#### **ACKNOWLEDGMENTS**

Although the Estimates and Statistical Analysis Section is responsible for the semiannual publication of the Population Projections, others in the Department of Corrections made significant contributions that are greatly appreciated. Among those involved in the projections were (in alphabetical order) the:

- Board of Prison Terms
- Information Systems Division
- Institutions Division
- Office of Budget Management
- Parole and Community Services Division

## I. INTRODUCTION

#### INTRODUCTION

This document contains the California Department of Corrections' (CDC) projections of institution, parole, and outpatient populations for fiscal years (FY) 2003-04 through 2008-09. The projections are based upon the most current available data and include existing laws and regulations as well as any signed legislation that will come into effect during the current projections cycle. The projections do not include proposed legislation, programs, propositions, or policy changes that have not been signed or affirmed as of the completion of the projection process.

In general, the Fall 2003 Projections do not include programmatic changes associated with the 2003-04 Budget Act.

#### A. Factors Affecting Population

- On June 30, 2003, the total institution population was 160,931. This is 2,952 higher than the June 30, 2002, population and reverses a three year decline.
- The number of new admissions from court during FY 2002-03 was 43,247, reflecting a 7.8 percent growth from the previous fiscal year. This is in contrast to five years of absolute decline. This increase in admissions has continued into the current fiscal year.
- Since hitting its peak of 28,450 on June 30 1999, the parole violator returned to custody (PV-RTC) population declined to a four year low of 24,335 on June 30, 2003.
- The parole population on June 30, 2003, was 116,173, or 4,163 lower than the June 30, 2002, parole population. This is the result of the decline in new admissions over the previous five years and an increase in discharges over the last three years.

#### B. Comparison of Fall 2003 with Spring 2003 Projections

#### 1. <u>Institution Population</u>

In the Spring 2003 forecast, the total institution population was expected to be 160,532 by June 30, 2003, which is 399 lower than the actual population of 160,931. The difference is due primarily to more new admissions and fewer releases to parole, partially offset by fewer parolees returned to custody than expected.

The following table compares the Fall 2003 Population Projections to the Spring 2003 Projections.

Table A

Comparison of Fall 2003 with Spring 2003 Projections
Institution Population
June 30, 2004 through June 30, 2009

| Fall 2003<br>Projections | Spring 2003 Projections                              | <u>Difference</u>                                                                                                                                                                                         |
|--------------------------|------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 163,536                  | 161,287                                              | 2,249                                                                                                                                                                                                     |
| 163,620                  | 160,897                                              | 2,723                                                                                                                                                                                                     |
| 163,347                  | 160,991                                              | 2,356                                                                                                                                                                                                     |
| 163,511                  | 160,857                                              | 2,654                                                                                                                                                                                                     |
| 163,727                  | 161,290                                              | 2,437                                                                                                                                                                                                     |
| 163,987                  | -                                                    | -                                                                                                                                                                                                         |
|                          | Projections  163,536 163,620 163,347 163,511 163,727 | Projections         Projections           163,536         161,287           163,620         160,897           163,347         160,991           163,511         160,857           163,727         161,290 |

It is expected that on June 30, 2004, the inmate population will be 2,249 higher than projected in the spring, primarily due to a significant increase in the number of new admissions from court offset by a decrease in the number of parolees returned to custody. The population is anticipated to increase to 163,987 by June 30, 2009.

#### 2. Parole Population

In the Spring Projections, the parole population was expected to be 116,549 on June 30, 2003, which is 376 higher than the actual population for that date. This difference is due mainly to more discharges from parole and fewer releases from prison, offset by fewer parolees returning to custody.

Table B

Comparison of Fall 2003 with Spring 2003 Projections
Parole Population
June 30, 2004 through June 30, 2009

| Year End<br>June 30 | Fall 2003<br>Projections | Spring 2003 <a href="Projections">Projections</a> | Difference |
|---------------------|--------------------------|---------------------------------------------------|------------|
|                     |                          | <del></del> _                                     |            |
| 2004                | 112,019                  | 115,467                                           | -3,448     |
| 2005                | 110,631                  | 115,810                                           | -5,179     |
| 2006                | 110,077                  | 115,264                                           | -5,187     |
| 2007                | 109,342                  | 115,436                                           | -6,094     |
| 2008                | 109,265                  | 114,797                                           | -5,532     |
| 2009                | 108,682                  | -                                                 | -          |

From June 30, 2004, through the end of the projection cycle, the Fall 2003 Projections will be lower than the Spring Projections due to an increase in the discharge rate, offset by a reduction in returns to custody.

#### 3. Other Populations

The Civil Narcotic Addict (CNA) institution population was 1,374 on June 30, 2003, or 173 lower than projected in the Spring Projections. It is now estimated that the CNA population will be 1,000 on June 30, 2004, or 504 lower than the Spring Projections.

The parole outpatient population on June 30, 2003, was 2,670, or 71 more than predicted. It is estimated that the parole outpatient population will be 1,979 on June 30, 2004, which is 551 less than the Spring Projections.

