# I. INTRODUCTION

#### INTRODUCTION

This document contains the California Department of Corrections (CDC) projections of institution, parole, and outpatient populations for Fiscal Years (FY) 2001-02 through 2006-07. The projections are based upon the most current available data and existing law.

The projections incorporate the expected impact of Proposition 36, the Substance Abuse and Crime Act of 2000. This Act, passed November 7, 2000 and effective July 1, 2001, diverts specific new court commitments to local drug treatment programs instead of prison. (Refer to the Fall 2001 Population Projections, Section II. D.1.)

#### A. Factors Affecting Population

- The CDC institution population has been relatively static over the last several years. On June 30, 2001, the institution population was 161,497, an average increase of almost 1,100 per year since June 30, 1998. This compares to an average growth of nearly 9,000 per year over the previous six years. The decrease since 1998 is mainly due to declining new admissions and the slow decline in the parole violator returned to custody (PV-RTC) rate.
- Since June 30, 2001, the institution population declined by 4,355 inmates to 157,142 on December 31, 2001. This decrease in six months is the largest drop in a six-month period since at least 1980 and countered the increase of the previous three years. This decrease is due to the implementation of Proposition 36.
- Despite the considerable decline in the last six months, the Fall 2001 Population Projections had estimated the decline to be even greater. In those projections, it was estimated the institution population would fall to 156,239 by December 31, 2001. As a result, the actual population was 903 higher than estimated (see Table A on the following page). This difference is mainly due to higher than estimated new admissions (especially in the October through December 2001 quarter) and higher than anticipated PV-RTC rates.

#### B. Comparison of Spring 2002 with Fall 2001 Projections

#### 1. <u>Institution Population</u>

Based on the foregoing discussion in section A, the Spring 2002 Population Projections have been modified to reflect the impact of fewer Proposition 36 inmate diversions to local treatment. It is now expected that by June 30, 2002, the inmate population will be 1,472 higher than projected in the fall (an increase of 903 has already occurred through December 31, 2001). By June 30, 2003, this difference in projections will increase to 1,610. These increases, however, leave the Spring 2002 projection significantly lower than the actual population levels prior to the implementation of Proposition 36. The Spring 2002 Population Projections for June 30, 2002, still shows a population decline of more than 3,600 in the first year of Proposition 36.

The following Table A compares the Spring 2002 Population Projections to the projections issued last fall.

Table A

Comparison of Spring 2002 with Fall 2001 Projections
Institution Population
June 30, 2001 through June 30, 2007

Year End June 30	Spring 2002 Projections	Fall 2001 Projections	<u>Difference</u>
2001	161,497*	-	-
Dec. 31, 2001	157,142*	156,239	903
2002	157,881	156,409	1,472
2003	157,331	155,721	1,610
2004	157,898	156,337	1,561
2005	159,868	158,429	1,439
2006	162,857	161,159	1,698
2007	166,473	164,623	1,850
*Actual.			

The Spring 2002 Projections for the institution population is higher than forecast in the Fall Projections throughout the projection period. This is the result of a decrease in the expected impact of Proposition 36. The prison population is expected to be 157,881 by June 30, 2002, higher than the Fall Projections by 1,472.

The population on June 30, 2003, is expected to be 157,331, which is 1,610 higher than the Fall 2001 Projections. This increase also is primarily attributable to the reduced impact of Proposition 36.

#### 2. Parole Population

In the Fall 2001 Projections, the parole population was expected to be 123,198 on December 31, 2001, which is 1,378 higher than the actual population for that date. This difference is due mainly to the continuing trend of decreased new admissions and more PV-RTCs than expected.

Table B

Comparison of Spring 2002 with Fall 2001 Projections
Parole Population
June 30, 2001 through June 30, 2007

Year End June 30	Spring 2002 <u>Projections</u>	Fall 2001 Projections	<u>Difference</u>
2001	119,636*	-	-
Dec. 31, 2001	121,820*	123,198	-1,378
2002	119,848	120,523	-675
2003	117,233	116,811	422
2004	113,898	112,301	1,597
2005	111,024	108,667	2,357
2006	109,281	106,882	2,399
2007	107,681	104,999	2,682
*Actual.			

