
- Staff must accept and respond to the written request unless otherwise occupied in duties which require their full attention. Under such circumstances staff can advise the inmate of alternative submittal options.
- Staff shall attempt to resolve inmate and/or parolee issues expeditiously, whether brought to their attention verbally or in writing.
- All communication on the request form should be polite, professional, and to the point.
- Misuse or abuse of the form may be noted in staff responses to facilitate appropriate use of the form.

54090.4.1 Form Availability

The Department shall ensure that the CDCR Form 22, Inmate/Parolee Request for Interview, Item or Service, is readily available to inmates and parolees. This form shall be available in all inmate housing units, general or segregated; all institutional libraries; any facility under the Department's jurisdiction, whether residential or medical, where inmates are required to remain more than 24 hours; and all parole field offices.

This form is printed on NCR (no-carbon-required) paper, which facilitates:

- A record of the date the form was first presented to staff, and the date of each staff response.
- A record of the nature of the request and any subsequent efforts to address it.

54090.4.2 Submission

When seeking a response or outcome to a written request for an interview, item or service, the inmate/parolee shall complete the CDCR Form 22 to describe his or her request.

- The inmate shall deliver or mail via institutional mail the completed form to any staff member who is able to respond to the issue.
- The parolee shall deliver or mail via the United States Postal Service the completed CDCR Form 22 to his or her parole agent who shall respond to the issue or, as appropriate, route the form to another staff member able to respond to the issue.
- However, if the parolee mails the form, the receipted copy of their request may also be returned by staff via external mail services/US Mail.
- The CDCR Form 22 process does not stay the time constraints for filing an appeal and therefore does not preclude the inmate or parolee from filing an appeal on the same issue prior to receiving a response to their written request. However, the appeal may be rejected by the appeals coordinator or designee and an extension granted to complete the request form process before resubmitting the appeal.
- An employee shall not refuse the CDCR Form 22 unless exigent circumstances described in this article apply.

54090.4.3 Employee Responsibilities

Upon receipt of an inmate or parolee completed CDCR Form 22, the employee shall:

- Immediately date and sign the form unless occupied in duties which otherwise require full attention. Employees so occupied shall advise the inmate or parolee to select another suitable recipient, present the request at another time or the employee shall advise that they will return at the first opportunity, when duty permits, to retrieve the request.
- Provide the inmate or parolee the bottom copy of the employee signed form which shall serve as the inmate/parolee's receipt to verify the date of submittal. The employee, at his or her discretion, can respond to the request at this time or wait until to respond within the constraints of this section.
- The receipt of a completed CDCR Form 22 from an inmate or parolee does not preclude a staff member from forwarding the document to a more appropriate responder. However, employees shall either deliver the form to the staff member or place it in intra-office mail addressed to the intended staff member within 24 hours.
- Within three working days after receipt of the form, the responding employee shall:
 - Note his or her decision or action on the form.
 - Sign and date the form.
 - Retain a copy for his or her records.
 - Return the original and remaining copies of the NCR form to the inmate or parolee
- The willful delay or obstruction of an inmate/parolee's attempt to resolve a problem by failing to respond to or destruction of a submitted CDCR Form 22 is subject to corrective action in accordance with the employee discipline policies of the Department.

54090.4.4 Responses and Further Review

If the inmate or parolee is dissatisfied or disagrees with the staff member's response, he or she may submit the CDCR Form 22 to the employee's supervisor for review, while retaining a copy for his or her records. Only in the absence of the staff member's supervisor may the inmate/parolee submit the form to an alternative supervisor of the same office or unit authorized and/or able to respond to the issue in question. Upon receipt of this form the supervisor shall within seven calendar days:

- Indicate a decision or action on the form.
- Sign and date the form.
- Ensure a copy is made and retained in the facility records or parole field files for a period of time no less than prescribed for inmate correspondence in the approved Departmental records retention schedule, being mindful that originals are returned to the inmate/parolee.
- Return the original to the inmate or parolee.

An inmate or parolee's documented use of a CDCR Form 22 does not constitute exhaustion of administrative remedies as defined in DOM Section 54100.13.

54090.5 Revisions

The Director, Division of Adult Institutions, or designee in conjunction with the Chief, Office of Appeals, shall ensure that the content of this Article is accurate and current.

54090.6 References

Title 15, California Code of Regulations, §§ 3084, 3086.

ARTICLE 53 — INMATE/PAROLEE APPEALS

Revised July 29, 2011

54100.1 Policy

It shall be Department policy, consistent with correctional best practice, to provide through the appeal process the means for expressing and resolving identified grievances to inmates or parolees and an administrative mechanism for review of departmental policies, decisions, actions, conditions, or omissions that have a material adverse effect on the health, safety, welfare, status, and/or program of inmates and parolees.

54100.2 Purpose

The purpose of this Article is to:

- Maintain the integrity of the Department through a fair, objective, and

effective appeals process.

- Provide for the resolution of inmate or parolee grievances at the lowest possible administrative level with timely responses to the appellant.
- Provide the inmate or parolee grievant a meaningful remedy focused on correcting an identified problem.
- Afford the grievant an avenue for the exhaustion of administrative remedies prior to initiation of a court action.
- Audit the internal processes and operations of the Department to identify, modify, or eliminate practices which are unnecessary or may impede the accomplishment of correctional goals.
- Utilize inmate and parolee appeal information as an early warning indicator to identify and respond to potential sources of liability to the Department.
- Gather and disseminate data and statistics about appeals in order to satisfy statutory responsibilities and in furtherance of policy, management and program improvement goals.

54100.3 Responsibility

Each hiring authority shall implement the appeal process and ensure it operates effectively and consistently with specified policies as set forth herein.

- At least one staff member, at a level not less than a CC-II, shall be designated as the appeals coordinator in each institution; and one staff member of a level not less than PA-II shall be designated as the appeals coordinator in each parole region.
- The appeals coordinator or delegated staff under direct supervision shall process all appeals, monitor the system, prepare the quarterly appeals report, recommend corrective action where indicated, and work with the IST officer to ensure training on the appeals process is carried out. Delegated staff under appeals coordinator direction shall be properly trained, audited regularly and undertake only those duties and responsibilities appropriate to their job classification, background and experience.
- The Appeals Coordinator's Office shall receive, log, route, and monitor disposition of the CDCR Form 602, Inmate/Parolee Appeal, and the ancillary appeal forms, CDCR 602-A, Inmate/Parolee Appeal Form Attachment, and the CDCR 602-G Inmate/Parolee Group Appeal, supplement.
- Hiring authorities are expected to meet with appeals coordinators on a regular basis to receive and disseminate information respecting process, emergent issues, best practice trends and related matters.
- Each inmate upon arrival to an institution shall be provided written material (instructions, guidelines and/or examples of forms as appropriate) describing the appeal process. Each inmate prior to being released to parole shall be provided with a copy of CDC Form 1570, Guidelines for Parole, which contains a notice of appeal rights and procedures for filing an appeal. Each parole unit shall maintain copies of the appeal procedure which shall be made available to the parolee upon request. Parolees shall be informed of the appeal process at the initial parole interview.
- Copies of DOM §54100, Inmate/Parolee Appeals, and any facility appeal supplement shall be filed and maintained in each inmate law library including libraries in segregated housing units, community correction facilities, treatment and/or transitional living and out-of-state facilities where inmates/parolees remain under the custody of the Department.

54100.4 Right to Appeal

Any inmate or parolee under the Department's jurisdiction may appeal any policy, decision, action, condition, or omission by the Department or its staff that the inmate or parolee can demonstrate as having a material adverse effect on his or her health, safety, or welfare. A material adverse effect means harm or injury that is measurable or demonstrable or the reasonable likelihood of such harm or injury. In either case, the harm or injury must be due to any policy, decision, action, condition, or omission by the Department or its staff. In the context of this article, an "appellant" means an inmate or parolee who has submitted an accepted appeal and a "remedy" means a process or means to address an issue or correct a wrong.

No reprisals shall be taken for the good faith use of or responsible participation in the appeals process. This shall not prohibit appeal restrictions against an appellant for abusing the appeal process nor shall it prohibit the pursuit of disciplinary sanctions for violations of Department

rules. A complaint of reprisal may be pursued through the appeals process. If, after investigation, it is determined that a reprisal has occurred, the staff member(s) involved shall be subject to adverse action in accordance with the employee discipline policies of the Department.

54100.5 Exclusions

The CDCR Form 602, Inmate/Parolee Appeal, form shall not be utilized in the following appeals:

- Board of Parole Hearings (BPH).
- Narcotic Addict Evaluation Authority (NAEA). (See 15 CCR §5400, Appeals, NAEA Regulations.)
- Health or Safety complaints – California Prison Industry Authority (CALPIA). (See 15 CCR §3084.9(e) and 8 CCR §344.40(a).)

54100.6 Appeal Preparation

The Department shall make its appeal forms readily available to all inmates and parolees, ensuring that those who have difficulty communicating have equal access to the appeal process and the timely assistance necessary to participate in this process including completing or clarifying the appeal. Timely, in this particular instance, means promptly and without deliberate delay, insofar as prevailing organizational resources permit.

The inmate or parolee shall describe the specific issue under appeal, the relief requested, and state all facts known and available to him/her regarding the issue being appealed upon one original copy of the CDCR Form 602, and if needed to clarify the issue or matter in question, one original Inmate/Parolee Appeal Form Attachment (CDCR 602-A), attach all original relevant supporting documents and forward them, in a single mailing, to the appropriate appeals office.

The CDCR Form 602 provides a system of accountability at each level of review. When the appeal material is submitted without a completed and signed CDCR Form 602, the appeals coordinator shall return it to the inmate or parolee with instructions to fill out and sign the CDCR Form 602 (and/or CDCR Form 602-A, if applicable) and resubmit the appeal for processing.

- If originals are not available, copies may be submitted with an explanation and the appeals coordinator shall have the discretion to request that any submitted copy is verified by staff.
- The inmate or parolee is limited to the space provided on the CDCR Form 602 and one CDCR Form 602-A to describe the specific issue and action requested. The appeal content must be printed legibly in ink or typed on the lines provided on the appeal forms in no smaller than a 12-point font. There shall be only one line of text on each line provided on these forms.
- The inmate or parolee shall list all staff member(s) involved and shall describe their involvement in the issue. To assist in the identification of staff, the inmate or parolee shall include the staff member's last name, first initial, title or position (if known) and the date(s) of the staff member's involvement in the issue under appeal. Absent the requested identifying information, the inmate or parolee shall provide any other available information that would assist the appeals coordinator in making a reasonable attempt to identify the staff in question.
- Relevant supporting documents are defined as documents needed to substantiate the allegation(s) made in the appeal, including but not limited to, classification chronos, property inventory sheets, receipts, completed disciplinary reports with supplements, incident reports, notifications of disallowed mail, trust account statements, memoranda, letters, medical records, and/or a written request for interview, item or service (See DOM 54100.8). Only supporting documents necessary to clarify the appeal shall be attached to the appeal.
- The inmate or parolee shall not delay submitting an appeal within established time limits if unable to obtain supporting documents, but shall submit the appeal with all available supporting documents and provide an explanation why any remaining supporting documents are not available.
- Supporting documentation does not include documents that simply restate the matter under appeal, argue its merits or raise new issues not identified in the appeal and stated as such on the relevant original 602 forms. New issues raised in the supporting documents shall not be addressed, and any decision rendered will pertain only to the present appeal issue and requested action(s).
- The inmate or parolee shall not include or attach extraneous physical objects, exhibits, tabs or dividers, including organic materials of any type with their appeal packet or otherwise deface or contaminate submitted forms and attachments. Appeals submitted with hazardous

or toxic material that present a threat to the safety and security of staff, inmates, or the institution may subject the appellant to disciplinary action and/or criminal charges commensurate with the specific act.

- For third level appeals, the inmate or parolee shall be responsible for mailing the appeal form and supporting documentation directly to the third level Appeals Chief using their own funds and US mail service, unless the appellant is indigent in which case the third level appeal shall be processed in accordance with the indigent mail provisions (15 CCR §3138). An indigent inmate/parolee shall not, however, be required to divide their appeal into separate mailings to conform to indigent mail weight restrictions.
- Another inmate or parolee, staff member, family member as defined in Section 3000 of the Title 15, or other interested party may assist the inmate or parolee in completing the appeal form. However, the act of providing such assistance does not render or convey upon that individual status as party to the appeal. In addition, assistance is disallowed if the act of providing such would create an unmanageable situation including but not limited to; acting contrary to the principles set forth in 15 CCR §§ 3163 and 3270, allowing one offender to exercise unlawful influence/assume control over another, require an offender to access unauthorized areas or areas which would require an escort, or cause avoidance or non-performance in assigned work and program activities.
- An inmate or parolee shall not submit an appeal on behalf of another person.
- Inmates or parolees shall not give any form of compensation to other inmates or parolees or receive any form of compensation for assisting in the preparation of another's appeal. The giving or receiving of compensation is considered misconduct and is subject to disciplinary action.
- The appellant shall sign, date, and submit the appropriate appeal document(s) at each level in the appeal review process.
- Unless otherwise provided for in this article, the appeal shall not be accepted at the third level for review without first having been reviewed at second level.

54100.7 Group Appeal

A group of inmates or parolees may appeal a specific issue that affects all group members. In this situation, one CDCR Form 602 shall be accompanied by an Inmate/Parolee Group Appeal (CDCR Form 602-G), containing the name, Department identification number, assignment, housing, and dated signature of the inmate or parolee who prepared the appeal.

- This appeal shall be logged as one appeal.
- Each CDCR Form 602-G shall state the appeal issue, the action requested and affirmation that the undersigned agree with the appeal issue/action requested.
- The legible names of the other participating inmates or parolees with dated signatures, departmental identification numbers, assignments, and housing shall be entered on the CDCR Form 602-G.
- Only signatures submitted on a CDCR Form 602-G shall be accepted for purposes of a group appeal.
- Sufficient interviews (one or more) with the participating inmates or parolees shall be held to clarify the issue under appeal.
- At each level of review, a response shall be attached to the CDCR Form 602 and returned to the appellant who shall then share the response with all inmates or parolees who signed the CDCR Form 602-G.
- If the inmate or parolee submitting the group appeal is transferred, released, or requests withdrawal from the appeal, the response shall be addressed to the next name on the CDCR Form 602-G, who shall then share the appeal response with the other group appellants.
- Group appeals shall not be cancelled at the request of the original individual appellant unless all of the inmate or parolee signatories are released, transferred, or agree to withdraw the appeal.
- A group appeal shall not be accepted or processed if the matter under appeal requires a response to a specific set of facts (such as disciplinary and staff complaint appeals) which are not the same for all participants in the appeal. In such case, the group appeal shall be screened out and returned to the original appellant with direction to advise all those who signed the CDCR Form 602-G to submit individual appeals of their separate issues.

- An inmate or parolee who signs a group appeal is ineligible to submit a separate appeal on the same issue.
- A group appeal counts toward each appellant's allowable number of appeals filed in a 14 calendar day period.

54100.7.1 Multiple Appeals of the Same Issue

Instances where a number of inmates or parolees have independently of each other filed an identical appeal regarding the same issue arising from similar circumstances will be considered multiple appeals of the same issue.

- The original (initial or first) appellant and, as needed for clarification of the matter or issue, one or more other inmates/parolees concerned shall be interviewed, and a response given to the inmate or parolee who filed the initial appeal.
- This initial appeal response will serve as a template for all other responses to the same issue.

A statement shall be included in the initial response indicating that the appeal has been designated one of multiple identical appeals and a common response is being distributed to each appellant.

- This appeal response shall be given to each inmate/parolee with the recipient's name and identification number substituted and shall state that one or more appellants was interviewed regarding the issue.
- All multiple appeals shall be individually logged. Any appeal of the same, identical issue received subsequently shall be identified as a multiple appeal in the response which shall reference the original interview date(s) and redact information that would identify other appellants individually.
- An unrelated appeal issue submitted in conjunction with a multiple appeal of the same issue is subject to processing as an individual appeal separate from the multiple appeal topic.

54100.8 Supporting Documents

Prior to the submission of an appeal to the appeals coordinator, the inmate or parolee shall obtain and attach all supporting documents necessary for the substantiation, clarification and/or resolution of his or her appeal issue.

- The inmate or parolee shall not delay submitting an appeal within time limits established in DOM 54100.16 if unable to obtain supporting documents, but shall submit the appeal with all available supporting documents and provide in Part B of the CDCR Form 602 an explanation why any remaining supporting documents are not available.
- The time limits for filing an appeal are not stayed by failure to obtain supporting documentation.
- Failure to attach all necessary supporting documents may result in the appeal being rejected as specified in 15 CCR §3084.6/DOM §54100.11. The appeals coordinator (or when appropriate, third level Appeals Chief) shall in such circumstances inform the inmate or parolee that the appeal is rejected because necessary supporting documents are missing. The appellant shall be allowed an additional 30 calendar days to secure any missing supporting documents and resubmit the appeal.
- The appeals coordinator may grant additional time extensions beyond the initial 30 calendar day extension if the inmate or parolee submits a reasonable explanation why the supporting documents still are not available.
- Appellants shall not attach copies of previously processed appeals as supporting documents to the present (current) appeal, except when appealing a previously cancelled appeal or when expressly requested by the appeals coordinator. The appeals office shall clearly stamp as "attachment" any appeals form (Form 602, 602-A or 602-G) submitted as an exhibit under these circumstances.

Supporting documents include, but are not limited to, the inmate's or parolee's copy of the following:

Disciplinary

- An appeal of an administrative or serious disciplinary action requires as supporting documentation the completed CDC Form 115, Rules Violation Report (RVR).
 - A disciplinary action is not considered complete until all processing requirements including the hearing, postponement, and any re-hearing are completed as evidenced by the signature of the Chief Disciplinary Officer (CDO).
 - The date the final RVR copy is issued to the appellant shall serve to establish the time limits for filing an appeal of the RVR,

not the date of the disciplinary hearing.

- An appeal of a CDC Form 128-A, Custodial Counseling Chrono, requires the CDC Form 128-A to be submitted as a supporting document.

Classification

- An appeal of a classification committee action requires as supporting documentation the CDC Form 128-G Classification Chrono, reflecting the committee's action under appeal. If the committee's action did not include a referral to the Classification Services Representative (CSR), the date of the committee's action shall serve to establish the time limits for filing an appeal.
- An appeal of a classification committee action that requires CSR endorsement or decision including, but not limited to, affixing a suffix or assessing an administrative determinant, shall include the CDC Form 128-G, Classification Chrono, reflecting the CSR's endorsement or decision. The date of the CSR's endorsement or action shall serve to establish time limits for filing an appeal.
- An appeal of a classification committee action recommending transfer to another facility, prison, or program requiring CSR endorsement or decision, shall include as a supporting document, the CDC Form 128-G, Classification Chrono, reflecting the CSR's endorsement or decision. The filing of an appeal of a transfer endorsement/decision shall not normally be cause to stay or delay the transfer except in extraordinary circumstances and at the discretion of the Warden or designee.

Parole

- An appeal of conditions of parole including special conditions requires as supporting documentation the inmate/parolee's CDC Form 1515, Notice and Conditions of Parole. A verified copy of the original Notice and Conditions of Parole shall be accepted by the appeals coordinator in place of the parolee's copy.
- An appeal of county of last legal residence may be submitted within 30 calendar days following the inmate's receipt of the CDCR Form 611, Release Program Study, completed and returned to the institution/facility by the parole region.
- Except in those cases where an appeals coordinator determines a CDCR Form 2195, Non-Revocable Parole Eligibility Screening, form is not available, an appeal of non-revocable parole requires this form as supporting documentation.

Mail

- An appeal of disallowed/disapproved mail, magazine or publication shall include as a supporting document the CDC Form 1819, Notification of Disapproval-Mail/Packages/Publications, received by the inmate informing him or her of the disapproval of the mail, magazine or publication under appeal.

Property

- An appeal of a property issue resulting from a cell/dorm/room search shall include the search receipt as a supporting document.
- An appeal of a property issue arising from the inmate's placement in segregated housing shall include a copy of the CDC Form 1083, Inmate Property Inventory, reflecting staff's inventory of the inmate's property at the time of his/her placement in segregated housing.
- An appeal of a property issue arising from the inmate's transfer shall include a copy of the CDC Form 1083, Inmate Property Inventory, from the sending institution reflecting staff's inventory of the inmate's property in preparation for the inmate's transport/transfer and a copy of the CDC Form 1083 provided to the appellant at the time of receipt of his/her property at the receiving institution.

CDCR Form 22

- responsibilities should not The original of the CDCR Form 22, Inmate/Parolee Request for Interview, Item, or Service, processed through the supervisory level pursuant to Title 15 CCR §3086 need not be included as supporting documentation in the following appeal instances:
 - Classification committee actions.
 - Classification Staff Representative endorsements/decisions.
 - Disciplinary rules violations.
 - Emergency appeals.
 - Involuntary psychiatric transfers to state hospitals or Department of Mental Health Facilities.

- Staff complaints.
- CALPIA Health or Safety complaints.
- Any appeal wherein the appeals coordinator determines that the appellant's submittal of a CDCR Form 22 is unwarranted and/or would not contribute to the outcome of the appeals process.

- An inmate or parolee who intends to file an appeal shall not delay so doing if the written request process is not yet complete, but shall note on the CDCR Form 602 that a response is pending at the time of the appeal submission.
- If a completed CDCR Form 22 is essential for further appeal processing but not yet available to the appellant, the appeals office shall date stamp the appeal and reject it for missing documentation. However, the appellant will have met time constraints pending subsequent receipt and attachment of the pertinent CDCR Form 22.
- In the event the completed CDCR Form 22 is not received by the appellant within 30 days of the appeal being rejected by the appeals office, the inmate or parolee shall send the appeal to the appeals office and request processing without the form. The appeals office may grant an additional extension if receipt of the form appears likely or process the appeal without such documentation.

54100.9 Appeal Procedure Abuse and Restriction

Excessive and fraudulent filings overload the appeals system, disrupt the orderly and timely processing of appeals and thereby deprive the Department of its ability to exercise due diligence. Therefore, misuse or abuse of the appeals process may lead to appeal restriction as described in this section. The appeals coordinator shall have the discretion to take specific action when it is deemed that:

- An inmate or parolee submits more than one appeal for initial review within a fourteen (14) calendar day period, unless the inmate or parolee is submitting an emergency appeal or the appeal has been accepted due to exceptional circumstances as determined by the appeals coordinator or the third level Appeals Chief. The 14 day period shall commence on the day following the appeals office's date stamp of the appellant's last accepted appeal.
- Appeals previously cancelled pursuant 15 CCR §3084.6(c)/DOM §54100.11 are repeatedly submitted by the same complainant(s).
- The appeal submission contains information the appellant knows to be false or consists of a deliberate attempt at distorting the facts.
- Appeals containing threatening, grossly derogatory, slanderous, or obscene statements and/or organic contamination is included in or makes up any part of the appeal package.
- The description of the problem and/or requested action exceeds the space provided on the Inmate/Parolee Appeals form series.
- The appeal is repeatedly filed contrary to clear and explicit previous instructions. A resubmitted rejected appeal that does not comply with appeals coordinator instructions for correction shall, in addition to not being processed, be subject to confiscation.

When an inmate or parolee submits appeals described above:

- The first appeal received shall be screened for routine processing.
- All subsequent non-emergency appeals submitted by that individual shall be screened and the appeals coordinator shall document any abuse as evidenced by the screening results.