Figures 1 and 2 graphically display the Fall 2003 Projections for the institution and parole and outpatient populations. Figure 1 shows the actual and projected institution population, while Figure 2 shows the actual and projected California supervised parole and outpatient populations. Both figures are for FY 1993-94 through 2008-09.

Figure 4
Total Felon Admission Rates
Actual and Projected
Fiscal Years 1993-94 through 2008-09

#### **PREMISES**

Figures 3 and 4 on the preceding page display the Fall 2003 Projections for felon admissions. Figure 3 shows the actual and projected felon admissions, while Figure 4 shows the actual and projected felon admission rates per 100,000 California residents, aged 18-49. Both figures are for FY 1993-94 through FY 2008-09.

#### C. Felon Admissions

Table C, below, summarizes actual felon admissions to the CDC's prisons from FY 1993-94 through FY 2002-03, while Table D displays the projected felon admissions for FY 2003-04 through FY 2008-09. Consistent with past practice, admission rates displayed in Tables C and D are expressed as the number of felon admissions to prison from court per 100,000 California residents, aged 18-49.

Table C

Actual Total Felon Admissions
Fiscal Years 1993-94 through 2002-03

| Fiscal Year | Number of CDC<br>Felon<br><u>Admissions*</u> | State Population<br>Aged 18-49<br>(In Thousands) | Admission Rate** |
|-------------|----------------------------------------------|--------------------------------------------------|------------------|
| 1993-94     | 42,713                                       | 15,850.2                                         | 269.5            |
| 1994-95     | 43,707                                       | 15,844.2                                         | 275.9            |
| 1995-96     | 45,876                                       | 15,860.8                                         | 289.2            |
| 1996-97     | 46,750                                       | 15,930.4                                         | 293.5            |
| 1997-98     | 46,511                                       | 16,053.8                                         | 289.7            |
| 1998-99     | 44,983                                       | 16,184.9                                         | 277.9            |
| 1999-00     | 41,469                                       | 16,303.3                                         | 254.4            |
| 2000-01     | 39,351                                       | 16,420.3                                         | 239.6            |
| 2001-02     | 37,519                                       | 16,549.4                                         | 226.7            |
| 2002-03     | 40,626                                       | 16,676.3                                         | 243.6            |

<sup>\*</sup> Not including CYA "M" cases, other state/federal admissions, or direct admissions to parole.

The decline in admissions for the prior six fiscal years was reversed over the last fiscal year. Felon admissions for FY 2002-03 were 40,626, up 8.3 percent from FY 2001-02. This compares to declines of approximately 4.9 percent in each of the previous two fiscal years.

<sup>\*\*</sup> Number of CDC felon admissions per 100,000 California state residents, aged 18-49.

In the last six months, January to June 2003, total felon admissions were 21,392, or 10.1 percent more than admissions for the same time period one year ago. This is also the largest increase for the January to June period since 1995. It should be noted that the female felon admissions increased by 18 percent during this time period.

As shown in Table D, below, the Fall 2003 felon admissions projection is higher than the Spring 2003 Projections throughout the projection cycle. This increase is due to the fact that admissions for the last six months were 1,823 more than anticipated in the Spring Projections.

Admissions are projected based on current trends, the estimated impact of seasonality and projected state population aged 18-49.

Table D

Projected Total Felon Admissions
Fiscal Years 2003-04 through 2008-09

| Fiscal Year | Fall 2003 | <b>Spring 2003</b> | <b><u>Difference</u></b> | Rate  |
|-------------|-----------|--------------------|--------------------------|-------|
| 2003-04     | 40,159    | 38,080             | 2,079                    | 239.3 |
| 2004-05     | 39,578    | 37,458             | 2,120                    | 234.7 |
| 2005-06     | 39,110    | 36,983             | 2,127                    | 231.2 |
| 2006-07     | 38,719    | 36,610             | 2,109                    | 227.9 |

| 2008-09     | 38,160    |                    | -                        | 221.5 |

#### D. Significant Chaptered Legislation and Initiatives

There were no initiatives or chaptered legislation since the Spring 2003 Projections.

The following were included in the Spring 2003 projections:

Statutes of 2002: Chapter 606 (AB 1838, Hertzberg) and Chapter 611 (SB 1287, Alarcon).

<u>Statutes of 2003</u>: Chapter 194 (AB 2252, Cohn), Chapter 828 (AB 2499, Frommer), Chapter 829 (AB 2539, Pacheco), Chapter 254 (SB 1254, Alpert), Chapter 832 (SB 1320, Kuehl), Chapter 302 (SB 1421, Romero), and Chapter 394, (SB 1459, Romero).