By June 30, 2002, the number of parolees supervised in California is projected to be 119,848, a decrease of 675 from the previous projection. This is due to the increase in PV-RTC rates. However, this decrease will be offset by a projected increase in the admissions in the following years beginning in FY 2002-03. By June 30, 2003, the population is expected to be 117,233, which is 422 higher than projected in Fall 2001. A steady decline in the parole population is still expected through June 30, 2007, at which time it is expected to be 107,681.

#### 3. Other Populations

The civil addict institution population was 1,777 on December 31, 2001, over 170 lower than projected in the Fall Projections. It is now estimated that the civil addict population will be 1,726 on June 30, 2002, or 156 lower than the Fall Projections. By June 30, 2007, the population is expected to be 1,677. Conversely, the parole outpatient population increased more than anticipated, rising to 2,739 by December 31, 2001, which was 191 more than the Fall Projections. It is now estimated that the parole outpatient population will be 2,673 on June 30, 2002, which is 106 more than the Fall Projections. The parole outpatient population is expected to be 2,418 by June 30, 2007.

Figures 1 and 2 graphically display the Spring 2002 Projections for the institution and parole and outpatient populations. Figure 1 shows the actual and projected institution population, while Figure 2 shows the actual and projected California supervised parole and outpatient populations. Both figures are for FY 1991-92 through 2006-07.

Figure 1
Total Institution Population

# II. PREMISES

Figure 3
Total Felon Admissions\*
Actual and Projected
Fiscal Years 1991-92 through 2006-07

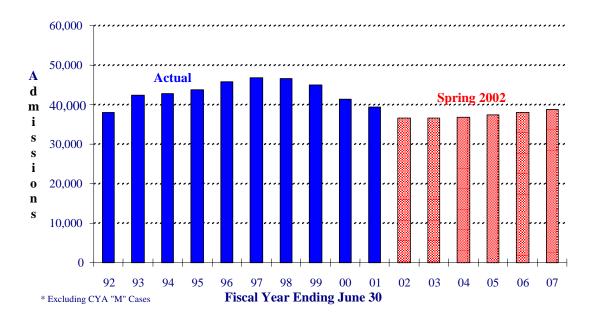

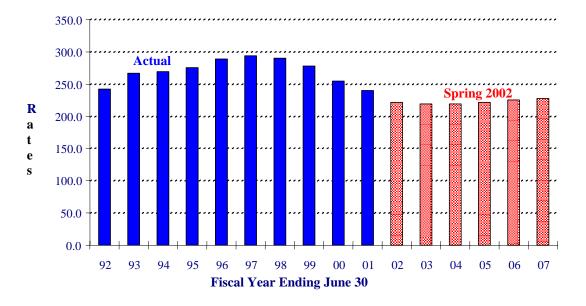

Figure 4
Total Felon Admission Rates
Actual and Projected
Fiscal Years 1991-92 through 2006-07

#### **PREMISES**

Figures 3 and 4 on the preceding page display the Spring 2002 Projections for felon admissions. Figure 3 shows the actual and projected felon admissions, while Figure 4 shows the actual and projected felon admission rates per 100,000 California residents, aged 18-49. Both figures are for FY 1991-92 through FY 2006-07.

#### C. Felon Admissions

Table C, below, summarizes actual felon admissions to a CDC prison from FY 1992-93 through FY 2000-01, while Table D displays the projected felon admissions for FY 2001-02 through FY 2006-07. Consistent with past practices, the admission rates in both tables are expressed as the number of felon admissions to prison from court per 100,000 California residents, aged 18-49.