Warning Letter

- If an inmate or parolee continues to submit excessive, demonstrably false, noncompliant or abusive appeals, he or she shall receive a warning letter from the appeals coordinator documenting the history and nature of appeal system abuse.
- If the abuse of process continues after the issuance of a warning letter, the appeals coordinator shall meet with the inmate or parolee in a timely manner before imposition of any restriction to provide instruction in the appropriate use of the appeals process and to rule out any unintended basis for non-compliance. If a face-to-face meeting with the appeals coordinator is not possible, an agent acting on behalf of the appeals coordinator shall conduct the meeting.
- Excessive, demonstrably false, noncomplaint or abusive appeals submitted by an inmate or parolee after the issuance of a warning letter shall be subjected to screening by the appeals coordinator to ensure they do not contain qualifying urgent or emergency issues.
 - An appeal found to contain emergency issues, as described in Section 51100.20, shall be processed as an emergency appeal.

- If no such issue is determined to be present, the appeal shall be retained by the appeals coordinator pending placement of the appellant on appeal restriction by the third level Appeals Chief.
- The appellant shall be informed in writing why the appeal constitutes abuse of process and informed that the appeal processing has been suspended pending determination of appeal restriction status.

Appeal Restriction

- If the appeal abuse continues after the issuance of a warning letter and a face-to-face meeting, the inmate or parolee is subject to appeal restriction.
 - The appeals coordinator shall notify the third level Appeals Chief describing the individual's abuse of the process and requesting placement of the inmate or parolee on appeal restriction.
 - The appeals coordinator shall advise the third level Appeals Chief in writing of the extent and frequency of the abuse and the corrective steps which have been taken, including issuance of a warning letter and date of face-to-face meeting(s).
 - Any appeal submitted by the inmate or parolee after abuse has been identified but prior to a decision being rendered by the third level Appeals Chief shall be processed in accordance with the "Not Processed" protocol above, including screening to ensure bona fide emergency issues are appropriately identified for processing.
- Upon determination of continued abuse and verification that a face-to-face interview and warning letter have occurred, the third level Appeals Chief shall have the discretion to authorize preparation of a notice by the Appeals Coordinator restricting the inmate or parolee to one non-emergency appeal every 30 calendar days for a period of one year effective the date of the notice.
 - At the time a determination is made regarding imposition or non-application of appeal restriction, any prior appeal retained by the appeals coordinator in accordance with the provisions set forth above shall be returned to the appellant stamped "Not Processed."
 - An imposed appeal restriction shall remain in effect for the period specified when the appellant is returned from parole or transfers to another facility. Parolees are subject to continuing restriction initiated by the institution, subject to review and ratification by the third level Appeals Chief.
 - Any subsequent violation of the appeal restriction shall result in an extension of the restriction for an additional one-year period upon approval by the third level Appeals Chief.
- Upon the decision of the third level Appeals Chief to impose an appeal restriction, any appeal returned to the appellant marked "not processed" may only be later resubmitted by the inmate or parolee in accordance with the terms of his or her appeal restriction and in conformance with the timeframes and practices set forth in this article (The original submittal date of the appeal may serve, under exceptional circumstances, to satisfy filing time requirement).
- Upon a decision by the third level Appeals Chief to **not** place the inmate or parolee on appeal restriction, any retained appeal returned to the appellant and marked "not processed" may be resubmitted by the appellant in accordance with the standard submittal requirements set forth in this article except that the appellant's original submittal date of the appeal may serve to satisfy filing time requirements.

54100.10 Screening and Managing Appeals

The appeals coordinator or a delegated staff member under the direct oversight of the appeals coordinator shall be responsible for ensuring that each appeal has been screened and categorized in compliance with this article and shall coordinate the processing and logging of appeals. These be exercised in any manner that would place unreasonable restraints on the inmate's or parolee's right to appeal.

- When it is determined that an appeal will not be accepted an Inmate/Parolee Screening Form, CDC Form 695, preprinted or automated version, shall be completed, attached to the CDCR Form 602 and returned to the inmate or parolee.
- Appeals received describing staff behavior or activity in violation of law, regulation, policy, or procedure or appearing contrary to an ethical or professional standard that could be considered misconduct within the 15 CCR §3084(g)/DOM §54100.25 definition, whether

specifically alleged or not, shall be processed pursuant to the Staff Complaint provisions of this article to determine appropriate disposition.

- The appeals coordinator shall use the automated Inmate Appeals Tracking System (IATS) or equivalent system approved by the third level Appeals Chief which designates a log number for each appeal accepted.
- The IATS shall contain the assigned appeal log number, name and number of the inmate/parolee appellant(s), date received, level of review, name of person designated reviewer, due date, date of written notification to inmate/parolee on late response, date completed at each level of review, and decision reached.
- Accepted appeals shall be assigned for response within five working days of receipt from the inmate or parolee.
- The receipt date shall be stamped each time the appeal is received by the appeals coordinator and recorded in IATS (or equivalent).
- The IATS will be updated on an ongoing basis so as to establish a complete and official departmental record.
- Rejected/cancelled appeals shall be tabulated for reporting purposes.

54100.11 Reasons for Rejection, Cancellation, and Withdrawal of Appeals

Appeals may be rejected, cancelled or withdrawn:

- A **rejected** appeal is one that the appeals coordinator or third level Appeals Chief has returned to the appellant with instructions to correct a deficiency. Clear and sufficient instructions regarding further actions the appellant must take to qualify the appeal for processing shall be provided.
- A **cancelled** appeal is one that the appeals coordinator or third level Appeals Chief has returned to the appellant without response to the specific appeal issue and is considered closed with the appellant having not exhausted administrative remedies.
- An inmate or parolee may **withdraw** an appeal by requesting to have the processing stopped at any point up to receiving a signed response. It shall be at the discretion of the appeals coordinator or third level Appeals Chief whether an appellant's request to withdraw an appeal shall be accepted.

Erroneous acceptance of an appeal at a lower level does not preclude the next level (inclusive of the third level of review) from taking appropriate action, including rejection or cancellation of the appeal.

Under exceptional circumstances any appeal may be accepted if the appeals coordinator or third level Appeals Chief concludes that the appeal should be subject to further review. Such a conclusion shall be reached on the basis of compelling evidence or receipt of new information such as documentation from health care staff that the inmate or parolee was medically or mentally incapacitated and unable to file. Likewise, failure to conform to or to comply with any submission requirement (such as mandatory use of ink) shall be excused if the appellant is unable to comply due to reasons beyond their control at the time the appeal is written.

Rejection

The appeals coordinator may reject an appeal for any of the following reasons, which include but are not limited to:

- The appeal concerns an anticipated action or decision. This includes the premature filing of an appeal without first bringing an issue to the attention of staff so that an action can be taken or a decision rendered.
- The appellant has failed to demonstrate a material adverse effect on his or her welfare (see 15 CCR §3084(c)/DOM §54100.4).
- The allowable number of appeals filed in a 14 calendar day period has been exceeded contrary to 15 CCR §3084.1(f)/DOM §54100.9.
- The appeal makes a general allegation, but fails to state the facts or identify an act or decision consistent with the allegation. "General" allegation means an allegation that lacks the specificity or factual evidence necessary to support the statement in question.
- The appeal contains threatening, obscene, demeaning, or abusive language and/or organic contamination is included in or makes up any part of the appeal package. Appeals submitted with hazardous or toxic material that present a threat to the safety and security of staff, inmates, or the institution may subject the appellant to disciplinary action and/or criminal charges commensurate with the specific act.
- The inmate or parolee has not submitted his or her appeal on the departmentally approved forms.

- Contrary to printed form instructions, the inmate or parolee has submitted more than one CDCR Form 602 or CDCR Form 602-A. The appeals coordinator has the discretion to authorize one or more additional pages in an acceptable format upon compelling evidence that the appellant cannot coherently describe the issue or the relevant facts in the allotted space.
- Requirements respecting original copy, font size, allotted space, numbers of pages, dividers and tabs etc., set forth in the “appeal preparation” section of this article have not been met or the appeal documentation is defaced. For example, the inmate or parolee has not submitted his/her appeal printed legibly in ink or typed on the lines provided on the appeal forms no smaller than a 12-point font or failed to submit or has defaced original copy with drawings or obscenities. Attaching dividers or tabs to the appeal forms and/or supporting documents is also unacceptable because it impedes appeal processing.
- The appeal is incomplete with regard to required signatures, dates or other identifying details or use of required attachments. For example, the inmate or parolee has not provided a signature, date, or other identifying information in the designated areas provided on the appeal form or, as 15 CCR §3084.3/DOM §54100.8 requires, the supporting documents necessary for the clarification and/or resolution of the appeal issue are missing.
- The appeal is incomprehensible and/or the issues are obscured by pointless verbiage or voluminous unrelated documentation such that the reviewer cannot be reasonably expected to identify the issue under appeal.
 - Exercise caution not to screen out appeals submitted by inmates or parolees who have difficulty in expressing themselves in writing or whose primary language is not English.
 - When it is determined the inmate or parolee is having such difficulty, a personal interview with the appellant shall be directed by the coordinator to assist them in filing the appeal.
 - Refer to DOM §54100.8 as necessary for clarification of the document attachment requirements.
- The problem, issue, or event constituting the basis for grievance cannot be understood as submitted and the reviewer cannot reasonably identify the matter in question and/or the basis for appeal.
- The appeal involves multiple issues that do not derive from a single event, or are not directly related and which cannot be reasonably addressed in a single response due to this fact.
- Unrelated issues have been combined on a single appeal form for the purpose of circumventing filing process requirements.
- The inmate or parolee has submitted the appeal for processing at an inappropriate level; bypassing required lower level(s) of review, e.g., submitting an appeal at the third level prior to lower level review.
- The appeal issue or complaint emphasis has been changed at some point in the process to the extent that the issue is entirely new, and the required lower levels of review and assessment have thereby been circumvented. This includes instances where the issue and/or requested action has been changed from that described originally in Parts A and B of the CDCR Form 602.

When rejecting an appeal, a CDC Form 695, Inmate/Parolee Appeals Screening Form, shall be completed and sent to the appellant noting the reason for the rejection.

- The CDC Form 695 shall also provide clear instruction regarding further action(s) the appellant must take to qualify the appeal for acceptance.
- If the appellant is identified as requiring assistance in filing the appeal that assistance shall be provided before processing the CDC Form 695.

An appeal that is rejected may later be accepted if the reason(s) noted for rejection are corrected and the appeal is re-submitted within 30 calendar days from the date of rejection. As the appellant has the ability to resubmit a rejected appeal, appeals of a rejected appeal will not be accepted.

Cancellation

The appeals coordinator may cancel an appeal for any of the following reasons:

- The action or decision being appealed is not within the jurisdiction of the Department.
- The appeal duplicates an inmate or parolee’s previous appeal upon which a decision has been rendered or is pending.

- The inmate or parolee continues to submit a rejected appeal while disregarding appeal staff’s previous instructions to correct the appeal, including failure to submit necessary supporting documents, unless the inmate or parolee provides in Part B of the CDCR Form 602 a reasonable explanation of why the correction was not made or documents are not available.
- Time limits for submitting or correcting and returning a rejected appeal are exceeded even though the appellant had the opportunity to file within these prescribed time constraints.
 - In determining whether the time limit has been exceeded, the appeals coordinator shall consider whether the issue being appealed occurred on a specific date or is ongoing.
 - If the issue is ongoing—such as, but not limited to continuing lockdowns, retention in segregated housing, or an ongoing program closure—the inmate/parolee may appeal any time during the duration of the event. The inmate/parolee is precluded from filing another appeal on the same issue unless a change in circumstances creates a new issue.
- The appeal is filed on behalf of another inmate or parolee.
- The issue is subject to a review independent of the appeal process such as a Departmental Review Board (DRB) decision which is not subject to appeal and concludes the inmate or parolee’s administrative remedies on classification issues pursuant to the provisions of 15 CCR §3376.1/DOM §62010.10.
- The appellant is deceased before the timeframes for responding to an appeal have expired and the appeal is not a group appeal.
- The appellant refuses to be interviewed or cooperate with the reviewer.
 - The appellant’s refusal to be interviewed or to cooperate with the reviewer shall be clearly articulated in the cancellation notice and the appellant given an opportunity to explain the reason for the failure or refusal.
 - If the appellant provides sufficient evidence to establish that the interviewer has a bias regarding the issue under appeal, the appeals coordinator shall assign another interviewer.
- The presented appeal is on behalf of a private citizen.
- Failure to correct and return a rejected appeal within 30 calendar days of rejection.
- The issue appealed has been fully resolved at a previous level or as determined by the appeal coordinator or the third level Appeals Chief. In such cases, the appeals coordinator’s or third level Appeals Chief’s rationale for concluding or determining that the appeals issue has been fully resolved shall be provided.
- All members of a group appeal have been released, transferred or are no longer subject to the conditions giving rise to the appeal.

Once cancelled, the appeal may not be resubmitted unless there is a determination by the appeals coordinator or third level Appeals Chief (when cancellation was made at the third level) that the cancellation was made in error or new information is received which causes the appeals coordinator or Chief to conclude that the appeal should be subject to further review.

- The appeals coordinator or the Chief has the discretion to waive a cancellation requirement if, in their opinion, such application would deny review of an issue that could result in extraordinary and serious irreparable harm or loss.
- When an appeal is cancelled, the inmate or parolee may file a separate appeal if they believe the screening policy or the application of the screening policy by the appeals coordinator was inappropriate. The new appeal shall include the original CDCR Form 602 as an attachment to facilitate the review of the original cancellation decision.
- The new appeal shall address only the cancellation decision, not the issue(s) raised in the original appeal.

Upon determination that the original appeal was inappropriately cancelled, the appellant will be allowed to resubmit the original appeal for processing in accordance with the filing requirements of this article.

Withdrawal

An inmate or parolee may withdraw an appeal by completing the appropriate section of the CDCR Form 602 stating his or her reasons for the withdrawal accompanied by a dated signature. If a withdrawal is conditioned upon an express promise of relief noted in writing at the time of withdrawal and the

promised relief is not provided, the matter may be re-submitted within 30 calendar days of the failure to grant the relief promised.

- The withdrawal of an appeal does not preclude further administrative action by the Department regarding the issue under appeal.
- A withdrawn staff complaint shall be returned to the hiring authority for determination of further administrative action.
- Group appeals shall not be withdrawn at the request of the primary appellant unless all of the signatories agree to withdraw the appeal.

54100.12 Referral for Review

After logging an appeal, the appeals coordinator shall assign the appeal for first or second level review as appropriate. Time limits for reviewing appeals shall commence the day following the date of receipt of the appeal form by the appeals office. An appeal response shall not be assigned to any staff member who participated in the action, decision, determination, or review being appealed. Another appropriate person at the same or higher level shall be assigned this responsibility instead.

This does not preclude the following:

- The use of staff to research the appeal issue(s) who are at a lower level than the staff whose actions or decisions are being appealed.
- The involvement of staff who may have participated in the event or decision being appealed, but whose involvement with the appeal response is necessary to determine the facts or provide an administrative remedy, as long as the staff person is not the reviewing authority for the appeal and/or their involvement in the process would not reasonably be expected to compromise the integrity or outcome of the process.

Staff at an Associate Warden or Parole Administrator level shall review and sign off on first level decisions, and the hiring authority (Warden, Regional Parole Administrator, etc.) or designee shall review and sign off second level decisions.

54100.13 Levels of Review

Because the appeal process provides for a systematic review of inmate and parolee grievances and is intended to afford a remedy at each level of review, administrative remedies shall not be considered exhausted until each required level of review has been completed. Cancellation or rejection decisions also do not exhaust the administrative remedies available. As used in this article, "reviewer" means the individual with signature authority for the approval or disapproval of an appeal response completed or drafted at any level.

The appeal process shall consist of three levels of review; the first and second levels are normally reviewed at the institution or parole region, and the third level review occurs at the Department Secretary's level. Third level review shall consist of an evaluation of decisions relative to an appeal including all supporting documentation and modification orders (see DOM §54100.17) issued at the first, second or third level. For each subsequent level of review, the inmate or parolee shall submit the original CDCR Form 602 (and, as necessary, the Inmate/Parolee Appeal Form Attachment, CDCR Form 602-A), with supporting material and explanation stating, in detail, the reason(s) for his or her dissatisfaction with or disagreement with the reviewer's response.

54100.13.1 First Level

All appeals shall be initially filed and screened at the first level unless the first level is otherwise waived. In the institution, the appeals coordinator shall determine the nature of the problem and assign the appeal to the appropriate division head. In the parole division, the regional appeals coordinator shall determine the nature of the problem and assign the appeal to the appropriate administrator. The appeal issue shall be reviewed, the appellant interviewed (see DOM §54100.14), and a response prepared for the division head's review and signed approval. If the appeal is denied at first level, it then may be appealed at the second level.

First Level Bypass

The appeals coordinator may bypass the first level for appeals of:

- A policy, procedure, or practice implemented by the institution head.
- A policy, procedure, practice or rule implemented by the Department.
- An issue that cannot be resolved at the division head's level.
- Serious disciplinary infractions.

54100.13.2 Second Level

Second level is for review of appeals denied at the first level or for which first level review has been bypassed. The second level shall be conducted by the hiring authority, not to be delegated below the level of Chief Deputy Warden, Deputy Regional Parole Administrator, or the equivalent. If the appeal concerns a department-wide policy, rule, practice or procedure, and

the first level review therefore bypassed, the second level shall include an interview with the inmate or parolee.

The second level must be completed except for Psychiatric Transfer appeals (see DOM §54100.22), or when appeals are filed directly with the Third Level (such as a complaint about Third Level appeals staff or appeals of a cancellation decision made by the Third Level).

54100.13.3 Third Level

The third level constitutes the Department Secretary's decision on an appeal, and shall be conducted by a designated representative of the Secretary under the supervision of the third level Appeals Chief. The third level of review exhausts administrative remedies; however, this does not preclude amending a finding previously made at the third level. Administrative remedies shall not be considered exhausted relative to any new issue, information or person later named by the appellant that was not included in the originally submitted CDCR Form 602 and addressed through all required levels of administrative review (up to and including the third level, unless the third level of review is waived by regulation).

54100.14 Interviews

In order to provide the appellant the opportunity to clarify his or her issue(s) and the reviewer to ask questions, at least one face-to-face interview with the inmate or parolee shall be conducted at the first level of review, unless:

- The inmate or parolee waives the interview by initialing the appropriate box on the CDCR Form 602. An appellant's waiver of the interview shall not preclude staff from conducting an interview in the event of a staff determination that an interview is necessary.
- The first level review is bypassed, in which case a personal interview will be conducted at the second level unless waived by the inmate on the CDCR Form 602.
- The appeal is a request for a Computation Review Hearing in which case the initial interview shall occur at the second level of review.
- The reviewer has decided to grant the appeal in its entirety.
- The appellant is not present at the institution or parole region where the appeal was filed.
 - In such case, a telephone interview with the appellant shall meet the requirement of a personal interview.
 - The response must note that the interview was conducted by telephone, explain the extraordinary circumstances that required it, and state why a face-to-face interview was not possible under the circumstances described.
 - If the appellant is not available for a telephone interview, the reviewer may request that an employee in that jurisdiction where the appellant is located conduct the interview on behalf of the appeal coordinator and provide a report.
 - If the appeal concerns a disciplinary action and the appellant has transferred, the telephone interview may be waived if the appeals coordinator determines an interview would not provide additional facts.

Regardless of any inmate waiver, if additional clarification is needed, interviews may be conducted at the first or any subsequent level of review when the appeals examiner determines that the issue under appeal requires further clarification.

- In addition, one or more of the participating inmates/parolees shall be interviewed as necessary to clarify issues when group or multiple appeals are processed.
- Interviews may be conducted at the third level as necessary to obtain information not elicited at lower levels or to clarify the appeal issue(s), when the first and second level has been bypassed.

54100.15 Written Response

At each level not bypassed, the original appeal shall be returned to the appellant with a written response providing the reason(s) for the decision. Responses shall be provided in letter or memo format and attached to the CDCR Form 602 submitted by the appellant. Each written response shall contain the appellant's name, departmental identification number, the appeal log number, level of review, and the name of the reviewer and interviewer. The written response shall accurately describe the matter under appeal and fully address the relief requested. Responses shall be objective and professional, and shall provide a reasonable finding in light of the facts and arguments presented. If the decision is a partial grant of the appellant's requested action(s), the response shall clearly state which action(s) or relief has been granted, granted in part, or denied, and shall also state the action taken.

54100.15.1 Appeal Response to Offenders Released on Non-Revocable Parole (NRP)

An appeal response intended for an offender released on NRP, including follow-up and final responses, shall be sent to the last known address of record on file provided upon release for the purpose of formal post incarceration contact. If contact is unsuccessful or if the parolee does not provide an address (as in the case of self parole), the appeal will be answered without an interview as follows:

- If the issues cannot be addressed without an interview to clarify the issues(s) and/or the action(s) requested, the appeal shall be denied on the basis that the appellant is unavailable for interview. The appeal will be processed and the final appeal response shall note the effort made by the appeals coordinator to contact the appellant. The final response will be submitted to the appellant's central file.
- If the issues warrant a grant or a partial grant absent an interview, the appeal will be answered without an interview, noting the issues and requested action(s) that are granted or partially granted. A modification order will be issued to complete the actions granted. The final appeal response will be submitted to the appellant's central file.

54100.16 Fixed Time Limits

In order to afford a timely review, the appeal shall be filed within 30 calendar days of the occurrence of the event or decision being appealed or of the inmate or parolee's knowledge of the action or decision being appealed, or of receiving an unsatisfactory response to an appeal filed at the previous level, unless otherwise specified in this article. The acceptance, under exceptional circumstances, of an appeal beyond the 30 day policy is at the discretion of the appeals coordinator or third level Appeals Chief. The basis of this discretion shall be compelling evidence or receipt of new information, such as documentation from health care staff that the inmate or parolee was medically incapacitated and unable to file, supporting the conclusion that the appeal should be subject to further review.

All appeals shall be responded to and returned within the following time limits:

- First level responses shall be returned within 30 working days.
- Second level responses shall be returned within 30 working days.
- Third level responses shall be returned within 60 working days.

With regard to time frames for response processing, "day one" commences the next working day following receipt of the appeals form by the appeals office. Exceptions to the above time limits may be authorized by the appeals coordinator in the event of:

- Unavailability of the inmate/parolee, or involved witnesses.
- Complexity of the decision, action, or policy requiring additional research by responding staff.
- Necessary involvement of other agencies or jurisdictions.
- Reopening of a lower level decision at the direction of the third level.
- The normal time requirements for review and action on appeals has been suspended pursuant to a state of emergency as defined by 15 CCR §3383(c).

Except for the third level, if an exceptional delay prevents completion of the review within the specified time limits, the inmate or parolee shall be informed, in writing, of the reasons for the delay and estimated completion date.

54100.17 Modification Orders

A modification order is a formal instruction by the institution, parole region, or third level Appeals Chief directing a previous decision to be modified or reconsidered. Modification orders issued by the institution or the parole region at the first and second level shall be completed within 60 calendar days. Reasonable documented proof of completion of the modification order shall accompany the completed order, or a statement shall be added by the responder clarifying the action taken and why documentation is not available.