#### E. The Work Incentive Program (WIP)

This program allows eligible inmates to earn up to a six month reduction per year in sentence length. The WIP applies to all felons who committed their offenses on or after January 1, 1983, and to those felons who committed their offenses before January 1, 1983, who chose to participate. Approximately 73 percent of the June 30, 2000, eligible population was earning one-half sentence reduction and participation is expected to continue at that level throughout the projection period. The Three Strikes Law limits credit-earning to 20 percent for affected inmates. The Penal Code also limits persons who have been convicted of any violent felony to no more than a 15 percent sentence reduction. On January 1, 2003, inmate campers, who are eligible to earn day-for-day credit, became eligible to earn two-for-one credit. On June 30, 2003, there were a total of 4,133 campers and 1,668 (40 percent) of these campers were earning two-for-one credit.

#### F. Court Sentences

As shown in Table E, the average sentence for newly admitted felons and parole violators returned with new terms (PV-WNT) was 53 months for FY 2002-03. For the seventh consecutive year, the average work incentive credit stabilized at 12 months. The anticipated time to serve continued to decline to approximately 34 months.

| 1996-97     | 56.1                  | 7.1                            | 12.6                                  | 36.4                 |
| 1997-98     | 54.4                  | 6.8                            | 12.4                                  | 35.2                 |
| 1998-99     | 54.7                  | 6.8                            | 12.5                                  | 35.4                 |
| 1999-00     | 54.4                  | 6.9                            | 12.5                                  | 34.9                 |
| 2000-01     | 53.3                  | 7.0                            | 12.0                                  | 34.3                 |
| 2001-02     | 53.6                  | 7.1                            | 12.1                                  | 34.4                 |
| 2002-03     | 53.0                  | 7.0                            | 12.1                                  | 34.0                 |

<sup>&</sup>lt;sup>1</sup> Includes third-strike and other life commitments.

<sup>&</sup>lt;sup>2</sup> Work Incentive Program credits based on eligibility.

#### **G.** Placement Need Projections

As in the Spring 2003 Projections, the Fall 2003 Projections of institution bed needs, by level, consider both inmate classification score level and administrative determinants, such as institutional security and public safety, as specified in Section 62010 of the California Department of Corrections' Department Operations Manual. It is assumed that the male felon reception center population will fluctuate proportionately with the changes in male felon intake. Special housing projections assume a constant proportion of the number of inmates of each classification level in each of these categories over the projection period. The projections do not consider the impact of operational changes such as the need to single-cell Level IV inmates in the Enhanced Outpatient Program or the increase in indeterminate Security Housing Unit (SHU) terms. Each of these changes in policy or programs could result in the need for additional Level IV and SHU beds.

#### **H. Parole Violators**

For the six month period January to June 2003, there were 29,440 male felon parole violators returned to custody or pending parole revocation (PV-RTC/PendRev), 1,994 fewer than projected in the Spring 2003 Projections. The corresponding return rate was 49.6 (3.0 lower than projected). The Fall 2003 Projections assume the PV-RTC/PendRev rate will be about 2.5 points lower than projected in the Spring Projections.

There were 7,023 male felon PV-WNTs for the same January to June 2003 period, 409 more than projected in the Spring 2003 Projections. The corresponding male felon PV-WNT rate was 11.9, less than 1.0 point higher than projected in the Spring. The Fall 2003 Projections assume the PV-WNT rate will be about 1 point higher than projected in the Spring 2003 Projections.

The graphs on the following pages illustrate actual and projected parole return numbers and rates. Figure 5 displays the actual number of male felon parole violator returns by quarter since June 1993. Figure 6 shows the male felon PV-RTC/PendRev rates by quarter from June 1993 to June 2009, while Figure 7 tracks the male felon PV-WNT rates for the same time period.

#### I. Felon Parole Population

On June 30, 2003, the felon parole population was 111,913, which is 376 lower than projected in Spring 2003. Between January and June, this population decreased by 1,079.

For the six month period of January to June 2003, there were 16,141 male felon parolees suspended to parolee-at-large (PAL) status, 600 more than projected in Spring 2003. The PAL rate was 32.2, or 1.4 higher than projected. The Fall 2003 Projections assume that the male felon PAL rate will be about 1 point higher than projected in the Spring 2003 Projections.

There were 17,393 male felon parolees discharged from parole over the last six months, 1,837 more than projected in Spring 2003. The discharge rate was 29.8, or 3.4 higher than projected. The Fall 2003 Projections assume that the male felon discharge rate will be about 4 points higher than projected in the Spring 2003 Projections.

Figure 6
Male Felon PV-RTC/PendRev Rates
June 1993 through June 2009

Note: PV-RTC/PendRevs are parole violators returned to custody or pending revocation.

Figure 7
Male Felon PV-WNT Rates
June 1993 through June 2009

Note: PV-WNTs are parole violators returned with a new term.

## III. FALL 2003 POPULATION PROJECTIONS

The Fall 2003 Projections are summarized in Tables 1 and 2 and are presented in greater detail in Tables 3 through 16. Tables 3 and 4 present the quarterly institution populations, while Tables 5 and 6 present detailed projections by inmate placement needs. Tables 7 through 10 project the movement of institution populations (including civil narcotic addicts), and Tables 11 through 16 present detailed projections of the parole and outpatient population.