Table C
Actual Total Felon Admissions to Prison
FY 1992-93 through FY 2000-01

Fiscal Year	Number of CDC Felon Admissions*	State Population Aged 18-49 (In Thousands)	Admission Rate**
1992-93	42,339	15,846.2	267.2
1993-94	42,713	15,850.2	269.5
1994-95	43,707	15,844.2	275.9
1995-96	45,876	15,860.8	289.2
1996-97	46,750	15,930.4	293.5
1997-98	46,512	16,039.1	290.0
1998-99	44,985	16,170.3	278.2
1999-00	41,472	16,303.3	254.4
2000-01	39,419	16,420.3	240.1

<sup>\*</sup> Not including CYA "M" cases, other state/federal admissions, or direct admissions to parole.

There has been an absolute decline in admissions for the last four fiscal years. The total felon admissions for FY 2000-01 were 39,419, down 5.0 percent from FY 1999-00. This continued decline in admissions has contributed significantly to a decline in total institution population.

In the last six months, July to December 2001, total admissions were 18,125. This is 7.6 percent lower than admissions for the same time period one year ago, but 952 higher than projected in Fall 2001.

<sup>\*\*</sup> Number of CDC felon admissions per 100,000 California state residents, aged 18-49.

As shown in Table D, the Spring 2002 felon admissions projection is higher than the Fall 2001 Projections throughout the projection period. This increase is due to the assumption that Proposition 36 has not had the impact on admissions that was anticipated in the Fall Projections. Projected admissions gradually increase over the next six years.

Admissions are projected based on current trends, estimated impact of seasonality, and projected state population aged 18-49.

Table D

Projected Total Felon Admissions\*
FY 2001-02 through FY 2006-07

Fiscal Year	Spring 2002	Fall 2001	<u>Difference</u>	Rate
2001-02	36,625*	34,819	1,806	221.3
2002-03	36,604	35,150	1,454	219.5
2003-04	36,788	35,429	1,359	219.2
2004-05	37,313	35,965	1,348	221.2
2005-06	37,991	36,687	1,304	224.6
2006-07	38,740	37,407	1,333	228.0
* Includes actual July to	December data.			

#### D. Significant Chaptered Legislation and Initiatives

#### 1. Proposition 36

Proposition 36, Substance Abuse and Crime Prevention Act of 2000, became effective July 1, 2001. A description of this initiative may be found in the Fall 2001 Projections publication.

#### 2. <u>Legislation</u>

A total of 15 legislative bills were chaptered since the Fall 2001 Projections, 3 of which will have no direct impact on the state prison system. The following 12 legislative bills will have an impact on the state prison system. However, because the impact of the length of confinement could not be estimated for these bills, they will not be included in the Spring 2002 Projections.

• Chapter 126, <u>Statutes of 2001</u> (SB 0009, Soto), broadens the scope of "criminal storage of a firearm of the first degree," by increasing the age of a minor to 18 years of age, who obtains a firearm and is involved in a related shooting.

- Chapter 235, Statutes of 2001 (AB 0078, Alquist), lowers the burden of proof required to toll the statute of limitations for the prosecution of specified sex crimes against a minor, when the crime is reported while the victim is still under age 21.
- Chapter 257, <u>Statutes of 2001</u> (AB 1709, Migden), creates a new alternate felony/misdemeanor for persons who have custody of a mischievous animal, and the animal causes serious bodily injury to any human being, as specified. Urgency clause.
- Chapter 478, <u>Statutes of 2001</u> (AB 0245, Wyland), expands the conditions of identity theft by removing the requirement that the identity theft be without the consent of the victim.
- Chapter 485, <u>Statutes of 2001</u> (AB 1004, Bates), requires more frequent updating of sex offender information for a person without a residence address.
- Chapter 486, <u>Statutes of 2001</u> (AB 1029, Oropeza), expands the scope of Vehicle Code provisions regarding confidentiality of records of persons in sensitive positions, by including specific employees designated by a chief of police or sheriff. Violation of the confidentiality requirements is a felony.
- Chapter 517, <u>Statutes of 2001</u> (AB 0380, Wright), allows evidence of a prior aggravated sexual assault of a child to be offered in a criminal trial as evidence of a defendant's character.
- Chapter 544, <u>Statutes of 2001</u> (AB 0004, Bates), requires a convicted sex offender located on the campus of any college, university or community college to register with the campus police chief in addition to the local law enforcement agency. Additionally, requires out-of-state residents who are required to register as sex offenders in their state to register as a sex offender in California if they are carrying on a vocation here.
- Chapter 559, <u>Statutes of 2001</u> (AB 1012, Corbett), increases the penalty by expanding the scope of felony child pornography provisions to persons who have one of the newly specified prior convictions.
- Chapter 715, <u>Statutes of 2001</u> (AB 1277, Cardenas), broadens the scope of existing requirements pertaining to pre-need funeral arrangements by requiring a funeral director to disclose provisions of a pre-need funeral agreement with a deceased, including whether benefits are unavailable or limited for any reason.
- Chapter 849, <u>Statutes of 2001</u> (AB 1078, Jackson), expands the scope, for persons who have a current conviction for driving under the influence (DUI) with a prior felony violation of vehicular manslaughter, by removing the condition that the prior must have occurred within the previous 10 years.
- Chapter 937, <u>Statutes of 2001</u> (SB 0626, Perata), broadens the exemptions for various firearm offenses that pertain to large-capacity magazines and assault weapons.