- If, due to extraordinary circumstances, the modification order cannot be completed within these time limits, staff responsible for compliance shall notify the appeals coordinator of the reason for delay and provide a projected date of completion. The appeals coordinator shall use this information to assign a new due date, and then enter this information in the tracking system.
- Staff responsible for complying with the modification order shall advise the appeals coordinator every 30 calendar days of the reason for delay and provide an updated projected completion date until the modification order is completed.

- All time constraints for an appellant to submit an appeal to the next level are considered postponed up to 120 days until completion of a previous level modification order.
- However, if the modification order is not completed after 120 calendar days of the initial issuance date, the appellant may submit the appeal to the next level for administrative review within 30 calendar days.

Modification orders issued at the third level shall be subject to the same time constraints as local modification orders, i.e. 60 calendar days.

- If it is not possible to comply within this timeframe, the institution or parole region shall notify the third level Appeals Chief in writing of the reason for the delay and provide a projected completion date.
- Updates on any delay shall be provided to the third level Appeals Chief every 30 calendar days.

Appellants shall be advised by the appeals coordinator of the reason for modification order delay and the anticipated date of completion.

- This process shall occur every 30 calendar days until the modification order is completed.
- Any third level appeal submission must occur within 30 calendar days of receiving a modified second level appeal response.

Upon completion of a third level modification order, the institution/parolee region shall provide a proof of compliance memorandum to the third level Appeals Chief containing evidence of compliance with the name, signature and title of the person fulfilling the modification order. As necessary, a statement shall be added by the responder, clarifying the action taken.

If the appellant transfers prior to the completion of the modification order, the originally assigned institution or parole region shall retain responsibility for completion of the modification order.

In cases where a modification order is issued on an emergency appeal, the order shall specify the timeframe for the completion of the action granted. The appeals coordinator (if granted at the second level), and the third level Appeals Chief or designee (if granted at the third level), shall notify the hiring authority expeditiously of the emergency timeframe for completion of the granted action and confirm that notification was received.

54100.18 Appeal Processing Responsibilities Involving Two Departmental Institutions/Regions

When an inmate/parolee files an appeal at one institution or parole region, and is then transferred prior to the appeal response being completed, the sending institution/parole region shall continue to complete the response.

The receiving institution/parole region shall provide assistance as needed by the sending institution/parole region, including but not limited to coordinating and/or interviewing the appellant, to facilitate the timely completion of the appeal response.

- When an inmate/parolee has been transferred and files an appeal at the receiving institution or parole region of an action taken by the sending institution/parole region, the receiving institution or parole region shall date stamp the appeal and forward it to the sending institution/parole region for processing.
- When an inmate has been transferred and files an appeal concerning property loss or damage, the provisions of DOM §54100.23.2 shall apply.
- When an inmate has been transferred and is appealing a disciplinary action, the first level and, if applicable second level review, shall be conducted by the staff of the institution where the infraction took place. Interview(s) may be waived upon appeals coordinator determination that obtaining additional information will not affect the outcome of the appeal.

Interviews may be conducted by telephone pursuant to procedures set forth in DOM §54100.14.

Appeals on actions taken at contract facilities shall be handled by the institution or parole region responsible for the management of the facility, regardless of an emergency placement in an institution for security purposes.

Time limits on appeals forwarded to sending institutions/parole regions for response shall not commence until received by the responding institution/parole region.

54100.19 Emergency Appeals

An emergency appeal is defined as an urgent matter wherein disposition according to the regular time limits would subject the inmate or parolee to a substantial risk of personal injury, or cause other serious and irreparable harm to the inmate or parolee. Emergency appeals should not, however, be used by inmates or parolees as a substitute for verbally or otherwise informing staff of an emergency situation requiring immediate response.

Examples include but are not limited to:

- Threat of death or injury due to enemies or other placement concerns.
- Serious or imminent threat to health or safety.

The inmate/parolee shall clearly substantiate in writing the need for emergency handling of the appeal and send it directly to the appeals coordinator, who shall determine whether an emergency exists and so inform the inmate/parolee. The appellant shall also be notified in the event that the appeal does not satisfy the definition of an emergency, meets regular processing criteria, or is rejected for the specific reason(s) cited.

- If emergency processing is warranted, the first level shall be bypassed and the second level review shall be completed within five working days.
- If dissatisfied with the second level response, the appellant may resubmit to the appeals coordinator who shall electronically transmit it to, and confirm receipt by, the third level Appeals Chief for third level review.
- The third level review shall also be completed within five working days of receipt.

54100.20 Appeal of Disciplinary Actions

A disciplinary action is not considered complete until all processing requirements including the hearing, postponement and any re-hearing are completed as evidenced by the signature of the Chief Disciplinary Officer (CDO).

- A second level review shall constitute the Department's final action of appeals of disciplinary actions of a CDC Form 115, Rules Violation Report (RVR) classified as "administrative" (15 CCR §3314) and of Custodial Counseling Chronos (CDC Form 128-A) documenting minor infractions, and shall exhaust administrative remedies on these matters.
- The date of the final RVR copy issued to the appellant shall serve to establish time limits for filing an appeal of the RVR, not the date of the disciplinary hearing.
- Inmates who wish to exhaust their administrative remedies for serious disciplinary issues must appeal through the third level of review.

The appeal review, at the first and second levels, shall not be delegated to a rank lower than the person who audited the disciplinary under appeal.

Regardless of what issue an appellant may raise concerning his or her RVR, the reviewer shall determine whether all due process and procedural requirements were met. Each disciplinary appeal submitted by an inmate or parolee shall be reviewed on the basis of conformance with the provisions of the Penal Code, the California Code of Regulations Title 15, Division 3, Rules and Regulations of Adult Institutions, Programs and Parole, and Chapter 5 of the Operations Manual — Custody and Security Operations.

When the reviewer of a disciplinary appeal determines that there was an error in either the due process or procedural requirements, or determines that the disciplinary finding was not supported by a preponderance of evidence presented at the hearing, one of the following remedies shall be considered:

- The original disposition shall be vacated and the charges dismissed.
- The RVR shall be modified.
- Vacating the original disposition accompanied by a reissuance and rehearing of the charges.

When a disciplinary disposition is vacated or modified by appeal, the second level responder shall either direct that the RVR be removed from the inmate's C-File pursuant to 15 CCR §3326, or order that the changes as mandated by the appeal decision be made with appropriate annotations entered on file documents.

54100.20.1 Dismissal of the Charges

The original disciplinary disposition shall be vacated and the charges dismissed if the reviewer determines that any of the following circumstances apply or are evident:

- The finding was based on information that was later determined to be false or unsubstantiated and the remaining evidence is not sufficient to support the charge.
- There has been a significant lapse of time which makes it improbable, if not impossible, for the accused to present an adequate defense.
- Witnesses of significant import, either staff or inmates, are no longer available and their absence prevents the accused from presenting an adequate defense.

54100.20.2 Modification of the RVR or of the Disposition

The RVR normally shall be modified when all due process was afforded the appellant and errors identified during the review process are clearly minor or

procedurally insignificant. Reasons for modifying the RVR include, but are not limited to:

- Clerical errors and typographical mistakes that have no bearing on the charge and do not inhibit the ability of the accused to understand the charge and present an effective defense
- Adding a notation to the RVR disposition to satisfy fundamental procedural requirements, including when the hearing failed to document the disposition of any contraband item or substance related to the RVR.

The disciplinary disposition shall normally be modified when all due process was afforded the appellant and the evidence presented supports an equal classification but different offense, a lesser included offense, the imposition of a mandated sanction or the removal of a disposition or sanction that was improperly imposed. When the classification of the RVR and/or the disposition is not consistent with the evidence presented for which the appellant was found guilty, the following remedies shall be considered:

- If the RVR is classified higher than required for the specific act, the division shall be corrected and the assessed credit forfeiture shall be modified to within the range allowed for the corrected division.
- If the RVR is classified correctly, but the assessed credit forfeiture was greater than that allowed for that division, the assessed credit forfeiture shall be reduced to within the range allowed for that division.
- If the RVR is correctly classified, but the assessed credit forfeiture was less than that allowed for that division, the assessed credit forfeiture shall be reduced to zero.
- If the RVR is classified lower than that required for the charged offense, the division shall be corrected and the assessed credit forfeiture shall be reduced to zero.
- If the hearing official imposed a disposition or sanction (other than credit loss) that was not authorized by regulation, the unauthorized disposition and/or sanction shall be rescinded.
- If the hearing official imposed the incorrect level of a disposition or sanction (other than credit loss) than that mandated by regulation, the disposition and/or sanction shall be corrected. Such impositions shall be calculated from the date of the RVR hearing or when they should have been imposed pursuant to law or regulation.

54100.20.3 Rehearing of the Charges

The original disposition shall be vacated and a new hearing ordered if the reviewer determines that any of the following circumstances apply or are evident:

- The accused was not given copies of required documents within specified time limits before the hearing and did not waive the time limits.
- The appellant requested but was not allowed to review a videotape or photographic evidence at least 24 hours prior to the hearing (or within 24 hours of the hearing if he or she waived the 24 hour period).
- The charge was based upon confidential information and the accused was not given a copy of the CDC Form 1030, Confidential Information Disclosure
- Confidential information was used and the disciplinary finding did not address the reliability of the source and the validity of the information.
- The disciplinary hearing officer failed to articulate the reasons for finding the accused guilty, the evidence relied upon to make the disposition, or failed to note the reasons why the reporting employee or witness was not present or the reason(s) why time constraints were not met.
- The accused was inappropriately denied witnesses or denied witness statements or testimony which would have contributed to the accused's defense.
- The senior hearing officer and the accused stipulated to what the witness testimony would be and waived the requested witness' presence at the the hearing, but the stipulation was not documented in the hearing portion of the RVR.
- Failure to obtain and document the appellant's waiver of the reporting employee's presence at the disciplinary hearing, when the appellant previously requested the reporting employee's attendance.
- The reasons why the hearing was postponed beyond time constraints or the reasons for denying the appellant's written request for postponement have not been provided, or if provided, are unsound and

unsupportable.

- Failure to document the justification, consistent with regulatory expectations, of why the hearing was suspended.
- The accused was not allowed to speak or present documentation in their own defense or the hearing officer failed to articulate the defendant's statement made at the time of the hearing in the body of the RVR.
- The accused was not assigned a staff assistant or language interpreter if required.
- An investigative employee (IE) was not assigned if required or the IE did not properly carry out their duties, and it appears that such an investigation was needed.
- A staff assistant did not properly perform his or her required duties or did not meet with the appellant at least 24 hours prior to the RVR hearing.
- The hearing official engaged in activities that would lead to a predetermined belief on their part with respect to the appellant's guilt or innocence relative to the matter in question.

54100.20.3.1 Holding the Rehearing

A decision to order the rehearing of disciplinary charge functions to void the disposition of the RVR being appealed. When a disciplinary charge is ordered reheard, a new RVR shall be written and processed.

- The disciplinary time constraints for holding a rehearing shall begin on the date the CDO orders a rehearing and shall conform to those for original processing, except when an inmate/parolee is being returned to a facility for a disciplinary rehearing; the time constraints shall begin upon the inmate/parolee's return to that facility.
- The circumstances section of the RVR shall indicate that the RVR is a re-issue resulting from a CDO's order to correct a noted deficiency. The statement shall include the date of the order.
- When a disciplinary action is ordered reissued and reheard, the original disciplinary disposition shall be vacated and no longer have effect. Any appeal of the original disciplinary disposition shall be cancelled unless there are other issues that are not resolved by the dismissal and rehearing of the original charge. If the appeal contains other issues not directly arising from the disciplinary action, those issues shall be addressed while noting that the disciplinary issues will not be addressed.

54100.20.3.2 Time Limits

Time limits for holding a rehearing shall conform to those specified in 15 CCR §3320 for processing the original charge.

54100.20.3.3 Notifications

If the inmate remains at the institution where the behavior causing the original charge occurred, the appeals coordinator shall ensure that responsible staff are notified of the rehearing order and reasons for the rehearing. The notification shall be in writing and shall be conveyed to staff responsible for conducting the rehearing.

54100.20.3.4 Classification and Parole Representative (C&PR) Collaboration

If the inmate has been transferred, and the decision is to have him or her returned for the hearing, the appeals coordinator shall be responsible for notifying the institutional C&PR of said decision.

- The institutional C&PR shall arrange with the other location, where the inmate resides, for the inmate's case to be reviewed by the CSR for endorsement and prompt return to afford staff the opportunity of a timely hearing of the RVR.
- Time constraints for conducting a rehearing under these circumstances shall not begin until the inmate has been returned to the institution where the hearing will be conducted.

If the inmate has been transferred and the decision is made not to have him or her returned for the hearing, the C&PR working with the facility that issued the disciplinary charges shall arrange for all necessary documents to be sent to the receiving institution to facilitate the disciplinary hearing within time constraints and one of the following shall occur:

- Staff at the receiving institution shall hear the disciplinary report and afford the appellant access to witnesses via a speaker phone or its equivalent or
- Staff from the institution that issued the disciplinary report shall travel to the receiving institution and conduct the hearing providing for witnesses via speaker phone or its equivalent.

54100.21 Transfer Appeals

A decision for transfer to another institution or facility may be appealed by the affected inmate after endorsement by the Classification Staff Representative (CSR). The filing of an appeal by the inmate shall not routinely stay or delay the pending transfer except in extraordinary circumstances and at the discretion of the Warden or designee.

- For appeals of regular transfer endorsements:
 - The first level review is waived.
 - If the appeal is granted at the second level, the appellant's case shall be presented to a second CSR for reconsideration.
 - If the second CSR disagrees with the institution's decision, the institution head may submit the case to the Department Review Board (DRB) for final decision.
 - If the appeal is denied at the second level, or the institution head does not refer the case to the DRB, the inmate/parolee may appeal to the third level.
- For appeals of reception center transfers:
 - First level review shall be conducted by reception center staff at the level of correctional administrator.
 - If the appeal is granted, the inmate/parolee may be retained at the reception center until the case is presented to a second CSR only if the proposed transfer poses a threat to the health or safety of the appellant.
 - If the second CSR disagrees with the first level appeal decision, the inmate/parolee may resubmit the appeal for second level review.
 - Second level review shall be conducted by the institution head, who may retain the inmate/parolee at the reception center as a second level review action and refer the appeal to the DRB for resolution. The DRB's decision shall constitute final review.

54100.22 Psychiatric Transfer Appeals

An inmate who is involuntary transferred to the California Medical Facility (CMF)—Department of Mental Health, Atascadero State Hospital, Patton State Hospital, Coalinga State Hospital or Salinas Valley Psychiatric Program for psychiatric reasons may appeal that action, utilizing a CDCR Form 602 directly to the third level within 30 days of the hearing decision on the need for involuntary transfer. A copy of the hearing decision shall be attached to the appeal form, but the absence of such documentation shall not be cause for rejection of the appeal.

54100.23 Lost or Damaged Property

When an inmate or parolee believes that the State is responsible for the loss of or damage to his or her personal property, he or she shall first attempt to resolve the matter with either the departmental employee on duty at the time and place that the damage or loss was first realized or identified or alternatively, the employee best able to address the alleged loss or damage.

- To facilitate resolution, copies of any relevant documentation concerning the lost or damaged property should be presented.
- In the event of an apparent loss or damage during transfer, the complainant shall first contact staff at the receiving institution to establish whether the property did or did not arrive, and in what condition.
- If this attempt at resolution of the problem is unsuccessful, the inmate/parolee may file an appeal on CDCR Form 602.

54100.23.1 Appeals of Lost or Damaged Property

All property loss or damage arising from the same departmental event or action shall be included by the appellant in one appeal form. Such appeals are subject to rejection if relevant documentation is not attached, including a signed copy of the CDC Form 1083, Inmate Property Inventory.

Staff assigned to respond to appeals alleging property loss or damage shall conduct a thorough examination of all documents submitted and any other pertinent information that will assist in resolving the property claim including, but not limited to:

- A thorough search for the lost property.
- Inspection and assessment of the damaged property.
- Interviews, especially when documentation identified staff who handled the property.
- Review of departmental records, including but not limited to, property receipts, property transfer receipts, property control cards, and property inventory sheets.

Any decision denying a property claim shall inform the inmate/parolee of the right to file a claim directly with the Victim Compensation and Government Claims Board (VCGCB) (formerly Board of Control) and shall provide instructions for such filing. An inmate/parolee who wishes to file a claim with the VCGCB shall adhere to the timeframes governing these claims which may be more restrictive than the CDCR appeal process and may require the appellant to file a claim prior to receiving a final decision on his or her CDCR appeal.

First and second level appeals concerning lost or damaged property shall be processed at the institution/parole region where the loss or damage occurred. All provisions of this article concerning property loss or damage apply to inmates housed in a contract facility, including inmates transferred to or from a contract facility.

54100.23.2 Inmate Appeals of Lost or Damage Property During Transfer

Appeals alleging property loss or damage following a transfer, regardless of where the loss or damage occurred, shall be submitted to the appeals coordinator at the receiving institution. The receiving institution appeals coordinator shall:

- Date stamp the appeal.
- Conduct an initial review of the appeal for conformance with appeal processing requirements, including time constraints, missing signatures, and supporting documents.
- Review the appeal and determine which institution shall respond to the appeal in accordance with the following:
 - If able to determine that the property loss or damage occurred some time after the property arrived at the receiving institution, or if records indicate that the property was issued to the appellant at the receiving institution, the receiving institution appeals coordinator shall process the appeal.
 - If unable to determine where the loss or damage occurred, or information suggests that the loss or damage occurred prior to arrival at the receiving institution, the appeal shall be forwarded to the sending institution for review. Upon receipt, the sending institution appeals coordinator shall date stamp and process the appeal.

The transportation unit or any facility that housed the appellant or the property in question in transit during the transfer shall assist and provide any information necessary for a thorough review of the property claim. The first level response shall instruct the appellant, if dissatisfied, to resubmit the appeal to the receiving institution for a second level review. Exceptions, where the sending institution would be expected to complete the second level response, include but are not limited to:

- The appellant was not in possession of the property at the time of transfer.
- The property was not sent with the appellant by the sending institution.
- The property loss or damage occurred at the sending institution.

54100.23.3 Parolee Appeals of Lost or Damaged Property during Release To Parole

When a paroled inmate alleges property loss or damage, the parolee shall submit the appeal to the institution where he or she last relinquished the property, unless the parolee has documentation to indicate the property was in the possession of another CDCR entity. Parolees who relinquished their property to a federal, county, or other State agency official should seek resolution directly with that entity. When it is established that the Department is responsible for a parolee's property loss or damage during release to parole, the sending institution shall settle the claim, regardless of where the loss or damage occurred.

54100.23.4 Granted Property Appeals

Unless otherwise specified in this Article the facility where the property loss or damage took place shall settle the claim. If the loss or damage took place during transit, or staff are unable to determine where the loss or damage occurred, the sending institution shall settle the claim. When the property loss or damage occurred during transit between the sending and receiving institutions, a copy of all granted property claims shall be forwarded to the Director, Division of Adult Institutions, for corrective action if warranted.

If a property appeal is granted, an attempt shall first be made by staff to use local resources to substitute for or replace lost or damaged property at no cost to the State, or to repair the item at the institution's expense. An inmate/parolee's refusal to accept repair, replacement, or substitution of like items and value shall be cause to deny the appeal.

- When denying an appeal on the basis of appellant's refusal to accept like item and value substitution, the reviewer must state why they believe the replacement offered is considered a like item of equivalent value.
- Monetary compensation to the inmate/parolee shall be considered only if repair is not possible, and replacement or substitution of like items of equivalent value are not available.
 - Both a first and second level review is required prior to awarding a monetary reimbursement for lost or damaged property. First level responses recommending a monetary reimbursement shall instruct the appellant to resubmit the appeal for a second level review. The second level review may affirm, modify or deny the first level recommendation.
 - Actual monetary reimbursements shall not exceed limits imposed in accordance with the Personal Property provisions of 15 CCR §§ 3190-3195.

Monetary claims for amounts of \$100 or less are filed with and settled by the Department directly. Under Government Code Section 935.6 the VCGCB may authorize the Department to settle and pay claims for higher amounts. In the event such delegation is granted, guidance provided by departmental accounting officials specific to this matter shall be prevailing.

- The distribution of completed second level property appeals for \$100 or less includes:
 - Original to appellant.
 - Copy to institution or parole region appeals coordinator.
 - Copy to institution accounting office (inmate cases).
 - Copy to Central Office accounting office (parolee or reentry cases).
 - Copy to institution or parole region records.
- Before payment of any granted claim, the inmate/parolee shall discharge the State in writing from further liability for the claim pursuant Government Code Section 965. The original of this discharge shall be maintained in the institution/parole region accounting office and the inmate/parolee shall be provided a copy.

54100.23.5 Granted Third Level Appeal

If the Secretary's level action is to grant and/or endorse a monetary claim, a written response shall be prepared, attached to the appeal package, and returned to the appellant.

- Copies of granted appeals for claims of \$100 or less shall be forwarded by the third level Appeals Chief to the hiring authority for payment as described in DOM §54100.23.4.
- Additional copies shall be sent to the appeals coordinator, and to the records office for inclusion in the appellant's file pursuant to DOM §54100.23.4.

Granted second level appeals exceeding \$100 shall require third level review and VCGCB approval prior to payment.

- Copies of granted appeals for claims over \$100 shall be forwarded by the third level Appeals Chief to the VCGCB.
- Additional copies shall be forwarded to the hiring authority for inclusion in the appellant's file, to the appeals coordinator, and to the institution or Central Office accounting office BSS as appropriate pursuant to DOM §54100.23.4.

54100.24 Conditions of Parole Appeals

Inmates or parolees may appeal discretionary imposition by the Department of special and additional special conditions of parole, requesting removal or amendment of any condition unnecessary for public safety, security or rehabilitation purposes. Prior to filing an appeal, a request to remove or amend an imposed condition or conditions may first be made via a written request (CDCR Form 22) directed to the assigned parole agent and submitted in accordance with the provisions of the Request for Interview, Item or Service article (DOM §54090).

- Specific reasons for objection to the condition(s) in question shall be stated and any necessary supporting document or information attached to the request.
- An appeal of parole conditions shall be reviewed and signed at the Second Level of Review.

Review and Time Limits

An appeal regarding a request to remove or amend one or more of the condition(s) of parole shall be filed within 30 calendar days of imposition or within 30 calendar days following receipt of the written confirmation of the

supervisor's decision to uphold the condition(s) as originally imposed (With respect to supporting document requirements, see DOM Section 54100.8).

- The first level review shall be waived and the second level of review shall be completed by the regional parole administrator or designee.
 - Appeals of special conditions of parole shall be addressed by the parole region.
 - If the appeal is sent to the institutional appeals coordinator by mistake, it shall be forwarded to the appropriate parole region and the inmate/parolee notified that the appeal has been forwarded.
- The appellant, if dissatisfied with the second level of review, shall forward the appeal to third level.

54100.24.1 Parole to County of Last Legal Residence

Appeals on release to county of last legal residence shall not be accepted until the CDCR Form 611, Release Program Study/Parole Assessment (RPS) has been returned to the institution by the parole region. Institution caseworkers, upon receipt of an appeal alleging safety concerns in the county of last legal residence, shall review and compare the factual information contained in the inmate's C-File. This review shall include a personal interview with the inmate and all information obtained shall be documented by the caseworker on a CDC Form 128-B. A copy of the CDC Form 128-B shall be attached to the appeal prior to submission to the parole region. The appeal shall be sent to the regional appeals coordinator where the RPS was completed, who shall route the appeal to the appropriate assistant RPA for first level review. The RPA shall conduct the second level review. The inmate/parolee may appeal to the third level Appeals Chief if dissatisfied with the second level response.

