

**Post Release Community Supervision
Fall 2012 Population Projections**

Public Safety Realignment (Realignment), which was implemented on October 1, 2011, specifies that offenders with current non-serious, non-violent offenses who are not high-risk sex offenders will be released to their county of last legal residence for post release community supervision (PRCS). The attached tables present the PRCS projections based on the Fall 2012 Population Projections.

The first table shows the projected number of releases to PRCS by county from December 2012 through December 2013. The total number of releases is expected to decrease from 1,765 in December 2012 to 1,265 in December 2013. The primary reason for this decrease is a decline in the number of offenders admitted to prison with current non-serious, non-violent offenses as result of Realignment.

The second table shows the actual number of releases to PRCS by county from July 2012 through November 2012, and the third table compares those actuals to the previous PRCS projections based on the Spring 2012 Projections. The difference column reflects the variance between the projected number of releases and the actual number of releases. So, for example, for Alameda County, the Spring 2012 PRCS projection was 61 higher than the actual number of releases for that 5-month time period. Overall, the Spring 2012 PRCS projection was 8 lower than the actual number of releases for that 5-month time period.