#### E. The Work Incentive Program (WIP)

This program allows eligible inmates to earn up to a six-month reduction per year in sentence length. The WIP applies to all felons who committed their offenses on or after January 1, 1983, and to those felons who committed their offenses before January 1, 1983, who chose to participate. Approximately 73 percent of the June 30, 2000, eligible population was earning one-half sentence reduction and participation is expected to continue at that level throughout the projection period. The Three Strikes Law limits credit earning to 20 percent for affected inmates. The Penal Code also limits persons who have been convicted of any violent felony to no more than a 15 percent sentence reduction.

#### F. Court Sentences

As shown in Table E, the average sentence for newly admitted felons and for parole violators returned with new terms (PV-WNT) decreased slightly from 54 months for the prior 3 fiscal years to 53 months. For the fifth consecutive year, the average work incentive credit is stabilized at 12 months. The anticipated time to serve continued to decline to approximately 34 months.

Table E

Average Sentence and Credits

For Felon New Admissions and PV-WNTs

(in months)

Fiscal Year	Sentence <sup>1</sup>	Pre-confinement <u>Credits</u>	$\frac{\text{WIP}}{\text{Credits}^2}$	Time to Serve
1992-93	48.0	6.6	17.7	23.7
1993-94	47.6	6.4	17.6	23.6
1994-95	50.9	6.9	15.0	29.0
1995-96	54.0	7.1	13.0	34.0
1996-97	56.0	7.1	12.6	36.3
1997-98	54.2	6.7	12.3	35.1
1998-99	54.5	6.7	12.5	35.4
1999-00	54.4	6.8	12.6	35.0
2000-01	53.2	6.9	12.0	34.3

<sup>&</sup>lt;sup>1</sup> Includes third-strike and other life commitments.

# G. Placement Need Projections

As in the Fall 2001 Projections, the Spring 2002 Projections of institution bed needs, by level, consider both inmate classification score level and administrative determinants, such as institutional security and public safety, as specified in Section 62010 of the

<sup>&</sup>lt;sup>2</sup> WIP credits based on eligibility.

California Department of Corrections' Operations Manual. It is assumed that the male felon reception center population will fluctuate proportionately with the changes in male felon intake. Special housing projections assume a constant proportion of the number of inmates of each classification level in each of these categories over the projection period.

# H. Parole Violators

For the six-month period July to December 2001, there were 33,303 male felon PV-RTCs or pending parole revocation (PendRev), 2,137 more than projected in the Fall 2001 Projections. The corresponding return rate was 54.5 (3.9 higher than projected). The Spring 2002 Projections assume the PV-RTC/PendRev rate will be about 3 points higher than projected in the Fall 2001 Projections due to Proposition 36, the additional plea negotiations required by the Armstrong II court case, and operational difficulties in processing revocations in a timely manner.