54100.24.2 Re-entry Program Placement or Denial

Appeals of placement in specific reentry locations or programs shall be sent directly to the appeals coordinator of the parole region from where the decision occurred. The first level review of the placement decision shall be conducted by the supervisor of the staff member who made the decision. The Regional Administrator or designee shall conduct second level reviews. The appellant may, if dissatisfied, forward the appeal to third level.

54100.25 Staff Complaints

An inmate/parolee appeal which alleges facts that would constitute misconduct by a departmental employee shall be logged as a staff complaint by the appeals coordinator only after review and categorization as a staff complaint. Such review must be completed by an employee designated by the hiring authority at a level not below Chief Deputy Warden, Deputy Regional Administrator or equivalent.

- In the context of this Article, "staff misconduct" means staff behavior that violates or is contrary to law, regulation, policy, procedure, or an ethical or professional standard.
- Confidentiality of a staff complaint may be achieved through submission as confidential correspondence addressed to any official having responsibility for the custody, parole supervision or care of the inmate or parolee appellant. Hiring authorities receiving such allegations shall, in addition to the requirements of this article, ensure that the procedures and safeguards pertaining to Employee Misconduct investigations/Inquiries (see DOM §31140.4) are satisfied.
- Unless circumstances suggest a potential threat to the safety and security of the institution or persons, appeals which generally allege misconduct but provide no facts or evidence of behavior that could be construed as misconduct, shall ordinarily be rejected and sent back to the sender for additional information. If the appellant does not provide the requested clarification of the alleged misconduct the appeal need not be processed as a staff complaint.
- This process is distinct from the filing of a citizen's complaint lodged pursuant to the provisions of Penal Code §832.5 by a person not under the jurisdiction of the Department.
- A staff complaint alleging excessive or inappropriate use of force shall be addressed pursuant to the procedures set forth in 15 CCR §§ 3268-3268.2.
- Upon referral after date stamping, the hiring authority of the involved area will review and/or respond to any staff complaint except those filed directly against the hiring authority or above.

When an appeal is received alleging staff misconduct that also includes issues such as property complaints, classification actions, or other issues, the appeals coordinator will:

- Inform the inmate/parolee in writing that the appeal will be addressed

as a "staff complaint" and that other appeal issues(s) may only be appealed separately and resubmitted if the intention is to seek resolution of those issues.

- 30 day time constraints for the additional appeal begin the date the inmate/parolee receives notice from the appeals coordinator of the above determination.

In the event the hiring authority makes a determination that the complaint will not be categorized as a staff complaint, it shall be processed as a routine appeal based upon the issues raised including those alleged as misconduct. The appeal response must show why the appeal did not meet criteria for processing as a staff complaint, explaining how the issues raised were not indicative of misconduct.

54100.25.1 Rights and Responsibilities Statement

An appeal that alleges misconduct by a departmental peace officer as defined in 15 CCR §3291(b) shall be accompanied by the 15 CCR §3391(b) Rights and Responsibility Statement.

- An appeal received without such statement shall be processed and the statement obtained from the appellant at the time of the initial appeal interview.
- Should the inmate/parolee refuse to sign the Rights and Responsibilities Statement, the appeal shall be cancelled for lack of cooperation.
 - Cancellation does not relieve the Department of its responsibility to address alleged staff misconduct as revealed or suggested via the cancelled appeal. Therefore, the appeal shall be returned to the hiring authority for determination if an inquiry remains appropriate in light of the refusal to cooperate.
 - The result of any such inquiry shall not be shared with the appellant and the appellant will not be considered to have exhausted administrative remedies.

54100.25.2 Processing of Staff Complaints

No less than weekly (within five working days), complaints alleging staff misconduct will be presented by the appeals coordinator to and shall be reviewed by the hiring authority or designee who shall make a determination whether the allegation will be processed as a staff complaint. That determination shall consider whether the appeal alleges staff behavior which would be a violation of law, regulation, policy, procedure or prevailing professional or ethical standards. Such misconduct need not be the focus of the appeal, but if facts are alleged which suggest misconduct, the matter must be referred to the hiring authority to determine the following type of processing:

- As a routine appeal, but not as a staff complaint, as there is no evidence to suggest staff misconduct.
- As a confidential staff complaint appeal inquiry as the nature of the allegation or the lack of evidence makes adverse action unlikely.
- As a referral to Internal Affairs for an investigation as the evidence or the circumstances suggest that adverse action is likely if the allegations are proven.

The employee shall be notified as soon as possible in accordance with any applicable bargaining unit agreement when an appeal is accepted as a staff complaint unless the hiring authority determines that the matter involves a confidential investigation that would be compromised by such notice.

If the hiring authority makes a determination that the complaint warrants an Internal Affairs investigation, the following shall occur:

- The appeals coordinator shall bypass the first level review and respond at the second level, noting that the appeal is granted or partially granted and referred for an Internal Affairs investigation.
- An Internal Affairs Investigation Request shall be completed and forwarded to the Office of Internal Affairs with all accompanying information and documentation.
- Upon completion of the investigation, the appellant shall be notified of the outcome.

When an allegation does not warrant an Internal Affairs investigation or the matter is declined by the Office of Internal Affairs, but does warrant an inquiry, the following shall occur:

- The appeals coordinator will assign the staff complaint for a first or second level response at the discretion of the hiring authority.
- A Confidential Appeal Inquiry shall be conducted in conjunction with the review response.
 - Review and approval of the Confidential Appeal Inquiry

supplement by the hiring authority or their delegated representative no lower than the level of a Chief Deputy Warden or equivalent shall occur.

- The appellant need not be interviewed by the person preparing the appeal response if a confidential inquiry has been completed.
- The appeal inquiry supplement with a red cover sheet attached, designating it as confidential, is to be placed in the appeal file. The appellant will not be provided a copy.
- After completing interviews with pertinent witnesses, the subject of the staff complaint may be interviewed (if necessary to reach a determination) by a person trained to conduct administrative reviews. A Notice of Interview shall be served at least 24 hours prior to such interview.
- If the subject chooses to waive the 24 hour requirement, he or she must indicate this at the time he or she is given notice.
- Upon voluntary waiver, the subject may be interviewed immediately, if desired.
- At the time of the interview the subject of the interview shall be served with an advisement of rights which is to be signed prior to any interview.
- The subject may request to record the interview and will be allowed to retain their copy of the recording. However, under such circumstances, a concurrent separate recording shall be made by the Department and retained in the appeal office. Only the subject can initiate a request to record the interview.
- Pertinent witnesses are those individuals in possession of information or knowledge necessary to come to a reasonable conclusion as to whether or not policy was violated.
- The witnesses need not be noticed or admonished, nor shall a witness be allowed to record the interview or have a representative present.
- If at any time during the course of the appeal inquiry the reviewer discovers information indicating misconduct may have taken place of a severity that would likely lead to adverse personnel action the reviewer shall:
 - Cease further interviewing of staff or inmates/parolees.
 - Bring the matter to the attention of the hiring authority.
 - The hiring authority shall make a determination whether the matter will be referred for Internal Affairs investigation.
- The confidential inquiry shall review the information available to determine whether policy was violated and the confidential report shall summarize the review and include a determination of the findings concerning the allegation.
- The author of the report shall provide sufficient facts and testimony to reasonably support the conclusion(s) given.
- This report shall be kept with the appeal file in the Appeals Office and no other copies shall be kept or maintained except as described in this subsection or as needed for third level review or litigation. The document is strictly confidential to all inmates and any staff except those involved in the inquiry process or litigation involving the Department.
- Accused staff may view the confidential report in the appeals office upon approval of the Litigation Coordinator, but if any information relating to other staff is contained therein, a copy shall be made and that confidential information redacted prior to the review. Neither the original nor the copy shall leave the appeals office (except as specified above) and any redacted copy shall be placed with the original after review.

The institution/parole region's appeal response to a staff complaint shall inform the appellant of the status of the referral for investigation and outcomes as follows:

- The referral for investigation and the status of the investigation. Additionally, the appellant shall be notified of the outcome at the conclusion of the investigation.
- The decision to conduct a confidential inquiry and whether the findings determined that the staff in question did or did not violate department policy with regard to each of the specific allegations(s) made.
- In the event that the matter is rejected by Office of Internal Affairs (OIA) due to insufficient evidence and the hiring authority elects not

to complete an inquiry because the OIA review is sufficient to exonerate staff, the appellant shall be noticed that a finding has been made that policy was not violated.

An appeal alleging staff misconduct by an appeals coordinator shall be reviewed by the hiring authority for determination of processing. If accepted for processing at the first level, neither the appeal response nor the Confidential Supplement to Appeal, Appeal Inquiry shall be prepared or reviewed by staff assigned to the Appeals Office.

54100.26 Civil Addict Exclusionary Review

Exclusion is the process by which a civil addict/releasee is returned to the court of original jurisdiction with a recommendation to vacate the civil commitment because of the individual's unsuitability for the civil addict program.

- Pursuant to Welfare and Institutions Code Section 3053(a) and 15 CCR §3625(b) unsuitability is based on staff judgment that a civil addict/releasee is not fit for confinement or treatment, not amenable to supervision, has not or is not available for supervision, and/or has a history of absconding.
- Prior to being forwarded to the committing court, the documented staff judgment, including reasons, rationale, and conclusions reached pertaining to the exclusion decision shall be provided to a civil addict/releasee.
- Unless the exclusion decision is based upon a commitment to prison, deportation or releasee-at-large status, the incarcerated civil addict/releasee may request a review of the decision for the purpose of retention in the civil addict program.
- Prepared documentation shall be held for 30 calendar days to afford time for such requests submitted by the incarcerated civil addict/releasee. Absent objection prior to the end of the 30th calendar day, the documentation shall be forwarded to the committing court.

54100.26.1 Exclusion Recommendation Appeal

An incarcerated civil addict/releasee shall appeal the exclusion recommendation as follows:

- Civil addicts in the institution are notified of intention to exclude initially in Unit Classification Committee (UCC). Objection to this decision during committee automatically acts to refer the exclusionary recommendation to the Institutional Classification Committee (ICC).
- Other appeal processes notwithstanding the UCC functions as the first level of review and the requirements for second level of review are satisfied by the ICC.
- The ICC recommendation is the final departmental decision and exhausts administrative remedies in this matter.

If retention in the civil addict program is not the outcome of the appeal, the civil addict/releasee shall be officially notified of exclusion by receipt of a copy of the exclusionary letter to the committing court.

54100.27 Health or Safety Complaint (CALPIA)

Inmates employed by CALPIA shall submit any complaint concerning perceived health or safety hazards relating to prison industries to the prison industries' safety committee, in accordance with Labor Code (LC) and Industrial Relations regulations.

- The CDCR Form 602 shall not be used for the purpose of such complaints. A Cal/OSHA form for the reporting of alleged safety or health hazards may be used, but is not required.
- A health and safety complaint should not be used by inmates as a substitute for verbally or otherwise informing staff of an urgent health or safety situation requiring immediate response or action.

An inmate who believes a health or safety hazard exists in a CALPIA operation is afforded the opportunity to submit a written complaint.

- The complaint shall be deposited in a readily accessible complaint box or presented to any CALPIA staff member, including the inmate supervisor, member of the health and safety committee, or the affected shop superintendent or their equivalent.
- Any CALPIA staff member receiving a written health and safety complaint for an inmate worker shall direct it to the health and safety committee for review and response.

If the inmate finds the committee's conclusions to be unsatisfactory for any reason, he or she may request the complaint be forwarded to the Department of Industrial Relations, Division of Occupational Safety and Health (DOSHS).

- The CALPIA Health and Safety Unit shall coordinate the submission of any health and safety complaint submitted pursuant to this section

which cannot be resolved by the Safety Committee or for which the complainant is not satisfied to DOSH.

- DOSH shall determine whether any complaint is bona fide and respond in accordance with the requirements of LC Subsection 6304.3(b).

Should the inmate believe that retaliatory action has taken place as a result of the complaint, the inmate may file a CDCR Form 602 appeal of this alleged retaliation with the institution appeals coordinator.

54100.28 Movie/Video Selection or Exclusion Appeal

Movies/videos that have been given a rating of other than “G,” “PG,” or “PG-13” by the Motion Picture Association of America are not approved for either general inmate viewing or for viewing within institutional classrooms, and are not subject to appeal at any level. The first level of appeal shall be waived for appeals related to the selection or exclusion of a “G,” “PG,” or “PG-13” rated or non-rated movie/video for viewing and the second level response shall constitute the Department’s final response on appeals of this nature.

54100.29 Term Computation Appeals

Whenever an inmate or parolee files a CDCR Form 602 which sets forth a specific, clearly stated claim regarding an error in the computation of a term of confinement or period of parole based upon documentation in the record, and the issue is not resolved (granted) at the first level, the inmate or parolee may request a computation review hearing. (Reference: Haygood v. Younger, (1985)-769 F. 2d 1350.)

- Other classification, pay or work time issue appeals shall be addressed by a classification committee or work supervisor, and shall not warrant a computation hearing.
- The only issue to be determined in the hearing is whether or not an error has been committed which adversely affects a term of confinement or period of parole.
- The computation review hearing, when scheduled, shall constitute the second level of review.

54100.29.1 First Level

Parole period and term computation appeals shall be reviewed at the first level by the Department’s records staff. The inmate or parolee must state in detail the alleged error or reason for disputing the calculation of his or her release date. The case records staff shall research the case, considering case law and Department policy and procedure. If the relief requested is not granted at the first level, the CDCR Form 602 appeal shall be returned to the inmate or parolee along with two copies of the CDC Form 1031, Notice of Right to Request a Computation Review Hearing. The inmate/parolee shall sign the notice acknowledging receipt. The signed form shall be returned to case records staff for filing in the miscellaneous section of the inmate’s/parolee’s C-File. The inmate/parolee shall retain the second copy.

54100.29.2 Appeals Coordinator

If the inmate or parolee wishes to have a computation review hearing, he or she shall submit the same CDCR Form 602, filling out Section D, to the appeals coordinator. The appeals coordinator shall forward the CDCR Form 602 within five working days of receipt to the case records supervisor/manager. The case records supervisor/manager shall date stamp and log the appeal on the CDC Form 1059, Computation Review Hearing Log.

54100.29.3 Second Level

The case records supervisor/manager shall schedule the computation review hearing, which shall be held within 15 working days of receipt of the CDCR Form 602. The case records supervisor/manager shall send two copies of the CDC Form 1032, Notice of Time, Date and Place of Computation Review Hearing, to the inmate or parolee who shall be notified at least 24 hours prior to the hearing unless the inmate or parolee waives the time constraints. The counselor or designated staff shall immediately return the signed original to the case records staff for logging on the CDC Form 1059. The case records supervisor/manager shall research the case, taking into consideration all case law and department policy and procedures.

54100.29.4 Hearing

The case records supervisor/manager shall conduct the hearing during the inmate’s non-assigned hours.

- Other staff designated by the institution/parole administration may attend this hearing. Location of the hearing shall be at the discretion of local authorities.
- It may be necessary to conduct the computation review hearing by telephone for those inmates housed in camp, other jurisdictions and

parolees.

- If so, the completed notice of time, date, and place of computation review hearing shall reflect that the inmate/parolee was advised of the time of the hearing by telephone or other means.

If it is determined an error has been made, the case records manager/supervisor shall grant the appeal and correct the error.

- At the conclusion of the hearing, two completed copies of the CDC Form 1033, Computation Review Hearing Decision, shall be made. A completed copy shall be given to the inmate.
- At the conclusion of a computation review hearing conducted by phone, the inmate/parolee shall be advised of the decision and that a completed computation review hearing decision shall be mailed that day.

If the appeal is a matter that the Department has no authority to change, the appeal shall be denied. The appellant will be referred to the appropriate agency or court with jurisdiction of the matter for disposition. If the appeal is a sentencing discrepancy of which the Department seeks clarification from the sentencing court, the appeal shall be partially granted to the extent that an inquiry is being pursued and the Department shall pursue clarification of the noted discrepancy from the appropriate court.

54100.29.5 C-File

The CDCR Form 602 and the original CDC Form 1033 shall be sent to the appeals coordinator for processing.

Upon completion of processing, a copy of the CDCR Form 602 and CDC Form 1033 shall be forwarded to case records for placement with the CDC Form 1031 and CDC Form 1032 in the miscellaneous section of the inmate/parolee’s C-File.

54100.30 Joint Venture Program (JVP) Employer Related Grievances

The Department’s participation in the Joint Venture Program is authorized pursuant 15 CCR §§ 3480-3486. Any current or former Joint Venture inmate-employee who believes he or she has a grievance regarding a wage and hour or retaliation claim against a JVP employer shall submit the written grievance to the JVP Chief.

- The JVP Chief shall attempt to resolve all complaints.
- Time frames for filing grievances will be governed by the Division of Labor Standards Enforcement’s (DLSE) statutes of limitations, including but not limited to, Labor Code §98.7, and Code of Civil Procedure §§337, 338 and 339, for the appropriate type of complaint.
- If the inmate is dissatisfied with the JVP Chief’s decision, the inmate may file a complaint with the Labor Commissioner.

54100.31 Appeals Reports

Institution and parole region appeals coordinators shall prepare and provide reports upon request. These appeal reports may include appeal types, outcomes, volume, and similar statistical results of appeal actions.

As necessary, the Office of Appeals shall audit and compile this data in reports distributed to departmental administrators, the courts, and other jurisdictions or agencies.

54100.32 Revisions

The Director, Division of Adult Institutions, in conjunction with the Director, Division of Adult Parole Operations, or designee shall ensure that the content of this Article is accurate and current.

ARTICLE 54 – INVESTIGATION OF GASSING INCIDENTS

Effective June 23, 2005

54110.1 Policy

The Department shall implement and maintain a protocol for the investigation of gassing incidents in order to establish the elements of PC 4501.1(b) and successfully prosecute crimes under this Statute.

54110.2 Purpose

This Article delineates the roles and responsibilities of staff involved in the investigation of gassing incidents.

54110.3 Definition of Gassing

Gassing, as defined by PC 4501.1(b), means “..intentionally placing or throwing, or causing to be placed or thrown, upon the person of another, any human excrement or other bodily fluids or bodily substances or any mixture containing human excrement or other bodily fluids or bodily substances that result in actual contact with the person’s skin or membranes.”

Pursuant to Penal Code Section 4501.1(a), a “..person confined in state prison who commits a battery by gassing upon the person of any peace officer, as defined in Penal Code Chapter 4.5 (commencing with Section 830) of Title 3 of part 2, or employee of the state prison is guilty of aggravated battery.”

Hereinafter, inmate/parolee will be referred to as inmate unless specifically identified otherwise by references to the PC.

54110.4 Initial Response

As soon as possible, the victim should attempt to determine if the substance was a gassing substance such as urine, feces, sputum, blood, semen, etc. This determination is accomplished by the victim noting the odor, color, and texture of the substance and any chemical reactions, etc. The victim does not have to examine the substance that was thrown on them. Rather, as soon as practical, the victim should either relay their impression of what the substance was to the officers assigned to investigate the gassing or include it in their report.

The victim’s clothing that is contaminated by the gassing substance is evidence. As soon as practical, the clothing should be relinquished by the victim, replaced with an available garment, and any stains that appear to be from the gassing substance should be outlined with a black permanent ink marker to assist laboratory personnel to locate the site on the clothing. The stains should also be photographed while they are still wet. Caution should be taken to ensure that separate stains on the clothing articles do not touch each other. Staff are advised to practice universal precautions and wear proper protective clothing when handling the clothing, as well as, to maintain the chain of custody of the clothing item.

Every effort should be made to obtain a statement or report from the victim regarding what they observed including, but not limited to:

- What the suspect stated before, during, and after the gassing.
- The type of container, if any, used by the suspect to commit the gassing.
- The actions of the suspect both before and after the gassing.

Any admissions or inculpatory statements made by the suspect that were overheard by the victim can be critical in achieving a successful prosecution.

Any employee that comes into contact with a human body fluid, as recognized by the Centers for Disease Control and Prevention, will be evaluated by appropriately licensed and trained medical staff. The medical evaluation will take priority over the collection of evidence, report writing, or other non-emergency issues or duties. The requirement to fill out paper work or receive paper work relating to the incident will not delay the employee from seeking offsite medical care.

The inmate suspect(s) should be removed from their cell or area where the attack occurred and searched for evidence. Any clothing items worn by the suspect(s) that appear to be stained with the same substance as thrown on the victim should be marked, photographed, and collected in the same manner as the victim’s clothing. The suspect(s) should be placed in a secure holding

cell and a crime scene search should be initiated. If there is more than one suspect, they should be separated immediately.

54110.5 Handling of Evidence

Any clothing item contaminated with body fluids should be dried and then stored in clean paper bags. Transport or shipment of the evidence items to the laboratory conducting the testing should be expedited.

When collecting articles of clothing as evidence, each article is to be placed into a separate paper bag. Protective gloves should be changed each time a separate article of clothing is handled to prevent cross contamination of evidence items. Each evidence bag must be properly identified with the date, time, case number, charge, suspect name and CDC number, and victim name. Each evidence item can be marked with the finder’s initials and the date the item was obtained.

If there is any information that the substance used in the gassing contains a communicable disease, the laboratory personnel who are testing the substance should be made aware of this information. This information will help to ensure the safety of the laboratory personnel testing the substance and will also help in isolating and identifying the suspect.

Evidence should be submitted to the appropriate California Department of Justice, Bureau of Forensic Services, laboratory that other evidence is submitted to as per each institution/facilities Investigative Services Unit (ISU).

54110.6 Crime Scene Investigation

The staff investigating a crime scene where a gassing has occurred should ensure they are wearing proper protective equipment, such as gloves. The outer door of the cell or the general area where the gassing occurred should be photographed. Any areas on the door, door opening, or general area that appear to be contaminated with the same substance that was thrown on the victim should also be photographed. If the crime scene is a cell, the door of the cell should be opened and photographed as discovered. A search for any container used by the suspect to commit the gassing should be initiated, and if discovered, should be photographed in place and collected and processed as evidence.

Investigating staff should look for traces of the gassing substance on the floor, walls, or any other surface where the substance may be located to be photographed and for the purpose of collecting samples. When collecting samples, staff should use sterile swabs, and should also take a “control” swab of an apparent uncontaminated area adjacent to the area contaminated by the gassing substance prior to taking a swab of the suspected gassing substance. The control swab and the contaminated swab should also be processed as evidence. All evidence must follow an appropriate chain of custody and be retained in an evidence locker maintained by the ISU for possible future criminal prosecution.

54110.7 Employee Considerations

In the event of a possible exposure to body fluids, the CDC Exposure Control Plan and any local institutional procedures regarding the exposure to human body fluids or blood should be followed. The health and welfare of the victim must be given priority. The medical evaluation of the employee should take precedence over collection of evidence, report writing, or other non-emergency issues or duties. The employee Post Trauma Program should be offered to the victim along with referrals to the Employee Assistance Program, as needed.

The employee’s supervisor will be responsible for filling out and/or collecting the following documents:

- State Compensation Insurance Fund Report of Occupational Injury or Illness.
- Employees Claim for Workers Compensation Benefits.
- Any local Institutional Report of Job-Related Injury/Illness as required.

PC 4501.1(c) establishes that the Chief Medical Officer (CMO), or their designee can order an inmate to receive an examination or test for hepatitis and/or tuberculosis on a voluntary or involuntary basis, if there is probable cause to believe the inmate has committed a crime under this Section and the test is medically necessary to protect the health of the officer or employee who was the victim of the violation. Following a potential exposure to a blood borne pathogen, an employee will immediately be told by the Warden, Administrative Officer of the Day, or Watch Commander if the medical staff have evidence indicating that the inmate has Human Immunodeficiency Virus or any other communicable disease, such as Hepatitis B or C.

PC 7510-7515 establishes procedures for the requirement that employees report possible exposure to body fluids from inmates or parolees; employees may request that the inmate or parolee be tested for the HIV virus. This request should be made in writing, in the form of a report of exposure, and

submitted to the CMO within two days after the incident. The CMO may waive this filing period requirement if it is determined that good cause exists. If an employee's garment has been contaminated with a potential blood borne pathogen and not retained for criminal prosecution, the employee will be provided an alternate garment to wear and afforded an opportunity to shower. Additionally, the contaminated garment will be cleaned at Department expense and returned to the employee within 30 calendar days of the incident. If a garment has been contaminated with a potential blood borne pathogen and retained as evidence for criminal prosecution, the employee will be reimbursed by the institution for the cost of the garment within 60 calendar days of the incident. CDC Form 892, Employee Claim for Loss or Damage of Personal Property, should be used by the employee for reimbursement.

54110.8 Suspect Interviews

The suspect(s) is to be interviewed with a tape recording made of the interview. As the interview constitutes a custodial interrogation, the suspect(s) must be advised of their Miranda Rights before questioning. If there is more than one suspect, they are to be interviewed separately. During the interview an attempt should be made to establish the elements of the crime including, but not limited to, the type of substance thrown, how the suspect(s) obtained the substance, how the substance was delivered to the victim, how the suspect(s) planned and carried out the gassing, and motive for the gassing. The investigator should make every effort to obtain an admission, or as much information as possible, from the suspect(s) in order to establish culpability.

54110.9 Filing Considerations

The penalty for violation of PC 4501.1 is imprisonment in the county jail, or imprisonment in the state prison system for up to 4 years. Further, inmates who commit gassings can also be charged under the provisions of PC 4501.5, Battery by Prisoner on Non-confined Person, with a penalty of up to 4 years in the state prison system to be served consecutively. Each institution/facilities ISU should confer with their local District Attorney's Office to determine the most appropriate statute to charge an inmate who has committed this crime.

54110.10 Revisions

The Deputy Director, Office of Occupational Safety, Field Support, or designee shall be responsible for ensuring that the contents of this Article are kept current and accurate.

PC §§ 4501.1, 4501.5.
PC §§ 7510-7515.
PC §§ 830 and following.
CCR (15)(3) §§ 3315 and 3323.

CHAPTER 6 – ADULT CLASSIFICATION**ARTICLE 1 — RECEPTION CENTERS***Revised July 26, 2004***61010.1 Policy**

Penal Code (PC) § 2900 provides that defendants sentenced to state prison shall be delivered to the custody of the Secretary at the place designated by the Secretary to serve the term of imprisonment ordered by the court.

61010.2 Purpose

This Section establishes standard procedures for the orderly reception, processing, and transfer of inmates into the California Department of Corrections' and Rehabilitation (CDCR) institutions.

61010.3 Reception Center (RC) Processing

CIM, CCI, DVI, HDSP, NKSP, RJD, SQ, and WSP are designated to receive and process male felons committed to the jurisdiction of the CDCR.

CIW, CCWF, and VSPW are designated to receive and process all female felons committed to the CDCR.

Reception of Condemned Males

Condemned male inmates shall be received and housed at SQ.

Reception of Condemned Females

Condemned female inmates shall be received and housed at CCWF.

Reception of Civil Addicts

Female and male civil addict commitments shall be received at CRC and processed in accordance with the Board of Parole Hearings procedures.

61010.4 RC Processing Staff - Responsibility

RC staff shall collect social and criminal history information on each inmate received by the CDCR as well as interview and test all newly received inmates.

Social History/Staff Reports

The counselor shall complete an Institutional Staff Recommendation Summary (ISRS) or CDC Form 816, CDC Form 812, CDC Form 839, or CDC Form 840, or CDC Form 841, and the Social Factor Sheet, all of which are explained in detail in DOM §§ 61010, 61020, and 61030.

Institution Gang Investigator (IGI) Referral

The counselor, in conjunction with the IGI, shall also complete a CDC Form 812-A, Notice of Critical Information - Prison Gang Identification, as required.

Prison Gang Involvement

Inmates shall be advised that any involvement with a prison gang may result in segregated housing placement.

United States Immigration and Naturalization Service (USINS)**Referral**

The counselor shall refer all inmates, including parole violators, who are foreign born, to the USINS for deportation hold determination by completing a CDC Form 850, Detainer Summary.

Psychiatric/Medical Referral

Inmates shall be referred to psychiatric and medical staff as necessary for diagnosis, treatment, or recommendations.

Inmate Orientation

RC processing provides the inmate with an orientation to prison life, introduction to available programs, and initial preparation for release.

61010.5 Notification of Rules and Available Programs

Within 14 days of arrival at an RC, inmates shall be furnished written information concerning program availability for reduction of sentences as required by PC § 2930. Inmates shall be issued a current copy of the California Code of Regulations (CCR) and treatment programs available at each institution.

61010.5.1 Documentation in C-File CDC Form 128-O

Each inmate shall sign a CDC Form 128-0, Chrono-Document Receipt, indicating receipt of notification of rules and available programs. A copy of the signed CDC Form 128-0 shall be placed in each inmate's C-file.

61010.6 Withdrawal of Inmate Trust Funds

Counselors involved in the processing of initial commitments to the CDCR and the readmission processing of parole violators or persons returned to the CDCR shall determine if the inmate has or anticipates any outstanding debts or other financial obligations, which may require funds be withdrawn from their trust account for transmittal to any business, agency, or individual. This does not include withdrawals for purchases or for other

payments/reimbursements to the CDCR, nor does it include any debt or financial obligation, which will be met for the inmate by other means. A summary of this determination shall be noted on the CDC Form 825, Trust Withdrawal Case Information.

61010.7 RC Transfers**General**

Transfers from the RCs shall be based on the recommendations of the counselor and supervising counselor or classification committees subject to Classification Staff Representative (CSR) approval.

61010.8 CDC Form 839, 840, and 841

Classification and reclassification of inmates will normally be made pursuant to the CDCR Inmate Classification Score System, except when in the exercise of the discretion and judgment of departmental officials it is deemed necessary to deviate from that classification score system. Deviations from the system shall be made on an individual case for the purpose of ensuring the safety of inmate(s), correctional personnel, and the general public as well as for special institutional and/or programming needs.

61010.8.1 When to Use the CDC Form 839**Processing Newly Received Felon Inmates**

All felon inmates who are newly received in the CDCR shall be scored on a CDC Form 839. An inmate who has served a prior term in the CDCR, but whose commitment is subsequently discharged, shall be processed as a newly received felon inmate. Parole Violators will not be scored on the CDC Form 839. Parole Violators Returned to Custody (PVRTC) and Parole Violators With a New Term (PVWNT) will be scored on the CDC Form 841.

Processing Adverse and Non-Adverse Transfer Cases from California Youth Authority (CYA)

A newly received felon inmate who arrives directly from DJJ/CYA placement to a CDCR RC, either because the inmate has reached the maximum age allowed to remain housed in CYA or the inmate was moved to CDCR as a "program failure" and/or received a felony commitment while housed in CYA, shall be processed with both a CDC Form 839 and a CDC Form 840. The date of arrival in CYA shall be recorded as the Date Received CDC. The CDC Form 839 shall then be prepared as it would have been prepared at the time that the inmate arrived in CYA. A CDC Form 840 shall then be prepared which records the inmate's positive and negative behavior while incarcerated in CYA. An ISRS shall also be prepared.

Processing CYA Parolees Sentenced to State Prison

An inmate who receives a sentence to state prison while on CYA Parole shall be handled as a newly received felon inmate. The Date Received CDC shall be recorded as the actual date received in the CDCR RC. A CDC Form 839 shall be prepared. Documented CYA behavior shall be recorded as Prior Incarceration Behavior.

Processing Civil Addict Commitments Excluded from the California Rehabilitation Center (CRC)

An inmate who has been excluded from the Civil Addict Program shall be processed as a newly received felon inmate. The Date Received CDC shall be recorded as the actual date received in the CDCR RC. A CDC Form 839 shall be prepared. Evaluate any serious in-custody disciplinary behavior that occurred during the inmate's Civil Addict commitment for documentation in the Prior Incarceration Behavior section of the CDC Form 839.

Processing Interstate, Federal, and International Placements received from other jurisdictions

SACCO (Sacramento Central Office) Cases

- A SACCO case is one of the following:
 - An inmate who was sentenced to serve a prison term in California, but is serving a concurrent or consecutive term in a facility in another jurisdiction; or
 - An inmate who served time in a county jail was, sentenced to serve a prison term in California, and was released before being transferred to an RC to undergo processing because the time served in county jail was equal to or exceeded the prison sentence at the time of sentencing.
- Processing SACCO cases returned to the CDCR from another agency.
- SACCO cases with a CDC Form 839.

A SACCO case who was processed through a CDCR RC and has had a CDC Form 839 prepared prior to transfer to another federal or state agency and who is returned from the other agency to finish the term imposed by California, shall have a CDC Form 840 prepared to update the inmate's Placement Score. The CDC Form 840 shall reflect the adjustment to

incarceration while housed in the other jurisdiction. An ISRS shall also be prepared.

- SACCO cases without a CDC Form 839.

A SACCO case who was not processed through an RC, but who subsequently returned to California to finish his or her term, shall have both a CDC Form 839 and a CDC Form 840 prepared. The Date Received CDC on the CDC Form 839 shall be the date that is reflected on the CDC Form 112 or the Legal Status Summary. A CDC Form 840 shall also be prepared to update the inmate's placement score to reflect the inmate's adjustment to incarceration while housed in the other jurisdiction. An ISRS shall also be prepared.

- Processing SACCO cases returned from parole.

If a SACCO case, who served time in a county jail or another jurisdiction, was released to parole and then returned to prison as a Parole Violator or a Parole Violator with a New Term, a CDC Form 839 and a CDC Form 841 shall both be prepared. The Date Received CDC recorded on the CDC Form 839 shall be the date indicated on the CDC Form 112 or the Legal Status Summary. The Date Received This Incarceration, recorded on the CDC Form 841, shall be the date of arrival at the RC. The CDC Form 841 shall be prepared to update the inmate's placement score. This score sheet shall include the inmate's adjustment to incarceration while housed in the other jurisdiction as well as record any changes in term points. The Date Paroled is the date that the inmate paroled from the CDCR term. An ISRS shall also be prepared.

Western Interstate Corrections Compact (WICC) and Interstate Corrections Compact (ICC) Cases

A WICC/ICC case may be either a California inmate serving a term as a boarder in another state or federal jurisdiction or an inmate who is being boarded in California, but serving a term imposed by another state or federal jurisdiction.

- WICC/ICC cases arriving at an RC in California from another jurisdiction.

WICC/ICC cases arriving at an RC in California from another jurisdiction shall have a CDC Form 839 prepared during RC processing. The date that the inmate arrived in the CDCR RC shall be recorded as the Date Received CDC. Positive or negative behavior exhibited in the previous jurisdiction shall be recorded on the CDC Form 839 under "Prior Incarceration Behavior." An ISRS shall also be prepared.

- WICC/ICC cases returned to California.

When a California felon inmate serving a term as a boarder in another state or federal jurisdiction is returned to California, designated staff shall prepare a CDC Form 839. The date of the inmate's original "term starts" date as noted on the Legal Status Summary shall be recorded as the Date Received CDC. A CDC Form 840 shall be prepared to update the inmate's Placement Score based on the inmate's adjustment to incarceration in the other jurisdiction. An ISRS shall also be prepared.

If the inmate had been released to parole and has since returned to the RC, a CDC Form 841 shall be prepared instead of a CDC Form 840. The inmate's previous incarceration behavior and program shall be documented on an ISRS.

- Family Foundations Program (FFP) Program Failures and FFP Cases Returned from Parole.

The Family Foundations Program is an alternative sentencing program for pregnant or parenting women sentenced to state prison with children under the age of six. Under the authority of Penal Code § 1174.4, the Court may impose a state prison sentence with the recommendation that the defendant participate in the program. A female inmate who is sentenced to state prison by the court and subsequently accepted for the Family Foundations Program is not received at a reception center. The inmate is transferred from the county jail directly to the program. Although the inmate is issued a CDC number, a score sheet is not prepared for these inmates. Participation in the program is voluntary and the expectation is that the female inmate will complete the 12-month program prior to release back to the community.

A program failure at the FFP will result in the inmate being transferred to a CDCR reception center to serve the remainder of her original sentence.

- Processing FFP Inmates Received at a Reception Center as program failures.
 - The inmate shall undergo reception center processing in the CDCR.
 - A CDC Form 839, Classification Score Sheet, shall be prepared.
 - The date that the inmate was received at the FFP shall be entered as the Date Received CDC on the CDC Form 839.

- A CDC Form 840 shall also be prepared to reflect the inmate's adjustment to the FFP when favorable behavior points or unfavorable behavior points need to be recorded.
- Processing FFP Inmates Received at the Reception Center as Parole Violators.
 - An inmate who was released to parole from the FFP, but returned to prison as a parole violator, shall have both a CDC Form 839 and a CDC Form 841 prepared.
 - The date that the inmate was initially received at the FFP shall be entered as the Date Received CDC on the CDC Form 839.
 - The date that the inmate was returned to the reception center shall be entered as the Date Received This Incarceration on the CDC Form 841.
 - Favorable and/or Unfavorable Behavior points for the period in FFP until parole shall be recorded on the CDC Form 841.

61010.8.2 When to use the CDC Form 840

The CDC Form 840 shall be completed as part of the regular reclassification process. It is intended to provide a cumulative record of the inmate's institutional adjustment and changes in case factors. A CDC Form 840 shall also be completed on each of the following:

- An escapee.
- A Community Correctional Reentry Center (CCRC) failure.

Refer to DOM § 61020.19 for instructions to complete the CDC Form 840.

61010.8.3 When to use the CDC Form 841

The CDC Form 841 is prepared when an inmate's parole status has been revoked, the inmate has been returned from parole to a reception center, and the parole period has been suspended. A CDC Form 841 shall also be completed for an inmate whose parole is lawfully revoked because he/she refused to sign conditions of parole. If the inmate is not physically paroled to the community, the inmate's status shows that he/she has been paroled, revoked, and returned the same day.

A CDC Form 841 shall not be completed for any of the following cases:

- An inmate returned to the CDCR, but then Continued On Parole (COP) by the BPH.
- A parolee who was revoked by the BPH, but not returned to the CDCR.
- An inmate who has been returned to the CDCR from parole, but is still considered a "parolee." Examples of these situations are a SATCU case returned for drug treatment/"dry out" or an inmate returned for "psych treatment" only. In these types of situations, the inmate's parole period continues uninterrupted.

Refer to DOM § 61020.20 for instructions to complete the CDC Form 841.

61010.9 Procedures

The Counselor

The counselor shall review all relevant documents available during the RC process to complete the score sheet. Since the Placement Score usually determines the institution to which the inmate will be assigned, it is extremely important that the information considered be as complete as possible. The Probation Officer's Report (POR) is the document of choice when information conflicts; the POR is reviewed by legal counsel and the court and contents may be challenged in court.

Inmate Interview

In the process of completing the CDC Form 839, 840, or 841, the counselor shall interview the inmate. In the interview the inmate shall be informed of the nature and purpose of the CDC Form 839, 840, or 841 and allowed to verbally contest specific score items and other case factors on the form. Documentation for score items that is absent or conflicting shall be discussed during the interview. The inmate shall be responsible for providing documentation to support his or her challenge of information on the CDC Form 839.

Corrections

Counselors are responsible for initiating a corrected CDC Form 839, 840, or 841 when the inmate or other party presents verifiable documentation, which supports the change. When the change to the score results in a different security level, the inmate shall be referred to the appropriate classification committee and subsequently to a CSR. (Refer to DOM § 61020.20.9 for instructions in the correction process.)

Reflects the Inmates Status at Time of Reception

The CDC Form 839 score reflects the inmate's status at the time of reception and, apart from correcting errors of fact, remains the same during incarceration. During incarceration the inmate will have opportunity to earn

favorable behavior points (documented on CDC Form 840 and CDC Form 841) to lower the total score.

After the counselor has completed the CDC Form 839, 840, or 841 and other case summary material and printed his/her name in the appropriate boxes on the form, the CDC Form 839, 840, or 841 shall be reviewed by the supervising counselor for accuracy and completeness.

61010.9.1 Requesting an Archive File

To ensure accurate classification and appropriate placement of inmates, available information regarding an inmate’s prior incarceration is to be reviewed and considered as part of a thorough, objective evaluation of the inmate’s security and custody needs. The counselor shall order and review an archive file upon discovery that the inmate has a prior CDCR term, Civil Addict commitment, DJJ, or CYA commitment, which has not been previously reviewed and incorporated into the inmate’s current C-file. If the inmate was incarcerated in a federal institution or out-of-state, an attempt shall be made to get a synopsis of the inmate’s prior incarceration behavior. (See also DOM § 61020.12.)

61010.10 Distribution of Copies/C-File Placement

The CDC Form 839 shall be temporarily attached to other documents prepared by the RC staff and placed in the classification portion of the C-file when presented to a CSR as described in DOM § 61030. Following CSR action the original shall be permanently placed in the classification section of the C-file, a copy of the CDC Form 839 shall be provided to the inmate. The computer copy shall be reviewed for legibility and computation. Computer copies shall be compiled and mailed weekly to:

Department of Corrections and Rehabilitation
 Information Quality Support Section
 P.O. Box 942883
 Sacramento, CA 94283-0001

61010.11 Instructions for Completing the CDC Form 839

The CDC Form 839 shall be written on a hard surface with ballpoint black ink pen only. Do not use pencil or felt, fiber, or other soft tip pens. This is required so that the printing will come through clearly on the self-carbonized copies. The Information Quality Support Section cannot accept items, which have been erased or marked over to correct because the copies will not be legible. Destroying the erroneous form and completing a new CDC Form 839 shall correct errors detected before copies are distributed.

Key data entry operators read only those letters and numbers which are inside the boxes on the form. Therefore, underlining and notations in the margins are permitted. Do not write more than one letter or number in each box.

Right Hand Justified

Numbers are to be right-hand justified; that is, end in the box furthest to the right with any empty boxes on the left. The most common problem is zeros that look like sixes, and vice versa, so take special care making these two numbers.

Except as noted in these instructions, any unused letter or number item is simply to be left blank.

On the CDC Form 839 box numbers appear to the right, but refer to the first box on the left of each field.

61010.11.1 Identifying Information

CDC Number (Boxes 1 through 6)

At the bottom of the CDC Form 839, first print the CDC number for the inmate in boxes 1-6 from information obtained from the Legal Status Summary.

Print the letter prefix (such as C, D, or W) in Box 1. Print the numbers in Boxes 2 through 6, always ending in Box 6. Do not enter a letter in the number boxes. Example:

D-27854

D	2	7	8	5	4
---	---	---	---	---	---

Inmate's Last Name (Boxes 7-11)

Print the first eight letters of the inmate’s last name using, CAPITAL BLOCK letters. Do not use lowercase or written script letters. Letter boxes are left-hand justified. Begin printing the name in the box furthest to the left and end with any empty boxes on the right. If the name consists of more than eight letters, enter only the first eight letters of the inmate’s last name. Although eight boxes are provided on the score sheet, the database captures only the information in Boxes 7-11 or the first five letters entered. For

names with less than eight letters, leave empty the remaining boxes to the right. If the last name is two words, run the words together. Do not leave an empty box in between letters. Example:

Mac Knight

M	A	C	K	N	I	G	H
---	---	---	---	---	---	---	---

Date Received CDC (Boxes 12-17)

For newly received felon inmates the Date Received CDC is the date that the inmate physically arrived at the RC. This date is noted on the CDC Form 112 and the Legal Status Summary. Enter this date in the boxes. A zero need not be entered in front of a single digit month or day, but must be entered as part of the two digits for the year when applicable.

Some exceptions to this process are outlined in DOM § 61010.8.1.

County of Last Legal Residence (CLLR) (Boxes 18-20)

This information is obtained from the POR, sentencing transcripts, or arrest report. For new commitments, the CLLR is the county of residence prior to incarceration. If the POR identifies that the inmate last resided out-of-state or was a transient prior to his or her commitment, the CLLR shall be the county of commitment. If the inmate transfers to the CDCR to serve a term from another state or federal jurisdiction, use the code "WIC" as the CLLR.

Print the two or three letter OBIS code for the county name in Boxes 18-20.

ALA	Alameda	ORA	Orange
ALP	Alpine	PLA	Placer

Form Identification (Boxes 21-29)

At the top of the CDC Form 839, three blank boxes are labeled “New,” “Correction,” and “Delete.” Place an “X” in the appropriate box.

- Print an X in the “New” box (Box 21) if the inmate is a new felony commitment and has no previous CDC Form 839 for this commitment.
- Print an X in the “Correction” box (Box 22) if the form is being completed as a correction to a previously submitted CDC Form 839. Enter the date of the correction in the boxes provided.
- Print an X in the “Delete” box (Box 29) when a CDC Form 839 was completed for an inmate in error and the document is to be deleted. For example, a PV-RTC was misidentified upon reception as a new commitment and a CDC Form 839 was completed instead of a CDC Form 841.

For more information on the preparation of "correction" and "deletion" documents refer to DOM §§ 61020.20.9 and 61020.20.10.

61010.11.2 Background Factors

There are two lines at the beginning of this Section that are identified as the First Arrest Date or Age and the Date of Birth.

- Enter the date of the inmate's first arrest or age at first arrest. This information may be on the CI&I, the POR, sentencing transcripts, or provided verbally by the inmate.
- Enter the birthdate found on the Legal Status Summary.

Age at First Arrest (Boxes 30-31)

Calculate the inmate's age at first arrest based on the date of the inmate's first arrest. If there is no record of arrests prior to the commitment offense, use the date that the inmate was arrested for the current commitment offense.

If there is a record of the "age" of first arrest, but no date is given, use the age given. If there is a record of the "year" of first arrest, but no date, use the age the inmate would have become during that year.

Age at First Arrest is the record of an arrest regardless of the outcome. A sustained petition or conviction is not required.

- Contact with law enforcement that is noted as "detention only" shall not be considered an arrest.

If during the interview, the inmate voluntarily indicates that he/she was first arrested at a younger age than is documented, use that information, and enter "per inmate" on the CDC Form 839. Document the inmate's statement within the ISRS.

When the Age at First Arrest is determined, drop the months and use the full year, and apply that information to the Age at First Arrest Matrix. Enter the corresponding point value in Boxes 30-31. If the value is zero, enter zero. Enter all single digit numbers in Box 31.

Age at Reception (Box 32)

Using the date of birth and the Date Received CDC, calculate the Age at Reception. When the Age at Reception is determined, drop the months and use the full year. Apply that information to the Age at Reception Matrix. Enter the corresponding point value in Box 32. This is always a single digit value. If the value is zero, enter zero.