There were 6,174 male felon PV-WNTs for the July to December 2001 period, 87 more than projected in Fall 2001. The corresponding male felon PV-WNT rate was 10.1, only 0.2 higher than projected in Fall 2001. The Spring 2002 Projections assume the PV-WNT rate will be about the same as projected in the Fall 2001 Projections.

The graphs on the following pages illustrate actual and projected parole return numbers and rates. Figure 5 displays the actual number of male felon parole violator returns by quarter since June 1991. Figure 6 shows the actual and projected male felon PV-RTC/PendRev rates by quarter from June 1991 to June 2007, while Figure 7 tracks the actual and projected male felon PV-WNT rates.

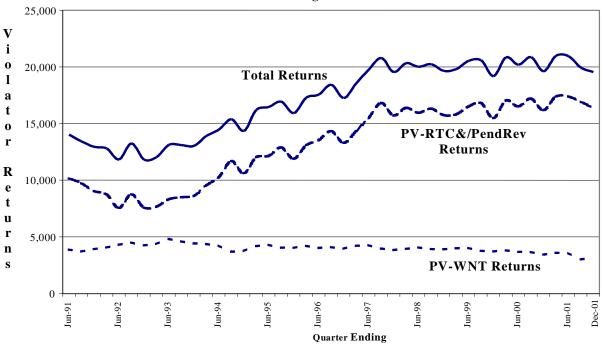

#### I. Felon Parole Population

On December 31, 2001, the felon parole population was 117,675, which is 1,551 lower than projected in Fall 2001. Between July and December 2001, this population increased by 2,047.

For the six-month period of July to December 2001, there were 16,264 male felon parolees suspended to parolee-at-large (PAL) status, 1,066 more than projected in Fall 2001. The corresponding PAL rate was 31.3, approximately 2.2 higher than projected. The Spring 2002 Projections assume that the male felon PAL rate will be about 2 points higher than projected in the Fall 2001 Projections.

There were 15,354 male felon parolees discharged from parole over the last six months. This was only 208 more than projected in Fall 2001. The corresponding discharge rate was 25.2, only 0.2 higher than projected. The Spring 2002 Projections assume that the male felon discharge rate will be about the same as projected in the Fall 2001 Projections.

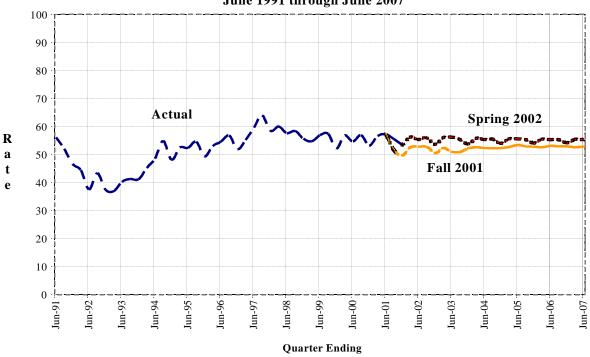

Figure 5
Male Felon Parole Violator Returns
June 1991 through December 2001

 $PV\text{-RTC/PendRevs}\ are\ prole\ violators\ returned\ to\ custody\ or\ pending\ revocation.$ 

PV-WNTs are parole violators returned with new term.

Figure 6
Male Felon PV-RTC/PendRev Rates
June 1991 through June 2007

PV-RTC/PendRevs are parole violators returned to custody or pending revocation.

PV-WNTs are parole violators returned with new term.

# III. SPRING 2002 POPULATION PROJECTIONS

The Spring 2002 Projections are summarized in Tables 1 and 2 and are presented in greater detail in Tables 3 through 16. Tables 3 and 4 present the quarterly institution populations, while Tables 5 and 6 present detailed projections by inmate placement needs. Tables 7 through 10 project the movement of institution populations (including civil narcotic addicts), and Tables 11 through 16 present detailed projections of the parole and outpatient population.

# J. Six-Year Population Projections

**Tables 1-2** 

Fiscal Years 2001-02 through 2006-07