Term in Years (Boxes 33-34)

Enter the number of years of the total term between the brackets provided on the form. The number of years is documented on the Legal Status Summary.

- A sentence of death or life without possibility of parole shall result in a maximum score of 50.
- For sentences of 25 years-to-life for murder (including conspiracy), the base term is 25 years.
- For sentences under PC § 667.7 with a term of life without parole for 20 years, the base term is 20 years.
- For all other life sentences, the base term is 15 years. This includes Third-Strike and non-murder life sentence of 25 to life.
- Any enhancements or determinant terms for other counts or offenses to be served consecutive to a life term shall be added to the base term before calculation of the term score.

Drop the months and use full years.

- Multiply the number of years by two (2) and enter this value in Boxes 33 and 34. Any single digit value is entered in Box 34.
- The maximum number of points for term in years is 50.
- If the sentence is less than one year, enter zero.

If an inmate's term changes during this incarceration, do not prepare a correction to the CDC Form 839. Prepare a CDC Form 840 and complete the Section F #4 "Change in Term Points." Term points shall be based on the inmate's total term as identified on the most current Legal Status Summary.

Street Gang/Disruptive Group (Boxes 35-38)

For the purpose of Placement Score evaluation, if available information indicates that the inmate is or has been involved with gang activity; enter six (6) points in Box 35. An inmate's housing preference alone is not indicative of gang activity. Do not assess points unless the Method of Verification Code is one of those listed. "Validation" by an IGI is not required in order to identify and document street gang/disruptive group activity for the purposes of assessing a score on the CDC Form 839.

Points are applied for involvement in street gang/disruptive group activity. Points are not assessed for prison gang membership. Unless there is a record of street gang or disruptive group activity for this inmate, you will not apply points for street gang/disruptive group activity. For example, if the inmate is a member of Nazi Low Riders and demonstrated involvement in the Nazi Low Riders disruptive group or any street gang faction prior to arrival to the CDCR, he is assessed six (6) points for involvement in street gang/disruptive group activity. Since Nazi Low Riders is also a prison gang, the inmate is

also subject to further investigation and potential validation as a member of the Nazi Low Riders prison gang.

Type of Street Gang/Disruptive Group Codes. Apply the code that most closely identifies the inmate's street gang/disruptive group. Enter the appropriate alpha codes in Boxes 36-37.

- CR Crip
- BL Blood
- NH Northern Hispanic street gang/disruptive group
- SH Southern Hispanic street gang/disruptive group
- AS Asian street gang/disruptive group
- BD Bulldogs
- WH White Supremacists, Neo Nazi, Skinheads, etc.
- BK Black street gang/disruptive group (not Crip or Blood)
- MC Outlaw Motorcycle Clubs
- OT Other street gang/disruptive group not listed

Method of Verification Code. Apply the letter code that is most indicative of the gang activity in Box 38. Use the letter code provided. Indications of street gang or disruptive group activity are:

- Self Admission.
- Tattoos and symbols. Body markings, hand signs, distinctive clothing, graffiti, etc., which have been identified by gang coordinators/investigators as being used by and distinctive to specific gangs.
- Written material. Any material or documents evidencing gang activity such as the membership or enemy lists, constitutions, organizational structures, codes, training material, etc., of specific gangs.
- Photographs. Individual or group photographs with gang connotations such as those, which include insignia, symbols, or validated gang affiliates.
- Staff information. Documentation of staff's visual or audible observations which reasonably indicate gang activity.
- Other agencies. Information evidencing gang activity provided by other agencies. Verbal information from another agency shall be documented by the staff person who receives such information, citing the source and validity of the information.
- Association. Information related to the inmate's association with gang affiliates.
- Offenses. Where the circumstances of an offense evidence gang activity, such as where the offense is between rival gangs, the victim is a verified gang affiliate or the inmate's crime partner is a verified gang affiliate.
- Legal documents. POR or court transcripts evidencing gang activity.
- Communications. Documentation of telephone conversations, mail, notes, or other communication, including coded messages evidencing gang activity.

Do not assess points for an inmate's housing preference. Housing preference alone is not indicative of street gang/disruptive group activity.

Mental Illness (Boxes 39-43)

If a CDC Form 128C, Mental Health Placement Chrono, has been prepared in the RC that indicates the inmate is a participant in the Mental Health Services Delivery System (MHSDS), except for those cases that have been designated Medical Necessity, enter four (4) points in Box 43.

If the determination is made after the CDC Form 839 has been prepared and endorsed, but prior to leaving the RC, the CDC Form 839 shall be corrected and the case referred to the CSR on a CDC Form 840 for appropriate housing.

- Determine the Level Of Care (LOC) that has been designated by the RC health care staff on the inmate's CDC Form 128C. Place an "X" in the appropriate box only if 4 points have been entered in Box 43, if not, leave the LOC box blank.
- LOC:
 - Correctional Clinical Case Management System (CCCMS) (Box 39).
 - Enhanced Outpatient Program (EOP) (Box 40).
 - Mental Health Crisis Bed (MHCB) (Box 41).
 - In-patient hospitalization at a Department of Mental Health (DMH) facility (Box 42).

Do not prepare a correction if the inmate continues in the MHSDS, but there is a change to the inmate's LOC prior to transfer from the RC.

Prior Jail or County Juvenile Sentence of 31+Days (Box 44)

These items require a review of the POR and the CI&I, CLETS, and FBI Multi State Record in order to identify prior sentences of 31 days or more. A "sentence" is imposed by the court. Incarceration time or time in custody is not considered a "sentence." Apply no more than one (1) point for each category.

- Count any sentence of 31 days or more. Do not count suspended sentences.
- Count any sentence under a delinquency petition which involves a crime rather than "status offender" placements. For example, "beyond parental control" should not be counted. Burglary, however, would be counted.
- Count CDCR placements for diagnostic evaluation (PC § 1203.03 "Z" cases) followed by a grant of probation. In these cases, the inmate is sentenced to county jail, given credit for time served, and released to probation rather than being returned directly back to the CDCR to serve a prison term.

Prior Incarceration(s) (Boxes 45 and 46)

- CYA, Juvenile State or Federal Level (Box 45)
 - Count placement in state or federal facilities for juvenile offenders.
- CDC, CRC, Adult State, or Federal Level (Box 46)
 - Count any state or federal level incarceration for adult offenders.
 - Count previous commitments to the Civil Addict program.

Total Background Factors Score

Total the number of points assessed for this Section and place the sum on the line provided.

61010.11.3 Correction to CDC Form 839 Score Sheet (Prior to Rev. 07/02) (Boxes 47-49)

The Correction to CDC Form 839 Score Sheet area is provided for the purpose of recording any corrections to a CDC Form 839 with a revision date prior to 07/02. Information shall never be recorded in this area when preparing a "New" CDC Form 839 score sheet.

This area is not to be used for changes or adjustments to term points. The Change in Term Points area on the CDC Form 840 continues to be used for all adjustments or corrections to term points.

See DOM §§ 61020.20.9 and 61020.20.10 for instructions in the correction and deletion process.

61010.11.4 Prior Incarceration Behavior (Boxes 50 through 64)

Prior Incarceration Behavior that meets the definitions below is to be recorded here. For example, behavior while in the county jail awaiting sentencing or during transportation shall be counted. Behavior while incarcerated in other correctional agencies, such as county jail, juvenile hall, federal prison, or Civil Addict commitment incarceration, which meets the criteria, shall also be counted. The behavior must have occurred prior to the inmate's Date Received CDC in order to be counted in the Prior Incarceration Behavior section of the CDC Form 839.

Last 12 Months of Incarceration (Boxes 50 through 52)

Prior Incarceration Behavior "in the last twelve months of incarceration(s)" in any correctional agency shall include the last 12 cumulative months in custody, going as far back as necessary to attain a total of 12 months, prior to the date the inmate was received in the CDCR.

- Twelve months of incarceration is also defined as 360 days.
- For ease of calculation and consistency of rule application, months are considered 30-day months.

Review the Abstract of Judgment (AOJ), CI&I, and POR to identify those periods of prior incarceration. The POR is the document of choice when information conflicts; the POR is reviewed by legal counsel and the court, and contents may be challenged in court. (See DOM § 61010.9.)

The following is a sample case for determining the inmate's "last 12 months of incarceration":

Inmate "X" was received in the CDCR on 5-7-93. She paroled on 10-1-94 and discharged on 11-18-95. She was received again in the CDCR as a new felon commitment on 2-10-03. She spent 120 days in county jail prior to her arrival in the RC.

- The "last 12 months of incarceration" begins on 2-9-03, which is the date prior to the date the inmate was received in the CDCR. She spent 120 day, or 4 months, in the county jail prior to her

arrival in the CDCR. There are 8 months left to account for. Her next period of incarceration ended on 10-1-94, the date she paroled from her previous incarceration. Therefore, beginning on 10-1-94, and counting backwards in time for 8 months, the end of the 12 month period is 2-1-94.

- Using this example, the "last 12 months of incarceration" is all incarcerated time during the period of 2-1-94 through 2-9-03.
- In the Criminal History section of the ISRS, note whether or not the inmate has been incarcerated for a period of 12 months or more.

The application of favorable points or unfavorable points is mutually exclusive. Do not enter values for both Favorable Behavior and Unfavorable Behavior in the last 12 months of incarceration.

Favorable Prior Incarceration Behavior (Box 50)

Award favorable points in Box 50 according to the following rules of application only if the inmate has had a total of twelve months or more of continuous or cumulative prior incarceration and there is no evidence or documentation of serious disciplinary behavior for which the inmate was found guilty.

If an inmate has been incarcerated for less than 12 months, but there is no evidence or documentation of serious disciplinary behavior for which the inmate was found guilty, leave Box 50 blank.

The information to be used to evaluate the inmate's behavior may be obtained from prison institution records, DJJ/CYA ward files, CDCR archives, serious disciplinarys (CDC Form 115) and similar documents from other correctional agencies. The POR and CI&I shall also be reviewed for any indication of disciplinary problems or positive behavior while incarcerated.

Unfavorable Prior Incarceration Behavior (Boxes 51-52)

When recording Unfavorable Prior Behavior, the documentation shall establish that the inmate was determined to be guilty of conduct described as a serious disciplinary in the CCR § 3315 within the last 12 months of incarceration. Such behavior may be documented by means other than a CDC Form 115. For example, an assault on another inmate in jail or distribution of any controlled substance in jail may be documented by a report from the sheriff. If the disciplinary problem occurred in the CDCR, it will have been documented on a CDC Form 115.

- Enter the date of each occurrence that is counted as a serious disciplinary in last 12 months of incarceration in the space provided.
- Count the number of serious disciplinarys, or their equivalent, for which the inmate was found or pleaded guilty occurring within the last 12 months of incarceration, multiply by four (4) points and enter the total in Boxes 51-52.
- The maximum number of points that can be assessed for Unfavorable Behavior during the last 12 months of incarceration is 99.

Negative behaviors occurring after the Date Received CDC and during RC processing shall be documented on a CDC Form 840. If a new felon inmate is found guilty of a serious rule violation during reception processing, the behavior shall be documented on a CDC Form 840, not on the CDC Form 839. The CSR shall then endorse the inmate's initial placement on the CDC Form 840. In these cases, the CDC Form 839 shall require no CSR action.

Serious Disciplinary History (Boxes 53-64)

A single disciplinary problem that occurred in the last 12 months of incarceration and recorded in D,1,b, may also result in the assessment of points in more than one category under D,2, Serious Disciplinary History. For example, if within the inmate's last 12 months of incarceration, the inmate incited a disturbance during which he assaulted another inmate, he shall be assessed points as follows:

- Four (4) points for Unfavorable Prior Incarceration Behavior (Boxes 51-52).
- Four (4) points for a Battery on an Inmate (Boxes 55-56).
- Four (4) points for Inciting a Disturbance (Boxes 61-62).

In addition to considering the content of serious disciplinary behavior that occurred within the last 12 months of incarceration, review all serious disciplinary behavior for which the inmate was found guilty and record that behavior which occurred during any prior incarceration if they meet the definitions below. In other words, the serious disciplinary behavior noted below shall be counted even if it occurred outside of the last 12 months of incarceration. Enter the date of every occurrence that is being counted in the space provided under each item. The maximum number of points that can be assessed for each category is 99.

Battery or Attempted Battery on a Non-prisoner (Boxes 53-54)

- Include any well-documented battery or attempted battery on a non-prisoner, which occurred during any prior incarceration. Do not restrict to the last twelve months in custody.
- Count the number, multiply by eight and enter in Boxes 53-54.

Battery or Attempted Battery on an Inmate (Boxes 55-56)

- Include any well-documented battery or attempted battery on an inmate, which occurred during any prior incarceration. Do not restrict to the last twelve months in custody.
- Do not include mutual combat where both inmates were co-responsible.
- Include situations where one or more inmates is clearly the victim. Usually results in some injury that may involve a group attack or some type of weapon.
- Count the number, multiply by four (4) and enter in Boxes 55-56.

Distribution of Drugs (Boxes 57-58)

- Include any distribution/trafficking of any controlled substance that occurred during any prior incarceration. Do not restrict to the last twelve months in custody.
- This refers to inmates who are involved in an operation to smuggle drugs into a jail or an institution or facility for distribution and sales.
- Do not count a disciplinary determination in which the inmate was found or pled guilty to possessing a small quantity of drugs.
- Count the number, multiply by four (4) and enter in Boxes 57-58.

Possession of a Deadly Weapon (Double-Weight if Within the Last 5 Years) (Boxes 59-60)

- Include only well-documented incidences of manufacturing or possessing a deadly weapon where apparent use was intended, which occurred during any prior incarceration. Do not restrict to the last twelve months in custody.
- Except as noted below, do not include possession of commonly available and unmodified objects unless they are used as weapons and this fact is documented in a disciplinary hearing process. For example, hobby craft tools, common shop tools, and baseball bats are not considered deadly weapons unless their use, or intent for use, as such is clear.
- Include possession of a razor blade (whether it has been modified or not) in a segregated program housing unit (e.g. Ad Seg Unit, Security Housing Unit [SHU], Psychiatric Services Unit).
- If the incident was within the past five years (60 months) of the reception date, it shall be weighted double by giving eight points. Indicate the date of the incident under the item.
- Count the number, multiply by four (4) or eight (8) and enter in Boxes 59-60.

Inciting a Disturbance (Boxes 61-62)

- Include any inciting a disturbance that occurred during any prior incarceration. Do not restrict to the last twelve months in custody.
- Typically, this involves a leadership role in an institution riot, racial disturbance, or work strike.
- Include any willful and deliberate behavior which might lead to violence or disorder, and any willful attempt to incite others, either verbally or in writing, or by other deliberate action to use force or violence upon another person of the type described in CCR § 3005.
- Count the number, multiply by four (4) and enter in Boxes 61-62.

Battery Causing Serious Injury (Includes Conspiracy) (Boxes 63-64)

- Include any battery that caused serious injury that occurred during any prior incarceration. Do not restrict to the last twelve months in custody. Serious injury is defined in CCR § 3000.
- Include an inmate who conspired in, or ordered such a battery.
- Count the number, multiply by sixteen (16) and enter in Boxes 63-64.

Total Prior Incarceration Behavior Score

If points were assessed for Unfavorable Prior Incarceration Behavior and/or Serious Disciplinary History, combine the total and subtract the Total Favorable Points if any. Enter the result in the space provided for Total Prior Incarceration Behavior Score. Indicate whether this total is a plus or minus value. For example, if there are no points assessed for serious disciplinary behavior, but there are four favorable points for no serious disciplinary during the last twelve months of incarceration, the total is minus 4 (-4).

If points were neither added nor subtracted, enter a zero on the line provided for Total Prior Incarceration Behavior Score.

It is possible for an inmate to be awarded four favorable points in Box 50 for no serious disciplinary in the last 12 months of incarceration, but also be assessed points for serious disciplinary history in Boxes 53 through 64 that occurred outside of the last 12 months of incarceration.

61010.11.5 Placement

Preliminary Score (Boxes 65-67)

This is the Total Background Factors Score and Total Prior Incarceration Behavior Score combined.

Right-hand justify the total score. Enter the results of this computation in Boxes 65-67. Any empty boxes are to appear on the left.

If the computation results in a negative value or zero value, enter zero for the score. The maximum Preliminary Score is 999.

Mandatory Minimum Score Factor

A Mandatory Minimum Score Factor is a case factor that requires the application of a Mandatory Minimum Score.

Mandatory Minimum Score Factor Code (Box 68)

A Mandatory Minimum Score Factor Code is an alpha code associated with a Mandatory Minimum Score Factor.

- If an inmate has a case factor that requires the application of a Mandatory Minimum Score Factor Code, enter the applicable code in Box 68. If more than one Mandatory Minimum Score Factor Code applies, enter the code that appears first on the list.
- Document the RC justification for applying a Mandatory Minimum Score Factor Code in the CDC Form 816 or ISRS, as applicable. When the Mandatory Minimum Score Factor is applied other than in the RC, justify application in a CDC Form 128-G.
- If eligibility for a Mandatory Minimum Score Factor Code requires further consideration, refer to DOM § 61020.19.7.
- Absent overriding security or safety considerations, inmates pending case-by-case evaluation to determine eligibility for a Mandatory Minimum Score Factor Code shall not be transferred, except from the RC, until the application of a Mandatory Minimum Score Factor Code is resolved.
- Determine if one or more of the case factors listed below apply to the inmate. If no factors apply, proceed to the instructions for Placement Score.
- Prepare a new CDC Form 840 score sheet to record a change in or removal of a Mandatory Minimum Score Factor Code.

Mandatory Minimum Score Factor Code and Scores:

CODE	FACTOR	SCORE
[A]	Condemned	52
[B]	Life Without Possibility of Parole	52
[C]	CCR 3375.2(a) (7) Life Inmate	28
[D]	History of Escape	19
[E]	Warrants "R" Suffix	19
[F]	Violence Exclusion	19
[G]	Public Interest Case	19
[H]	Other Life Sentence	19

Specific Criteria for Applying Mandatory Minimum Score Factor Codes:

- A. **Condemned.** Apply Mandatory Minimum Score Factor Code A to inmates sentenced to Death.
- B. **Life Without Possibility of Parole.** Apply Mandatory Minimum Score Factor Code B to inmates sentenced to Life Without the Possibility of Parole (LWOP).
- C. **CCR 3375.2(a)(7) Life Inmate.** Apply Mandatory Minimum Score Factor Code C to life-term inmates who are excluded from placement in Levels I or II based on any of the following factors per CCR § 3375.2(a)(7):
 - The commitment offense involved multiple murders, unusual violence or execution-type murders, or received high notoriety. Each of these factors is defined in CCR § 3000.
 - The inmate has a history of multiple walkaways, an escape from a secure perimeter, or an escape with force or threat of force.
 - A classification committee shall determine the application of Mandatory Minimum Score Factor Code C. The Unit Classification Committee (UCC) shall refer more complex cases to the Institutional Classification Committee (ICC) as needed.
 - Justification in the CDC Form 128-G shall address the specific element(s) of the inmate's commitment offense that substantiates

the application of Mandatory Minimum Score Factor Code C, which precludes Level II placement, as opposed to Mandatory Minimum Score Factor Code F or Mandatory Minimum Score Factor Code H.

- **D. History of Escape.** Apply Mandatory Minimum Score Factor Code D for those case factors listed below. This code is not to be used to assess risk factors for escape involving any other offenses, i.e. the sale or possession of large quantities of narcotics.
 - Apply to an inmate with any history of escape from within a secure perimeter or attempted escape from within a secure perimeter whether or not force was used. This inmate is permanently excluded from minimum custody placement.
 - Apply to an inmate who has a conviction for, or whose commitment offense includes, Escape with Force or Attempted Escape with Force from any correctional setting or armed escort. This inmate is permanently excluded from minimum custody placement.
 - Apply to an inmate who verbalizes that he or she is going to escape, and/or states he or she does not wish Minimum Support Facility (MSF) placement because he or she will be tempted to escape/walkaway. The inmate is permanently excluded from minimum custody/MSF/camp placement.
 - When applying the ten-year exclusion criteria in reference to the following escapes or walkaways, use the date of conviction. If the escape did not result in a conviction, use the date of apprehension. In a case where there is no escape conviction and the date of apprehension is unknown, use the date of the escape or attempted escape or walkaway.
 - Apply to an inmate who has a history of (one or more) walkaways without force from a nonsecure perimeter facility setting (such as camp, MSF, county road camp, etc.). The inmate is ineligible for minimum custody placement, camp, or MSF for ten years.
 - Apply to an inmate with a pattern of (two or more) walkaways from CCRC within the last 10 years. These inmates are excluded from minimum custody for 10 years.
 - Apply to an inmate who has a walkaway from CCRC that resulted in a court conviction for escape within the last ten years. The inmate is ineligible for minimum custody for 10 years.
- **E. Warrants "R" Suffix.** Apply Mandatory Minimum Score Factor Code E when the "R" suffix has been affixed to the inmate's custody. Criteria for the "R" suffix is provided in CCR § 3377.1 and DOM § 62010.4.3.1. Do not apply Mandatory Minimum Score Factor Code E for a case pending an evaluation.
- **F. Violence Exclusion.** Apply Mandatory Minimum Score Factor Code F when an inmate has a current or prior conviction for a violent felony or a sustained juvenile adjudication including, but not limited to, those listed under PC § 667.5(c) that does not require "case-by-case" consideration.
 - A sustained juvenile adjudication is a guilty determination or ruling rendered in a juvenile judicial proceeding.
 - In addition, the following administrative determinations regarding an allegation of a violent act including, but not limited to, those offenses described in Penal Code § 667.5(c), shall have the same force and effect as a current or prior conviction for a violent felony or a sustained juvenile adjudication:
 - Board of Parole Hearings (BPH) or Parole Hearings Division good cause finding or,
 - California Youth Authority/Youthful Offender Parole Board sustained allegation or,
 - A probation violation finding in a court of law.
 - Do not apply the Mandatory Minimum Score Factor Code F pending case-by-case evaluation.
- **G. Public Interest Case.** Apply Mandatory Minimum Score Factor Code G when a CSR determines that the inmate is a Public Interest Case as defined in CCR § 3000, CCR § 3375.2(b)(20) and DOM § 62010.4.3.3. Staff shall refer potential public interest cases to a CSR for determination and endorsement, if applicable, as a public interest case.
- **H. Other Life Sentence.** Apply Mandatory Minimum Score Factor Code H for an inmate serving a current life sentence commitment whose case factors are not already addressed by another Mandatory Minimum Score Factor. This inmate is excluded from placement in a

minimum custody setting until a release date is granted by the BPH. The granting of a release date by the BPH does not result in the removal of Mandatory Minimum Score Factor Code H.

Mandatory Minimum Score (Boxes 69-70)

A Mandatory Minimum Score is a numerical value identifying the least restrictive security level for an inmate who has a case factor that requires he/she be housed no lower than a specific security level.

When the Mandatory Minimum Score Factor Code is applied, enter the corresponding point value in the field labeled Mandatory Minimum Score, Boxes 69-70.

If more than one factor applies, enter the code in Box 68 that appears first on the list and enter the corresponding numeric value in Boxes 69-70.

Placement Score (71-73)

If a Mandatory Minimum Score Factor Code has not been applied, enter the Preliminary Score as the Placement Score.

If a Mandatory Minimum Score has been applied, enter the Mandatory Minimum Score or the Preliminary Score whichever is greater.

The Placement Score is one of the factors used to determine the security level to which the inmate is assigned.

61010.11.6 Special Case Factors

This provides the opportunity to alert classification staff of special concerns, which should be considered in placement or program assignment.

Hold, Detainers, and Warrants (Boxes 74-75)

Review all relevant documents and the "Detainers" section of the C-file for holds. This item requires careful evaluation regarding the seriousness of the hold and the likelihood that the jurisdiction will exercise the hold at the end of the sentence. The importance of the hold for classification is the extent to which the prospect of an additional term to serve may motivate the inmate to attempt escape.

- Holds, Detainers, and Warrants for felony charges or USINS are coded "P" for potential or "A" for actual.
- Code only those holds which are likely to result in an additional prison sentence or deportation. Exclude simple holds for probation or parole violation where the commitment offense is the basis for the violation.

Restricted Custody Suffix (Box 76)

Enter an "R" if a restricted custody suffix needs to be applied by the receiving institution pursuant to DOM § 62010.

Current Institution and Facility (Boxes 77-83)

Beginning with the first box, enter the letters that abbreviate the name of the RC. RC refers to the facility where the case is presented to a CSR or Correctional Counselor (CC) III for initial placement. Inmates may go through an RC, but actually be processed at an institution. Also, out-of-state inmates may be delivered directly to an institution. In such cases, enter the abbreviation for the institution where the processing takes place. Refer to DOM § 61020.19.8 for abbreviations.

Eligible for Restitution Center (Box 84)

The Restitution Center program allows inmates who meet program criteria to work in the community and repay their victims for monetary losses. Inmates are eligible for placement in the Restitution Center program pursuant to PC § 6228. Inmates are eligible for placement consideration if they meet the following criteria:

- Have agreed or been ordered by the court to make financial restitution to a crime victim.
- Have not served a prison term within the five years prior to the present conviction.
- Do not have a criminal history of a conviction for the sale of controlled substance.
- Do not have a criminal history of a conviction for a crime involving violence or sex.
- Received a sentence of 36 months or less.
- Present no unacceptable risk to the community.
- Are employable.

Inmates from any county are eligible for placement if they meet the criteria.

A court ordered restitution to the victim, whether payable to the court, directly to the victim, or in any other manner, qualifies an inmate to participate. A restitution fine constitutes financial restitution to a crime victim; therefore, a restitution fine meets the criteria for Restitution Center placement.

There are no medical staff assigned to the Restitution Center. However, an inmate who is otherwise eligible for placement in a restitution center who requires regular monitoring/intervention by medical personnel may be considered if he or she is medically cleared on a case-by-case basis.

In Box 84, enter "Y" for "yes" if the inmate is eligible or enter "N" for "no" if the inmate is ineligible. This is a one-time entry for the duration of the inmate's CDC number unless the inmate's eligibility changes from "Y" to "N."

Level IV Design (Item F.5.)

180 Status. If a male inmate has a Level IV Placement Score, the counselor shall make a determination regarding the exclusion of the inmate from a Level IV 270-design institution. If the inmate meets the guidelines for exclusion from a Level IV 270-design prison, the counselor shall place the capital letter "Y" on the line provided.

If the male inmate has a Level IV Placement Score, but does not meet the guidelines for exclusion from a Level IV 270-design institution, the counselor shall enter an "N" on the line provided.

Reason Code. If a "Y" has been entered on the "180 Status" line provided, the counselor shall then enter the "Reason" code on the line provided that describes the reason for exclusion from a Level IV 270-design institution based on the established guidelines noted below.

Reason Codes are consistent with the Group A and Group B reasons outlined below. For example, an inmate who is excluded from placement in a Level IV 270-design institution because he is a street gang member, has two or more prior offenses listed in PC § 667.5(c), and has been in the CDCR for less than three (3) years at the time of review, "B3" would be entered as the Reason Code.

GROUP A

Any single factor is exclusionary and prevents placement in a Level IV 270-design prison:

- 1) SHU placement during the last three (3) years of incarceration.
 - SHU terms suspended upon initial review by ICC do not count.
- 2) Disciplinary CDC Form 115 for a Division A-1, A-2, or B offense in the last three years of incarceration.
 - Excluding Possession of Narcotics.
- 3) Validated Member or Associate of a Prison Gang.
 - If the inmate was housed in General Population (GP) during the last three (3) years of incarceration, he may be housed in a 180-design or a 270-design facility.
- 4) Disciplinary CDC Form 115 for Riot (Rout) or for Inciting a Riot in the last three (3) years of incarceration.

GROUP B

These factors must be applied together. There must be some evidence of street gang membership or association and one or more of the additional elements numbered 1 through 6 below. Exclusion for these factors will be for whichever comes first, three years or until the Placement Score is adjusted to Level III or below.

- 1) Disciplinary CDC Form 115 for Assaultive Behavior within the last three years of incarceration.
 - Exclude mutual combat.
- 2) Commitment offense where street gang activity was directly involved.
- 3) Two or more prior offenses listed in PC § 667.5(c).
- 4) Committed under PC § 667.5(e)(2) (Three Strikes Law).
- 5) Committed for Life Without Parole.
- 6) Determinate sentence of 50 years or more.

US Armed Forces (Box 85)

Enter a "Y" if the inmate answers "Yes" to the following question: "Have you ever been a member of the US Armed Forces and were you honorably discharged?" If the inmate answers "No" enter "N." After a response has been documented on the CDC Form 839, CDC Form 840, or CDC Form 841, it is not necessary to address the issue again.

Caseworker Name (Boxes 86-94)

The counselor shall print his or her last name and first initial in capital block letters, in the boxes, indicating that the CDC Form 839 is accurate and complete.

61010.11.7 CSR Action

This Section is to be completed only by a CSR or a staff member specifically authorized to act in that capacity.

Inmates who are found guilty of a serious disciplinary while undergoing RC processing shall have that behavior recorded on a CDC Form 840 and not on

a CDC Form 839. The endorsement shall then occur on the CDC Form 840. No endorsement is required on the CDC Form 839 in these cases.

Last Name (Boxes 95-102)

The CSR shall print the first eight letters of his or her last name in CAPITAL BLOCK letters in the boxes provided.

Date of Action (Boxes 103-108)

Enter the number of the month, day, and last two digits of the year in which the action is taken.

Level IV Design (Boxes 109-111)

180 Status. If a male inmate has a Level IV Placement Score, the CSR shall make a determination regarding the exclusion of the inmate from a Level IV 270-design institution. If a male inmate meets the guidelines for exclusion from a Level IV 270-design prison, the CSR shall print the capital letter "Y" in Box 109.

Reason Code. If a "Y" has been entered in Box 109, the CSR shall print the reason code in Boxes 110-111 that describes the reason 270-design institution based on the established guidelines. Refer to DOM § 61010.11.6, Special Case Factors for Reason Codes.

- The counselor's evaluation regarding a male inmate's exclusion from a Level IV 270-design institution will be recorded in the Special Case Factors area of the score sheet.

Minimum Custody (Boxes 112-115)

Eligibility. The CSR shall print the letter "E," "L," or "P" in Box 112, consistent with the findings recorded on the Minimum Custody Screening Form. Print the letter "E" in Box 112 to document that the inmate is eligible for minimum custody. Print the letter "L" in Box 112 to document that the inmate is temporarily ineligible for minimum custody. Print the letter "P" in Box 112 to document that the inmate is permanently ineligible for minimum custody.

Reason Code. Print the code in Boxes 113-115 to identify the reason the inmate is either temporarily or permanently ineligible for minimum custody, for example, VIO, ESC, HOL, etc. If the inmate is eligible for minimum custody, print an "E" in the Minimum Custody Eligibility Box 112. Do not enter a reason code.

If an inmate is permanently excluded from Camp due to Arson, but is otherwise eligible for minimum custody in an MSF, enter "P" in Box 112 and enter ARS for Arson in Boxes 113-115 to ensure that inmate is not placed in a Camp.

CCRC Eligibility (Boxes 116-118)

The CSR shall enter the appropriate code for reentry eligibility.

- Print the letters REN in Boxes 116-118 if the inmate is eligible and wants to participate in CCRC.
- Print the letters REX in Boxes 116-118 if the inmate is eligible but does not want to participate in CCRC.

If the inmate is ineligible for CCRC placement, leave Boxes 116-118 blank.

Developmental Disability Program (DDP) Code (Boxes 119-121)

The Developmental Disability Program evaluation is recorded on a CDC Form 128-C2. The CSR shall print the most recent DDP code in the Boxes 119-121. The DDP code is the designation assigned by clinical staff.

Disability Placement Program (DPP) Code (Boxes 122-133)

The CSR shall make every effort to endorse a case that is identified as DPP on the CDC Form 1845, Inmate/Parolee Disability Verification, (Section C), to an appropriate institution.

The first three boxes are to be used for the impacting DPP code that most affects the inmate's placement. The CSR shall print the appropriate DPP code in Boxes 122-124. If there are additional codes that affect placement, enter those codes in Boxes 125-133.

The CSR shall print the non-impacting DPP codes assigned to the inmate in Boxes 125-133.

The C&PR or the RC-CCIII has the authority to code the DPP designation of inmates who have only non-impacting physical disabilities as identified in Section D of the CDC Form 1845. The C&PR or RC-CCIII shall print the non-impacting DPP code(s) in Boxes 125-133.

Administrative Determinants (Boxes 134-148)

An inmate whose Placement Score falls within one of the following ranges shall be placed in an institution, which is designated at the security level indicated, unless a reason for administrative or irregular placement is specified:

Placement Score	Security Level
0-18	I
19-27	II
28-51	III
52+	IV

Appropriate inmate placement is determined by both Placement Score and consideration of unusual or special case factors. Some case factors affect placement because of administrative policy requirements, commonly referred to as "administrative determinants." Placements based on these case factors, in a facility that does not correspond to the inmate's Placement Score, are "administrative placements."

Space is provided to record up to five administrative determinants. Enter applicable administrative determinants. An administrative determinant identifies both temporary and permanent case factors and alerts staff to safety and security considerations which may limit the inmate's eligibility for placement.

If there are not enough boxes to identify all applicable administrative determinants, give priority to those most related to security and safety.

Record those determinants, which are supported by documentation using the administrative determinant codes provided. If an administrative determinant code has already been entered as a Minimum Custody Reason Code (Boxes 113-115), it is not necessary to repeat that code here.

For example, if the inmate has an active felony hold, mental health concerns, medical concerns, and a possible restricted "R" custody, enter the applicable administrative determinants. Unless the medical condition is driving placement, the mental health diagnosis is the primary concern. Enter HOL for the Hold if the hold is active, is either a felony or a USINS hold, and supporting documentation for the hold is in the file. The "R" suffix is not entered pending evaluation. The CSR would therefore enter:

a) b) c)

P	S	Y	M	E	D	H	O	L
---	---	---	---	---	---	---	---	---

The following codes are the Administrative Determinant codes:

- **AGE.** Inmate's youthfulness, immaturity, or advanced age should be given strong consideration in placement or program decisions.
- **ARSON.** Current or prior conviction or a sustained juvenile adjudication as defined in CCR § 3375.2(b)(25) or good cause finding ruling rendered in a BPH or Parole Hearings Division proceeding, a sustained allegation in DJJ/CYA or Youthful Offender Parole Board proceeding or a probation violation finding in a court of law for arson, which limits where the inmate may be placed.
- **BEHAVIOR.** Inmate's behavior record indicates he or she is capable of successful placement at an institution security level lower than that indicated by the inmate's Placement Score. Not to be used if the inmate is housed at a security level higher than the inmate's Placement Score.
- **CAMP.** Placement due to a shortage of camp qualified inmates. Enter CAM to identify an inmate who is eligible or potentially eligible for camp placement.
- **DEATH sentence.** Inmate was formerly on death row or currently is sentenced to death.
- **DEPARTMENTAL review board.** Special placement ordered by the Departmental Review Board.
- **DISCIPLINARY history.** Inmate's disciplinary record indicates a history of serious problems or threatens the security of the facility.
- **ENEMIES.** One or more persons under the jurisdiction of the CDCR has been documented on a CDC Form 812 or 812-C as an enemy. his should also be used when victimization is very probable due to case factors, such as where the nature of the offense will very likely create an enemy situation at certain institutions. Includes current Protective Housing Unit cases and those who are natural victims because of their appearance or commitment offense.
- **ESCAPE potential.** Unusual circumstances suggest the inmate is a much greater escape risk than indicated by his or her Placement Score. For example, the inmate verbalized intent to escape.
- **FAMILY ties.** Inmate has strong family ties to a particular area where other placement would cause an unusual hardship.

- **GANG involvement or affiliation.** Documentation establishes that the inmate's gang association requires special attention or placement consideration.
- **HOLD, warrant, or detainer likely to be exercised.** For purposes of justifying a need for irregular placement based on a hold, the hold is to be active, be either a felony hold or USINS hold, and substantiating documentation must be located in the C-File.
- **INACTIVE.** Documentation establishes that the inmate's inactive gang status requires special attention or placement consideration.
- **LIFE sentence.** Apply LIF to identify an inmate serving a life sentence or life sentences.
- **MEDICAL.** The inmate's medical condition requires treatment or continuing medical attention not generally available at all facilities.
- **OUT-to-court.** Inmate needs to be housed in a particular facility in order to be close to a court jurisdiction where the inmate is required to testify in court or is being prosecuted. Includes situations where involvement in a court trial is anticipated because a disciplinary has been referred to the district attorney. Also, use this designation when a BPH appearance is imminent.
- **POPULATION pressures.** Shall be used by a CSR only. No beds presently exist at an institution with a security level indicated by the inmate's Placement Score.
- **PRE-release.** The short time remaining to serve limits or otherwise influences placement or program options. This factor shall also be used when a release date is so close that transfer or starting a long-term program is not warranted and when a short release date warrants special placement or program consideration.
- **PSYCHIATRIC.** A mental condition requires special treatment or may severely limit placement options. Includes Category B. Apply PSY to justify the administrative placement of an inmate who requires designated housing in accordance with an impacting DDP code.
- **PUBLIC interest case.** High notoriety of an inmate has caused public interest in the case and requires exceptional placement.
- **SCHOOL.** Inmate is involved in an academic program which is not available at an institution security level consistent with the inmate's Placement Score. Apply SCH to identify an inmate currently participating in a Substance Abuse Program who is being retained out of level to complete the Substance Abuse Program.
- **SEX.** Inmate has a prior incidence of rape, oral copulation, sodomy, or a lewd and lascivious act which requires restricted custody or placement.
- **SOR.** Sexual orientation. Inmate's bisexual or homosexual orientation may require special placement.
- **TIME to serve.** Inmate's time to serve is long, requiring placement at a facility with a security level higher than that indicated by the inmate's Placement Score.
- **VIOLENCE.** Inmate has a current or prior conviction for a violent felony, or a sustained juvenile adjudication including, but not limited to, those listed under PC § 667.5(c), which, as determined by the CSR, requires placement in a facility with a higher security level than that indicated by the inmate's Placement Score.
 - A sustained juvenile adjudication means a guilty determination or ruling rendered in a juvenile judicial proceeding.
 - In addition, the following administrative determinations regarding allegations of violent acts including, but not limited to, those offenses described in PC § 667.5(c), shall have the same force and effect as a current or prior conviction for a violent felony or a sustained juvenile adjudication:
 - Board of Parole Hearings or Parole Hearings Division good cause finding, or
 - DJJ/CYA/Youthful Offender Parole Board sustained allegation, or
 - A probation violation finding in a court of law.
- **VOCATIONAL training.** Inmate is involved in a vocational program which is not available at a facility with a security level which is consistent with the inmate's Placement Score.
- **WORK skills.** Inmate has a work skill in a critical trade for which special placement consideration may be warranted. This should also be used to request or approve work crew placements.

Mental Health Level of Care (LOC) (Box 149)

The CSR shall enter a "C" for CCCMS or an "E" for EOP in Box 149 to identify the inmate's mental health LOC only at the time of endorsement.

Institution Approved (Boxes 150-156)

Print the first two, three, or four initials of the institution or facility name in Boxes 150-153. Print the security level, subfacility designation, or program in Boxes 154-156. Enter only one letter or number in each box. Empty boxes should be to the right.

For example, Sierra Conservation Center, Level I is recorded as:

S	C	C		I			
---	---	---	--	---	--	--	--

CSP, San Quentin, Level II is recorded as:

S	Q			I	I		
---	---	--	--	---	---	--	--

California Institution for Men, Minimum is recorded as:

C	I	M		I			
---	---	---	--	---	--	--	--

North Kern State Prison, Level III is recorded as:

N	K	S	P	I	I	I	
---	---	---	---	---	---	---	--

Endorsement to the Restitution Center is recorded as:

L	A			C	C	C	
---	---	--	--	---	---	---	--

Reason for Administrative or Irregular Placement (Boxes 157-159)

The CSR or authorized staff completes this item only if the security level approved is not commensurate with the inmate's Placement Score. If the level does not correspond, the CSR or authorized staff shall enter the reason for the administrative or irregular placement using the appropriate administrative determinant code to justify placement.

Some case factors affect placement because of administrative policy requirements. Policy-determined factors are "administrative determinants" and placements in a facility based on these, which do not correspond to the inmate's Placement Score, are "administrative placements."

There are also special case factors that, while not governed by policy, influence placement by determining program priorities. For example, the inmate's score level is reduced, but he or she is retained in a higher security level to complete academic or vocational train or to fill a skilled worker position or the population is such that no suitable bed at the inmate's security level is immediately available. When placement occurs under such circumstances, it shall be recorded as an "irregular" placement.

61010.12 RC Transfer Disagreements

If the RC's Associate Warden disagrees with the CSR's action, the inmate shall be retained at the RC while the case is presented to another CSR. If a second CSR does not resolve the issue, the Chief, Classification Services Unit, shall be contacted for a decision.

61010.13 CSR Special Transfer Review

RC cases determined to require security housing placement shall be presented for routine CSR review.

61010.14 CSR Review of Transfer Delays

If an inmate is not transferred within 120 days from the date of CSR endorsement, the endorsed case awaiting transfer shall be presented to the CSR prior to the 121st day for an additional 120-day extension upon written documentation confirming that there is no change to case factors and that endorsement remains appropriate.

A subsequent 120-day extension shall require the CCI and the CCII Supervisor to audit the central file. The CCI and CCII shall complete a formatted CDC Form 128-G, Classification Chrono.

The request for a 120-day extension of a CSR endorsement shall not require a classification committee action unless case factors have changed or other information is identified, which renders the CSR endorsement to be no longer appropriate.

An endorsed case awaiting transfer may be extended no more than twice beyond the initial 120-day period.

61010.15 Processing of Inmates into Community Correctional Facilities (CCF)

The efficient and timely processing of inmates into CCFs requires the sharing of information, cooperation, and coordination among the staff of

CDCR institutions, transportation, and non-State private vendors. Parole Violators Returned to Custody are eligible to be processed via the Detention Processing Unit to a Community Correctional Facility.

Institutions' Function/Responsibility

Inmates shall be processed from RC and program institutions. The sending institution shall screen and approve inmate placement in CCFs per established placement criteria.

Documents to be Forwarded

Institutional records' staff shall prepare the CDC Form 135, Inmate Transfer Record, and copies of Central File (C-file) documents per CDC Form 1740, Community Correctional Facilities Field File Checklist, to accompany the inmate.

Institution records' staff shall update Offender Based Information System (OBIS).

Institution records' staff shall forward the C-file the day after the inmate is transferred, to the CCF records office.

Institution staff shall coordinate with the appropriate regional transportation unit regarding the number of inmates to be transferred and to schedule their movement.

Regional Transportation Unit Responsibilities

Regional transportation staff shall coordinate with the CC III/Classification & Parole Representative (C&PR) and facility staff to ensure the timely movement of inmates to and from CCF. All incoming movement is coordinated with the Division of Adult Institutions and then disseminated to the Regional Hubs with pick-up dates and number of inmates.

CCF Responsibilities

Coordinate with regional transportation units and institution CC-III/C&PR to ensure timely movement of inmates.

The receiving facility staff shall ensure a signed SOMS - Notification in Case of Inmate Death, Serious Injury, or Serious Illness, and a release of information is obtained from each inmate at the intake interview.

The facility staff shall ensure existing guidelines are followed for the return of inmates who are, or become, unacceptable for their program.

61010.16 Endorsement of Cases Paroled from RCs

All inmates who are delivered to a reception center to serve a term in the CDCR shall receive an endorsement from a CSR or other staff member specifically authorized to act in that capacity. This requirement is not waived for inmates who parole from RCs. This endorsement is required by departmental data systems and shall be obtained for every inmate received by the CDCR. This does not apply to "paper commitments" (inmates who are committed to the CDCR but are not delivered to the RC).

The CSR shall enter the date of endorsement and enter the institution abbreviation followed by the letters "RC"; e.g. "NKSP-RC" with an irregular placement reason of "PRE." The endorsement may be completed by an RC CCIII in the absence of a CSR.

61010.17 Revisions

The Director, Division of Adult Institutions, or designee shall ensure that the content of this Section is current and accurate.

61010.18 References

PC §§ 1203 and 2930.
CCR (15) §§ 3000 and 3375.

ARTICLE 2 — CASE CONSIDERATIONS

Revised July 26, 2004

61020.1 Policy

Inmates received by the California Department of Corrections and Rehabilitation (CDCR) shall be evaluated on an ongoing basis, and significant case information shall be documented in the central file (C-file).

61020.2 Purpose

This Section establishes standard procedures and guidelines for the orderly acceptance and documentation of significant case information necessary for the transfer and safety of inmates. It includes methods to update inmate classification scores and the proper documentation of critical and confidential information.

61020.3 CDC Forms 812, 812-A, 812-B, and 812-C

Any information regarding an inmate/parolee which is or may be critical to the safety of persons inside or outside an institution shall be documented as required below on a CDC Form 812, Notice of Critical Case Information--Safety of Persons (Nonconfidential Enemies); a CDC Form 812-A, Notice of

Critical Information--Prison Gangs Identification; CDC Form 812-B, Notice of Critical Information--Disruptive Group Identification; and CDC Form 812-C, Notice of Critical Information--Confidential Enemies. The purpose of these forms is to alert staff to safety/security concerns and/or information regarding an inmate/parolee that may be critical to his/her placement. CDC Forms 812, 812-A, 812-B, and 812-C and all documents referred to on the forms shall be filed in the C-file of each identified inmate/parolee. These forms, as applicable, and all supporting documents shall be reviewed and considered in the transfer, placement, and case supervision of any inmate/parolee. Any confidential material affecting the critical case factors of an inmate/parolee shall conform to the provisions of CCR § 3321. Entries on these forms must be supported by detailed documentation required elsewhere in the C-file. The reverse sides of these forms shall not be written on.

61020.3.1 Reception Center (RC) Initiation of CDC Forms 812 and 812-C

RC staff shall complete CDC Forms 812 and 812-C (if applicable) for each newly committed or returned inmate and place it in the inmate's C-file before referral to the Classification Staff Representative (CSR) or before the inmate's release to parole, discharge, or another jurisdiction.

61020.3.2 Institution Update of CDC Forms 812 and 812-C

Counseling staff shall update the CDC Forms 812 and 812-C (if applicable) as any critical information becomes known and is documented in the inmate's C-file and within 30 days of transfer. The CSR shall not take any action on transfers unless the CDC Forms 812 and 812-C (if applicable) or updates are within 30 days. When updates can no longer be accomplished on a current form due to lack of available entry space, staff shall prepare new CDC Forms 812 and 812-C (if applicable) to update the previous information and use the OBIS to verify all enemy locations.

Upon verification of a previously undocumented enemy, where that enemy is located at another institution, facility, or parole region, the assigned Correctional Counselor (CC) I shall, within five working days of receiving the documentation related to the enemy situation, complete a CDC Form 812X, Enemy Information Transmittal, and forward the form with supporting documentation to the institution's Classification & Parole Representative (C&PR) or RC-CCIII. Within five working days of receiving the forms, the C&PR or RC-CCIII shall ensure that the green copy is placed in the C-file of the identified enemy and forward the white and yellow copies of the CDC Form 812X and supporting documentation to the C&PR or RC-CCIII at the institution or facility or the Case Records Administrator in Parole Case Records North/South where the identified enemy is located. For those CDC Form 812Xs being sent to the Case Records Administrator in Parole Case Records, the CDC Form 812Xs shall be placed in an envelope marked "Confidential" and separate from any other mail and be addressed to the Case Records Administrator. A separate CDC Form 812X shall be completed for each newly identified enemy. A CDC Form 812X shall not be completed when the inmate identified as an enemy has been discharged. When the CDC Form 812 is updated and the identified inmate enemy has returned to the CDCR with a new number, a CDC Form 812X shall be completed within five (5) days of discovery and the process as outlined above shall be followed.

Within one (1) working day of receiving a CDC Form 812X, the C&PR/RC-CCIII shall ensure that the documents are forwarded to the identified inmate's assigned CCI. Within five (5) working days of receiving the documentation, the CCI shall ensure that the identified inmate's CDC Form 812/812-C is updated and that the CDC Form 812X and supporting documentation are placed in the inmate's C-file. The CCI will return the yellow copy of the completed CDC Form 812X to the C&PR/RC-CCIII who shall, within four (4) working days, return the yellow copy of the CDC Form 812X to the sending institution or parole region. Upon receipt of the completed yellow copy of the CDC Form 812X, the C&PR/RC-CCIII at the sending institution shall ensure that the completed yellow copy of the CDC Form 812X is placed in the identified inmate's C-file and the green copy is removed and destroyed.

Within five (5) working days of receiving a CDC Form 812X, the Case Records Administrator at Parole Case Records North/South shall ensure that the CDC Form 812X and accompanying documentation are placed in the inmate/parolee's C-file on the top of the Classification section of the file. If returned from Parole/CCF/CCRC to an institution, the receiving institution shall ensure that the file is updated with the enemy information and that the yellow copy of the CDC Form 812X is returned to the sending institution. Upon receipt of the completed yellow copy of the CDC Form 812X, the C&PR/RC-CCIII at the sending institution shall ensure that the completed yellow copy of the CDC Form 812X is placed in the identified inmate's C-file and the green copy is removed and destroyed.

61020.3.3 Paroles Update of CDC Form 812

Parole staff shall update the CDC Form 812 as any critical case information becomes known and is documented for inclusion in a parolee's file. The form shall be updated before the parolee's file is forwarded by the parole region to any other location, including the CDCR's Archives Unit.

61020.3.4 Verification and Documentation of Enemy Information

Inmates, who staff believe are likely to do mortal or serious injury one to the other if given the opportunity, shall be considered enemies. Inmates, who claim to have an enemy, are responsible for providing sufficient information to positively identify the claimed enemy. Staff shall make concerted efforts to evaluate, verify, and document this information. Verification may include an interview with the alleged enemy when it can be done without jeopardizing an investigation or endangering the inmate. Information shall be documented on a CDC Form 812, 812-C (if applicable), and a CDC Form 128-B, General Chrono, indicating the results of the investigation, which supports or verifies this information.

61020.4 Recording on the CDC Form 812

When notations (names, number, circumstances, and comments) are recorded on a CDC Form 812 and 812-C (if applicable), the recording staff person shall ensure such critical information is included on the CDC Form 812 of each identified inmate or parolee. Where inmates or parolees are located elsewhere, such notifications shall be made by a photocopy of both the CDC Form 812 and the supporting documentation.

61020.5 Information Documentation CDC Form 812

The CDC Form 812 is non-confidential. It shall contain no references to documents in the confidential materials folder and not be filed in the confidential folder. Care shall be exercised in making notations on the CDC Form 812 to avoid disclosing any confidential information. Confidential information shall be documented on a CDC Form 128-B. Confidential enemies shall be recorded on a CDC Form 812-C.

The inmate shall have access to the fact that there is confidential information in the file; however, the contents shall not be disclosed.

Notations are reserved for three specific kinds of information: "Non-Confidential Enemies," "Deletion of Prior Enemies," and "Suspected Gang Affiliations." When there are numerous documents in a file, all related to the same critical information, the notation on the CDC Form 812 shall refer the reader to only the original sources or most significant documents. The reader is thus alerted that critical information exists in the file and is responsible for locating and considering any other related information/documents.

No Known Enemies or Gang

When there is no critical case information relating to the safety of persons to document, indicate "NONE" under CDC Number and/or gang section if there are no enemies and/or gang concerns. Decisions or actions, which may affect the safety of persons, shall consider all available information and not solely the presence or absence of notations.

Notations on a CDC Form 812 shall be typed or printed in ink and dated. The staff person making or authorizing the notation shall be identified by their name, title, and institution or parole region.

Each CDC Form 812 and all documents referred to on the form are permanent and shall be retained in the inmate's/parolee's file in accordance with procedures outlined in Department Operations Manual (DOM) § 72010, Types of Records.

Supporting Information

All written notations on a CDC Form 812 shall be supported by documentation contained elsewhere in the file. A CDC Form 128-B shall be used to document notifications unless the information is already supported by other file material, which need only be referenced. It is the reporting employee's responsibility to ensure that the information is placed in the file and that it is properly listed on the CDC Form 812.

Institution Gang Investigator (IGI) Referral

Gang involvement information shall be verified by a thorough investigation using the IGI, investigative lieutenant, or other designated staff.

Providing False Information

If it is determined the inmate has given false information, staff shall take appropriate action pursuant to California Code of Regulations (CCR) § 3021.

61020.6 Prison Gang Information Documentation on CDC Form 812-A, Notice of Critical Information-Prison Gang Identification

When a prison gang affiliation is entered on the CDC Form 812, staff shall prepare a CDC Form 812-A. This form shall be completed only when inmates have been designated as a member, associate, or drop-out of a prison gang.

The CDC Form 812-A shall be completed in detail. The designation of an inmate as a member, associate, or drop-out, or in need of protection from a prison gang shall be verified, and all supporting documentation listed on the form.

IGI

The IGI shall prepare a CDC Form 128-B to summarize the verification of the inmate's involvement. In many cases, it will be necessary to provide more than one item of verification. IGIs or investigative lieutenants shall review and sign each CDC Form 812-A prior to its placement in the inmate's file to ensure that an inmate is not given a prison gang designation unless adequate supporting documentation is contained in the inmate's file. The reverse side of the CDC Form 812-A shall not be written on.

Updating

The CDC Form 812-A shall be reviewed and updated at each annual classification review and during any review for a transfer.

61020.7 Prison Gang Identification Methods

Methods of identification shall include a reference to each source document in the inmate's/parolee's file and adhere to the following guidelines:

Self Admission. Shall require verification from another source.

Tattoos and Symbols. Body markings identified by IGIs as indicative of specific prison gangs.

Written Material. Any material or documents determined to indicate prison gang involvement or activity such as membership lists, enemy lists, gang constitutions, structure, codes, or training materials of specific groups.

Photos. Individual or group photographs with gang connotations such as insignia or symbols or group photos with known gang members.

Staff Information. Documented staff observations, which reasonably indicate and verify gang involvement or association. The inmate's C-file shall be reviewed for corroborating CDC Form 115, Rules Violation Reports, CDCR Form 837 Series, Incident Reports, probation officer reports and other reports.

Other Agencies. Information provided by other agencies shall be documented. If the information is received orally, CDCR staff shall document the information, citing the source and the validity (such as the other agency's basis for determining an affiliation).

Association. Enter only information related to the inmate's/parolee's association with known gang members or with persons directly linked to known gang members. Such information can relate to street associations, crime partners, institutional associations, or visitors or correspondents of gang members.

Confidential Sources. The date of the information and the type of the source shall be noted. Any document relating confidential information from an inmate source shall also include an evaluation of the source's reliability and otherwise meet the requirements for the use of confidential information as specified in DOM § 61020.8.

Commitment Offense. Where the circumstances of an offense reveal evidence of gang affiliation, the counselor shall check for such indicators as victim, gang related crime, crime partners, witnesses, ethnic consideration, area of commitment, or "home town." "Home town" and ethnic considerations alone shall not determine gang affiliation, but shall be considered in context with other substantiating information.

Legal Documents. Probation Officer's Report (POR) or court transcripts.

Visitors. Documentation shall be made of visitors who are known gang "runners," street members, or members of an organization which associates with prison gangs.

Debriefing Reports. Official material detailing the voluntary statement of an inmate or parolee who claims to have dropped out from a prison gang or disruptive group.

61020.8 Confidential Material Criteria

The following types of information shall be classified as confidential:

- Information which, if known to the inmate, parolee, or others would endanger the safety of any person.
- Information which would jeopardize the security of the institution.
- Specific medical or psychological information which would be medically/psychologically detrimental if known to the inmate or parolee.
- Information provided and classified confidential by another governmental agency.
- Notwithstanding the above, information provided by an inmate/parolee, which is documented in a debriefing or other report, providing the inmate/parolee has requested a confidential designation

and the gang coordinator/investigator or other staff per DOM § 61020.10 has determined security or safety would best be served by filing the report in the inmate/parolee's confidential folder rather than another section of the C-file.

61020.9 Confidential Material Use

CSRs are designated auditors of confidential information.

The hearing officer for a rules violation report shall ensure that the use of confidential information pertaining to the violation being adjudicated is properly disclosed and documented.

No inmate shall be approved for transfer to another institution based on confidential information, which is not properly documented and disclosed on a CDC Form 1030, Confidential Disclosure Form.

The identity of a confidential source may be kept confidential if disclosure would endanger the source, any person, or institutional security.

Decisions in disciplinary hearings based upon confidential information shall be supported in a confidential memorandum, incident report, or finding portion of the CDC Form 115 with investigative information and appropriate documentation.

These documents shall contain:

- A statement in support of CCR § 3321(c)(1) detailing the past information provided and why the confidential informant is considered reliable for the current incident.
- Whether the current information is first-hand or hearsay.
- Whether documentation or other "circumstances surrounding the event" would lead the decision maker to believe the information is true.
- In the case of multiple confidential sources, the degree of reliability of each source shall include how each statement compares with the other statements, and the circumstances or evidence on which the conclusion of reliability was based.
- The description of the "circumstances" shall state how it was possible that the events occurred as described by the confidential sources, and include any facts or evidence (who, what, when, and how) which confirm the truthfulness of "some" aspect of the source's statement.

61020.9.1 Confidential Material/Reliability of Source

No decision shall be based on information from a confidential source unless other documentation corroborates the information received from the source, or unless the circumstances surrounding the event and the documented reliability of the source satisfies the decision maker(s) that the information is true.

The description of the "circumstances" shall state how it was possible that the events occurred as described by the confidential sources, and include any facts or evidence (who, what, when, and how) which confirm the truthfulness of "some" aspect of the source's statement.

A confidential source's reliability may be established by any one of the following:

- The source has previously given information which proved to be true. The type of information provided and, if possible, the date the information was provided, (e.g., the CDC Form 128-B dated 3-2-01 in which the inmate informed staff on the location of weapons which were subsequently found).
- Multiple sources independently provide the same information. If two or more reliable informants give conflicting information, staff must provide a statement explaining why information provided by one source is more reliable than that provided by another. If two or more sources give conflicting information and all sources have not been determined to be reliable, then further efforts must be undertaken to determine the reliability of at least one source.
- The source implicates him/herself in criminal activity when providing the information. For example, a drug trafficker who identifies others and in doing so implicates him/herself.
- Part of the information provided is corroborated through investigation or by information provided by non-confidential sources. For example, a source provides information on the location of a weapon and the person responsible, and the location of the weapon proves true.
- The confidential source is the victim.

Note: Extreme care shall be taken to ensure that the evaluation of reliability does not reveal the identity of the confidential source.

61020.10 Confidential Material Folders

A removable confidential materials folder shall be provided in each C-file containing confidential information. Only case information, which meets the criteria for confidentiality shall be filed in the confidential material folder.

Proposed confidential documents shall be reviewed, signed, and dated by a staff person at the Correctional Counselor (CC) III, Parole Agent (PA) III or higher staff level to approve their being marked confidential and placed in the confidential folder of an inmate's or parolee's C-file or a parolee's parole field file.

Classification Committee

Every classification committee shall review the confidential material folder of each case being considered. If unclassified or inappropriately classified material is present, it shall be reclassified and appropriately refiled.

61020.11 Confidential Material Security

Every reasonable administrative, procedural, and physical safeguard shall be established and followed to ensure the security and confidentiality of files to protect against disclosure, damage, harm to an individual, or destruction of the information.

Hand Deliver

Material designated as confidential shall be either hand delivered by a staff person to the person responsible for placing it in the confidential folder of the C-file or parole field file, or it shall be placed inside of a sealed envelope which has been marked confidential and mailed to the office which maintains the C-file or parole field file.

Stamped "CONFIDENTIAL"

Any document designated as containing confidential information, either in total or in part, shall be conspicuously stamped at the top and bottom of the document with the word "CONFIDENTIAL" in red ink. If the document consists of more than one page, each page shall be so marked.

Authorized Limited Disclosure

Inmate/parolees shall be permitted to review their own debriefing reports, which may be designated confidential at their request. Disclosure of the debriefing report shall be authorized by the gang coordinator/investigator. Disclosure of reports other than debriefing reports shall be authorized by a CCIII, PAIII, or higher. Prior to the inmate/parolee's review, the report shall be reviewed by appropriate staff to ensure other types of confidential information are not contained therein and subsequently wrongfully disclosed.

61020.12 Archive File Reviews

To ensure accurate classification and appropriate placement of inmates, available information regarding an inmate's prior incarceration is to be reviewed and considered as part of a thorough, objective evaluation of the inmate's security and custody needs. The counselor shall order and review an archive file upon discovery that the inmate has a prior CDCR term, Civil Addict commitment, or Division of Juvenile Justice/California Youth Authority (DJJ/CYA) commitment, which has not been previously reviewed and incorporated into the inmate's current C-file. An inmate may have a prior Civil Addict commitment that is still active. The central file of an active Civil Addict commitment can be requested from the California Rehabilitation Center (CRC).

If the inmate was incarcerated in a federal institution or out-of-state, an attempt shall be made to get a synopsis of the inmate's prior incarceration behavior. If the inmate has a prior CDCR term or Civil Addict commitment, the counselor shall also check the "COFQ" screen in the OBIS to determine if there is a confidential folder to request.

Archive files often contain critical information, which may or may not be found in an inmate's current C-file. Some examples are as follows:

- Enemy concerns.
- Escape history.
- Gang involvement.
- Investigative findings.
- Serious Rule Violation Reports.
- A "Sustained" petition from a juvenile court (which may be located in a DJJ/CYA file only).
- A finding of "Good Cause" by the Board of Parole Hearings (BPH).
- Medical information.
- Victim notification (which would be located in the confidential folder).

Performance of archive file reviews may result in a need to correct the Placement Score, change the security level, and/or refer the case to the CSR for transfer consideration. Inmates temporarily ineligible for Camp/Minimum Support Facility (MSF) placement due only to Placement Score may become eligible after completion of the archive file review. Conversely, inmates may appear to be eligible for Camp/MSF placement; however, the archive file may reflect case factors which exclude Camp/MSF placement.

61020.12.1 Impact of Archive Review on Camp/MSF/CCRC Placement

If an archive file review is pending completion and the inmate is otherwise eligible for Camp/MSF placement, the case may be endorsed by a CSR for Camp/MSF (not direct placement). After a thorough review of available case information, a classification committee has the discretion to grant minimum custody and place an inmate into a Camp/MSF prior to receipt and completion of the archive file review. If the committee finds no precluding factors for Camp/MSF and there are no concerns to warrant waiting for the archive file review, the committee may grant minimum custody and clear the inmate for Camp/MSF placement.

However, when there is a possibility of a case factor contained in the archive file that may preclude Camp/MSF eligibility, the Archives Unit shall be informed of the need to expedite the request for the archive file.

Do not endorse a case for CCRC placement pending archive review.

61020.12.2 Archive File Review Procedures

The counselor shall review the inmate's current criminal history through the California Law Enforcement Telecommunication System (CLETS) and the Criminal Identification and Information (CI&I) to determine if there is a discharged CDCR term, Civil Addict commitment, DJJ/CYA commitment, federal term, or out-of-state term, which has not been previously reviewed and documented.

If the inmate has a discharged CDCR term or Civil Addict commitment and the archive file has not been previously requested, the counselor shall complete the Request for Discharged Archives Files. The request shall include the inmate's full name, current CDC number, discharged CDC number, box number (assigned to discharged cases beginning in the late 1990's), and discharge date. Discharge dates can be obtained from the OBIS "COFQ" screen or CLETS/CI&I. Box numbers can be obtained from the OBIS "KMHQ" screen. Pursuant to Penal Code (PC) § 1203.03 ("Z" cases), records on diagnostic cases are not available after three years from the discharge date. (Note: When an inmate's CDCR term is discharged, the parole region indicates in the OBIS "KMHQ" screen the box number in which the Central File is placed. Indicating the box number, when noted on the request form, assists the Archives Unit in locating the C-file.)

The "COFQ" screen in OBIS shall be checked to determine if there is a confidential folder under the discharged CDC number. If there is a confidential folder, the counselor shall complete the Request for Discharged Confidential Folder form. The request shall include the inmate's full name, current CDC number, discharged CDC number(s), discharge date, and CI&I number.

If the inmate has a discharged DJJ/CYA commitment and the DJJ/CYA file has not been previously requested and reviewed, the counselor shall complete the DJJ/CYA file request.

NOTE: DJJ/CYA archive files are no longer available if the DJJ/CYA commitment has been discharged for seven (7) or more years.

The counselor shall complete the Notice of Requested Archive File, Confidential Folder, or DJJ/CYA File half-sheet, punch holes, and place it inside the back of the C-file folder where the archive file is normally located. This will be utilized to ascertain whether or not the archive file, confidential folder, or DJJ/CYA file has been requested. The counselor shall complete a separate half-sheet for each archive file, confidential folder, or DJJ/CYA File requested.

If an archive file, confidential folder, or DJJ/CYA file has been requested but not received prior to completion of the Institution Staff Recommendation Summary (ISRS), the RC counselor shall note the discharged number and date the archive file was requested in the Casework Follow-up section of the ISRS.

The counselor shall submit the request for the archive file, confidential folder, or DJJ/CYA file to the Records Office. The Records Office shall FAX the request to the appropriate destination (as indicated on the request form) within seven (7) days. If the archive file, confidential folder, or DJJ/CYA file is not received within 90 days, the counselor shall call the Archives Unit, ID/Warrants Unit, or DJJ/CYA Master Files Section to determine if the request needs to be sent again.

If applicable, federal institutions and out-of-state agencies shall be contacted by the counselor. Any information provided, whether written or oral, shall be summarized and documented in a CDC Form 128-B. (Note: The Archives Unit does not maintain records on Interstate "I" numbers. A C-file for an "I" number does not exist. An "I" number is on parole here in California serving parole that was imposed by another state. An "I" number has never served any prison time in California. Therefore, when requesting records on "I" numbers, the out-of-state agency shall be contacted by the counselor.)

Each time a counselor makes contact with another agency (federal, state, county, etc.) requesting records or receiving information on an inmate's prior incarceration behavior, it shall be documented in a CDC Form 128-B. This will ensure that staff reviewing the case are aware of the information and any efforts that have been made to obtain the information.

Upon receipt of the Archive File, Confidential Folder, or DJJ/CYA File, the counselor shall review the file for information that may affect the inmate's Placement Score, housing, custody, program, medical/psychiatric needs, or any other pertinent factors.

The counselor shall summarize the information compiled from the archive file review in a CDC Form 128-B and secure it in the C-file. A pre-formatted Archive File Review, CDC Form 128-B may be used to document the archive file review.

Upon completion of the archive file review, confidential folder review, or DJJ/CYA File review and documentation in a CDC Form 128-B, the counselor shall update or correct the appropriate documentation in the current C-file including, but not limited to, the following:

- Documentation of enemies on the CDC Form 812 and/or CDC Form 812C, Notice of Critical Information-Confidential Enemies;
- Incorporation of confidential information into the current confidential folder;
- Correction of the CDC Form 839, CDC Classification Score Sheet, and CDC Form 840, CDC Reclassification Score Sheet, and CDC Form 841, Readmission Score Sheet.

If the archive review results in a need to change the inmate's housing, program, custody, or security level, the counselor shall schedule the case for review by the next available classification committee. If a safety/security issue is identified, the counselor shall immediately notify the CCI (Supervisor) and/or available supervisory custody staff and ensure the appropriate action is taken.

The Records Office shall maintain security of DJJ/CYA files until returned to the DJJ/CYA. Note: DJJ/CYA files are to be returned to DJJ/CYA within 30 days of receipt.

CDCR archive files and archive confidential folders are not to be returned to the Archives Unit or ID/Warrants Unit. They are to be permanently retained in the current C-file.

If an archive file is received for an inmate that has been transferred, Records Office staff shall forward it to the inmate's current institution immediately.

If the archive file is received at the RC prior to the case being reviewed by the CSR, the archive file review, documentation in a CDC Form 128-B, and necessary updates and corrections to the C-file shall be completed at the RC to ensure the recommendation to the CSR is appropriate. If it is discovered that an archive file was not requested at the RC, the receiving institution shall submit the request.

With the exception of RC cases, all cases presented to the CSR for transfer consideration that have a discharged CDCR term, Civil Addict commitment, or DJJ/CYA commitment require completion of the archive file review and documentation in the C-file. If the archive file review has not been completed prior to the CSR review, the effort to obtain it and the reason the case is being referred to the CSR prior to the archive file review shall be described in the CDC Form 128-G, Classification Chrono.

61020.13 CDC Form 840

Classification and reclassification of inmates will normally be made pursuant to the CDC Inmate Classification Scoring System except when in the exercise of the discretion and judgment of the departmental officials it is deemed necessary to depart there from in individual cases. Such departures from the system shall be made for the purpose of ensuring the safety of inmates, correctional personnel, and that of the general public as well as for special institutional and/or programming needs.

61020.13.1 Procedures

A CDC Form 840 shall be completed as part of the regular classification process and anytime the case is presented to a CSR or when staff act for a CSR. It is intended to provide a cumulative record of the inmate's progress and changes in major case factors. Changes are documented at six or 12-month intervals except that a major change, which can lead to special housing or transfer consideration, shall be documented as it occurs.

The CDC Form 840 contains two carbonless copies and shall be written on a hard surface with black ballpoint pen. Do not use felt tip markers or soft-point writing instruments. The computer copies shall be sent at least weekly to:

Department of Corrections and Rehabilitation
Information Quality Support Section
P.O. Box 942883
Sacramento, CA 94283-0001

Distribution of the "tear-off" copies is made before the C-file is re-filed, except when the case is to be presented to a CSR for review.

Copies shall remain attached to the original until the CSR action is documented and then shall be distributed.

Retain
